¹ CHARLES DICKENS, the distinguished novelist, when on his visit to America, stopped for a few hours in Wilmington on March 11, 1841.

The *Pennsylvanian* newspaper describes the condition of the State in 1845 as most excellent in every respect, that rapid and very great improvement had taken place in every section, and that "the use of lime and manure is what has mostly effected the beneficial change in the agricultural appearance of those counties. Immense quantities of this fertilizer are imported from New York and Pennsylvania as well as burnt in the State. From Delaware City to Cantwell's Bridge, and South through the whole country is in a state of high cultivation. In the vicinity of Smyrna, and back of it for many miles, reaching into the forests along the roads towards Dover and Leipsic, fine fields of clover and heavy corn have taken the place of stunted wild grass and corn producing little else than stubbins. Around Leipsic, on Raymond's and Little Creeks, the same change has been effected, as well as around Dover and Camden. Occasionally is seen a green spot rising toward Milford, Milton or Lewistown. But as yet the spirit of improvement has not extended into Sussex. But in Kent it is everywhere manifested. The crop of wheat at the late harvest throughout the State was large and of good quality, and perhaps it never yielded so abundant a crop of corn as the present. The value of land has risen in Kent and New Castle very considerably, and we are rather surprised to hear farmers selling tracts at fifty dollars an acre and upwards, that could have been bought some years ago for ten. We missed from many places forests of oak and hickory and found corn in their place. We incline to think such changes will not only be productive in a pecuniary point of view, but add to its salubrity. There is not much difference in the appearance of the villages compared with the period of which we speak. Smyrna has improved; Dover has grown; Milford, Milton, Lewistown, little or none; Cantwell's Bridge and Leipsic, however, have grown materially in population and activity. On the whole, the ardent spirit of agricultural improvement was pleasing to us, and the good work has already strengthened the hand of our gallant little neighbor. Long may she prosper and be proud of her agricultural, mechanical and commercial prosperity."

The present greatest production of the State—the peach crop—was, in 1845, just beginning to develop the capacity of the State in that direction. Major Reybold sent in that year, in one day, 5420 baskets of peaches, and up to September 1st had sent off 15,000 baskets, while the family had to that date shipped over 50,000 baskets.

In 1846 the "Loco" or Democratic party nominated for Governor, William Thorp of Kent, and John I. Dilworth of New Castle, for Congress.

The Whigs nominated Peter F. Causey of Kent, for Governor. Mr. Thorp was elected Governor, and Mr. Houston to Congress, the former by one hundred and seventy-five majority and the latter by ninety-eight. Thus each party was triumphant in a State

election, but in the Legislature the Whigs had a majority, and secured the election of a United States Senator in the place of Thomas Clayton, whose term expired March 3, 1847.

The Secretary of War, on May 10, 1846, by direction of the President, called for volunteers to prosecute the war against Mexico, of which three hundred and ninety was the number required from Delaware. At that date the revenue cutter "Forward," Captain Henry B. Nones, commander, with Lieutenant John McGowan, Charles W. Bennett, Richard S. Jones, Pilot Joseph Davis and forty-five seamen, shipped principally in the State, lay in the harbor of Wilmington. On May 21st sealed orders were received to proceed at once to the Gulf of Mexico, which were promptly complied with, and the "Forward" arrived at the seat of war in time to participate in the attack on Alvarado, and in the capture of Te-

CAPTAIN HENRY B. NONES.

basco. Captain Nones' gallantry and seamanship received the commendation of Commodore Perry, who wrote: "I am gratified in bearing witness to the valuable services of the Revenue Schooner 'Forward' in command of Captain Nones, and the skill and gallantry of his officers and men." Remaining on duty in the Gulf during the year, Captain Nones returned in the "Forward" to Wilmington, arriving on May 22, 1847, after the absence of exactly one year. The vessel showed many marks and hard knocks received in the engagements in which she had participated. Her commander was welcomed home by many friends. The "Forward" was dismantled and repaired at the old wharf, and completed August 3d of the same year. John Land, Samuel Wade and Andrew Fulmede, now (1887) residing in Wilmington, were with Captain Nones on the "Forward."¹

¹ Henry B. Nones, captain United States Revenue Marine, the son of a soldier of the American Revolution, was born in Philadelphia, Pa., in 1801. He served in the Florida War, 1835, and commanded the cutter

A recruiting office for the regular army was opened at the Swan Hotel, now the Gibson House, on Fourth Street, January 26, 1847. Captain Chaytor the same day began to raise a military company in Wilmington. After having recruited fifteen men in the city, of whom Joseph S. Wheeler, now (1887) a merchant tailor in the city, was one, they were transferred to Company E, of the Eleventh Regiment of United States Infantry, then in Philadelphia. This company was commanded by Captain Pemberton Wardell.

The company, being now full, on the 8th of April started for Mexico. They went by cars to Johnstown, Pennsylvania (then the limit of the railroad line), by canal to Pittsburgh, by steamboat down the Ohio and Mississippi Rivers, and on a sailing vessel to the Island of Brazos. From thence they proceeded to Point Isabel and to the mouth of the Rio Grande, and there took a steamer for Camp Palo Alto, where they joined the Eleventh Regiment, under command of Colonel Ramsay.

In the mean time Captain Chaytor, who was a physician by profession, continued recruiting men for the service, and on May 13, 1847, had a company of eighty officers and men. They received orders to at once proceed to Vera Cruz. George W. Chaytor was captain; Joseph S. Hedges, first lieutenant; Columbus P. Evans, second lieutenant. They marched from Wilmington to New Castle, and from there were transported by the Union Steamboat Line to Fort McHenry, at Baltimore, and from thence conveyed to Vera Cruz by a steamship in waiting for them. One month later they landed in Mexico. Captain Chaytor immediately returned on a "sick leave," and never went back to his company. Though he did not resign, the command of the company devolved upon Lieutenant Hedges first, and afterward upon Lieut. Evans. This company was also assigned to the

Eleventh Regiment of United States Infantry, and with that command participated in the numerous engagements and triumphant march of Gen. Scott's army from Vera Cruz to the City of Mexico. This was the only complete company from the State of Delaware that went to the Mexican War. The bravery of its men, in common with the entire Eleventh Regiment, was never questioned. Col. Graham, their heroic and much-loved commander, fell dead, pierced by twelve balls in the battle of Molino del Rey, in 1847. Many of the Wilmington boys became sick soon after their arrival in Mexico; some of them died in the service, while numbers of them were killed or wounded in battle. Lieutenant Joseph S. Hedges, after leading his company in the battles of Contreras, Molino del Rey and Cherubusco, fell sick of a fever, and returned home December 19, 1847. There were then thirty-five men in his company.

After the treaty of peace was signed the Eleventh Regiment was sent to Fort Hamilton, New York, where the officers and men were mustered out of service.

"A spontaneous meeting of citizens" was held at De Haven's Indian King Hotel, between Front and Second Streets, on Market, July 29, 1848, when it was decided to give the returning soldiers from the city an enthusiastic welcome. The reception committee was composed of twenty-eight citizens, with Mayor Alexander Porter chairman and William R. Sellars secretary. "The gallant men returned crowned with laurels from the field of glory" August 22, 1848, and they were tendered a banquet in the City Hall, and were received in a speech on behalf of citizens by Hon. John Wales. They were, Lieutenant Columbus P. Evans, Sergeants Benjamin F. Handy and Abijah Jackson and J. L. Patterson; Privates, Joseph S. Wheeler, Samuel Paul, John Bailey, William Hassam, Levin Stevens, Matthew Gosling, Paul H. Carter, Isaac Hill, Samuel Taylor, Alexander Henderson, George McMullen and John Crew of Chaytor's Company F, Eleventh Regiment. A few others returned a day or two later, but the entire number that came back was but a handful of those who went sixteen months before. Of those named two survive—Joseph S. Wheeler, of Wilmington, who did valiant service as an officer in the Civil War, and Benjamin F. Handy, now (1887) keeper of the lighthouse at Fort Mifflin. Samuel Jacobs, a member of the company from Sussex County, died at Lerma, Mexico, just as his comrades were leaving for home. Lieutenant Evans afterward became mayor of Wilmington.

Henry Rumor, of Brandywine, who enlisted at Wilmington in the regular army, was mortally wounded in the battle of Molino del Rey. Corporal John McMahon, an employee at Gareshe's powder-mills, William Russell, Foster Carson, James Dilke and John Schmidt were wounded in the engagement before the city of Mexico. Lieutenant James Tilton, formerly of Wilmington, but who enlisted in an Indiana regiment, was wounded at the storming of Chapultepec.

"Forward," as we have stated, in the Mexican War, being attached to Commodore Conner's squadron. He participated in the operations of the navy and gained particular distinction in the action at Tobasco. He was also actively engaged in the Civil War. He died at Wilmington, August 25, 1868.

Jefferson Henri Nones, son of Captain Nones, was born in Philadelphia; served in the Mexican War; was wounded at Puebla, Mexico; appointed a second lieutenant in the Second Regiment of United States Artillery in 1847; resigned his commission in 1856. Has since been engaged in journalism.

Washington H. Nones, son of Captain Nones, was born in Philadelphia; entered the United States Navy as third assistant engineer; died at Pensacola, Florida, September 9, 1853, of yellow fever.

John M. Nones, son of Captain Nones, made a voyage to China, and on his return was appointed a third lieutenant in the United States Revenue Marine; died, suddenly, on the 1st of September, 1859, in the twenty-fourth year of his age, on board the cutter "Forward," lying off Wilmington.

Albert Smith Nones, son of Captain Nones, was born in Eastport, Maine, while his father was commander on that station. When two years old his father was ordered to Wilmington, where the family have since resided. He was educated at St. Mary's College, and when the war broke out he enlisted in the First Delaware Cavalry. In January, 1865, he was commissioned first lieutenant in the First Regiment, Delaware Infantry, and assigned as an aide-de-camp on the staff of General Thomas Smyth, and was beside that officer when he was killed at Farmville, Va. Having served till the close of the war in 1865, he was commissioned a second lieutenant in the Eighth Regiment, United States Infantry. In 1867 he resigned from the army and entered into civil pursuits. He was an ardent and active member of the Grand Army of the Republic, and an aide on the commander-in-chief's staff at the time of his decease. He died at Wilmington April 24, 1887, after a brief illness, and was buried with military honors.

John Koontz was killed while standing between Lieutenant Evans and Sergeant Jackson, at Cherubusco; Samuel S. Thompson was wounded by the same ball.

George Windle, Thomas Hughes and John File, natives of Wilmington, served under General Taylor in a regiment of "Louisiana Tigers," whose motto was: "Do or die."

Sergeant Benjamin S. Hagany, a brave young Wilmingtonian, was killed in the battle of Buena Vista. He had left his native place some years before the Mexican War opened and enlisted in a Mississippi regiment under the command of Jefferson Davis. He was a son of John Hagany, a prominent local minister in Asbury Church. Two days before the battle he wrote to his brother in Wilmington, predicting that a battle would soon take place and that he would probably be among the slain. He bequeathed to his relatives his effects before entering battle.

John L. Donaldson, a native of Wilmington, enlisted in Louisiana and served under General Taylor in all the battles of his memorable campaign. He returned to his home July 9, 1847, and was welcomed by his former associates.

At a public meeting held in the City Hall, at Wilmington, April 12, 1847, Dr. James W. Thomson was president and J. W. Duncan, secretary. Congratulatory resolutions were adopted in recognition of the brilliant victories of General Taylor at Buena Vista and General Scott at Vera Cruz. On April 15th there was a grand demonstration in the city in honor of those victories. One hundred guns were fired at corner of Fourth and Washington Streets by Artillery Company A. There was a parade of local military organizations in the afternoon. In the evening the words "Honor" and "Fame" were reflected upon canvas in front of the City Hall and there was a fine display of fireworks. The streets were brilliantly illuminated.

Midshipman Thomas S. Shubrick was killed at the siege of Vera Cruz by a ball from the enemy while poisoning one of the guns of a battery to fire. He was about twenty-two years old. Six weeks before his death he was in Wilmington. His remains were brought home May 12, 1847, and received by the mayor, president of City Council and a committee of citizens, and by them attended to St. Peter's Catholic Church. The funeral ceremonies took place the next day, and thousands of citizens formed the procession, which moved to the family graveyard of the Du Ponts, on the Brandywine, where the remains were interred.

In the siege of Vera Cruz Midshipman Allen McLane, a descendant of his namesake of Revolutionary fame, performed many chivalrous deeds.

Lieutenant Robert C. Rogers was taken prisoner in the same engagement. Lieutenant George McLane was wounded at Cerro Gordo, and afterwards showed great bravery in the engagement before the city of Mexico.

Samuel E. Chambers, known in Taylor's army as

the "Delaware hero," showed undaunted bravery at Monterey. He first mounted the enemy's breastworks, obtained a foot-hold on the top of an eighteen-pounder and deliberately fired with great effect until the piece was captured by General Worth. Later he was wounded at the battle of Saltillo, and more seriously wounded at Resaca de la Palma. He stood by Henry Clay's son when he was killed in battle. He brought home to Wilmington, as a trophy, a lance which he captured from Don Mantero, an officer of the Mexican lancers, who was soon afterward killed. The *Philadelphia Ledger's* New Orleans correspondent gives further details of the gallantry and dash of Samuel E. Chambers. He joined the army at Corpus Christi and went with Captain Walker's Texas Rangers to the Rio Grande. On the 1st of May, when Walker made the desperate attempt to cut his way through to Taylor's camp for the purpose of opening communication, Chambers was one of the few men who went with him. In the encounter with the Mexicans they lost all but fifty men; Chambers had a horse shot under him. He captured another from a Mexican, which shared the same fate as the first, and was the last man to return to camp. Chambers did not admire the discretion of Captain Walker as much as he did his courage, and applied to Captain May for a place in his company in the expected battles of the 8th and 9th. The application was granted, and Chambers was the second man that crossed the Mexican battery in May's charge. He was found, after the battle, lying under his horse, by the side of one of the Mexican pieces, with his shoulder dislocated and much bruised, and entirely insensible. He was removed from the field, and has since recovered from his injuries. The correspondent adds that his comrades gave him the name of the "Hero of Delaware." Some of those who observed his conduct during the battle say he fought as if he intended to put to flight the whole Mexican army. With his sabre in one hand, he assaulted the men in charge of the battery, and with the other he discharged his pistols in their faces. Three bayonet wounds through the body which he received showed how desperate the contest was and how gallantly he stood his ground.

The father of the "Hero of Delaware" was Isaac Chambers, who resided in the State, though sometimes living in Philadelphia.

Lieutenant Robert C. Rogers, "whose career in the Mexican War teemed with adventures equaled only in the pages of romance," arrived in Wilmington Christmas day, 1847, from the "seat of war." He was most enthusiastically received by his friends in Wilmington and New Castle.

In November, 1846, while on board the "Somers," he assisted in destroying the Mexican barque "Creole," near the harbor of Vera Cruz. In the mean time his own vessel was wrecked, and he lost all his effects. Soon afterward he was captured while trying to save a brother officer. He was taken to Vera Cruz and condemned to death as a spy by a civil tribunal,

with no evidence to prove it. He was first imprisoned in Vera Cruz for three months, expecting that every day might be his last. When General Scott invested Vera Cruz he was marched on foot fifty miles inland and placed in a gloomy cell in the fortress at Perote. When General Scott began his march to the city of Mexico, he was moved to Puebla, where on one occasion he was taken out and stoned by a rabble of the enemy.

The foreign residents of the city then obtained an order to have him sent to the city of Mexico, where he was kept several weeks in rags and wretchedness. Three times he was taken from prison to be shot, once in front of General Santa Anna, whom he told that a thousand Mexican prisoners would be killed if they sacrificed his life so unjustly. By this means he was spared. Finally, during the excitement occasioned by the approach of the American army to the city, he escaped from prison disguised as a Mexican soldier, and joined the American army. At the storming of Chapultepec he was one of the seven men who first mounted the walls of the fortress. He was of great service to General Scott in the engagement before the city of Mexico by informing him of the position of the enemy and of the environments of the city.

He was appointed a first lieutenant for his bravery. The State Legislature of Delaware voted him a hundred-dollar sword "for service to the commanding general at the storming of Chapultepec and at the capitulation of Mexico." Soon after the close of the war, as one of the "forty-niners," he went to California and became there a prominent citizen. He is now (1887) in England.

Captain David H. Porter was born in New Castle County, February 19, 1805, and was killed in action February 10, 1848. He was lieutenant in the American navy and afterwards a captain in the Mexican navy. On the day of his death he was commanding a Mexican vessel, and after defeating two Spanish ships of the same class, was engaged by a third enemy of a superior character and surrendered for want of ammunition. He was killed while replacing his colors, which had been carried away by the enemy's guns.

General John Lane, U. S. A., a distinguished army officer, died in Wilmington, February 19, 1869. He was the son of Col. Robert Lane, and began his military career as lieutenant of infantry, May 25, 1813. On March 30, 1814, he was wounded in the attack on La Cole Mill, and the same year served as aid-de-camp to General Smith. November 1, 1823, he was made a captain, and November 21, 1836, rendered distinguished service at the battle of Wahoo Swamp. On October 13, 1845, he was promoted major of the Fourth Artillery, and commanded his regiment in Mexico two years later, where, on April 18, 1847, he was breveted lieutenant-colonel for bravery at the battle of Cerro Gordo, and, August 20, 1847, was breveted colonel for his services at the battle of

Contreras. On Aug. 3, 1852, he was promoted lieutenant-colonel First Artillery, and colonel Second Artillery July 23, 1851. General Lane was retired November 1, 1861, and was breveted brigadier-general March 13, 1865, for long and faithful services in the army.

Lieutenant James Tilton, of the Baltimore Voltigeurs, wounded in the storming of Chapultepec, was a native of Wilmington, but resided for several years before the war in Indiana. He visited Wilmington in May, 1847, six months before, and took away several recruits. The Voltigeur Regiment was in Pillow's division.

Lieut. Jefferson H. Nones, son of Capt. Henry B. Nones, on September 8, 1847, was detailed near Puebla, to the command of twenty-nine men, to effect a recovery of mules stolen by Mexican guerrilleros. He and his squad were surrounded by Mexican lancers, who killed ten of the Americans and took four prisoners. The rest, under the command of Lieutenant Nones, bravely defended themselves. He was severely wounded by a lance, but recovered at Jalapa. He was second-lieutenant in the Second United States Artillery, and for bravery at the siege of Puebla, on January 8, 1848, he was promoted to first lieutenant. After the war he was sent to Governor's Island, N. Y.

On February 20, 1849, the General Assembly appropriated one hundred dollars for a sword with suitable inscription for Brevet-Captain C. P. Evans, for service in Mexico.

The gallantry displayed on the field of battle in Mexico by the soldiers of the State did not reconcile the people to the justness of the war. Mr. Clayton presenting a memorial from citizens praying the Congress to terminate the war, explained the opposition to the war, and voiced the sentiment of the people against its prosecution. He said:

"During the debate on the Oregon question, as it is commonly called, in 1846, and some time, as I think, in the month of February of that year, I learned from sources to which it is not necessary now to advert, but on which I felt that I could rely, that our government had given orders to Gen. Taylor to break up encampment at Corpus Christi, and march on to the Rio Grande. The instant I heard that, and was satisfied of its truth—the public at the time having no means of knowing the fact—I was alarmed at the apprehension of a war with Mexico: and it is true as the honorable Senator from South Carolina has said, that I did meet him here in the Senate Chamber, and, in the course of a confidential private conversation, I did give him the information I then possessed. I told him, Sir, that I believed, unless some speedy action was taken either by himself or some other distinguished gentleman who could arrest the downward tendency of things arising from that order, we should be plunged into a war before we could possibly save ourselves. At that time, all men who were acquainted with passing events and the position of our affairs, were alike anxious to avoid a war with England, if it could be avoided consistently with the honor and interest of our country. All our efforts were devoted to the consideration of the best means by which we could, in the exercise of all prudence and judgment, which God has given us, avert from our country so great a calamity as a war with England upon the question of boundary. It was under these circumstances that I received the information and communicated it to the honorable Senator from South Carolina. His first exclamation was, 'It cannot be so! It is impossible!' precisely as he has related it in the course of this debate. I assured him it was beyond all doubt. 'Then,' said he, when I urged that some measure be taken, 'what can be done?' I, as a Whig, could not move in the matter; and I urged that unless the honorable Senator from South Carolina and his friends, or some other strong division of the gentlemen on the other side, would move in the matter, we on the Whig side would be utterly powerless. The honorable gentleman was, at that time, as he has very properly stated, devoted to the same great object which I confess absorbed my own mind and the minds of those around me—the prevention of a war with England; and he declined to

move, lest his usefulness in that great question should be in any degree contracted. In the course of a short time—

"Mr. Calhoun.—'The first conversation was in January, when you announced the fact; and the second conversation was in February.'

"Mr. Clayton.—'Yes, the Senator is right. Thus, Mr. President, I felt exonerated from all responsibility in the matter.' . . . On the 24th of April, and between the hours of 12 and 1 o'clock that day, I was talking with my friend from Kentucky (Mr. Morehead) and I said I had no doubt that we were then at war with Mexico, and I added, 'I believe we have had a fight.' Sportively we laid a small wager on the matter, and it turned out afterwards, for I made a minute of it, that I won the bet by about four hours, for Thompson's dragoons were cut up about four o'clock on the morning of the same day. Well, these events recalled and impressed upon my mind this great fact: that, while the houses of Congress remained in ignorance, and those who knew could not move, the President of the United States was ordering the army of the United States upon the Rio Grande, and taking a step of which the inevitable consequences proved to be war. . . . At the time war was declared, I denounced it as the act of the President of the United States, but I avowed myself, then, and I have ever since avowed myself ready to vote supplies for the war. I believe that the war was brought on by this thing of marching the army, without any necessity, from Corpus Christi to the Rio Grande; done, too, while Congress was in session, without one word having been communicated as to the intention of the President of the United States, either to the Senate or the House, or to any committee of either House of Congress, or, as far as I have been able to judge, to any member of either House of Congress. Under these circumstances, Mr. President, the responsibility of the war will probably rest on him who ought to bear it."

It was in February, 1846, that John B. Gough lectured for the first time on temperance in the Hanover Street Church, Wilmington; he returned in December of the same year and lectured again.

The Legislature assembled on the 5th of January and elected Dr. William W. Morris Speaker of the Senate; John M. Patterson, clerk; John Ellegood, sergeant-at-arms; and Lewis Thompson, Speaker of the House; N. B. Smithers, clerk; and Captain S. Murphy, sergeant-at-arms. All the officers were Whigs. The election of Senator resulted in the election of Presley Spruance by sixteen votes over Martin W. Bates, who received fourteen votes. Thomas Clayton declined re-election. On the 19th of February the House of Representatives of the State passed a bill for the gradual emancipation of slaves.¹

A tornado passed over Wilmington on Friday afternoon, June 5, 1846. The day was warm and beautiful, but towards evening clouds appeared in the west and within half an hour a violent storm burst upon the city with terrific fury. Trees in large numbers were blown down, awnings were torn from houses, many roofs removed and a number of houses blown down. It was the universal opinion of all the oldest inhabitants that the city was never before visited by such a storm. The range of it was two miles in width and that part of the city below Seventh Street suffered the greatest injury. The large new covered shed of Betts, Harlan & Hollingsworth's ship-yards was reduced to a perfect wreck. Twenty men were at work on a new iron steamer in the building; in attempting to escape, two of them were crushed to death by the falling building. The ship-house of Messrs. Thatcher was also entirely destroyed. The workmen all escaped unhurt except two who were

¹ Henry Swayne, of Centreville, New Castle County, introduced a bill in the General Assembly February 19, 1847, for the abolition of slavery, but it failed in the Senate by the vote of Speaker Morris. Mr. Swayne was also author of the resolution adopted by the Assembly the same month, committing the State against the introduction of slavery into the Territories.

wounded. Asbury Church, the building of the Colored Odd Fellows on Fifth Street, between Orange and Shipley Streets, and many dwellings were unroofed. The brig "John M. Clayton," the schooner "Gen. Jackson," the steamboat "W. Whilldin" and other smaller vessels were capsized. During the same month violent storms visited other places.²

On June 23, 1847, James K. Polk, President of the United States, arrived in Wilmington on a special train on a trip northward. He was met at the railway station by a reception committee of citizens, the City Council, composed of Dr. Henry F. Askew, Spencer D. Eves, John Rice, James Hanly and William F. O'Daniel.

The President, his Attorney-General, Nathan Clifford, of Maine, mayor of Wilmington, and the president of the City Council rode in an open barouche up French Street to the Brandywine and returned down Market Street to the City Hall, followed by a number of carriages containing citizens. The President entered City Hall and was greeted by an address from Colonel S. B. Davis, to which he responded briefly. After dinner he left in the steamer "Washington" for Philadelphia, accompanied by the following gentlemen of Wilmington: Alexander Porter, Henry Hicks (collector of the port), William R. Sellers, Edward G. Bradford, William P. Chandler, Charles Gordon, John Wales, John Connell, William Campbell, William G. Whitely, Jeremiah W. Duncan and James A. Bayard.

The President rode from Baltimore to Wilmington in an elegant car which was made by Bush & Lobdell, and this was its first trip. It was forty-eight feet long, eight and a half feet wide, with seating capacity of forty-six persons.

Lewis Cass, in 1848, as the Democratic candidate for President of the United States against Zachary Taylor, visited Wilmington. He was accompanied by United States Senators Benton, Allen, Houston, Hannegan and Foote. They arrived from Washington at 1.30 p. m., were escorted to City Hall, where James A. Bayard received them with an eloquent speech. Fifteen hundred people crowded into the hall. General Cass responded to the address of welcome. He mentioned in his speech that just fifty years before he had been a teacher of a school in Wilmington. A few of his pupils were in the audience. He was then sixty-eight years old. Short speeches were made by all the distinguished men who accompanied him. In the evening the party, escorted by a delegation under the lead of Vice-President George M. Dallas, proceeded to Philadelphia.

² The Philadelphia *Keystone*, June 12, 1846, ignorantly says: "It is now ascertained beyond a doubt that the telegraphic wire now in operation between Philadelphia, New York, Wilmington and Baltimore is the cause of the heavy and repeated rains we have had ever since they were erected. The electric fluid is attracted by their galvanic power and that sympathy which exists between gases, added to the wonderful and mysterious operation of nature, produce this wonderful phenomena, which we leave for the philosopher to explain more fully and scientifically."

Abraham Lincoln, while a member of Congress from Illinois, in 1848 during the political campaign which resulted in the election of President Taylor, made a speech from the balcony of the Athenæum, which stood at the east end of Fourth Street Market-House, Wilmington. Very little is recorded or remembered of what he said, except that it was one of his characteristic speeches which made him famous as a campaign orator.

His remains were conveyed through the city in a special train from Washington to Philadelphia, Saturday evening, April 22, 1865. Hundreds of persons from Wilmington went to Philadelphia the next day to view the remains as they lay in State at Independence Hall.

The long-standing controversy between the United States and the States of Delaware and New Jersey, for the ownership of the Pea Patch Island, in the Delaware River, was submitted to the sole arbitration of the Hon. John Sergeant, a distinguished lawyer of the Philadelphia bar, before whom the merits and law of the case were argued at great length by James A. Bayard and John M. Clayton, on the part of the United States, Messrs. George M. Bibb and John H. Eaton on the part of New Jersey. Mr. Sergeant delivered his award on the 15th of January, 1848, in favor of the United States. The boundary line between New Jersey and Delaware, as determined in this award, starts from the highest part of the Delaware where it touches New Jersey, down to within twelve miles of New Castle, the middle of the river being the west boundary of New Jersey. From that point, south for the next twenty-four miles, the State of Delaware runs entirely across the river to low-water marsh on the Jersey shore. After that, the middle line of the river (or bay, as it soon becomes) is again the boundary and so continues till its termination in the Atlantic Ocean.

The largest public meeting that, perhaps, was ever held in the State, assembled in Wilmington on January 21, 1848, of the friends and supporters of General Taylor. General N. Young presided, and resolutions were adopted recommending General Taylor for the President of the United States as the people's candidate. Meetings throughout the State were advised to be called. The meeting was addressed by J. Wales of Wilmington and P. K. Smith of Philadelphia.

Soon after the early and successful battles in the Mexican War and before the Presidential question had been much agitated, the name of General Taylor began to be mentioned in connection with the Presidency of 1848. The Whig National Convention met in Philadelphia on June 7th, and he was nominated on the 9th, John M. Clayton of Delaware receiving one vote. Messrs. Cass and Butler were the Democratic nominees. At the fall election P. Reybold, Samuel Cotts and G. H. Wright, the Whig electors, carried the State, also the Whig Representative in Congress, and elected a majority of that party in the

Legislature. In 1850 a Temperance party was organized in the State, which nominated Thomas Lockwood of Frederica, Kent County, for Governor, and Dr. Waite of New Castle for Congress. A number of the Whigs supported this ticket, which resulted in the election of Williams H. Ross, the Democratic nominee for Governor, by a small majority; Mr. Riddle for Congress and the rest of the Democratic ticket. The Democrats had now for the first time in many years entire control of the State Government. Hon. John M. Clayton entered President Taylor's Cabinet March 7, 1849, but upon the death of the President, July 9, 1850, and the accession of Millard Fillmore,¹ he was succeeded on July 20, 1850, by Daniel Webster. As soon as Mr. Clayton retired from President Taylor's Cabinet he returned to Delaware and immediately assumed the leadership of his party, which was now on the wane. The Legislature had passed a law for the convening of a convention to amend the Constitution of the State. This was not as was alleged in accordance with the provision contained in the Constitution of 1851, and as Mr. Clayton was bitterly opposed to the calling of a convention, he fought the campaign of 1852 on that issue. The Whigs carried the House of Representatives by a majority of three, but as the Democrats had six members of the Senate who held over, they still had a majority of one on joint ballot.

The Whigs nominated Mr. Clayton for United States Senator, but the Democrats refused for several weeks to go into joint ballot. In the mean time a violent attack was made upon the honor of Mr. Clayton in the United States Senate by Messrs. Stephen A. Douglas, Lewis Cass and Mason, of Virginia, charging him with duplicity in the Clayton-Bulwer treaty negotiations. As soon as John Sorden, a

¹ Millard Fillmore, the thirteenth President of the United States, and his entire Cabinet, on their way to New York, stopped at Wilmington for one hour on Monday, May 12, 1851. Mayor Columbus P. Evans, the City Council and a committee of citizens went to Elkton in a special car to meet the distinguished party. At Elkton they were received in a brief speech by Hon. John Wales, president of the citizens' committee, and at one o'clock the train arrived in Wilmington. A procession was formed which moved to City Hall, where the mayor delivered an address of welcome and the President responded as follows:

"Mr. Mayor,—Permit me, sir, to return you my most cordial and heartfelt thanks for this generous reception, and could I for a moment suppose that it was to me personally I should be overwhelmed. It is but a tribute from the authorities and citizens of Delaware to the government under which we live, and an evidence of her devotion to the glorious Union under which we have so long prospered. You may truly that Delaware set her first seal to the national constitution, and when I look around me and see the intelligence of this noble State here assembled I can well believe that she will be the last to disgrace it. Other States may excel in population, but none can surpass you in patriotism. I must again reiterate my warmest thanks for the generous reception, more on behalf of my associates than myself."

Hon. John F. Crittenden also made a speech. A delegation from Philadelphia, headed by Mayor Gilpin of that city, a native of Wilmington, arrived to meet the President in the morning boat, and were entertained at Foster's Indian Queen Hotel. At two o'clock the President and the entire party left on the steamboat "Roger Williams" for Philadelphia. As they passed to the boat the revenue cutter "Forward" fired a national salute. A rich banquet, prepared for the occasion, was partaken of on the way up the Delaware. The members of President Fillmore's Cabinet who accompanied him were Daniel Webster, Secretary of State; Thomas Corwin, Secretary of the Treasury; John P. Kennedy, Secretary of the Navy; Thomas Ewing, Secretary of the Interior; John J. Crittenden, Attorney-General. Daniel Webster in the evening made a great speech in front of the United States Hotel in Philadelphia.

Democratic member of the State Senate and a personal friend of Mr. Clayton, heard of the charges made against Mr. Clayton, he announced his determination to vote to go into joint ballot so as to enable him to vote for his friend that he may go back to the Senate and defend himself. The dead-lock was thus broken and Mr. Clayton was elected United States Senator. Franklin Pierce¹ was elected President in 1853, having received the electoral vote of Delaware. The campaign was the last fought by the Whigs, as the majority of that party drifted into the "American" party. This party was very successful in the campaign of 1854, electing P. F. Causey Governor and the entire "American" ticket, by an aggregate majority of about one thousand votes. Peter Foster Causey, who was elected Governor of the State from 1854 to 1858, was in many respects a very remarkable man. He was born near Bridgeville, in Sussex County, January 11, 1801. He was the son of Peter F. and Tamzey Causey. His father early in life was an intelligent and progressive farmer and a man of fine capabilities. When the son was four years old his parents moved to Caroline County, Maryland, and his father there engaged in agricultural pursuits until 1815, when they moved to Milford. The bent of mind of both father and son was to engage in a business, giving an opportunity for the development of their native energy and capacity more than farming afforded in that early day. The education of the son was completed by the time he was sixteen years old, and he then began a brilliant and prosperous career in the mercantile business at the present site of the First National Bank of Milford, the firm from 1817 to the time of his father's death being Peter F. Causey & Son. The merchandise sold in their store was purchased in Philadelphia and New York, and the son, when in his seventeenth year, regularly thereafter went to those cities to make the purchases. His knowledge of business seems to have come to him by intuition, as his transactions at so early an age were marked by that quickness of perception, extraordinary judgment and keen foresight, which were his distinguishing traits through life. The trip to New York was then made by stage, taking nearly a week from Mil-

ford. The goods were sent here in vessels. It was in 1825 that Peter F. Causey, the future Governor, embarked alone in business, which included a large general store, and the purchase and sale of grain, wood and lime. As time progressed his trade increased, and his establishment became a centre of interest to the town of Milford, a large section of the adjoining counties of Kent and Sussex and portions of Maryland. Mr. Causey, when yet young, was universally recognized as the foremost man in the community in which he lived. About 1820 and for several years afterwards he was engaged in mining iron ore, which he obtained in large quantities on his own land in Nanticoke Hundred. He shipped it on his own vessels to Philadelphia. Whatever he attempted to do he made a success and he soon accumulated large means. He made his permanent investments in real estate near his home, never operating in stocks. He purchased two saw-mills, a tannery, the Haven Flouring Mills, the Milford Mills and what is now known as the Marshall Mills, and operated all of them in connection with his other business. He used his own vessels for the shipment to New York and Philadelphia of the grain he purchased and the flour he ground in his mill.

In 1840 he went out of the general mercantile business and devoted his time to his large land interest, aggregating fifteen hundred or more acres, divided it into farms, and to the management of his flour-mills, sawing-mills and tannery, nearly all of which property is now owned by his children.

As a public-spirited citizen he favored every enterprise or movement that benefited the town and community, trained many young men in correct business habits in his store and took the greatest care to aid and encourage them when they entered business for themselves. He favored and supported the public school system, and was instrumental in securing well-educated and practical teachers from the North to teach the town academy; advocated the cause of temperance and morality in all its phases; was kind and generous to the poor, and a liberal supporter of the Methodist Church, of which he was a member.

He was noted for his highly commendable life and character, was upright in all his dealings and just and true to his fellow-men, and enjoyed the fullest confidence of all with whom he associated.

He was of large stature, being six feet tall, and weighed two hundred pounds, had a striking presence, commanding personal appearance and dignified bearing.

Governor Causey was elected by the Whig party to represent his county in both branches of the State Legislature, was a delegate to the National Whig Convention which nominated General Harrison for the Presidency, who was elected in 1840, and was a delegate to the convention at Baltimore in 1844 which nominated Henry Clay for the same office. In the fall of 1854 he was chosen Governor of Dela-

¹ Franklin Pierce, during the last year of his Presidential term, was enthusiastically received by the people of Wilmington, on September 20, 1856. He passed through the city on his way to his home. A delegation of the Jefferson Association, of this city, went to Elkton to meet him. Dr. Henry F. Askew, in behalf of the association and of this city, received him in an impromptu speech, touching upon the patriotism of Delaware in the Revolution, and of her devotion to the Union.

The President responded as follows: "I thank you, my fellow-countrymen, for your generous courtesy. The noble and patriotic sentiment that has just been uttered in alluding to the blood of the heroes of the Delaware line in the Revolution fills me with the deepest emotion. Such sentiments should bind the States together as with hooks of steel. The blood of your fathers, which honored the State of Delaware, and of mine, which stained the hills of my native State, New Hampshire, will, I trust, arouse so many strong arms and stout hearts that the sentiment of disunion will not dare to exhibit itself except in words. With these few remarks, I again thank you for the attention you have accorded me."

The train, which arrived in Wilmington at 3 p.m., in less than half an hour left for Philadelphia. Mayor Vaux, of that city, headed a delegation which came to Wilmington to meet the President and escort him there.

ware. He took his seat in January, 1855, and served the Constitutional term of four years. During this time he showed that rare executive and administrative ability that characterized his successful business career. His course in the gubernatorial chair was that of a man thoroughly devoted to the interests of his native State, and when he retired from the office he received the highest praise from his constituents.

A pleasant and gratifying coincidence was that while Mr. Causey was Governor of Delaware, his nephew and intimate friend, Trusten Polk, also born near Bridgeville, Sussex county, Delaware, was elected Governor of the State of Missouri, and subsequently became a Senator in Congress from the same State.

When Mr. Causey was Governor he made a number of important appointments, among which were that of Hon. Samuel M. Harrington, chief justice, and afterwards chancellor of Delaware; Hon. Edward W. Gilpin, chief justice, to fill the vacancy caused by the promotion of Justice Harrington, the now distinguished chief justice; Hon. Joseph P. Comegys, United States Senator during the interim of the Legislature in 1856, to fill the vacancy caused by the death of Hon. John M. Clayton; and Hon. John W. Houston, associate judge of the Superior Court, resident in Kent County. One very commendable feature of his appointments was that of Judge Gilpin, who differed from the Governor in politics, to the position of chief justice of the State, which was one of the best-received appointments ever made in Delaware. It was done on account of Judge Gilpin's eminent fitness for the position.

During Governor Causey's administration an act proposing an amendment to the State Constitution for the purpose of abolishing life tenures in office was passed February 4, 1857, which, under the Constitution of the State, had to be approved by the Governor before it was considered by the people. In his next annual message he set forth valid and satisfactory reasons why he did not approve of the proposed amendment.

His action on this matter was sanctioned by all parties then, and virtually settled the question.

A few years after his retirement to private life Governor Causey's health failed him, and during the remainder of his years until his death, February 15, 1871, he was an invalid.

He was married, in 1825, to Maria Williams, daughter of John Williams, Esq., of Kent County, a descendant of one of the earliest settlers of Delaware. Her brothers were representative business men of Milford, and her ancestors were influential in the affairs of Kent County. She is now living, in her eighty-fifth year, at the Causey mansion in South Milford, surrounded by her children.

This historic house, the oldest in the town of Milford, was built in 1750 by an Englishman named Levin Crapper. It was the residence for many years of Governor Rogers of Delaware, whose remains lie on the

grounds. It was remodeled in 1850 by Governor Causey when he first occupied it. The surviving children of Governor Causey are William F. Causey, Peter F. Causey, John W. Causey and Maria E., wife of Robert H. Williams.

The defeat of the Know-Nothing party in the campaign of 1856 was due to the passage of a prohibitory liquor law. The Democrats carried the State for Buchanan for President, and their State ticket by a majority of about two thousand, out of about fourteen thousand votes cast. The Republican ticket, headed by John C. Fremont in 1856, only received three hundred and five votes in the entire State.

Those who opposed the Democrats in 1858 organized the "People's Party," but in the fall campaign were defeated by two hundred and three votes, the Democrats electing William Burton for Governor and a majority of the Legislature.

Governor Burton was born October 16, 1789, and died August 5, 1866.

His father, John Burton, an enterprising farmer of Sussex County, married Mary Vaughan, who, after the death of her first husband, became the wife of Robert Frame; and their son Robert Frame, the half-brother of Governor Burton, was one of the ablest lawyers of his day.

The boyhood of Governor Burton was spent on his father's farm, and he acquired his preparatory education in the local academies, where he was a faithful and diligent student. He studied medicine in the office of Dr. Sudler, of Milford, and was graduated from the Medical Department of the University of Pennsylvania. He began the practice of his profession in the town of Lewes, but soon removed to Milford, where he lived during the remainder of his successful career. He had many of the endowments and requirements of the ideal physician—being not only well-versed in the science of medicine, but eminently sympathetic in his nature and diligent in his efforts to alleviate suffering—he secured a large practice and enjoyed universal popularity in the town and surrounding country. He was proud of his success as a farmer, and dispensed a free and large-hearted hospitality at his comfortable home on a farm in the suburbs of Milford. He was charitable to the poor, companionable to the young and the idol of little children.

In 1827 he was commissioned a brigadier-general of the militia of Kent County, and filled that position for two years. Dr. Burton had always taken an active interest in State politics, and in the days of the ascendancy of the Whig party was one of its acknowledged leaders. He studied the issues of the day and delighted to engage in the intelligent discussion of them. In 1830 he was elected sheriff of Kent County. In 1848 he joined the Democratic party, and in 1854 he was nominated for the office of Governor, but was defeated by the *Know-Nothing party*. In 1858 he was again the standard-bearer of his party for Governor, and as has been stated, was elected, and

of the State Constitution for the removal of any officer was passed. The bill, under the Constitution of this State, to be removed by the Governor in case of a crime by the people. In his next annual message he set forth vivid and convincing reasons why he did not approve of the proposed amendment.

The action of the matter was somewhat different. It passes them, and does not so completely obliterate.

A few years later I was asked to create a laboratory course, but I was not given a budget. The restriction of no monetary resources was a challenge. The result was a novel idea.

[illegible][illegible]

2. In 1941, I was recruited by the FBI to work for the agency which later became the "FBI School of Criminal Justice" in Quantico, Virginia. While I was employed by the Federal Bureau of Investigation, I met W. C. Coker and Mr. J. Edgar Hoover.

The election of 1856 shows nothing particularly strange. The election of 1856 was due to the passage of a protective tariff law. The Democrats carried the State by a majority of 10,000 votes, and their State ticket carried a majority of nearly 100,000 votes, or about 100,000 votes and votes cast. The Republicans in the county of York Co. placed out in 1856, only received the 100,000 votes in the entire State.

Those who opposed the Democrats lost. Saved the "Peoria's Party," but in the end they were defeated by two hundred and three votes. Democrats electing William Burton for governor and a majority of the Legislature.

Glover A. Leaton was born October 10, 1872, at
 1014 Lexington, Mass.

His father, John Burton, an enterprising farmer of Sussex County, married Mary Vaughan, who, after the death of her first husband, became the wife of John Frame; and their son Robert Frame, a half brother of Governor Burton, was one of the successful men of his day.

He was a member of the Governor's Council and was speaker of the latter's Council, and he acquired his preparatory education in the New England States, where he was a diligent and diligent student. He studied medicine in the office of Dr. S. C. Milford, and was graduated from the Medical Department of the University of Vermont. He began the practice of his profession in the town of Lewis, but soon removed to New York, where he lived during the remainder of his professional career. He had many of the qualities of a well-trained physician, being not only well versed in his science of medicine, but also sympathetic in his nature and diligent in his efforts to do his best for his patients. He secured a wide and universal popularity in the town of Lewis, and was a member of the Lewis and Clark Association. He was proud of his son, and he lived a free and large life, and he died at his comfortable home on a farm in the town of Lewis, New York. He was cheerful and companionable to the young and the old, and he was a member of the Lewis and Clark Association.

From 1870 he was commissioned a 1st lieutenant of the militia of Kent County, and he served for two years. Dr. Burton had a very deep interest in State politics, and he was usually found at the Whig party was one of its champions. He started the first school designed to educate the freed slaves in 1870. In 1871 he was elected a member

In 1948 he joined the Democratic Party and was elected to the House of Representatives by the Alaska voters. His political views, particularly his opposition to the atomic bomb, have been stated, with

William Burton

CHAPTER XVIII.

THE CIVIL WAR.

assumed the duties of his office in January, 1859. Early in his term the Governor's position became one of great perplexity and weighty responsibility, owing to the breaking out of the Civil War. His efforts, officially and individually, were directed at first towards effecting a peaceful solution of the difficulties between the contending sections, and, to further this end, which accorded with the prevailing sentiment of the people of his State at that time. After all efforts toward peace had failed, however, he gave his official support to the policy of the National Government to maintain the Union by the force of arms. Of the first call for troops made by President Lincoln, Delaware was expected to furnish one regiment of seven hundred and eighty men. There being no militia law then in force, the State had no troops to call out. In compliance with the request of the Secretary of War, Governor Burton, April 23, 1861, issued a proclamation calling for the enlistment of volunteers, which was the utmost extent of his power as the State's executive. By the 1st of May the Governor announced that the full quota of the State had been furnished; and, afterward, three regiments of one thousand men each were raised and equipped, and sent into the field. During these troublous years of his term, the chief executive maintained a wise, equable and efficient zeal in the discharge of his executive functions, and retired from office January 1, 1863, with the general approval of not only his party, but of the whole people of Delaware—for while steadfastly supporting the integrity of the Union, he was vigilant in maintaining the rights and dignity of the State. He died three years later, at the age of seventy-seven.

Governor Burton was a warm supporter of the creed and claims of the Protestant Episcopal Church, and was for many years senior warden of Christ Church, Milford.

He was twice married—first to Mrs. Eliza Walcott, daughter of William Sorden, of Kent County, who died early. In 1830 he was married to Ann C. Hill, daughter of Robert and Rhoda (Davis) Hill, who lived, after her widowhood, until October 14, 1885. They had one child, Rhoda, who married Alfred R. Wootten, Esq., who was attorney-general of Delaware at the time of his death, in 1864, also leaving but one child, Mary Robinson Wootten, now the wife of David T. Marvel, Esq., of Georgetown.

In the campaign of 1860 the Breckinridge Democrats nominated Benjamin T. Biggs, of New Castle County, for Congress; the Douglas men, Elias Reed, of Kent; and the People's party nominated George P. Fisher, of Kent. The latter was elected by a plurality of some two hundred and fifty votes. The result of the Presidential election of 1860 is given in the next chapter.

On the 6th of November, 1860, the election for a President of the United States took place. The candidate of the Republicans was Abraham Lincoln, of Illinois. The distinctive principle he represented was the non-extension of slavery to the Territories of the United States, and its speedy removal from all places belonging to or under the exclusive control of the Federal government. Stephen A. Douglas was the candidate representing the principle of non-intervention, which was understood to mean that Congress should not interfere with the question of slavery or no slavery in a Territory, but that it should be left to the inhabitants to determine when they assembled in convention to form a State Constitution. The friends of Mr. Douglas consisted of a portion of the Democratic party. John C. Breckinridge was the candidate representing the principle of protection to slavery in the Territories, regarding slaves as a species of property recognized in the Constitution of the United States. After the Territories became States the whole question was to be under their control. The friends of Mr. Breckinridge constituted that portion of the Democratic party which did not support Mr. Douglas. John Bell was the candidate of a party whose platform was "the Constitution, the Union and the enforcement of the laws."

The vote of the people at the election was as follows: Lincoln, 1,866,452; Douglas, 1,375,157; Breckinridge, 847,953; Bell, 590,631. Mr. Lincoln received the vote of California, Connecticut, Illinois, Iowa, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey (four), New York, Ohio, Oregon, Pennsylvania, Rhode Island, Vermont and Wisconsin—or one hundred and eighty electoral votes, from seventeen States. John C. Breckinridge received the vote of Alabama, Arkansas, Delaware, Florida, Georgia, Louisiana, Maryland, Mississippi, North Carolina, South Carolina and Texas—or seventy-two electoral votes from nine States. John Bell received the vote of Kentucky, Tennessee and Virginia—or thirty-nine electoral votes from three States. Stephen A. Douglas received the vote of Missouri and three electoral votes from New Jersey,—or twelve electoral votes from one State and a portion of another. Lincoln's majority over Douglas was 491,295, over Breckinridge, 1,018,499; over Bell, 1,275,821, and the aggregate majority of these candidates over Lincoln was 947,289, out of a suffrage of 4,680,193.

In Delaware, Samuel Jefferson, John Mustard and Robert B. Houston, the Breckinridge electors, carried the State by a plurality of 3483 votes. Mr. Breckinridge received 7347 votes, Bell 3864, Lincoln 3815 and Douglas 1023, out of a total of 16,049 votes cast.

The measures and disputes which resulted in the War of 1861-65 all had reference to the existence of

slavery in the Southern States. Delaware was classed with the Southern or slave-holding States, in distinction from the Northern and free-labor States. According to the census report of 1860, there were in the State 90,589 white inhabitants, 19,827 free colored and 1798 slaves. Of the slaves, 1341 (three-fourths) were in Sussex County, 254 in New Castle, and 203 in Kent; of the free colored, 8188 were in New Castle, 7271 in Kent, and 4370 in Sussex; of the whites, New Castle had 46,355, Sussex 23,904, and Kent 20,330.

In 1860-61 the Federal government was conducted by those who were mixed up in the slavery measures and disputes on the one side, and the Confederate government by those involved in them on the other. The opinion entertained by Southern statesmen previous to the difficulties was that the Constitution of the United States protected the institution of slavery in the States, in so far as it withheld from the government all power to interfere with the institutions of the States, as it required the government to restore fugitives, as it gave a representation in Congress based upon their numbers, and as all direct taxes were to be estimated on a basis including this population.

Those known as radical abolitionists in the Northern States held the same opinions relative to the Constitution of the United States, and for this reason they denounced it as a "a covenant with death and a league with hell." In their view disunion, immediate and complete, was the only feasible means by which to be released from its obligations. Those known as anti-slavery men had a distinct political organization, and took a position in the rear of the former. They held a similar opinion relative to the powers of the Federal government over the institutions of the States, but devoted their efforts to defeat the operations of the law for the recovery of fugitives, and to aid the slave in escaping from his servitude; to thwart on every occasion, if possible, all measures tending to promote the interests of slaveholders, and to persuade persons tenderly conscientious that slavery was a sin which it was their duty to exterminate, and that the black man was the equal of the white man. The remainder of the people held the same opinion on the powers of the Federal government over the institutions of the States. Indeed, it may be said there was not a dissentient opinion on that subject. But while the great mass of the people in the Northern States held these views, they also considered that slavery was an institution abolished as profitless at the North, and, therefore, one in which they had no concern.

The thoughtful reader will see that here were the seeds of an attempted dissolution of the Union of the States. So long as the persons of anti-slavery or abolition views were few and insignificant they remained in obscurity; but if the hour should ever come in which they should hold the control of the Federal government, it would involve a concession

on their part or on that of the slaveholders, or a rupture. There was nothing to encourage the patriotic citizen to hope that concessions would be made if this hour of fate should ever come. The anti-slavery men of the Northern States and the slaveholding citizens of the Southern States quickly grew to be antagonists, and their differences and disputes were conducted with the most bitter and vindictive denunciations to be found in human language. On the floor of Congress members from the Northern States, holding high positions for intelligence and piety, denounced the slaveholding citizens of the Southern States as "bartering their own children," as "dealing in the image of God," as "buying and selling the souls of men," as "making merchandise of the Holy Ghost."¹ The reply to such expressions was "contemptible fanatic," etc., etc.

Meanwhile the anti-slavery sentiment grew apace, and there became enough who held those views to control State elections, by acting as a third party, and thus in one instance to control the vote of a great State at a Presidential election, which was thereby decided. The progress of these views now was more rapid; slavery was attacked in both Senate and House of Congress at every assailable point. To satisfy the scruples of the citizen who knew his duty of non-interference under the Constitution, and the stings of a conscience called to act under a belief that citizenship with a slaveholder was sin, the principle of a higher law was proclaimed, which relieved the conscience from the obligations of the Federal Constitution. The progress of anti-slavery views now was rapid. One of the great political parties of the country was demoralized and broken up, and an anti-slavery candidate for the Presidency brought forward, who carried every free State but four, and thus was almost successful. Four years of bitter anti-slavery contests ensued in which the object was to defeat the extension of slavery to any Territory by preventing the creation of any authority for its existence there. This was to be done by a direct prohibition by Congress, as some urged, or by absolute non-interference by Congress, but by the decision of the settlers. Meantime the slave-holders were told that the contest was "irrepressible," that it would go on, from the very nature of the question, until all the States became free, or all became slaveholding. At length by the Presidential election of 1860, the administration of the Federal government was put into the hands of the anti-slavery party. Such had been the bitterness of the contest that seven of the extreme Southern States took steps immediately to withdraw from the Union. The reason on which they attempted to justify their acts was that, in their opinion, it was the determined purpose of the Republican or anti-slavery party to so interfere with their domestic institutions as to render it unsafe for them longer to continue in the Union. On the other hand, this great party

¹ See speeches of Horace Mann, successor to ex-President John Quincy Adams, and others.

after a struggle of years, had won the rightful possession to the sceptre of the nation, and were indignant at these proceedings. They preserved a moody silence, and defied the consequences.

The Congress of the United States assembled on the 3d of December, 1860, and on the 20th the State Convention of South Carolina, after a brief debate, passed the ordinance of secession, by a unanimous vote. Mississippi followed the example of South Carolina on the 9th of January, 1861; Alabama and Florida, January 11th; Georgia, January 20th; Louisiana, January 26th; Texas, February 1st; Virginia, April 17th; Tennessee, May 6th; Arkansas, May 18th; North Carolina, May 21st; and Kentucky, November 20th.

Delaware, as an exposed and frontier slaveholding State, had a larger practical interest in the maintenance of the guarantees of the Constitution in regard to slavery than many of the inflammable seceded States. From her geographical position, she had a heavier stake, proportionately, in the preservation of the Union, so far as her material prosperity was concerned, than many of her sister Commonwealths. This was clearly demonstrated by a consideration of the sources of her wealth, the nature and direction of her industry and of her commerce, external and internal. Bound to the Constitution and the United States by every tie that interest could weave or strengthen, she had been uniformly faithful to the performance of every obligation imposed by the one or suggested by her devotion to the other.¹

Not only this, but in all the dissensions which sectional feeling and fanatical agitation had promoted, her support had always been given to moderate doctrines and conciliatory counsels. Sympathizing with the South in its wrongs and just resentments, and ready at all times to make common cause with it in the Constitutional maintenance of its rights, Delaware had always kept aloof from its mad heresies and passionate bitterness. Outraged more than any of the cotton States by the aggressions of the North, and prompt to repel them, within the limits of her Constitutional resources and Federal allegiance, she did nothing whatever to widen the breach between the antagonistic sections of the republic, or to weaken the hands of those conservative Northern citizens who were at this time nobly struggling to maintain the good faith and integrity of the national compact. In the position which Delaware had thus historically assumed the election of the 6th of November had rooted her still more firmly. She had given her

¹ At the second session of the Thirty-sixth Congress, which began at Washington on Monday, December 3, 1860, Senator Willard Saulsbury, of Delaware, in the debate on printing the President's message, said: "My State having been the first to adopt the Constitution, will be the last to do any act or countenance any act calculated to lead to the separation of the States of this glorious Union. She has shared too much of its blessings; her people performed too much service in achieving the glorious liberties which we now enjoy, and in establishing the Constitution under which we live, to cause any son of hers to raise his hand against those institutions or against that Union. Sir, when that Union shall be destroyed by the madness and folly of others (if, unfortunately, it shall be so destroyed), it will be time enough then for Delaware and her Representatives to say what will be her course."

electoral vote to the candidates by whom the Constitutional rights of the South were most emphatically and exclusively represented, and at the same time, through her whole press, and with the united voice of all the political parties within her borders, she proclaimed at this period her fixed determination to take her stand within the circle of the Union and protect herself by the Constitution only.

On the 2d of January, 1861, the Legislature assembled at Dover, and on the next day the commissioner from Mississippi, Henry Dickinson, appeared before the House, and made an address. In the name of the State of Mississippi, he invited Delaware to join the Southern Confederacy, which was about to be formed. He claimed the right of the State to secede from the Federal Union, and said, if it was not admitted, war would be inevitable. After his speech, the House resolved unanimously, and the Senate concurred by a majority, that, "having extended to the Hon. H. Dickinson, the commissioner of Mississippi, the courtesy due him, as the representative of a sovereign State of the Confederacy, as well as to the State he represents, we deem it proper and due to ourselves and the people of Delaware to express our unqualified disapproval of the remedy for existing difficulties suggested by the resolutions of the Legislature of Mississippi."

On the 19th of January the Legislature of Virginia passed a series of resolutions which led to the Peace Conference at Washington on February 4th, in which twenty States were represented. The delegates appointed from Delaware were George B. Rodney, Daniel M. Bates, Henry Ridgely, John W. Houston and William Cannon. In the instructions to her delegates, Delaware declared that, in the opinion of "this General Assembly, the people of Delaware are thoroughly devoted to the perpetuity of the Union, and that the commissioners appointed are expected to emulate the example set by the immortal patriots who formed the Federal Constitution, by sacrificing all minor considerations upon the altar of the Union."

The Peace Convention continued in session until the 27th of February, when the result of its labors was laid before Congress. Delaware was represented in Congress at this time by James A. Bayard and Willard Saulsbury in the Senate, and William G. Whitely in the House. At the extra session of Congress held on July 4, 1861, William G. Whitely was succeeded by Hon. George P. Fisher.

On the 26th of December, 1860, Major Anderson transferred his garrison from Fort Moultrie to Fort Sumter, in Charleston harbor. The movement excited intense indignation among the active secessionists in that city. It was the first flash across their minds of the idea that the United States might fight before the difficulty was ended. Affairs now continued to grow worse. The hope of an amicable adjustment was diminished by every hour's delay, and as the prospect of a bloodless settlement passed away, the

public distress became more and more aggravated.¹ On the 4th of March, 1861, President Lincoln delivered his inaugural address, took the oath of office and began the discharge of his duties. At this time seven Southern States had retired from the Union, the officers of the Federal government had resigned, and there were no persons to represent its powers or execute its duties within their limits, excepting in the Post-Office Department. In those States all the government property had been seized, and only Forts Pickens, Taylor and Jefferson, near the Florida coast, and Sumter, in Charleston harbor, continued under the flag of the Union.

On April 1st measures were taken at Governor's Island, Fort Hamilton, Bedloe's Island and the Brooklyn navy-yard, New York, to relieve these fortifications. All eyes were now turned towards Fort Sumter with intense interest. It was well known that the unseen future was wrapped up in her fate. If she was peaceably supplied with stores for the starving garrison, or if peaceably evacuated, then the prospects for peace would become hopeful; if on the other hand, an assault should be made, war, with all its horrors, fraternal war, was upon the country. The country did not have long to wait in suspense, for on Friday morning, April 12th, about four o'clock, fire was opened from all points upon Fort Sumter, and continued for thirty-three hours, when her commander, on the afternoon of the 13th, surrendered. The fort was evacuated on Sunday, the 14th, and as the news flashed over the country by telegraph, it was instantly followed by the summons of the President, "To arms! to arms!" His proclamation, ordering seventy-five thousand men into the field, was issued on the night of the 14th. A call for the troops was issued by the Secretary of War, Simon Cameron, in accordance with the President's proclamation, and sent to the Governors of the respective States. The quota allotted to Delaware under this call was one regiment of seven hundred and eighty men. These documents were spread through the country on Monday, the 15th, and on the 19th the Sixth Regiment of Massachusetts Volunteers,² completely equipped, passed through Wilmington for Washington, so eager was that State to be the first in the field.

The most uncontrollable excitement now burst over the country. Both North and South rushed to arms—the former to maintain the government and to preserve the Union, the latter to secure the independence of the Confederate States and the dissolution of the Union.

In Wilmington, Delaware, the news of the firing on Fort Sumter created the most intense excitement. The streets soon became thronged with people, and groups were gathered around the newspaper and tel-

egraph offices, excitedly discussing the situation. As soon as intelligence was received of the surrender of the fort, the opposition to secession became very strong. In the evening a body of workingmen, headed by a drum and fife, paraded the streets, cheering loudly for the Union. On April 16th one of the largest and most enthusiastic Union demonstrations was held in the City Hall. Mayor V. C. Gilpin presided, with George Nebecker, J. S. Valentine, George S. Hagany, Joseph R. Bringhurst, Joel Frist, James H. Rice, William A. Wisdom, L. H. Coxe, Henry Bartram, S. S. Southard, Daniel Farrar, William H. Pierce, Joseph C. Spear, Henry McLearn, John F. Miller, Joseph Heston, R. S. La Motte, J. M. Barr, J. A. Hunter, Joseph Richardson, William S. Hayes, J. W. Sullivan, H. N. Wickersham, J. Scott, J. Pyle, A. Boys, J. D. Gregg, C. F. Rudolph, J. L. Thompson, John J. Toner, J. M. Turner, Geo. Stearns, J. Maris and John Flinn, vice-presidents; and Wm. H. Gallagher, Charles O'Donnel, S. Postles, H. Finnegan, M. H. Foster and Hanson Harmon, secretaries. Eloquent and patriotic speeches were delivered by W. H. White, J. S. Valentine and John Sebo in support of the government.

The following resolutions reported by Joseph Pyle, W. H. England, J. Montgomery, A. H. Grimshaw and J. M. Pusey were unanimously adopted:

"Whereas, the treason in the South has assumed a form that requires the earliest action of the government, and

"Whereas, the President has called upon the States for seventy-five thousand men to suppress the rebellion that is now waging war against the government, placing our liberties and Union in danger, therefore be it

Resolved, That we fully concur in the views of the President and that we respond to the call in a substantial manner by promising him such aid as may be requisite to enforce the laws and repel invasion.

"Resolved, That Delaware is, as she has always been, loyal to the Union, that treason has always been a stranger to this State, and that we condemn the efforts that have been made to induce the Legislature to take measures to place Delaware among the seceding States.

"Resolved, That a high and exalted patriotism will govern the people of Delaware in the present crisis, and that they will be as they ever have been, the first to uphold and the last to desert the Union.

"Resolved, That the present crisis demands that all party ties should be obliterated; that the Union men of all creeds should band together with no other object in view than the perpetuity of the Union and a vindication of the rights of man; proving to the world that the people are competent to govern themselves.

"Resolved, That we recommend the people of the different Hundreds, irrespective of party, to meet and express their views on the state of the Union.

"Resolved, That we condemn all Senators and Representatives in Congress who have prevented by their votes or speeches the settlement of the present difficulties between the North and South.

"Resolved, that the people of Delaware will sustain the government and support the Union and are always in favor of the Constitution and the enforcement of the laws.

"Resolved, That a committee of five be appointed to request the government officers to place the national flag upon the the Custom-House and Post-Office of this city."

After appointing William H. England, W. H. Bellamy, H. Finnegan, G. S. Hagany and J. Maris a committee to request the Union flag to be raised over the Custom-House and Post-Office, the meeting adjourned with cheers for the star spangled banner, the Union, and Major Anderson, the hero of Fort Sumter.

Following this great meeting, on the 19th of April, the Sixth Massachusetts Regiment, while passing through Baltimore, on its way to defend the capital,

¹ On the 22d of September, 1860, the banks throughout the country suspended specie payments, which produced widespread monetary embarrassments.

² This regiment was attacked in the streets of Baltimore by the populace, and many were killed on both sides.

was attacked by a mob. This act created the most intense excitement in Wilmington, and intensified the Union sentiment. The city feared an attack by way of Baltimore, and to allay public excitement the Mayor on April 22d issued the following proclamation:

"In times of public calamity the minds of men are naturally filled with excitement and alarm. Violent emotions are apt to find vent in demonstrations seriously affecting the public peace.

"Tranquillity and order will be in constant hazard unless the bounds of moderation are strictly observed, both in speech and action.

"Now, therefore, I, Vincent C. Gilpin, Mayor of the city of Wilmington, do hereby enjoin upon all persons the duty of abstaining from intemperate controversies and violent public harangues and all other practices leading to infractions of law; and at the same time I hereby give the assurance that, with the aid of the military arm, I am prepared, to the fullest extent, to exercise my authority as Chief Magistrate, in maintaining order and protecting the rights of persons and property."

In the mean time, on the 19th of April, the City Council made an appropriation of eight thousand dollars for the defense of the city. In pursuance of this act the city purchased four hundred stand of arms in Philadelphia, which arrived on the 22d. The following, from the *Wilmington Morning News* of the 23d, gives a fair idea of the excitement which then prevailed in the city:

"The excitement in our city in relation to the civil war which is now raging in our country is unprecedented in our annals. All day and all night long our streets are filled with crowds of persons, anxiously inquiring for intelligence from the seat of war. Nearly every house in the city has the stars and stripes floating either from the windows or on the roof. At the City Hall, Central Hall, and various other places throughout the city, you see in staring capitals the words, 'Volunteers Wanted.' Not a train of cars arrives but eager crowds throng the depot, and men, women and children run to see them. A number of young men, impatient to enlist in their country's service, left the city for Philadelphia during the week. On Saturday calls were issued for meetings to form 'Home Guards,' 'City Guards' and a company of dragoons. When the train arrived containing the Pennsylvania volunteers who had been driven back by an armed mob in Baltimore on Friday, several of our citizens supplied them with food. Our patriotic ladies put on their kettles and made coffee for them, and conveyed it, with baskets of provisions, to satisfy the hunger of the brave defenders of our free Constitution. On Saturday afternoon Companies B and C, of the Delaware Guards, assembled at their armory in the Friendship Engine House, and were mustered into the service of the city. On Saturday and Sunday night guards were stationed on all the bridges leading to our city. The young men have displayed their Union badges, some wearing a tastefully-executed rosette, others ribbons, red, white and blue, through the button-hole of the lapel of the coat, and quite a number bear the stars and stripes fastened on their breasts. There appears to be but one sentiment in this community now, whatever may have been the differences of opinion heretofore, and that is that the government must be sustained, and rebellion must be put down at all hazards."

About the same time the railroad bridges on the Philadelphia, Wilmington and Baltimore Railroad west of Havre de Grace, and on the Northern Central Railroad south of Cockeysville, Md., were burned by the authorities of Baltimore, to prevent the passage of Northern troops through that city to the South, thus necessitating their transportation from Havre de Grace to Annapolis and Washington by water. Apprehensive for the safety of Wilmington, measures were taken for its defense. The United States revenue cutter "Dobbin" was sent from Hampton Roads to guard the city and the Delaware Bay. On the night of the 19th of April Fort Delaware was garrisoned with one hundred and seventy-five men from Philadelphia. About the same time Fort Mifflin, on the Delaware shore above Chester,

was reinforced by a body of troops from Philadelphia.

The idea of safety animated all classes of people, and for the time being all differences of opinion were subverted to the one purpose of protecting the State through the maintenance of the Union. In order to better allay the fears of the people, Companies B and C, of the Delaware Guards, were assembled at their armory, in the Friendship Engine-house, and were mustered into the service of the city, and at night sentinels were stationed on all the bridges leading to Wilmington. Four hundred stands of arms were procured from Philadelphia and other measures were taken to protect the city from attack.

On April 20th the physicians also tendered their services in case there should be an attack on Wilmington, or on the property and bridges of the Philadelphia, Wilmington and Baltimore Railroad Company. Drs. Porter, White, Bush, George W. Chaytor and G. P. Morris, a committee appointed at a meeting of physicians, secured the City Hall for hospital purposes, and the Odd Fellows' Hall Company tendered their settees for the use of the wounded. The physicians also held themselves ready as a body to give their services if there should be any conflict of arms. The druggists offered to supply lint, medicines, etc., free of charge, and to attend at their several places of business at any hour of the day or night, if necessary, to meet the demands that might be made upon them.

On the afternoon of April 22d another immense meeting was held in front of the City Hall, Wilmington, "to consider the national troubles and adopt measures to secure and strengthen the government." Hon. Willard Hall was made president, with the following vice-presidents: Brandywine Hundred; Jos. Shipley; Wilmington, David C. Wilson; Christiana, James Delaplain; Mill Creek, Lewis Thompson; White Clay Creek, John U. Evans; Pencader, Robert M. Black; St. George's, John P. Cochrane; Red Lion, Capt. George Maxwell; Appoquinimink, James V. Moore; New Castle, George Z. Tybout; Secretaries, Daniel Farrand John B. Porter.

The following persons were appointed to prepare resolutions expressing the sense of the meeting:

Daniel M. Bates, Dr. R. R. Porter, Chas. I. Du Pont, Henry Latimer, Dr. H. F. Asken, Dr. Wm. Couper, Hanson Robinson, S. McDaniel, Dr. L. P. Bush, Jesse Sharpe, E. C. Stotsenburg, A. P. Shannon and Benjamin Gibbs.

Alfred R. Wooten, attorney-general of Delaware, Dr. L. P. Bush, Samuel Townsend, George Read Riddle, Daniel M. Bates, John R. Latimer, Rev. Messrs. Wiswell, Aikman and Condron, Dr. Harlan, George W. Vernon and Washington Curry addressed the meeting in favor of the Union and the duty of sustaining the general government at all hazards, those assembled warmly applauding their sentiments.

The following resolutions were adopted without a dissenting voice:

"The citizens of New Castle County, assembled in county meeting to confer together upon the alarming situation of our national affairs, involved in civil war, deem it our duty to declare that in this emergency we discard all party preferences and bind ourselves firmly to support the constitutional government of the country. We can see no cause for subverting the government, while in its overthrow we discern deplorable consequences. In these consequences the power, honor and prosperity of this nation are imperiled, and the safety, property and comfort of its citizens wantonly and ruinously impaired and wasted. Our country is eminent among the nations; the oppressed from all lands find in it a happy home, civil and religious liberty, such as never has been known before in the history of man, manifests its benign effects in all its governmental bearings, and it secures to every individual the undisturbed enjoyment of the fruits of his industry, talent and enterprise. Revolution puts all this to hazard, and that through the blood and havoc of civil war.

"Resolved, That we hold the union of the States dear, because an inheritance from our fathers, whose patriotism and wisdom we revere, whose memories we cherish, having our confidence, because formed by men of unselfish devotedness to the public good and of practical wisdom and statesmanship distinguishing the age in which they lived, and adorning the annals of man; invaluable to us because insuring to us personal security under the guardianship of laws made by ourselves. The fruits of industry, and the undisturbed enjoyment of all our rights, protecting by the peaceful administration of justice the several States from the aggressions of each other, and investing the nation with character and power commanding the respect of all people, while presenting before them a practical exhibition of the operation of self-government with its inseparable attendant civil and religious liberty, a moral exemplar which has elevated, and unless perversely marred, must continue to elevate the human race. Our own is the only power on earth that can prevent or obstruct this consummation.

"Resolved, That we deem it our highest privilege to live under a government of laws, and for the administration of the Federal Government and the enjoyment of its benefits. Those constitutionally invested with its functions must be unhesitatingly acknowledged and their authority firmly upheld by all good citizens, especially in times of revolution; and we pledge ourselves to support the government in all constitutional measures.

"Resolved, That the government of the country, by whatsoever hands it may be temporarily administered, is the common property. To maintain its constitutional authority is the interest and duty of all alike. By the support we now give to it no man surrenders any opinions he may have heretofore entertained respecting the causes of the present crisis or the policy of the administration now in power.

"Resolved, That, while we have no legally organized militia enabling the Governor to comply with the requisitions of the President of the United States, we trust that the patriotism of our citizens will supply the defect by inducing voluntary offers, and that the spirit of our people will manifest to this generation, for maintaining the liberties we enjoy, as did our fathers to that in which these liberties were asserted and won, the reliance that can be placed on freemen for vindicating their rights.

"Resolved, That we stand ready, faithfully to abide the sacrifices which the carrying out of those resolutions may involve.

"Resolved, further, That while we have full confidence in the law-abiding character of the people of this State, scenes in other places admonish us to inculcate watchful caution against violent or irregular steps; war is exciting and incident to it, especially to civil war, is a popular sensitiveness under which the minds of men become suspicious and inflammable; groundless reports and imaginary inventions are inconsiderately received and acted upon, betraying into rashness and producing, where the presence of war is never felt, aggravated disorder, frequent acts of injustice, a general sense of insecurity. Every one should feel that his own safety depends upon the protection of law, that the magistracy and its process are sufficient for the common welfare, and should be our firm reliance. A brave, firm man is self-possessed; he never will countenance public disturbance or aggression upon the quiet and peace of individuals. We unqualifiedly condemn all tendency to such disturbance and aggression.

"Resolved, That a committee of fourteen be appointed by the chair to confer and act with the City Council upon measures necessary for the public safety."

The following gentlemen were appointed, under the resolutions, a committee of safety: John Wales, Joseph Shipley, Thomas F. Bayard, Jesse Sharpe, John B. Latimer, Dr. H. F. Askew, Henry Du Pont, David C. Wilson, Theodore Rogers, J. Morton Poole, E. G. Bradford, Elijah Hollingsworth and Victor Du Pont.

The "Minute Men," numbering about four hundred of the enthusiastic supporters of the Union in Wilmington, were also very active in the emergency,

under the command of Robert S. and Charles E. La Motte.

They held meetings every night, and encouraged the Union cause by their patriotic measures.

To provide for the prompt suppression, by force, if necessary, of any rebellious movement in the State, the Messrs. La Motte drew up a roll for signers among the "Minute Men" in the following words:

"We, the undersigned, agree to form ourselves into a volunteer militia company, the object of which shall be the preservation of the Constitution, the Union and the enforcement of the laws. And we hereby pledge ourselves, should our services be required by the constitutional authorities of the United States, to support the General Government and the flag of our common country."

At a special meeting held in the latter part of April, the "Minute Men" adopted the following strong resolutions:

"Whereas, Treason has lifted its hydra head in our once happy Union and traitors, emboldened by success, have threatened the existence of our glorious 'stars and stripes'—a flag that is honored by every civilized nation of the earth; and

"Whereas, duty as patriots, as citizens should in this, the hour of our country's peril, stand up for the perpetuation of those principles of Civil and Religious Liberty bequeathed to us by our fathers, and transmit those happy and blessed privileges to our posterity, and

"Whereas the Minute Men of '60, ever loyal to the Union, the Constitution and the laws, are willing, and do hereby agree, to lay aside for the present all party ties, and cordially unite with our fellow-citizens in the protection of our lives, of our homes and our country, and bury all political animosities of the past, unite as a band of brothers for the present emergency and leave the future as political parties to be governed by circumstances; therefore

"Resolved, That we cordially and earnestly invite our fellow-citizens of all political creeds to meet at the Odd Fellows' Hall on Friday evening, to organize for the defence of our City, State and Country in such manner as they may determine upon.

"Resolved, That a committee of five be appointed to carry this resolution into effect."

To carry the resolutions into effect, the president appointed the following committee: Charles Bird, J. Blankin, H. Biddle, G. W. Griffin and Edgar Pierce.

On motion, the president was added to the committee. Samuel Biddle then offered the following expression of the sentiments of the "Minute Men," which was adopted, and a copy was ordered to be sent to President Lincoln:

"The minute-men of '60 of the city of Wilmington, in the State of Delaware, deeply deplore the distracted condition of our beloved country, and especially the inauguration of civil war, with all its attendant horrors; regret that the causes which have brought about this unnatural state of affairs was not referred by the last Congress of the United States directly to the arbitrament of the people of the several States, the true sovereigns of the nation, feeling assured they would have rendered a report that would have given peace and stability to the government, and happiness and prosperity to all our people; but this boon was denied to us, consequently several of the Southern States whom we heretofore so proudly claimed as our sisters, have repudiated and assailed our Government, insulted our National Flag and have hastily brought upon us civil war and carnage, as disgraceful to them as it is mortifying to us.

"Holding as we do, superior allegiance to the General Government, and discarding at this juncture all party predilections and prejudices, desire to assure the President of the United States that we will stand by, support and defend every patriotic effort of the Government to maintain the Constitution, the Union, the enforcement of the laws and the flag of our country forever, against any and all enemies or assailants, at home or abroad."

In accordance with the resolutions of the Minute Men, another large meeting was held in the Odd-Fellows' Hall, to take measures to sustain the government. Speeches were made by John C. Patterson, L. E. Wales, E. G. Bradford, C. B. Love and Dr. Wm. H. White, and the following resolutions were adopted:

"Whereas, The Constitution of the United States has hitherto secured to the citizens of Delaware, all the manifold objects for which it was ordained and established by the people, namely: justice, domestic tranquillity, the common defense, the general welfare and the blessings of liberty, by which we have grown and prospered for more than three-quarters of a century, protected at home and abroad by the arms of a National Government, cherishing proud recollections of the past and indulging in lofty hopes of the future of the country, Therefore,

"Resolved: That we will redeem the glorious pledges made by our fathers—'Delaware was the first to adopt the Constitution and she will be the last to abandon it.'

"Resolved: That it is the duty of every loyal citizen to uphold the Constitution and laws, and to give cheerful obedience to the regularly appointed officers of the Federal and State Governments until the same shall be legally altered or changed.

"Resolved: That in the present exigency of the country, when the citizens of different States are arrayed in hostile attitude against each other and the Federal authorities, we should be prepared to defend the National Government, and to protect our lives and property; and for this purpose we recommend all Constitutional and law-loving citizens to at once enroll themselves into military companies to aid by arms, if all other means fail, in restoring peace to our distracted country.

"Resolved: That the City Council of Wilmington be requested to appropriate funds towards defraying the expense of arming and equipping such volunteer companies as may be raised in this city, and to assist the families of those who may leave the State on military duty, and that our citizens generally be recommended to contribute means and money for the same object.

"Resolved: That while we deeply deplore the sad condition of our country, we sorely hope that the terrible results of civil war may yet be averted, and that we will calmly and harmoniously unite in every effort to preserve the Union. And we therefore deprecate all violence of language, denunciations and threats against persons, as unwise and unbecoming, calculated to embitter neighbor against neighbor, to create acrimony of feeling and personal hostility, when we should present a solid and unbroken front."

The influence of these meetings and the resolutions which they adopted were soon extended to other parts of the State, and numerous war meetings were held, at many of which the Union flag was raised upon poles erected for that purpose. In Sussex County, where were owned three-fourths of the slaves of the State, greater sympathy was expressed for the South, and the growth of the Union sentiment was less general and slower than in the other counties; but even there the Union men succeeded in arousing the people to respond to the call for men to support the government. A large Union meeting was held at Georgetown May 7, 1861, which adopted resolutions expressive of the sense of the people of that section, and, while patriotic, there was a reservation about them which plainly indicated the controlling sentiment:

"Whereas, we are in the midst of revolution and civil war, occasioned by folly and prosecuted in madness, and which threatens a permanent disruption of our Federal Union, and the destruction of our constitutional liberties as a free people; and whereas, under such circumstances it is proper that the people everywhere should consult together for their common good, and give expression to their opinions in reference thereto; therefore

"Resolved, That the people of Sussex County, without distinction of party, in public meeting assembled, hereby declare,

"First, Their immovable attachment to the Federal Union.

"Second, The constitutional equality of all the States and of the people of all the States wherever the Federal authority extends, as the same has been expounded by the Supreme Court of the United States.

"Third, That our national difficulties ought to have been peaceably adjusted by the last Congress, and ought to be so adjusted as soon as possible by the adoption of the positions commonly called the Crittenden Resolutions, by way of amendments to the Constitution, they being in the judgment of this meeting a proper basis for a compromise, in reference to the constitutional rights of the people of the several States, as the same were meant to be secured by the framers of the Constitution.

"Fourth, That we are opposed to the spirit and acts of abolitionism in whatever form and whatever name presented or assumed, hereby declaring objections to the due execution of the fugitive slave law, the passage of the personal liberty bill, and the denial of the equality of the States and of the people of the several States wherever the federal authority extends, and the attempt to interfere by those not interested therein, in any manner, with the institution of domestic slavery, to be

unjust, aggressive, unconstitutional, and unbecoming a law-abiding people.

"Fifth, That in our opinion secession is revolution, and that the grievances and wrongs suffered by any portion of the American people have not been sufficient to justify this the last resort of a free people for the vindication of their rights, but that the redress for those grievances and those wrongs should have been sought in an appeal by constitutional means to the sober second thought of the people.

"Sixth, That Delaware is a member of the Federal Union, and ought to remain; that she has an interest, in common with other States, that the Federal capital should be preserved, and we hereby declare that it should be preserved and defended at all hazards and to the last extremity.

"Seventh, That we deeply deplore our national calamities and the existence of civil war; that the fanatics of the North and the extremists of the South alone are responsible for our troubles, and whilst we condemn the excesses of both, it should be our earnest hope and prayer that an Almighty Providence will interpose to save our country from its impending dissolution.

"Eighth, That we acknowledge fealty and allegiance both to the State of Delaware and to the United States of America. To the State within the sphere of its reserved rights, and the United States within the sphere of its delegated authority; that these obligations are not inconsistent but harmonious and that as law-abiding citizens we will faithfully fulfill them.

"Ninth, That the government of the country, while administered within the restraints of the Constitution, is entitled to and should receive the support of all law-abiding citizens and that while we accord this obedience to the Federal Government, we expressly reserve our right to differ with the present Administration in its measures and policy, when it may assume a party character.

"Tenth, That the promptings of patriotism inspire the citizens of Sussex with cordial attachment to the Union and the constitution, and that in this county assemblage we disavow any partisan motive and acknowledge no standard but the flag of our country."

The citizens of Fulton held a large meeting on the 18th of April, and erected a large pole upon which they perched the American eagle and hoisted the national flag amid a salute of thirty-four guns. On the 26th they assembled to form a Union Guard. The meeting was organized by Dr. N. B. Lynch as chairman and G. Anderson secretary. Resolutions in favor of supporting the government were unanimously adopted.

A meeting of the citizens of Seaford was held on the 20th of April, and resolutions adopted "declaring strongly for the Union, and offering to devote their time, money and lives in the cause of their country." A company of "Home Guards" was also organized and thirty names enrolled.

On the 22d of April a spirited Union meeting was held at New Castle, which was addressed by some of the best men of the town. After the meeting a military company was formed, with eighty-eight persons on the roll.

The friends of the Union of the hundreds of Red Lion and St. George's held a large meeting in the village of St. George's on the 23d of April. Captain George Maxwell was chairman, with the following vice-presidents: John C. Clark, Thomas Jamison, Merritt Paxson, William Love, Alfred Lofland and Jacob Allison. William E. Janvier and L. S. Aspril were secretaries. After prayer by Rev. Joseph Dare, of the Methodist Church, the chairman appointed Anthony M. Higgins, Jefferson Henry, Theodore F. Clark and J. A. Benson to prepare resolutions for the consideration of the meeting. While the committee were at work the meeting was addressed by Dr. W. H. White. The following resolutions, as reported by Mr. Higgins, were unanimously adopted:

"Whereas, In a portion of the States of our Union the authority of

the National Government has been overthrown, its laws disregarded, its property seized or destroyed, and its flag fired upon and insulted, and

"WHEREAS, It has been boldly asserted that the remaining slave States will assist the former in their attempt to destroy the Federal Union, and

"WHEREAS, The President of the United States has called upon all loyal citizens to support him in defending the capital of the nation from threatened treasonable assault and in maintaining the authority of the Government;

"Resolved, That we the people of St. George's and Red Lion Hundreds, assembled without distinction of party in the village of St. George's, on the 23d day of April, 1861, are unanimously of the opinion that henceforth every constitutional right of the United States ought to be asserted and maintained, and whatever means may be necessary to accomplish that object the patriotic people of the loyal States will promptly and cheerfully provide.

"Resolved, That we, the citizens of St. George's and Red Lion Hundreds, will, to the utmost of our ability, aid the General Government in maintaining its authority, in enforcing the laws, and in upholding the Flag of our glorious Union.

"Resolved, That Delaware, the first to adopt the Federal Constitution, will prove to be the last State to give it up, and that she may ever seek protection under that star-spangled Banner which has been respected by all nations upon this earth."

On the 24th of April it was announced that the Philadelphia, Wilmington and Baltimore Railroad Company having been taken in charge by the Federal Government through an agent in Philadelphia, all its equipments were under the control of the government, and trains with troops were being sent from Philadelphia as fast as possible, an uninterrupted route to Washington having been completed. The Chesapeake and Delaware Canal, used for conveying troops and supplies from Philadelphia to the Chesapeake, was guarded by a force of one thousand men from General Cadwalader's division. Armed men were also placed along the whole route of the Philadelphia, Wilmington and Baltimore Railroad from Elkton, Md., to Baltimore. The arrival and departure of troops in Wilmington was now a matter of daily occurrence.

In compliance with the requisition of the Secretary of War, Governor William Burton issued a proclamation on the 25th of April, calling for the enlistment of volunteers. It was as follows:

"PROCLAMATION.

"To the citizens of the State of Delaware:

"WHEREAS, a requisition has been made upon the undersigned as the Executive of the said State of Delaware, by the Secretary of War for one regiment consisting of seven hundred and eighty men, to be immediately detached from the militia of this State, to serve as 'infantry or rifle-men for the period of three months, unless sooner discharged.'

"AND WHEREAS, the laws of this State do not confer upon the Executive any authority, enabling him to comply with such requisition, there being no organized militia, nor any law requiring such organization.

"AND WHEREAS, it is the duty of all good and law-abiding citizens to preserve the peace and sustain the laws and government under which we live, and by which our citizens are protected;

"Therefore, I, William Burton, Governor of the said State of Delaware, recommend the formation of volunteer companies for the protection of the lives and property of the people of this State against violence of any sort to which they may be exposed. For these purposes such companies, when formed, will be under the control of the State authorities, though not subject to be ordered by the Executive into the United States' service; the law not vesting in him such authority. They will, however, have the option of offering their services to the General Government for the defence of its capital and the support of the Constitution and Laws of the country.

L.S.

"In witness whereof, I have caused the Great Seal of the State of Delaware to be hereunto affixed. Done at Dover this twenty-fifth day of April in the year of our Lord, one thousand eight hundred and sixty-one, and of the Independence of said State the eighty-fifth.

"By the Governor,

"WILLIAM BURTON.

"EDWARD RIDGELY, Secretary of State."

The State had no militia for the Governor to call

out; therefore his object was to encourage the formation of volunteer companies. This was the utmost extent to which he could officially act, and it was in compliance with the wishes of a large majority of the people of the State, who were resolved to sustain the government and defend the Union, without regard to the person who might be the President of the United States. On the 1st of May the Governor, finding that volunteers were freely offered, issued the following orders:

"DOVER, Delaware, May 1, 1861.

"The undersigned, the constitutional commander of the forces of the State of Delaware, directs that those volunteer companies of the State that desire to be mustered into the service of the United States, under the call of the President, will rendezvous to the city of Washington, with the least possible delay, where they will be mustered into the service of the United States by Major Ruff, who has been detailed by the War Department for that purpose, and who has reported himself to me and received my instructions. The regiment will consist of ten companies, to serve for the period of three months.

"WILLIAM BURTON,

"Governor and Commander-in-Chief."

To encourage enlistments, a number of the citizens of Wilmington contributed to a fund for the support of the families of such volunteers as required assistance during their absence in the field, and in compliance with a resolution of the City Council, a meeting was held on the 25th of April to form an organization for this purpose. John M. Turner presided, with Dr. Wilson as secretary. The following committee was appointed to open an office and receive subscriptions for the support of the families of absent volunteers: John Rice, Joseph A. Hunter, J. Morton Poole, Joseph Pyle, J. F. Wilson, Thomas Titus and Edward Moore. Samuel M. Felton, president of the Philadelphia, Wilmington and Baltimore Railroad Company, also generously agreed that the salaries of the employees on the road who desired to enlist should be paid during their absence, and their situations would be open for them upon their return from military service. The physicians of the city, with few exceptions, offered to supply medical services to the families of soldiers free of charge.¹

On the 9th of May, 1861, the relief committee of the city appointed ward committees to facilitate the collection of the fund, which had been subscribed, as follows:

First Ward, J. Morton Poole, J. Bringham; Second Ward, Edward Moore, Thomas Titus; Third Ward, J. A. Hunter, Edward Bringham; Fourth Ward, John Rice, L. H. Coxie, Dr. J. F. Wilson; Fifth Ward, Joseph Pyle, J. N. Robinson. Some of the subscriptions to this fund were very liberal, and aided very materially to encourage enlistments.

In June, 1861, two hundred families derived benefits from the "Relief Fund," the amount paid out per week being about four hundred and fifty dollars.

Encouragement to enter the service was also given by most of the lodges of secret orders and beneficiary

¹ On April 20th Dr. Craig gave notice that he would attend the families of any of the men who had enlisted without charge. On the 30th Dr. J. F. Wilson, treasurer of the committee to obtain funds to provide for the families of volunteers, requested the newspapers to say that "no one need hesitate to enlist for fear that his family would not be provided for, as our citizens have responded to the call nobly, and abundance of funds for the purpose have been subscribed."

societies, which pledged full benefits and all privileges of a member in good standing to such as would volunteer. Most of the lodges in the State, outside of Wilmington, took similar action in this matter.¹

The ladies of Wilmington and other sections of Delaware also manifested their enthusiasm in their good work for the soldiers of the Union. As early as April 23d the wives, mothers and daughters of Wilmington took measures to provide clothing and other necessities for the troops about to be raised. On April 26th a sewing circle for the manufacture of clothing and bandages was organized in the lecture-room of the Central Presbyterian Church. The rooms were open daily, where the ladies carried their sewing-machines. On May 1st the ladies of St. Paul's Church offered their services and tendered the use of their sewing-machines for the manufacture of soldiers' clothing. On April 29th Col. Charles P. Dare, stationed at Perryville, conveyed the thanks of himself and command to the ladies of Wilmington, for "the provisions and luxuries with which they were so liberally supplied." Mrs. Jones, who purchased the mansion formerly occupied by Dr. J. W. Thomson, at the corner of Eleventh and Market streets, tendered it to the city for a soldiers' hospital or rendezvous. On May 18th, Company "D," First Regiment Delaware Volunteers, James Green, captain, passed resolutions thanking the patriotic ladies of St. Paul's M. E. Church, "for their invaluable services in making up the uniforms and clothing of said company." About the same time the ladies of Wilmington presented to the members of Institute Hall a beautiful flag. The presentation speech was made, on behalf of the ladies, by Hon. Judge Houston. The response was by Charles

B. Lora. The musical exercises were under the direction of Mr. Triggs. A large amount of soldiers' underclothing, besides flannel bands and haversacks, were made and turned over to the five Delaware companies encamped near Wilmington by the "Volunteer Sewing Society." The ladies of Georgetown, Milton and Lewes, also made up quite a lot of useful articles for Company "G" in May, which were sent to their encampment near Wilmington. The "Union Home Guards," at Seaford, were presented with a silk flag, on May 28th, by the ladies of that town. Dr. Fisher made the presentation speech, and L. J. Cannon received it on behalf of Captain Hopkins. On July 13th the "Red Lion Mounted Guards" returned their thanks to the ladies of St. George's and vicinity "for their liberality in furnishing refreshments, on the occasion of the Fourth of July celebration and flag presentation; also to Mr. and Mrs. John P. Belville and the committee of arrangements for their untiring exertions in getting up said celebration."

The charitable work done by the ladies' aid societies churches, sewing circles and individuals whose interest in the performance of the work allotted to their spheres was fully as great in Delaware, at this period of the war, as in some of the Northern States. In every section means were raised, food and clothing provided, and especially was this actively done at Wilmington. Before the close of the year sewing circles were formed in the several churches for the purpose of co-operating with the National Sanitary Committee at Washington for the relief of sick and wounded soldiers.

While the organization and equipment of military companies was going on, the spirit of patriotism was earnestly cultivated by the people. The national ensign floated from every public building and many of the private residences were adorned with flags.² Patriotic sermons were preached from pulpits draped with the Star Spangled Banner,³ and nearly every religious service contained allusion to the duty of the citizens towards the maintenance of the Union.⁴

¹ In May, Companies "A" and "B," Delaware Blues, Captains La Motte, and the Columbian Rifle Company, Captain McKaig, marched to New Castle to participate in the ceremonies attending the raising of a flag over the quarters of the New Castle Union Guards, in the old foundry building. William B. Reed presided and George Janvier, L. E. Wales, Samuel Guthrie, Elihu Jefferson, Edward Williams, William Couper, Nathaniel Wolff, Abraham Cannon, George W. Turner and John A. Alderice were appointed vice-presidents. After prayer by Rev. J. W. Spotswood, Mr. Tasker presented the flag. It was received by Hon. G. B. Rodney, and W. C. Spruance delivered an address. The Union citizens of Newport raised a liberty-pole in that town on the 11th of May. A flag pole was also erected in Dover about the same time.

² The pulpit of the Second Baptist Church of Wilmington was festooned with the American flag at the Sunday services in April, 1861.

³ On April 21st, Rev. J. S. Dickerson preached a patriotic Union sermon in the Second Baptist Church. On the same day Right Rev. Bishop Lee preached a patriotic and touching sermon in St. Andrew's P. E. Church, on "the Christian citizen's duty in the present crisis." At the close of the services in the Central Presbyterian Church, Mr. Fullmer, the organist, played the "Star Spangled Banner." Messrs. John Lonadale, Charles Campbell, Samuel Hart, William Lewis and James Yearly, on Sunday, April 21st, in a most feeling manner took leave of their friends at Scott M. E. Church, in Seventh Street, before leaving Wilmington for Philadelphia, to enlist in the army. They asked for the prayers of the congregation in their behalf. In the Hanover Church, at the Sunday services, the choir sang "My country 'tis of thee, Sweet Land of Liberty," with great effect. On Sunday, April 28th, Rev. Mr. Wiswell preached at

¹ Fairfax Lodge, No. 8, I. O. O. F., on May 5th, resolved to remit the dues of every member who enlisted, and agreed to pay to the wives of those who were married \$1.50 per week while they were in the service of the government.

Good Intent Division, No. 3, Sons of Temperance, on May 7th, "Resolved, That any member in good standing in this Division, who volunteers in the active service of our country, shall be kept in good standing by the F. & until the Brother returns, and shall be entitled to benefits the same as though he remained in the city."

St. Peter's Beneficial Society, George O'Neal, president and James Monaghan, secretary, on May 6th,

"Resolved, That this society tender to its members who may volunteer their services in defence of their country, all the rights which each beneficial member would otherwise be entitled to."

The Wilmington and Brandywine Council, No. 3, O. U. A. M., J. M. Scott, recording secretary, on April 29th,

"Resolved, That every member of Wilmington and Brandywine Council who may enlist in defence of his country and flag, and who, at the time of said enlistment is in good standing in the council, shall be provided with a gutta percha blacket and be exempt from the payment of his dues, and shall, in case of sickness or death, be entitled to the regular benefits of the Council."

St. Mary's Beneficial Society, in May, adopted a resolution tendering to its members who volunteered "all the rights which each member could otherwise be entitled to."

Jefferson Lodge, No. 2, I. O. O. F., on May 16th,

"Resolved, That in case any members of this Lodge leave in response to their country's call, this Lodge pledges to keep said members in good standing and to protect their families from suffering and want during their absence, provided said members are not in arrears to this Lodge at the time of their enlistment."

Wilmington Division, No. 1, Sons of Temperance, on May 16th,

"Resolved, That any member of this Division who has or may volunteer his services to the General Government during the present crisis shall be exonerated from his dues during said term of service, provided he retain his pledge inviolate, and shall, in case of sickness or death, be entitled to the regular benefits of the Division."

For the defense of the city of Wilmington the "Wilmington Home Guard" was immediately organized, with the following officers: Captain, F. B. Sturgis; First Lieutenant, Richard B. Duncan; Second Lieutenant, Daniel La Motte, Jr; Third Lieutenant, John J. Toner; Fourth Lieutenant, J. E. Bailey. In a few hours the company numbered one hundred men, and was fully armed and equipped ready for service.¹ From this time forward volunteering progressed rapidly. On April 25th a company of German Turners, numbering eighty men left Wilmington for Philadelphia, to unite with the Turner regiment then in process of formation in that city.

In April the "City Guard" was formed under the provisions of an ordinance of the Wilmington City Council. It was composed of the best men in the city, and had its armory at the corner of Front and Tatnall Streets. It was subject to the orders of the mayor, and was at all times prepared to give immediate response when its aid was required. About the latter part of April the ladies of the First Ward presented the "City Guard" with a handsome flag. The Guards were drilled every night by Instructor George Read Riddle. William T. Porter was chosen as the quartermaster. Ex-Mayor Wilson, Abraham Boys, Joshua and Bauduy Simmons, John H. Price and many old and worthy citizens were honorary members. The Guards completed their organization on the 7th of May, by electing the following officers: Captain, George Read Riddle; First Lieutenant, William E. Highfield; Second Lieutenant, Henry Bleyer; Third Lieutenant, Samuel D. Newlin; Fourth Lieutenant, John Divine; Quartermaster, William T. Porter; Ensign, George O'Neill.

Before May 1, 1861, military companies had been formed as follows:

Company A, Delaware Blues, Capt. R. S. La Motte, 100 men; Company B, Delaware Blues, Capt. C. E. La Motte, 100 men; Company C, Delaware Blues, Capt. Thomas A. Smith, 100 men; Columbia Rifles, Capt. Joseph M. Barr, 100 men; Wilmington Rifles, Capt. R. Milligan, 30 men; Middletown Company, Capt. Frank Barr, 80 men; Brandywine Company, Capt. C. Febiger, 50 men; New Castle Company, Capt. Tybout, 60 men; Mill Creek Hundred Company, Capt. P. Wilson, 65 men; Christians Hundred Company, 80 men.

the Central Church, on the "Trial of our Country." At the Second Baptist Church, Rev. James S. Dickerson, preached a sermon on "God's dealings with Nations." In the Hanover Church, Rev. Mr. Aikman preached a discourse on "Reverence for Law the only hope of a State." In St. Peter's R. C. Church, Rev. Mr. O'Brien in his discourse urged his congregation to sustain the government and uphold its free institutions in the present crisis of the country's history. At the conclusion of the services John F. Miller played on the organ the "Star Spangled Banner." Rev. Mr. Condron delivered a sermon in the Wilmington Institute to a large number of the Delaware regiment. On the 18th of May a beautiful flag was raised on St. Mary's College. On Sunday, the 19th, Asbury M. E. Church contributed thirty-four dollars to purchase blankets for the soldiers. At the same time St. Paul's M. E. Church, Rev. Mr. Murphy pastor, contributed sixty dollars for the same purpose. St. Mary's R. C. Church, Rev. Mr. Beilley pastor, also contributed forty-four dollars, which was handed to Mrs. Lee, Mrs. Canby and Mrs. La Motte. The ceremonies at the Central Presbyterian Church, on the morning of the 4th of July, were attended by Company A, Captain Sturgis, fifty-two men; City Guards, Captain Andrews, sixty-five men; Company B, Captain Wisdom, fifty-two men; Brandywine Guards, Captain Febiger, fifty-two men. The whole, under command of Captain Febiger, arrived in front of the church at 10.30, and having stacked their arms in the street, entered the church and filled the middle block of pews.

¹ About the same time A. Staats called for volunteers to form a company, to be known as the "Old Delaware Guard."

Becoming impatient to enter the service, Captain Thomas A. Smith's company left Wilmington on the 30th of April for Philadelphia, where it was mustered into service on the 7th of May, in the Twenty-fourth Regiment Pennsylvania Volunteers, commanded by Colonel Owens, with the following officers: Captain, Thos. A. Smith; First Lieutenant, Francis McCloskey; Second Lieutenant, Neal Ward; First Sergeant, Michael Kirwin; Second Sergeant, Daniel O'Neal; Third Sergeant, Daniel Meaney; Fourth Sergeant, Wm. Murphey; First Corporal, Christopher Bechtie; Second Corporal, David Smith; Third Corporal, John Cumming; Fourth Corporal, James Rickards.

This company was the first to leave the State for the front and the first to return. After serving out the three months' term of enlistment, it returned to Wilmington on July 30th, and received a hearty welcome. The command to which it had belonged was attached to General Patterson's division on the Upper Potomac River.

In the latter part of April the McLane Rifles were organized in Wilmington, with the following officers: Captain, R. Milligan; First Lieutenant, Benjamin Nields; Second Lieutenant, L. E. Wales; First Sergeant, J. Crozier; Second Sergeant, J. B. Tanner; Third Sergeant, W. W. Simmons; Fourth Sergeant, A. Gawthrop; First Corporal, C. B. Tanner, Second Corporal, R. Wisdom; Third Corporal, G. B. Roberts; Fourth Corporal, Fred. Sturges. This company was sworn into service on May 6, 1861.

Outside of Wilmington the excitement continued unabated, and at the various recruiting stations volunteers flocked to be enrolled in the various companies which were being organized. To stimulate the enlistments Hon. S. M. Harrington and Hume Jenkins each contributed \$1000 towards purchasing the uniforms of Captain Green's company that was organizing in Camden and others pledged themselves to support the families of the soldiers during their absence from home. The Red Lion Mounted Guards was formed in Red Lion Hundred on the 27th of April, for home protection, with the following officers: Captain, John Jefferson Henry; First Lieutenant, Wm. M. Stuckert; Second Lieutenant, Charles Corbit; First Sergeant, Robert White; First Corporal, Wm. Beck. The field of operations of this company embraced New Castle County.

Early in May the "Union Home Guard" was formed at Newport, the citizens of that town aiding in equipping it. A company from Georgetown, Sussex County, arrived in Wilmington on the 9th of May. It was commanded by Captain C. Rodney Layton; First Lieutenant, David W. Maull; Second Lieutenant, Wm. Y. Swiggett. The "Dover Home Guards" were organized on the 9th of May, by the election of the following officers: Captain, Dr. Isaac Jump; First Lieutenant, Wm. Walker; Second Lieutenant, Dr. C. A. Cowgill; First Sergeant, J. R. Sweeney; Second Sergeant, Charles M. Justice; Third Sergeant, A. B. Richardson; Fourth Sergeant, Draper

A. Dewees; First Corporal, John Costen; Second Corporal, Samuel McGonigal; Third Corporal, Luff Lewis; Fourth Corporal, Wm. Smallwood; Ensign, John W. Smith. The company had an enrollment of one hundred and ten men. It was mustered into service as Company "G," on May 16, 1861. About the same time the "Felton Home Guards" were organized with the following officers: Captain, Thomas Draper; First Lieutenant, Richard B. Duncan; Second Lieutenant, Daniel La Motte, Jr.; Third Lieutenant, John J. Toner; Fourth Lieutenant, J. E. Bailey; Surgeon, Joseph Simpson.

The "Governor's Guard," at Bridgeville and Greenwood, numbering one hundred men, organized in May by the election of the following officers: Captain, W. O. Redden; First Lieutenant, Dr. Lawrence M. Cahill; Second Lieutenant, Simeon Penewell; First Sergeant, Wm. S. Cannon; Second Sergeant, James P. Carpenter; Third Sergeant, George Perkinpine; Fourth Sergeant, Dr. H. Clay Johnson; Fifth Sergeant, John M. Manlove; First Corporal, John E. Sudler; Second Corporal, John Heryes; Third Corporal, John Satterfield; Fourth Corporal, Wm. E. Carpenter.

Company H, the second company from Dover, Captain S. H. Jenkins, was mustered into service on May 16, 1861. The Smyrna Home Guards, with sixty-four muskets, were mustered in about the same time as were the Magnolia Home Guards with the following officers: Captain, Edward Stout; First Lieutenant, Mordecai Rickey, Jr.; Second Lieutenant, Wm. McGonigal.

The work of swearing troops into the United States service was commenced at Wilmington, May 2, 1861, the oath being administered by Major Ruff, of the regular army. Dr. R. P. Johnson acted as medical examiner. The aggregate number of men thus sworn that day was three hundred and thirty-eight, all of whom were mustered into the service of the Union. These companies were raised at and near Wilmington and became Companies A, B, and C, of the First Regiment Delaware Volunteer Infantry.

On the 4th of May Capt. James Green's company, consisting of seventy-eight men, from the lower part of Kent County, was mustered into the service as Company D of the same regiment.

The Sussex County volunteers, Capt. C. Rodney Layton, were mustered into the same regiment on the 16th of May, as Company G. Capt. J. H. Jenkins' company from Dover, Kent County, was mustered in on the same day as Company H. On the 20th Company I, commanded by Captain Leonard, and Company K, under the command of Captain George F. Smith, were mustered into service, thus completing the organization of the regiment.

The regiment was encamped at Camp Brandywine, on the grounds of the Agricultural Society, about one mile and a half from the city, where the members were constantly exercised in company and regimental drill. On the 22d of May the commissioned

officers assembled and elected the following regimental officers: Colonel Henry H. Lockwood, Lieutenant-Colonel John W. Andrews, Major Henry A. Dupont. The Governor appointed Dr. Robert P. Johnson surgeon of the regiment, and James M. Knight assistant surgeon. Wm. P. Seville was adjutant, W. Hill Alderdice quartermaster, Chaplain Rev. George M. Condron, Sergeant-Major John G. Saville.

On the 11th of May, 1861, the Governor appointed and commissioned Henry Du Pont, of New Castle County, "Major-General of the forces raised and to be raised in the State of Delaware," vesting him with the full power of that office. Col. Jesse Sharpe was appointed brigadier-general.

On the same date Governor Burton, yielding to the entreaties of Union men, who feared that some of the Home Guards might not prove loyal, issued General Order No. 2, which was intended to prevent a possible misuse of the arms of the State. This order, however, met with so much opposition and was regarded by many as such a direct subversion of the rights of the State, that the Governor was prevailed on to rescind the first order. This he did by issuing General Order No. 3, from his office, at Dover, May 14, 1861, as follows:

"Whereas I, William Burton, commander-in-chief of the Army and Militia of this State, on the 11th day of May, last, did issue my order, being No. 2, in the words following, to wit:—The arms and accoutrements belonging to the State, and now in possession of any military organization or company in this State, other than those companies mustered into the service of the United States, will, under the direction of Major-General Du Pont, be immediately delivered to such persons and at such points as the Major-General may conformably to law direct, to this end an accurate inventory will be immediately made out and transmitted to the Major-General by the commanders of all and every volunteer organization now existing in this State who may have such arms and accoutrements in possession. Major-General Du Pont is charged with the execution of this order, and a strict compliance with it is earnestly enjoined and confidently expected; and whereas as it seems meet and right so to do, now therefore, I, William Burton, Governor of the State of Delaware, and as commander-in-chief of the army of this State, do hereby countermand, revoke and declare null and void said orders issued by me as aforesaid.

"And I do hereby order and direct that the arms and accoutrements delivered to the different volunteer companies by my order, and not by me recalled, be and remain in the possession of and for the use of said companies until further orders from me.

"WILLIAM BURTON,
"Governor and Commander-in-chief."

Realizing the fact that the State was liable to incursions from the enemy, the organization of the Home Guards was actively prosecuted until most of the hundreds had men in military training. Of these Major-General Du Pont took command, and issued the following orders pertaining to them:

"HEADQUARTERS DELAWARE VOLUNTEER MILITIA, }
WILMINGTON, July 12, 1861."

"General Order No. 1.

"The commanders of all companies organized under the Volunteer Law, and all other persons having in their possession arms and accoutrements belonging to the State of Delaware, are hereby required to report by letter to the Major-General without delay, the number and description of said arms and accoutrements, the title of the Company holding the same, the Hundred and County in which it is organized and the number of men it musters for regular drill.

"By order of

"MAJOR-GENERAL DU PONT.

"ALF. R. WOOTEN, *Aid-de-Camp*."

"HEADQUARTERS DELAWARE VOLUNTEER MILITIA, }
WILMINGTON, July 12, 1861."

"General Order No. 2.

"The following Companies formed under the Volunteer Law will

constitute the First Regiment of Delaware Volunteer Militia, viz.: Delaware Guards, Capt. McClintock; Wilmington Home Guards, Capt. Sturgle; City Guards, Capt. Andrews; Union Guards, Capt. Wisdom; Brandywine Village Guards, Capt. Febiger; Wilmington City Guards, Capt. Riddle; Brandywine Home Guards, Co. A, Capt. L. Du Pont; Brandywine Home Guards, Co. B, Capt. C. I. Du Pont, Jr.; First Troop Delaware Light Dragoons, Lieut. Gemmill."

The arms for this regiment were furnished by the City Council of Wilmington, Mayor Gilpin reporting to that body, August 6, 1861, that he had supplied six hundred and thirty-six muskets, which had been purchased out of the eight thousand dollars appropriated for the defense of the city.

On the 23d of May, 1861, Governor Burton issued a second proclamation reciting that the requisition of the President for a regiment of three months' men had been met, but as the State was now called on to furnish another regiment for a period of three years, unless sooner discharged, he recommended that the work of organization be continued and advised that the army of the United States be sustained by volunteers from Delaware, who should report themselves to Captain H. W. Wharton, of the United States army, at Wilmington, who was fully empowered to muster them into the service of the United States for the period required. This led to the organization of the Second and other Delaware regiments, whose history is given in the following pages. The Delaware troops now became an inseparable part of the Federal forces.

Late in April Lieutenant-General Winfield Scott appointed Major-General Robert Patterson to the command of the Military Department of Washington, which included the District of Columbia, Maryland, Delaware and Pennsylvania. General Patterson was instructed to post the Pennsylvania and Delaware volunteers, as fast as they were mustered into service, all along the railroad from Wilmington to Washington, in sufficient numbers and in such proximity as would give reasonable protection to the lines of parallel wires to the road, its rails, bridges, cars and stations. On the 13th of May the repairs to the bridges on the road were completed, and two passenger trains passed through from Philadelphia to Baltimore without delay.

On the 28th of May, Companies A, B, D and E, Captains Robert S. La Motte, Charles E. La Motte, James Green and R. B. Milligan, of the Delaware Regiment, stationed at Camp Brandywine,¹ near Wil-

¹ The following was the routine of duty at the soldiers' camp near Wilmington:

"HEADQUARTERS 1st REGT. DEL. VOL., }
"CAMP BRANDYWINE, JUNE 2, 1861.
"General Order No. 1.

"The following detail of duties will govern the camp from this date:
"1st. Reveille at 5 A.M., when the companies will be assembled on the Company's parade by 1st Sergeants under the Company Officers.

"2d. Police call at 6 A.M., when the camp will be carefully policed.
"3d. Breakfast roll-call at 7 A.M., when the Companies will be formed by 1st sergeants, and rolls called—afterwards the companies marched in order to their messes.

"4th. Surgeon's call at 7.30 A.M., when the sick will be marched to the Hospital tent by a corporal Guard.

"5th. 1st Sergeants' call at 7.45 A.M.

"6th. Company assembly of Guard detail at 8.15 A.M.

"7th. Adjutant's call at 8.30 A.M.

"8th. Squad drill from 9 to 10.30 A.M.

mington, received orders to march A and B to Aberdeen, near Baltimore, and D and E to Bush River, to be stationed along the line for the protection of the railroad. Instantly the camp assumed a busy aspect. Knapsacks were packed, tents struck and prepared for transportation.

All along the route of march to the depot the roads and streets were thronged with enthusiastic people of both sexes, anxious to bid them good-by and cheer them on their mission. At the depot every avenue was densely crowded with a mass of human beings, and, as the train moved off, the soldiers were greeted with cheer after cheer.

On the 9th of June the remaining companies comprising the First Delaware Regiment of Volunteers, stationed at Camp Brandywine, received orders to relieve the Eleventh Pennsylvania Regiment, stationed along the line of the Philadelphia, Wilmington and Baltimore Railroad, between Wilmington and Baltimore, the Pennsylvania Regiment having been ordered to Washington. Under the command of Colonel Lockwood and Lieutenant-Colonel Andrews, the regiment proceeded by cars to its new field of duty. Before it left the city Captain R. S. La Motte was elected major of the regiment to fill the vacancy occasioned by the resignation of Major Henry Du Pont, Jr., who had entered the United States service.²

Evan S. Watson was chosen captain of Company A to fill the vacancy occasioned by the election of Captain La Motte as major, and Sergeant Ezekiel C. Alexander was elected first lieutenant in place of Watson, promoted to captain.

The companies were stationed along the railroad as follows: Company G at Elkton, Md., Company C at North East; Companies C and H at Perryville; Companies F and I at Havre de Grace. Regimental headquarters were established at Havre de Grace, whither Companies A and B were ordered after a short stay at Aberdeen.

Companies A, B, C, D and E, of the regiment, returned to Wilmington on August 3d, their term of service having expired, and were paid off and mustered out. They were commanded by Lieutenant-Colonel Andrews.

Companies G, H, I and K returned home on the 14th, and on the following day were also mustered out of service.

Three years' regiments were now organized in the State, and most of the officers and men of old First Delaware Volunteers re-enlisted in the new regi-

"9th. Dinner roll-call at 12 M.

"10th. Officers' drill from 1 to 2 P.M.

"11th. Company drill from 3.30 to 5 P.M.

"13th. Adjutant's call at 6 P.M.

"14th. Supper immediately after parade.

"15th. First tattoo call at 9.15 P.M.

"16th. Beat off at 9.30 P.M.

"17th. Taps at 10 P.M.

"18th. Field music will assemble for practice from 9 to 10.30 A.M., and at such other hours as the Adjutant may direct."

² James Montgomery, private, was the first man killed belonging to the regiment, being struck by a locomotive at Elkton, Md.

ments for "three years or the war." Col. Lockwood was promoted to brigadier general of volunteers.¹

The Second Delaware (three years') Regiment was encamped at Camp Brandywine, near Wilmington. The field officers of this regiment on August 16, 1861, were: Colonel, H. H. Wharton, late captain Sixth Infantry, United States Army; Lieutenant-Colonel, W. P. Bailey; Major, R. Andrews. Staff officers—Adjutant, Samuel Canby, Jr.; Quartermaster, George Plunkett. Company officers,—Company A: Captain, D. L. Stricker; First Lieutenant, Thomas M. Wenie; Second Lieutenant, John Evans. Company B: Captain, Charles H. Christman; First Lieutenant, Theo. Geyer; Second Lieutenant, W. F. Fennimore. Company C: Captain, Benjamin Ricketts; First Lieutenant, W. A. Torbert; Second Lieutenant, John Simpers. Company D: Captain, John M. Perry; First Lieutenant, William Hembold; Second Lieutenant, A. J. Krause.

About the middle of September, 1861, the regiment was sent to Cambridge, Dorchester County, Md. In February, 1862, the First Delaware Regiment was stationed at Camp Hamilton, Fortress Monroe. On the 8th of July in the same year the citizens of Wilmington presented to the First, Second and Third Delaware Regiments beautiful flags in Institute Hall. Mayor Gilpin presided and Leonard E. Wales presented the flags in an eloquent speech. Hon. George P. Fisher received the colors in the name of the respective regiments then in the field.

The Second Regiment of Volunteer Home Guards was organized in Sussex County, and elected its field officers, in the fall of 1861, at a meeting held at Georgetown in pursuance of Order No. 4, by Major-General Du Pont. Six companies were represented, and the officers chosen were: Colonel, William O. Redden; Lieutenant-Colonel, John M. Phillips; Major, Wm. H. Stayton; Adjutant, Dr. William Marshall; Quartermaster, Elisha Holland; Surgeon, Dr. H. F. Hall; Sergeant-Major, John Hickman.

¹ His officers presented him a sword on Sept. 9, 1861, in the Institute Hall, Wilmington. General Henry Hall Lockwood was born in Kent County, Aug. 17, 1814. He entered West Point Academy in 1832, and graduating in 1836, was attached to the Second Artillery as second lieutenant. He served in the Seminole Indian War, and resigned his commission in 1837. In 1841 he was appointed Professor of Mathematics in the United States navy, and served until 1861 in this capacity. During this period, while attached to the frigate "United States," he was engaged at the capture of Monterey in 1847, serving as adjutant of a land detachment from his vessel. At the breaking out of the late Civil War he left his instructor's chair and attached himself to the First Delaware Volunteers as colonel May 26, 1861. On August 8th of the same year he was commissioned brigadier-general of volunteers, and in November commanded the expedition to the Eastern Shore of Virginia, and in January to June, 1863, was appointed to command the defense of the Lower Potomac. General Lockwood participated in the battle of Gettysburg July 1-3, 1863, and subsequently was placed in command of Harper's Ferry, afterward succeeding General Schenck, at Baltimore, as commander of the Middle Department. In 1864 he participated in the campaign before Richmond, and was also in the engagement near Hanover Court-House. He commanded the provisional troops at Baltimore in 1864, when that city was threatened with a raid by General Early. On being mustered out of the volunteer service in August, 1865, General Lockwood returned to the Naval Academy, and continued there until 1871 as Professor of Natural and Experimental Philosophy. In 1871 he was transferred to the Naval Observatory at Washington, and remained until August 14, 1876, when he was placed on the retired list. After his retirement, General Lockwood lived in Georgetown. His wife was a daughter of Chief Justice Booth, of Delaware.

The following companies in Kent County, formed under the Volunteer Militia Law, constituted the Third Regiment of Delaware Volunteer Militia in November, 1861: Dover Union Home Guards; Felton Blues; McClellan Home Guards, Smyrna; Frederica Grays; Magnolia Home Guards; Leipsic Home Guards; Continental Rifle Guards, Camden; Diamond State Guard, Milford; Delaware Home Guard, Hasletville; Mordington Mills Guard, Milford; Delaware Union Home Guard, Whitelysburg; Little Creek Home Guard, Little Creek Landing.

Notwithstanding the measures adopted to support the Union, a portion of the people of the State were not disposed to sustain, by active efforts, the hostilities in which the Federal government had now become involved. They thought that the power of the North would be insufficient to bring the Southern States back into the Union; and if they ever again became a part of it, they must come back voluntarily. Assuming this position, the views entertained under it were exceedingly various, and some possessed so great latitude as to embrace those who favored the cause of the Confederate States. To those even who honestly entertained these views, war held out no prospect but that of mutual destruction. A separation and acknowledgment of the Confederacy were regarded as the course of wisdom. Some believed that by peace and conciliation, the seceding States might finally be induced to return. The peace men in Delaware, Connecticut and all the Northern States were thus actuated, although some carried their views to an extreme. As a general fact, they were men who loved the Union, and earnestly desired its restoration. They had no antipathy to the institutions of the Southern States, and were, in a manner, devoid of every feeling of interest or anxiety on the point concerning which those who elected the Federal administration and those who organized the Confederate States had for years been at issue. War with them, as with Senator Douglas, of Illinois, "was final, inevitable dissolution."

In Delaware there were not only many citizens opposed to the war, but there were a few who heartily desired the success of the Confederate States. The Secretary of War, in his report at the session of Congress which commenced in December, 1861, says: "At the date of my last report in July, the States of Delaware, Maryland, Kentucky and Missouri were threatened with rebellion. In Delaware, the good sense and patriotism of the people have triumphed over the unholy schemes of traitors."

On the 27th of June a meeting was called at Dover of "all the citizens of the State, without regard to former party relations, opposed to civil war, and in favor of a peaceful adjustment of all questions which have distracted the country and produced its present lamentable condition." About 1500 or 1600 persons assembled on Dover Green, twelve car-loads of people coming from above Dover, and seven from below. On motion of Col. Wm. G. Whitely, the meeting was

temporarily organized by calling upon Robert W. Reynolds, of Kent County, to preside, and selecting N. W. Hickman, of Sussex, as secretary. The following committee was then appointed to recommend permanent officers: From Kent County, Dr. Henry Ridgely, William Collins, James Williams, Ambrose Broadaway, Alexander Johnson; New Castle, Gassaway Watkins, James R. Booth, John T. Enos, N. T. Boulden and William R. Lyman; Sussex County, C. F. Ruat, Ed. L. Martin, S. B. Hitch, Josiah Marvel. On motion, the meeting then adjourned till one o'clock. At that hour the meeting was convened on the Green, where a stand had been erected.

Dr. H. Ridgely, the chairman of the committee, reported the names of the following gentlemen as officers, whereupon, on motion, the report was unanimously adopted, viz., President, ex-Gov. William Temple; Vice-Presidents, from New Castle County, Rothwell Wilson, Andrew C. Gray, James Matthews, John Farson, Wm. C. Lodge, Samuel G. Chandler, Aquilla Derrickson, Thos. Jamison, Sewell C. Biggs, Benjamin Gibbs. From Kent County, John Mustard, Robert B. Jump, Manlove Hayes, Rev. Thomas B. Bradford, Henry Pratt, Dr. T. C. Rogers, Andrew J. Wright, Moses Harrington, H. B. Fiddeman, Charles Williamson. From Sussex County, Capt. Hugh Martin, Nathaniel Horsey, James Anderson, Harbeson Hickman, John W. Short, Thomas Jacobs, Doughty Collins, Stephen Green, M.D., Shephard P. Houston, William F. Jones. Secretaries: Adam E. King, New Castle County; R. M. Merriken, Kent County; Charles H. Richards, M.D., Sussex County. On motion of Mr. Whitely, the following committee of ten from each county was appointed to prepare business for the meeting: New Castle County, Dr. John Merritt, James M. Watson, Dr. N. H. Clark, Adam V. Cullin, John P. Cochran, James Delaplaine, Nathan T. Boulden, James Springer, William C. Lodge, Joseph Roberts. Kent County, John M. Voshell, Wilson T. Cannon, Dr. Gove Saulsbury, R. W. Reynolds, Alex. Johnson, William N. W. Dorsey, Edward Ridgely, George W. Anderson, Thomas Davis, William D. Fowler. Sussex County, C. R. Paynter, W. Wheatley, Noble Conaway, Isaac Giles, Nathaniel Horsey, A. J. Horsey, Dr. Joseph A. McFerran, Joseph Ellis, J. S. Bacon, N. W. Hickman.

After the committee retired, Mr. Whitely was loudly called for and made a speech in opposition to the war and in favor of a peaceful adjustment of our national difficulties. He began by observing that eleven States had gone out of the Union, which he deplored, but they were determined to go out, and had gone, acting upon the glorious principle that all government derived its power from the consent of the governed.

"They, eight millions of freemen, had resented continued aggression and intermeddling, until the election of a Republican placed the last feather upon the back of the people, and they had calmly, quietly, determinedly retired. In God's name let them go unmolested! Would Delaware give money or men to hold States as conquered provinces? or allow the seceded States to be governed by free people, in whatever manner they chose to be governed? Could the South be subjugated?

Never! All the wealth of mines and kingdoms would not restore the country to its unembarrassed condition. All expenditures were needless, as there were not men enough in the North to conquer a free people fighting for their rights, even against any odds. Who would not, therefore, favor peace now, if arms would still produce the same results? Let the tax-payers of Delaware come forth for peace, which would accomplish all that war could do."

Mr. Whitely was followed by Hon. Thomas F. Bayard in a lengthy, calm and temperate speech. He reminded his hearers that "with this secession, or revolution, or rebellion or by whatever name it may be called, the State of Delaware has naught to do. To our constitutional duties toward each and every member of this Union we have been faithful in all times. Never has a word, a thought, an act of ours been unfaithful to the union of our fathers; in letter and in spirit it has been faithfully kept by us." But he adverted to the horrors of a fratricidal war on so gigantic a scale, the ruin that would be wrought, and the danger that, whatever might be the issue, which no man then could foresee, constitutional liberty might perish in the struggle. Better, he thought, "while deeply deploring the revolution which has severed eleven States from the Union," if a peaceful accommodation was impossible, that the discontented States should be allowed to withdraw than run the awful risk of such a war. His calm and earnest eloquence had great weight, and, as will be seen, the meeting resolved "that there was no necessity for convening the Legislature."

Mr. Bayard's speech calmed down the state of excitement which prevailed at the meeting. "It brought to men's minds," as a leading Delawarean said, "the fact that they were in the Union—had no part in the rebellion, and that it was their duty to remain as they were, and to keep Delaware as one of the United States." In this, as ever, Mr. Bayard approved himself faithful to the Constitution and the Union under it, his devotion to which has never wavered, as witness his public record, from first to last.

At the conclusion of Mr. Bayard's speech, Dr. John Merritt reported the following resolutions, which were unanimously adopted:

"Resolved: 1. That whilst we deeply deplore the revolution which has severed eleven States from the Union, we prefer peace to civil war, and believe that if a reconciliation by peaceful means shall become impossible, the acknowledgment of the independence of the Confederate States is preferable to an attempt to conquer and hold them as subjugated provinces.

"2. That the reign of terror attempted to be inaugurated by the War Party, by denouncing all men as disunionists, secessionists and traitors, who are opposed to civil war, and to the palpable and gross violation of the Constitution, committed by the present administration, will not deter us from the expression of our opinion, both privately and publicly.

"3. That we believe the effect of the doctrines and measures of the War Party, if not their object and intent, under the name of preserving the Union, will be to the subversion of the State governments, and the erection of a consolidated government on the ruins of the Federal Constitution.

"Resolved: That we tender our grateful thanks to Senators Bayard and Saulsbury for the bold and patriotic stand they assumed, in the second session of the Thirty-sixth Congress, for the maintenance of the peace and prosperity of our now distracted country, and we earnestly request them to use all honorable means to bring the 'Civil War' which now hangs over us like an incubus, to a speedy close, and that if in their judgment no other mode presents itself whereby this end can be attained, to advocate the acknowledgment by the United States Government of the Independence of the Confederate States, so that peace and prosperity may be restored among us.

1. The first step is to identify the key components of the system. This includes understanding the hardware, software, and data involved.

1. The first step in the process of the school is to identify the needs of the students. This is done through a variety of methods, including surveys, interviews, and observations. The data collected is then used to develop a plan of action that addresses the specific needs of the students.

1. The first step is to identify the problem. In this case, the problem is that the company is not meeting its sales targets.

W. H. H.

Resolved: That the memorial demanding the resignation of the Hon. James A. Bayard, one of your Senators in the Senate of the United States, originated in mob spirit, and should receive from him the scorn and contempt which it merits from every honorable man.

Resolved: That in the opinion of this meeting, there is no necessity for convening the Legislature of this State."

The meeting was then further addressed by A. E. King, Edward Ridgeley, Messrs. Henderson and Paynter and Dr. Edward Worrell.

In August, Dr. Jonas, Inspector of Customs at Seaford, seized several hundred rubber overcoats and twenty compasses, which had been sent from Baltimore to be shipped South by way of Salisbury, Md. They were confiscated and sold in Wilmington in November, 1861.

The brilliant victory of the land and naval forces under General Sherman and Commodore Du Pont at Port Royal, South Carolina, on November 7th, created the greatest enthusiasm in Wilmington, where Commodore Du Pont was well known. In honor of the event, the citizens fired a national salute of twenty-one guns on the 13th of November. This was followed by a salute of one hundred guns, fired by order of the City Council. In March, 1862, the captured flags sent from the South by Commodore Du Pont for the city of Wilmington, were presented with appropriate ceremonies in the Institute Hall. Speeches were made by Messrs. Harrington and Biddle.

The intrepidity displayed by Commodore John Pritchett Gillis, of Delaware, at the bombardment of Port Royal, under the terrible fire of Fort Walker while in command of the "Seminole," was the subject of mention in General Dayton's official report.

Commodore Gillis was born in Wilmington; but while young removed temporarily with his father to the State of Illinois. His temperament was marked by an ardor united with so untiring a perseverance, that he would never permit himself to admit a defeat in his endeavors. This boyish trait was the earnest of the man, whose heart later burned with patriotic zeal at the "drum-beat of the nation."

His yearning to enter the service of his country was gratified by his receiving an appointment of midshipman in the year 1825. From the date of his youthful honors to the day his heart was stilled in death, his life was one of usefulness to his country and honor to the State which claimed him as her son.

His first cruise was in the frigate "Brandywine" to the Pacific, during the years 1826-29. In 1831 he was a passed midshipman in command of the schooner "Albion." In 1833 he was again at sea, as acting master of the frigate "Constellation," in the Mediterranean, and in 1835-36 he was executive officer of the receiving-ship "Sea Gull," at Philadelphia. On the 9th of February, 1837, he was commissioned a lieutenant, and being ordered to the sloop-of-war "Falmouth," sailed for a second cruise in the Pacific. During this cruise he was transferred to the "Delaware," ship-of-the-line, arriving home in 1840. Two years later we find him again at sea, on board the frigate "Congress," in the Mediterranean Squadron. He was transferred to

the sloop-of-war "Preble," as executive officer, and returned to the United States in 1843. The same year he was attached to the frigate "Raritan," and in 1844 he joined the frigate "Congress" on the Brazil station. In 1845 he was intrusted with the important duty of bearing despatches to the commander-in-chief of the Pacific Squadron; and in 1846 he returned home, bearing despatches from our minister in Brazil.

When war was declared with Mexico, he sailed in the sloop-of-war "Decatur," to join Commodore Perry in the Gulf Squadron. He distinguished himself in the action which resulted in the capture of the forts and town of Tuspan. Later he commanded the flotilla on the Alvarado River and became the governor of the towns of Alvarado and Tlacotalpan. During this period he fell ill of yellow fever, and was compelled to return to the United States. His regret at being forced to relinquish his command was, perhaps, softened by the handsome letters sent him by Commodore Perry and the Secretary of the Navy. From 1851 to 1854 he was again at sea, in the Japan Expedition. In 1855 he was promoted to a commander, and was ordered to the steamer "Powhatan."

In 1861, when the nation was startled by the great Rebellion, and the guns of Fort Moultrie opened on the heroic Major Anderson in Fort Sumter, Commander Gillis sailed in command of the steamer "Pocahontas" for Charleston, arriving only to find that Major Anderson had been compelled to surrender. From this hour the activity of Commander Gillis was unabated. His acts of heroism on the Potomac and James Rivers, and the energy with which he sprang to the succor of his country, brought him prominently into notice. Surely the day-dreams of the boy were being fully realized! Under the most galling fire of the enemy he was ever cool and self-possessed. While commanding the "Seminole" at Port Royal, under the terrible fire of Fort Walker, Commander Gillis was the subject of mention in General Drayton's report. His well-earned promotion to post-captain occurred in 1862, and he took command of the steam-sloop "Ossipee," with the view of going in search of the rebel cruiser "Alabama." Unfortunately, the engines of his ship were found to be defective, and the enterprise was abandoned.

Captain Gillis then proceeded to join Admiral Farragut, in the West Gulf Squadron. During this service, duty carried him to Mobile, as well as to the coast of Texas, and in consequence of the exposure he had borne he became ill, and a medical board of survey condemned him, and he was sent home and placed on the retired list. In 1866 he was promoted to a commodore. In 1873 he was on duty at the Naval Asylum, Philadelphia, and apparently in his usual state of health; but, on visiting his home in Wilmington, intending to return the following morning, he was suddenly taken ill, and on the 25th day of February, 1873, he departed from the scene of a well-spent life. He left a widow (who was Miss Elizabeth Tatnall), and two sons.

Robert H. Clark.

In October, 1861, the Presbytery of Wilmington, in Middletown, adopted a series of patriotic resolutions in favor of the government and the prosecution of the war. About the same time, at the request of Hon. Montgomery Blair, Postmaster-General, A. H. Grimshaw, postmaster at Wilmington, recommended the ladies of that city and vicinity to form societies for the purpose of co-operating with the members of the Sanitary Commission, at Washington, in their efforts to alleviate the sufferings of the sick and wounded soldiers. In accordance with this request, sewing circles were formed in each church, and an immense number of articles of clothing, blankets and food supplies, necessary for the sick, were forwarded to the armies.

In April the friends of Commodore Du Pont on the Brandywine presented him with a beautiful sword.

Another son of Delaware, who performed gallant and meritorious service in the United States Navy, during the great Civil War, was Dr. Robert Hill Clark, Paymaster of the United States Navy. He was the son of Thomas Clark and Eliza Hill, daughter of the late Colonel Robert Hill, and was born at Frederica, Del., December 5, 1818. At the age of fourteen he was sent to Milford to attend the academy, where he acquired his preparatory education. From 1836 to 1840 he was a clerk in a hardware store in Philadelphia. He then returned to Delaware and during the three succeeding years was a merchant at Vernon, Kent County. In 1844 he began the study of medicine, entered the Medical Department of the University of the City of New York, and was graduated in 1846. Returning to Milford, he commenced the practice of medicine in partnership with his uncle, Dr. William Burton, where he remained, engaged in the duties of his profession until July 18, 1857, when he obtained a commission as Purser in the United States Navy. He was made Paymaster June 22, 1860; promoted to Pay Inspector March 3, 1871; promoted to Pay Director January 23, 1873, and was retired December 5, 1880, with the rank of Commodore.

His first duty was on the steamship "Fulton," in the Paraguay expedition, and he was next transferred to the steamship "Iroquois," on the Mediterranean station. While there the Rebellion began; his vessel was ordered to New York and sent on blockade duty off Savannah, Georgia, and from thence was directed to cruise through the West Indies in search of the Confederate steamship "Sumter." This war-vessel was found by the "Iroquois" at the port of St. Pierre, on the Island of Martinique. The rules of international law would not allow her to be captured within the port, and the French government, owner of the island, ordered the "Iroquois" either to come to an anchor or go out one marine league from shore. She chose the latter, but despite a careful watch of several days the "Sumter," through the darkness of a foggy night, escaped.

The "Iroquois," on which Paymaster Clark was

still stationed, was now ordered to join the squadron of Admiral Farragut, to prepare for the attack on New Orleans; was present at the capture of Forts Jackson and St. Philip, and at the battle of Fort Chalmette, immediately below New Orleans. During these severe engagements Paymaster Clark did praiseworthy service as physician and surgeon in relieving the sufferings of the wounded and dying.

After the evacuation of New Orleans the "Iroquois" and the steamer "Mississippi" were sent down the river to assist and protect the smaller Union vessels. She next went up the river, and assisted in the capture of Baton Rouge and Natchez. She passed the batteries at Vicksburg, June 28, 1862, and also on July 16, 1862, on the return to New Orleans. From thence the "Iroquois" was ordered to New York and put out of commission.

In December, 1862, Paymaster Clark was ordered to Pensacola Navy-Yard, in charge of the West Gulf squadron, and remained on duty there till the close of the war. His next term of duty was at Boston, as paymaster from 1865 to 1868. He then received orders to accompany the South Pacific squadron as fleet-paymaster. Joining the United States ship "Powhatan" and returning to New York in September, 1869, he was sent on the same ship as fleet-paymaster of the East Gulf squadron. In January, 1870, the "Powhatan" went out of commission at Philadelphia. On May 1, 1870, he was made inspector of clothing and provisions at the Philadelphia Navy-Yard, continuing until 1873, when he became paymaster at the United States Naval Asylum, remaining until 1875.

In February, 1877, he was again ordered to the Philadelphia Navy-Yard as inspector of provisions and clothing, continuing in that position until September 1, 1879.

On December 5, 1880, he was retired under the act of Congress, having attained the age of sixty-two years. He returned to Milford, which he always recognized as his home since the time he first came to it as a school-boy. In all Paymaster Clark was twenty-three years in active service, filling all the positions of responsibility and trust assigned to him with eminent satisfaction to his superiors, being distinguished for the marked accuracy, ability and fidelity with which he discharged his official duties.

December 4, 1848, he married Eliza P. Cubbage, of Kent County, Delaware. Three children were born of this union, all dying in childhood.

Both he and his wife were communicants of the Methodist Episcopal Church at Milford.

In 1842 he was made a Mason in Temple Lodge No. 9, at Milford.

After spending seven years in the quietude of his home, surrounded with every comfort, he was stricken with paralysis December 17, 1887, and died from its effects three days later.

He was a man of remarkable business tact and energy, quick of apprehension, sound in judgment,

A vessel was chartered at New Orleans to take the steamer "Mississippian" up the Mississippi river to assist and protect the shipment of cotton from New Orleans to the river, and to assist in the fire of Baton Rouge, and at Natchez, and in the capture of Vicksburg, June 22, 1862, and July 10, 1862, on the route to New Orleans, and thence to Louisiana. It was ordered to New Orleans for outfit of commission.

[illegible]

In 1870, at age 71, he was elected to the 18th Congress, New York as an Independent, contributing to the cause of reform in 1872.

On February 19, 1954, he was one of the first to give testimony in court against the communists in the Young People's League. He was named in the National Security Council's "Harris Report" for his role in setting up the Young People's League in 1942, the year of active Soviet infiltration of the Communist Party in the United States. He was named in the report with approval for his role in the "Harris Case" and for his "loyalty and activity with which he discharged his duties."

Robert H. Clark.

firm in his convictions and devoted and faithful in all his domestic relations. He was large of stature, and dignified and courtly in bearing, a man of inflexible honesty and spotless integrity.

At the breaking out of the war many mechanics were thrown out of employment, and general stagnation prevailed in all branches of business. This did not however, continue very long, for when the government began active operations there was great necessity for all kinds of manufactured articles. This demand gave employment to a great many manufacturers in Wilmington, and mechanics were in great demand. Among the first government contracts given to Wilmington was one for building the steam boilers, engines and machinery for the United States sloop-of-war "Juniata," then being constructed at the Philadelphia Navy-Yard. It was awarded in September, 1861, to Messrs. Pusey, Jones & Co., and amounted to about \$100,000.

The immense demands that the war occasioned upon the ship yards of Wilmington gave full employment to them, and the heavy and urgent requisitions of the government were met with a corresponding energy of production. The largest orders were filled with a promptness and fidelity which elicited the special thanks of the departments and the praise of the officers to whom the work was delivered. Among the first vessels sold to the government, of Wilmington manufacture, was the side-wheel steamer "Delaware," built by Messrs. Harlan, Hollingsworth & Co. This enterprising firm built some of the most historic gunboats and monitors mentioned in our naval history. Among them may be mentioned the monitor "Patapsco," "Saugus," "Napa" and others.

James H. Deputy, ship-builder at Milford, also sold one or more gunboats to the government. The United States steamer "Mingo" was built at the ship-yard of D. S. Mershon.¹

Government army wagons were built for the government by Messrs. Flagler & Woolman, tent-poles were made by Messrs. Wright & Allen, and Henry S. McComb had large contracts for furnishing knapsacks, stocks and other army and navy supplies.²

¹John D. Benton, of Wilmington, manufactured for a number of builders of iron vessels a model of the original "Monitor," made out of pure gold. It was 25 inches long, 5½ inches wide and 1¾ inches deep. It had a revolving turret with guns, a smoke-pipe, binnacle, steam-whistle, machinery, &c. The machinery which turned the turret also played an organ with fourteen tunes. The model cost seven thousand dollars, and was presented to Captain John Ericsson, the inventor of the "Monitor."

²The Union men of Cedar Neck, Sussex County, in August, 1861, organized a "Home Guard" with the following officers: Captain, R. H. Davis; First Lieutenant, Henry B. Spence; Second Lieutenant, James Reed. In September the patriotic citizens of Lewes raised the stars and stripes amid the discharge of cannon, the beating of drums &c. Addresses were made by Messrs. H. F. Rodney, S. Adams and L. Waples. In October the ladies of the upper part of Christiana Hundred were busily engaged in preparing underclothing and other supplies for the soldiers. A ladies' soldiers' aid society, composed of the leading ladies of Camden, Delaware, was formed in November, 1861. The ladies of Pencader Hundred in January, 1862, sent a sum of money and many necessary articles to the members of the Second Delaware Regiment. The ladies of Magnolia, Kent County, about the same time sent many useful articles to the sick and wounded soldiers. A Ladies' Aid Society was formed October 19th, by the ladies of Mill Creek and Christiana Hundred, at the request of the United States Sanitary Commission, and did good work, furnishing aid and comforting the sick and wounded soldiers. The Ladies' Soldiers' Aid Society of Middletown forwarded many useful articles to the First

Governor Burton called the members of the General Assembly to convene in special session on Monday, the 25th of November, 1861, for the purpose of taking proper action in reference to the collection and payment of Delaware's portion of the assessment levied by Congress upon the several States of the Union for war purposes. The Governor in his message to this body said:

"Our citizens have acted in a manner highly creditable to them, and well deserve the quiet they have enjoyed. Those, if there be any, and doubtless there are some everywhere, whose sympathies incline to the South, are quiescent, laying no impediments in the way of the Government, nor affording its enemies any sort of aid. Some of the innumerable rumors afloat throughout the country may, perhaps, represent a different state of things; but were the test of truth properly applied to these reports, most of them would be found wholly unreliable."

Besides appropriating \$74,681, the direct tax apportionment assessed upon the State by the general government, a movement was made at this session to pass a bill, providing for the ultimate abolition of slavery within the State. The scheme was based upon the payment by the United States of a certain sum to establish a fund towards securing full and fair compensation to the owners. It was not, however, successful.³

Delaware Regiment early in 1862. The patriotic citizens of South Milford raised a large pole and flag in April, 1862. Speeches were made by Dr. W. C. Davidson and Charles P. Masten. The ladies of Delaware City also forwarded many comforts and dainties to the sick and wounded soldiers in May, 1862. The Union men of Ogletown raised a large flag the 21st of June, 1862. The meeting was addressed by S. M. Harrington, Jr.

A large and enthusiastic Union meeting was held at Dover, June 24, 1862, which was addressed by Messrs. N. B. Smithers, Edwin Wilmer, Wm. P. Lord, N. B. Knight, James R. Lofland and C. H. B. Day.

On July 22, 1862, the citizens of Sussex County had a grand Union demonstration at Georgetown, where addresses were delivered by Hon. George P. Fisher, N. B. Smithers, Jacob Moore and Hon. C. S. Layton.

A large and successful festival was held at Summit Bridge on October 1, 1862. The object was to procure funds for the relief of the sick and wounded soldiers. Addresses were made by N. B. Smithers, E. G. Bradford and Rev. E. J. Way.

One of the largest and most enthusiastic meetings ever held at Middletown came off on the 24th of October, 1862. Speeches were delivered by Hon. George P. Fisher, Philip S. White, of Philadelphia, N. B. Smithers, Edward G. Bradford and Edward Wilmer. Resolutions strongly in favor of the Union were adopted.

There was a great Union meeting at Dover, June 9, 1863, at which speeches were made by James M. Seavel, of New Jersey; Hon. David Dudley Field, of New York; Hon. Henry Winter Davis, of Maryland; Hon. Judge Bond, of Baltimore; and Major-General Schenck, commander of the Middle Department, United States Army.

³On the first Monday in November, 1861, Hon. George P. Fisher, then a member of Congress from Delaware, received a dispatch from Montgomery Blair, stating that President Lincoln desired his immediate presence in Washington. Judge Fisher did not know what was desired of him, but after some thought concluded it was in relation to the slaves in the State. He replied that he would be in Washington in a few days. The Legislature was to meet the next day, and upon its adjournment on Wednesday Judge Fisher went to Washington, and called on the President. He felt certain of the object of the summons by this time, and opened the conference by saying: "I suppose you want to see me about the slaves in Delaware?" The following dialogue then ensued:

President Lincoln—"That is it exactly."

Judge Fisher—"How much are you willing to give if I could procure the passage of a law by our Legislature to emancipate the slaves, and what proposition have you to make?"

President Lincoln—"How many slaves have you?"

Judge Fisher—"Seventeen hundred and ninety-eight, or say an even eighteen hundred."

President Lincoln—"To emancipate your slaves I will give, by instalments for ten years, three hundred dollars per head for the men, women and children, young, old and decrepit."

Judge Fisher desired more than this, and replied: "We must have five hundred dollars for each one."

The President, after a while, agreed to give this. Judge Fisher's object in striking the best bargain he could, was to procure to each slaveholder for his slave the compensation according to his value in this State, and the surplus between the real value and the five-hundred-dollar payment to be made by the United States to be appropriated to public im-

The second session of the Thirty-seventh Congress convened at Washington on the 2d of December, 1861. The State was represented in the Senate by Hon. James A. Bayard and Willard Saulsbury, in the House by Hon. George P. Fisher. In the Senate, on the 4th of December, Mr. Saulsbury offered the following joint resolution proposing a conference for the settlement of the existing national difficulties. This was the only proposition made at this session which contemplated a peaceful adjustment of the difficulties between the North and South. It was publicly declared in South Carolina that "more was to be feared from this proposition than from all the armies of the North:"

"WHEREAS, the people of the States of Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Arkansas and Tennessee are in revolt against the constitutional Government and authority of the United States and have assumed to secede from the Federal Union, and to form an independent government under the name of the Confederate States of America; AND WHEREAS the Congress of the United States, approving the sentiment expressed by the President in his annual message, 'that the Union must be preserved, and hence all indispensable means must be employed,' and believing that kind and fraternal feeling between the people of all the States is indispensable to the maintenance of a happy and prosperous Union, and being willing to manifest such feelings on their part, to the end that peace may be restored to a distracted country, and the Union and Constitution be preserved and maintained; and inviting the co-operation of the people of the aforesaid States in the accomplishment of objects so beneficial to each and all, do resolve as follows:

"Resolved, by the Senate and House of Representatives of the United States of America in Congress assembled, That Millard Fillmore, Franklin Pierce, Roger B. Taney, Edward Everett, George M. Dallas, Thomas Ewing, Horace Binney, Reverdy Johnson, John J. Crittenden, George E. Pugh and Richard W. Thompson be, and they are hereby appointed commissioners on the part of Congress, to confer with a like number of commissioners to be appointed by the States aforesaid, for the preservation of the Union and the maintenance of the Constitution, and that they report the result of their said conference to Congress for approval or rejection.

"Resolved, That upon the appointment of commissioners, as hereby invited, by said States, and upon the meeting of the joint commission for the purpose of conference as aforesaid, active hostilities shall cease

improvements and education. A long conversation ensued, in which the President assured Judge Fisher that a bill could be passed through Congress upon the basis indicated, and that Owen Lovejoy, of Illinois, in the House, and Charles Sumner, in the Senate, would be its champions, and all that Judge Fisher would have to do would be to attend to the matter at the Delaware end of the line, as he would attend to it at Washington. He then put Judge Fisher in communication with Thomas A. Scott, who was at that time Assistant Secretary of War, they having previously agreed upon the provisions to be incorporated in the bill, and it was prepared by Judge Fisher and the Hon. N. B. Smithers. They were that the emancipation of the slaves was to be accomplished in ten years, for which the government of the United States was to pay to the State of Delaware nine hundred thousand dollars,—ninety thousand dollars each year. After seeing General Scott, Judge Fisher came directly home, at the instance of the President, to feel the pulse of the State in regard to the matter, and almost everybody to whom he mentioned the subject was in favor of it. A caucus of the friends of the measure was held, including a number of the members of the Legislature, N. B. Smithers, Benjamin Burton, William Ellegood, Jacob Moore, Hiram W. Short and James R. Lofland. The conference was held in Mr. Smithers' house, and the object was to ascertain whether it would be possible to make arrangements for the passing of the measure, their intention being not to introduce it until they were assured of its passage through both Houses. The Democrats had a majority in the House of Representatives and in the Senate. Agents were employed to ascertain whether the bill could be passed, and to make proper efforts to pass it. Two members of the Democratic party in the House declared themselves in favor of the bill, and two members of the same party in the Senate. The Senate was secured and ten in the House, but it was not offered for the reason that one man, and the only man in the entire body who had been elected as a distinctively Lincoln man, could not be induced to say he would support the bill.

President Lincoln's idea in having the bill passed was to carry out one of his favorite ideas—to bring the Rebellion to a peaceful close. If the scheme had succeeded in Delaware, Maryland was to be tried next, and each of the border States, until slavery was abolished in them, and then it was thought the slave States would fall in line and agree to similar bills.

and be suspended, and shall not be renewed unless said commission shall be unable to agree, or in case of an agreement by them, said agreement shall be rejected either by Congress or by the aforesaid States."

Mr. Sumner, of Massachusetts, objected to the reception of the resolutions, but they were, however, received and laid on the table.

The first proclamation of the President, ordering seventy-five thousand men into the field on April 14, 1861, for three months, was followed by another on May 3d, calling into service forty-two thousand and thirty-four volunteers for three years. By an act of Congress of July 22d the States were asked to furnish five hundred thousand volunteers, to serve for three years or during the war.

The enlistment and organization of troops were entered upon with great activity and warm popular approbation during the ensuing three months, when it was restricted. Many circumstances aided the enlistment. The cause of the Union was approved, a general stagnation or inactivity pervaded all industrial pursuits, and multitudes were partially or wholly unemployed, and the wages offered to the soldier were extremely liberal. The pay offered privates by the United States was thirteen dollars per month, and a bounty of one hundred acres of land at the close of the war. In addition, many of the States gave to each married citizen volunteer about one dollar per week for his wife, and in proportion for each child of his family between certain ages. Where such a sum was not given to the family of the private by the State, it was in numerous instances bestowed by the city or town in which he lived. The pay of officers was on an equally liberal scale, and civilians in profitable social positions, as well as those in no position, aspired in the rawest state to obtain the rank of officers. Too many unworthy persons were successful. It cost the government millions, and required the efforts of all the military skill in the country to bring the accumulated mass up to the discipline and order of an approved army. On the 1st of December, 1861, the number of soldiers Delaware had in the field was estimated by the War Department at two thousand.

On the 5th of August, 1862, Governor Burton was notified that a draft of three hundred thousand men would immediately be called into the service of the United States, to serve for nine months, unless sooner discharged, and that a special draft would also be made to fill the quota for the three hundred thousand volunteers, which had not yet been supplied. The State having no provision for calling out the militia, the Governor was instructed to appoint officers to make out the rolls of men subject to the draft at the expense of the general government. Under the first call the quota of Delaware was one thousand seven hundred and twenty men, and a like number under the second, making a total of three thousand four hundred and forty men. Deducting the enrollment of Colonel Grimshaw's Fourth Regiment, and of Captain Nield's battery, at that time forming, the State

was called on to supply two thousand two hundred and ninety men. Under the existing state of affairs, this was a large number to place in the field within the allotted time, the draft having been ordered for September 1, 1862. The Governor succeeded in securing an extension of time until the 25th of September, and the enrollment of men was pushed with all possible dispatch. The bounty fund of these volunteers was increased by the act of the Philadelphia, Wilmington and Baltimore Railroad Company, which appropriated three thousand dollars in August, 1862, the States of Pennsylvania and Maryland receiving equal amounts. The Levy Court of New Castle County was urged to appropriate fifty thousand dollars for such a fund by one of the largest war meetings ever held in the county.¹ In Wilmington one hundred property-holders also agreed to sign bonds to indemnify the City Council for such appropriations as it might make, not exceeding fifty thousand dollars, and that body did appropriate twenty-five thousand dollars on the 12th of August, 1862, to encourage enlistments. Other municipalities in the State took similar action, and with a prospect that the State would pass a bill, equalizing the counties, volunteering was hurried forward.² Having a prospect of filling the quota with enlisted men, the Secretary of War granted the Governor a further extension from the draft until October 15, 1862, and before the expiration of that time the quota of militia had been supplied, and the draft from the State of Delaware was annulled by order of the President.

The incursions of the Confederates into Maryland caused great anxiety at Wilmington for the safety of the city, and on the 6th of September, 1862, Mayor Gilpin issued a proclamation recommending all loyal citizens to unite in forming companies for the purpose of defending the city against attacks, and that they should devote two hours each day to military duty. Arms were to be furnished, upon proper application to the authorities having them in charge.³ Under this recommendation, the "Reno Guards" were at once formed at Pusey & Scott's morocco factory. P. R. Cummins was appointed captain.

The proximity of the Du Pont Powder Works and their threatened destruction by the enemies of the Union, were matters of much concern to the people of Wilmington. A sharp lookout for suspicious characters was constantly kept, and on the evening of September 17, 1862, information was privately received by Colonel A. H. Grimshaw, of the arrival

in Wilmington of two Confederate spies, and a close watch was kept upon their movements. They, however, left the city, and repaired to the powder works of the Messrs. Du Pont, on the Brandywine, for the ostensible purpose of obtaining a plan of the works and its approaches. At 10.30 P.M., on the same night, Colonel Grimshaw, Lieutenant-Colonel Tevis, Captain Gist and Lieutenant Toner started in pursuit and overtook them at a house near the Rising Sun tavern, and made the arrest. The parties proved to be Captain O'Keefe, of the Confederate army, and his friend named Ryan. They at first stoutly denied the charge against them, but subsequently made a full confession and stated they were direct from Memphis, Tennessee, *via* Cincinnati, Ohio. They were immediately searched and large sums of money were found upon them. They were then conveyed to Camp Du Pont and kept closely guarded until the 19th of September, when they were, by order of the Secretary of War, to whom the facts were reported, sent to Fort Delaware.

The fund for the relief of the families of enlisted men was liberally maintained, amounting to \$10,051 in August, 1861; and from November of that year until February, 1863, relief was afforded to five hundred and forty-six families. This generous support was continued until the close of the war.

The First, Second and Third Delaware Regiments were engaged in the battles in Western Maryland in the campaign of 1862, and their gallant conduct reflected the highest credit on their State. The battle of Antietam was the first engagement in which some of the troops fought, and they displayed the gallantry of veterans, suffering severe loss. The Second Delaware Regiment in the battle of Antietam acted with the greatest bravery and daring. In their charge they captured the colors of the Sixteenth Mississippi Confederate Regiment. The loss of the Second Delaware was seventy killed and wounded out of three hundred and fifty men taken into action. The bodies of Captains Watson and Rickards, who were killed at Antietam, reached Wilmington September 27, 1862, and were laid in state in the City Hall until they were borne to their final resting-place in the Wilmington and Brandywine Cemetery. The procession was one of the most imposing that ever took place in the city, the stores and business places along the route of march being closed.

The First and Second Delaware Regiments took a conspicuous part in the battle of Fredericksburg. The Fourth Regiment of Delaware Volunteers left Wilmington for the seat of war on November 10, 1862. After the battle of Antietam the First Regiment was stationed at Bolivar Heights, Harper's Ferry, and then marched to Falmouth, opposite Fredericksburg, Va. Captain Neild's battery of artillery left Wilmington for Washington on December 20, 1862. As a testimonial of the appreciation of his gallant services at the battle of Antietam, Colonel J. W. Andrews, of the First Regiment Delaware Volun-

¹ The meeting was held at the City Hall, Wilmington, on August 6, 1862. Hon. John Wales presided, and he and Hon. Wm. D. Kelley, of Philadelphia, N. B. Smithers, Edward G. Bradford, Revs. James S. Dickerson and George Quigley addressed the meeting.

² Several of the Confederate soldiers, who were prisoners at Fort Delaware and expected to be sent South, took the oath of allegiance and joined the Fourth Delaware Regiment.

³ In pursuance of the proclamation of the mayor, an immense meeting of the citizens of Wilmington was held at the City Hall for the purpose of organizing into military companies, "to defend the city and State from rebellion and invasion." The meeting was addressed by Hon. John Wales, Captain H. C. Biddle, Joshua T. Heald, Rev. M. C. Frens, Thomas Roberts and Dr. Harlan. Resolutions were passed in favor of forming THE NATIONAL GUARD OF DELAWARE.

teers, was presented with a handsome sword. In June, 1863, a beautiful sword was also presented to Lieutenant-Colonel Stricker, of the Second Delaware Regiment, by his officers. In the engagements at Chancellorsville, on the Rappahannock, the First and Second Regiments lost heavily.

At the election, November 2, 1862, William Cannon, the Republican Union candidate from Bridgeville, was elected by a small majority Governor for four years. The Secretary of State, appointed by the Governor, was Nathaniel B. Smithers, of Dover. Governor Cannon received 8155 votes, and Samuel J. Jefferson, the Democratic candidate, 8044 votes. For Congress, William Temple, the Democratic candidate, had 8051 votes, and was elected; the Republican Union candidate, George P. Fisher, having only 8014. The Senate, composed of nine members, had five Democrats and four Republican Union members, and the House, which had twenty-one members, had fourteen Democrats to seven Republican Union.

The receipts into the State Treasury for the year ending January 1, 1862, were \$97,810.50, and the expenditures for the same period were \$76,414.04, of which \$38,989.05 were for general purposes, and \$37,428.99 for education. The State had no debt, but possessed a general fund of \$771,750, and a school fund of \$431,392. The census valuation of the State in 1860 was \$46,242,181. The assessors' valuation in 1862, which omitted all property exempt from taxation, was \$41,521,498. The total taxes of the State were \$121,121.36. There were fourteen banks in the State, which in May, 1862, had an aggregate capital of \$1,915,010, a circulation of about \$1,000,000, and \$250,000 in specie. Small as is the territory of the State, it then had 137 miles of railroad, which cost, for road and equipment \$4,312,129, and one canal, the Chesapeake and Delaware, 12.63 miles in length. There were 296 public schools in the State. In 1861, 15,036 children attended the schools, which were maintained at an average period of 6.97 months. The whole amount expended for school purposes was \$85,333.03. Of this sum, \$33,359.49 was derived from the school fund and \$53,485.08 was raised by contribution, and of this, \$37,731.80 (more than two-thirds) was raised by New Castle County. The income of the general school fund is distributed to the counties according to their population in 1830, and the income of the United States surplus fund equally to each county. By this arrangement, in 1862, New Castle County, which had 54,796 inhabitants, received \$12,807.36, and Sussex County, which had only 29,615 inhabitants, received \$12,011.22.

The aggregate manufactures of the State in 1862 were \$9,920,000, and consisted principally of shipping flour and meal, steam-engines and machinery, railroad cars, carriages, lumber, cotton and woolen goods, and boots and shoes. The cash value of the farms of the State at that time was \$31,426,357, which, taking into account the small amount of other territory in the State, was as high as most of the other States.

In 1863 the people of the State were much excited over the conflict between Governor Cannon and the "opposition," or Democratic Representatives in the Legislature. It was brought about by the last message of Governor Burton to the Legislature before he retired from office. In it he said:

"The subject first in importance to which I shall invite your attention, more vitally affects the interests, rights, privileges and liberties of the people of Delaware than any other, perhaps, which ever engaged the attention and deliberations of the General Assembly of this State since the foundation of the government, and the future existence of the government itself is not less involved in the issue—a new and novel use of the military power of the Federal government, which, if tolerated and carried out in practice, will most inevitably result in the perversion of the principles and power of the government and its ultimate and total destruction.

"I allude to the unwarrantable and unconstitutional arrests of our peaceful and loyal citizens, whereby they are deprived of their liberty and made inmates of loathsome forts and common jails, without any charge preferred against them in a legal form being made known to them and denied the privilege of being heard and of confronting their accusers, or even of being informed who they are and of the nature and character of the charges, if any, against them.

"I also refer to the unlawful and unprecedented interference on the part of the general government, with our peaceful and law-abiding citizens, in the constitutional and rightful exercise of their elective franchise, by the introduction into the State of a large number of United States troops on the day immediately preceding the day of the late general election, amounting, as nearly as can be ascertained, to about three thousand, consisting of artillery, infantry and cavalry, accompanied by Major-General John E. Wool, of the United States Army, and by him distributed and stationed on the day of the election at all the polls in Kent and Sussex Counties, except two, and at some of the polls in New Castle County, under the command and control of provost marshals, who, it is said, were appointed for that purpose for each and every hundred, an office entirely unknown to the Constitution and law of the land."

The persons who were appointed the Governor goes on to say, were mostly of low character, and unfit for any such purpose. The message also condemned the sending of the troops and says there was no necessity for it, as their presence was to preserve the peace, and he recommended the passage of an act to prevent the occurrence of such things in the future.

The first of these two subjects acted upon by the Senate was the one in relation to troops at the polls. On the 7th of January Dr. Gove Saulsbury introduced the following joint resolution in the Senate and moved its adoption:

"Resolved by the Senate and House of Representatives in General Assembly met, That so much of the Governor's Message as refers to the interference by troops in the United States with elections in this State on the 4th day of November last, be referred to a Committee of ——— members on the part of the Senate and of ——— members on the part of the House of Representatives; and that said Committee have power to send for persons and papers, and leave to report by bill or otherwise."

This resolution went over one day under the rules. The resolution came up the next day and the blank for the Senate was filled by "three" and that of the House by five. The House the same day concurred in the Senate resolution, as did the Senate in a similar resolution passed by the House. Gove Saulsbury, Thomas Cahall and William Hitch were appointed on the part of the Senate and James Williams, John Slay, William B. Stubbs, William D. Waples and G. W. Horsey on the part of the House.

The committee met on the evening of the adoption of the resolution and organized by electing Dr. Saulsbury chairman, and Mr. Williams, secretary *pro tem*. John O. Slay was subsequently appointed clerk of the committee. This committee was in session until the

16th of March, and examined one hundred and twenty witnesses, and submitted a report to the General Assembly, condemning the use of troops and severely arraigning Governor William Cannon and George P. Fisher.

In the mean time, however, Governor Cannon had been inaugurated and in his address justified the presence of the troops. He said, among other things, "that there were apprehensions of violence," and "the troops were placed under the control of citizens of prudence and discretion;" that, "in no case did they interfere with the exercise of the right of suffrage by any voter, and in all respects their presence was salutary in securing good order and preventing probable collision among our own people." He also justified the arrest of citizens on the ground that it was for disloyalty, and that noundue violence was used.

The committee reported a bill on the 10th of February, entitled an "Act to Prevent Illegal Arrests." This bill made it unlawful to arrest any white person in the State unless upon legal process issued by some officer authorized to issue process by the laws of the United States or this State, and it must be for or to prevent a breach of the peace or commission of a crime against the State of Delaware or the United States; such person was to be taken before a judicial office and to be released unless charged upon oath and in that case bailed, if the case be bailable, and no such person was to be taken from the State except upon the requisition of the executive of some other State, unless they shall belong to the land or naval service of the United States; it further made it unlawful to make an affidavit to procure the arrest of any white person in the State before any one not authorized by the laws of the United States or State of Delaware to take such affidavit, or to procure the removal of such person out of the State. This bill passed the Senate February 12th, by the following vote:

Yeas—Messrs. Cahall, Hitch, Saulsbury, Hickman and Mr. Speaker.

Nays—Messrs. Belville, Hooper, Tatum and Williamson—four.

And the House, February 24th, by the vote annexed:

Yeas—Messrs. Allen, Baily, Bewley, Fisher, Gootee, Horsey, Raughley, Scribner, Slay, Stubbs, Waples, Watson, Williams and Mr. Speaker—fourteen.

Nays—Messrs. Curtis, Duncan, Gemmill, Hayes, Lattomus and Paxson—six.

The same day Mr. Williams offered in the House the following joint resolution:

"Whereas, The Government of the United and of the several States, are governments of laws, within the limits of which all officials find their rightful powers, and outside of which no official has any just claim to power or obedience from his fellow-citizens; and whereas, William Cannon, the Governor of this State, in his inaugural address, has avowed the false and dangerous doctrine that 'reasonable ground of suspicion' can justify the arbitrary arrest and incarceration in prison far removed from the district of their residence, of citizens against whom no warrant has been issued or charge made according to law, and has unblushingly published his approval of these cruel and lawless arrests of his own fellow-citizens; and whereas, he has thus proved himself by this avowal,

the weak, but willing tool of federal usurpation and a Governor unworthy the respect and confidence of his fellow-citizens, one to whom they can look for no just protection of their rights of person and of property, therefore,

"Be it resolved, That the doctrines of Governor Cannon's address in regard to arbitrary and lawless arrests are, if carried out, fatal to constitutional liberty, destructive of the peace and security of our people and deserve, and hereby receive at the hands of the Legislature of Delaware prompt and indignant repudiation, and are declared worthy of the severest reprehension of a people who inherited the privileges of freemen, and wish to preserve them unimpaired."

The resolution was adopted by the House by the following vote:

Yeas—Messrs. Allen, Bailey, Bewley, Fisher, Gootee, Horsey, Raughley, Scribner, Slay, Stubbs, Waples, Watson, Williams and Mr. Speaker—fourteen.

Nays—Messrs. Curtis, Duncan, Gemmill, Hayes, Lattomus and Paxson.

On February 26th the resolution passed the Senate by the following vote:

Yeas—Messrs. Cahall, Hitch, Hickman, Saulsbury and Mr. Speaker—five.

Nays—Messrs. Bellville, Hooper and Tatum—three.

The Governor had no veto under the Constitution of the State over bills passed by the Legislature, and therefore, on March 3d, sent the following special message to that body:

"STATE OF DELAWARE, EXECUTIVE DEPARTMENT,
March 3, 1863. }

"To the Senate and House of Representatives of the State of Delaware in General Assembly met:

"The passage by the General Assembly of the act entitled 'An act to prevent illegal arrests in this State,' renders it proper that I should briefly communicate my views and purposes in relation to it.

"The preamble of the act refers to the Constitution of the United States, as providing that no person shall 'be deprived of life, liberty or property without due process of law;' but it ought also to have been recollected that the same Constitution provides that in case of rebellion or invasion that privilege of the writ of *habeas corpus* may be suspended when the public safety requires it, and that dangerous persons may be arrested and held without bail or mainprize. This provision overrides the Constitution of the State of Delaware, or any statute that may be enacted by her Legislature.

"To whom the right to decide when the exigency has happened, requiring the exercise of the power of suspension, is a question of construction upon which jurists differ. That it is a necessary power is admitted. That it exists there can be no doubt. Whoever is invested with the power to suspend is the sole judge of the occasion of its exercise. Being incidental to the general duty of the enforcement of the laws, and now called into exercise for the suppression of armed insurrection, I am satisfied that it properly belongs to the national executive, and in my official acts I shall regard it as vested in the President of the United States.

"The preservation of the Government is the highest duty of those charged with its administration, and the personal liberty of the individual is only to be regarded when compatible with its safety. That the citizen should have the right fairly to discuss public measures is true. That the people should be permitted peaceably to assemble and petition for a redress of grievances is undeniable. But there is a wide difference between the exercise of this right and the disloyal opposition which proceeds from sympathy with a public enemy. The former supposes that all parties are well affected toward the common government, and differ only as to the mode of its administration. The latter is based upon hostility to existing institutions, and aims at their forcible subversion. The idea that the government is bound to await the development of a conspiracy until the actors shall have perfected their plans and committed some overt act necessary to bring them within the technical definition of treason, is, to my mind, absurd. The object is not punishment, but prevention. That the power is liable to abuse is true, all discretionary powers necessarily are so. To decide against its existence because it is capable of excess would destroy all human government. The best mode to avoid liability to arrest is to be faithful. No man who is truly and unequivocally loyal has ever been in danger of being molested by the National Government.

"Still it is possible that arrests may be improperly and unwisely made; and while it is my duty to co-operate with the General

Government in the maintenance of its authority, I will, at the same time, to the extent of my power protect peaceful and loyal citizens, whatever may be their political sentiments. While, however, such is my purpose in relation to them, it is also my duty to take care that the State of Delaware shall not be made the refuge of foreign traitors or domestic conspirators.

"That there has been from the beginning of the rebellion a considerable number of our people ready to participate in armed resistance to the lawful authorities, whenever a fair opportunity should occur, I have no doubt. Sympathy with the Southern States in insurrection is sympathy with the overthrow of the National Government. No man can bear with gratification of a reverse to our arms who is not at heart a traitor.

"My predecessor, in an official communication, expressed the opinion that 'a majority of our citizens, if not in all our counties, at least in the two lower ones, sympathize with the South.' Without admitting the correctness of his estimate of numbers, I do not doubt of the existence of widespread disaffection. That there has been no outbreak, here is the result of want of opportunity. It is the duty of the executive, not only of the United States, but of this State, to take care that no opportunity shall be afforded. If, to secure the public peace and to prevent insurrection, it becomes necessary to arrest any individual within this State, whether he be a citizen or a non-resident, I will not only assent to the act, but will maintain it.

"Invested by the Constitution with no power of veto or review of the action of the Legislature, the Governor has a general control over the operation of criminal enactments, and such control I will exercise to its utmost extent to protect any person acting under the authority of the President of the United States, or any citizen aiding such person in bringing to light any conspiracy, or in arresting any one guilty of disloyal practices or treasonable designs against the government.

"I shall issue my proclamation in conformity with these views, giving to the people of the State of Delaware information of my intended action.

"WILLIAM CANNON."

On the 11th of March he issued the following proclamation:

"To the people of the State of Delaware:

"In a special message communicated to the General Assembly on the third day of March instant I informed that body of my purpose to issue my proclamation in relation to the act entitled 'An act to prevent illegal arrests in this State,' and therein briefly set forth the reasons which impelled me to this conclusion.

"Its provisions are at variance with the interests of the State—calculated to lessen the estimation in which her people are held, as faithful to the government of the United States—to embolden those who sympathize with the rebellion, and to discourage loyal men from the performance of their duty, in discovering and thwarting the designs of the emissaries of treason.

"To the end, therefore, that the evil operation of the enactment may be averted, and loyal citizens may feel secured in their efforts against foreign traitors and domestic conspirators, I, William Cannon, Governor of the State of Delaware, do, by this proclamation, enjoin upon the good people of this State that they hold true allegiance to the government of the United States as paramount to the State of Delaware, and that they obey the constituted authorities thereof before the Legislature of the State of Delaware, or any other human authority whatsoever.

"I further enjoin that they be vigilant in detecting any conspiracy against the National Government, and diligent in preventing aid and comfort to the public enemy; that they promptly assist the national magistracy whenever invoked, and that they freely communicate any information which may the better enable it to suppress insurrection or to intercept supplies designed for those in arms against its authority; and any one so acting I will save harmless from the operation of the statute aforesaid, or of any other statute of like nature that may be enacted, so far as it shall be attempted to be enforced against him for faithfully discharging his duty to his country.

"In testimony whereof I have herewith set my hand, and caused the great seal of the said State to be affixed, at Dover, this eleventh day of March, in the year of our Lord, one thousand eight hundred and sixty-three, and of the State the eighty seventh.

"WILLIAM CANNON."

On the same day the House adopted a joint resolution referring the Governor's message to a committee of three on the part of the House, and two of the Senate. Messrs. Williams, Curtis and Waples were appointed on the part of the House, and on the following day the Senate concurred in the House resolution and appointed Messrs. Saulsbury and Tatum the committee on the part of the Senate. On the 18th of March the majority and minority reports of the com-

mittee were presented to both Houses. In the House the majority report was read, but the minority was not. In the Senate both were read. The majority report censured the Governor, and declared him liable to impeachment; the minority report reaffirmed his position. The subject then ceased to interfere with the deliberations of the Legislature.

The subject of illegal arrests, and soldiers interfering with the people of the State in the exercise of their right of suffrage, was brought to the attention of the United States Senate by Senators James A. Bayard and Willard Saulsbury. On the 8th of December, Mr. Saulsbury offered the following resolution:

"Resolved, That the Secretary of War be, and he is hereby directed to inform the Senate whether Dr. John Laws and Whitely Meredith, or either of them, citizens of the State of Delaware, have been arrested and imprisoned in Fort Delaware; when they were arrested and so imprisoned; the charges against them; by whom made; by whose orders they were arrested and imprisoned; and that he communicate to the Senate all papers relating to their arrest and imprisonment."

Mr. Saulsbury, in calling for the consideration of the resolution, said:

"These two gentlemen, one of whom resides in my own county, and the other not far off, in the adjoining county, are known to me personally, and have been for a number of years; and as their friends do not know of any just cause why they should be imprisoned in Fort Delaware or elsewhere, I have felt it my duty to call for this information."

Mr. Wilson, of Massachusetts, opposed the adoption of the resolution, and in his reply in urging the resolution, Mr. Bayard said:

"I always supposed that the great value of this Government consisted in the fact that it afforded, beyond all other Governments, the best guardianship to the liberty of the individual citizen. Sir, what is the state of things now? The honorable senator from Massachusetts tells us that, in his opinion, the Government have forborne; that some mistakes may have been made in making arrests, but that they ought to have gone farther than they have gone. The question does not lie there. The question lies in the great principle that the liberty of the citizen ought to be protected against the Government, except by public judicial inquiry on facts *prima facie* established by affidavit in order to justify his incarceration, because incarceration is imprisonment, it is punishment. In no free Government can the citizen be arrested at the will of an officer—I do not care who the officer is, whether a Secretary of War or a Secretary of the Navy, or any subordinate to whom a Secretary chooses to delegate the power; and it is impossible to call the Government where such a power exists a free Government."

Mr. Saulsbury, in further urging the adoption of the resolution, stated as follows:

"We do hold that a State situated as we are, where there has never been any attempt to resist Federal authority, should have some consideration in the American Senate. But, sir, I tell the Senate that at our last general election armed soldiery were sent to every voting-place in the two lower counties of the State of Delaware. I am informed that this soldiery consisted of men from New York, from Pennsylvania and from Maryland. When I went to vote myself, I had to walk between drawn armies in order to deposit my ballot. Peaceable, quiet citizens, saying not a word, on their way to the polls, and before they had got to the election ground, were arrested and dragged out of their wagons and carried away. Peaceable, quiet citizens were assaulted at the polls. I do not, however, propose to discuss these matters now; I may do so hereafter. I simply wish to call the attention of Senators to this fact, which distinguishes us from States that are in revolt: we have offered no resistance to Federal authority."

Mr. Bayard further added,—

"The President of the United States—rightly or wrongly is immaterial; I am not going to enter into that discussion—has asserted the right to dispense with the law which requires the *habeas corpus* to be issued in any case of judicial arrest. He has claimed that right; he has exercised that right. He has openly, through the Secretary of War, issued a proclamation which virtually subverts this Government, if carried out in practice; because the Secretary of War is authorized to appoint an indefinite number of men, constituting a corps of provost marshals, who are to have the right, in addition to their military duties,

to arrest any citizen throughout the country on indefinite charges, and to call in military aid to sustain their action; and they are to report to the central authority at Washington, and hold the party in custody subject to the orders of that central authority. There is no law which authorizes such an organization as that. If the judiciary attempt to intervene, as in the case of the prisoner at Fort Warren, the bayonet of the soldier prevents the service of the writ upon the military commandant who has possession of the prisoner. The judiciary, then, are powerless for redress; and under this asserted right on the part of the President, that feeblest department of the Government being powerless to redress individual wrong, if the legislative branch, which is equally powerful with the executive, are not to interpose by calling for the information, the facts and by the expression of their opinion, if it be necessary, when the facts are returned to them, what protection has the citizen against the aggressions of executive power? Can a Government be a free Government, where, when the judiciary is set at defiance, the legislature unites in saying to the citizen: 'You shall have no investigation; you may be arrested by officers unknown to the law, indefinite in numbers, on offences unknown to the laws, not described, for disloyal practices, which may mean anything that an executive officer pleases; you may be arrested not only by the order of a functionary at Washington, who, from his position, may be supposed to have ability to exercise some discretion, but you may be arrested at the discretion of any one of his subordinate deputies, and an investigation is not to be made by any other tribunal than by an *ex parte* return made in your absence, and without any power of investigation on your part, to the central authority at Washington?' If the proclamation of the President of the 26th of September be carried out, and the general facts that have occurred taken as matters of history, that is the state of things and the power claimed by the executive. Sir, I consider that power a subversion of this Government. I consider it also unnecessary; and though the honorable senator says that while we are engaged in war he would not call for any account from the executive department for its actions, I submit there is a wide distinction there. I am asking nothing in reference to a continuation of the war. I am seeking not to embarrass the Government in reference to the prosecution of the war; but war certainly can be in the present, as it has been in the past, prosecuted without trampling upon the rights of the individual citizen at home, and in States which are entirely untainted by anything like resistance to the authority of the Federal Government."

The resolution was finally laid on the table by a vote of twenty-nine yeas and thirteen nays.

At the session of 1862-63 of the Legislature, James A. Bayard was re-elected to the United States Senate for the term of six years from March 4, 1863. The vote was Bayard, nineteen; Bradford, ten.

On the 1st of January, 1863, President Lincoln issued a proclamation declaring freedom to all the slaves in the insurrectionary States, excepting Tennessee, some counties in Virginia and some parishes in Louisiana. The extent of the operation of the proclamation as regards the institution was as follows: All the slaves in the border States of Delaware, Maryland, Kentucky, Missouri and Tennessee were exempted from its scope, and remained in bondage, as before under the State laws. The gross number which the proclamation recognized as slaves was 832,259. Gradual emancipation with compensation was proposed by the President, and rejected in Delaware, Maryland and Kentucky, and held in suspense in Missouri in order to ascertain the action of Congress relative to an appropriation for that purpose. The appropriation failed to pass Congress, and the subject was dropped.

The first movement to secure the advantages of the proclamation was to bring the colored men into the field as soldiers. For this purpose the Secretary of War issued an order authorizing the Governor of Massachusetts to raise volunteer companies of artillery and corps of infantry which might include persons of African descent. In March, 1863, General Thomas¹ was sent to the Mississippi Valley to or-

ganize colored regiments. On the 27th of January, a bill was introduced in Congress to authorize the President to raise 150,000 colored volunteers. The impulse thus given by the government resulted in bringing more than 50,000 into the field during the year. On the 31st of July the President issued an order declaring that the government would give the same protection to all of its soldiers, and that if the enemy should sell or enslave any one because of his color, the offense should be punished by retaliation upon the enemy's prisoners.

On October 26, 1863, an order was issued by the War Department extending the enlistment of colored troops to Delaware. In conformity with the order, and to carry the same into effect, recruiting stations were established by Governor Cannon at the following places: Wilmington, in New Castle County; Smyrna, in Kent County; Milford, in Kent County; and Georgetown, in Sussex County. Major Lorin Barritt was designated as the recruiting officer to conduct the enlistments.

To inspire the colored men to enlist, three colored companies were sent from Philadelphia, and distributed throughout the State.

In the latter part of June, 1863, the people were again thrown into a feverish state of excitement by the news that the Confederate movement north would be through Delaware, and that Philadelphia was the objective point of the enemy. Wilmington was especially concerned in this movement, and Mayor Gilpin, realizing the situation, issued the following stirring appeal on the 30th of June, 1863:

"*Citizens of Wilmington*:—The enemy is on the borders. From the latest advices it is evident that he intends to push his forces to Philadelphia, our neighboring city. It is more than probable that when he crosses the Susquehanna in force your homes will be in danger. Every impulse of patriotism and duty calls aloud to you to organize and drill in companies immediately. If not possible to defend our city against an overwhelming force, such organization will, at least, give a patriotic sense of security and enable us to co-operate with others who may assist us.

"I earnestly call upon every one capable of bearing arms to enroll himself in some military company and upon all those who have any experience or skill in the profession of arms to take the lead, organizing and drilling such volunteers as may be willing to serve in this emergency."

Gov. Cannon was equally prompt in comprehending the situation and in urging every effort to maintain the honor of the State and to repel the invading foe, if he should enter upon the soil of Delaware. July 1, 1863, he issued the following proclamation:

"A desperate enemy has invaded the neighboring States of Maryland and Pennsylvania. The Philadelphia, Wilmington and Baltimore Railroad, the main reliance of the Government for the transportation from the South of men and munitions of war, is menaced, not only by

graduated at West Point in 1823. He was appointed captain in the regular army September 23, 1836, and served in Florida in 1836-37 and 1849-50. In July, 1838, he was appointed assistant adjutant-general with the rank of major. On September 23, 1846, he was breveted lieutenant-colonel for bravery at Monterey, and was assigned as major of Fourth Infantry, January 1, 1848. On July 18, 1852, he was made assistant adjutant-general with rank of lieutenant-colonel, and was promoted to adjutant-general with rank of brigadier-general May 7, 1861. General Thomas was breveted major-general March 13, 1865, and resigned February 2, 1869. In 1863 he was successful in organizing colored troops in the West and superintended the free labor system on abandoned plantations. He was appointed *ad interim* Secretary of War, February 21, 1868, by President Johnson to succeed Secretary Stanton, but the latter refused to be displaced.

¹ General Lorenzo Thomas was born in New Castle, October 26, 1804, and

open, but by marauding confederates, who, under cover of darkness, threaten to destroy us.

"The defence of your soil lies in keeping open the door of communication, through which re-inforcements can be forwarded. The true military line of this State is the bank of the Susquehanna. The most effective way to prevent the spoliation of your house is to keep the enemy outside of it.

"In this emergency an appeal was made to the loyal men of Delaware. They have responded with a readiness that challenges encomium and a self-sacrificing spirit that extorts admiration. They have left their work-shops, their stores and their fields. The plough stands in the furrow and the reaper in the grain already white for the harvest. They have abandoned their homes and committed their wives and children to your protection.

"I appeal to you, citizens of Delaware, not to permit their devotion to be unacknowledged or their sacrifices unrewarded. Save their crops, till the fields succor their families.

"May God have them in his holy keeping and incline your hearts to acts of charity and duty."

On the 3d of July Gen. Schenck issued the following proclamation, placing the State under martial law:

"HEADQUARTERS MIDDLE DEPARTMENT,
"EIGHTH ARMY CORPS,
"BALTIMORE, Md., July 3, 1863.

"By virtue of my authority as the General commanding this Department, and in view of the present existing necessity for providing with special care against armed rebellion, threatening invasion from without and secret traitors, plotting against the public safety, within, I do hereby declare and establish Martial Law throughout the State of Delaware.

"The suspension of civil Government is not, however, intended to extend beyond what seems absolutely necessary for the objects in view. All the Courts, Tribunals and political functionaries of State, county and city authority will continue in the discharge of their duties as in time of peace; only in no way interfering with the exercises of the predominant power assumed and asserted by the military authorities. All peaceful citizens are required to remain quietly at their homes and in pursuit of their ordinary avocations, except as they may be possibly subject to call for personal service, or other necessary requisitions for military purposes or uses hereafter.

"Seditious language, or mischievous practices, tending to the encouragement of rebellion, are especially prohibited and will be promptly made the subject of observation and treatment. Traitorous and dangerous persons must expect to be dealt with as the public safety may require. 'To save the country is paramount to all other considerations.'

"When the occasion for this proclamation passes by, no one will be more rejoiced than the undersigned to have the entire supremacy of the civil power restored and to return to the normal condition of a country at peace and a government sustained by a united people.

"ROBT. C. SCHENCK,
"Major-General Commanding.

"Official,
"W. W. ESTE,
"Major and Aid-de-Camp."

At the same time the following order was promulgated:

"HEADQUARTERS MIDDLE DEPARTMENT,
"EIGHTH ARMY CORPS,
"BALTIMORE, Md., July 3, 1863.
"Special Order No. 178.

"2. Brig.-General Daniel Tyler, U. S. V., is relieved from the command of the 1st Provisional Brigade at Baltimore, and is assigned to the charge as Commandant and Military Governor of a district to be composed of the State of Delaware, and to the command of all troops in the service of the United States, or that may be in any way called into service within such district.

"He is also charged with the military protection and defence of the Philadelphia, Wilmington and Baltimore Railroad, within the States of Delaware and Maryland and will assume command of all troops employed on that duty.

"His Headquarters will be established at the city of Wilmington.
"By Command
"MAJOR-GENERAL ROBT. C. SCHENCK.

"W. H. CHESBROUGH, A. A. G."

On the 11th of July, 1864, the Governor was again constrained to issue a call to relieve the State from an emergency in which it was placed by the threatening movements of the enemy. It was feared that the railway communication to Baltimore would be cut off either by external foes or by those who sought secretly to abet the enemy. The call was for men to

serve thirty days to protect the railways and was made at the request of the general commanding the department, who realized the strength of the enemy and feared he might advance across the Peninsula. Early on Sunday morning, July 10, 1864, many wild rumors reached Wilmington which caused the greatest excitement. All the available soldiers were immediately hurried to the scene of action and a special train of cars bearing Secretary of State S. M. Harrington was also dispatched to the lower part of the State to arouse the loyal people to a sense of their duty in this emergency. The effort was productive of much good. The train returned in the evening bringing upwards of three hundred men, at the head of whom was Governor Cannon himself. At Wilmington a war-meeting was called after the religious services in the forenoon, Mayor Turner presiding. A committee of one hundred citizens was appointed to raise a fund to pay volunteers, which committee agreed to hold itself responsible for the pay of five hundred men for the term of one month. It was decided that each man should receive thirty-four dollars exclusive of the government pay and rations. Recruiting offices were opened and the work of enrolling men immediately begun. In the evening Captain Hugh Stirling's company arrived from Du Pont's, which was equipped and mustered into the service and by nine o'clock was awaiting transportation. On Monday night Captain Crossley's, Captain Gawthrop's and Captain Henry's companies were conveyed to Perryville, Captain Rice's and Captain Perry's companies remaining at Wilmington. The excitement continued and remained unabated, so that Mayor Turner felt called on to issue a proclamation, on the 13th, urging the citizens "to suspend their ordinary avocations, close their places of business and organize in the most effective manner for the defense of the government and the homes threatened by rebel invaders." Fortunately, the presence of a large body of armed men assured the people, and before the close of the week the ferment of excitement had subsided, business was resumed and the recruiting stations were closed. Thenceforth most of the periods of excitement were those of joy occasioned by the success of the Union forces.

When the result of the battle of Gettysburg was known, on July 5th, the Ladies' Aid Society of Delaware sent a deputation of twenty-one men to the battle-field with bandages, lint, clothing and other supplies for the wounded soldiers of the Delaware regiments. The remains of Lieutenant William Smith, of the First Delaware Regiment, who was killed at Gettysburg, arrived at Wilmington on the 15th of July, and after laying in state at the City Hall were buried with military honors. The remains of Captain M. W. B. Elligood, of the same regiment, who was killed in the same battle, were received for interment in Georgetown, Delaware, on July 17th.

On the 17th and 18th of November the First, Second, Third and Fourth Regiments of Infantry,

First Delaware Battery and First Delaware Cavalry arrived in Wilmington and were disbanded, their term of enlistment having expired.¹

During the perilous and unsettled period through which Delaware passed in 1863 there was less disposition to enter the service of the country voluntarily than the preceding year, and it soon became evident that a draft would have to be ordered to fill up the quota. This announcement intensified the excitement which prevailed in July, 1863, and the State was in a condition of ferment greater than at any other period during the war. The draft was ordered to take place at Smyrna, August 12, 1863, and its proceedings were watched with anxious interest. The quota demanded one thousand six hundred and thirty-six men, and as fifty per cent. more were drawn, there was a total draft of two thousand four hundred and fifty-four men. These were allowed to commute at the rate of three hundred dollars per man. At this time Edwin Wilmer was the provost-marshal; Leonard E. Wales, commissioner; and Lawrence M. Cahall, surgeon. Drafted men were warned not to leave the State under penalty of arrest and confinement in Fort Delaware as deserters, and both the civil and military authorities were charged with the execution of General Order No. 6, issued by General Tyler, August 13, 1863. Relief was afforded to some of the drafted men by means of the bonus raised for this purpose, but its exaction was severely felt and gave the people a keen taste of the merciless demands of war.

William Temple, who had been elected to Congress in November, 1862, died at Smyrna, Delaware, on May 28, 1863, aged fifty-two years.² On October 7th, Nathaniel B. Smithers, Secretary of State, was nominated to fill the vacancy by the friends of the administration. The opposition nominated Charles Brown.

The day of election was November 19th. On the 13th of November, General Schenck, in command of the Middle Department of the United States, issued the following general order:

"General Order, No. 59.

"HEADQUARTERS MIDDLE DEPARTMENT, EIGHTH ARMY CORPS,
BALTIMORE, Md., November 13, 1863.

"It is known that there are many evil-disposed persons now at large in the State of Delaware, who have been engaged in rebellion against the lawful government, or have given aid or comfort or encouragement to others so engaged, or who do not recognize their allegiance to the United States, and who may avail themselves of the indulgence of the authority which tolerates their presence to attempt to take part in or embarrass the special election in that State. It is therefore ordered:

¹The officers and privates of the Fourth Delaware Volunteers before disbanding presented Col. Grimshaw, their commander, with a splendid sword. A number of the ladies and gentlemen of Wilmington gave a grand entertainment during the 20th and 21st of November to the volunteers of Delaware.

²Governor William Temple, for many years identified with the legislation of Delaware, was born in Queen Anne's County, Maryland, February 28, 1815. After receiving a good academic education he engaged in mercantile business at Smyrna. In 1844 he was elected Speaker of the Delaware House of Representatives, and through the death of the Governor and the President of the Senate, became executive of the State for the unexpired term. For the next ten years he was a State Senator and declined re-election in 1854. He was elected to the Thirty-eighth Congress, but died at Smyrna May 28, 1863, before he took his seat.

"I. That all provost marshals and other military officers do prevent all disturbance and violence at or about the polls, whether offered by such persons as above described, or by any other person or persons whomsoever.

"II. That all provost marshals and other military officers commanding in Delaware, shall support the judges of election on the 19th of November, 1863, in requiring an oath of allegiance to the United States as the test of citizenship of any one whose vote may be challenged on the ground that he is not loyal or does not admit his allegiance to the United States, which oath shall be in the following form and terms: 'I do solemnly swear that I will support, protect and defend the Constitution and Government of the United States against all enemies, whether domestic or foreign; that I hereby pledge my allegiance, faith and loyalty to the same, any ordinance, resolution, or law of any State, Convention or State Legislature to the contrary notwithstanding; that I will at all times yield a hearty and willing obedience to the said Constitution and Government, and will not, directly or indirectly, do any act of hostility to the same, either by taking up arms against them, or aiding or abetting, or countenancing those in arms against them; that, without permission from the lawful authority, I will have no communication, direct or indirect, with the States in insurrection against the United States, or with either of them, or with any person or persons within said insurrectionary States; and that I will in all things deport myself as a good and loyal citizen of the United States. This I do in good faith, with full determination, pledge and purpose to keep this, my sworn obligation, and without any mental reservation or evasion whatsoever.'

"III. Provost marshals and other military officers are directed to report to these headquarters any judge of election who shall refuse his aid in carrying out this order; or who, on challenge of a vote being made on the ground of disloyalty or hostility to the Government, shall refuse to require the oath of allegiance from such voter.

"By command of

"MAJOR-GENERAL SCHENCK.

"W. H. CHESBROUGH, Lieutenant-Colonel and Assistant Adjutant-General.

"E. L. TYLER, Aide-de-Camp."

Governor Cannon, at the same time, issued the following appeal to the people:

"STATE OF DELAWARE, EXECUTIVE DEPARTMENT,
DOVER, November 13, 1863.

"All civil officers and good citizens of this State are enjoined to obey the above military order, issued by the commanding general of the Middle Department, and to give all needful aid for the proper enforcement of the same.

"WILLIAM CANNON, Governor of Delaware."

On the next day the following order was issued by the general in command of the Delaware District or Department:

"General Orders No. 14.

"HEADQUARTERS, DELAWARE DEPARTMENT,
WILMINGTON, Del., November 14, 1863.

"The enforcement of General Order No. 59, issued from Headquarters Middle Department, November 13, 1863, by Major-General Schenck, and confirmed by the order of his Excellency, Governor Cannon, is confided to the troops in this Department.

"The objects of this order, as construed by the General commanding, are:

"I. To secure to every loyal citizen the right to vote as he pleases.

"II. To protect the polls from that outside violence which has heretofore, in some parts of the State, prevented loyal and peaceable citizens from voting.

"Special instructions will be issued to the officers in command of detachments which will be implicitly obeyed, and for the enforcement of which every officer will be held strictly responsible.

"By order of

"BRIGADIER-GENERAL TYLER.

"E. L. TYLER, Acting Assistant Adjutant-General."

On the next day the following order containing instructions was issued:

"HEADQUARTERS DISTRICT OF DELAWARE,
MIDDLE DEPARTMENT, WILMINGTON, Del., November 15, 1863.

"The following instructions have been received from the General Commanding, and will be strictly and carefully observed by all detachments of officers and soldiers within the 'District of Delaware,' while carrying out the provisions of Department General Order, No. 59, during the election to be held on the 19th instant:

"Every officer or non-commissioned officer in command of a detachment will be held strictly accountable for the good conduct and obedience of the men in his charge.

"Officers and soldiers must be strictly sober, and while preventing disturbance by others, must avoid all disturbance themselves, and are required not to hang around the polls nor engage in political discussions.

"It will be borne in mind that the whole object of the order of the Commanding General is to preserve peace at the places of voting; to sustain the judges or inspectors of election, to protect loyal voters, and to prevent from voting disloyal and traitorously disposed persons who refuse to take the oath of allegiance.

"In enforcing paragraph I. of the General Order, to prevent violence and disturbance at the polls, care will be taken that disloyal citizens of other States do not, as it is apprehended they will attempt to do, intrude themselves at the places of voting, and endeavor to intimidate the lawful and loyal voters of Delaware.

"DANIEL TYLER, Brig.-Gen. Commanding."

On the 17th of November a public meeting of the opposition was held at New Castle, at which a resolution was passed, "that the following address be issued to the Democrats of the county."

"NEW CASTLE, DELAWARE, November 17, 1863.

"To the Democrats of Newcastle County, Delaware:

"The undersigned, Democratic voters of Newcastle County, represent:

"That at the Democratic State Convention held at Dover, September 18, 1863, to nominate a candidate to fill the office of Representative in Congress, made vacant by the death of the Hon. William Temple, the Convention unanimously nominated the Hon. Charles Brown, of Dover Hundred, in the County of Kent, for the office designated; and ever since the adjournment of the said Convention the canvass has duly and quietly proceeded with every reasonable prospect for the success of our candidate, all of which facts are of public knowledge.

"To our astonishment and regret, however, we are informed by a public military and civil order, dated November 13, 1863, and made known to us on the 16th of the same month, that the constitutional and legal rights of the citizens of the State of Delaware to regulate their own elections, and make and prescribe all qualifications for voters at the ensuing special election on the 19th instant, have been utterly subverted, and new qualifications and tests, unauthorized by the Constitution of the United States, and contrary to the constitution and laws of the State of Delaware, imposed upon her citizens by military power.

"With the several and collective knowledge and belief of the undersigned, they utterly deny the existence within this State, now or in any past time, of associations or individuals hostile to the welfare of the government of the United States and of its Constitution and laws; and considering the said military order (to which the unauthorized recognition of the Executive of Delaware gives no sanction) as uncalled for, illegal, and unjust, do earnestly protest against the same—and against the interference of the Federal Government in the election held within our State, and in view of the presence and intimidation of a large military force of the United States in our State, and the indisposition of our people to produce collision with the armed forces of the General Government—do hereby recommend to the Democrats of Newcastle County, whether officers of election or voters, to submit to their disfranchisement and take no part in the said special election, but to rely upon the official oaths and consciences of the next House of Representatives in the Congress of the United States, to declare null and void an election so held, and conducted contrary to the laws of the State of Delaware in that behalf, and controlled by a power unknown to the constitution and laws of our State."

The address was signed by a considerable number of citizens. The result of this address was that the opposition or Democrats declined to vote, and on the day of election Mr. Smithers received 8220 votes, and Mr. Brown, 13.

In the United States Senate, on the 22d of December, 1863, Mr. Saulsbury offered the following resolution:

"Resolved, That the Secretary of War be, and is hereby directed to inform the Senate whether armed soldiers were sent into the State of Delaware, to be present at the polls on the 4th day of November last, the day of the general election in said State; and if so, by whose orders, upon whose application, the necessity, if any, for their being so sent, for what purpose they were sent, to what places by name they were sent, how many were sent, how many to each of such places, the names of the regiments or companies sent, the names of the officers commanding such regiments and companies; and whether any, and, if so, how many provost-marshal were or have been appointed, and at what places, in said State, with their names, the necessity, if any, for their appointment, and the powers conferred upon them; and that he communicate to the Senate all papers and orders in his Department relating to the sending of such soldiers into said State."

In support of his resolution, Mr. Saulsbury said:

"Sir, in a State where everything was perfectly calm and quiet, where there had been no attempt since the commencement of this revolution to take sides with the States in revolt, military were sent on the day of

the general election to every voting place in the two lower counties of that State except two. I state to the Senate and to the country what I know to be true, and what I can prove, that peaceable citizens were arrested on the day of the election, and incarcerated in the common jail of the county, at one place; that at another voting place, peaceable citizens, who were making no disturbance, doing nothing illegal or improper, were arrested and placed in confinement in a room; that at another place, peaceable citizens, before they arrived on the ground, before they had done or said anything on the election ground, were taken from their wagons and fastened up in a house, and some of them deprived of their right to vote. I state another fact which can be proved: at another voting place, persons were intimidated from voting, and others were assaulted. At some voting places the inspectors of the election were compelled to take what they believed to be illegal votes; at other voting places, persons having a clear legal right to vote were prevented from voting by the military.

"Now, sir, I do not say that the General Government desires this to be done. Gen. Wool left his headquarters, went to the town of Sanford, in my State, and stayed there until after the election. I believe, as far as Gen. Wool was concerned, and as far as the election was concerned at that place, there was very little wrong done—nothing further than what would be the natural effect of having soldiers at a poll, the natural intimidation which it occasioned. I will state also that where there were regular soldiers, under officers of character, there was not generally so much wrong done as at other places. But, sir, where Maryland home guards were stationed, outrages of a gross character were committed upon our citizens. I want to know—and that is the object of this resolution—what were the reasons for the sending of these men into the State of Delaware; what representations have been made to the General Government."

Mr. Bayard, of Delaware, said:

"I hope the resolution will be adopted. I do not desire to debate it, but I desire the information. I think we are entitled to it. The Government of the United States having sent into the State of Delaware, under the command of a major-general of the army of the United States some three thousand troops, on the day before the election, and distributed them throughout the State—a State which has at no time whatever, either by her position, her course of conduct, or the action of her people, offered any resistance to the authority of the United States—we have a right to know the reasons for such actions. It may be, and probably it will be shown, that some of our own citizens, in the heat of political excitement and partisan resentment, have made improper, erroneous and false statements to the Secretary of War. If that is so, we have a right to know it. We have a right to know who those recreant sons of Delaware are. The people of Delaware have a right to know who it was that thus attempted to cause civil strife and military rule to be established in the State. We do not want to inquire into the fact of whether the army was sent there and whether they were distributed at the polls—that is notorious; but we want the reasons which justify an act which certainly is an infraction of the rights of the people of Delaware, and an infraction which, carried out in other States—I am not speaking of what the design was, for I do not know what the grounds were; I want to know—would enable any existing Administration to keep itself in power and control the Government of this country just as long as it had the military force to do so. That would be the effect of submitting to such action. I want to know the grounds and the reasons, to see whether there was any justification for this action. It is not, as the honorable senator from Iowa supposes, with any desire for judicial inquiry against individuals there; nothing of the kind. It would not be evidence for the purpose of subjecting them to judicial inquiry."

The resolution was finally referred to the Committee on Military Affairs, which was the last heard of it.

On the 18th of December, 1863, the resolution introduced in the United States Senate by Charles Sumner, requiring the "iron-clad oath" to be taken and subscribed by every Senator in the Senate before entering upon his duties, was taken up. When this oath was offered to Mr. Bayard, who had grown gray in his country's service, he felt it as an insult and an outrage. At the previous session of Congress he appeared in the Senate, took the constitutional oath and entered upon his duties as a Senator. On the 19th of January, in a speech of great force and power, this eminent statesman proved that the oath was unconstitutional. He said:

"As I am the only member of the Senate present at this session who has not taken the oath, it is but a rational inference that the rule now proposed is intended to operate personally upon me, although I was

sworn in at the special session and acted as a Senator both on committees and in the Senate since my re-election in March last for the term of six years, ending on the 3d of March, 1859."

Speaking of the act of Congress of July 2, 1862, or the "iron-clad oath" which it prescribed, he said:

"The oath prescribed in that act has been frequently designated as 'the oath of loyalty'; and doubtless there are those who may consider my declining to take that oath as evidence of disloyalty. The words 'loyal' and 'loyalty' have become familiar terms during the progress of this disastrous civil war. I will not pause to inquire whether loyalty in its usual acceptation is not more appropriate to the relations and personal devotion of a subject to his prince than of a citizen to his government in a republic. Accepting the term as applicable, I define loyalty in a government such as ours—a representative Republic—to mean a steadfast adherence to the Constitution or organic law under which and by virtue of the adoption of which by the people of the several States the government was established; a cheerful and ready obedience to all laws passed in pursuance of that Constitution; and a devoted and ardent support of those guarantees of civil liberty which it was a primary object with its framers to maintain and perpetuate, and thus 'secure to themselves and their posterity the blessings of liberty.' I have sworn to support that Constitution; and as I believe that the rule proposed and the law which it is intended to enforce are repugnant to its provisions, I call upon the tribunal which has exclusive jurisdiction of all questions affecting the elections, returns and qualifications of its members, to decide judicially whether the act is constitutional, and give to it its proper legal construction. If it be disloyal to support the Constitution of my country, then I cheerfully accept the imputation of disloyalty; but if made on any other ground, I shall meet it with calm contempt."

The resolution was finally adopted on the 26th of January by a vote of twenty-eight yeas to eleven nays, and Mr. Bayard came forward and took the oath prescribed, after which, resigning his seat in the Senate, he said he submitted to the decision and resigned a position he had held for thirteen years. He made an impressive argument in assigning his reasons and said:

"Without any decision upon the constitutional validity of the act of July, 1862, all the members of the Senate and House, to whom it applied, belonging to the political party with which I have acted, have voluntarily taken the oath prescribed by that act, deeming, doubtless, that the constitutional questions involved were of less moment, and the precedent made less dangerous than they seemed to my mind. I could not but reflect that this unanimous action of those with whom I coincided in general political views might give cause even to men unbiased by the perverting influences of political or personal hostility, who did not know me personally, to doubt, if not to believe, that I declined to take the oath for reasons other than the consideration that, in my judgment, it was a dangerous innovation upon fundamental principles of the Constitution."

"As I believed that the law had been passed without full discussion, and as a decision on its validity by the proper tribunal had been waived at the special session when I was not present, I was content to leave others to their own action, and govern mine by my convictions of duty. The decision has now, however, been judicially made, after hearing my objections to the act and the oath it imposes, and that decision, though in my belief a dangerous precedent, is obligatory to the extent of taking the oath, as I have already held the seat for nearly one year since my re-election."

"Sir, I admit that I covet the approbation of the good, the wise and the reflecting, and would not willingly subject myself to their censure or to reasonable suspicion as to my motives of action; though I am utterly indifferent to those calumnious, groundless and vindictive attacks to which every man in public life, even in less excited times, is subjected by personal malevolence or political hostility. But though I desire such approbation, I have never made either opinion or popularity my standard of action, but my own sense of right and duty; and I owe a respect to my own sincere convictions of public duty which I will never sacrifice. Many of you are aware that before civil war commenced I expressed fully my views as to the course of action which I thought the welfare and prosperity of the whole country required after the secession of seven States. Those views differed from the course pursued subsequently by the Administration, and its course was approved by a majority of Congress, and, indeed, by the people at large after their passions had become excited by actual war."

"I told you then that I did not consider secession a constitutional or reserved right of the States, but an act of revolution; but a revolution by organized communities—not rebellion in the modern sense of the word, but only in its old Roman sense—the revolt of a people. I told you, also, that, in my judgment, conciliation and the removal of real or even apprehended grievances or dangers, and not coercion by arms, was,

in such a crisis, the true policy of the statesman; and that the framers of the Constitution had wisely left such a state of affairs without any provision as one of those 'mortal feuds' which, in the language of Hamilton, 'when they happen, commonly amount to revolutions and dismemberments of empire.' I admitted that secession was a breach of the compact by which the Federal Government was established, and that it rested with the United States to determine whether they would and could, by war, compel the seceding States to repair the breach, or whether the act by which they severed their political relations with us should be assented to, and a peaceful separation permitted, in the hope that past memories and the ties of blood and marriage, with continued commercial intercourse, might in a few years restore those seven States to the Union; similar influences having at the origin of the government induced North Carolina and Rhode Island, after a year's delay, to become members of the Union, though the former had in the first instance rejected the Constitution and the latter had refused to be represented in the Convention. I may be pardoned here for quoting a short extract from a speech I made on the 'condition of the country,' in March, 1861, as illustrative of my opinions before the sword had been drawn:

"You may attempt by war to keep the States united—to restore the Union; but the attempt will be futile. Conciliation and concession may reunite us; war, never! The power may be exercised for the purpose of punishment and vengeance. It may be exercised if you propose to conquer the seceding States, and reduce the nation into a consolidated nation; but if your intention be to maintain the Government which our ancestors founded—that is, a common Government over separate, independent communities—war can never effect such an intention."

"I preferred then peaceful separation to civil war as the lesser evil, but the Administration and the dominant party decided to resort to an enforcement of the laws by the coercion of arms, as against an insurrection. Civil war has since raged, and its events and consequences have strengthened my convictions that the prosperity of my country and the happiness and morals of the people cannot be promoted by its continuance. To these views an overwhelming majority of Congress is opposed, and, so far as the elections of the past year can be accepted as evidence of public sentiment, that majority is sustained by the people. It is true that new questions have arisen in the progress of war as to its mode of conduct and object, and have produced conflict of opinion among the people. But on the question of peace—even by temporary separation if essential—the Democratic party with which I have been connected is divided, and many of its leading and most influential adherents indulge in the visionary idea that a common Government, based on 'the consent of the governed,' over separate political communities, with diversified habits, manners customs and institutions, can be restored and maintained by the sword, without the abandonment of a federal and its conversion into an imperial and centralized Government. So thought not the President of the United States or the Secretary of State on the 10th of April, 1861, before war had begun, and to my mind such an idea is a delusion and a mere chimera. I have also the fixed opinion and belief that the life of a nation depends upon the preservation of its liberties, and not upon the extent of its dominion. Standing, therefore, almost alone in this body, I have lost the hope that I can longer be of service to my country or my State. Never an ambitious man, the passion of ambition has with the advance of life so diminished that I prefer the repose of private life to the embittered contests of the political arena in these tempestuous times."

"I have lived to see the elective franchise trodden under foot in my native State by the iron heel of the soldier, and 'Order No. 53,' not the people of Delaware, represented in one Hall of Congress. I have lived to see her citizens torn from their homes and separated from their families on the warrant of a self-styled detective, without any charge expressed on its face, and without any known accuser; and then, without hearing or trial, these citizens banished from their State, beyond the protection of the laws, into a State in which the laws of the United States are now neither enforced nor enforceable. Yet in the State of Delaware the courts have been always open, and at no period has there existed the semblance of a conspiracy or combination to resist the authority of the United States. Such an allegation is a gross calumny and utterly groundless, come from what source it may."

"And now, Mr. President, the Senate of the United States have by their decision enforcing an expurgatory and retrospective test oath, repugnant to both the letter and spirit of the Constitution, made a precedent, which, in my judgment, is eminently dangerous, if not entirely subversive of a fundamental principle of representative government. Under these circumstances, with my construction of the Constitution having held the seat, I am bound to submit to your judicial decision as to the validity of the act of July, 1862, and have therefore taken the oath it prescribes. I cannot doubt that the precedent now made will be followed, and yet I regard all test-oaths as useless and demoralizing acts of tyranny. It has been as truly as beautifully said by a brilliant and distinguished advocate: 'They are the first weapons young oppression learns to handle; weapons the more odious since, though barbed and poisoned, neither strength nor courage is necessary to wield them.'"

"With a firm conviction that your decision inflicts a vital wound upon free representative government, I cannot by continuing to hold the seat I now occupy under it, give my personal assent and sanction to its propriety. To do so I must forfeit my own self-respect and sacrifice my clear convictions of duty for the sake merely of retaining a high

trust and station with its emoluments. That will I never do, but, retiring into private life, shall await, I trust with calmness and firmness, though certainly with despondency, the further progress of a war which it is apparent, to my vision, will in its continuance subvert republican institutions, and sever this Federal Union into many arbitrary governments.

"Among these, wars for dominion will arise and continue until, from exhaustion, the different divisions subside into separate nationalities, leaving not a vestige of a republic remaining. If the lessons of history be not deceptive and valueless, such will be the inevitable result of protracted war; for a single centralized government over so vast a territory, inhabited by so intelligent and energetic a people, could it be organized through military genius and power, and be successful for the hour, would not outlive the generation in which it was established.

"I close these remarks with the language in which a historian of the Constitution so eloquently portrays the character of the American people (alas! how changed now) at the time of its adoption, and the great object they intended to accomplish in thus cementing more firmly a Federal Union:

"They beheld that republican and constitutional liberty which with all that it comprehends and all it bestows, was not only altogether lovely in their eyes, but without which there could be no peace, no social order, no tranquillity, and no safety for them and their posterity.

"This liberty they knew must be preserved. They loved it with a passionate devotion. They had been trained for it through a long and exhausting war. Their habits of thought and action, their cherished principles, their hopes, their life as a people, were all bound up in it; and they knew that if they suffered it to be lost, there would remain for them nothing but a heritage of shame, and ages of confusion, strife and sorrow."

The seat of Mr. Bayard as a Senator in Congress, which was vacant by his resignation, was filled by the next Legislature by the election of George R. Riddle. The Legislature adopted a resolution complimentary to Mr. Bayard for the course he had pursued during his Senatorial career, and especially for his very able speech in the Senate, setting forth the reasons which induced him to resign his seat.

The vote of the State at the Presidential election in November, 1864, was, Lincoln 8155; McClellan, 8767; majority for Victor Du Pont, Ayers Stockley and Harberson Hickman, the McClellan electors, 612. The vote for members of Congress was Smithers, Republican, 8253; Nicholson, Democrat, 8762; majority for Nicholson, 509. The Legislature of the State was divided as follows: Senate, Democrats 6, Republicans 3; House, Democrats 14, Republicans 7. There were two sessions of the Legislature during 1864,—one in January and a special one in July.

The Governor urged the Legislature, in his message, to adopt measures for the emancipation of slaves held in the State. As arguments he stated that Delaware is connected with the free States by geographical position and commercial necessity; that her products find their markets in the North, and that from thence come the immigrants who give increased value to real estate; that the result of constant intercourse with the North is gradually to assimilate the institutions of the State to those of the free States, as it had already identified their interests; that slavery in Delaware, being merely nominal, was worthless as an element of labor; that emancipation in Maryland had surrounded Delaware with free soil, inviting the escape of slaves on all sides, as there was now no law requiring their rendition.

Some efforts were made to enlist negroes in the State under the order of the President of the United States and the Governor, but the Legislature having refused to pay such recruits a bounty, the number of

them was quite small. A commission was also appointed to estimate the value of such as were slaves. Upon a claim being made and title proved, those who were considered or known to be loyal, received full compensation.

An association which had been formed in the previous year to promote immigration in the State, met with considerable success. Several thrifty colonies were formed, and the number of settlers from the North increased. The cheapness of the lands and the profits from its cultivation were regarded as inducements. Cultivated lands were sold from fifteen to thirty dollars per acre within one to three miles of a railroad depot.

The First Delaware Regiment was mustered into service for three years on February 2, 1864, by Major Judd, in Wilmington, and on the 9th they broke camp at Brandywine Springs and marched to Newport, where they embarked for Washington.

In March Major-General Lew Wallace succeeded to the command of the Middle Department, including Delaware. In September Colonel S. M. Bowman assumed command of Delaware, with headquarters at Wilmington, with Capt. Thomas M. Wenie, of the Second Delaware Regiment, as provost-marshal. The body of Major William Smith, who was mortally wounded at the Southside Railroad, Va., in October, reached Wilmington on the 9th of November, and after lying in State in the City Hall, was escorted with military honors to Dover.

In March, 1864, another draft was ordered to fill the aggregated quotas for five hundred thousand men, and Delaware was called on to furnish sixteen hundred and seventy-six men. These not being forthcoming as volunteers, drafting took place May 19th, June 18th and July 2, 1864. The last was to supply a deficiency of sixty-nine for New Castle County, thirty for Kent County and forty-nine for Sussex County. Wilmington was called on for twenty-two men, to make up her deficiency. The quota of the State, under the call of March, 1864, for two hundred thousand men, was nine hundred and eighty-five men.

Under the call of the President on the 18th of July, 1864, for five hundred thousand men, Delaware was required to furnish twenty-four hundred and forty-five soldiers on an enrolment of fourteen thousand seven hundred and thirteen men. This quota was to be furnished by the 5th of September, 1864, under penalty of another draft. To relieve, if possible, the State from this draft, the Governor convened an extra session of the Legislature July 28, 1864. It was urged that the unexpended balance of the appropriation made at the last session, amounting to two hundred and fifty thousand dollars, should be used for commutation purposes, and thus relieve those subject to the draft, without working injustice to any class of citizens. On the 12th of August, 1864, a bill of that nature was passed, which had the effect of stimulating enlistments and made the burden for those who had to provide substitutes easier.

When it had turned out the demand for the citizenship were so strong that the Government was obliged to suspend the passport law, the Government was obliged to suspend the passport law. The Government was obliged to suspend the passport law. The Government was obliged to suspend the passport law.

to take place February 21-22, 1968, in the city of New York. The purpose of the conference was to discuss the results of the first round of the negotiations and to prepare for the second round. The conference was held at the Waldorf Astoria Hotel. The participants included representatives of the United States, the Soviet Union, and the United Kingdom. The conference was chaired by the Secretary of State, Henry Kissinger. The participants discussed the progress of the negotiations and the need for a second round. The conference ended with a statement by the Secretary of State, in which he announced that a second round of negotiations would be held in the near future.

Section 1 Du Pont de Nemours & Co.

Wm. Respectfully
S. H. S. S. S.

In his statement to the Legislature, at this time, Governor Cannon said, that up to that period Delaware had a credit at the War Department for eight thousand seven hundred and forty-three men. Fully one thousand had enlisted in Pennsylvania, five hundred in New Jersey, and five hundred in Maryland—making a total of nearly eleven thousand men from a population of a little over twelve thousand souls, white and black, free and slaves. As the latter were not then liable to enlistment, it will be seen that even at this period Delaware had contributed an unusually large percentage of its citizens for the defense of the Union; and, later, the proportion of soldiers given by the little Diamond State to uphold the flag of the Republic was equal, if not greater, than that of any other State.¹ This is a record which may well cause the hearts of its loyal citizens to rejoice.

Under the last call of the President for three hundred thousand men, December 19, 1864, the quota of Delaware was nine hundred and thirty-eight men, and as the State had received no credit for the emergency men which it had furnished, the demands upon its citizenship were so close that but few subjects of military duty could hope to escape the chances of a general draft. Again the matter was made the subject of legislative action, and on the 16th of February, 1865, the Legislature passed an act providing for the payment of bounties to volunteers before the draft, and a bonus of five hundred dollars to a drafted white man who would enter the service, or would provide an acceptable substitute. The draft for Kent and Sussex Counties took place February 20, 1865, and contrary to some fears, passed off quietly. That of New Castle County was postponed until March 25, 1865, when drafts were made to fill the quotas of a few hundreds, which could not be supplied with volunteers.

The conclusive victories now achieved by the Union armies removed the necessity for further levies of men, and those who last entered the service were, after a short experience in military life, restored to the homes from which some of them had been taken against their will or inclination to perform the duties of a soldier, no matter how noble the cause which called them.

Governor William Cannon died at his residence in Bridgeville, on March 1, 1865, after a brief illness of typhoid fever.

Governor William Cannon, who was executive of Delaware during the late Civil War, was a native of Sussex County. He was born near Bridgeville, March 15, 1809, and while still young began a mercantile career which extended from year to year until he became a leading citizen in wealth and influence in his native county and State. In 1844 he was elected a member of the State Legislature

and was selected the second time to represent his district in that body. In 1851 he was made treasurer of the State, and ten years later was chosen a member of the Peace Congress. In 1863 he was elected Governor as a Unionist and held the office until his death, which occurred March 1, 1865. His remains were interred in the burying-ground of the Methodist Episcopal Church of Bridgeville, of which he was a zealous member during his life. Governor Cannon's wife was Margaret N. B. Laws, of Sussex County.

By a provision of the Constitution, the Speaker of the Senate, Dr. Gove Saulsbury, upon the death of Governor Cannon, succeeded to the chief magistracy of the State.

Rear Admiral Samuel F. Du Pont died at the La Pierre House, Philadelphia, on Friday morning, June 23, 1865. His remains were brought to Wilmington the same evening, and on Sunday, June 25th, were interred with grand military and naval honors. Major-General George H. Meade and staff were among the distinguished officers present.

Rear Admiral Samuel Francis Du Pont,² fifty years of whose life was dedicated to honor and usefulness in the United States navy, and who performed valuable services in two wars, was born at Bergen Point, N. J., September 27, 1803, and was descended from an honorable and distinguished ancestry, "whose descendants as citizens of the United States have maintained without blemish the high character of the race from which they sprung." His parents were Victor Marie Du Pont De Nemours and Gabrielle Josephine de la Fite de Pelleport, daughter of the Marquis de Pelleport. His father, born in Paris in 1767, was attached to the French legation in the United States in 1787, and in 1795 became first secretary of that legation, and in the same year was appointed French consul at Charleston, S. C. Two years later he was appointed consul-general of France in the United States, but left the service and returned to his native country, whence he emigrated to the United States with his father and brother, and finally settled at Louviers, a country-seat on the Brandywine, near Wilmington, Del., where he resided until his death, in 1827. The grandfather of our subject was Pierre Samuel Du Pont de Nemours, a distinguished French economist, statesman and writer, who manifested a deep interest in the United States, and died in Delaware in 1817. In 1782 he had rendered important services in the negotiation of the treaty between Great Britain and France, in which the independence of the colonies was recognized, and in 1803 he had exercised a strong influence in bringing about the treaty, under the administration of Thomas Jefferson, by which Louisiana was acquired by the United States.

In 1809, when Samuel Francis Du Pont was six years of age, his parents removed to the Brandywine,

¹ In a table furnished to Congress by the Secretary of War, in compliance with a resolution of the House of Representatives adopted in December, 1865, with respect to the number of volunteers called for by the President at various periods, it appears that the aggregate number of troops furnished by Delaware was 13,651. The aggregate reduced to three years' standard was 10,303.

² With acknowledgments to the oration by Senator Thomas F. Bayard, on the occasion of the unveiling of the statue of Rear-Admiral Du Pont, in Washington, D. C., December 20, 1884.

which was the home of his childhood, the scene of his happy married life, and his resting-place when the earthly chapter of his noble life closed.

On December 19, 1815, when a mere child, but twelve years of age, he received from President Madison, his grandfather's warm friend, his appointment as midshipman in the navy and almost simultaneously was tendered a cadetship at West Point, but his preference was for the navy, and he entered that branch of the service at once. It is interesting to know that Jefferson, who was no less a friend of Du Pont de Nemours than was the President, wrote him a letter upon this occasion, of which the following extract shows the tenor :

"For twenty years to come we should consider peace as the summum bonum of our country. By that time your grandson will have become one of our high admirals, and bear a distinguished part in retorting the wrongs of both of his countries on the most implacable and cruel of their enemies. In this hope, and because I love you and all who are dear to you, I wrote the President on the instant of reading your letter of the 7th on the subject of his adoption into our Navy. I did it because I was gratified in doing it, while I knew it was unnecessary. The sincere respect and high estimation in which the President holds you is such that there is no gratification within the regular exercise of his functions which he would withhold from you. Be assured that if within that compass, the business is safe."

The boy lived to more than fulfill the prediction of his illustrious friend and the fondest hopes of his family. His career was remarkable. Senator Bayard, in summarizing it says :

"From December, 1815, onward, in war and peace, afloat or ashore, he diligently, and with intervals of leisure few and of short duration, served his country until his death in June, 1865; for eleven years as a midshipman; for sixteen years as a lieutenant; for thirteen years as a commander; for seven years as a captain; and for three years as a rear-admiral; giving part even of his childhood, his entire youth, and the whole of his mature manhood, to faithful public service." . . .

And again he says :

"The range and varied nature of his service seem unbounded. He carried the flag of his country on the high seas, into the four quarters of the globe, everywhere and at all times maintaining with dignity and punctilious care the national honor and reputation of the service. A love of the navy and a thorough knowledge of its needs grew into his life, and became part of his very being. The tender and impressible age at which he entered the navy had much to do with this, and the great law of gradual growth was well expressed in him, as he rose from rank to rank, unfolding higher capacities at each step. . . . A noble emulation filled him, and by study and careful self-cultivation he attained that proficiency in languages and polite literature which marked his public reports and correspondence, and distinguished him in official and social intercourse. . . . In every field of duty, on sea or land, he was found ever energetic, courageous, conscientious, in the performance of duty."

To particularize in regard to his experiences, we may state that his first cruise was in the "Franklin," a seventy-four-gun ship under Commodore Stewart (whose youthful aid he was), on the Mediterranean station. Towards the end of his cruise he joined the "Erie," and in these two ships saw three years' service. His second cruise was also on the Mediterranean station, in the frigate "Constitution." He next served in the old frigate "Congress" on the West India station and on the coast of Brazil. His fourth cruise again took him to the Mediterranean, and he sailed under Commodore John Rodgers, in the "North Carolina." He was soon promoted to the rank of sailing-master on that ship, and in April, 1826, was commissioned as a lieutenant. Again he served three years on the Mediterranean, this time on the sloop of war "Ontario," and in 1835, during

the Florida War, was on duty in the Gulf of Mexico on the "Warren" and "Constitution." From 1838 to 1841 he was on board the "Ohio" in the Mediterranean station. In 1842 he was promoted to the rank of commander, and in 1843 sailed in command of the brig "Perry" for China, but severe illness compelled his return, after reaching Rio Janeiro. In 1845 after assisting in the organization of the Naval Academy at Annapolis, he was appointed to command the frigate "Congress," flag-ship of Commodore Stockton, bound to the Pacific, and arrived on the coast of California just as the Mexican War broke out. On arriving at Monterey he was transferred to the command of the "Cyane," in July, 1846, which, after the conquest of California had been effected by the squadron under Commodore Stockton, was employed in blockade duty on the west coast of Mexico, and in cruising in the Gulf of California. The exploits of the "Cyane" under Du Pont's command were among the most brilliant achievements of the Americans during the Mexican War. His personal gallantry underwent severe tests here several times, as, for instance, when he landed one hundred of his officers and crew in the face of a military force vastly superior, and at the head of his little band fought his way through many times their number, and relieved the brave Lieutenant Heywood and his garrison in the mission-house of San José, where he had been long besieged.

His services in this war cannot even be summarized in this sketch, but they have been written upon the pages of the nation's history, and their record will forever endure.

He returned to Norfolk in October, 1848, after three years of constant service, during which time, notwithstanding long blockades at anchor and harbor defense, he had sailed sixty-five thousand miles.

After his return in the "Cyane," Commander Du Pont was employed as examiner of midshipmen and reviser of the rules of the Naval School. He was a member of the Light-House Board, and combined with that important service the command of the receiving-ship at Philadelphia. In 1855 he was promoted to the rank of captain and became a member of the Board to Promote the Efficiency of the Navy. After this he was two years in command of the "Minnesota," in the East India Squadron, and returned home to serve upon boards of examination and to have command of the Philadelphia Navy-Yard.

And now we come to the period of the veteran officer's most trying ordeal, his greatest and final services for his country, and the crowning fame of his honorable and illustrious career.

At the outbreak of the Rebellion, when travel from the North to Washington was interrupted and all communication with the capital broken off, Captain Du Pont, without waiting for any especial authorization, ordered officers, men and artillery to the Susquehanna and an armed steamer to the Chesapeake to

keep the way open for the passage of troops. In June, 1861, he was called to Washington and made president of a board, which, after elaborate examination and study of the Atlantic and Gulf coasts by means of the maps and documents of the Coast Survey, made careful reports and exhaustive memoirs which guided all of the naval operations of the war. In September he was made flag officer of the South Atlantic Blockading Squadron, and in the following month sailed from New York in command of the naval forces of the joint expedition which captured the Port Royal forts and harbor on the 7th of November. This was one of the most brilliant and striking successes of the navy in the war, and it was followed closely by other effective operations.

Congress passed a special resolution of thanks to Flag Officer Du Pont for his achievements at Port Royal; and his long and valuable services were further recognized by his promotion to the grade of rear admiral on the 16th of July, 1862.

When the Navy Department was clamorous for the capture of Charleston, although his judgment was against making the attempt without the co-operation of a land force, he nevertheless gallantly undertook it, upon the 7th of April, 1863. The naval attack, with thirty-two guns afloat in a tortuous channel, amidst formidable obstructions, against two or three hundred, was persisted in until over half of the enemy's guns were silenced, but it became evident to the commander that the harbor and city could not be taken, and that longer fighting with the already disabled iron-clads would almost inevitably result in their capture by the enemy, or complete loss by sinking. It was then that Admiral Du Pont's self-reliant and courageous judgment ordered the withdrawal of the fleet, in order, as he subsequently wrote, to "prevent a failure from being converted into a disaster." His judgment on this occasion, though not approved by the Navy Department, was indorsed by the gallant and experienced commanders of the monitors, and confirmed by subsequent events. The "Keokuk," an iron-plated vessel, sank the morning after the engagement, and an investigation showed that five out of the eight vessels were disabled, and that "half an hour more fighting would have placed them all *hors du combat*." Senator Bayard pays high tribute to the moral courage of the commander exhibited in his attitude towards this visionary project of capturing Charleston. He says:

"When Admiral Du Pont's duty required the delivery of his judgment as to the practicability of capturing Charleston with the new fleet of iron-clads, and without the co-operative movement of a strong land force, he gave it sincerely, and preferred to displease rather than mislead the public and those who had intrusted him with the command. As I read his dispatches, the more I feel his fame and memory deserve this public recognition, for he possessed the qualities that save nations—those personal qualities that are indeed the pivots upon which the great wheels of human society securely and smoothly revolve, and which all political societies need for their safety, in the high places of public trust.

"... And this man had honor. . . . It was this that impelled Admiral Du Pont to tell unpalatable truths in an hour of excitement when great results were pending. He was overborne, and his great heart was pained and his high and delicate pride wounded by injustice, ignorance, aspersion and the other countless shafts against which

no coat of mail can protect. But time was his vindicator, and the correctness of his judgment was soon established." . . .

As is well known, his successor, Rear Admiral Dahlgren, never attempted a course of action different from his predecessor, and "in his published memoir ample material will be found—if it were needed—wholly to exonerate Admiral Du Pont and to justify the counsel he gave and the action he pursued."

The officer who led into action the last wooden and the first iron fleet was now nearing the close of his career of arms and of his life. He was recalled from his command June 3, 1863, but owing to delay in the arrival of his successor, was not relieved until a month later. "The capture of the 'Atlanta' by Captain John Rodgers, whom the admiral had sent to intercept her," says one biographer, "shed a parting halo round the close of his active career." A few months after his retirement from command of the South Atlantic squadron the admiral's health, which had been impaired years before, began to seriously fail, and he was advised to travel in Europe. He was reluctant, however, to leave his country in time of war, and his death was doubtless hastened by this spirit of devotion and patriotism. He died in Philadelphia (whither he had gone on a short visit) on the 23d of June, 1865.

He married, in 1833, his cousin, Miss Sophie M. Du Pont, who survives him, and has no children. A statue of Rear Admiral Du Pont, modeled by the well-known sculptor, Launt Thompson, was erected by the government in Du Pont Circle, Washington, D. C., and unveiled nearly twenty years after his death, December 20, 1884, on which occasion the oration was delivered by another distinguished Delawarean, Senator Thomas F. Bayard.

There were phases of Admiral Du Pont's life which have scarcely been alluded to in this sketch, and indeed impossible to dwell upon in a limited article. He was a pure and upright man in the fullest and most exact sense of those terms; a man of lofty ideals and a Christian of both poetical and practical piety. In middle life he made open profession of his religious belief, and in the intervals of his naval duties took an active part in the affairs of the Protestant Episcopal Church, of which he was a communicant. He was a member of the State and General Conventions, and exerted in those bodies a strong influence, especially directed to the encouragement and strengthening of foreign missions. The deep interest he took in this work led to his selection as president of the American Church Missionary Society.

A description of the personal appearance of Admiral Du Pont, drawn near the close of his active service by Admiral Daniel Ammen, may be here appropriately given: "In appearance he was distinguished, over six feet in height, admirably proportioned, graceful and urbane, with an intelligent expression and action. It will not be considered adulatory by those who knew him to say that no officer in our navy

within the past half-century was gifted with a more distinguished appearance or exalted character."

And concerning his attributes as a man of arms and patriot, Senator Bayard says: "Long and illustrious as is the roll of honor of the American navy, it is unjust to no name that adorns it to say that none has ever exhibited a more ingrained devotion, a more zealous and solicitous guardianship of its honor, interests and efficiency than Samuel Francis Du Pont."

Colonel James Hemphill Jones, of the United States Marine Corps, was another distinguished naval officer in the Civil War. He was the son of Morgan and Mary (Hemphill) Jones, and was born in Wilmington May 6, 1821. On the 2d of March, 1847, he was commissioned a second lieutenant in the United States Marine Corps, and he immediately began to see service. In the years 1847-48 he was with the army in Mexico. September, 1853, he was promoted to a first lieutenant, and sailed for Japan on board the sloop-of-war "Macedonian," in the fleet of Commodore Perry. It was during this cruise that his health became impaired from the effects of the climate, and it was only by slow progress that he eventually recovered his normal condition. In 1856 he was ordered to the receiving ship "Ohio," at the Boston (Massachusetts) Navy Yard. In 1861 he was promoted to a captain, and participated in the disastrous action of Bull Run, where he was distinguished by his cool and steady courage.

From 1861-67 he served in the Pacific squadron. In 1864 he was promoted to a major, and the same year to a lieutenant-colonel. From 1868-71 he was on duty at Mare Island, Cal. In 1879, while stationed at the marine barracks, Boston Navy Yard, he was promoted to a colonel, and ordered to the command of the marine barracks at League Island, Pa. While in the act of obeying his orders, he was suddenly stricken ill with pneumonia, of which he died, after a brief illness.

Thus passed from earth a true soldier, a generous friend and an honorable man. Unwearied devotion to his profession was the object which inspired his daily life. Perhaps his most distinguishing characteristic, was the fidelity with which his official duties were performed. His grave was made at the Wilmington and Brandywine Cemetery, where a handsome tomb covers his remains.

The signal victories achieved at the close of the deplorable civil war were fittingly celebrated in Wilmington and other portions of Delaware. The victories of Sherman and Farragut were celebrated in a becoming manner September, 7, 1864, and when the news of the fall of Richmond and Petersburg was announced, April 3, 1865, there was a general and heartfelt jubilee, whose demonstrations were excelled only by those attending the final triumph of the Union arms. Some of these were the spontaneous outpourings of a long-suffering but now grateful people, while others were formally arranged. A grand demonstration was proposed to be held at Wilmington on the 17th of April, 1865, but

the saddening news of the death of President Lincoln and the bringing home for interment of the body of the lamented Gen. Thomas A. Smyth prevented its consummation at the time appointed. But the joy of the people was no less complete, and their patriotic spirits, though chastened, gave cheerful homage to the returning¹ soldiers of Delaware, during the summer of 1865, and have ever since gratefully remembered their services in defense of their country.

Until the beginning of the war a State debt was unknown in Delaware. The resources of the State had been amply sufficient to meet the ordinary expenses, and the policy to guard against indebtedness had become settled. Upon the issue of the orders of the Federal government to draft the citizens into the military service, the Legislature, as we have shown, determined to extend the credit of the State to aid them in relieving themselves from the operation of the draft, by obtaining substitutes. For this purpose the State treasurer was authorized to prepare and issue bonds to the amount of \$1,000,000. This amount was increased during 1865 by the addition of \$110,000, making the total \$1,110,000. A loan of bonds to the amount of \$170,000 was made to the Delaware Railroad Company by the State in 1855. As a security for this loan, the State held a mortgage of the railroad, guaranteed by the Philadelphia, Wilmington and Baltimore Railroad Company, and also a sinking fund, by the operation of which the entire loan was to be paid before the maturity of the bonds. The payment of the principal and interest of the general bonded debt was provided for by the appropriation of certain sums from time to time paid to the treasurer for the use of the State. The amount thus paid by a tax on the Philadelphia, Wilmington and Baltimore Railroad during the eleven months ending October, 31, 1865, was \$94,782, to which adding the taxes from other sources, and the aggregate was \$95,208.

Under the act of Congress of July 30, 1864, imposing a tax of ten per cent. on the circulation of State banks, the alternative was presented to them to adopt the national system authorized by act of Congress, or to go into liquidation. The State owned \$365,700 of the capital of the Farmers' Bank. An act was therefore passed authorizing the change to the national system. On the 1st of January, 1866, there were eleven national banks in the State, with a capital stock paid in of \$1,400,485; surplus fund, \$238,759; notes in circulation, \$768,860; individual deposits \$1,221,927; United States deposits, \$146,515; dividends unpaid, \$6342; due to national banks, \$171,855; due to other banks \$85,273; profits, \$110,228; State circulation, \$213,297; aggregate, \$4,363,542. Delaware also had at the same time five State banks,

¹ The First Delaware Veteran Volunteers, having been mustered out of service, reached Wilmington Friday morning, July 4, 1865. They were under command of Colonel D. Woodall, Lieutenant-Colonel Nichols and Major Dent, and numbered about six hundred and fifty men; the remainder having either been discharged or in hospital. They were met by an immense crowd of friends who had assembled to bid them a hearty welcome home. They were paid off July 17, 1865, at Brandywine Springs and discharged.

making a total of sixteen banks with a national bank capital of \$1,400,485; State bank capital of \$780,000; total capital, \$2,180,485.

The amendment to the Constitution of the United States, which had been ratified at the close of 1865, abolished slavery in the State of Delaware. The number of slaves in the State in 1860 was 1798. During the excitement of the war this number had been greatly reduced, and but few remained to receive any benefit from the measure. The free colored population in 1860 was 19,829. In the Legislature the amendment was rejected on February 8, 1865, by the following vote: In the Senate: Yeas, Messrs. John P. Belville, John F. Williamson, Isaac S. Elliott—8. Nays, Messrs. John H. Bewley, Thomas Cahill, Henry Hickman, William Hitch, James Ponder, Gove Saulsbury—6.

House: Yeas, Messrs. John Alderdice, John A. Duncan, Andrew Elinson, James H. Hoffecker, John G. Jackson, Elias N. Moore, Merritt H. Paxson—7. Nays, Messrs. Charles M. Adams, Wm. F. Carney, Henry C. Douglas, Wm. Dyer, Wm. D. Fowler, Abner Harrington, John Hickman, Benjamin Hitch, Shepard P. Houston, John Jones, Miles Messick, James Stuart, Henry Todd, John C. Wilson—12.

On December 1, 1865, President Johnson annulled the suspension of the writ of *habeas corpus*, and on April 2, 1866, he announced by proclamation that the war had ceased.

HOSPITAL AND RELIEF ASSOCIATIONS.—To the patriotic ladies of Wilmington the Union cause was much indebted for the means of alleviating the suffering of the sick and wounded soldiers. As we have already stated, as early as May, 1861, Mrs. Jones offered the use of her spacious mansion, which she had recently purchased at the corner of Eleventh and Market Streets, Wilmington, for hospital purposes, and also offered to sacrifice all she possessed for the promotion of the great cause. Other ladies of Wilmington were equally active in preparing means to make the sick comfortable.

The Delaware Hospital was opened in June, 1862, in the building erected by John P. Crozier for a normal school, near Chester, Pa. It was the only spacious building of the kind obtainable near Wilmington, which caused it to be secured for the soldiers from Delaware. Dr. Fisher, of Wilmington, was appointed hospital surgeon. Here the sick and wounded from the State received treatment during the season which followed.

About this time the sympathies of Miss Anna Semple were warmly enlisted in the work of securing nurses for the hospitals in Baltimore, City Point and other places in the field, acting under the direction of Miss Dorothea L. Dix. She was born in Philadelphia, but became a resident of Delaware when a young girl, and early devoted herself to works of charity. Being a staunch Unionist, she gave a quick response to the call for women to act as nurses, and personally took charge of the Camden Street Baltimore Hospi-

tal. Here and at other points her services were gratuitously given, and her zeal being so great, she became a warm co-laborer of Miss Dix. The latter appointed her, on the 11th of February, 1863, to supervise all the military hospitals in the State during the Rebellion. Acting in accordance with the instructions of her department, Miss Semple now began urging better facilities for the care of the sick and wounded soldiers of Delaware. Her appeals caused a desire for a suitable place for hospital purposes in Wilmington, where ample accommodations might be provided. The square of ground bounded by Ninth and Tenth Streets and between West and Tatnall Streets, was secured, upon which was erected in February and March, 1863,

Tilton Hospital.—The institution was so named in honor of Dr. James Tilton, who was the surgeon-general of the United States army, in the War of 1812, and who died near Wilmington, May 14, 1822. It was ready for the reception of the sick March 6, 1863, and Dr. Gray was the surgeon in charge, having as an associate in these duties Dr. Norris. The dimensions of the building were: A corridor 339 feet long, 16 feet wide, 14 feet high, which joined each

TILTON HOSPITAL, 1861-65.

ward; a kitchen 108 feet long, 20 feet wide, with a porch extending the whole length; 6 wards, 164 feet long, 20 feet wide and 14 feet high, with a bath-house 10 by 20 feet attached to each ward; barracks 130 feet long, 20 feet wide and 14 feet high; a coal-house 51 feet long, 16 feet wide and 14 feet high; tank-house 31 feet long, 16 feet wide and two stories in height. The whole were inclosed with a picket fence 12 feet high. The building cost \$22,500, and was completed in thirty days.

A number of tents were also used for hospital purposes, and there was a long frame building which was occupied as a dispensary, which was in charge of Malcolm Macfarlan as hospital steward, from about February 1st to September 4th, 1863. Dr. Macfarlan is now (1888) a prominent and successful homoeopathic physician and surgeon in Philadelphia. Dr. E. J. Bailey was the surgeon in Aug., 1864, and was assisted by Drs. William R. Bullock and Robert P. Johnson. In August of that year there were three hundred and eighty

beds, ninety-five sick and one hundred and fifty-one wounded patients. In October, 1864, Surgeon Josiah Simpson, of the United States army, reported that it had a capacity for three hundred and fifty-two patients, and that there were under treatment two hundred and forty-one soldiers.

This number was generally maintained and the hospital was used until the fall of 1865. After the close of the war many sick soldiers were there mustered out of service by Captain S. Townsend, as soon as they were able to travel, and sent to Philadelphia, where they were paid off. Thousands of soldiers were treated at this hospital in the period it was maintained.

A valuable adjunct of Tilton Hospital was

The Delaware State Association for the Relief of Sick and Wounded Soldiers, which was formed in July, 1862, in the city of Wilmington. It had as its first officers: president, Rev. Alfred Lee; vice-president, William Canby; secretary, William S. Hilles; treasurer, John N. Robinson. A committee appointed to collect funds in behalf of the association made the following appeal to the citizens of Wilmington:

"The object of this Association will, we are assured, commend it to the heart of every true patriot and lover of the Union, and will enlist the sympathies and generous support of all who appreciate the noble impulse and sacrificing spirit which has prompted our brethren to peril their lives, and put in jeopardy all earthly considerations for the safety of our common country. While we do not the soldier's duty, we have it in our power to extend to him the alleviating hand when stricken down by the enemy or prostrated by disease; and with this noble object in view the Association appeals to your generosity for material aid, without which, little or nothing can be done.

"We ask for your earnest co-operation and prompt response when the committee shall call on you:

"E. Hollingsworth, Charles Warner, D. Woolman, Jesse Lane, Gregg Chandler, Alexander Kelley, George G. Lohdelt, Joseph Teas, Job H. Jackson, A. W. Smith, W. H. England, S. M. Harrington, Jr., C. Feiliger, Joseph Pyle and Joseph M. Pusey."

The association had the hearty co-operation of a Ladies' Aid Association, which was formed for this purpose at a meeting held July 22, 1862. After able addresses by Bishop Lee and others, Miss Anna Semple was called to the chair and Miss S. A. Bailey was appointed secretary. Mrs. Samuel Harlan, Mrs. H. L. Tatnall, Mrs. Crossman, Miss Edith Newlin and Miss H. B. Torbert were appointed a committee to name officers for a permanent organization. Mrs. James S. Dickerson was elected treasurer.

These associations succeeded in collecting for the relief of the sick and wounded, up to October 4, 1862, \$6033.75, and in the same period had expended in the work of their mission \$2307.87. Up to the 15th of May, 1864, this fund was increased by the Ladies' Committee by the addition of \$385.90.

How comprehensive and far extended was the work of the Ladies' Committee of the Delaware State Association may be learned from the report which was issued in November, 1864, and which covered a period of operations since July 9, 1863. The report was arranged under three heads,—work for the soldiers, work for the refugees, and work for the Great Central Fair of the Sanitary Commission:

First, the work for the soldiers embraced the dis-

tribution of very many donations, including all kinds of wearing apparel, books, etc., contributed by the Ladies' Aid Societies of Wilmington, Claymont, Dover, etc. About two thousand six hundred articles of clothing were made gratuitously for soldiers in camp and hospital, and members of soldiers' families were employed to make about nine hundred additional articles. These were sent to the hospitals in which were Delaware soldiers, to the Christian Commission, and to the First, Second, Third and Fourth Delaware Regiments direct, all the boxes reaching their destination safe, and their contents were gratefully received. The hospital library at Wilmington, under the direction of a committee, was well maintained and contained seven hundred and fifty volumes. The prisoners at Fort Delaware were also remembered, and about thirty families at Wilmington received material support.

Second, work for refugees,—

"An urgent appeal on behalf of suffering Union refugees at Cairo, Illinois, and vicinity, was so liberally responded to by our friends that we were enabled to send six boxes, containing an aggregate of one thousand two hundred and seven articles of clothing, and forty-two yards of muslin. A letter was received from Mr. Folsom Post Chaplain at Cairo, acknowledging the timely arrival in good order of these boxes.

"Third, Work for the Great Central Fair.—A donation of ninety-five dollars in cash was made to the Delaware Department and the sum of \$313.25 was expended chiefly for the purchase of material for useful and fancy articles. Those thus made, together with the donations of each of our friends as preferred to make this Committee the medium through which their gifts were conveyed to the Fair, embraced a large variety of fancy work of all kinds."

Among other articles donated were two hundred and sixty copies of poems, called "Flowers from the Battle-Field," by M. T. Canby, of Wilmington. No separate account was kept of the money realized from the sale of the donated articles at the fair, but the sum augmented very much the amount Delaware was enabled to pay into the general treasury of the managers.

The Christian Commission and Sanitary Fair.—It is greatly to the credit of the State of Delaware that when the Christian Commission was organized some of the first letters of encouragement and proffers of substantial aid came from its citizens. This interest in the Commission was continued and culminated in the Great Central Fair of the Sanitary Commission of New Jersey, Pennsylvania and Delaware, which was opened at Philadelphia, June 7, 1864. The fair was an object of great attraction until its close, June 28th, and realized for the Commission the neat sum of \$1,080,000.

The proposition to hold a fair for such a laudable purpose was received with much favor by the people of Delaware, and the patriotic Governor commended the object in the following proclamation:

"STATE OF DELAWARE, EXECUTIVE DEPARTMENT.

"DOVER, March, 1864.

"To the Loyal Citizens of Delaware:

"It is proposed to hold a Great Fair in the City of Philadelphia, in the First week in June next, for the benefit of the Sanitary Commission. The Citizens of Delaware have been cordially invited to co-operate with the citizens of Pennsylvania and New Jersey in this Patriotic and Humane purpose. . . .

"It is not necessary for me to commend this great and good work to the Loyal people of Delaware. You have already given with a liberality and labored with a fidelity worthy of all praise. You have been willing

and active; and what you have done is the best indication of what you can and will do. Let every clergyman announce this humane undertaking to his people; let the Press give it the widest publicity and the most earnest encouragement; let every factory, workshop and mill contribute a specimen of the best thing they can turn out; let all legal men and women exercise their taste and industry. In this way the result may be an honor to our State, a great comfort to our suffering heroes, and an offering well pleasing to the Almighty, whose blessing and assistance I humbly invoke upon this work of Christian charity.

By the Governor,
"SAMUEL M. HARRINGTON, Jr.,
"Secretary of State."

A building was erected for the Delaware Department of the Great Fair on the west side of Logan Square, near Vine Street, Philadelphia, which was two hundred and fifty feet long and thirty feet wide, in which were displayed the exhibits of the State. To this department the Philadelphia, Wilmington and Baltimore Railroad Company donated two thousand dollars on the 18th of May, 1864, and many other corporations contributed liberal sums to encourage the good cause.

Every department was well maintained, and State pride created to make the undertaking a success extended to all classes, the children of the public schools especially being zealous in their substantial acts of encouragement. When the fair was opened on the afternoon of June 7, 1864, Governor Cannon

THE SANITARY FAIR BUILDING, PHILADELPHIA.

was introduced to the assembled multitude, whom he addressed in words of eloquent, patriotic devotion to the Union. Standing as the representative of little Delaware, he said he came to assure them that the feelings of most of his people were identical with theirs, and how, striving with a steady purpose and deep earnestness, Delaware sought and hoped, by the blessing of God, "soon to be as FREE as you are; how she struggles to throw off the bonds that retard her progress, and how her loyal hearts beat quick with the good promise of coming freedom! how some of her bravest and best have fallen in this great struggle, and how many more are receiving the ministrations of the gentle hands whom the Sanitary Commission sends out to help them, and how many more have turned their faces to the foe and are ready

to charge and to suffer and to die for God and Liberty!

"God bless the Sanitary and the Christian Commissions. They speak of a liberality and Christian charity that do honor to our age. They revive the strength and the life of the suffering soldier, and restore him to his country and his family. They give him courage as he goes to battle, and fortitude as he suffers; they furnish him consolation as he sinks, and the promise of a better life as he dies."

One of the most pleasant and a closing incident of the work of the fair was the presentation to President Lincoln by the State of Delaware of a beautiful silver vase, valued at seven hundred and fifty dollars. The vase had been on exhibition at the fair, and had helped to swell the fund of the Commission by the contributions received in its behalf. The cup was delivered to the President in July, 1864.

FORT DELAWARE occupied such an important position in the war history of the State that an extended account of that fortress, as it appeared when hostilities began, may not prove uninteresting. This great citadel was erected in the centre of a green, willowy island,—the Pea Patch,—near the head of Delaware Bay. The island comprises about eighty acres of ground, most of which lies four feet beneath the water-level.

"The embankments around the island were from six to eight feet high, and docks were constructed on the east and west sides, while flood gates were planted at their heads so that the entire surface of the island outside the citadel can be covered by the bay whenever the exigencies of the garrison require complete isolation in the citadel. When the fort shall have been completed (many years to come) the embankments which encircle the island will constitute water batteries and will be provided with one hundred guns additional to those employed for the defence of the citadel. The buildings without the fortress are all constructed of frame so that they can be fired at any moment. A road twenty feet in width and eight feet deep encompasses the solid masonry of Fort Delaware. It is crossed by a single stone bridge, on the west, comprised of three arches, and opening upon the huge sally-port or gateway—under the great arch of which visitors find entrance and exit. A gang way plank on the east flank leads into a small sally-port, with double walls opening upon the second tier or story.

"Fort Delaware mounts three tiers of guns. It is pentagonal in shape, and its sides within its walls coverly five acres of ground. The exterior walls of the fort are

made of granite blocks four feet thick; solid brick walls are built within these, twelve feet thick, and archways constructed within the solid walls reach at least thirty feet additional thickness. Inside the walls and archways are the barracks of the officers and the men, capable of quartering, when completed, at least two thousand men. They are now useless because unfinished, and present only a hollow array of brick walls, which can be battered to fragments by an enemy's cannon.

"The quarters of Captain Gilson, who sleeps within the fort, consist of a petty room in a frame shed, ascending a single berth, and altogether unsuited and unseemly. A few thousand dollars would complete the interior arrangements of this fort, provide ample and humane accommodations for the garrison, and make this almost impregnable fortress an excellent defence for the city of Philadelphia.

"The archways, before referred to, are used for the mounting of guns, for magazines, &c.

"The fort is now provisioned with two months' supplies for one hundred and fifty men, by the foresight of Col. Bradford and commissary James S. Watson of the municipal service. The guns of Fort Delaware, more than one hundred in number, include nineteen columbads, five of which are ten-inch guns, weighing nine thousand pounds each (one hundred and twenty-eight pound shot) capable of reaching any craft within three miles, fourteen eight-inch columbads, weighing five thousand pounds each. The weight of the ball for the latter is nearly one hundred pounds each. In addition to these, there is a large quan-

tity of ordinary guns, howitzers, &c. A squad of the artillerymen are daily employed in hoisting cannons to their places on the parapet, and, in a short time the whole array of cannon in the citadel will be fixed in their respective places, and the recruits will commence target practice with their cannon and the columbiads. We have no hesitation in saying that at the present time Fort Delaware is calculated to resist any foe, and the channels of the Delaware are inaccessible to any hostile crew with the guns of that fortress bearing upon them.

"The bastions or embrasures of this fort are calculated to sweep into destruction any storming party. At the angles of the fort the bastions protrude beyond the line of walls, so as to command through the bastion ports, any scaling party along the whole line of flank. Thirty-four guns are already mounted. To assail successfully this fortress of the Delaware, an attacking foe must first sail up the channel, with the terrible guns of the fortress bearing upon them. If the foe should successfully hazard such a gauntlet, the island must be invaded. In five minutes this could be laid under water four feet deep. If ever this terrible exigency should be evaded, the solid walls of the fort encompassed with a deep moat, are next to be scaled. Should ladders be raised to the high parapet of the citadel, the great guns of the bastions are ready to sweep the assailants into destruction. Should they, by any fortuitous circumstances, enter the fort, its foundation can be flooded to the depth of four feet. We see of no way in which Fort Delaware could be successfully stormed or besieged. The citizens of both New Jersey and Delaware are loyal in any emergency. The people of Delaware City offered to Captain Gilson the services of one hundred and fifty soldiers to defend Pea Patch and the Delaware.

"Fort Delaware is in many respects the counterpart of Fort Sumter, but larger and stronger, in fact, almost impregnable. Twenty-six years have been required to bring it to its present state of completeness and probably ten years of additional labor would scarcely make it equal to all engineering requirements."¹

At this time the garrison consisted of ten officers and sixty-two privates, but as the fury of the struggle increased, reinforcements were added from time to time, and many of the short-term soldiers of Delaware here served their periods of enlistment. The island was soon selected as a proper place for the confinement of Confederate prisoners, but owing to the insufficient number of men constituting the garrison, a number of prisoners succeeded in escaping in July, 1862. Commenting on this, a paper² said:

"Up to the time of this escape there were 3181 rebel prisoners confined at Fort Delaware, and about 3000 more were expected before the end of July. The steamer 'Baltic' arrived at the fort in the middle of July, having on board 1200 prisoners, who were transferred from Governor's Island, New York, to Fort Delaware. They comprised the whole number quartered at Governor's Island, and consequently embraced some determined characters. The officers numbered about one hundred, and had quarters inside the fort, and the other prisoners occupied barracks on the upper end of the island. These barracks are commanded by heavy casemate guns in the fort, and also by shotted field-pieces. The barracks erected are capable of accommodating 2000 men. Other barracks are in course of erection, intended to accommodate 6000 more. The guard consists of about 250 men, comprising portions of three batteries. A guard patrols the island at all hours, to prevent any attempt at escape, but the circumstance that two hundred have escaped establishes the fact that two hundred and fifty men are not enough to guard three thousand reckless and determined prisoners who have nothing to do but to organize plans for escape."

The guards were reinforced by a detachment of five hundred men, but about the same time the number of Confederate prisoners was increased to eight thousand men. The following year, in August, 1863, there were eleven thousand prisoners, and subsequently this number was still further increased, there being nearly fifteen thousand held in 1864.

As early as 1863 the Confederates at Fort Delaware began taking the oath of allegiance to the United States, and in the summer of that year fully two hundred of these men were doing garrison duty at the fort. Five hundred more had taken the oath and were uniformed and held in readiness for any service the government might impose on them. Some entered the

ranks of the Fourth Regiment of Delaware Infantry, while others became members of Capt. Ahl's battery of heavy artillery. That company was composed almost exclusively of Confederate prisoners who had taken the oath of allegiance. It was mustered out of service July 25, 1865, when the men were paid off and returned to their homes.

The prisoners who had not previously taken the pledge of loyalty began to take the oath of allegiance in April, 1865, and were sent off to their homes at the rate of about two hundred men per day. This process continued until but a few prisoners remained, whose offenses required a special pardon.

During the occupancy of the fort as a prison, a cemetery was used opposite, in the State of New Jersey, where most of the prisoners who died were interred.

REGIMENTAL HISTORIES.³—Pending the delay in putting organized military companies in the field as volunteers of the United States, a number of the more arduous patriots left Delaware to enlist in Pennsylvania and New Jersey. Scores of men thus left Wilmington the first week of the war to connect themselves with companies at Chester, Kennett Square and Philadelphia. On the 25th of April, 1861, as we have shown, a company of German Turners, numbering eighty men, left Wilmington for Philadelphia to unite with the Turner Regiment in that city. Seventy Germans had proceeded to the same place the previous day.

Capt. Thomas A. Smyth's company of National Guards, about eighty men, also went to Philadelphia early in May, to connect itself with a regiment. The men had been ready some time, but not liking the tardiness of things in Delaware, resolved to seek a more active field of service by entering a Pennsylvania regiment. On being mustered into the service Francis McCloskey was commissioned first lieutenant; Neal Ward, second lieutenant; Michael Kirwin, first sergeant; Daniel O'Neal, second sergeant; Daniel Meany, third sergeant; Wm. Murphy, fourth sergeant. The company was attached to Col. Owen's Twenty-fourth Pennsylvania Volunteer Regiment and served on the Upper Potomac until August 1st, when it returned to Wilmington, where it received a hearty welcome. It was the first company to return by reason of the expiration of the term of service.

In the third year of the war an independent company was organized on the Brandywine Banks, pursuant to an order of the War Department August 10, 1864. The men were mustered August 30, 1864, by Major H. B. Judd, of the United States army, and Hugh Stirling was the captain. The duty of this company was to protect the powder works, and the men were paid by the Du Ponts.

The First Regiment Delaware Volunteer Infantry.—The organization of this body was begun immediately after the call of the President of the United States,

¹ Newspaper account May, 1860.

³ The rosters of the Delaware troops in the Civil War are to be found in the Appendix.

April 19, 1861, and the enlistments were for the period of three months. Two companies, A and B, commanded by Robert S. and Charles E. La Motte, were filled to the maximum strength within a few days, and Company C was formed soon after at Wilmington, rendezvousing in the "Institute Building" on Market Street, which was secured as an armory. Other companies were organizing in the lower part of the State, but owing to the absence of a proper system, could not speedily combine to form a regimental body, and a delay of nearly a month ensued before the organization was completed. Captain Robert S. La Motte, now colonel of the Thirteenth Infantry, United States army, was the chief instrument of influence in holding the men together, and promoting the organization of the regiment. It was largely through his efforts among his friends and the prominent people of the city that the men were made comfortable, and supplied with partial uniforms and other clothing. His efforts were warmly seconded by William P. Saville, who had received a West Point education, and who was afterwards adjutant of the regiment. The three companies at Wilmington finally went into camp at the Fair Grounds on the 22d of May. This place had been fitted up with sheds and tents and was called Camp Brandywine. By the 25th of May all the other companies were in camp and doing duty, the regiment holding its first dress parade the following day. The organization of the regiment was fully completed before May 31st and was as follows:

Col., Henry H. Lockwood.
Lieut.-Col., John W. Andrews.
Major, Henry A. Du Pont.
Adjutant, William P. Saville.
Q.-M., W. Hill Alderdice.
Surgeon, Robert P. Johnson.
Asst. Surgeon, James Knight.
Chaplain, George M. Condon.
Sergt.-Major, John G. Saville.

Company A.

Capt., Robert S. La Motte.
1st Lieut., Evan S. Watson.
2d Lieut., Franklin Houseman.

Company B.

Capt., Charles E. La Motte.
1st Lieut., James Plunkett.
2d Lieut., Alfred Vanderver.

Company C.

Capt., Joseph M. Barr.
1st Lieut., W. H. McKaig.
2d Lieut., J. R. Holt.

Company D.

Capt., James Green.
1st Lieut., Enoch J. Smithers.
2d Lieut., Samuel Stimpson.

Company E.

Capt., Robert Milligan.
1st Lieut., Benjamin Nields.
2d Lieut., Leonard E. Wales.

Company F.

Capt., Thomas Crossley.
1st Lieut., Richard Duncan.
2d Lieut., William Plunkett.

Company G.

Capt., C. Rodney Layton.
1st Lieut., David W. Maull.
2d Lieut., William Y. Swiggott.

Company H.

Capt., Samuel H. Jenkins.
1st Lieut., John H. Knight.
2d Lieut., Daniel Woodall.

Company I.

Capt., James Leonard.
1st Lieut., John Daugherty.
2d Lieut., Daniel Langdon.

Company K.

Capt., George F. Smith.
1st Lieut., Charles Bind.
2d Lieut., W. H. Clenden.

On the 11th of June, Capt. R. S. La Motte was elected major to fill vacancy caused by the inability of Major Du Pont to leave the regular army, and Lieutenant E. S. Watson became captain of Company A. About a month later Major La Motte was appointed a captain in the regular army, and Captain C. Rodney Layton was elected major. The brass band organized the latter part of June proved valuable in popularizing the movements of the regiment, whose work during the entire service was to perform guard duty. The companies returned home at intervals from the 2d of August to the 14th of the same month, and the service, though uneventful, gave a military experience which made it easier to reorganize.

"*The First Delaware*" for three years.—Col. Lockwood having been appointed a brigadier-general, this next duty devolved on Col. Jno. W. Andrews, who received authority from the War Department for this purpose. The companies entering into the organization repaired to a regimental camp-ground at Hare's Corners, in New Castle Hundred, which was called "Camp Andrews." All the companies had reported at this camp the last day of September, and the work of drilling was begun, although not all companies were supplied with arms until October 20th. A few days previous to this the regiment had been fully organized as follows:

Col., John W. Andrews.
Lieut.-Col., Oliver P. Hopkinson.
Maj., Thomas A. Smyth.
Adjutant, Wm. P. Saville.
Q.-M., Thos. Y. England,
Surg., David W. Maull.
Asst. Surg., Saml. D. Marshall.
Chap., Thos. O. Murphey.
Sergt.-Maj., James Lewis.
Q.-M.-Sergt., Frank Wilson.
Com.-Sergt., Chas. S. Schaeffer.
Hosp. Stew., Archibald D. O'Mera.
Drum Maj., Patrick Dooley.
Prin. Muc., John B. Ritchie.

Company A.

Capt., Evan S. Watson.
1st Lieut., James Parke Postles.
2d Lieut., Franklin Houseman.

Company B.

Capt., James Leonard.
1st Lieut., James A. Oates.
2d Lieut., James Rickards.

Company C.

Capt., Neal Ward.
1st Lieut., Frank McCloskey.
2d Lieut., Hugh Sweeney.

Company D.

Capt., Enoch J. Smithers.

1st Lieut., David S. Yardley.
2d Lieut., William F. Smith.

Company E.

Capt., Edward P. Harris.
1st Lieut., Wm. Y. Swiggott.
2d Lieut., Albert S. Phillips.

Company F.

Capt., Daniel Woodall.
1st Lieut., Benj. E. Adama.
2d Lieut., John W. Williams.

Company G.

Capt., Allen Shortledge.
1st Lieut., Alfred Gawthrop.
2d Lieut., John L. Sparks.

Company H.

Capt., John B. Tanner.
1st Lieut., John R. Vanlan.
2d Lieut., Ezekiel C. Alexander.

Company I.

Capt., Charles Lespee.
1st Lieut., Thomas B. Hizar.
2d Lieut., Isaac Van Trump.

Company K.

Capt., Thomas Crossley.
1st Lieut., William C. Inhoff.
2d Lieut., Henry H. Burton.

On the 28th of May, 1861, the first troops from Delaware moved towards the front, Companies A and B being assigned to Aberdeen, Companies D and E to Bush River. The remaining Companies of the regiment left Camp Brandywine on the 9th of June, and were stationed along the railroad in Maryland as far as Havre de Grace.

Early on the morning of October 20, 1861, the regiment left Camp Andrews and marched to Newport, where the cars were taken for Baltimore, whence the men were transported by steamboat to Fortress Monroe, disembarking at the latter place October 21, and took quarters at Camp Hamilton, a mile from the fort. In this winter camp strict discipline was maintained, and much attention was paid to the comfort and personal appearance of the men; so that the

regiment became one of the most noted quartered there.

On the 8th of March, 1862, the regiment witnessed for the first time an engagement with the enemy—the naval battle off Newport News; but no movement toward the enemy was made until May 9th, when the First Delaware was part of the forces that invested Norfolk. From this place the regiment moved to Suffolk, early in July, where it remained until September, when it was moved against the enemy in Northern Virginia. It became a part of the Third Division, Second Corps, and was engaged in the battle of Antietam, September 17, 1862. The previous day, Lieut. James Lewis had been wounded by a shell and was the first man of the regiment to shed his blood in the war. Many lives were sacrificed on the 17th, Captains Watson, Leonard and Rickards being killed, and Captains Yardley, Woodall and Shortledge, and Lieuts. Swiggett and Tanner wounded. The color-guard were shot down, either killed or wounded, and the colors were so torn and tattered that they were never carried into another fight. The regiment received a fearful baptism of blood, losing nearly one-third of its men; but acquitted itself with great bravery.

On the 19th the regiment marched to Bolivar Heights, and the work of recuperation was begun.

In the battle of Fredericksburg, December 13, 1862, seventeen members of the regiment were killed and a large number wounded, the men remaining on the field "until every cartridge was expended." In this engagement Col. John W. Andrews commanded the Third Brigade and Maj. Thomas A. Smyth had charge of the regiment.

A period of routine service now followed, which was broken by the movements which brought on the battles of Chancellorsville, May 1 to 4, 1863, in which the regiment lost nearly fifty men from all causes, Maj. Woodall being wounded. Here, as in the battle of Gettysburg, which next followed, the regiment acquitted itself in such a manner that its coolness and valor were warmly commended. Under the gallant Col. Smyth, who commanded the Second Brigade, Third Division, Second Army Corps, in the latter battle, the First Delaware did its work fully and bravely, and of its officers Capt. J. Parke Postles and Lieut. W. P. Seville were especially commended for their meritorious services on special duty. In this battle Capt. M. W. B. Ellegood was killed July 2d, and Lieut. Wm. F. Smith, at that time in command of the regiment, on the 3d, falling with his sword in one hand and a captured Confederate flag in the other. Color-Sergeant John M. Dunn also distinguished himself by leading the regiment across the stone wall, colors in hand, when a counter-charge was made. In this counter-charge, upon the thickest of the enemy, four battle-flags were captured and numerous prisoners taken. The loss of the regiment was twelve killed, forty-five wounded and eleven prisoners.

The regiment belonged to the body of men which

followed closely in pursuit of Lee, and was successively engaged in the battles of Auburn and Bristoe Station, Va., October 14th, at Locust Grove, November 27th, and Mine Run, November 30, 1863.

On the 18th of December, 1863, two hundred and ten officers and men of the regiment were re-mustered for three years, under the offer of the government, being the first organization in the Army of the Potomac to accept that proposition, which included a thirty days' furlough home. The veteran part of the regiment reached Wilmington January 1, 1864, and was given an enthusiastic reception. "The men marched into the city amid the firing of cannon, the ringing of bells and through streets densely thronged to the Town Hall, where an elegant and bountiful dinner was spread for them. A splendid set of colors was presented to the regiment on this occasion which was carried to the end of the war and afterwards consigned to the care of the State Historical Society."

Its furlough having expired, the regiment returned to its duties in the field February 9, 1864, joining its brigade at Stony Mountain, Va., and in the spring of that year again moved with the troops which engaged in the battles of the Wilderness and Spottsylvania from May 5th to May 17th, and which opened the way towards Petersburg. The regiment was engaged in intermediate battles as follows: North Anna, May 23d-27th; Cold Harbor June 1st to 12th; Before Petersburg, June 5th to July. After a short period of rest the regiment was engaged in the battles of Deep Bottom, July 27th, and August 14th to 20th; Ream's Station, August 25th; Gravelly Run and Hatcher's Run, October 27th; in each of which the First Delaware maintained its reputation for effective service. In the last battles Major William F. Smith, in command of the regiment, fell mortally wounded and died on the 11th of November, 1864. This ended the active campaign for that year. The regiment went into winter-quarters, and in March, 1865, again took part in the siege of Petersburg, which resulted in its capture April 2, 1865. The battle of High Bridge, April 7th, though short, was fiercely contested, and here General Thomas A. Smyth received a mortal wound, from which he died two days later. His body was embalmed and taken to Delaware, where it was interred with appropriate honors. He was one of the bravest officers in the army, self-made and thoroughly reliable and reached the position which he occupied without political influence, and through his own indomitable pluck and courage. Commissioned major October 10, 1861, he was promoted lieutenant-colonel December 18, 1862, colonel February 23, 1863, and brigadier-general October 1, 1864.

General Smyth was born December 25, 1832, in Ballyhooly, county of Cork, Ireland, and received a limited education. He came to America in August 1854, and settled in Philadelphia, as a wood-carver. He served with General Walker in Nicaragua, and in 1858 came to Wilmington, where he married Miss

The Right Hon. Genl.
Bischoffberger

*The A. Army Co
Brig Gen. Vol.*

Amanda M. Ponder. In April, 1861, he raised the first company for the three months service, and, as heretofore stated, joined the Twenty-fourth Pennsylvania Volunteers in Philadelphia. After the muster-out of the regiment Captain Smyth returned to Wilmington, where, on October 22d, he was elected major of the First Delaware Regiment. On the last day of the fight at Gettysburg he was wounded on the nose and head by fragments of a shell. In April, 1864, he was assigned to the command of the Irish Brigade, and fought with it in the battles of the Wilderness and Spottsylvania. When the general was killed he was riding in advance with his staff on the skirmish line, where he was mortally wounded by a Confederate sharp-shooter. He died on the day of Lee's surrender, and, it is said, was the last general officer on the Union side killed in the war.

The surrender at Appomattox Court-House, April 9, 1865, virtually closed the war and ended the active work of the regiment, but it was not until May 1st, that the long and tedious march northward was begun. On the 15th of May the regiment went into camp near Munson's Hill, in the neighborhood of Washington, where it remained nearly two months before it left the service. It participated in the grand review at Washington, on the 23d of May, 1865, the regiment being commanded by Lieutenant-Colonel J. C. Nichols. Colonel D. Woodall, of the First Delaware commanded the Third Brigade, Second Division, Second Army Corps, which included this regiment. The other Delaware troops in the review were in the Third Brigade, Second Division, Fifth Army Corps, and consisted of the Third Regiment, commanded by Capt. D. D. Joseph; the Fourth, commanded by Brevet Lieutenant-Colonel M. B. Gist; and the Eighth, commanded by Capt. John Richards.

Many of the enlisted men of the last three organizations were transferred to the ranks of the First, by General Order No. 94, and as it had also absorbed a portion of the Second Regiment, July 4, 1864, the First was in July, 1865, one of the strongest regiments in the Army of the Potomac, of which it had been a part since its longer enlistments. The regiment was mustered out July 12, 1865, and proceeded as a body to Wilmington, July 14th, where, after having been given an enthusiastic welcome home, it disbanded.

The *Second Delaware Regiment* was the first body of volunteer infantry in the State to form under the call for three years' men. Its regimental organization dated from May 21, 1861, but its ranks were not entirely filled up until five months later, on account of no State system to aid in this work. This cause also led to the taking of companies from outside of the State in order that its organization might be more speedily completed. Companies B, D and G were from Philadelphia, and Company C from Elkton, Maryland. The remainder of the companies were filled up at Wilmington, where headquarters

had been established by the organizer of the regiment, H. W. Wharton, of the United States army. The men rendezvoused at Camp Brandywine during the summer of 1861, and when the roster was completed the following were the officers:

Col., H. W. Wharton.
Lt.-Col., W. P. Bailey.
Major, Robert Andrews.
Adjutant, Samuel Canby.
Qt.-Master, George Plunket.
Surgeon, David W. Houston.
Asst. Surgeon, William Habb.
Sergt. Major, William H. Brady.
Hosp.-Steward, John C. Claypoole.
Q.-M.-Sergt., Benj. F. Hodges.
Comm.-Sergt., Henry C. Nelson.

Company A.

Capt., David L. Stricker.
1st Lieut., Thomas M. Wenle.
2d Lieut., John Evans.

Company B.

Capt., Charles H. Christman.
1st Lieut., Thomas F. Guyer.
2d Lieut., William Fennimore.

Company C.

Capt., Benjamin F. Ricketts.
1st Lieut., W. F. A. Torbett.
2d Lieut., John G. Simplex.

Company D.

Capt., John Perry.
1st Lieut., William Helmbold.
2d Lieut., Andrew J. Krouse.

Company E.

Capt., Robert E. Moorehouse.
1st Lieut., George Helmbold.
2d Lieut., John Bogla.

Company F.

Capt., Peter McCullough.
1st Lieut., Charles Reynolds.
2d Lieut., Frank Decker.

Company G.

Capt., John F. Heickley.
1st Lieut., Charles D. Foy.
2d Lieut., Thomas I. Moore.

Company H.

Capt., James Plunkett.
1st Lieut., Lewis Nolen.
2d Lieut., John Devinney.

Company I.

Capt., Samuel D. Wood.
1st Lieut., Gideon B. Todd.
2d Lieut., John Keesey.

Company K.

Capt., Joseph M. Barr.
1st Lieut., Robert Holt.
2d Lieut., Charles Evans.

On the 17th of September, 1861, eight companies of the regiment left Camp Brandywine and marched to Cambridge, Md., where they went into a camp of instruction under Brigadier-General H. H. Lockwood. Companies I and K joined the command in October and November, 1861, and also prepared for service in the field. The regiment moved with the brigade of General Lockwood to Accomac, Virginia, December 1, 1861, and remained in that locality until March 1, 1862, when it was transferred to Baltimore to do garrison duty. In May, the same year, it joined the Army of the Potomac under General McClellan, and at the battle of Fair Oaks was assigned to the brigade of General W. H. French. Here the first active field service of the regiment began and continued almost incessantly during the siege of Richmond, participating in the general engagements of Gaines' Mill, Savage Station, Peach Orchard, White Oak Swamp and Malvern Hill, from June 27 to July 1, 1862. In the battle of Antietam, September 17, 1862, the regiment held an advanced position and was warmly commended for its bravery. The battle of Fredericksburg was the next eventful incident in the history of the regiment, and here, too, it was in the forward part of the fray and covered the retreat from that hotly-contested field so ably that it attracted the attention of the army. Soon after a contemporary writer spoke of the regiment as follows:¹

¹ "The regiment designated upon the army register as the 'Second Delaware,' but more familiarly known among the veterans of the Army of the Potomac as the 'Crazy Delawares,' was the first regiment raised in

¹ New York Times, January 13, 1863.

the State for three years or during the war. It has been prominent in every general engagement of the Grand Army of the Potomac. It is commanded by Colonel W. P. Bailey, a cool, brave and experienced officer, who possesses the confidence and affection of his men, and will never disappoint the hopes of his country.

"At the battles of Gaines' Mill, Oak Swamp, Peach Orchard, Savage Station, Antietam and Fredericksburg this gallant regiment, now reduced to about two hundred and fifty effective men, fought with a valor and self-sacrificing devotion that won the applause of the whole army. It was the last to leave the field at the bloody fight of Gaines' Mill, and at Fredericksburg it led the charge of Zook's Brigade, and laid its dead nearer the rebel works than any other regiment."

In this charge Colonel Bailey was wounded by a fragment of a shell, but was soon again able to lead the "crazy Delawares" to further deeds of glory. The regiment was at Chancellorville, May 2, 1863, and performed its full share in the sanguinary struggle at Gettysburg. The division to which it belonged met and turned back the advancing Confederates, driving them beyond the base of Little Round Top, when it was in turn forced to retreat. On the 3d day of July a line of the Second Delaware, led by Captain John Evans, took more prisoners than the number of men under his command, and the regiment was in the advance of the Union forces which pursued the stricken enemy. This disposition to lead the advance upon the foes of the Union was continued in the campaign of the fall and winter of 1863, the regiment especially distinguishing itself at Bristol Station and Mine Run. In the later campaigns it was in all the general engagements of the Second Army Corps, of which it was a part until the expiration of its service, in the summer of 1864. At the battle of Spottsylvania, May 11, 1864, Captain John Evans fell mortally wounded, dying the following day, when Lieutenant-Colonel D. L. Stricker was also killed on the same field of battle. The regiment was now reduced to such a small number that it was attached to another organization in these movements against the enemy. The remains of those brave officers were taken to their homes at New Castle and Dover, where the people united in giving them honored interment.

Of the original officers Colonel Wharton resigned in August, 1862, when Lieutenant-Colonel Bailey was promoted to the colonelcy, serving in that office until May 12, 1864. In November, 1863, Major Stricker was promoted lieutenant-colonel of the regiment and Captain B. F. Ricketts became the major. Captain Peter McCullough was promoted lieutenant-colonel after the battle of Spottsylvania and in this office was wounded at Cold Harbor, when he was obliged to leave active service and was appointed commissioner of subsistence of volunteers.

Peter McCullough, colonel Second Regiment Delaware Infantry, was born in Tyrone County, Ireland, in the year 1830. From a child he had been a witness of the tyranny practiced upon his race. When, therefore, he arrived at the age of twelve years, his young heart thirsting for freedom, he found it no longer possible to dwell in a land where arbitrary power made the lives of the inhabitants a round of

unhappiness and misery, so he set sail for America, and eventually arrived safely on its shores.

After tarrying for a season in the city of New York, he went to Philadelphia and served an apprenticeship. He then went to Wilmington and started a shoe store at Sixth and Market Streets. In this, as in all other matters in which he subsequently engaged, he was faithful to the end.

When the Civil War broke out and President Lincoln issued his second call for troops, Colonel McCullough joined the Second Regiment as captain of Company F. This regiment was destined to achieve a gallant record, and Colonel McCullough was noted for his daring deeds from the day it went under fire. In every engagement he bore himself with conspicuous gallantry, and participated in almost all the battles of the Army of the Potomac. In the course of his service he was wounded on three different occasions.

In February, 1864, he was promoted to a major, and in the following May he became colonel of the regiment. His heroic conduct at Antietam induced Mr. Lincoln to write him a personal letter of a very complimentary nature.

At Petersburg he was wounded so badly as to be taken from the field for dead, and was sent home. For three months he lay between life and death, during which time the term of his regiment expired. His health, from the nature of his wounds, was such as to incapacitate him for further field duty, and yet wishing still further to serve his country, his friends applied for and he was quickly appointed a commissary of subsistence with the rank of captain, and in this capacity he served until the conclusion of the war.

Colonel McCullough was a man respected and beloved by his command, and he never hesitated to cheerfully share their privations and hazards. Where danger was the most imminent there he recognized his post of duty, and it was there he was ever to be found. He possessed the esteem and confidence of his fellow-citizens to a full degree in every relation of life which he assumed.

On his returning again to civil pursuits, he started a shoe manufactory in Wilmington and was very successful. Ever since the war he was a constant sufferer from his wounds, which culminated in blood-poison and eventually caused his death November 23, 1885.

Surgeon David W. Houston left the regiment July 1, 1863, when he was advanced to the position of medical director of the Second Army Corps, which he filled with distinction. Dr. Phil. M. Plunkett succeeded him as regimental surgeon.

Sergeant-Major W. H. Brady became adjutant July 4, 1862, and served in that office until after the battle of Gettysburg. In that engagement he was wounded. He subsequently became an aid on Gen. Barlow's staff and served as such until June 22, 1864, when he was taken prisoner at Petersburg and was not exchanged until March 1, 1865.

John Smith

DEPARTMENT OF THE ARMY

[illegible][illegible][illegible]

UNITED STATES DISTRICT COURT, Southern District of New York
APPROPRIATELY FILED AND INDEXED

After having been in contact with the Navy, he was able to find employment, serving as a pilot. He then went to a lumber mill and started work at St. John's, Cape Breton. During the war, he worked in which he subsequently engaged in until he died.

When the Civil War broke out and I enlisted at once, my first assignment was as a private in the 10th Cavalry. I fought in the Indian wars, and then joined the Second Regiment as captain of Company E. This regiment was decorated for its gallant record, and Colonel McIntosh gave me the honor of leading our men from the day it went to war. In every engagement he bore himself with courage and gallantry, and participated in almost all of the battles of the Army of the Potomac. In the course of his service he was wounded on three occasions.

In February 1864, he was promoted to captain in the 1st Cavalry. May he was made colonel and assigned to the 1st Cavalry. Has been made a full Antislavery Agent. He is now in the 1st Cavalry. A personal letter of congratulatory nature.

At Petersburg he was wounded severely in the leg, taken from the field for dead, and was sent to the Florence hospital, but before he was discharged he was engaged which gave the term of his contract. In strength, from the nature of his wounds, he was as unable to continue him for further military service as to still further to serve his country. His country needed for him he was quickly appointed as necessary of subsistence with the rank of Major. In this capacity he served until the close of the war.

Colonel Macdough was a man of great energy, and his command, and the men under it, were then privations, and the winter was the most tormentful of his life. His post or bivouac was there all winter. He passed the winter of 1862-3 following him to a fine degree of wear and tear which he summed,

On his return to an active political life, a stroke of fate in Wilmington was successful. Later, during the war, he was shot from his wounds, which caused a permanent and eventually caused him to die in 1877.

Surgeon David W. Houston left the U. S. Army, where he was advanced to the rank of major, to the Second Army, and filed with distinction. Dr. Ph. M. D., completed his postgraduate studies at

Second Lieutenant Major W. H. Bailey, Jr., July 1, 1912, was served in the same capacity at Glatferry, Ia. In that capacity he was killed. He subsequently became a flight instructor and served as such until 1917 when he was taken prisoner in France and not exchanged until March 1, 1919.

Peter McTearnaugh

Lieutenant Thomas M. Wenie, of Company A, was wounded at Fredericksburg December 13, 1862, which unfitted him for active duty. He was then ordered to take command of the provost guard at Wilmington, where he remained until the close of the war, when he received a commission in the United States army. The officers of the regiment were all brave men and many promotions were made, as will be seen by reference to the muster-out rolls.

On July 1, 1864, the work of mustering out the regiment began, after those men who had been added as recruits were transferred to the First Regiment. Companies A and B were mustered out at Wilmington July 1, 1864; Companies C, D, F and G at City Point, the same day; Company H, near Petersburg, August 12, 1864; Company I, at the same place, September 14, 1864; and Company K, on October 1, 1864.

At the Union State Convention, held in the summer of 1863, it was resolved that the First and Second Delaware Regiments should be provided with new battle-flags, and Samuel M. Harrington, Jr., of New Castle County, Henry W. Draper, of Kent County, and Jacob Moore, of Sussex County, were appointed to carry out that purpose. They solicited funds from the loyal people of the State and procured two beautiful blue flags, trimmed with orange-colored fringe, which were ready for presentation in November, 1863. On one side of the flag was the figure of an eagle, on the other the names of the battles in which the regiment was engaged. After the close of the war these flags were placed in care of the Historical Society of Delaware, which has since preserved them.

Third Regiment Volunteer Infantry.—The work of forming the Third Regiment of Volunteers for the term of three years was begun late in 1861, but was not actively pushed until the spring of 1862. As many of the men were from the central and southern parts of the State, a rendezvous was established at Camp Fisher, near Camden, where the recruits were drilled and prepared for service in the field.

When the regiment left camp its organization was as follows:

Col., Wm. O. Redden.
Lieut.-Col., Samuel H. Jenkins.
Major, Arthur Maginnis.
Surgeon, Wm. Marshall.
Asst. Surg., Thomas E. Dawson.
Chaplain, Thomas W. McClary.
Adjutant, Wm. R. Aldred.
Q.-M., Edmund Townsend.
Q.-M.-S., Ennal Robinson.
Com.-Sergt., Edwin Wood.
Hospital Steward, John C. Hutton.

Company A.

Capt., Fred. Hackett.
1st Lieut., Alfred D. Vandever.
2d Lieut., Wm. H. Lancashire.

Company B.

Capt., James B. Marr.
1st Lieut., James A. Haughey.
2d Lieut., Wm. Gallagher.

Company C.

Capt., Wm. B. Dorrell.

1st Lieut., Philemon Green.
2d Lieut., Robert Spurge.

Company D.

Capt., Levin B. Day.
1st Lieut., George W. Joseph.
2d Lieut., Purnell I. Pettijohn.

Company E.

Capt., William H. Plunkett.
1st Lieut., Benj. F. Hutchinson.
2d Lieut., William D. Sparks.

Company F.

Capt., William J. McKaig.
1st Lieut., A. L. Anderson.
2d Lieut., Daniel Clifton.

Company G.

Capt., James L. Quigg.
1st Lieut., Osbourn Watson.
2d Lieut., John H. Collins.

Company H.

Capt., Thomas Draper.
1st Lieut., John H. Cade.
2d Lieut., Horace A. Lewis.

Company I.

Capt., James E. Stewart.

1st Lieut., Mahlon H. Preston.
2d Lieut., George C. Webb.

Company K.

Capt., James H. Barker.
1st Lieut., Richard E. Smith.
2d Lieut., George W. Scott.

Colonel Redden resigned in January, 1863, and in March, Samuel H. Jenkins was promoted colonel, Capt. William B. Dorrell become lieutenant-colonel March 20, 1861, serving until he was killed at Petersburg, June 18, 1864. Major Maginnis was succeeded in his office by Capt. James B. Marr, and he in turn by Capt. Frederick Hackett, March, 1863. Capt. James E. Bailey was last promoted major, and was fatally wounded at Hatcher's Run, Feb. 6, 1865.

The regiment moved from Camp Fisher the latter part of May, 1862, and proceeding to Harper's Ferry, was there engaged in battle the 28th of that month, intercepting the northward march of Stonewall Jackson. Thence it was successively engaged at Sulphur Springs, Chantilly and at Antietam, Md., September 17, 1861. After the latter battle the regiment moved to Frederick City, Md., where it performed garrison duty nearly a year, next being stationed at the Relay House, near Baltimore. In the spring of 1864 the regiment became a part of the Third Brigade, Second Division, Fifth Army Corps, and participated in all the movements of that army. At the battle of Cold Harbor, June 2, 1864, Adjutant Purnell I. Pettijohn was killed, and on the 18th of the same month Lieut.-Col. Wm. B. Dorrell fell while leading a charge on the enemy's works. On the 26th of June, Capt. Stewart, of Company I, was wounded. It was also in the battles before Petersburg, July 30th and Weldon Railroad, August 18 to 21, 1864, invariably acquitting itself so as to reflect credit upon the State and the Union which it served. Its battle-flag, presented by Major-General Henry Du Pont, when it went into service, was completely riddled by the balls of the enemy, so that in the fall of 1864 but a remnant was left of it, and the tattered ensign was returned to the donor, when new colors were supplied.

After the surrender of Lee the regiment marched to Arlington Heights, where it lay several weeks. Its recruits were transferred to the First Delaware and those who had enlisted in the earlier stages of its organization were mustered out June 3, 1865, proceeding home with the Fourth.

Fourth Regiment Volunteer Infantry.—The organization of this regiment of three years' men was begun early in June, 1862, those first enlisted being mustered at Wilmington by Col. A. H. Grimshaw. In the latter part of the same month the men went into camp at Brandywine Springs, where they were drilled and formed into companies. The regiment was fully organized in September, 1862, when the officers were:

Col., A. H. Grimshaw.
Lieut.-Col., C. Carroll Tevis.
Major, Charles E. La Motte.

Adjutant, Wm. H. Cloward.
Q.-M., John J. Toner.
Surgeon, J. B. Lyons.

Chap.,¹ Wm. H. Fries.
Sergt.-Major., Wm. H. Poulston.
Q.-M.-Sergt., Edward Jeffries.
Com.-Sergt., John Armstrong.
Hosp. Stew., Wm. Brown.

Company A.

Capt., Andrew J. Williams.
1st Lieut., Evan C. Stotzenburg.
2d Lieut., Albert Price.

Company B.

Capt., Moses B. Gist.
1st Lieut., William A. La Motte.
2d Lieut., Pierce Nields.

Company C.

Capt., Frank McCloskey.
1st Lieut., Wm. C. Scott.
2d Lieut., John H. Townsend.

Company D.

Capt., George W. Curry.
1st Lieut., John R. Van Loan.
2d Lieut., Joseph H. Wheeler.

Company E.

Capt., John C. Harper.
1st Lieut., D. E. Buckingham.
2d Lieut., John H. Carson.

Company F.

Capt., Daniel H. Kent.
1st Lieut., Henry Gawthrop.
2d Lieut., Wm. Stotham.

Company G.

Capt., Wm. H. McClary.
1st Lieut., Wm. H. Burnett.
2d Lieut., Aaron P. Osmond.

Company H.

Capt., Thomas H. Reynolds.
1st Lieut., Hzekiah Cullen.
2d Lieut., Wm. Warner.

Company I.

Capt., Harlan Gause.
1st Lieut., S. Rodman Smith.
2d Lieut., Richard H. Webb.

Company K.

Capt., Joshua S. Valentine.
1st Lieut., Thomas H. Challenger.
2d Lieut., Eldridge F. Yardley.

Most of the men in the foregoing companies were from New Castle and Kent Counties, except Company C, which contained a large number of ex-prisoners from Fort Delaware, who had taken the oath of allegiance to the Union.

In October, 1862, the regiment left Brandywine Springs and marched to the Kennett Pike, where the Third Pennsylvania Reserves were relieved, and Camp Du Pont formed to guard the powder-mills in that neighborhood. This camp was broken November 10th, in a severe snow-storm, in which the regiment proceeded to Wilmington and was quartered in Pusey's factory until the following day, when it was removed to Arlington Heights and soon after to Camp Vermont, four miles below Alexandria.

The regiment remained in winter-quarters until May, 1863, when it made a feint movement towards Richmond under Gen. E. D. Keys. It remained on the Chickahominy until July 5, 1863, when a retrograde march was made down the Peninsula—almost eighty miles in a little more than two days. Lieut.-Col. Tevis having resigned to form a cavalry regiment in Maryland, Major Charles E. La Motte was promoted to that position, and Capt. Moses B. Gist was promoted as major. Subsequently, on Col. Grimshaw's resignation in the latter part of December, 1864, La Motte was promoted to the rank of colonel. This position he retained until the regiment was mustered out, although later on detached duty.

In January, 1864, the regiment went into winter-quarters at Fairfax Court-House and remained at that place until May 4, 1864, when it moved to Rappahannock Station. Subsequently it moved to Port Royal and embarked at that place May 28th and was engaged in the battle of Bethesda Church, June 2, 1864. In this engagement Lieut. Richard H. Webb, of Company I, was killed and twenty others were killed or wounded. The Fourth was in the movement on Petersburg, June 17th and 18th, and sustained heavy losses, nearly one-third of its men being disabled, Capt. Reynolds killed and Col. Grim-

shaw wounded. In the engagements which followed, the regiment was aggressive in its movements upon the enemy, and was frequently in the advance, as part of the Third Brigade, Second Division, Fifth Corps. Its losses from all causes in 1864 were one hundred and eighty-nine men. In 1865 the regiment was in the general engagements of Rowanty River, White Oak Roads, Hatcher's Run, Five Forks and Appomattox Court-House. In the former affair, Sergeant Alpheus Wilson, of Company F, captured thirteen men; but in the battle of White Oak Roads that brave officer lost his life, and Captains Stotzenburg and Challenger were taken prisoners. In the battle of Five Forks, April 1, 1865, Capt. Wm. H. McClary was in command of the decimated ranks of the regiment, and being killed, the command passed to Capt. D. E. Buckingham. The number of available men was now very small, so that at Lee's surrender but sixty-three men were in line. The regiment marched to Arlington Heights, where the recruits were transferred to the First Regiment. The original members remaining were mustered out June 3, 1865, and reached Wilmington June 6, 1865, where a hearty welcome awaited them, and a reception was tendered at the City Hall, and a collation was served at the Institute. Speeches of welcome were made by Mayor Maris, Revs. Wiswell and Quigley, Capt. J. S. Valentine, in behalf of the Fourth, replying. On the 7th the men were paid off and dispersed to their homes; but on the 22d of June, 1865, the Fourth and other disbanded troops were again given an enthusiastic reception at Newport, Chaplain Tull and Col. A. H. Grimshaw being the speakers.

Fifth Regiment Volunteer Infantry.—This regiment was organized under the call of the President, August 4, 1862, for three hundred thousand nine-months' men. Most of its members were enlisted in October and November, 1862, but remained in civil life, subject to being ordered into active military service. The companies were equipped, and assembled at their armories for instruction twice per week. These companies were all from the northern part of the State. The regiment was first called on to perform active duty June 20, 1863, when five companies were ordered to Fort Delaware to strengthen its garrison. The remainder of the regiment was ordered to Perryville, Md., the following day, to relieve a New York regiment, but soon after joined the First Battalion at Fort Delaware. The departure of these men drew heavily upon all classes of the people of Wilmington, but was especially noticeable in the case of the Scott Methodist Episcopal Church of that city. It was deprived of most of its male members, among the soldiers of the Fifth being six class-leaders, twelve Sabbath-school teachers and seven trustees. Such patriotism deserves to be noted.

The regiment did good service until the 6th of August, 1863, when it returned to Wilmington and was mustered out August 6 to August 10, 1863.

The Sixth Regiment Volunteer Infantry was also

¹ The Rev. William T. Tull, succeeded him.

composed of nine-months' men, who were mainly from the southern part of the State, the regiment being organized largely through the efforts of Colonel Jacob Moore, of Sussex County. The conditions of enlistment were like those of the Fifth, and like that regiment, it was not called into active service until the summer of 1863. On the 27th of June the commander of the Sixth, Colonel Wilmer, received orders to march with his command, and left the State for Havre de Grace to perform garrison duty on the Susquehanna. The regiment was very strong, having eight hundred and seventy-seven enlisted men and forty-two commissioned officers. Subsequently the Sixth was also ordered to Fort Delaware, and remained there until August 23, 1863, and the week following, when all the companies had been taken to their homes in Kent and Sussex Counties, except Company I, which was discharged soon after. These men were principally from the rural districts, and it was in behalf of their neglected interests that Governor Cannon issued his proclamation, July 1, 1863. Their return home at this time enabled them to resume their interrupted occupations in time to prevent much suffering in their families.

Seventh Regiment Volunteer Infantry.—This body was organized for thirty days in July, 1864, and the troops were known as "Emergency Men." The regiment performed garrison duty along the Baltimore and Ohio Railroad in Maryland, being stationed mainly at the bridges, whose destruction was threatened. No enemy was engaged in battle; but the duty assigned was faithfully rendered. The regiment returned to Wilmington August 11, 1864, when it was mustered out.

Eighth Regiment Volunteer Infantry.—The enlistments for this body were for the term of one year, and were made under the call of July 18, 1864. The organization of companies was begun in September and the men rendezvoused at Camp Smithers, on the Concord Pike, in Brandywine Hundred. Before the regiment could be filled up, it was ordered to move as a battalion of four companies Lieutenant Charles E. Evans being the regimental quartermaster. Captain J. R. Holt and Captain John Richards, as brevet officers, commanded the Eighth, the latter at the close of the service. On the 8th of October, 1864, the battalion left Wilmington for City Point, Va., where it was engaged in erecting fortifications. The men received a furlough to come home to vote, but returned to go into winter-quarters as part of the same brigade as the Fourth Regiment, and were in the same general movements and engagements around Petersburg, in the spring of 1865, as that regiment. It marched with the Third Brigade to Arlington, where sixty of the recruits were transferred to the First Delaware. Though in service but seven months, the battalion rendered very efficient aid, and had a varied, active experience, beyond most of the soldiers of the State. It was mustered out June 6th, and finally discharged, at Wilmington, June 10, 1865, there being in the bat-

talion at that time about one hundred and eighty men. On the 8th of June the ladies of Wilmington gave the returned soldiers a splendid collation at Institute Hall, where the battalion was quartered.

Ninth Regiment Volunteer Infantry was composed of one hundred days' men. Among those active in its organization was William Y. Swiggett, who was commissioned major September 13, 1864. The regiment was stationed at Fort Delaware to guard Confederate prisoners, and served about a month longer than its term of enlistment. It was mustered out, at Wilmington, January 23, 1865. Most of the men were from the northern part of the State.

First Delaware Cavalry.—Soon after the breaking out of the war battalions of cavalry were organized as Home Guards in different parts of the State, among them being the Red Lion Mounted Guards and the Delaware Light Dragoons. These companies, so readily organized, made the formation of a cavalry regiment as easy as possible, but no determined effort in that direction was made until the summer of 1862. On the 13th of August, that year, Napoleon B. Knight, of Dover, was authorized to raise four companies of cavalry in the State, and the work of securing enlistments was at once begun. Later, September 9, 1862, the Hon. George P. Fisher was commissioned by the War Department to raise the First Regiment of Delaware Cavalry, to consist of twelve hundred men and to include Knight's Battalion. This regiment was under instruction at Camp Smithers, near Wilmington, Brandywine Hundred, in the fall and winter of 1862.

On the 17th of February, 1863, the First Battalion, under the command of Major Knight, left this camp and proceeded overland to Drummondtown, Va., to join the brigade of General Lockwood. The other battalions followed later in the season, and the service of the regiment was along the Potomac, aiding in intercepting the projected incursions into Pennsylvania and Delaware. In March, 1865, its headquarters were at Monocacy Junction, Md., from whence detachments were sent to various points in the State, including Baltimore and Annapolis. Detachments aided in the search of the assassins of President Lincoln, and Sergeant Gemmill, of Captain Townsend's Company, captured and brought into camp at Relay House, Md., George A. Atzerott, one of the accomplices of J. Wilkes Booth.

There were many transfers from the lower companies of the regiment to the higher companies, and the ranks were also filled up with recruits which complicated the individual history of the several companies. A number served until the close of the war, but its men were mustered out by detachments, those at the Relay House on June 6, 1865, and those at Baltimore June 30th, the same year. The first detachments were paid off at Wilmington, June 8th, and the latter July 3, 1865, when the men were returned to their homes.

During the later stages of the war several indepen-

dent companies of cavalry were raised for service in emergencies. Of these the Purnell Cavalry was at Wilmington in 1863 and 1864, and Captain Milligan's cavalry was mustered out at Wilmington August 15, 1864. Its service was similar to that of the Seventh Regiment of Infantry.

First Delaware Battery, Field Artillery.—Authority to raise a company of field artillery was given to Capt. B. Nields early in August, 1862, and on the 21st of that month the company was so far formed that it went into camp at Welden's Woods, near the "Blue Ball Inn," in Brandywine Hundred. After being instructed several months, the battery left Wilmington for Washington December 20, 1862, and served in the East in 1863. Subsequently it was in the Department of the Gulf, but in January, 1865, was transferred to the Department of Arkansas, and Captain B. Nields was appointed chief of artillery and ordnance of that department. The battery was stationed at Duval's Bluff until the spring of 1865, when it was taken to Little Rock, from which place it proceeded to Wilmington, reaching the latter city July 1, 1865. The men were then paid off and finally discharged two days later.

Second Delaware Battery, Field Artillery.—This company was raised under authority granted in June, 1863, to Capt. John B. W. Aydelott and First Lieut. Samuel D. Paschall, who opened a recruiting office in the City Hall, Wilmington. Its service in the field was not active, the battery being assigned to the defense of Wilmington the latter part of 1863 and the early part of 1864.

Crossley's Artillery.—In the emergency of 1863 Capt. Thomas Crossley received authority to raise a company of fifty artillerymen to serve not over ninety days, along the Wilmington and Baltimore Railroad. These men were enlisted at Wilmington in June and July, 1863, and the battery was in service as indicated until its muster out, September 30, 1863.

Captain Ahl's Heavy Artillery embraced a battery at Fort Delaware, whose members were ex-Confederates who had taken the oath of allegiance to the Union. The service was faithfully performed until the muster out of the men, July 25, 1865. Nearly the entire company was composed of those who had been taken to Fort Delaware as prisoners.

THE GRAND ARMY OF THE REPUBLIC.—This is an association of the soldiers and sailors of the Civil War, organized into State Departments, which, in turn, are composed of local posts. The order was founded in the winter of 1865-66, at Springfield, Ill., by Dr. B. F. Stephenson, who had been the surgeon of the Fourteenth Illinois Infantry Regiment, and it is in its practical operation much the same as any other secret society. Its objects are comprehended in the motto of the army: "Brotherhood, Charity and Patriotism." It aims to preserve and strengthen the fraternal feelings which bind together those who were united to suppress the Rebellion, and to perpetuate the memory of the dead patriots of the Union; to

protect and aid the needy soldier, and the widows and orphans of those who have fallen; to maintain true allegiance to the United States of America, its Constitution, and to discountenance whatever would weaken or impair the efficiency or permanency of the free institutions of our country; and to encourage the spread of justice, equal rights and universal liberty. The consequent terms of admission to membership are service, loyalty and the possession of those attributes which can awaken the feelings of brotherhood among the members of the order. Having such commendable purposes and such a large field to cultivate, it is not surprising that the order has flourished even beyond the anticipations of those who were instrumental in giving it life and character.

The first post, known as No. 1, was mustered at Decatur, Ill., April 6, 1866, and in less than twenty-two years the membership of the order has been increased to 372,674 comrades. The additions in a single year have been 47,000 members, whose zeal and patriotism is the hope of the order.

The charitable work of this aggregated body of men involves the expenditure of about half a million dollars yearly, whose distribution has cheered the homes of thousands made dependent by the fortunes of war.

Although in no sense a political body (its members belonging to all parties), the order has nevertheless become a potent factor in determining or modifying legislation bearing upon pensions or other matters intended to alleviate the condition of those who imperiled their lives in defense of our common country.

The commanders-in-chief of the Grand Army of the Republic have been Stephen A. Hurlbut, John A. Logan, Ambrose Burnside, Charles Devins, John F. Hartranft, J. C. Robinson, William Earnshaw, Louis Wagner, George S. Merrill, Paul Van Der Voort, Robert B. Beath, John S. Kountz, S. S. Burdett and Lucius Fairchild. Dr. Stephenson, of Illinois, may be properly added to the above list, as he was the provisional commander-in-chief in 1866.

To Illinois also belongs the credit of having the oldest organized State Department, of which Gen. John M. Palmer was elected commander in July, 1866. Other State Departments were organized soon after, and in the early history of the Grand Army two posts were mustered in the State of Delaware. A lack of interest prevented the successful maintenance of the order at that time, and after a few years, work was suspended and no record of the transactions preserved.

A second effort to create a State Department in Delaware was more successful, and under its jurisdiction fourteen posts were maintained in the fall of 1887. These posts were named after some deceased Union man, either in civil or military life, in accordance with the usage of the order, and were as follows:

| | |
|------------------------------------|-------------|
| No. 1, Gen. Thomas A. Smyth..... | Wilmington. |
| No. 2, Admiral S. F. Du Pont | Wilmington. |
| No. 3, Gen. A. T. A. Torbert..... | Dover. |
| No. 4, Charles Sumner..... | Wilmington. |
| No. 5, Capt. E. S. Watson..... | New Castle. |

| | |
|---------------------------------|----------------|
| No. 6, Major Wm. F. Smith..... | Dover. |
| No. 7, James A. Garfield..... | Milford. |
| No. 8, David L. Striker..... | Newport. |
| No. 9, Thomas M. Reynolds..... | Pleasant Hill. |
| No. 11, Gen. David Woodall..... | Wyoming. |
| No. 12, Gen. D. B. Birney..... | New Castle. |
| No. 13, Gen. U. S. Grant..... | Wilmington. |
| No. 14, Col. J. W. Andrews..... | Odessa. |
| No. 15, Gen. John A. Logan..... | Magnolia. |

Sketches of these posts may be found in the histories of the localities where they are located.

Under the present organization, the first Department Commander of Delaware was W. S. McNair, of Post No. 1, in Wilmington. The successive commanders have been Daniel Ross, of No. 1; J. Wainwright, of No. 2; Charles McCrary, of No. 11; J. S. Litzenburg, of No. 2; John M. Dunn, of No. 1. In 1887 the principal department officers were the following: Commander, John E. Mowbray, of No. 3; Senior Vice-Commander, Edward McDonough, of No. 5; Junior Vice-Commander, E. F. Wood, of No. 11; Chaplain, Rev. Absalom Carey, of No. 11; Medical Director, Dr. William N. Hamilton, of No. 14. The department headquarters were at Dover.

DELAWARE IN THE REGULAR ARMY, AND BREVET PROMOTIONS.—Early in the war a number of the citizens of the State entered the regular army as officers, the following receiving appointments in June and July, 1861: Joseph M. Barr, John V. Haughey, Richard H. Walworth, R. E. A. Grofton, John P. Wales, Robert S. La Motte, captains (A. J. Pleasanton had previously been commissioned as captain); Henry A. Du Pont, Thomas J. Bailey, Wm. J. Fetterman, Albert T. A. Torbert, first lieutenants; George B. Rodney, Jr., Henry C. Robinette, James Cullen, Wm. E. Appleton, Wm. J. Fisher and John B. Brinckle, second lieutenants.

General Henry H. Lockwood was the first brigadier-general of volunteers from Delaware, being appointed in the summer of 1861.

On the 5th of September, 1865, Adjutant-General Edward D. Porter announced that the following brevet appointments had been conferred on volunteer officers from the State of Delaware by the President of the United States: Brevet Brigadier-General, Daniel Woodall, colonel First Delaware Volunteers; Brevet Lieutenant-Colonel, Daniel H. Kent, captain Fourth Delaware Volunteers; Brevet Lieutenant-Colonel, Harlan Gause, captain Fourth Delaware Volunteers; Brevet Major, D. Joseph, captain Third Delaware Volunteers; Brevet Major, B. F. Butler, captain Third Delaware Volunteers; Brevet Major, Henry Gawthrop, first lieutenant Fourth Delaware Volunteers; Brevet Major, E. T. Yardley, first lieutenant Fourth Delaware Volunteers; Brevet Major, John Richards, captain Eighth Delaware Volunteers; Brevet Captain, William H. Cloward, first lieutenant, Fourth Delaware Volunteers; Brevet Captain, William H. Bird, first lieutenant First Delaware Volunteers; Brevet Captain, J. M. Bryan, first lieutenant First Delaware Volunteers.

THE UNION LEAGUE gave the loyal citizens of

Wilmington an opportunity to cultivate patriotic sentiments, as well as affording a means for developing social and fraternal feelings. On the 19th of March, 1863, the League opened its rooms in the Saville Building, Sixth and Market Streets, with a display of national flags and other patriotic devices. Dr. J. Franklin Vaughan was appointed president of the meeting; John H. Graham, Samuel Biddle, Daniel James, John P. McLearn and John W. Hawkins, vice-presidents. Stirring Union speeches were made by S. M. Harrington, Jr., Hon. Edward G. Bradford and Capt. John F. Allen, of Sussex County. The Wilmington Glee Club, H. F. Pickles, leader, sang patriotic airs, greatly inspiring a large gathering of citizens. The League subsequently held other meetings which had important bearings on the war.

BATTLE-FIELD MONUMENTS AT GETTYSBURG.—Delaware generously and fittingly recognized the valor of her soldiers on the memorable battle-field of Gettysburg, when its Legislature passed a joint resolution, April 9, 1885, which authorized the appointment of committees to locate and erect monuments showing what positions its troops occupied in the great battles of July, 1863. Under the provisions of this act, Major John T. Dent, Capt. J. Parke Postles and Lieut. John M. Dunn, of the First Regiment; Lieut-Colonel Peter McCulloch, Surgeon Philip H. Plunkett and Lieut. William H. Brady, of the Second Regiment; and the legislative committee, Enoch Moore, S. D. Roe, William H. Cooper, M.D., T. F. Armstrong and James Virden, visited Gettysburg June 18, 1885, and selected proper sites for the monuments. That for the First Regiment was chosen just on the left of the Bryan House, where the Confederates converged and their columns overlapped in the desperate charge of July 3, 1863. It was at this place that the regiment covered itself with glory when it led the counter-charge which destroyed the rebel columns and practically ended the battle. A point beyond the Bliss House was selected as a place for the tablet to mark the most advanced position of the regiment on July 2d.

A site for the monument of the Second Regiment, was chosen near the Rose House, the extreme left and front of the Union army, July 2d, when Brooks' brigade made a gallant charge to that point. The tablet was to be placed in front of the J. Hammerbach House, where the Second Regiment was also engaged on July 2d.

The contract for making the monuments was awarded to Thomas Davidson, of Wilmington, and the material selected was the Brandywine blue stone, so abundant in the northern part of New Castle County. An illustration of the monument of the First Regiment is given, the form and design of the Second Regiment being similar, which enables the reader to obtain some idea of their beauty and construction. The lower base is four feet six inches square and the monuments stand seven feet six inches high. The inscriptions are apparent in the cuts, and tell the story of Delaware's deeds in a terse manner.

These monuments were appropriately dedicated June 10, 1886, when the foregoing committees, the Governor, secretary of State and a number of representative citizens, proceeded to Gettysburg on that mission. The erection of the monuments was approved, and appropriate addresses were made, reciting the part that the troops of Delaware took in that battle. In behalf of the First Delaware, Lieutenant John M. Dunn, formerly color sergeant of that regiment, spoke, and

When the old Pennsylvania Bank building, which stood at the corner of Second and Lodge Streets, Philadelphia, was torn down in 1868, for the purpose of erecting the new United States appraisers' stores which occupy that site, the late Albert S. Nones, of Wilmington, who had been an officer in the First Delaware Veteran Volunteer Infantry, conceived the idea of converting the columns, which stood in front of the bank, into monuments for the heroic dead of

the War for the Union. At his suggestion, the Hon. Charles O'Neill, member of Congress from the Second Philadelphia District, presented a bill authorizing the use of the columns for such a purpose, and secured its passage through Congress. Plans for a monument were now drawn by A. B. Mullett, supervising architect, Washington, D. C., and the citizens of Wilmington set about to provide a site and base for the structure. A triangular piece of ground was secured at the apex formed by Delaware Avenue, Broome and Fourteenth Streets, where was erected the only soldiers' monument in the State of Delaware. The shaft rests upon the base which has been appropriately inscribed to the defenders of the Union, and is surmounted by a ball, upon which is perched an eagle throttling a serpent. The monument is both attractive and substantial and was unveiled with imposing ceremonies, May 30, 1871. General O. O. Howard, of the regular army, was the orator of the occasion.

Unfortunately, a debt for its construction was allowed to remain upon the monument, so that in the course of years its sale by the sheriff was threatened. Again Eli Crozier, who had been active in the work so far done, came to the rescue and by his patriotic efforts succeeded in collecting enough money to place the monument upon a firm financial basis, and, on Memorial Day, May 29, 1880, it was formally turned over to the Soldiers' Monumental Association. At that time that

for the Second, a similar duty was performed by Adjutant William H. Brady. The Hon. Enoch Moore delivered the monuments to the Battle-Field Memorial Association, into the membership of which the State by this act entered. These addresses and the work of the committee were fully reported, and have become a part of the records of Delaware. The entire expense to the State to thus perpetuate the loyalty and heroism of her sons was \$2000. A stirring oration was also delivered by George V. Massey.

Soldiers' and Sailors' Monument at Wilmington.—

body was composed of the following:—Washington Jones, president; Robert C. Fraim, secretary; Joshua S. Valentine, treasurer; Henry R. Bringham, Joseph K. Adams, N. R. Benson, J. Parke Postles, Samuel Harlan, Wm. McConnell, George G. Lobdell, Eli Crozier, William A. La Motte, James C. Johnson, Isaac S. Elliott, Edward L. Rice, Sr., John R. Marr, trustees. The exercises on this occasion were of an unusually interesting nature and were participated in by Companies A and B of the State Militia, General Thomas A. Smyth Post, No. 1, and Admiral S. F.

Du Pont Post, No. 2, of the Grand Army of Republic, as well as by a large concourse of the citizens. Since 1880 the monument has been held in trust by the

SOLDIERS' MONUMENT, WILMINGTON.

Monumental Association and it and the grounds are under the care of the committees appointed by the Grand Army Posts of Wilmington.

CHAPTER XIX.

DELAWARE AFTER THE CIVIL WAR—1865–1888.

THE events in the history of Delaware during the period succeeding the war down to the year 1888 are fixed so firmly in the memory of Delawareans that it is necessary to dwell upon those only which are of particular interest as a matter of historical record. Our narrative, therefore, for this period will be brief and lacking in the detail which, in the earlier and less familiar years, was indispensable to a thorough knowledge of the State's affairs, its progress and its public men. Pains have been taken, however, to close the chapter with a complete and valuable statistical summary of Delaware's resources—natural and industrial. To the general reader these statistics may seem tedious, but to a business man, whose mission is to collect facts and weigh their relative value statistics are always welcome. They are the atmosphere in which he moves, the data on which he bases his calculations, and anything which will help him in his business or suggest avenues to which he can turn with profit is more eagerly perused than would be well-rounded sentences, which attract without leaving behind any satisfactory impression. This, then, must be the apology in the present chapter which deals occasionally with statistics and figures, as they are necessary in order that a full understanding may be had of the history, the trade and commerce and manufactures of Delaware.

At the close of the war there was a bitter struggle in the State between the Democrats and Republi-

cans for the choice of State officers, members of the Legislature and a member of Congress. The election took place on the second Tuesday of November, 1865, the total vote cast being eighteen thousand four hundred and eight. For Governor, Gove Saulsbury, the Democratic candidate, received nine thousand eight hundred and ten, and James Riddle, the Republican candidate, eight thousand five hundred and ninety-eight. For Congress, J. A. Nicholson, Democrat, received nine thousand nine hundred and thirty-three, and J. L. McKim, Republican, eight thousand five hundred and fifty-three. The Legislature chosen was divided as follows: Senate, Democrats six; Republicans three. House, Democrats fifteen; Republicans six.

Gove Saulsbury, M.D., Governor of Delaware, was born in Mispillion Hundred, Kent County, Del., May 29, 1815. He was the third son of William Saulsbury, who was a leading man in his county, much respected and honored by his neighbors and fellow-citizens. His mother, the daughter of Captain Thomas Smith, was a woman of great force of character and remarkable piety. There were born to them six children, two of whom—one of the present United States Senators from Delaware and the present chancellor—survive. After an academic education and a partial course at Delaware College, Dr. Saulsbury studied medicine, and in 1842 received the degree of "M.D." from the University of Pennsylvania. The subject of his thesis was "Rheumatism." He commenced the practice of his profession in Dover, Del., and energy and application, added to natural aptitude for his work and sound professional acquirements, soon brought to him the fullest measure of success in his calling.

The exposure and hardship incident to the life of a physician in the country, being accepted with cheerfulness, only served to knit into his physical frame more than ordinary endurance and to develop him into a large, well-built man of commanding presence. The long and lonely rides which he took almost every day over the country afforded that time for reflection so essential to real mental growth and so constantly lacking in the life of to-day, particularly in cities. Being constantly brought in contact with the people of his county, his acquaintance was rapidly extended, and being naturally both a student and good judge of human nature, he acquired a large store of information about the individual members of the society in which he moved from day to day.

The very large participation in politics of physicians, more particularly in the rural districts of the State, has been noticeable for many years in Delaware, and Dr. Saulsbury was no exception. He always took a deep interest in political affairs; but it was long manifested only in the capacity of a private citizen, and for twenty years he devoted himself exclusively, assiduously and successfully to his profession. The current of his life was then, by circumstances wholly unexpected, greatly changed.

In 1862 he was elected to the State Senate, and at the second session of his term, in January, 1865, was elected Speaker of that body. The Legislature of 1863 was Democratic in both branches, while the Governor, William Cannon, was a Republican, having changed his party relations, in common with many others, during the Civil War. In Delaware, as in the Border States generally, there was at that period intense party feeling, and bitter animosities were aroused by circumstances still well remembered by those who were then old enough to apprehend them. It was under such conditions that Dr. Saulsbury commenced his public life. He was the acknowledged leader in the General Assembly, and was followed unhesitatingly. The sessions in which he sat there were much occupied with a political struggle between the Governor and the Legislature, and the Legislature of 1863 kept itself in session by adjournments from time to time, in order to be prepared for any emergency. Dr. Saulsbury, as a Senator, was chairman of the joint committee to inquire into the interference of troops with the election, and he conducted the investigation with great ability.

He was also largely instrumental in procuring the legislation providing for State aid to drafted persons to assist them in furnishing substitutes, under which the State debt was mainly created. His views on the policy of this legislation were freely expressed publicly and privately, and yet were often misrepresented. The small population of the State made it impossible to spare from the rural parts many of her citizens; she had contributed largely to the volunteer forces; the people liable to draft were seldom of sufficient means to provide substitutes. He considered it both the policy and duty of the State to aid her citizens in such an emergency.

On March 1, 1865, Governor Cannon died suddenly, and Dr. Saulsbury, by reason of his being Speaker of the Senate, became his constitutional successor. He administered the executive office with so much ability that in 1866 he was elected by the people to the office to which he had succeeded by reason of death. Thus, although a Governor is not eligible for re-election, Dr. Saulsbury administered the office for very nearly six years, from March, 1865, to January, 1871.

Both as a legislator and as the chief executive of the State, Dr. Saulsbury was an able and conscientious public servant. He brought to the discharge of his public duties a deep sense of personal responsibility never surpassed and very rarely equaled. It was the crowning excellence of his official life and a characteristic recognized by all who were brought into contact with him. An expenditure of public money which he deemed useless or unwise really grieved him; a faulty policy on any State matter, whether of omission or commission, disturbed him more than a personal loss. He had a strong will and asserted his opinions earnestly and often, as it seemed to those who differed with him, obstinately.

But they were his opinions and he took none second hand from any man.

While he was Governor, his messages were the product of his own brain, and written always by his own hand. They are equal to any in the history of the State, and are distinguished by wisdom of suggestion and force and clearness of expression. The perusal of them will show that he frequently discussed with much ability questions which would ordinarily be dealt with satisfactorily only after legal training.

While he was Governor the finances of the State were his special care, and to him his State is in no small degree indebted for the high credit which she has always had. Living in the capital, he always took an intelligent interest in legislation, and whether in or out of office he was a veritable "watch-dog of the treasury," whose effective criticism was always feared by the advocates of any questionable demand for the appropriation of the public money.

A consistent Democrat, he was a recognized leader of his party, and as such displayed so much sagacity that his counsel was not only valued but usually controlling.

At the close of his term as Governor he held no office and gradually retired from such active professional labors as he had before been engaged in. He lived quietly in Dover, never relaxing his interest in public affairs, and rendering constant and valuable service to his party and State by his advice on matters of party policy or State legislation.

He was frequently elected a delegate to the National Democratic Conventions, and in those bodies always received the recognition, which might have been expected by those who knew him at home.

Dr. Saulsbury always took an intelligent interest in the cause of education and the public-school system of the State. He was largely instrumental in founding the Wilmington Conference Academy, and its location at Dover was secured mainly by his influence. He was president of its board of trustees from the time of its organization until his death, and was also trustee of Delaware College.

As a member of the Methodist Episcopal Church, with which he united in 1843, he exercised so marked an influence, and his interest in its welfare was so appreciated, that he was selected to represent it in the General Council of Methodism in London, but his death prevented his attendance.

He had thoroughly the respect of the community in which he lived. A social and agreeable neighbor, a kind friend to the poor, warm in his attachments and affectionate in his domestic relations, he had the happy faculty of inspiring strong and enduring friendships. He was endowed by nature with a person well-formed, over six feet in height, erect and commanding, and a fine countenance, which at once commanded respect. He was married, November 1, 1848, to Rosina Jane, daughter of the late Isaac P. Smith, of Snow Hill, Md. They had five children, of whom only one, William, the youngest, survived

Gen. T. A. M.

Gove Scrubbury

him. The death of his wife, in 1874, and of his daughter two years afterwards, were afflictions keenly felt to the day of his death, which occurred July 31, 1881.

The session of the Legislature which began the first Tuesday of January, 1866, was chiefly occupied with unimportant measures. After the passage by the House of Representatives of the bill granting suffrage to the negroes in the District of Columbia, on January 22d, the following resolutions were offered in the Lower House of the Legislature, and at once adopted by a strict party vote. The resolutions also subsequently passed the Senate :

"Resolved, by the Senate and House of Representatives of the State of Delaware in General Assembly met, That we, the General Assembly of the State of Delaware, do hereby express our unqualified disapprobation of the bill lately passed by the Lower House of Congress, now pending before the Senate, conferring upon the negroes of the District of Columbia the right of suffrage, and consider the passage of such a law would be a lasting stigma and disgrace to the free white men of this country, and a sad commentary upon their intelligence.

"Resolved, Further, that the immutable laws of God have affixed upon the brow of the white races the ineffaceable stamp of superiority, and that all attempt to elevate the negro to a social and political equality of the white man is futile and subversive of the ends and aims for which the American Government was established, and contrary to the doctrines and teachings of the Father of the Republic.

"Resolved, Further, that, in our opinion, the passage of such a law by Congress is but the key-note of other wrongs and outrages to be hereafter inflicted upon the white people of the States.

"Resolved, Further, That we tender to the white people of the District of Columbia our deep and sincere sympathy for them in their distress, and denounce the act as a violation of their popular rights recently manifested by an election."

The Republican members voted against the resolutions, regarding it to be "improper for them to pass judgment on Congress for its action." Had the question then related to negro suffrage in the State, the sentiment of the Legislature, it was believed, would have been unanimous against it.

The State was out of debt at the beginning of the war, but at its close bonds amounting to one million one hundred and ten thousand dollars had been issued to meet the calls of the Federal government for soldiers. The receipts from railroad and other sources had been heretofore sufficient to meet expenditures, with a small surplus. The Governor, in his message, on January 3, 1867, urged upon the Legislature to incur no further debt until the debt then existing was paid, and approved the extension of the Maryland and Delaware Railroad, and other railroad improvements within the State as works of incalculable benefit. By the interference of the Federal government the laws of the State proved to be insufficient to punish crime committed by free negroes, and the Governor recommended the sale of this class into slavery as a punishment effecting the most salutary restraint against crime. He also urged the passage of restrictive laws against the immigration of negroes from other portions of the country, who were, with few exceptions, fugitives from justice in other States. His views of the Constitutional Amendment proposed by the Federal Congress were thus expressed: "Whatever may have been the expectation or object of Congress, the rejection of this amendment is demanded alike by every consideration of justice, patriotism and

humanity." In accordance with the Governor's recommendation, the Fourteenth Constitutional Amendment was rejected on February 5, 1867, by the following vote: House,—Yeas, 6; nays, 15.

In the latter part of the year 1866 Judge Hall, of the United States District Court, rendered a decision, releasing from imprisonment in Fort Delaware four persons who had been arrested, tried and convicted by the military authorities of the United States in South Carolina in December, 1865. The prisoners had been found guilty before a court-martial, of which General Devens was president, of having voluntarily aided in the assault made on the United States troops stationed at Brown's Ferry, South Carolina, in October, 1865. Judge Hall ordered the discharge of the prisoners on a writ of *habeas corpus*, on the ground that the military commission was without jurisdiction in the case, declaring it as his opinion that the Rebellion had ceased in April, 1865; and inasmuch as the President's proclamation, issued in June, appointing a provisional Governor for South Carolina, ordered "the district judge for the district in which that State is included to proceed to hold courts," the State was in the exercise of all its civil functions before the issuing of the order for the organizing of the commission by which the prisoners had been tried and condemned.

The Legislature held its regular biennial session in January, 1867. Among the acts passed, the most important were one for raising revenue by imposing a tax on auctioneers, those selling by samples, insurance companies, real estate agents, etc.; another, advancing the Governor's salary from \$1333.33 to \$2000 per annum; and one accepting the public lands donated to the State by the United States for the benefit of agriculture and the mechanic arts. Delaware College had been adopted as an agricultural school, and five commissioners were to be appointed by the Governor to act in conjunction with the trustees of that college. The land was to be sold, and the proceeds invested in United States bonds until applied to the purposes of the act. It was also provided that the punishment inflicted on negro and mulatto criminals should be the same as that received by whites for similar offenses. Repeated attempts have been made to establish a penitentiary, but without success. Larceny and burglary are now the only offenses punishable by whipping and pillory.

There were 1,217,927 acres of farming land in the State in 1867, of which the assessed valuation was \$29,591,198. The amount of railroad freight paid for the transportation of peaches during the season amounted to forty-five thousand dollars. In addition, immense quantities were sent by boats, of which no account was kept. At this time Wilmington was rapidly growing in size and importance. Its population was estimated at thirty thousand, and during 1867 there were erected in the city two hundred and seventy-eight houses, fourteen manufacturing establishments and three churches, at an estimated cost of

nine hundred and sixty-nine thousand dollars. The cost of maintaining the schools of the city was twenty-one thousand dollars. The right of suffrage in the State had not been as yet allowed to persons of color, and this class thus excluded numbered about three thousand five hundred. Active efforts had been made to secure equal rights to all, and a convention was held in Wilmington on the 4th of September for the purpose of promoting this object. Sundry resolutions were passed, of which the following are the most important:

"Resolved, That the theory of our government, the claims of impartial justice, the equal rights of citizens, and the loyalty and faithful services of the colored people demand that the right of suffrage be extended to them in common with all other loyal citizens; and we respectfully petition Congress to confer and secure the right at the earliest possible period of such legislation as it may deem right and appropriate."

"Resolved, That in the State of Delaware there does not exist a Republican form of government, because of the exclusion of a large number of her colored citizens from participation in the enjoyment and exercise of political rights, and because of their gross inequality of representation in the Legislature, whereby less than one-half of the citizens wield the power of the State, we hereby call upon Congress to assure us the guarantees of the Constitution of the United States in every particular."

"Resolved, That we demand the recognition by law of the entire equality of all American citizens, without regard to color, in all civil and political rights and privileges, and the protection and encouragement of the government to enable every man to occupy whatever position his virtues and intelligence may qualify him to hold."

An important decision in reference to the Civil Rights Bill was rendered in the Court of General Sessions in the October meeting. It was the case of the State against Moses Rash; it being proposed by the prosecuting officer to present the evidence of the complainant, Samuel Perry, a colored man, objection was made by the counsel for the defense that the laws of Delaware did not permit colored testimony when there are competent white witnesses.

Chief Justice Gilpin ruled that the testimony should be admitted, because he said it had been customary in his court to permit prosecuting witnesses to testify, even though they were colored; but he gave as his opinion from the bench, that the Civil Rights Bill of Congress, so far as it assumed to regulate and control the admission or rejection of testimony in this State, which was regulated by the laws of the State, was inoperative and void. Judge Wooten concurred, and Judge Wales dissented.

In 1868 the State financially was in a prosperous condition. As before stated, the debt contracted during the war amounted to one million one hundred and ten thousand dollars. The State was also liable for certain internal improvement bonds issued to railroad companies, amounting to three hundred and forty-six thousand dollars. The real and apparent indebtedness of the State in 1868 thus amounted to one million four hundred and fifty-six thousand dollars. The investments of the State at that time, consisting of bank stock and loans to improvement corporations, amounted to eight hundred and fifty thousand one hundred and fifty dollars, which, deducted from the debt, left six hundred and five thousand eight hundred and fifty dollars. The income derived from these investments was appropriated in

part to support the State government and in part to purposes of education. The amount thus applied to free schools during 1868-69 was thirty-six thousand eight hundred and sixty-seven dollars. The amount of income from all sources for the support of the government was thirty thousand three hundred and forty-nine dollars, which, with the previous balance on hand, made an unappropriated surplus at the close of the year of thirty-seven thousand seven hundred and ninety-six dollars. The principal sources of revenue to the State was the annual tax on the Philadelphia, Baltimore and Wilmington Railroad, and the tax in former years on banks. Upon the change from State to national banks, all but two had ceased to pay this tax. The tax on the railroads, although less than in previous years, was sufficient to pay the interest on the State debt. This decrease was ascribed to a diminution of passengers since the close of the war.

At a convention, held in June, to nominate delegates to the National Democratic Convention, the following resolutions were adopted:

"Resolved, That the elective franchise is a political privilege, and not a natural right, and is to be granted or withheld by the several States to their respective inhabitants as in the free, sound judgment and discretion of each State shall be deemed best for the public interest and welfare."

"Resolved, That we regard negro rule in this country, under its name of 'impartial' or 'universal suffrage,' as the vital issue against which, as the champions of a constitutional government founded on the consent of free white men, we are ever arrayed—and that our delegates to the National Convention, to be held at New York, while left to their own sound discretion in selecting worthy candidates for the presidency and the vice-presidency, are hereby instructed to vote for no candidate who is not clearly and distinctly in favor of ruling this country by the virtue and intelligence of white men only."

At a convention of the Republican party, held on April 23d, to nominate delegates to the National Republican Convention, the following resolutions were adopted:

"Resolved, That we approve the plan adopted by Congress for the reorganization of the rebel States; that its vital principle of impartial suffrage is just as well as politic, and that, in view of the action of Congress already had, as well as of natural justice, we express the hope that such an amendment of the Constitution of the United States will be made as will secure the application of the principle throughout the Republic."

"Resolved, That we give our voice to and pledge our assistance in the maintenance of the national faith and credit, insisting that in the payment of the debt, the spirit of contract shall be truly and honorably observed."

At the election for President, Andrew C. Gray, James P. Wilds and William A. Scribner, the Seymour Democratic electors, received 10,980 votes; and the Grant Republican electors received 7623—Democratic majority of 3357. The Legislature chosen at this election was entirely Democratic.

At the session of the Legislature of 1869 the Fifteenth Amendment to the Constitution of the United States was rejected by the following vote: Senate, March 17th: Yeas, Curtis B. Ellison, John G. Jackson—2. Nays, Jacob Bounds, Thomas H. Denney, Charles Gooding, John W. Hall, John H. Paynter, George Russell, James Williams, Speaker—7. House of Representatives, March 18th: Yeas, none; Nays, John G. Bacon, George F. Brady, John A. Brown, Lot Cloud, Isaac Connaway, Jacob Deakyne, William

Dean, Shepard P. Houston, Thomas J. Marvel, Philip C. Matthews, Whitely W. Meredith, Robert J. Reynolds, Peter Robinson, Albert H. Silver, William B. Tomlinson, Joseph W. Vandegrift, H. C. Wolcott, J. Hickman, Speaker—19.

There was a great improvement in the railroad facilities of Delaware in 1869. The Maryland and Delaware Railroad was completed to Easton, Talbot Co., Md.; the Dorchester and Delaware Railroad was extended from Seaford to Cambridge, Dochester Co., Md.; a branch road was constructed from Townsend station, on the Delaware River, to Massey's Cross-Roads, in Maryland; and the Junction and Breakwater Railroad was completed to its terminus at Lewes. But the most important event in the extension of railroads for the year was the completion of the Wilmington and Reading Railroad to Coatesville, a point on the Pennsylvania road and about thirty miles from Wilmington.

A Woman's Suffrage Convention was held in Wilmington in November, 1869, for the purpose of forming a State society to advocate the principles of the cause. There was a good attendance of men and women, many of whom were prominent in the movement in favor of woman's rights. The objects and sentiments of the convention were expressed in the following resolutions, which were adopted:

Believing that the "Government derive their just powers from the consent of the governed," that "all political power inheres in the people," men and women, and that "taxation without representation is tyranny," therefore,

1. *Resolved*, That we demand suffrage for the women of Delaware on equal terms with men, as their national right—because women are human beings, capable of rational choice, and tax-paying citizens of a free country entitled to a voice in making the laws they are required to obey.

2. *Resolved*, That the women of Delaware need suffrage in order to reform the unjust laws which now oppress them as wives, mothers and widows, in order to obtain equal educational and industrial advantages.

3. *Resolved*, That society needs the votes of women, because, as a class, women possess peculiar mental and moral characteristics which should be represented in the Government, and because their votes will promote peace, purity, temperance, economy and public order.

4. *Resolved*, That we will petition the Legislature to give the wives of Delaware the right to their own earnings; to the management, use and enjoyment of their own property; the right to make a will; an equal share with their husbands in the legal guardianship and control of their children, and, as a security of all rights, the rights of suffrage to women.

Believing the foregoing statements to be self-evident, founded in justice, truth and the revelation of the Divine will, concerning human rights and privileges,

Resolved, That we proceed to form a Delaware State Woman's Suffrage Association, auxiliary to the American Woman's Suffrage Association, under the following rules and regulations:

1. Believing in the national equality of the two sexes, and that women ought to enjoy the same legal rights and privileges as men; that as long as women are denied the elective franchise they suffer a great wrong and society a deep and incalculable injury; the undersigned agree to unite in an Association to be called "The Delaware Woman's Suffrage Association."

2. The object of this Association shall be to secure the rights of suffrage for women, and to effect such changes in the laws as shall place women in all respects on an equal footing with the men.

3. The officers of this Association shall be a President, Vice-Presidents, a Treasurer, a Corresponding and a Recording Secretary, and an executive committee of not exceeding fifteen persons, beside the President, Secretaries and Treasurer, who shall be members, *ex-officio*. All the officers shall be chosen at the annual meeting to continue in office for one year or until others are chosen in their places.

4. Any person may be a member of the Association by the payment

of an annual contribution to its funds, or a life member by the payment of twenty dollars.

5. The President and other officers shall perform the customary duties of their respective offices.

6. The executive committee shall audit the accounts of the Treasurer and manage the business of the Association; they may elect honorary members, call meetings of the Society, prepare petitions to the Legislature, issue publications and employ lecturers and agents, and take any measures they think fit to forward the objects of the Association, and may fill all vacancies that occur prior to the annual meeting.

7. The annual meeting of the Association shall be held at such time and place as the executive committee may appoint.

The Legislature of 1869 passed an "act providing revenue for the State," which regulated taxation as follows:

1. On all sales over one thousand dollars per annum, less commissions, freights and United States tax, one-tenth of one per cent., payable quarterly.

2. On manufactures, the same rate, with an allowance for the same productions.

3. On various law processes, recording deeds, registering wills, etc., various additional fees, varying from twenty-five cents to five dollars.

4. On foreign insurance companies, two and a half per cent. on the premiums received, payable quarterly; on home companies, one-half of one per cent., payable yearly.

5. On corporations (except banks, railroads, canal and insurance companies and loan associations), one-fourth of one per cent. on the cash value of their capital.

6. On private bankers and brokers and real estate agents, two per cent. on their annual receipts for brokerage and commissions.

7. On building and loan associations, one fourth of one per cent. on gross receipts.

8. On all collateral inheritance, legacies, and distributive shares over five hundred dollars, one and one half per cent.

9. On judgments, mortgages, bonds, stocks in foreign corporations, one-fourth of one per cent.

Provision was made for the appointment by the Governor of an assessor for each county to assess the tax, and for the collection of it by the State treasurer or his deputies. The provisions of the bill occasioned no little dissatisfaction in some parts of the State, and several remonstrances against its enactment were presented to the Legislature, to the effect that the tax on manufacturing interests of the State was excessive and would give a great advantage to the manufacturers of the adjacent States; that the tax of one-half of one per cent. on bonded and other indebtedness would cause capitalists to seek other markets for investment; and that the provisions of the bill were unjust, as it did not impose a tax upon the landed interests of the State.

Tax-bills were passed, imposing upon all railroads and canal companies in the State, "in addition to the tax now imposed upon them," a tax of three per cent. upon their net earning, inside the State, one hundred dollars a year for each locomotive, twenty-five dollars for each passenger car and ten dollars for each freight car; also a tax of one-fourth of one per cent. on the cash value of the stock of banks.

The ratification of the Fifteenth Amendment to the Federal Constitution was celebrated by the colored people and their friends, at Wilmington, on April 14, 1870. At a preliminary meeting, in which this action was determined upon, the following resolutions were adopted:

"WHEREAS, The nation has restored political rights to the colored citizens deprived of these rights heretofore simply on the ground of the color of the skin; and

"WHEREAS, The nation has thus planted itself anew upon the imperishable doctrine of the Declaration of American Independence:

"*Resolved*, That our grateful thanks are first due to that God who is

Lord of lords and King of kings; who controls the destinies of nations, and who maketh even the wrath of man to praise Him.

"Resolved, That the President, Cabinet, Congresses, Legislatures and loyal people, who proposed and sustained this restoration to us of political rights and privileges, have won our lasting gratitude.

"Resolved, That we hereby pledge to them to prove the fitness of the trust by the worthiness of our conduct. That, realizing the responsibilities resting on us, we mean to use the ballot for no merely narrow or selfish ends, but for the best good of the State and nation, thereby aiding to perpetuate a Union which our fathers and their fathers, their and our brothers, together helped to save."

The colored people determined to commemorate the event by a grand celebration in Wilmington. The people of the entire State, and the adjacent counties of Maryland, Pennsylvania and New Jersey, were invited to participate in the celebration, which proved to be a very enthusiastic one. There were sermons in the colored churches in the morning; a large procession in the afternoon of the various colored societies, orders, clubs, mechanical and other associations, day and Sunday-schools, and citizens with music, badges, banners and other decorations. A jubilee mass-meeting was held in the evening, with white and colored speakers, and other festivities.

The political canvass of the year in Delaware had more interest than usual, owing to the fact that the colored citizens would exercise the right of suffrage for the first time, under the operation of the Fifteenth Amendment. It was estimated at first that there would be about 4500 negroes in the State who would be qualified voters, and if the Republicans could secure all these without breaking their own ranks, they could overcome the usual Democratic majorities, as the whole number of voters in the State was little more than 20,000. On the other hand, the Democrats hoped, on account of the prejudice against negro suffrage which existed in the State, to draw off considerable numbers from the Republican party on that issue alone, and thus preserve, if not increase, their superiority in the State. Accordingly, the cry of "White man's party" was raised, and a convention was called to meet at Dover, the 10th of May, for the purpose of forming such an organization. The convention was held, but the leading members of the Democratic party in the State were not present. A series of resolutions were adopted, congratulating the party on its history, denouncing the radical party and arraigning it for creating a public debt, banishing the circulation of gold and silver, and substituting in its place a "worthless currency," and for striking down the dearest guarantees of liberty, denouncing the radical party for the passage of the Fifteenth Amendment, and declared it an outrage upon the people and a flagrant violation of the Constitution; declared that they would interpose no obstacles in the way of negroes voting, as long as the Fifteenth Amendment was the assumed law of the land, and gave a general invitation to all white men to unite with the Democratic party as a "white man's party."

The regular Republican State Convention was held at Dover on the 14th of June. Thomas B. Coursey, of Kent County, was nominated for Governor, and Joshua T. Heald, of New Castle County, for Represent-

ative in Congress. The platform recognized the amendments of the Constitution securing the right of suffrage and equal rights before the law to all loyal citizens "a final and just settlement of a vexed question." It hoped for the removal of all restrictions and disfranchisements imposed upon persons engaged in Rebellion, praised the administration of General Grant, recommended the State to provide separate schools for colored children, and denounced Democratic rule in Delaware.

The Democrats held their regular nominating convention at Dover on the 24th of August, 1870, and nominated James Ponder, of Sussex County, for Governor, and Hon. B. T. Biggs for member of Congress. In their platform they expressed their "devotion to the Union, now as in the past," declared that the Federal and State governments were formed for the benefit of white men, denounced the Fifteenth Amendment and the enforcement act, opposed the importation of coolies, favored the existing school system, which provided for the education of white children only, and declared their opposition to the "extravagance and wasteful expenditure" of President Grant's administration.

An independent Democratic Convention was held in October, which denounced the administration of the party in power in the State. The election was held on the 8th of December, and resulted in the success of the Democratic ticket. The total vote for Governor was 20,594; of which Ponder received 11,464 and Coursey 9130, giving the former a majority of 2334. Biggs for Congress received a majority of 2296 over Heald. The Legislature was unanimously Democratic in both branches.

There were several slight disturbances at the polls, owing to a disposition in some places to intimidate the negroes from voting, and the presence of United States officers at the polling-places to secure them in the exercise of that privilege. Both the enfranchisement of the negro and the interference of the Federal government at elections had been stubbornly opposed by the dominant party of the State from a very early period. Governor Saulsbury, in his final message to the Legislature of 1871, expressed the sentiments of his party when he said:

"In disregard of constitutional obligations, Congress and the Federal Executive have sought, by revolutionary means, to centralize and consolidate all political power in their own hands by attempting to control elections in the States. Without the power by direct act to amend the Constitution or alter the provisions, and unable to secure the voluntary consent of the number of States requisite for that purpose, they have forced some of the Southern States to consent to proposed amendments of the Constitution as a condition to representation in Congress, and have thereby nullified the legally-expressed will of other States whose consent could not be secured, and whose proper and legal relations with the Federal Government had never been interrupted. Such action is a fraud upon the non-consenting States, and upon the people of the whole country. It is a subject of congratulation, however, that the people in the late elections rebuked these acts of usurpation and tyranny, and we may well indulge the hope that the spirit of true patriotism will assert its superiority over party subserviency, and remove from power the representatives of a political organization which has failed, during a period of five years of profound peace, to bring the country back to the healthy condition in which it found it at the time of its advent to power in 1860. Until recently no political party in the country has ventured to claim for the Federal Government any authority to determine the

James Ponder

qualification of electors in the States, or to interfere with the just rights of the people of every State to determine all matters connected with their own local elections. The fifteenth amendment, adopted by fraud and coercion, and in opposition to the will of the white people of the country, has been condemned by the popular voice in almost every State of the Union, and in none more signally than our own. Its effects upon both races must prove injurious, and it is to be hoped that its condemnation by the people of the country will, at no distant day, lead to its repeal as a part of the Federal Constitution."

Governor James Ponder was born at Milton, Del., October 31, 1819. He is of English extraction, and his ancestors are said to have settled in Virginia, whence his great-grandfather, John Ponder, came to Delaware and took out a patent for the family estate still owned by the subject and occupied by his elder son, John Ponder, fifth in descent from the original patentee. John Ponder, the first of the Delaware Ponders, had a son James, who left four children. They were as follows: John Ponder, father of the ex-Governor; Eleanor, wife of John Rowland, a Sussex County farmer; Elizabeth, wife of the Rev. S. Terry, a Presbyterian minister; and Mary, wife of John Gray, who went to Iowa in 1842. John was born at the old homestead in August, 1791, and, after receiving a common-school education, lived on his father's farm until 1809, when he became a clerk in the store of Major John Hazzard, of Milton, father of the late Governor David Hazzard, who was the chief executive of the State from 1829 to 1833. During the War of 1812 he served in the American army, and received land warrants as a partial recognition of his services.

Then he formed a copartnership with Arthur Milby, under the firm-name of Milby & Ponder, and engaged in general merchandising and the purchase and shipment of ore from the old bog iron mines of Sussex County. This was mostly shipped to points in New Jersey in vessels owned by the firm. They also dealt largely in grain, lumber, wood and quercitron bark. After this partnership was dissolved, in 1830, John Ponder continued the business alone until he admitted his son James, the subject and ex-Governor, to a partnership in 1843. John Ponder & Son continued the business until the death of the former from paralysis in 1863, since which time James Ponder has carried it on. During John Ponder's life he held various positions of public trust. He was a Jackson Democrat, and served several terms as a Levy Court commissioner of Sussex County. He was appointed postmaster at Milton in 1829, and served until 1849. In 1852 he was elected a State Senator, and served in that capacity for four years. He was a vestryman and warden of St. Matthew's P. E. Church in Cedar Creek Hundred. In 1816 he married Hester, daughter of Captain Nathaniel Milby, master of a coasting vessel, who subsequently died of yellow-fever, and was buried at Portsmouth, Va. She was a niece of his partner in business, and died in 1827, leaving him two children,—James Ponder, the ex-Governor; and Anna, wife of Willard Saulsbury, chancellor of the State of Delaware.

Governor Ponder was educated in the best acad-

emies of his native county and in 1838 became a clerk in his father's store at Milton. Having been admitted to partnership January 1, 1843, he and his father engaged in the building, purchase and sale of vessels. After the death of his father, in 1863, he gave up the store so long carried on by the firm, and has since given most of his attention to ship-building and the purchase and shipment of grain, lumber, ship-timber and bark. Several of his vessels are engaged in the trade with the West Indies.

In 1860 he built on the south bank of the Broad Kilo, below the bridge, a large steam saw-mill for the manufacture of lumber, ship-timber and quercitron bark. There he has had on hand at one time a stock of bark valued at forty thousand dollars. He is also largely interested in agriculture and peach-growing, as he is the owner of several thousands of acres of land in Sussex County. Most of this he has purchased in addition to that acquired under the original patent of John Ponder.

Since attaining his majority he has been a consistent and active member of the Democratic party. In 1857 he was a member of the State Legislature that elected James A. Bayard and Martin W. Bates United States Senators, the latter to fill the vacancy caused by the death of John M. Clayton. During that session Mr. Ponder introduced the bill incorporating the Junction and Breakwater Railroad, now known as the Delaware, Maryland and Virginia Railroad, and operated by the Pennsylvania Railroad Company. Having been elected to the State Senate for four years in 1864, he served as Speaker of that body during the session of 1867. In 1870, as has been stated, he was the Democratic candidate for Governor, and was elected by a handsome majority over his popular Republican opponent, Thomas B. Coursey, of Kent County. He was inaugurated at Dover in January, 1871, and during the four years of his term he exercised the functions of his office with the same calm dignity and fidelity that had characterized him in all previous official positions.

From the incorporation of the Kent County Mutual Insurance Company, in 1847, ex-Governor Ponder has been connected therewith, and for about twenty years has been one of its directors. For about thirty years past he has been a director of the Farmers' Bank of Delaware, and for several years prior to his removal to Wilmington, in 1875, he was president of the Georgetown Branch. From 1875 to 1879 he was a director of the Wilmington Branch, and on his return to Milton in the latter year he declined to serve as a director of the Georgetown Branch.

From boyhood he has been a member of the Protestant Episcopal Church, and is now a warden of St. John's Baptist Church at Milton, which was the parish of his ancestors from the time of the settlement of his great-grandfather there. He has frequently been a delegate to the conventions of his church. Since 1843 he has been a member of the Masonic order, and about twenty years ago served as

Deputy Grand Master of the Grand Lodge of Delaware.

In July, 1851, he married Sallie, daughter of Gideon Waples, of Milton. They have had five children, of whom three are living, as follows: Ida, who lives at home with her parents; John, the occupant of the ancestral manor; and James W., now a student at Swarthmore College.

According to the Federal census of 1870, the population of the State was 125,015. The share of each county, with the increase since 1860, is exhibited in the following table:

| COUNTIES. | 1870. | 1860. | Increase. |
|-----------------|---------|---------|-----------|
| New Castle..... | 61,515 | 64,797 | 8,718 |
| Kent..... | 29,804 | 27,804 | 2,000 |
| Sussex..... | 31,696 | 29,615 | 2,081 |
| Total..... | 125,015 | 112,216 | 12,799 |

Wilmington had 30,904 inhabitants in 1870, against 22,258 in 1860, an increase of 8646. Outside of Wilmington the largest towns exhibited the following.

| TOWNS. | 1870. | 1860. | Increase. |
|--------------------|-------|-------|-----------|
| Smyrna..... | 2,110 | 1,873 | 237 |
| Dover..... | 1,913 | 1,289 | 624 |
| New Castle..... | 1,766 | 1,566 | 210 |
| Delaware City..... | 1,545 | 1,355 | 190 |
| Seaford..... | 1,308 | 624 | 684 |
| Lewes..... | 1,090 | 970 | 120 |

There were in the State in 1870, 698,115 acres of improved, 295,162 of woodland, and 59,045 of other unimproved land. The cash value of farms was \$46,712,870; of farming implements and machinery, \$1,201,644; total amount of wages paid during the year, including value of board, \$1,696,571; total (estimated) value of all farm productions, including betterments and additions to stock \$8,171,667; value of orchard products, \$1,226,893; of produce of market gardens, \$198,075; of forest products, \$111,810; of home manufactures, \$33,070; of animals slaughtered or sold for slaughter, \$997,403; of all live-stock, \$4,257,323. There were 16,770 horses, 3584 mules and asses, 24,082 milch cows, 6888 working oxen, 19,020 other cattle, 22,714 sheep, and 39,818 swine. The chief productions were 895,477 bushels of wheat, 10,222 of rye, 3,010,390 of Indian corn, 554,388 of oats, 1799 of barley, 1349 of buckwheat, 3123 of peas and beans, 362,724 of Irish and 85,309 of sweet potatoes, 58,316 pounds of wool, 1,171,963 of butter, 1552 gallons of wine, and 758,603 of milk. Sold 65,908 gallons of sorghum molasses, 33,157 pounds of honey, and 41,890 tons of hay. The total number of manufacturing establishments was 800, using 164 steam-engines of 4313 horse-power, and 234 water-wheels of 4220 horse-power, and employing 9710 hands, of whom 7705 were males over sixteen, 1190 females over fifteen, and 806 youth. The amount of capital employed was \$10,839,093; wages paid during the year, \$3,692,195; materials used, \$10,206,397; value of products, \$16,791,382.

The total number of religious organizations was 267, having 252 edifices, with 87,899 sittings, and

property valued at \$1,823,950. The leading denominations were as follows:

| Denominations. | Organizations. | Sittings. |
|---------------------|----------------|-----------|
| Baptists..... | 8 | 2,450 |
| Episcopal..... | 29 | 8,975 |
| Friends..... | 8 | 3,425 |
| Lutheran..... | 1 | 300 |
| Methodist..... | 173 | 51,924 |
| New Jerusalem..... | 1 | 300 |
| Presbyterian..... | 32 | 13,175 |
| Roman Catholic..... | 13 | 6,000 |

The total number of libraries was 473, having 183,423 volumes. Of these, 221, with 91,148 volumes, were private; and 252, with 92,275 volumes, were other than private. There were 17 newspapers and periodicals, with a total circulation of 20,860; copies annually issued, 1,607,840. Of these there was 1 daily with a circulation of 1600; 3 semi-weekly, circulation 3660; 12 weekly, circulation 13,600; and 1 monthly, circulation 2000.

Governor Ponder was inaugurated on the 17th of January, 1871. His message was entirely devoted to a discussion of State rights, and denunciation of Congress for extending the suffrage to uneducated negroes, which he considered "unwise in policy, unsound in principle," and said would "be found to be in practice greatly detrimental to the public interest." He declared the measures adopted to secure its establishment "the most fatal assaults which have been made upon our complex systems of government, Federal and State, since their organization. They were the unwarranted enlargement of the powers of the former, and the practical destruction of the inherent and essential powers of the latter." On the same day Hon. Eli Saulsbury was elected to the United States Senate for a term of six years, beginning March 4th, to succeed the Hon. Willard Saulsbury, his brother, whose term expired at that time. The contest was between the friends of the three brothers, William, Eli and Gove Saulsbury, and it culminated in the nominating caucus the night preceding the election. Four ballots were taken before a nomination was effected. The first two showed only 3 ballots for Eli, against 14 for Gove, and 13 for Willard Saulsbury; the next 1 for Eli, 15 for Gove and 14 for Willard Saulsbury; but the fourth, by the union of the supporters of Willard and Eli Saulsbury, showed 16 for the latter against 14 for Gove Saulsbury, and secured him the nomination and consequently the election.

In February, Robert H. Davis was elected State treasurer by the Legislature, and Dr. R. G. Ellegood, State auditor; and John H. Paynter, of Georgetown, was made Secretary of State by appointment of the Governor.

There were but few notable acts of the Legislature of 1871. One of the most important related to the fisheries. Its chief provisions declared that no person not a citizen of the State should fish within its boundaries without a license; such license shall cost twenty dollars, and be limited to one year; the penalty for the violation of this provision shall be fifty

dollars and forfeiture of the vessel, nets and other tackle engaged, which, if condemned, shall be sold, and the proceeds, after paying costs, be divided among the captors. Any sheriff or constable had the power to seize and detain any vessel violating the oyster law without warrant, and in the performance of his duty, could if necessary, summon a *posse comitatus*, armed with fire-arms and ammunition, and use the same, if forced to do so, in execution of the law, and if maiming or death followed, it should be considered justifiable, and the officer and his *posse* were to be free from legal responsibility.

In 1864 an act was passed by the Legislature, levying a tax of ten cents per head upon every passenger traveling by steam routes in the State. The collection of this tax the Philadelphia, Wilmington and Baltimore Railroad persistently resisted, on the ground of its unconstitutionality, and a suit of the State treasurer, to recover it from the company, was long pending. At length the case came before the Court of Errors and Appeals, the highest tribunal in the State, and a unanimous decision against the act, so far as it imposed a tax upon passengers traveling through, into or out of the State, was rendered. The court, accepting the decision of the Supreme Court of the United States, in the case of *Crandall vs. State of Nevada*, as settling the principle that a tax by a State upon what is known as *inter-State* travel is invalid under the Federal Constitution, concluded that the tax imposed by the act in question was a tax upon the passenger, to be collected by the carrier, and *not* merely a tax upon the *business* of the carrier, to be measured by the number of passengers as was urged upon the part of the State. The chief justice also delivered an opinion fully concurring in the conclusions above-named, but adding thereto his dissent from the grounds upon which the majority of the Supreme Court had based their decision in the *Nevada* case—preferring, with the majority of the Supreme Court, to base the principle, by which both that case and the Delaware one were settled, upon the "Commercial clause of the Constitution," giving Congress power to regulate commerce between States. The amount involved was about seventy-five thousand dollars.

A warm controversy arose during the year 1871 regarding the right of citizens of New Jersey to take fish from the waters of the Delaware River within what is known as the "twelve-mile circle,"—that is, a circle with a radius of twelve miles, having its centre at the town of New Castle. Delaware claimed that this circular line was the original northern boundary of the State, and that within it her jurisdiction was exclusive to the lower-water mark on the New Jersey side of the stream. As a license was required from the citizens of other States fishing in her waters, she held that no fish could be taken from the river even adjacent to the New Jersey shore where it comes within that circle, unless such license was first obtained.

Certain New Jersey fishermen venturing within that line were arrested in the early part of the year, and this led to a correspondence between the Governors of the two States, which resulted in an interview at Philadelphia, and an agreement to bring the subject before the Legislatures of the two States, with a recommendation that commissioners be appointed to settle the matter in dispute. This recommendation was made by Governor Ponder, in his annual message to the Legislature of 1873.

A convention of the Republicans of the State was held at Dover, on the 9th of May, to choose delegates to the National Convention of the party at Philadelphia. A long platform was adopted. A Democratic Convention, for the appointment of delegates to the National Convention at Baltimore was held at Dover, on the 11th of June. The resolutions adopted condemned General Grant and the Thirteenth, Fourteenth and Fifteenth Amendments to the Constitution. Another convention was held in August, in which an attempt was made to secure an acceptance of the nominations of Horace Greeley for President, and B. Gratz Brown for Vice-President, made at Baltimore, but without success.

A second Republican Convention was held on the 10th of September, which, after nominating Presidential electors and naming James R. Lofland as candidate for member of Congress, adopted a platform.

A slight conflict between the authority of the State and the government arose during the campaign, owing to the peculiarity of the State's election laws. The payment of a county tax, which shall have been assessed at least six months before the election, is one of the qualifications of an elector, and under this many negroes in New Castle County were deprived of the right of suffrage by the Levy Court. This result was assumed to be in violation of the Fourteenth Amendment of the Federal Constitution, and the members of the court and some of the collectors of the county were indicted under the enforcement act, and one of the collectors was tried and convicted. On this subject the Governor says, in his message to the Legislature of 1873:

"I cannot as the executive of the State, withhold the expression of regret at the unwarranted assumption of power by Congress in the enactment of the law under which these proceedings were had. From the formation of the Union until the enactment of this law no such claim of power for Congress was ever practically asserted. The right of the States to select their own officials and to regulate their actions without any Federal supervision had never been denied, and for more than three-quarters of a century that right has been exercised by this State without Federal interference. This assumed power of Congress to interfere in such local affairs is predicted upon the recent amendments to the Constitution; but it would be a forced construction of those amendments, and certainly far more than was claimed by their advocates before they were engrafted upon the fundamental law, that would warrant a power so adverse to the theory of the government, as well as to all the rights of the States over their own domestic affairs. If the fourteenth amendment confers upon Congress the fearful power assumed in the enactment of the law under which these indictments were found, it is difficult to find a limit to its authority. There is but one step between the exercise of Federal supervisory power over the officers of the State and the power to appoint them, and at no distant day it may be found that the exercise of the one suggests, if it does not necessitate, the other. It is to be regretted that one by one the safe-guards of liberty are disappearing in rapid succession, and the limitations upon Federal authority so weakened or disregarded as to form but a feeble defense against consolidated despotism. But regrets are vain and protests are unavailing. The strides of Federal

power are unstayed, and its portentous shadow casts a gloomy pall over the future history of the country."

The total vote for Presidential electors was 21,321, of which the electors chosen to vote for Grant and Wilson received 11,115; those for Greeley and Brown, 10,206; and those for O'Connor and Adams, 460—plurality for Grant, 909. James R. Lofland was elected as Representative in Congress by a majority of 362, out of a total vote of 22,392, receiving 11,377 votes. There was no election for State officers, but the Legislature of 1873 consisted of eight Democrats and one Republican in the Senate, and fourteen Democrats and seven Republicans in the House.

The Legislature assembled January 15, 1873, and sat until April 12th. A more stringent liquor law was passed, making the cost of license \$100, with such other provisions as would confine the sale of intoxicants chiefly to hotel-keepers; and the first step was taken to amend the State Constitution so as to allow of the passage of a general incorporation law, the constitutional provision being that the Legislature could grant no charter to run for a longer period than twenty years. Another act increased the legal rights of married women; and an unsuccessful effort was made to increase the number of Senators to twelve and Representatives to twenty-eight, and half of each House to be chosen from New Castle County.

Bills were introduced to repeal the attachment law so far as it related to the seizure of wages, but they were defeated by remonstrants, who argued that neither this law nor the whipping-post possessed any terrors for honest people.

A new arrangement was made with the Philadelphia, Wilmington and Baltimore Railroad Company, by which it was taxed \$27,000 per year in lieu of all other than the ten-cent tax, and permission was given that it might commute the latter at any time by the payment of \$13,000. In this legislation was included a prohibition against discrimination in fares and freights, which might be punished by suit and recovery of tenfold the amount charged.

Another measure provided for the graduation of the ten-cent tax by allowing all other roads to pay over such sums in gross as would be proportioned to their passenger receipts in the same ratio as the amount paid by the Philadelphia, Wilmington and Baltimore Company held to theirs.

At the close of 1872 the State debt was \$1,325,000, the interest on which had been met so promptly that the bonds were firmly held at a high premium, and the treasurer found it difficult to purchase them for redemption.

On March 18, 1873, the Committee on Ways and Means reported the debt items thus:

| | |
|--|-------------|
| Debt due in 1875..... | \$169,000 |
| Debt due in 1885..... | 810,000 |
| Debt due in 1890 (Junction and Breakwater Loan)..... | 352,000 |
| | <hr/> |
| | \$1,331,000 |
| The interest charge being | \$79,000 |

The annual receipts from taxes and all other sources applicable to State use were \$289,000.

The difficulties between this State and New Jersey as to the fishing rights of their citizens were not completely settled, and the operation of the law relative to taxes on the fisheries was suspended during the year. The question for the commissioners to settle was, whether the citizens of New Jersey had a right to take fish within the Delaware jurisdiction. The progress of the industrial interests of the State was rapid in this year. In Wilmington alone the total capital employed had increased from \$12,275,000 in 1872, to \$12,625,000 in 1873, and the product, from \$20,125,000 to \$22,150,000. There had been no reduction of capital in any industry, while railway-car building had added \$50,000; iron ship-building, \$100,000; machine-work, \$50,000; foundry-work and car-wheels, \$100,000; miscellaneous, \$100,000. In the product railway-cars showed an increase of \$200,000; iron ships, \$100,000; machine-work, \$200,000; foundry-work and car-wheels, \$400,000; miscellaneous articles, \$500,000; while a decrease appeared in the single article of morocco, and was estimated at \$250,000. For the year ending October 1, 1873, reports showed the erection of 448 new buildings in Wilmington, three less than in the preceding twelve months. The canning and drying of fruit was extensively prosecuted, amounting, in peaches alone, to 161,000 baskets. This industry employed 1300 persons, who received \$8000 in weekly wages.

In November occurred the daring and unsuccessful attempt to rob the National Bank of Delaware, at Wilmington. The burglars, McCoy, Carter, Hope, Lawler and Hurlburt, were captured, tried and convicted. The sentences, which were carried out, condemned them to pay the costs of the prosecution and a fine of five hundred dollars each, to stand in the pillory one hour, to receive forty lashes each on the same day, and to be imprisoned for ten years.

The year 1874 witnessed an exciting political contest. On July 28th the Republican State Convention met at Dover, and nominated Dr. Isaac Jump, of Dover, for Governor, and renominated Honorable James R. Lofland for Congress. The platform declared that representation in the Legislature according to population, coupled with a district system, was a cardinal principle of republican government, and pledged the party, if entrusted with power, to provide for the early organization of a Constitutional Convention, to make this reform in the organic law. The resolutions called for the repeal of the law allowing the wages of the laborer to be attached for debt, and favored the exemption of a reasonable portion of the property of the debtor from execution. They also demanded the repeal of taxes upon wages and mortgages, and upon savings and houses acquired through building and loan associations. The law passed by the previous Legislature in reference to the duties of assessors and collectors was denounced "as a base attempt to disfranchise that class of our voters and citizens who are not owners of real estate, and a measure which, unless prevented by the vigi-

lance of good citizens, will cheat the counties out of their taxes, and the people out of their votes, and further, as an unjust discrimination against the poorer classes by giving improper influence to property alone." The property tests for office-holding were characterized as "repugnant to the spirit of the age, and insulting to the working-men."

The Democratic Convention was held at Dover, August 27th, nominating John P. Cochran for Governor, and James Williams for Congress. Only two paragraphs of the platform touched upon State affairs, and in them the Democratic administration of the State was commended, and it was resolved that

"The welfare of all classes of our population, the rich and the poor, the white and the black, can and will be best conserved by a continuance of that strict obedience to Constitutional limitations upon official power; that respect for established laws; that absence of class-influence and legislation; that due regard for the rights of the community as a whole, which have characterized the administration of government by the Democratic party, and which form the chief guarantee of a free and stable government."

The election held on November 3d resulted in the choice of Cochran and Williams by majorities respectively of 1239 and 1666. The counties voted as follows:

| | FOR GOVERNOR. | | Summ. | Total. |
|--------------------------|---------------|-------|-------|--------|
| | New Castle. | Kent. | | |
| Cochran..... | 5,796 | 3,178 | 3,514 | 12,488 |
| Jump..... | 5,015 | 2,751 | 2,883 | 11,249 |
| Majority for Cochran... | 181 | 427 | 631 | 1,239 |
| | FOR CONGRESS. | | Summ. | Total. |
| | New Castle. | Kent. | | |
| Williams..... | 5,891 | 3,244 | 3,558 | 12,693 |
| Lofland..... | 5,498 | 2,683 | 2,846 | 11,027 |
| Majority for Williams... | 393 | 561 | 312 | 1,666 |

The peach season of 1874 closed about October 1st, and the net receipts from the crop were estimated at \$669,775, a decided falling off from the average of the several preceding years. The shipments of strawberries were, however, the largest ever made up to that time, aggregating 7,470,000 quarts, which brought to the growers about \$500,000.

When the Legislature met, January 7, 1875, the message of the retiring Governor, Mr. Ponder, showed that the State debt had been brought down to \$1,250,000, more than \$500,000 of which was incurred in aid of the construction of the Junction and Breakwater and the Breakwater and Frankford Railroads. While not questioning the propriety of this expenditure, he suggested that the General Assembly should not authorize any further increase of the public debt for works of internal improvement. The assets of the State, including investments appropriated to the school fund, were \$1,123,189; liabilities over all assets, \$100,811; and over assets not appropriated to the school fund \$576,950, which latter figure was regarded as the actual debt of the State. The annual receipts into the treasury for 1874 were \$207,872, and the expenditures, including \$75,000 interest on the public debt, an appropriation of \$3000 to Delaware College, and one-half the biennial expenses of the Legislature, about \$111,025. As a large part of the revenue was derived from taxes

paid by railroads and other corporations, a decision rendered during 1874 by the United States Supreme Court was of the highest importance to Delaware. The suit was that of Wm. Minot, Jr., a stockholder in the Pacific, Western and Baltimore Railroad, to restrain the State's officers from collecting from the company taxes imposed by the law of 1869, on the grounds that the law was unconstitutional. The Supreme Court affirmed the power of the State to tax corporations, which disposed effectually of the claim of other railroads within the State—and especially that of the Philadelphia, Wilmington and Baltimore—to exemption from taxation and relieved the State from any possible liability for the amount of taxes paid by the company under protest.

Governor Cochran was inaugurated January 20, 1875, and on the 27th, Hon. Thomas F. Bayard was elected to the United States Senate for six years from the ensuing 4th of March. Early in the session of the Legislature resolutions were adopted protesting against the action of President Grant in dispersing by military power the Legislature of Louisiana and organizing another body of men to act as the representatives of that State.

Among the principal matters of local law-making was the passage of the school bill, making the president of Delaware College, the secretary of State and the State auditor a Board of Education, the auditor to be the secretary, with a compensation of one hundred dollars per year. The Governor was authorized to appoint a superintendent of public education at a salary of eighteen hundred dollars a year, who was required to examine teachers, visit each school at least once a year, and to hold a teachers' institute in each county. Teachers were required to pay two dollars each for their certificates. School directors were to be chosen by the people in each district and were required to levy a tax of not less than one hundred dollars in each district in New Castle and Kent Counties and sixty dollars in Sussex. The Board of Education must hold a meeting on the first Tuesday in January of each year, and the superintendent was required to submit a report on the condition of the schools. Another act provided for a tax of thirty cents on each one hundred dollars of the property of colored persons on the assessment lists, to be set apart as a fund for the maintenance of colored schools, and paid over by the county treasurers to the treasurer of the Delaware Association for the Education of the Colored People, to be applied by the latter to the maintenance of colored schools.

Many petitions were received on the subject of liquor legislation—some asking for a prohibitory law, some for local, others for a more stringent license law and others again for more freedom in the sale of intoxicants. Of the numerous bills introduced that for a more liberal license system met with the most favor, but all were finally defeated. Governor Cochran had recommended increased representation in his inaugural address, and several bills to effect that ob-

ject were submitted. The general purpose was to add to the representation of New Castle County by giving an additional Senator and three or four new Representatives to the city of Wilmington and making it a separate district. It was also proposed to divide New Castle County, but all these propositions were defeated, thus retaining the apportionment of 1792, by which New Castle, Kent and Sussex have an equal representation of three in the Senate and seven in the House, although the population of the first-named was, in 1875, greater than that of the other two combined and the assessed value of its property more than three times as much. In this Legislature the city of Wilmington had no representative of its own in either Senate or House; notwithstanding that its population was larger than that of Kent or Sussex and its valuation and taxes greater than those of both.

The efforts to secure a loan of the State credit to various railroad enterprises also failed. The amendment to the Constitution proposed in 1873, sanctioning a general incorporation act, was ratified, and a general act was passed providing for the incorporation of associations for religious, charitable, literary and manufacturing purposes, for the preparation of animal and vegetable food, for building and for loan purposes and for the drainage of low lands. Among the other acts of the session was one ceding to the United States title to and jurisdiction over lands for sites for light-houses, a beacon, life-station and other aids to navigation on the waters of the State; one incorporating the city of New Castle and one allowing married women to have control over their own property, whether in their possession at the time of marriage or acquired afterwards. This law also permitted married women to make a last will and testament without the consent of their husbands. The town of New Castle, which was incorporated as a city, had twenty-three hundred inhabitants. A special act established a Board of Education for New Castle, as the general school law did not apply to that city or to Wilmington.

An act passed shortly before the adjournment authorized keepers of hotels, proprietors of places of amusement, steamboat and railroad companies and "others pursuing a public occupation," to provide separate accommodations for any class of persons who might be "obnoxious" to their patrons or passengers. While there was no mention of race or color in this act, its purpose was to offset the civil rights legislation of Congress, and confine the negroes to separate places in hotels, taverns, theatres, railway cars, steamboats, etc.

Though no action was taken at this session directly affecting the finances of the State, they were frequently debated during the session. It was shown that the cost of the executive and judicial departments, during 1874, was,—

| | |
|-----------------------------|-------------|
| Salaries of the judges..... | \$12,000.00 |
| Attorney-general..... | 1,500.00 |

| | |
|--|-------------|
| Governor..... | 2,500.00 |
| Secretary of State..... | 1,000.00 |
| Auditor and treasurer..... | 3,875.00 |
| Librarian..... | 150.00 |
| Expenses of Legislative Committee..... | 210.34 |
| Printing auditor's report, 1874..... | 324.40 |
| Sundry expenses..... | 250.00 |
| Total..... | \$21,305.64 |

This aggregate was reduced for 1875 to \$19,400. The cost of the last previous legislative session was \$25,500, and it was claimed that the cost of this session would not exceed \$23,000. The extraordinary appropriations this year totalized \$17,300, consisting of \$10,000 for the Centennial Exhibition at Philadelphia, \$4000 for legal services in railroad cases, \$1500 for the fish commission and \$1800 for binding the code. The outstanding liabilities of the State were given as \$1,224,000, on which the interest was \$73,440, besides which two notes given by the late treasurer, amounting to \$40,000, were to be paid. State bonds of \$10,000 were due, while \$14,000 of similar bonds, issued to Delaware College, were to be replaced by other securities. Thus the demands on the treasury for 1875 were calculated to be as follows:

| | |
|-----------------------------------|----------|
| Executive and judiciary..... | \$19,400 |
| Legislative session..... | 25,000 |
| Extraordinary appropriations..... | 17,300 |
| Interest on the debt..... | 73,440 |
| Notes..... | 40,000 |
| Bonds due and to be paid..... | 10,000 |
| Total..... | 183,140 |

The items and total of revenue were thus stated:

| | |
|---|--------------|
| State tax on county assessments..... | \$50,000.00 |
| Process tax..... | 9,000.00 |
| Tax on railroads..... | 44,000.00 |
| Interest from Junction and Breakwater Railroad.... | 24,000.00 |
| Interest from Breakwater and Frankford Railroad.... | 12,000.00 |
| License fees..... | 48,790.00 |
| Interest on bank stock..... | 4,545.00 |
| Tax on banks and insurance companies..... | 7,267.32 |
| From Secretary of State..... | 712.00 |
| Fines and miscellaneous..... | 1,164.16 |
| Cash on hand January 28, 1875..... | 19,131.04 |
| Total..... | \$220,000.52 |

This would leave a surplus of \$37,469, which might be increased \$10,000 by payments from the counties of arrearages of taxes. As there was to be no legislative session in 1876, it was calculated that there would be a saving in expense for that year of \$38,500, or the amount of the legislative expenses and extraordinary appropriations of 1875, which would leave a probable surplus for 1876 of \$75,000. A committee appointed to examine into the investments of the State reported them to be in a perfectly satisfactory condition. The cost of remodeling, improving and refurnishing the State-House was \$28,438.99, or \$8446.63 more than was appropriated for the purpose in 1873.

The State Board of Education was organized in April. It consisted of Wm. H. Purnell, president of Delaware College; I. C. Grubb, Secretary of State; and Nathan Pratt, State Auditor. The Governor appointed James H. Groves as superintendent. The assessment for the benefit of colored schools under the new law, it was estimated, would not exceed \$3200 for

the three counties. There were twenty-eight colored schools in the State outside of Wilmington, which were attended during 1875 by between 1100 and 1200 pupils. The Delaware Association for the Education of the Colored People, of which Alfred Lee was president, gave about six dollars per month to each of the schools, in addition to the amount raised by taxation of the colored property-holders.

By special arrangements with the managers of the principal lines of transportation, the fruit-growers were enabled to make unusually expeditious shipments to market in the summer and autumn of 1875. The marketable peach product of the year was 8,782,716 baskets. Of these, 2,471,500 baskets were shipped by the Delaware Railroad to Jersey City; 501,000 by the same route to Philadelphia; 323,000 to Boston; by the Baltimore and Ohio Railroad, 575,000 baskets; by the Philadelphia and Reading, 204,000; by the Pennsylvania, 164,000; to Western New York, 55,000; to other points by rail, 123,000, making 4,117,500 baskets sent over the Delaware Railroad from the point of shipment. There were sent to New York by ocean routes 300,000 baskets; to Liverpool, 2000; by water to Philadelphia, 1,536,730; by water to Baltimore, 1,887,000; other water shipments, 58,432 baskets; consumed in Wilmington, 80,000; consumed in canneries and drying-houses, 576,054; consumed in distilleries, 225,000. The aggregate returns to producers over the cost of shipment were calculated at \$1,693,944, subtracting from which the cost of picking and hauling, and the loss on baskets and crates, brought the net profit down to \$753,944. The profits of the canneries, dry-houses and distilleries added to this would make the net value to growers of the peach crop of 1875 \$1,018,944.

The Presidential election year of 1876 stirred the people of the State to lively participation in the national contest. On May 18th the Republicans held their convention at Dover to choose delegates to the national convention. Blaine and anti-Blaine was the issue, but the friends of the Maine candidate prevailed, and the delegates were instructed to vote for him "so long as in their judgment and discretion it may be possible to secure his nomination."

The Sussex County men had agreed in caucus upon Dr. J. S. Prettyman, who held a Federal office, as a national delegate, but he was strongly objected to by the majority of the convention because of his antagonism to Mr. Blaine, and pronounced preference for ex-Secretary of the Treasury Bristow as the head of the ticket. Consequently, they adopted resolutions that the delegates "should be representatives of the people, disconnected from official position under the government of the United States," and Sussex was compelled to withdraw Dr. Prettyman. The resolutions declared for the payment of the national debt in coin or an equivalent currency, and for tariff protection to home industries.

On June 13th the Democratic Convention assembled at Dover and chose six delegates to the national

convention of the party. They were instructed to vote as a unit for the nomination of Senator Thomas F. Bayard for the Presidency. The resolutions denounced the attempts of President Grant's administration "to absorb the police power of the State, to control election to office by Congressional legislation and executive interference, and to substitute a centralized government for the 'Home Rule' of the Constitution." "Real civil service reform" was declared to consist in "cutting off a multitude of unnecessary offices, and making preferment in the public service no longer a reward of partisan zeal."

"That a tariff whose object is to raise revenue, and not to favor special classes," was another plank of the platform; and the enunciation on the currency question demanded a return at the earliest possible day to the money of the Constitution—gold and silver coin, and a currency convertible therewith at the will of the holder.

Another Democratic Convention was held at Dover, September 7th, and after renominating Hon. James Williams for Congress, adopted resolutions indorsing the nomination of Tilden and Hendricks by the national convention, and contending that the recent order of the Secretary of War for the distribution of troops of the regular army in the Southern States was "indicative of a purpose on the part of the administration and its supporters to prevent, if possible, a free and fair exercise of the elective franchise in those States." The platform further insisted that the election of Mr. Hayes to the Presidency, "influenced as he would be by the men who have surrounded President Grant, and shaped his administration, would fail to secure purity or economy in the administration of the government." The following significant resolution was adopted on motion of James L. Walcott, of Kent County:

"That we are, and always have been, in favor of the white men of the country controlling the government; and, therefore, we appeal with confidence to the white voters only for the success of the principles enumerated in the foregoing resolutions."

At a convention at Dover, on September 13th, the Republicans nominated Levi C. Bird for Congress, and the resolutions indorsed "the declared purpose of the President, Secretary of War and Attorney-General to use the military power of the government so far as is necessary to secure a free ballot to all citizens of whatever race in the coming Presidential election." The platform also spoke for an improved school system, "free from any and every sectarian and ecclesiastical influence," and renewed the party's pledges in favor of equality of representation in the General Assembly.

A Prohibition Convention, consisting partly of women, was held in Wilmington, October 10th. It nominated Charles Moore for Congress, and adopted resolutions denouncing the liquor traffic, condemning the license law and declaring in favor of local option.

At the election, on November 7th, the total vote for Presidential electors was 24,135, of which the Democratic candidates received 13,381 and the Re-

publican 10,752—Democratic majority, 2629. Mr. Williams was re-elected to Congress by 13,169 votes to 10,592 for Bird; Williams' majority 236. The State Legislature chosen on the same day was unanimously Democratic in both branches. When it assembled on January 3, 1877, reports made to it showed the total bonded debt to be \$1,201,000, classified as follows:

| | |
|---|-------------|
| War bonds due January 1, 1885..... | \$793,000 |
| Balance of bonds loaned to Junction & Breakwater Railroad Company, due January 1, 1890..... | 230,000 |
| Bonds loaned to Breakwater & Frankford Railroad Company, due January 1, 1898..... | 178,000 |
| Total..... | \$1,201,000 |

The reduction since January, 1875, had amounted to \$63,660. There was, January 1, 1877, in the treasury applicable to the redemption of bonds, \$70,000; the investments of the State, outside the school fund, amounted to \$671,000; and there was due from interest, taxes and other sources, \$100,462. This showed an excess of liabilities over assets of \$338,738, not taking into account the investments devoted to the support of the public schools, which amounted to \$449,000. The average annual expense of the State government for 1875 and 1876, exclusive of payments on account of the debt, was \$105,000, while the annual receipts into the treasury amounted to \$195,000. A considerable reduction in taxation was expected at this session of 1877, the principal changes in the law being a reduction in the rates on county assessments from ten cents to five cents on the \$100, and of license fees to one-half their former amount. Efforts were made to secure radical changes in the laws relating to the sale of intoxicating liquors, and the subject was warmly debated for many days; but the final result was insignificant. The word "citizen" was substituted for "freeholder" in the provision regarding applicants for licenses. The payment of a license tax to the United States was made *prima facie* evidence of liquor-selling, and the transfer of a license to an incoming tenant was authorized. An insurance law was enacted, which required all companies incorporated out of the State to file copies of their charters with the State Auditor, to also file a yearly statement of their condition and to obtain certificates enabling them to transact business in Delaware. On the application of ten policy-holders, the auditor was empowered to investigate the affairs of any company and to prohibit it from further operations in the State if it should be found insolvent. An act was passed for the encouragement of beet-sugar culture; but only \$300 was appropriated for seeds and premiums. A commission was appointed to carry the act into effect; but it decided that, as the preparation of the ground ought to be made in the autumn, no effort should be made to secure results until 1878. The commission, however, endeavored to incite the interest of farmers in the matter by the distribution of pamphlets on the methods and profits of cultivating the sugar-beet.

The peach crop of 1877 was estimated at 3,392,293 baskets, but the figures are not altogether trustworthy,

as the records of some of the transportation lines were not exact. Shipments by rail were placed at 2,124,102 baskets; by water, 948,518 baskets; canned, dried or otherwise cured, 319,675 baskets. Among the new enterprises of 1877 was the projected construction of a branch of the Delaware Division of the Philadelphia, Wilmington and Baltimore Railroad from Lewis to Rehoboth.

Statistics of the free-schools from December, 1876, to December, 1877, showing the whole number of children between the ages of five and twenty-one years, the number attending schools, and whole amount of school property, are as follows:

| | |
|--|--------------|
| White children in New Castle County..... | 16,760 |
| White children in Kent County..... | 6,862 |
| White children in Sussex County..... | 8,227 |
| Total..... | 31,849 |
| Attending school in New Castle County..... | 11,056 |
| Attending school in Kent County..... | 4,905 |
| Attending school in Sussex County..... | 6,187 |
| Total..... | 22,398 |
| Colored children in New Castle County..... | 1,300 |
| Colored children in Kent County..... | 1,400 |
| Colored children in Sussex County..... | 1,100 |
| Total..... | 3,800 |
| Attending school in New Castle County..... | 680 |
| Attending school in Kent County..... | 580 |
| Attending school in Sussex County..... | 503 |
| Total..... | 1,663 |
| School property in New Castle County..... | \$331,299.04 |
| School property in Kent County..... | 58,083.00 |
| School property in Sussex County..... | 61,569.60 |
| Total..... | \$450,951.64 |

By January 1, 1878, the effects of the financial legislation of 1877 were fairly apparent, and during the first-named year the debt was reduced to \$953,000, notwithstanding, that taxation had been lightened to the extent of \$75,000 yearly by the reduction of marriage license fees, the discontinuance of the tax on process and recording and the abolition of the entire State tax on poll, real and personal property and on debts, stocks or shares, securities and investments. The cash on hand and the State investments showed assets of all descriptions in excess of indebtedness amounting to \$165,344.

The Democratic State Convention assembled at Dover, August 6, 1878, and framed a ticket with John W. Hall for Governor and Edward L. Martin for Congress. In the platform particular reference was made to the satisfactory condition of the State finances as the result of government by the Democratic party, and the fact pointed out that the treasury of Delaware had never lost a dollar by the dishonesty or defalcation of a Democratic official. It was declared that the prevalent business depression throughout the country was due chiefly "to unwise measures of finance, for which the Republican party is wholly responsible" and former deliverances on the subject of the resumption of specie payment were reaffirmed. It was resolved that "all tariff duties, being taxes, which are paid by the consumer,

should be so laid as to yield the largest revenue to the treasury, and at the same time, as far as is consistent with that purpose, to discriminate in favor of the productive interests of our own people." Grants or subsidies to corporate or individual enterprises were denounced, and in conclusion the platform spoke of "the conspiracy which, through corruption and fraud," gave the electoral votes of South Carolina, Louisiana and Florida to Hayes and Wheeler, and asserted a "firm conviction that the refusal of the Republican members of the Electoral Commission to investigate the charges of fraud, whereby certificates of election were given to Hayes electors in said States, was a violation of public duty and a betrayal of the trust reposed in them."

The Republicans held no convention in 1878 and made no nominations for State officers, but the Greenback-Labor party held a convention at Dover on October 17th, where it put forth a declaration of principles which included the immediate payment of all United States bonds in greenbacks; the repeal of the National Banking Act and the retirement of the bank-notes; government aid to destitute families desiring to settle on the public lands; the taxation of incomes and all property not belonging to the government; the abolition of the property qualification for suffrage in Delaware; and modification of the attachment laws of the State. Kensey J. Stewart was nominated for Governor, and John G. Jackson for member of Congress. The election on November 5th resulted as follows:

| | GOVERNOR. | | CONGRESS. | |
|-------------------------|-----------|----------|-----------|----------|
| | Hall. | Stewart. | Martin. | Jackson. |
| New Castle County | 5,030 | 675 | 4,999 | 711 |

| Total..... | 10,730 | 2,835 | 10,576 | 3,042 |
| Majorities..... | 7,895 | | 7,534 | |

A State Temperance Convention was held at Smyrna December 26th and organized by the appointment of George G. Lobdell as president. It decided to petition the Legislature for the enactment of local option laws, giving the people of the counties and hundreds the power to declare by their votes whether or not liquor licenses shall be granted.

The biennial session of the Legislature commenced on January 7, 1879. The most important occurrence in the first part of the session was the inauguration of Governor Hall, which took place on January 21st. It was considered as brilliant and attractive as could be desired,—the display eclipsing that of any previous occasion,—the State military and prominent men from all parts of the State being present.

Hon. John Wood Hall, Governor of Delaware from 1879 to 1883, was born January 1, 1817, in Frederica, Kent County, Delaware, where he has since resided except while attending school. His paternal ancestor was an early settler in the State, and his descendants have ranked among its most worthy citizens. Winlock Hall, his grandfather, was born in Milford Neck. He owned extensive tracts of lands in Kent

County and prospered as a farmer to a remarkable degree. He had three sons—Henry, Winlock and John—and three daughters. John Hall, the youngest of the sons, born January 30, 1785, was the father of the subject of this sketch. He served in the War of 1812. In early life he was a merchant in Milford, and then moved to Frederica, where he continued the same business. He was one of the principal men of the town and country around, and foremost in all the leading business operations, and was highly esteemed in the community. He married Henrietta, daughter of Nathaniel Bowman, a farmer of Milford Neck. John Hall died January 1, 1826. His wife died September 17, 1834. Governor Hall, the only survivor of their five children, was left an orphan at the age of only nine years, by the death of his father. His mother was a gentle, kind and noble woman. She was a devoted member of the Methodist Church and trained her children to walk in the path of duty and in the way they should go. It was soon after the death of his father that the son went to live with his uncle, who was his guardian. He remained with him until he received his education. At the age of seventeen he entered the store of Clement Maston, at Frederica, as clerk, agreeing to give his services eight months for \$20 and board, with the privilege of selling confectionery on his own account. At the end of this term of service, his former employer having sold out this business, he went into the store of Solomon Townsend, enjoying the same privilege. With his savings he purchased the tools and stock in trade of a cabinet-maker in his native town, and placed experienced journeymen in the shop to do the work. The first sideboards and other mahogany furniture sold in Frederica were made under his supervision. In the meantime he continued in the employ of Mr. Townsend until January 1, 1838, the day he attained his twenty-first year, he bought out the stock in trade of his employer. Having no time to attend to the manufacture of furniture, he sold his shop to a man, who, in exchange, erected for him a dwelling, in which he lived for many years. The profits he received from the candy business, however, were the foundation of his prosperous business career. Being possessed of native energy and good judgment, he now started to do a general merchandising business, which he gradually extended until his customers came from a very large area of the surrounding country. He dealt largely in grain, produce, wood, lime, various kinds of fertilizers, and made a specialty of the lumber trade.

Vessels were needed to ship the products he purchased. He had one vessel built in 1838, the first year he engaged in business for himself. Nearly every year since he has had one or more constructed for his own use and the general coastwise and foreign trade, and now owns more vessels sailing upon the high seas than any other person in the State of Delaware. They have entered almost every port in the United States and also many foreign ports. These vessels range from two hundred and fifty to thirteen hundred tons,

and were built at Frederica, Milton, Milford and Smyrna, Delaware, and at Cooper's Point, Camden, N. J.

In 1861 he took in as partner in the mercantile business at Frederica, James B. Anderson, Mr. Hall furnishing the capital. He retired from this business in 1867, and his son, John W. Hall, Jr., took his place. The firm of Anderson & Hall continued until 1884, when John W. Hall, Jr., retired, and has since been extensively engaged in the vessel business.

The pursuit of agriculture has always had its charms for Governor Hall. He inherited two farms from his father and one from Colonel John Wood, after whom he was named. By improved modes of farming they have become very valuable. He has since purchased large areas of land and now owns six thousand acres, divided into twenty farms, in a high state of cultivation, being one of the most extensive landholders in Kent county. The Warren Mansion, his last purchase, was one of the finest farms in the county; it belonged to his wife's deceased grandfather, having previously been in the family name for more than a century.

Governor Hall was married, November 15, 1842, to Miss Caroline Warren, only child of Samuel and Sarah N. Warren, of Murder Kill Neck. Of this marriage four children were born, viz.: Samuel Warren Hall, a capitalist in Dover; John W. Hall, residing in Frederica, early engaged in the vessel business; Sarah Henrietta, wife of Charles C. Lister, a prominent lawyer in Philadelphia; and Caroline Warren Hall, who died in her third year.

The ancestors of Mrs. Hall came from England, and were among the early settlers of Kent County. The family has always been wealthy and influential in the State. Samuel Warren, Sr., her grandfather, was several years a member of the State Legislature. Mary, one of his children, married John M. Darby, a nephew of Hon. John M. Clayton. Samuel Warren, father of Mrs. Hall, was born in 1800, and died June 15, 1869. He was one of the most enterprising farmers in Delaware. He owned a large landed estate; he took great interest in politics, but never would accept office; was highly esteemed, very benevolent, kind and liberal to the poor, of most excellent judgment and noble character. In politics Mr. Hall was originally a Whig. When that party ceased he became identified with the Democratic party. In 1861 the Legislature elected him State director in the Farmers' Bank, which position he held until 1883, when he resigned. In 1866 he was elected State Senator, leading the ticket in his county. He served the constitutional term of four years, with great acceptability. In 1876 he was a delegate to the National Democratic Convention, which nominated Samuel J. Tilden for President. In 1874 he was within three votes of being the nominee for Governor of Delaware, notwithstanding it was the turn for New Castle County to furnish the candidate. In 1878 he was nominated by acclamation and was elected to the office of Governor by an almost unanimous vote of the

State. His administration was a very popular one; his appointments gave general satisfaction, many of them being so acceptable that his successors reappointed the same persons to serve another term. Soon after the completion of his term as executive of the State, Governor Hall returned to enjoy the comforts and quietude of his home. He had previously been actively engaged in business and performing the duties of public office for a period of fifty years. He has since devoted his attention to his own private affairs. On March 26, 1846, he united himself with the Methodist Episcopal Church, and has been a consistent member ever since, and for many years has acted in an official capacity, holding several offices in said church. On March 19, 1887, his beloved and amiable wife died of pneumonia after an illness of but four days. She was a woman of many noble virtues, a most devoted mother, self-sacrificing, kind, gentle, loving and affectionate.

Among the appointments made by Governor Hall during 1879 were those of James Parke Postles as adjutant-general of the State and George Gray to be attorney-general for five years from October 3d. James L. Wolcott was selected by the Governor as his secretary of State.

The Legislature this year was entirely Democratic. An act was passed in relation to tramps; it made it the duty of the corporate officers of every town to place at work "any person without a home in the town or hundred in which he may be found wandering about, without employment and the regular and visible means of living."

A canvass of the votes for Governor by the Legislature showed the following result:

| COUNTIES. | Hall. | K. J. Stewart. | Scattering. | Total. |
|-----------------|-------|----------------|-------------|--------|
| New Castle..... | 6030 | 675 | 81 | 5686 |
| Kent | 2208 | 33 | 7 | 2248 |
| Sumner..... | 3492 | 2127 | 0 | 5619 |

Hall's majority over Stewart.....7807

The Senate adopted a resolution, introduced by Senator Sharpley, to grant no divorces during the session for cases cognizant before the Courts. The resolution passed both Houses, after the amendment by the House that in cases considered, one or more responsible witnesses should be summoned.

Acts were passed requiring a stamp on oleomargarine, to distinguish it from butter; to regulate the business of insurance companies doing business in the State; it provided for the establishment of an insurance department and an insurance commissioner to be appointed by the Governor, who is to be an expert accountant and to give two thousand dollars security for the performance of his duties, which are described as follows: To see that all the insurance laws of the State are enforced, all companies to show certified copies of their charters and names and residences of their agents, examine into the affairs of the companies when he deems it advisable, to revoke charters and apply to the courts for the appointment of receivers when either fraudulent or insolvent, to

publish annually a statement of the assets and liabilities of companies doing business in the State and to make a biennial report to the Legislature of his acts during the two years.

The Legislature also decided to refund the State debt to the amount of \$800,000. The debt outstanding consisted of \$500,000 in bonds due in 1885, and \$300,000 in bonds due in 1890, all at six per cent. These were refunded at four and one-half per cent. bonds, due in 1900. The total State debt for the year was \$953,000, with no floating debt and an excess of \$165,799 over the former amount.

Unsuccessful efforts were made to pass acts creating a board of railroad commissioners, for the enrolment of the State militia, to grant local option to towns and to establish a State Board of Health. It was decided to remove the New Castle County court-house from New Castle to Wilmington.

During the year the fruit crops of the State were large. The centre of the fruit district was this year at Dover and the district about Milford. Here were extensive establishments for the putting up of fruits. The entire fruit district was estimated at twenty-nine thousand five hundred acres.

As set forth in the biennial report of the State Treasurer, Robert J. Reynolds, in 1880, the amount of State bonds outstanding at the end of 1880 was \$869,000, \$106,000 of bonds having been canceled within the two years. The interest-bearing investments held by the State, on account of the general fund, amount to \$673,050, and also investments amounting to \$448,999 for the benefit of free schools, consisting of the main part in bank stock. There was also a balance of assets over indebtedness, amounting to \$253,049.

On January 19th, and succeeding days, Judge Bradford, of the United States Circuit Court, listened to an argument for the appointment of United States supervisors of elections to attend the Levy Court and control the listing of voters. Anthony Higgins, representing the Republicans, made the argument in favor of the application, and Attorney-General George Gray and George H. Bates spoke against their appointment. Judge Bradford decided that supervisors of election could be appointed, upon due application, under the act of Congress to guard and scrutinize the assessment lists and the lists of electors made out from these and furnished to the inspectors of elections.

The case of the negro, William Neal, who was tried and convicted of rape, and sentenced to death, was taken, after a regular trial and conviction, to the United States Courts on an application of Counsel Anthony Higgins, to stay the execution of the sentence pending an investigation of the Supreme Court into the constitutionality of the mode of trial, and obtained an order to that effect from the Federal judge. The counsel had previously applied to the Superior Court of the State to transfer the case to the Federal Courts; but this they had unanimously

refused to do. The plea upon which the application was granted was that there was no negro on the jury which tried Neal, and that the trial was vitiated by the studied omission of colored men from the jury lists, which amounted to a breach of the Fifteenth Amendment to the United States Constitution.

Touching the mooted questions of the limits of Federal and State authority, which had come up during the year, Governor Hall, in his message, said:

"The repeated exercise of jurisdiction by Federal authorities over affairs purely of a domestic or local nature, such as the appointment of officers to supervise the assessment of persons in this State, and the interference with the administration of criminal justice, by challenging the State methods of constituting and organizing juries, have forcibly suggested allusion to this subject. It was hoped that these, and kindred other arbitrary expedients, which were ostensibly devised for the attainment of temporary ends, would disappear with the excitement out of which they were born. But in this we have been disappointed. The reaction of public sentiment which followed the partial subsidence of the unreasoning passions of men did not re-enthroned in the popular heart that sentiment of patriotism which alone is capable of subordinating the lusts of ambition to the sober dictates of reason, and of inspiring and shaping a governmental policy in accordance with the genius and spirit of our free institutions—a policy which raised this government from the condition of a few feeble States to the greatest power among the nations of the earth.

"This unwarranted assumption of power, clearly belonging to the States, which was first demanded as a temporary concession to the exigencies growing out of physical strife, is now claimed as a permanent right, based, as it appears, on no higher grounds than the absurd notion that the States are mere *quasi* corporations, subject to the control of a central visitatorial power, lodged in the Federal government. If this theory, which is at variance with all our ideas of republican government, is followed out to its logical conclusion, then those local institutions with which our dearest and fondest traditions are associated will be gradually drawn into the unyielding grasp of the Federal government, and the State governments will be nothing more than mere shells or empty forms, in which despotism will mask its hideous plots and conspiracies against the rights and privileges of humanity.

A serious election riot occurred in Wilmington on Saturday, the 16th of October, during a Democratic parade. While the procession was opposite the National Hall, Ninth and Walnut Streets, the paraders were attacked by a large number of negroes in the building. Pistols were fired into the building, and shot-guns from it by the negroes. The latter sought shelter in the houses and behind fences, from which points of vantage they were speedily dislodged

by the whites, who were much more numerous. The negroes were routed, and the excitement continued for several days. A number of persons were severely injured, but none killed.

The peach crop in 1880 amounted to about 4,109,000 baskets, or about 3,000,000 baskets less than the great crop of 1875. The bulk of the crop in 1879 was gathered in the southern part of the peninsula. In 1880 the most prolific section was the belt of country stretching from one bay to the other, north of North Murderkill, and south of Pencader and Lion Hundreds. The largest shipments were from Middletown and Smyrna.

The Republican State Convention to select delegates to the National Convention at Chicago met at Dover, May 6th. Resolutions were adopted declaring the party in Delaware in accord with the National party, declining to recommend any candidate for President and giving the delegates to the National Convention the free exercise of their judgment upon all questions.

The Greenback Party held a convention the same day, and adopted as a platform the principles of the National Greenback Party, and in favor of increasing the amount of exemption from debt to seven hundred dollars.

The Democratic Convention for delegates was held on the 25th of May, and another Democratic Convention for the nomination of a candidate for Congress, held on the 24th of August, at Dover, re-nominated E. L. Martin for Congress. The platform commended the rapid reduction of the State debt, and attributed it to "wise and economical administration of the State government by the Democratic administration; that continued control of the State was necessary to protect the citizens against the encroachment of the liberties of the people by the leaders of the Republican Party."

The Republican Convention was also held at Dover, on September 2d, and nominated Associate Judge John W. Houston as a candidate for Congress. The platform on State matters declared in favor of representation according to population, district representation, election of all officers by the people, a more liberal exemption law, and for the repeal of the assessment laws.

The returns of the November election gave a majority for the Hancock and English electors of 1039, out of a total vote of 29,444; a majority for the Democratic candidate for Congressman over the Republican of 692, out of a total vote of 29,356. The Republicans elected their full ticket in New Castle County, and the Democrats in the two lower counties. Judge Houston gave notice that he would contest the seat of Mr. Martin in the National House of Representatives, on the ground that nine hundred illegal votes had been cast for Mr. Martin, and that the same number of citizens who possessed a constitutional right to the franchise, and who would have given him their suffrages, were prevented, through irregu-

larities of registration, from voting. The object was to invite a Congressional inquiry into the assessment laws. The contest was subsequently abandoned.

At the Legislature of 1881 a bill was passed appointing an assistant superintendent of public schools at a salary of eight hundred dollars and a State Board of Education, to consist of the Secretary of State, president of Delaware College and the superintendent of public schools, was created. The Governor in his message to the Legislature called attention to "the open and unblushing bribery and intimidation alleged to have been practiced at the recent elections in this State," and urged that body to pass some act to secure the purity of the ballot. The message referred particularly to the undue influence used by employers with their employees, and in consequence the Legislature passed an act making it a criminal offense for any employer to attempt to influence an employee in the exercise of the right of suffrage. Among the other acts passed at this session were, to authorize the establishment of local boards of health, to provide for the registration of marriages, births and deaths, to require fire-escapes on buildings, to provide a uniform ballot for elections, to prevent political parades in the night time, to create the office of fish commissioners and appropriating one thousand two hundred dollars for the militia of the State (the first State aid given).

The Legislature re-elected Hon. T. F. Bayard United States Senator by a vote on joint ballot of Bayard 22, Higgins 8, and provision was made for the proper celebration of the centennial of the battle of Yorktown.

The State treasurer, in his report, in 1882, showed a balance over all indebtedness of \$399,934.98.

The Republican State Conventions that met in Dover July 27, 1881, declared as their platform in favor of protection to American industries, that the Democratic party was not worthy of the confidence of the people, arraigned the Democratic party for a number of alleged evils, and in favor of a constitutional convention to amend the Constitution. Upon this platform Albert Curry, of Sussex, was nominated for Governor and Washington Hastings, of Wilmington, for Congress.

The Democratic Convention met August 22d. The platform lauded the "honest administration of State affairs," and declared that "not a dollar had been lost to the State by the defalcation of a Democratic official," condemned the Neal case, in favor of justice to New Castle County, either by constitutional convention or legislative enactment, and defended the assessment laws. Charles C. Stockley was nominated for Governor and Charles B. Lore for Congress. The election, which followed resulted in the choice of the Democratic ticket, Stockley receiving 16,558, Curry, 14,620—majority for Stockley 1938. Lore, 16,563, Hastings, 14,640—majority for Lore 1923. The Democrats elected every member of the Legis-

The literature is silent that the Federal States of Latin America to expand the drug use, and consequently, the production of drugs in the region is known.

The South Association, the first step in the other direction, held a series of meetings in the State Convention Hall, July 27, 1884, and the association of the two was a result. Thereafter the two were not worthy of the people's attention. During the late of August, 1884, the two were merged into one of the two, the platform. A great change in the political and economic situation, for Congress.

$$\begin{aligned} & \mathbb{E}[\|\tilde{e}_t\|_2^2] \leq \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] + \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] + \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] + \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] \\ & \leq \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] + \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] + \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] + \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] \\ & \leq \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] + \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] + \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] + \frac{1}{2} \mathbb{E}[\|\tilde{e}_{t-1}\|_2^2] \end{aligned}$$

the 1980s, the Commission has been successful in persuading the Council to accept a number of important measures. The Commission has been able to secure the Council's agreement to a number of measures which would have been unlikely to have been adopted by the Council alone. The Commission has also been successful in persuading the Council to accept a number of measures which would have been unlikely to have been adopted by the Council alone.

the authors. Finally, the authors are grateful to the referees for their constructive comments, which improved the structure of the paper. Correspondence: Patrick W. Miller, patrick.w.miller@unsw.edu.au.

It is not surprising that the first step in the process was to identify the role of the American and international community in the construction of the new state, and that the role of the United States was particularly emphasized. A study by Professor Robert L. Brown, "The Role of the United States in the Construction of the New State of Mexico," was published in the *Journal of American Studies*. The professor argued that the United States had played a significant role in the construction of the new state, and that the United States had been instrumental in the process of the State's reconstruction and development. He also noted that the United States had been instrumental in the process of the State's reconstruction and development, and that the United States had been instrumental in the process of the State's reconstruction and development.

Chas. L. Stockley

lature. Governor Stockley was inaugurated January 16, 1883, and Hon. Eli Saulsbury was re-elected United States Senator.

Charles C. Stockley, Governor of Delaware, was born in Georgetown, Sussex County, November 6, 1819. His father, Jehu Stockley, was a native of the same county, and during his lifetime one of its prominent and representative citizens. He enjoyed the confidence of the people in a large degree, and filled several public offices of trust and responsibility, the duties of which he discharged with credit to himself and satisfaction to the people. He died in August, 1830, at the early age of forty-three years. The mother of Governor Stockley was Hannah Rodney Kollock, daughter of Philips Kollock, and a niece of Daniel, Caleb, Thomas and John Rodney, prominent and influential citizens of the State. Daniel Rodney became Governor of Delaware, and Caleb, his brother, being Speaker of the Senate upon the death of Governor John Collins, also became *ex officio* Governor. Mrs. Stockley died in 1856, in the sixty-sixth year of her age.

Governor Stockley received his early education in his native county, and completed his studies at a select school in the city of Philadelphia. He began his business life as a clerk in Georgetown, and afterwards filled a similar position in a store in Philadelphia. He returned to Sussex County in 1839, and taught school until 1846, occasionally assisting as clerk in the neighboring stores. In 1846 he entered into business for himself, opening a general store at Millsboro', where he continued until 1856. In the year 1852 he was appointed county treasurer, and held that office for two terms. In 1856 he was elected sheriff of the county, and performed the duties of the place for the full term. In 1873 he was elected to represent Sussex County in the State Senate, and was chosen Speaker in the year 1875, performing his duties as presiding officer in an efficient and capable manner and adding greatly to his popularity. Being during the whole of his life an active, earnest and successful worker in the cause of Democracy, he was not lost sight of after his retirement from the Senate, and on August 22, 1882, received, without seeking it, the nomination of the Democratic party as Governor of the State. The nomination was followed by election, and it is a matter of current history to-day that the administration of Governor Stockley was characterized by an honest, intelligent and successful discharge of the high duties of the gubernatorial office, and met with the sincere approval of the people of the State.

Aside from his political career, Governor Stockley has led an active and successful business life, and identified himself closely with the material development of his section of the State. As early as 1860 he was warmly interested in the welfare of the Junction and Breakwater Railroad, and served efficiently as a member of the board of directors until the completion of the road. He was also active in securing

the charter of the Breakwater and Frankford, and Worcester Railroad Companies, which are important links connecting those roads with the Junction and Breakwater road. He was president of the Breakwater and Frankford Railroad for several years, but resigned most of his railroad connections after his nomination as Governor—retaining, however, the position of director in the Worcester road.

Governor Stockley is also president of the Farmers' Bank, at Georgetown, and connected with other important business enterprises in Sussex County. He owns a large quantity of land in the county and devotes much of his time to farming and fruit-growing. He has always felt a deep interest in the public school system of the State, and done all that he could to promote its prosperity. He is of a kind and genial disposition, possessed of fine judgment and superior business ability, is an enthusiastic sportsman, and ever manifests a warm and steadfast fidelity to his friends. His integrity of purpose and deed, and the purity of his public and private life have never been questioned. He married, in 1857, Miss Ellen W., daughter of James Anderson, a highly respected citizen of Sussex County, for many years cashier and afterwards president of the Farmers' Bank, at Georgetown, and has had one daughter, Hannah E., wife of Judge John H. Paynter, of the Superior Court of Delaware.

Governor Stockley, in his inaugural address in 1882, recommended the amendment of the Constitution, three school superintendents in place of one, and opposition to any change of the liquor law.

The Legislature proposed amendments to the Constitution, increasing the number of Representatives, one in relation to the judiciary, and one providing for a genuine corporation act. It also, at the session of 1883, passed acts to prevent the procurement of abortion, a general incorporation act to establish a State library, and an act making the forming of an opinion in a capital case a disqualification for jury service.

In 1884 the report of the State treasurer showed an excess in the treasury of \$329,049. The convention of the Republican party, which met at Dover September 30, 1884, denounced the proposed amendments to the Constitution, and nominated Anthony Higgins for Congress. The Democratic Convention met October 1st, and renominated Mr. Lore. The result of the vote was Lore, 17,054; Higgins, 12,978. The vote for Presidential electors was, Republican 12,951; Democratic 16,964. The entire Democratic legislative ticket was elected.

The Legislature of 1885 refused to pass the Constitutional amendments, and elected Attorney-General Gray United States Senator to fill out Secretary of State Bayard's unexpired term. The Democratic Convention, which met August 17, 1886, nominated Benjamin T. Biggs for Governor, and John B. Pennington for Congress. The Republicans held no convention, and the Temperance Reformers nomina-

ted James R. Hoffecker for Governor, and R. M. Cooper for Congress. The vote for Governor was, Biggs, 18,943; Hoffecker, 7732. The Governor, in his message to the Legislature in 1887, again recommended the Constitutional amendments, the purchase of a State insane asylum and State prison.

Governor Biggs was inaugurated January 18, 1887, in the presence of both Houses of the General Assembly. His inaugural address took strong grounds against reappointments to office and in favor of a Constitutional Convention. The Legislature passed a number of important laws, among which were one authorizing the people to vote for or against a Constitutional Convention, to make husbands support their wives and children, and making three superintendents of schools instead of two. During the session an act was passed refunding two hundred and fifty thousand dollars of the State debt at three per cent.; the loan was immediately taken at par.

Benjamin Thomas Biggs, present Governor of Delaware (1887), was the eldest son of John Biggs, a farmer of Pencader Hundred, New Castle County. He was born October 1, 1821. In his youth he attended the schools of his neighborhood, studying the branches of instruction usually given in the private schools of that time. When nineteen years of age he went as a student to Pennington Seminary, New Jersey, an institution under the care of the New Jersey M. E. Conference. After two years of study there he taught a private school for two years, and then entered the Wesleyan University at Middletown, Connecticut. Returning home from this institution, he engaged in farming, a pursuit which is particularly agreeable to his tastes, and cultivated, on his father's lands, cereals and peaches for twenty years. Although agricultural pursuits are his chief delight and occupation, his natural and acquired capacity for public responsibilities brought him by a sort of natural affinity into the arena of public life. His taste and ability, both literary and forensic, have made him conspicuous in the discussion of questions of public interest. He has thus been a prominent figure in the assemblies of the people.

In 1846 he was commissioned by Governor William Temple major of the Delaware regiment, which was intended for service in Mexico in the event of war with that country. In 1852 he was elected a member of the convention that was called to amend the State Constitution. Ceasing, about this time, to be a Whig, because that party seemed to have fulfilled its mission, and declining to unite with the "Know-Nothing" party, because he deemed it too proscriptive, he began in 1854 to affiliate with the Democratic party, and has since been identified with it, both as a voter and public champion of its principles.

In 1860 he was a candidate of that party for Congress, but was defeated by Honorable George P. Fisher, by two hundred and forty-seven votes. In 1867 he was elected a director of the Queen Anne's and Kent County Railroad, and in 1874 was made

president of the company and remains in that position. In 1868 he was again nominated for Congress and was elected by a majority of three thousand three hundred. Two years afterwards he was renominated and again elected by two thousand five hundred and twenty-five majority. In 1877 he removed from his farm, which had been partly inherited, but chiefly purchased from the co-heirs of his father's estate, to Middletown, and now resides in the handsome residence that he built there.

After his service in Congress and return to his favorite pursuits on the farm he gave particular attention to the culture of peaches, and has had eminent success. He and his two sons now have sixty-seven thousand peach trees upon their lands in Queen Anne's and Kent Counties, Md., whither the culture has drifted year by year, on account of the "yellows," from Northern and Central Delaware. These trees at the lowest estimate will yield a basket each per season. In 1887, by the advantages afforded by the Queen Anne's and Kent Railroad, this fruit netted to the grower eighty cents and one dollar per basket of five gallons. But Mr. Biggs was not to be permitted to remain in the quiet and congenial occupation of peach-culture. In 1886 he was selected by his party as their candidate for Governor of the State. After an exciting and vigorously conducted contest, both before and in the convention that nominated him, he was chosen as the candidate by a vote of one hundred and two out of one hundred and eighty ballots cast. His opponents, who, until the final ballot, had voted for four competitors, massed their suffrages upon one candidate with the result just stated. The people confirmed this choice by a majority of six thousand one hundred and ten over James Hoffecker, the nominee of the Republican party. Gov. Biggs is now (1888) in office.

He was married, May 18, 1853, to Miss Mary S. Beckman, of Griggstown, New Jersey. Three of their five children survive. John, a graduate of Princeton, who studied law with Victor Du Pont, Esq., of Wilmington, was admitted to the bar in November, 1879, and is now Attorney-General for the State, having been previously deputy under Attorney-General John H. Paynter. Jennie is a graduate of Wesleyan Female College, Wilmington, of the class of 1876 and lives at home with her parents. Willard is a graduate of Fort Edward, New York, and now lives at Middletown with his father, and with him gives attention to peach-culture and manages the real estate in Maryland. Governor Biggs is a busy man, but seems to thrive in the midst of his many activities. He enjoys excellent health and shows no sign of diminished vigor. He is a man of medium stature and well-preserved. Besides the cares of state, to which he gives his first attention, and the obligations of domestic life, his fellow-citizens have required him to give some of his counsels to their financial interests by retaining him as a director in the Citizens' National Bank, of Middletown, to

president of the company and remains in the same position. In 1868 he was again nominated for Governor and was elected by a majority of three thousand two hundred. Two years afterwards he was re-elected and again elected by two thousand two hundred and twenty-five majority. In 1877 he was elected from his farm which had been purchased from the estate of his father, to Middletown, and now resides in the house some residence that he built there.

After his service in Congress, and returning to his former pursuits on the farm he was particularly attentive to the culture of peaches, and has had considerable success. He and his two sons now have sixty-seven thousand five hundred trees upon their land in the Queen Anne's and Kent Counties, Md., which they have been planting year by year, on account of the "yellows," from Northern and Central Europe. These trees at the lowest cost have yielded from one to five per season. In 1887, by the adventitious of the Queen Anne's and Kent Railroad, to be added to the grove eighty cents and one quart of a basket of five gallons. But Mr. Begg was not permitted to remain in the position of a grove of peach culture. In 1886 he was selected as their candidate for Governor of the State. At an exciting and vigorously conducted campaign, both before and in the convention that was held, he was chosen as the candidate by a vote of one hundred and two out of one hundred and forty-five lots cast. His opponents, who, in the first place, had voted for four competitors, massed together upon one candidate with the result that the people confirmed this choice by a majority of one hundred and ten over one hundred. Hoocker, the nominee of the Republican Party, Gay Begg is now (1888) in office.

He was born May 18, 1803, to Messrs. Beckman, of Griggstown, New Jersey, their five children survive. John, of Princeton, who studied law at Du Pont College of Wilmington was elected in November, 1879, and is now Attorney of the State, having been previously deputy Attorney-General John H. Paynter, Jr., of the Wesleyan Female College, Wilkes-Barre, Pa., of 1876, and lives at home with his father. He is a graduate of East Howard Normal, lives at Middletown with his father, gives attention to peach culture, and real estate in Maryland. He is a Republican, but seems to take little part in the activities. He is a member of the Board of Directors of the Chesapeake and Delaware Canal, and was president of the same to which he gives his financial assistance. He is a member of the National Association of

1887, and upon his

which position he was chosen in 1869. He is also an active friend of every good cause, especially of religion and liberty, as is well-known by the interest he has publicly manifested in the unhappy condition of Ireland, whose wrongs and sufferings he greatly deploras. He is a member of the Methodist Episcopal Church of Middletown.

The people voted for a Constitutional Convention on November 1st, 1887, and it failed to pass, lacking one thousand votes of the number required by the existing Constitution. The State treasurer's report made to the Legislative committee of 1888 showed a balance in favor of the State of over \$300,000.

The want of all statistical information relating to the State, since 1880, compels reliance on the tenth census for all data relating to the present condition of the progress of the State. The gradual increase in population in each decade from the first census in 1790 to the tenth census in 1880, will be found in the following table:

| POPULATION FROM 1790 TO 1880, INCLUSIVE. | | | | |
|--|---------|---------------|---------|---------|
| Census. | White. | Free Colored. | Slaves. | Total. |
| 1790..... | 46,310 | 3,999 | 8,887 | 59,196 |
| 1800..... | 49,852 | 8,268 | 6,153 | 64,273 |
| 1810..... | 55,361 | 13,136 | 4,177 | 72,674 |
| 1820..... | 55,282 | 12,958 | 4,509 | 72,749 |
| 1830..... | 57,601 | 15,855 | 3,292 | 76,748 |
| 1840..... | 58,561 | 16,919 | 2,605 | 78,085 |
| 1850..... | 71,169 | 18,973 | 2,290 | 91,532 |
| 1860..... | 90,589 | 19,820 | 1,798 | 112,216 |
| 1870..... | 102,221 | 22,794 | | 125,015 |
| 1880..... | 120,166 | 26,442 | | 146,608 |

Of the total population in 1880, 74,108 were males and 75,500 were females; 137,140 were natives and 9468 foreigners; 120,160 were white, 26,442 colored, one Chinese and five Indians.

The density of population, ascertained by dividing the whole population by the total land area of the State was, for 1880, 74.8; for 1870, 63.7; for 1860, 57.3; for 1850, 46.7; for 1840, 39.8; for 1830, 39.2; for 1820, 37.1; for 1810, 37.1; for 1800, 32.8; for 1790, 30.2.

The distribution of the population in 1880 was 138,834 above 100 feet above sea level, as against 118,664 in 1870, and 7774 between 100 and 500 feet above sea level in 1880, as against 6351 in 1870.

The State ranks in population 37; in number of farms, 35; in aggregate value of farms, 34; in aggregate value of products 35; in number of manufacturing establishments, 35; in capital, 34; and in value of products, 28.

There was an increase in population of 17.27 per cent. over that of 1870, and of 6.75 per cent. in manufactures; and 44.44 per cent. in capital and 27.17 in products over 1870.

There were in 1880, 14,148 persons engaged in manufactures, of whom 12,248 were males, and 1864 females; of the males 401, and of the females 173, were between 10 and 15 years of age; 11,252 males and 1657 females were between 16 and 59 years; and 631 males and 34 females were 60 years and over. Of those engaged in manufactures, 12,327 were natives of the United States, 858 of Ireland, 342 of Germany,

473 of Great Britain, 19 of Scandinavia, 34 of British America, and 95 of other countries. The native per cent. was 87.13, and the foreign per cent. 12.87, the latter being distributed between 42.12 Irish, 18.78 Germans, 25.97 Great Britain, 1.04 Scandinavia, 1.87 British America, and 5.22 other countries.

The distribution of population by counties was as follows:

| | POPULATION BY COUNTIES. | | | | |
|-----------|-------------------------|------------------------|--------|-------------|---------|
| | State. | Per Cent. of Increase. | Kent. | New Castle. | Sumner. |
| 1790..... | 18,920 | | 18,920 | 19,680 | 20,488 |
| 1800..... | 64,273 | 8.7 | 19,554 | 23,361 | 19,358 |
| 1810..... | 72,674 | 13.0 | 20,495 | 24,429 | 27,750 |
| 1820..... | 72,749 | 0.1 | 20,793 | 27,899 | 24,057 |
| 1830..... | 76,748 | 5.4 | 19,913 | 29,720 | 27,115 |
| 1840..... | 78,085 | 1.7 | 19,872 | 33,120 | 25,093 |
| 1850..... | 91,532 | 17.2 | 22,816 | 42,780 | 25,936 |
| 1860..... | 112,216 | 22.5 | 27,804 | 54,797 | 29,615 |
| 1870..... | 125,015 | 11.4 | 29,804 | 63,515 | 31,696 |
| 1880..... | 146,608 | 17.2 | 32,874 | 77,716 | 36,008 |

MORTALITY STATISTICS.—The deaths in the State under 1 year in 100 born were, of whites, 11.96; colored, 14.81. The proportion of deaths to 1000 births in 1880 was, of males, 88.9; of females, 73.5; of whites, 85.4; of colored, 67.2. The total deaths in census year were 2212, at rate 15.09 per 1000, of which 891 or 14.66 per 1000 were males; 846 or 14.25 per 1000 were females; 222 colored males, or 16.65 per 1000; and 253 colored females or 19.29 per 1000.

THE MERCHANT TONNAGE of the State was conducted by 25 steamers, of 5877.07 tons, valued at \$302,300, with capital invested of \$497,800, carrying crews numbering 239 persons, with gross earnings of \$139,993, paying for services \$55,289, with a passenger traffic of 67,590 persons, a freight traffic of 152,960 tons, using 8461 tons of coal and 1749 cords of wood. There were 159 sailing craft registered, with 12,127.56 tons, valued at \$303,175, and 1 canal boat, of 150 tons, valued at \$2600; 9 barges, of 1342.37 tons, valued at \$45,500; 6 flats, of 300 tons, valued at \$3500.

The "true" value of real and personal estate, in 1850, was \$21,062,556, being \$230 *per capita*; in 1860, \$46,242,181, or \$412 *per capita*; in 1870, \$97,180,833, or \$777 *per capita*; in 1880, \$136,000,000, or *per capita* \$928. The total assessed valuation for taxation, in 1880, was \$59,951,643.

STATE INDEBTEDNESS.—There was deposited with the State, under the act of Congress of June 23, 1836, \$286,751.49, and under the act of August 4, 1790, the United States assumed \$59,161.65 of the State's Revolutionary indebtedness.

In January, 1880, the State had a funded debt of less than \$1,100,000, and at that date had safe investments and cash in the treasury to an amount in excess of her debt. Prior to the Civil War the State had no bonded debt, and the first bonds, amounting to \$1,000,000, were issued January 1, 1865. This is known as the war loan, and of this amount \$588,000 has been redeemed, leaving outstanding, in 1880, \$512,000, which became due in 1885. By act of the General Assembly, January, 1867, a further loan of \$400,000 was negotiated, of which amount there has been redeemed, in January, 1880, the sum of \$170,000.

The remainder of this loan will mature January 1, 1890.

On January 1, 1874, a loan of \$200,000 was made, of which \$116,000 remained unpaid January 1, 1880. These last two loans are called the internal improvement bonds, the issues having been loaned to certain railroad companies within the State.

The State holds first mortgage bonds on the railroads, and the interest is promptly paid. The outstanding debt on January 20, 1880, was \$918,000, and the floating debt (for school purposes), \$22,000, made a total of \$940,000. At that date the State's assets consisted of:

| | |
|--|-----------------------|
| Mortgage on Junction & Breakwater Railroad..... | \$400,000.00 |
| Mortgage on Breakwater & Frankford Railroad..... | 200,000.00 |
| Stock in Farmers' & Delaware Banks..... | 73,050.00 |
| Investments for use of schools..... | 442,000.00 |
| Cash on hand..... | 79,168.75 |
| Total assets..... | \$1,290,307.75 |
| Floating and funded debt..... | 940,000.00 |
| Balance in favor of the State..... | \$290,307.75 |

There is no constitutional provision restricting the Legislature, or any county, city or other municipality, from incurring debts, subscribing to stock or loaning their respective credit.

AGRICULTURE.—There were in 1880, 8749 farms, embracing 1,090,245 acres inclosed, of which 746,958 acres were improved and 343,287 acres unimproved. The value of these farms was \$36,789,672; that of the farming implements was \$1,504,567; that of the live stock on the farms was \$3,420,080; the buildings were valued at \$228,592; and the fertilizers used in 1879 were valued at \$467,228. The products of the farms amounted to \$6,320,345. The sizes of the farms were as follows: 4 farms under 3 acres, 311 between 3 and 10 acres, 484 between 10 and 20 acres, 1205 between 20 and 50 acres, 2039 between 50 and 100 acres, 4631 between 100 and 500 acres, 66 between 500 and 1000 acres, and 7 over 1000 acres. The average size of farms in the State was 125 acres.

Of these farms, there were in *Kent County* 2473, embracing 319,609 acres, of which 54 farms were under 10 acres, 127 farms between 10 and 20 acres, 335 farms between 20 and 50 acres, 554 farms between 50 and 100 acres, 1370 farms between 100 and 500 acres, 30 farms between 500 and 1000 acres, and 3 farms over 1000, the average size of farms being 129 acres.

In *Kent County* there were 7332 horses, 1415 mules and asses, 913 working-oxen, 7275 milch cows, 6210 other cattle, 6297 sheep, 11,830 swine; the wool-clip was 30,425 pounds. There were 80,912 gallons of milk, 419,312 pounds of butter, 362 pounds of cheese and 740 pounds of tobacco.

In *New Castle County* there were 2061 farms, embracing 253,939 acres, divided into 2 farms under 3 acres, 116 between 3 and 10 acres, 161 between 10 and 20 acres, 284 between 20 and 50 acres, 451 between 50 and 100 acres, 1035 between 100 and 500 acres, 10 between 500 and 1000 acres and 2 over 1000 acres, the average size being 123 acres. In this

county there were 8488 horses, 884 mules and asses, 612 working-oxen, 13,036 milch cows, 7451 other cattle, 7795 sheep, 11,978 swine, 36,796 pounds of wool, 938,867 gallons milk, 1,072,350 pounds of butter and 558 pounds of tobacco.

In *Sussex County* there were 4215 farms, embracing 516,697 acres, divided as follows: 2 farms under 3 acres, 141 between 3 and 10 acres, 146 between 10 and 20 acres, 586 between 20 and 50 acres, 1034 between 50 and 100 acres, 2221 between 100 and 500 acres, 26 between 500 and 1000 acres and 4 over 1000 acres. The average size of the farms was 123 acres. There were in this county 6133 horses, 1632 mules and asses, 4293 working-oxen, 6973 milch cows, 6789 other cattle, 7875 sheep, 24,378 swine, 30,725 pounds of wool, 103,595 gallons of milk, 384,613 pounds of butter and 1350 pounds of tobacco.

The cultivation of the farms was, in *Kent County*, 1313 by the owners, 134 were rented for a fixed money rental, and 1526 were rented on shares of product. In *New Castle* 1220 farms were cultivated by owners, 271 rented for fixed money rental, and 570 rented for shares of product. In *Sussex* 2508 farms were cultivated by owners, 106 rented for fixed money rental, and 1601 rented for shares of products.

The agricultural products of the State and the acreage of crops was as follows: In barley 19 acres, producing 523 bushels; in buckwheat 397 acres, producing 5857 bushels; in Indian corn 202,120 acres, producing 3,984,264 bushels; in oats 17,158 acres, producing 378,588 bushels; in rye 773 acres, producing 5953 bushels; in wheat 87,539 acres, producing 1,175,272 bushels; of flax seed there were 4 bushels, 672 tons of straw and 130 pounds of fibre; of sorghum 25,136 gallons. In hay there were 42,688 acres mown and 49,632 tons saved, with 396 bushels of clover seed.

There were 268,692 barn-yard fowls, 96,207 other kind, and 1,427,087 dozen eggs. The apiarian products were 76,234 pounds of honey and 2151 pounds of wax.

There were 4 acres in tobacco, producing 1278 pounds, of Irish potatoes 283,864 bushels and of sweet potatoes 195,937 bushels.

The value of orchard products was \$846,692, and of market gardens \$166,575. The forest products were 103,890 cords of wood cut, valued at \$274,885. There were 21,967 fleeces clipped, weighing 97,946 pounds. Of pulse products there were 1056 bushels of peas and 1380 bushels of beans.

In 1870 the improved acreage in the State was 693,155, which in 1880 had increased to 746,958 acres. The production of wheat increased from 895,477 bushels in 1870 to 1,175,272 in 1880; Indian corn from 3,010,390 bushels in 1870 to 3,984,264 in 1880. The cash value of farms in 1870 was \$46,712,870; in 1880, \$36,789,672; of farming implements in 1870, \$1,201,644; in 1880, \$1,504,567.

MANUFACTURES.—The average number of male

hands employed in manufactures was, in 1880, 10,250 above sixteen years of age, 1426 females above fifteen years of age and 962 children and youths.

The total amount paid in wages during the year was \$4,267,349, and that expended for materials was \$12,828,461, and the value of manufactured products aggregated \$20,514,438. As compared with the years 1850 to 1880, the progress of the manufactures of the State will be seen in the following table :

| Census | No. of Estbs. | Capital. | Hands | Wages. | Material. | Products. |
|-----------|---------------|-------------|--------|-----------|-------------|-------------|
| 1850..... | 531 | \$2,978,945 | 3,888 | \$406,924 | \$2,864,007 | \$4,649,296 |
| 1860..... | 615 | 5,452,887 | 6,421 | 1,905,754 | 6,528,008 | 9,892,902 |
| 1870..... | 800 | 10,839,083 | 9,710 | 3,692,195 | 10,296,397 | 16,791,382 |
| 1880..... | 746 | 15,555,822 | 12,038 | 4,267,349 | 12,828,461 | 20,514,438 |

The wages paid in manufacturing establishments increased from \$936,924 in 1850 to \$1,905,754 in 1860; to \$3,692,195 in 1870; to \$4,267,349 in 1880.

The value of the material used increased in a like manner, rising from \$4,649,296 in 1850 to \$9,892,902 in 1860; to \$16,791,382 in 1870; to \$20,514,438 in 1880.

While the increase in population from 1870 to 1880 was 17.71 per cent., that of manufactures, while showing a decrease in number of establishments of 6.75 per cent., shows an increase of capital invested of 44.44 per cent., and an increase of 22.17 per cent. in the aggregate value of gross products. The products of carpentering were valued in 1880 at \$313,255, being a *per capita* product of \$2.14, and that of blacksmithing was valued at \$148,663, which was a *per capita* product of \$1.01.

POWER FOR MACHINERY.—The total steam and water-power reduced to horse-power was in 1870, for the whole State 8533, and in 1880 for the whole State 15,428, being an increase of 80.80 per cent. In 1870 the proportional amount of steam and water-power was, for steam, 50.54 per cent.; for water, 49.46 per cent. In 1880 these proportions were, for steam 68.98 per cent., and for water 31.02 per cent. The State ranks 32 in total power, 0.45 in total steam-power and water-power, 31 in water-power, 0.39 in total water-power, 33 in steam-power and 0.49 in steam-power.

With an area of 1960 square miles, there was 7.87 per cent. horse-power of total steam and water-power per square mile, 2.44 per cent. horse-power of water-power per square mile, and 5.43 per cent. horse-power of steam-power per square mile.

There were 317 establishments with 232 wheels, using 4785 horse-power driven by water, 365 boilers with 254 engines of 10,643 horse-power, and a total of 15,428 horse-power in the State. Of these establishments, 6 were for agricultural implements, 1 for carriages and wagons, 10 for cotton goods, 81 flouring and grist-mills, 14 foundries, 7 iron and steel, 86 lumber, 4 paper, 5 woolen, 103 all other industries.

COTTON INDUSTRY.—There were in 1831, 10 cotton manufactories with 24,806 spindles; in 1850, twelve establishments; in 1860, 11, with 38,974 spindles; in 1870, 6 establishments with 29,534 spindles; and in 1880, 8 establishments with 46,188 spindles. In 1831

there were 235 looms; in 1860, 986; in 1870, 771; in 1880, 822. In 1831 there were 1373 persons employed; in 1850, 838; in 1860, 1109; in 1870, 726; in 1880, 791. The capital invested in 1831 was \$384,500; in 1850, \$460,100; in 1860, \$582,500; in 1870, \$1,165,000; and in 1880, \$874,500. The wages paid in 1860 were \$220,224; in 1870, \$190,069; in 1880, \$192,727. The cotton consumed in 1831 was 1,435,000 pounds; in 1850, 2,128,500 pounds; in 1860, 3,403,000 pounds; in 1870, 2,587,615 pounds; in 1880, 3,236,184 pounds. The value of the material used in 1850 was \$312,068; in 1860, \$570,102; in 1870, \$704,733; in 1880, \$527,205. The number of manufactured goods in 1850 was 1,201,500 pounds; in 1870, 2,437,649 pounds; in 1880, 2,867,969. The value of manufactured products in 1850 was \$538,439; in 1860, \$441,703; in 1870, \$1,060,898; in 1880, \$871,007.

WOOL MANUFACTURE.—There are five establishments for the manufacture of wool, with a capital of \$352,559—using 13 sets of cards, with a daily capacity of 1700 pounds, with 26 broad looms and 99 narrow looms and 1 hand loom; 4306 spindles. The operatives employed are 168 males, of whom 23 are under sixteen years; and 59 females, of whom 8 are under fifteen years; total number of employees, 258, whose wages and salaries aggregated for the year \$108,504; consuming during the year 203,206 pounds of foreign wool in the condition purchased; also 633,677 pounds of domestic wool in the condition purchased, and 488,278 pounds of scoured wool, all valued at \$291,138. There were also used 20,684 pounds of camel hair and noils, valued at \$11,822, with 30,100 pounds of cotton, valued at \$3620, and 346,778 pounds of shoddy, valued at \$77,915; and 25,000 pounds of cotton warp, valued at \$5000. The value of chemicals used was \$13,139. There was consumed 360 cords of wood, valued at \$864; also 1033 tons of coal, valued at \$4533. The total value of all materials used was \$448,285, and the value of products \$665,253. The products were 835,140 yards of cloths, cassimeres, doeskins, diagonal and suitings, and 8121 yards of kerseys, 500 pounds of woolen yarn, 8000 pounds of woolen rolls.

EARLY MANUFACTURE OF IRON.¹—The earliest mention of "Iron Hill," in Delaware was in 1663, by Vice-Director de Hirngossa, and is found, in 1684, in the first volume of the Colonial Records of Pennsylvania, where it is said that James Bowle lived near "Iron Hill," about eight miles from New Castle. This was in 1684, and this same "Iron Hill" is mentioned in Oldmixon's "British Empire in America," edition of 1708, in referring to New Castle County, then in Pennsylvania, but now in Delaware, as a place called "Iron Hill, from iron ore found there."

On the 24th of September, 1717, the Governor of Pennsylvania, Sir William Keith, wrote to the Board of Trade in London that he had found great plenty of

¹ For further particulars on the early manufacture of iron in Delaware, see histories of Mill Creek and Pencader Hundreds, in New Castle County, and Nanticoke, Northwest Fork, Broad Creek and Dagaborough Hundreds elsewhere in this work.

iron ore in Pennsylvania; and Bishop notes that Sir William Keith had iron works in New Castle County, Del., erected previous to 1730, and probably during his administration, from 1717 to 1726. This enterprise consisted of a furnace and a forge, which were located on Christiana Creek, and are said to have had a short life. Iron was, however, made in the bloomeries on the Christiana and its branches after 1730, and there is a tradition that a furnace was in existence at the foot of "Iron Hill" after this date.

In the gable of an old Baptist Church near "Iron Hill" is a cast-iron plate, dated 1746, which is said to have been cast at this furnace. John Ball owned a bloomery on White Clay Creek, in New Castle County; and "between Brandywine and Christiana is an iron mill," is a remark in the 1741 edition of Oldmixon.

These references give all the exactness that is now possible of the early history of the first iron enterprises in the State.

From Bishop it is learned that in Sussex County, at the southern extremity of the State, there was "bog ore in the shape of a very pure hydrate, yielding from 53 to 66 per cent. of iron;" that it existed in large beds in the vicinity of Georgetown and on the branches of the Nanticoke and Indian Rivers, and that the manufacture of iron and castings was carried on before the Revolution to a considerable extent. "The compact hydrated peroxide of some of these beds has, since the early part of this century, been raised in quantities for exportation, and the local production of iron is less than it might have been."

In the "Report on the Arts and Manufactures of the United States," by Tench Coxe, in 1810, five forges in Sussex County are mentioned as producing in that year two hundred and fifteen tons of iron; but there is no mention of any blast furnace in the State. Bog ore from near Milton, in Sussex County, was at one time taken to Millville, N. J., to be smelted in a furnace at that place, which was built in 1815. This shipment of ore ceased about 1853.

Judge Caleb S. Layton, of Georgetown, in Sussex County, makes mention of a blast-furnace, about 1815, established at Millsborough, on the Indian River, about eight miles south of Georgetown, by Colonel W. D. Waples and others, and that a foundry was in connection with this furnace, an interest in which was purchased in 1822 by the Hon. Samuel G. Wright, of New Jersey, whose son, Colonel Gardiner H. Wright, in 1830, obtained an interest also, and afterwards operated the furnace until 1836, when it went out of blast finally, while the foundry continued in operation until 1879. In 1859, according to Lesley, the "Millsborough Charcoal Furnace," owned by Gardiner H. Wright, of Millsborough, Sussex County, Del., is the only furnace in the State, and has not made iron for ten years; a cupola furnace is in activity beside it. It is learned from Mr. Francis Vincent, of Wilmington, that the castings for the Eastern Penitentiary of Pennsylvania, and for Moyamensing Prison, and the iron railings which once surrounded Indepen-

dence Square in Philadelphia, were cast at Millsborough furnace—presumably at the "Cupola furnace." Jonathan Vaughan and others built Deep Creek Furnace, on Deep Creek, Sussex County, in 1764. The company had a stone wharf at the head of Nanticoke River, and shipped its iron direct to England. This iron was named "Old Meadow." In 1828 and in two subsequent years Millsborough furnace and foundry produced four hundred and fifty tons of pig-iron and three hundred and fifty tons of castings.

A slitting and rolling-mill near Wilmington, Del., was in operation in 1787-88, to which Swedish and Russian iron were sent, and the strips cut and rolled for the nail-works of J. G. Pierson & Brothers, of Ramapo, Rockland County, N. Y., there being no other rolling and slitting-mill available at that time. In 1810 there were three rolling and slitting-mills in New Castle County. Lesley stated in 1859 that the Delaware Iron-Works, located five miles northwest of Wilmington, owned by Allan Wood, of Philadelphia, and built in 1812, "began to manufacture sheet-iron thirty years ago in what had been a nail-plate works. At that time only Townsend, in New Jersey, made sheet-iron." Marshall's rolling-mill, on Red Clay Creek, two miles west of Newport, was built in 1836. The Wilmington Rolling-Mill, near Wilmington, was built in 1846. The Diamond State Rolling-Mill, at Wilmington, was built in 1834. These were the only rolling-mills existing in the State in 1859. Others have been built since. The business of iron ship-building, so extensively conducted at Wilmington, has since been added.

The "iron hill" referred to is situated about twelve miles from Wilmington, and near the Pennsylvania line. Ore taken from that "hill" has been used at Principio furnace, Cecil County, Md., since 1847. This ore has also been used in some furnaces in Pennsylvania. Previous to 1847 the mines had been worked but little.

IRON AND STEEL MANUFACTURES.—Delaware's rank in the production of iron and steel in 1870 and 1880 was nineteen, notwithstanding in 1870 her production was 8317, out of a total for the whole country of 3,655,215, and in 1880 her production was 33,918, out of a grand total of 7,265,140 tons. There were in the State 9 iron rolling-mills, employing \$1,431,469 of capital and 867 hands, of whom 818 are above sixteen years, and 49 below sixteen years, with an average of 56 hours per week of work, with \$2.49 as the average day's wages for a skilled mechanic, and \$1.17 for an ordinary workman; the total amount paid in wages during the year was \$344,476. The number of charcoal forge fires was 5; of single puddling furnaces, 35; of heating furnaces, 33; of hammers, 8; of trains of rolls, 28; the total daily capacity of tons of rolled iron was 141 tons. The number of tons of iron ore used was 3235, valued at \$20,090; of pig iron, 12,948, valued at \$299,795; of iron rails, 9500, valued at \$285,000; of old or scrap iron, 11,432, valued at \$301,322; of hammered iron-ore blooms,

1986, valued at \$84,240; of hammered pig iron or scrap blooms, 416, valued at \$14,523; of purchased muck bar, 908, valued at \$45,543; bushels of charcoal used, 65,139, valued at \$5957; of anthracite coal, 4829, valued at \$18,195; of bituminous coal, 35,058, valued at \$116,530. The value of all other materials was \$22,855, making the total value of all materials, \$1,214,050. The products were 15,650 tons of bar iron, valued at \$939,000; 2200 tons of structural iron, valued at \$143,000; 1987 tons of skelp iron, valued at \$140,050; 5243 tons of sheet iron, valued at \$481,924; 1241 tons of boiler-plate iron, valued at \$111,690; 2482 tons of all other plate iron, except nail plate, valued at \$186,130; 1900 tons of all other rolled iron, valued at \$118,650; 3215 tons of all other finished products, such as horse-shoes, railroad spikes, wire, etc., valued at \$225,800. The total number of tons of all products was 33,918, of a value of \$2,347,177. This industry is located in New Castle County.

The State's show in the specified industries enumerated in the census of 1880 was as follows:

PAPER BAGS.—Delaware had one establishment with a capital of \$500, employing 4 hands over sixteen years of age, with annual wages of \$600, and value of material \$800, and value of products \$1800.

BASKETS.—There were eight of these establishments in the State, with \$60,725 of capital, employing 106 males over sixteen years, 29 females over fifteen years, 18 youths and children, paying in wages annually \$26,950, and for material \$42,700, and receiving for products \$110,725.

BELTING AND HOSE LEATHER.—In the State there was one establishment with \$30,000 capital, employing 10 males of over 16 years, paying for wages \$3500, for materials \$38,000, and receiving for products \$44,576.

BLACKSMITHING.—In the State there were 67 establishments with an aggregate capital of \$91,590, employing 157 males over 16 years, and 3 children and youths, paying in annual wages \$53,105, for material \$49,600, and receiving for products \$148,663.

BOOK-BINDING AND BLANK-BOOK MAKING.—In the State there were 2 establishments with \$4000 capital, employing 4 males over 16 years, 3 females over 15 years, paying \$2050 wages, for material \$3800 and receiving for products \$7000.

BOOT AND SHOE UPPERS.—In the State there was 1 establishment with a capital of \$6000, employ-

ing 3 males over 16 years, and 2 females over 15 years, paying for wages \$2000, and for material \$10,000 and receiving for products \$18,000.

BOOTS AND SHOES, INCLUDING CUSTOM WORK AND REPAIRING.—In the State there were 23 establishments with \$29,950 capital, employing 41 males over 16 years, and 2 females over 15 years, paying in wages \$13,870, and for materials \$15,210 and receiving for products \$45,714.

BREAD AND BAKERY PRODUCTS.—In the State there were 20 establishments with \$128,000 capital, employing 54 males over 16 years, 12 females over 15 years, and 15 children and youths, paying for wages \$27,220, and for materials \$108,280 and receiving for products \$175,565.

BROOMS AND BRUSHES.—In the State there were 2 establishments with \$1800 capital, employing 5 males over 16 years, paying in wages \$1450, and for materials \$2675 and receiving for products \$4500.

CARPENTERING.—In the State there were 34 establishments, with \$54,200 capital, employing 179 males over 16 years, paying \$61,322 in wages, and for materials \$180,280, and receiving for products \$313,255.

CARRIAGE AND WAGON MATERIALS.—In the State there were 10 establishments with \$130,500 capital, employing 114 males over 16 years and 8 children and youths, paying for wages \$50,250, for materials \$65,500, and receiving for products \$161,000.

CARRIAGES AND WAGONS.—In the State there were 15 establishments with \$452,270 capital, employing 397 males over 16 years, 1 female over 15 years, and 12 children and youths, paying in wages \$137,256, for materials \$272,098 and receiving for products \$500,567.

CAR, RAILROAD, STREET AND REPAIRS.—In the State there were 2 establishments, with \$559,100 capital, employing 760 males over 16 years, and 100 children and youths, paying in wages \$319,915, and for material \$775,900, and receiving for products \$1,185,688.

CLOTHING (MEN'S).—In the State there were 10 establishments, with \$77,150 capital, employing 56 males over 16 years, 43 females over 15 years and 1 child and youth, paying in wages \$27,549, for materials \$51,900 and receiving for products \$97,900.

COFFEE AND SPICES ROASTED AND GROUND.—In the State there was 1 establishment, with \$3000 capital, employing 1 youth, paying in wages \$500, for material \$5000 and receiving for products \$7000.

COFFINS, BURIAL CASES AND UNDERTAKERS' GOODS.—In the State there were 10 establishments, with \$22,600 capital, employing 15 males over 16 years, paying in wages \$6850, and for materials \$13,050 and receiving for products \$29,500.

CONFECTIONERY.—In the State there were 3 establishments, with \$49,000 capital, employing 16 males over 16 years, 2 females over 15 years, paying in wages \$5600, and for material \$18,000 and received for products \$35,000.

COOPERAGE.—In the State there were 2 establishments, with \$19,000 capital, employing 8 males over 16 years, and paying in wages \$2500, for material \$6500 and receiving for products \$12,000.

COPPERSMITHING.—In the State there was 1 establishment, with \$8000 capital, employing 7 males over 16 years, and paying in wages \$2000, for material \$9000 and receiving for products \$14,800.

DENTISTS' MATERIALS.—In the State there was 1 establishment, with \$20,000 capital, employing 9 males, and paying in wages \$5000, for materials \$10,000 and receiving for products \$18,000.

DYE STUFFS AND EXTRACTS.—There were in the State two establishments with \$17,000 capital, employing 19 males over sixteen years, and paying \$4000 in wages, and \$7000 for material, receiving for products \$15,400.

FERTILIZERS.—In the State there were 17 establishments with \$753,000 capital, employing 270 males over sixteen years, and paying in wages \$91,558, and for material \$442,316, and receiving for products \$657,250.

FOUNDRY AND MACHINE-SHOP PRODUCTS.—In the State there were 17 establishments with \$788,100 capital, employing 752 males over sixteen years, and 44 children and youths, paying in wages \$266,618, for material \$330,732 and receiving for products \$704,225.

FRUITS AND VEGETABLES, CANNED AND PRESERVED.—In the State there were 33 establishments, with \$396,379 capital, employing 428 males over sixteen years, 643 females over fifteen years, and 188 children and youths, paying in wages \$99,621, for material \$453,503, and receiving for products \$634,940.

FURNITURE.—In the State there were six establishments with \$43,500 capital, employing 25 males over sixteen years, two females over fifteen years, and one child and youth, paying in wages \$10,000, for material \$39,005, receiving for products \$113,375.

GREASE AND TALLOW.—In the State there was one establishment with \$15,000 capital, employing 4 males over sixteen years, paying in wages \$3000, and for material \$98,000, and receiving for products \$124,000.

GUNPOWDER.—In the State there was one establishment with \$1,000,000 capital, employing 248 males, paying in wages \$115,778, for material \$127,585, and receiving for products, \$243,365.

IRON BOLTS, NUTS, WASHERS AND RIVETS.—In the State there was one establishment with \$10,000 capital, employing 20 males over sixteen years, paying in wages \$6550, and for material \$28,044, and receiving for products, \$37,100.

IRON FORGINGS.—In the State there were 3 establishments, with \$51,000 capital, employing 155 males, paying in wages \$73,130, and for material \$424,337, and receiving for products \$585,581.

IRON PIPE, WROUGHT.—In the State there was one establishment, employing 618 males over 16 years, paying in wages \$245,278, for material, \$1,491,476, and securing for products \$2,000,000.

KINDLING WOOD.—In the State there were 4 establishments, with \$6800 capital, employing 15 males over 16 years, and paying in wages \$3975, and for material \$4150—receiving for products \$12,500.

LEATHER, DRESSED SKINS.—In the State there were 16 establishments, with \$926,500 capital, employing 848 males over 16 years, 61 females over 15 years, and 73 children and youths, paying in wages \$388,064, and for material \$1,350,860, and receiving for products \$1,886,597.

LIQUORS (DISTILLED).—In the State there was one establishment, with \$800 capital, employing 1 male over 16 years, paying in wages \$75, for material \$415, and receiving for products \$700.

LIQUORS (MALT).—In the State there were 2 establishments, with \$95,000 capital, employing 15 males over 16 years, paying in wages \$7370, for material \$38,959, and receiving for products \$66,998.

LOOKING-GLASS AND PICTURE FRAMES.—In the State there were three establishments, with \$1900 capital, employing 2 males over 16 years and 1 child and youth, paying in wages \$1850, for materials \$2400, and receiving for products \$6500.

LUMBER (PLANED).—In the State there were 7 establishments, with \$51,800 capital, employing 54 males over 16 years and 7 children and youths, paying in wages \$12,600, for material \$63,650, and receiving for products \$90,600.

MARBLE AND STONE WORK.—In the State there were 4 establishments, with \$28,500 capital, employing 34 males over 16 years, and paying in wages \$8700, for material \$10,700, and receiving for products \$23,900.

MASONRY, BRICK AND STONE WORK.—In the State there were 10 establishments, with \$21,370 capital, employing 78 males over 16 years, and 2 children and youths, paying in wages \$22,975, and for material \$104,296, receiving for products \$172,590.

MATCHES.—In the State there was 1 establishment, with \$250,000 capital, employing 200 males over 16 years, and paying in wages \$44,000, for material \$446,727, and receiving for products \$550,000.

MINERAL AND SODA WATERS.—In the State there was one establishment, with \$5000 capital, employing 8 males over 16 years, and paying in wages \$2500, for material \$1000, and receiving for products \$6000.

MUSICAL INSTRUMENTS, ORGANS AND MATERIALS.—In the State there was one establishment, with \$2500 capital, employing 2 males over 16 years, and paying in wages \$200, for material \$200, and receiving for products \$1000.

PAINTING AND PAPER-HANGING.—In the State there were 6 establishments with \$3825 capital, employing 17 males over 16 years, and paying in wages \$4362, for materials \$8275, and receiving for products \$16,648.

PAINTS.—In the State there was 1 establishment with \$60,000 capital, employing 10 males over 16 years, and 1 youth, paying in wages \$5200, for material \$20,000, and receiving for products \$30,000.

PRINTING AND PUBLISHING.—In the State there were two establishments, with \$18,000 capital, employing 12 males over 16 years, and 1 minor, paying in wages \$5580, for material \$6500, and receiving for products \$14,500.

PUMPS (not steam).—In the State there was 1 establishment, with \$5000 capital, employing 4 males over 16 years, and paying in wages \$2100, for material \$3000, and receiving for products \$8000.

ROOFING AND ROOFING MATERIALS.—In the State there were 3 establishments, with \$10,500 capital, employing 16 males over 16 years of age, and paying in wages \$8344, for material \$11,500, and receiving for products \$29,500.

RUBBER AND ELASTIC GOODS.—In the State there was 1 establishment, with \$150,000 capital, employing 15 males over 16 years and 3 children and youths, paying in wages \$5000, for material \$40,000, and receiving for products \$66,662.

SADDLERY AND HARNESS.—In the State there were 17 establishments, with \$30,500 capital, employing 34 males over 16 years, paying in wages \$14,570, for material \$34,400, and receiving for products \$68,700.

SAWS.—In the State there was one establishment, with \$60,000 capital, employing 5 males over 16 years, and 15 children and youths, paying in wages \$6000, for material \$10,000, and receiving for products \$23,000.

SHIRTS.—In the State there was 1 establishment, with \$2000 capital, employing 2 males over 16 years, 5 females over 15 years, and 1 minor, paying in wages \$1800, for material \$6000, and receiving for products \$12,000.

SOAP AND CANDLES.—In the State there were 3 establishments, with \$14,800 capital, employing 12 males over 16 years and 1 youth, paying in wages \$5180, for material \$13,400, and receiving for products \$22,070.

SPORTING GOODS.—In the State there was 1 establishment with \$10,000 capital, employing 21 males over 16 years, 2 females over 15 years, and two children and youths, paying in wages \$5000, for material \$15,000, and receiving for products \$25,000.

SPRINGS, STEEL, CAR AND CARRIAGE.—In the State there were 2 establishments, with \$15,000 capital, employing 36 males over 16 years, and 2 children and youths, paying in wages \$11,600, for material \$45,000, and receiving for products \$65,500.

STONE AND EARTHENWARE.—In the State there were three establishments with \$12,000 capital, employing six males over sixteen years, and one youth, paying in wages \$1100, for material \$2350, receiving for products \$8500.

TINWARE, COPPERWARE AND SHEET-IRONWARE.—In the State there were 21 establishments, with \$134,600 capital, employing 71 males over sixteen years, and 29 children and youths, paying in wages \$34,658, for material \$95,463, and receiving for products, \$180,152.

TOBACCO, CIGARS AND CIGARETTES.—In the State there were 23 establishments with \$32,300 capital, employing 50 males over sixteen years, 13 females over fifteen years, and 14 children and youths, paying in wages \$31,628, for material \$45,692, and receiving for products, \$118,318.

TOOLS.—In the State there was one establishment with \$160,000 capital, employing 100 males over sixteen years, paying in wages \$52,000, for material \$65,000, and receiving for products, \$130,000.

UPHOLSTERING.—In the State there was one establishment with \$300 capital, employing 1 female over fifteen years, paying in wages \$150, for material \$300, and receiving for products, \$1500.

UPHOLSTERING MATERIALS.—In the State there were two establishments with \$5000 capital, employing 11 males over sixteen years, paying in wages \$1050, for material \$2800, and receiving for products \$5000.

WATCH AND CLOCK REPAIRING.—In the State there was one establishment with \$400 capital, paying for material \$100, and receiving for products, \$600.

WHEELWRIGHTING.—In the State there were 49 establishments with \$70,300 capital, employing 127 males over sixteen years, and 6 children and youths, paying in wages \$44,346, for material \$37,750, and receiving for products, \$114,350.

WOOD, TURNED AND CARVED.—In the State there was one establishment with \$800 capital, employing 5 males over sixteen years, paying in wages \$1500, for material \$750, and receiving for products \$4000.

WOODEN-WARE.—In the State there was one establishment with \$300 capital, employing 1 male over sixteen years, paying in wages \$375, for material \$500, and receiving for products \$1500.

| John Penn, Lieutenant-Governor..... | Nov. 1, | 1763 |

² Governor until June 26, 1681, when the colonial government ceased by virtue of the charter to William Penn of March 4, 1681, who then became the proprietor. Penn's Council first met at Upland, i. e. Chester, on August 3, 1681.

³ The members of Council were authorized by the Governor to choose one of themselves President in the absence of Thomas Lloyd (1 C. R., 124), and they were Governors for the time being, and as such signed commissions and performed all the duties of that office. Thomas Holme died 10th 7 mo., 1694, aged forty-five years.

⁴ Commissioners, any three to act as Deputy Governor; 1 C. R., 166.

⁵ Deputy Governors, or assistants to Markham; 1 C. R., 417.

⁶ His commission bears date November 29, 1716, but the date given by me are those when the Lieutenant-Governors were inducted into office.

⁷ Called Lieutenant-General, Governor and Commander-in-Chief, etc.; 3 C. R., p. 55. Not Sir William until 1721, when he succeeded to the baronetcy.

⁸ Lieutenant-Governor, with the assent of Hannah Penn; 3 C. R., 226.

James Hamilton, President of Council.....May 6, 1771
 Thomas and John Penn, Proprietaries.....1771 to 1775
 Richard Penn, Lieutenant-Governor.....Oct. 16, 1771
 John Penn, Governor.....Aug. 30, 1773

 January 18, 1885.—George Gray, elected to succeed Thomas F. Bayard, resigned, to enter the Cabinet of President Cleveland.
 January 17, 1877.—Eli Saulsbury.
 January 16, 1883.—Eli Saulsbury.
 January 29, 1887.—George Gray.

¹ The Legislature of the State, which met in January and February, 1794, failed to make an appointment as successor to George Read, and upon the 19th of March following the Governor of the State appointed Kensley Johns to fill the vacancy. The committee on elections in the Senate submitted the following resolution on the subject: "Resolved, that Kensley Johns, appointed by the Governor of Delaware a Senator of the United States for the said State, is not entitled to a seat in the Senate of the United States, a session of the Legislature having intervened between the resignation of the said George Read and the appointment of the said Kensley Johns." This is the only instance in the history of the State where the attempt has been made by the executive to appoint after the Legislature had been in session.

Representatives in Congress.

1792. John Vining.
 1796. James A. Bayard.

 John Rodney.
 James Rench.

Presidents of the Delaware State under the Constitution of September 20, 1776.

John McKinley, inaugurated February 21, 1777. In the year 1777 he was captured by the British forces about the time of the battle of Brandywine; the office of President then devolved on George Read, as Speaker of the Legislative Council, and he soon after was elected to Congress, and Thomas McKean (Speaker of Assembly) exercised the office until January, 1778.

Cesar Rodney, from January, 1778, to January, 1782.

John Dickinson, from January, 1782, to January 13, 1783, when he resigned to accept the presidency of the Supreme Executive Council of Pennsylvania.

(John Cook, president of the Legislative Council from January 13, 1783, to February 8th, following.)

Nicholas Van Dyke, from February 8, 1783, to October 27, 1786.

Thomas Collins, from October 27, 1786, until his death, March 29, 1789.¹

Governors under the Constitution of 1792.

Joshua Clayton, from January 13, 1793, to January 13, 1796.

Gunning Bedford, from January 13, 1796, to his death, September 28, 1797.

(Daniel Rogers, Speaker of the Senate, from thence to January 1799.)

Richard Bassett, from January 9, 1799, to March, 1801, when he resigned and became chief justice of the State.

(James Sykes, Speaker of the Senate, from thence until January, 1802.)

David Hall, from January, 1802, to January, 1806.

Nathaniel Mitchell, from January 15, 1806, to January 11, 1808.

George Truitt, from January 11, 1808, to January 5, 1811.

Joseph Hazlett, from January 5, 1811, to January 10, 1814.

Daniel Rodney, from January 10, 1814, to January 21, 1817.

John Clark, from January 21, 1817, to January 16, 1820.

(Henry Mollenst was elected Governor in November, 1819, but died before January, 1820.)

Jacob Stout, Speaker of the Senate, performed the duties of the office from January, 1820, to January, 1821.

¹ The Hon. John Davis, Speaker of the House, called a session of the General Assembly at Dover, May 28, 1789, and notified them that the President, Thomas Collins, and the Speaker of the Council, George Mitchell, had both died since the last session, and with the advice of the Privy Council he convened the General Assembly to take action in the appointment of a president, which resulted in the choice of Joshua Clayton, who served from May 30, 1789, to January 12, 1793.

John Collins, from January, 1821, to his death, in April, 1822.
 (Caleb Rodney, Speaker of the Senate, from thence to January, 1823.)
 Joseph Hazlett, from January, 1823, to June 26th, in the same year, when he died.
 (Charles Thomas, Speaker of the Senate, from thence until January, 1824.)

Samuel Paynter, from January, 1824, to January 1827.

Charles Polk, from January, 1827, to January, 1830.

David Hazard, from January, 1830, to January, 1833.

Under the Amended Constitution, 1832.

Caleb P. Bennett, from January, 1833, to April 9, 1836, when he died.
 (Charles Polk, Speaker of the Senate, from thence until January, 1837.)

Cornelius P. Comegys, from January, 1837, to January, 1841.

William B. Cooper, from January, 1841, to January, 1845.

Thomas Stockton, from January, 1845, to March 2, 1846, when he died.
 (Joseph Maull, Speaker of the Senate, from thence to May 1st of the same year, when he died.)

(William Temple, Speaker of the House of Representatives, from May 6th to January, 1847.)

William Tharp, from January, 1847, to January, 1851.

William H. Ross, from January, 1851, to January, 1855.

Peter F. Causey, from January, 1855, to January, 1859.

William Burton, from January, 1859, to January, 1863.

William Cannon, from January, 1863, to March 1, 1865, when he died.

(Gove Saulsbury, Speaker of the Senate, from thence to January, 1867.)

Gove Saulsbury, from January, 1867, for the Constitutional term.

James Ponder, from January, 1871, to January, 1875.

John P. Cochran, from January, 1875, to January, 1879.

John W. Hall, from January, 1879, to January, 1883.

Charles C. Stockley, from January, 1883, to January, 1887.

Benjamin T. Biggs, from January, 1887.

MEMBERS OF COUNCIL FROM SUSSEX COUNTY.

1683.—William Clark, John Roads, Edward Southrin.
1684.—Luke Watson, Edward Southrin, William Clark.
1685.—John Roads, William Darvall, Luke Watson.
1686.—Luke Watson, John Roads, William Clark, William Darvall.
1687.—William Darvall.
1688.—William Darvall, Luke Watson.
1689.—Luke Watson, John Hill.
1690.—Luke Watson, William Clark.
1693.—William Clark.
1695.—William Clark, Thomas Pemberton, Robert Clifton.
1696.—William Clark, John Hill.
1697.—William Clark, John Hill.
1698.—William Clark, John Hill.
1699.—William Clark, John Hill.
May, 1700.—Samuel Preston, John Hill, Thomas Ffenwick.

STATE SENATORS FROM SUSSEX COUNTY.

John Wiltbank.....Oct. 28, 1776
William Polk.....Oct. 28, 1776
Daniel Dingee.....Oct. 28, 1776
Samuel S. Sloss¹.....May 2, 1777
John Jones².....May 2, 1777
J. Clowes, vice Dingee.....Mar. 9, 1778
W. Conwell, vice Sloss.....Mar. 9, 1778
William Conwell.....Oct. 28, 1778
William Polk.....Dec. 12, 1778
William Polk.....Oct. 22, 1779
J. Clowes, Speaker.....Oct. 20, 1779
William Conwell.....Oct. 25, 1781
J. Polk of Broad Creek.....Oct. 25, 1781
Joshua Polk.....Oct. 25, 1782

¹ No members of Council were chosen from this county until January 8, 1794, when William Clark was called to the board by the Council.

² In place of Polk and Dingee, appointed Justices.

Speakers of the Three Lower Counties—New Castle, Kent and Sussex—from 1704 to 1776.

There are no records of the Council and Assembly of the lower counties known to be in existence, and the members that composed them are not known. From one of the original publications of the laws, now in possession of C. H. B. Day, of Dover, the following-named persons are ascertained to have been Speakers of the Council under the Governors mentioned:

Joseph England, under John Evans, 1703-09.
John French, under Sir William Keith, 1717-26.
Hen. Brooke, under Sir William Keith, 1717-26.
Andrew Hamilton, under Patrick Gordon, 1726-36.
David French, under George Thomas 1738-47.
Thomas Nexon, under George Thomas, 1738-47.
Jehu Curtis, under George Thomas, 1738-47.
Ryves Holt, under George Thomas, 1738 47.

SPEAKERS OF THE STATE SENATE.

1776. George Reed.

 October, 1806.—Peter Jacquett, Patrick O'Flynn, John R. Phillips, George Gillespie, Peter Williams, Leonard Vandegrift, John Merritt.
 October, 1807.—John Bird, Jesse Higgins, Leonard Vandegrift, Peter Williams, William Robinson, David Morrison, Andrew Reynolds.
 October, 1808.—William D. Phillips, Andrew Reynolds, Thomas Phillips, Levi Boulden, John Bird, Leonard Vandegrift, Jesse Higgins.
 October, 1809.—Robert Forwood, William D. Phillips, John Bird, Benjamin Chambers, Samuel H. Black, Jesse Higgins, Enoch Thomas.
 January 20, 1810.—Joseph England.
 October, 1810.—Joseph Pierce, Nicholas G. Williamson, Thomas Phillips, James R. Black, Dr. William W. Haxlett, Samuel H. Black, Abraham Staats.

¹ These representatives were the last from the three lower counties, as in May following they were separated from Pennsylvania, and the first General Assembly was held at New Castle May 22, 1704.

No minutes of Council or Assembly are found from that time until Delaware became a State in 1776, except the members who chose, August 1, 1774, the delegates to the memorable convention at Carpenter's Hall, at Philadelphia, whose names are,—

Thomas McKean.
 John Evans.
 John McKinley.

James Latimer.
 George Read.
 Alexander Porter.

² Mr. Brush was a clergyman, and by the ninth section of the eighth article of the Constitution of the State of Delaware was disqualified, and the seat declared vacant. The case was argued before the House several times, and January, 1801, he gave up the ministry, was qualified and took his seat.

October, 1811.—Joseph Peirce, Nicholas G. Williamson, David Morrison, George Read, Jr., George Clarke, Samuel H. Black, Abraham Staats.

October, 1812.—Peter Vandever, Nicholas G. Williamson, John Haslin, George Read, Jr., George R. Massey, George Clark, Abraham Staats.

October, 1813.—Peter Vandever, Nicholas G. Williamson, Joseph England, George R. Massey, George Read, Jr., John Sutton, Alrich Ryland.

October, 1814.—Victor Du Pont, Nicholas G. Williamson, Joseph England, Alrich Ryland, George R. Massey, John Crow, John Sutton.

October, 1815.—Victor Du Pont, Nicholas G. Williamson, Andrew Reynolds, Samuel H. Black, John Crow, John Sutton, John T. Cochran.

October, 1816.—Victor Du Pont, Peter Vandever, Joseph W. Cochran, John T. Cochran, Arnold S. Naudain, Andrew Gray, Samuel H. Black.

October, 1817.—Joseph Pierce, Isaac Hendrickson, Jesse Chandler, Henry Whitely, Charles Thomas, Jr., John T. Cochran, Arnold S. Naudain.

October, 1818.—Joseph Day, Isaac Hendrickson, Jesse Chandler, Henry Whitely, John Crow, John T. Cochran, John Crawford.

October, 1819.—Joseph W. Day, William P. Brubson, Nicholas G. Williamson, Henry Whitely, John Crow, Levi Clark, Alexander Crawford.

October, 1820.—William P. Brubson, Levi Clark, Alexander Crawford, John Crow, Benjamin H. Springer, Andrew Gray, Henry Whitely.

October, 1821.—William Seal, Jesse Chandler, John Harlan, Washington Rice, John Sutton, Alrich Ryland, William Wehler (2d).

October, 1822.—William Seal, Jesse Chandler, Andrew Reynolds, David Nivin, Samuel H. Black, George Clark, Richard E. Cochran.

October, 1823.—William F. Grubb, Josiah F. Clement, Andrew Gray, Benjamin Watson, Wm. Vandegrift, Levi Boulden, Richard E. Cochran.

October, 1824.—David Penny, Josiah F. Clement, Joseph England, John Crow, John Eaton, Samuel H. Black, Christopher Vandegrift.

October, 1825.—Joseph W. Day, William P. Brubson, Andrew Gray, James R. Black, John Higgins, Samuel H. Black, Arnold Naudain.

October, 1826.—Josiah F. Clement, John Erwin, Archibald Hamilton, Samuel H. Black, John Higgins, Alexander Crawford, Daniel Corbit.

October, 1827.—Harman Talley, William Seal, James Delaplaine, Benjamin Whitely, William T. Read, Daniel Newbold, Christopher Vandegrift.

October, 1828.—Harman Talley, Benjamin Chandler, Samuel Murphy, Benjamin Whitely, John Sutton, William T. Read, Charles H. Haughey.

October, 1830.—Harry Williamson, John Caulk, John Sutton, Charles H. Haughey, William McCaulley, Benjamin Whitely, William Kennedy.

October, 1831.—Harry Williamson, John Harlan, John Canik, John D. Dilworth, James Gardner, Thomas W. Handy, Dickinson Webster.

November, 1832.—Harry Williamson, William Herdman, John Caulk, George Springer, Dickinson Webster, John D. Dilworth, Christopher Brooks.

November, 1834.—George Lodge, William Booth, John W. Evans, Alexander M. Biddle, Thomas Deakyn, John Harlan, William Herdman.

November, 1836.—George Lodge, Archibald Hamilton, Abraham Boys, William Booth, John W. Evans, Alexander M. Biddle and Thomas Deakyn.

November, 1838.—Alexander M. Biddle, John D. Dilworth, William H. Rogers, Nathan Boulden, Andrew Kerr, William Hemphill Jones, Henry Williamson.

November, 1840.—Mahlon Betts, Samuel Barr, Alfred Francis, John Higgins, John Dale, Palmer Chamberlain, Robert M. Black.

November, 1842.—Harlan Cloud, John Harlan, William Booth, David C. Wilson, Andrew Kerr.

November, 1844.—William M. Day, Stephen M. Staples, Lewis Thompson, Samuel Burnham, John Allen, William Kennedy, Thomas Caulk.

November, 1846.—John W. Evans, William Smith, William M. Day, Henry Swayne, Lewis Thompson, John Allen, Levi G. Couch.

November, 1848.—Edward G. Bradford, Benjamin Caulk, Levi G. Couch, Edward T. Bellak, James L. Miles, Thomas M. Rodney, Elias S. Naudain.

November, 1850.—Aquila Derricks, William C. Lodge, Abraham Boys, Albert O. Newton, Samuel Jefferson, James B. Rogers, Nathan T. Boulden.

November, 1852.—James Delaplaine, Josiah H. Dixon, Alexander M. Biddle, Charles Gooding, Joshua S. Valentine, John A. Reynolds, Ephraim Beaton.

November, 1854.—David C. Wilson, Samuel Biddle, Jonathan Groves, Edward Shepperd, David McKee, James V. Moore, John J. Henry.

November, 1856.—William C. Lodge, Edward Sheppard, Francis D. Dunlap, Harlan Cloud, Charles Gooding, Thomas J. Foard, Bayman Deakyn.

November, 1858.—George W. Churchman, Franklin Q. Flian, Lewis Thompson, Charles H. Oldman, Jonathan L. Ellison, Thomas W. Belleville, John M. Naudain.

November, 1860.—George W. Churchman, Edward Betts, Abram Chandler, John F. Williamson, Anthony M. Higgins, Robert A. Cochran, Henry H. Appleton.

November, 1862.—John Hayes, John A. Duncan, Solomon M. Curtis, David W. Gemmill, Merritt H. Paxson, John Whitby, Levi W. Lattomus.

November, 1864.—John A. Duncan, James H. Hoffecker, John G. Jackson, John A. Alderdice, Merritt H. Paxson, Andrew Ellason, Elias N. Moore.

November, 1866.—John A. Alderdice, Samuel Bancroft, Jr., James Bradford, Charles Corbit, Andrew Ellason, Levi W. Lattomus, John Pilling.

November, 1868.—Lot Cloud, Dr. John A. Brown, Albert H. Silver, William Dean, George F. Brady, Joseph W. Vandegrift, Jacob Deakyn.

November, 1870.—Lot Cloud, J. Poulson Chandler, Aquila Derricks, Benjamin Caulk, Sewell C. Biggs, Albert O. Newton, Francis T. Perry.

November, 1872.—William Silver, Joshua Maria, Lewis Thompson, Joel Thompson, Jr., D. Brainerd Ferris, Theodore F. Clark, Joseph C. Hutchison.

November, 1874.—Samuel Hanby, Isaac C. Pyle, Thomas Bird, Thomas L. J. Baldwin, Thomas Holcomb, Henry A. Nowland, William P. Biggs.

November, 1876.—James W. Ware, John W. R. Kilgore, John E. Bartholomew, Thomas Holcomb, Thomas Bird, James Nicholson, Edwin R. Cochran.

November, 1878.—James W. Ware, Dr. Swithin Chandler, William Dean, John Doran, Giles Lambson, Edwin R. Cochran, William P. Biggs.

November, 1880.—Edward G. Bradford, Jr., Henry Swayne, David Eastburn, John Pilling, Andrew Ellason, George L. Townsend, Henry H. Woodkeeper.

November, 1882.—George H. Bates, Henry M. Barlow, Albert N. Sutton, Robert C. Justis, William Cooch, William A. Comegys, James V. Crawford.

November, 1884.—Henry M. Barlow, Enoch Moore, Abram Palmer, Theodore F. Armstrong, William A. Comegys, John T. Wilson, Richard Ferguson.

November, 1886.—James W. Ware, James A. Mulligan, George D. Medill, Douglas M. McCoy, Dr. Swithin Chandler, Elwood R. Norney, William F. Smalley.

Members of Assembly under Penn.

KENT COUNTY.

December 4, 1682.—Francis Whitwell, John Briggs.

1683.—John Briggs, Simon Irons, Thomas Haffeld, John Curtis, Robert Bedwell, William Winsmore, John Brinckloe, Daniel Brown, Benoni Bishop.

1684.—John Briggs, John Glover, John Curtis, William Sherwood, James Wells, William Berry.

1685.—John Briggs, John Curtis, Daniel Jones, Peter Groningdyke, William Berry, John Brinckloe.

1686.—John Brinckloe, John Bradshaw, John Walker, William Berry, Robert Bedwell, Richard Wilson.

1687.—John Brinckloe, William Berry, Richard Wilson, Thomas Penberton, William Freeland, Benoni Bishop.

1688.—John Brinckloe, John Betts, William Rodney, John Burton, Samuel Barber, John Richardson, Jr.

1689.—Daniel Jones, William Berry, William Manloe, John Walker, Peter Groningdyke, Daniel Brown.

1690.—John Barnes, John Betts, Daniel Brown, Es. Needham, Richard Curtis, William Freeland.

1692.—William Freeland, Daniel Jones, Simon Irons, John Barnes, George Manloe, William Manloe.

1694.—John Brinckloe, John Walker, William Manloe.

1694.—John Brinckloe, William Freeman, Richard Wilson.

1695.—John Betts, William Rodney, William Morton, Simon Irons, Daniel Brown, John Hilliard.

1696.—William Rodney, William Morton, Richard Wilson.

1697.—John Walker, Thomas Bedwell, Samuel Burberry, John Bradshaw.

1698.—Richard Wilson, Robert Edmonds, Henry Molleston, William Morton.

1699.—John Forster, Thomas Sharp, Henry Molleston, James Brown.

May, 1700.—William Morton, John Brinckloe, Richard Wilson, Gr. Jones, Arthur Meston, William Rodney.

October, 1700.—John Brinckloe, Richard Wilson, William Morton, Henry Molleston.

October, 1701.—William Rodney, John Brinckloe, William Morton and John Walker.

April 14, 1704.—William Rodney, John Brinckloe, William Morton and Arthur Meston.

Members of the State House of Representatives.—The

journal of the House of Representatives from 1776 to

¹ These were the last Representatives from the territories, as the then lower counties were separated in May following, and the first General Assembly met at New Castle May 22, 1704. No minutes of Council or Assembly are found from this time until Delaware became a State in 1776, except the members, who, August 1, 1771, chose delegates to the memorable convention at Carpenters' Hall at Philadelphia, whose names are here given: Charles Ridgely, William Killian, Caesar Rodney, chairman, and Thomas Collins.

1782 is not in the archives of the State, and the names of the members cannot be ascertained with accuracy.

KENT COUNTY.

October 21, 1782.—John Gordon, Charles Ridgely, Phillip Barratt, William Molleston, Edward White, Isaac Carty, John [John] Davis.
 October 22, 1784.—John Gordon, James Raymond, Charles Nixon, John Revell, Jacob Stout, Jennifer Taylor, Francis Many.
 October 22, 1785.—Charles Nixon, James Raymond, Allen McLane, John Revell, Mark McCall, John Patten, Jacob Emerson.
 October 24, 1786.—Mark McCall, John Gordon, Joshua Clayton, Jehu Davis, John Cook, Thomas Rodney, Richard Bassett.
 October 25, 1787.—James Raymond, John Gordon, Mark McCall, John Davis, John Revell, Thomas Rodney, John Vining.
 October 22, 1788.—John Gordon, James Raymond, George Truitt, Jehu Davis, Benjamin Coombe, John Vining, Rindon Bishop.
 October 22, 1790.—James Raymond, George Truitt, Joshua Fisher, Francis Many, Silas Snow, Edward White, Joseph Oliver.
 October 20, 1791.—George Truitt, Andrew Barratt, Francis Many, Stephen Lewis, Joseph Barker, Joseph Oliver, Allen McLane.
 October, 1792.—Nicholas Ridgely, Caleb Sipple, Stephen Lewis, Isaac Davis, John Lockwood.
 October, 1793.—John Lockwood, Caleb Sipple, Ebenezer Blackiston, Stephen Lewis, George Truitt, James Henry, William Warner.
 October, 1794.—Peter Lowber, William Adams, Philip Lewes, William Allehand, Presley Spruance, James Douglas, James Miller.
 October, 1795.—George Cummings, James Raymond, Stephen Lewis, Robert Clark, James Henry, William Sorden, Abraham Pierce.
 October, 1796.—James Raymond, Nicholas Ridgely, Manlove Emerson, William Warner, Stephen Lewis, William Sorden, William Morris.
 October, 1797.—Nicholas Ridgely, William Warner, Stephen Lewis, James Raymond, Manlove Emerson, Peter Caverly, Joseph Barker.
 October, 1798.—John Vining, William Warner, Stephen Lewis, Manlove Emerson, William Sorden, Joseph Barker, William Collins, Jr.
 October, 1799.—Henry Molleston, Nicholas Ridgely, Stephen Lewis, William Warner, William Sorden, James Henry, Manlove Emerson.
 October, 1800.—Henry Molleston, George Cummings, Nicholas Ridgely, William Warner, William Sorden, Manlove Emerson, Stephen Lewis.
 October, 1801.—Henry Molleston, Stephen Lewis, John Marim, Nicholas Ridgely, William Sorden, James Henry, William Warner.
 October, 1802.—Henry Molleston, Thomas Clayton, William Warner, Stephen Lewis, John Marim, William Sorden, James Henry.
 October, 1803.—Henry Molleston, John Marim, Thomas Clayton, James Henry, William Warner, Stephen Lewis, William Sorden.
 October, 1804.—Thomas Clayton, Stephen Lewis, John Marim, William Warner, Henry Molleston, William Sorden, James Henry.
 October, 1805.—Henry Molleston, Thomas Clayton, John Marim, William Warner, Robert Cook, William Hughlett, James Ralston.
 October, 1806.—Henry Molleston, Thomas Clayton, John Marim, William Warner, Robert Cook, James B. Ralston, William Hughlett.
 October, 1807.—James B. Ralston, Henry Molleston, John Pleasanton, Henry M. Ridgely, Stephen Lewis, John Adams, William Torbert.
 October, 1808.—Henry M. Ridgely, Stephen Lewis, James B. Ralston, John Marim, Nicholas Lockerman, Edward Joy, Stephen Paradise.
 October, 1809.—William Denny, John Marim, Stephen Paradise, Henry M. Ridgely, William Warner, John Williams, Stephen Lewis.
 January 9, 1810.—David Lockwood.
 October, 1810.—Thomas Clayton, William Denny, John Marim, Cornelius P. Comegys, John Clarke, John Williams, Stephen Lewis.
 October, 1811.—William Denny, John Marim, John Clarke, Samuel White, Cornelius P. Comegys, John Williams, James Fintswait.
 October, 1812.—Thomas Clayton, Jacob Stout, Cornelius P. Comegys, Samuel White, Robert Dill, John Williams, Luff Lewis.
 October, 1813.—Cornelius P. Comegys, Henry Molleston, Thomas Clayton, John Clarke, Jacob Stout, Luff Lewis, Spencer Williams.
 October, 1814.—John Pleasanton, Cornelius P. Comegys, John Clarke, Jonathan Jenkins, Isaac Lockwood, Spencer Williams, John Mitchell.
 October, 1815.—Henry M. Ridgely, John Cummins, Joseph G. Rowland, John Mitchell, Cornelius P. Comegys, John Clarke, Spencer Williams.
 October, 1816.—John Cummins, James Battell, Thomas Condy, Joseph G. Rowland, John Mitchell, Spencer Williams, John Wood.
 October, 1817.—John Cummins, Thomas Condy, Joseph G. Rowland, John Booth, Spencer Williams, Charles Polk, Charles Kimmey.
 October, 1818.—John Cummins, Joshua G. Brinckle, Martin W. Bates, Jonathan Jenkins, Jacob Boone, John Mitchell, John Booth.
 October, 1819.—John Cummins, Joshua G. Brinckle, Joshua H. Miffin, William K. Lockwood, Edward Fisher, Jacob Boone, John Booth.
 October, 1820.—John Cummins, Samuel Miffin, Thomas Condy, Joshua G. Brinckle, Major Townsend, Joseph G. Oliver, Benjamin Harrington.
 October, 1821.—Robert Register, Henry M. Ridgely, James B. Macomb, George Walker, Samuel Miffin, Samuel Warren, Sr., William Hopkins.
 October, 1822.—Presley Spruance, Jr., Elias Naudain, Andrew Calley, John Adams, John Brinckle, William Hopkins, Robert Register.

October, 1823.—John B. Savin, John Pleasanton, John M. Clayton, Samuel Miffin, Samuel Coombe, Luff Lewis, Charles Polk.
 October, 1824.—John Raymond, James Kimmey, Samuel Miffin, Samuel Coombe, Spencer Williams, John Booth, William Johnson.
 October, 1825.—Elias Naudain, Martin W. Bates, Thomas M. Stout, Samuel Warren, Sr., Joel Clements, John Brinckle, William Saulsbury.
 October, 1826.—Jacob Raymond, Robert Register, Henry M. Ridgely, Thomas M. Stout, John Clark, Martin W. Bates, Ignatius Taylor.
 October, 1827.—John Raymond, William W. Morris, Matthias Day, Samuel Virden, Peter L. Cooper, James P. Lofland, John Booth.
 October, 1829.—Simon Spearman, Charles Marim, Cornelius P. Comegys, Joel Clement, William Roe, Benjamin Potter, Thomas Simpson.
 October, 1830.—John Raymond, Thomas A. Reese, Charles Marim, William Huffington, Hunn Jenkins, Samuel Virden, John Booth.
 October, 1831.—Thomas A. Reese, Ayres Stockley, Charles Marim, William Huffington, Isaac Gruwell, John Booth, Peter F. Causey.
 November, 1832.—Thomas A. Reese, John Raymond, Charles Marim, Ignatius T. Cooper, Isaac Gruwell, Peter F. Causey, Manlove Johnson.
 November, 1834.—John Raymond, Charles Marim, Robert Frame, Joel Clements, Jacob Boone, Philip Fiddeman, Benjamin Harrington.
 November, 1836.—Thomas A. Reese, Charles Marim, William Nickerson, Peter L. Cooper, James S. Buckmaster, William Johnson, Charles F. Fleming.
 November, 1838.—Presley Spruance, Thomas A. Reese, John Frazier, Robert Frame, Henry Pratt, Samuel B. Cooper, Philip Fiddeman.
 November, 1840.—James D. Wilds, John Frazier, William Huffington, Samuel Virden, Joel Clements, Alexander Johnson, John A. Collins.
 November, 1842.—Robert Jones, James Knight, Joseph P. Comegys, Paris T. Carlisle, John Gruwell, Levin H. Adams, William Shaw.
 November, 1844.—Joseph Hefecker, William Temple, William Cowgill, George P. Fisher, John Gruwell, Shadrack Raughley, John W. Adkins.
 November, 1846.—William R. Caboon, John Woodall, Jun., William Nickerson, Thomas L. Temple, Henry W. McIlvaine, Thomas Lockwood, Thomas Wallace.
 November, 1848.—Daniel Cummins, Edward W. Wilson, Joseph P. Comegys, Paris T. Carlisle, Henry Taylor, James Pustles, John A. Collins.
 November, 1850.—Enoch Spruance, Francis B. Harper, Caleb Smithers, John G. Chambers, Benjamin Harrington, Nathaniel C. Powell, Capt. Elias Smithers.
 November, 1852.—Benjamin L. Collins, John G. Chambers, Paris T. Carlisle, Eli Saulsbury, Merritt Scotten, Manlove Hayes, William Thompson.
 November, 1854.—James W. Spruance, John Woodall, John W. Cullen, William Tomlinson, Thomas Draper, James B. B. Powell, John W. Smith.
 November, 1856.—George W. Cummins, John B. Penington, William Meredith, James Williams, Joseph Moore, William A. Atkinson, Bethuel Watson.
 November, 1858.—Jonathan Brown, Isaac Short, Caleb S. Pennewell, William Slaughter, John W. F. Jackson, John Harrington, Curtis S. Watson.
 November, 1860.—John A. Moore, Thomas Davis, Thomas Clements, Jr., Ambrose Broadway, William Virden, Henderson Collins, Jr., Charles Williamson.
 November, 1862.—Benjamin S. Goote, John H. Bowley, James Williams, John Slay, William B. Stubbs, Robert Raughley, Curtis S. Watson.
 November, 1864.—Henry C. Douglas, John C. Wilson, Henry Todd, William Dyer, Abner Harrington, Charles M. Adams, William D. Fowler.
 November, 1866.—Joseph Booth, Peter L. Cooper, William A. Polk, Henry Pratt, George A. Raymond, Elias S. Reed, James H. Smith.
 November, 1868.—William C. Jump, Benjamin F. Hamm, Thomas J. Marvel, Whiteley W. Meredith, Robert J. Reynolds, Henry C. Wolcott, James B. Mitchell.
 November, 1870.—Henry M. Howe, James L. Smith, John C. Carsona, Samuel B. Cooper, David Needles, Nimrod Harrington.
 November, 1872.—John Van Gaskin, J. Frank Wilds, Robert B. Wright, William B. Clough, Joseph Burchenal, William Sheldrake.
 November, 1874.—John M. Voshell, William B. Collins, J. Frank Wilds, Webster D. Learned, James H. Todd, William Broadway, Thomas C. Green.
 November, 1876.—Thomas K. Taylor, Andrew J. Wright, Jonathan Slaughter, Cornelius J. Hall, Jacob G. Brown, Wilbur H. Burnite, Garretson Saulsbury.
 November, 1878.—John E. Collins, Minos Conaway, Cornelius J. Hall, Peter M. Lindall, David Needles, John A. Savin, John W. Sharp.
 November, 1880.—Charles H. Register, John W. Graham, Abraham Moore, Amos C. Williams, Moses S. Van Burkalow, Alfred H. Cahall, Reynoar Williams.
 November, 1882.—James D. W. Temple, James T. Lowe, Thomas H. Denny, James Williams, Ezekiel C. Frazier, Robert Y. Watson, Benaiah L. Lewis.
 November, 1884.—Henry M. Howe, John F. Saulsbury, James Virden, Christian G. Brown, John H. Schabinger, Nicholas B. Johnson, William T. Watson.

1886.—John W. Taylor, Franklin Temple, John H. Jones, Philemon Scotten, John Harrington, William R. Allaband, Peter E. Lowber.

Members of Assembly under Penn.

SUMEX COUNTY.

1682.—William Clark, Luke Watson, Edward Southrin.
 1683.—Luke Watson, Alexander Draper, William Fritcher, Henry Bowman, Alexander Molestine, John Hill, Robert Bracey, John Kip-haven, Cornelius Verhoof.
 1684.—John Roads, Henry Bowman, Hercules Shepperd, Samuel Gray, William Emmett, Henry Stretcher.
 1685.—Henry Smith, William Carter, Robert Clifton, John Hill, Samuel Gray, Richard Law.
 1686.—Henry Bowman, Norton Claypoole, Henry Stretcher, John Vines, Albertus Jacobs, Samuel Gray.
 1687.—Luke Watson, Henry Smith, Henry Molestine, Henry Bowman, Samuel Gray, Henry Stretcher.
 1688.—Thomas Wynne, Henry Bowman, Henry Molestine, Thomas Price, John Symons, Albertus Jacobs.
 1689.—Baptist Newcombe, Samuel Gray, Robert Clifton, Henry Shepperd, Luke Watson, Jr., Jonathan Bailey.
 1690.—John Hill, Samuel Gray, Robert Clifton, Henry Smith, Baptist Newcombe, Thomas Branscom.
 1692.—William Clark, Robert Clifton, Baptist Newcombe, Luke Watson, Jr., Thomas Branscom, William Piles.
 1693.—Albertus Jacobs, Thomas Pemberton, Samuel Preston.
 1694.—Thomas Pemberton, Luke Watson, Roger Corbett.
 1695.—John Stockley, Thomas Oldman, Joseph Booth, Henry Molestine, James Peterkill, Jonathan Bailey.
 1696.—Thomas Pemberton, Roger Corbett, John Mires.
 1697.—Luke Watson, Thomas Oldman, Nehemiah Field, Thomas Fisher.
 1698.—Thomas Oldman, Jonathan Bailey, Luke Watson, Jr., Cornelius Wiltbank.
 1699.—William Piles, William Fisher, Nehemiah Field, William Dyer.
 May, 1700.—Joseph Booth, Thos. Pemberton, Luke Watson, Jr., Thos. Fisher, Arthur Van Kirk, Robert Burton.
 October, 1700.—John Hill, Thos. Pemberton, Luke Watson, Jr., Thos. Fenwick.
 October, 1701.—William Clark, Luke Watson, Jr., Samuel Preston, Jos. Booth.
 April 14, 1704.—John Hill, William Bogwell, Robert Burton, Richard Paynter.

Members of State House of Representatives.

SUMEX COUNTY.

October 21, 1782.—John Collins, Wm. Peery, Nathaniel Waples, Simon Kellock, David Hazzard, Wm. Jordan Hall, Chas. Polk.
 October 22, 1784.—Isaac Bradley, William Peery, James Douglas, Simon Kellock, Nathaniel Waples, Robert Houston, Geo. Mitchell.

 October, 1792.—Nathaniel Hayes, John W. Bateson, Woodman Stockley, Barclay Townsend, Hap Hazzard.
 October, 1793.—Nathaniel Hayes, Barclay Townsend, John W. Bateson, John Tennent, David Nutter, William Peery, Charles Polk.
 October, 1794.—David Nutter, William H. Wells, William Carlisle, John W. Bateson, Robert Burton, John Williams, William Peery.
 October, 1795.—William H. Wells, Robert Burton, William Carlisle, Nathaniel Hayes, Elisha Adams, Barclay Townsend, John W. Bateson.

¹ These are the last Representatives from the territories as the three lower counties were separated from Pennsylvania in May following, and the first General Assembly was held at New Castle, May 22, 1704. No minutes of the Council or Assembly have been found from that time until the three lower counties became the State of Delaware, in 1776, except the Assembly which, on August 1, 1774, elected delegates to the convention at Carpenters' Hall, at Philadelphia. The members from Sumex were:

Thomas Rodney, Levin Crapper, Ross Manlove, John Wiltbank, Stephen Townsend.

² The election of the members at this election was declared illegal November 7, 1787.

October, 1796.—David Owen, Robert Burton, William H. Wells, Samuel Paynter, Jr., Thomas Sorden, John Williams, Woodman Stockley.

October, 1797.—Thomas Robertson, William H. Wells, David Owens, Samuel Paynter, Jr., Thomas Sorden, Joshua Burton, Jesse Green.

October, 1798.—Samuel Paynter, Thomas Sorden, William H. Wells, Stephen Styer, Thomas Robertson, Joshua Burton, Isaac Beauchamp.

October, 1799.—Joshua Burton, Samuel Paynter, Stephen Styer, Jacob Wolfe, Elijah Adams, George Waller, Thomas Sorden.

October, 1800.—George Waller, Outerbridge Horsey, Peter Robinson, Elijah Adams, Jacob Wolfe, Armwell Long, Jesse Green.

October, 1801.—Caleb Rodney, Outerbridge Horsey, Peter Robinson, George Waller, Armwell Long, Jesse Green, Elijah Adams.

October, 1802.—Caleb Rodney, Outerbridge Horsey, Peter Robinson, George Waller, Armwell Long, Jesse Green, Thomas Laws.

October, 1803.—Jesse Green, Thomas Cooper, George Waller, Armwell Long, Thomas Laws, Caleb Rodney, Isaac Marshall.

October, 1804.—Thomas Laws, Edward Dingle, George Waller, Caleb Rodney, Isaac Marshall, Armwell Long, Thomas Cooper.

October, 1805.—Thomas Cooper, Edward Dingle, Jr., Jesse Green, Thomas Laws, George Waller, Isaac Marshall, Joshua Burton.

October, 1806.—Thomas Cooper, Edward Dingle, Jesse Green, Robert Hill, Joshua Burton, George Waller, Nathan Vickers.

October, 1807.—Thomas Cooper, Edward Dingle, Jesse Green, Nathan Vickers, Joshua Burton, Robert Hill, John Polk.

October, 1808.—Robert Hill, Solomon Moore, Nathaniel Mitchell, Joshua Burton, William Hazzard, Peter Robinson, Armwell Long.

October, 1809.—Peter Robinson, Joshua Burton, Robert Hill, John Wilson (farmer), Peter G. Wooten, Thomas W. Rogers, Ebe Walter.

October, 1810.—Solomon Moore, Nathan Vickers, Robert Hill, William H. Wells, Peter Robinson, John Carlisle, Joshua Burton.

October, 1811.—William H. Wells, Joshua Burton, Solomon Moore, Robert Hill, Nathan Vickers, Caleb Rodney, Ebe Walters.

October, 1812.—Caleb Rodney, Joshua Burton, Solomon Moore, Robert Hill, Nathan Vickers, Ebe Walter, Charles M. Cullen.

October, 1813.—Charles M. Cullen, Joshua Burton, Robert Hill, Solomon Moore, Nathan Vickers, Ebe Walter, Charles Polk.

October, 1814.—Charles M. Cullen, Robert Hill, Robert Wiltbank, Nathan Vickers, Ebe Walter, Charles Polk, Jr., Thomas Townsend.

October, 1815.—Charles M. Cullen, Robert Hill, Nathan Vickers, Ebe Walter, John Carlisle, William B. Cooper, Isiah Burton.

October, 1816.—Charles M. Cullen, William B. Cooper, Nathan Vickers, John Carlisle, Isiah Burton, David Smith, Solomon Evans.

October, 1817.—Peter Robinson, William Polk, Solomon Evans, David Smith, Isiah Burton, William W. Green, Nathan Vickers.

October, 1818.—Charles M. Cullen, Nathan Vickers, David Smith, Isiah Burton, William Polk, John Carlisle, John Derickson.

October, 1819.—Nathan Vickers, William H. Wells, Charles M. Cullen, David Smith, William Polk, John Carlisle, John Dirickson.

October, 1820.—John Robinson, Isiah Burton, John Dirickson, George Phillips, Isaac Cannon, John Wilson, Tighman Layton.

October, 1821.—Peter Robinson, Charles M. Cullen, Joshua Burton, David Smith, John Wilson, George Howard.

October, 1822.—Charles M. Cullen, Joshua Burton, Thomas Townsend, George Howard, John Robinson, William N. Polk, Purnal Tindall.

October, 1823.—Peter Robinson, Joshua Burton, Purnal Tindall, John Robinson, William N. Polk, George Howard, Spencer Phillips.

October, 1824.—Peter Robinson, Joshua Burton, Purnal Tindall, John Robinson, Spencer Phillips, George Truitt, Whiting Sandford.

October, 1825.—Francis Brown, Joshua Burton, Purnal Tindall, John Robinson, Spencer Phillips, George Truitt, Whiting Sandford.

October, 1826.—Joshua Burton, Francis Brown, John Wiltbank, Miles Tindall, Lawrence Riley, George Phillips, John Tennent.

October, 1827.—John Tennent, Caleb S. Layton, Kendall M. Lewis, Thomas Davis, John White, William Dunning, George Truitt.

October, 1829.—John Tennent, Thomas Davis, Kendall M. Lewis, Caleb S. Layton, Isaac W. Copes, Joshua Burton, Henry F. Rodney.

October, 1830.—Joshua Burton, Thomas Davis, Henry F. Rodney, Kendall M. Lewis, George Frame, George Hearn, Nicholas W. Adams.

October, 1831.—Thomas Davis, Shepard P. Houston, John Bennett, George Frame, George Hearn, James Barrett, Dr. John Gibbons.

November, 1832.—Thomas Davis, George Hearn, Thomas Jacobs, John H. Harris, William Harris, Nicholas W. Adams, Joshua Johnson.

November, 1834.—Thomas Davis, Kendall M. Lewis, William B. Cooper, Thos. Jacobs, Jas. Parker, Wm. D. Waples, Joshua Johnson.

November, 1836.—William D. Waples, Thomas Davis, William S. Hall, John P. Brinkloe, Stansbury Jacobs, Robert Houston, Jonathan Waller.

November, 1838.—John P. Brinkloe, James Hopkins, Robert Houston, Joseph W. Neal, Aaron Marshall, Jr., Richard Jefferson, Robert Hopkins.

November, 1840.—Gardner H. Wright, William Hill, Robert Houston, Aaron Marshall, Robert Waples, Richard Jefferson, John R. Sudler.

November, 1842.—Charles G. Ridgely, Benjamin Burton, William Hill, Richard Jefferson, John D. Rodney, Robert Waples, William O. Rodden.

November, 1844.—Samuel Paynter, William Porter, John West, Charles Wright, Joseph Smith Thomas Robinson, William Cannon.

November, 1846.—Peter Marsh, John W. Scribner, James F. Burton, John M. Phillips, William Cannon, Purnal Tatman, Jacob Bounds.

November, 1846.—Samuel D. Vaughan, William Tunnell, John Marshall, Philip C. Jones, John Martin, Nathaniel Tunnell.

November, 1850.—John W. Scribner, Peter Marsh, William D. Waples, Job Pride, Dr. John Marten, John Hosen, James Satterfield.

November, 1852.—James F. Burton, James F. Martin, John R. McFee, John Day, William W. Morgan, Benjamin Burton, Alfred Short.

November, 1854.—Charles Rickards, Asbury C. Pepper, Joseph P. H. Shipley, Robert G. Ellegood, Woolsey Burton, John S. Waples, Burton C. Prettyman.

November, 1856.—James Ponder, Thomas J. Cannon, Ebe, Walter, Dr. Hugh Martin, Thomas J. Phillips, Paynter Frame, John Marshall.

November, 1858.—Benjamin White, Thomas A. Jones, Loxley R. Jacobs, William H. Moore, Bumbred L. May, Alfred McIlvaine, John W. Walker.

November, 1860.—William H. Richards, Jonathan Moore, William S. Phillips, Lemuel W. Waples, Peter Caboon, James H. Boyce, Peter Robinson.

November, 1862.—Major W. Allen, William A. Scribner, John Sorden, Luther W. Fisher, William D. Waples, Isaac H. Bailey, George W. Horsey.

November, 1864.—William F. Causey, John Hickman, Shephard P. Houston, James Stuart, John Jones, Benjamin Hitch, Miles Memick.

November, 1866.—John S. Bacon, Robert H. Davis, Paynter Frame, John M. Houston, Joshua J. Johnson, Thomas A. Jones, William D. Waples.

November, 1868.—Isaac Conaway, Peter Robinson, Shepard P. Houston, Philip C. Mathews, John S. Bacon, John Hickman, William D. Tomlinson.

November, 1870.—William W. Morris, Jesse W. Robinson, John W. Short, Ebe W. Tunnell, Levin Hitch, Shepard P. Martin, Curtis A. Conaway.

November, 1872.—David H. Holland, Edward Jones, George M. Davis, James T. Thompson, John Hickman, Hugh Martin, Jesse B. Stevenson.

November, 1874.—Asa F. Conwell, George H. Phillips, Robert Lambdin, John W. Phillips, Joseph G. McNeal, Paynter Frame, Shepard P. Houston.

November, 1876.—David L. Mustard, Peter Robinson, Kendall Richards, John L. Thompson, William W. Morris, Hugh Martin, Miles Memick.

November, 1878.—Joshua Webb, Isaac N. Fooks, Shepard P. Houston, James Law, Eli S. Short, Jacob G. Cannon, Clement C. Hearn.

November, 1880.—William P. Jones, Peter Robinson, Philip C. Mathews, Joseph G. McNeal, Thomas N. Williams, Peter W. Tomlinson, Amos J. Stayton.

November, 1882.—George W. Risler, Thomas J. Perry, William A. Jacobs, Samuel H. Memick, Stansbury J. Wheatley, Thomas Dukes, James Rawlins.

November, 1884.—John O. Truitt, David H. Atkins, Jacob H. Adams, John Tatman, W. R. McCabe, Jacob W. Cannon, Joseph B. Hearn.

1886.—William R. McCabe, Thomas R. Wilson, William C. Rust, Lemuel W. Waples, R. W. Dasey, George W. Magee, William T. Perry.

CHAPTER XX.

INTERNAL IMPROVEMENTS.

NEITHER the Dutch nor the Swedes were road-builders,—they were hardly path-finders,—the water being their only medium of conveyance. The Swedes used boats. The roads were mere paths through the woods, made by the Indians. The Delaware River afforded communication with the settlements along its banks and was likewise the highway of the vessels that brought supplies and colonists from Europe. The settlement spread along its borders, extending but a very short distance back into the country, the river being the great and only thoroughfare, on the waters of which all transportation was carried on.

While the earlier records of the State show that the subject of public highways excited considerable interest among the inhabitants, it was not until 1671 that any practical movement was made with a view to securing convenient access to different portions of the State; nor is there any evidence that Indian trails or paths, peculiar to other sections of the country, existed in Delaware, for the probable reason that there were not any settlements of consequence on the eastern side of the Peninsula. It is probable, however, that after the erection of Fort Christina, on the Christiana Creek, a path was made thence to the falls of Brandywine—avoiding the marshes on the north side of the Christiana and along Shellpot—and up to Tinicum, which was the seat of government of the Swedes. For many years it is evident that the principal mode of travel was by water and the neighborhood of streams was the popular location for settlers. Subsequent to the capture of Fort Christina and Fort Trinity or Casimir, in 1655, the two were connected by a pathway.

On November 6, 1656, a public meeting was held at New Castle, at which the necessity of bridging the Kil running by the fort was discussed, and suitable action taken; and as a result, a bridge was probably built over Grane Udden,² with a pathway extending over

the marsh where the Broad Dyke was constructed later, and which is now the road to Wilmington. The present bridge over "the Dyke stream at the north end of the town of New Castle" was built by order of the Levy Court, June 4, 1811. The Kil above, on the river, was Strandwich, from which the settlement was called Swanwick.

In the spring of 1671 Captain John Carr, commander on the Delaware, submitted proposals to the Governor concerning "matters of New Castle and the plantations." Section IX. embodied a proposition from the residents of Maryland, adjacent to Delaware, to clear a road half-way between Augustus Herman's plantation and the town of New Castle. Replying to this, the Governor, on June 23d of the same year, ordered that "if those of Mary Land are willing to doe their parte, the officers at New Castle are hereby empowered to enjoyne ye inhabitants of Delaware likewise to cleare their proportion." This road, which was soon built, was the first across the Peninsula of which any mention is made.³

The next official action regarding public highways was taken at a session of court held in New Castle on May 13, 1675; the Governor ordered that roads should be located from place to place, and the court directed that "Whereas it is found that there is a great necessity for a good highway between this Towne and Oppoque-nomin creeke, the inhabitants of Oppoque-nomin Creeke, St. George's Creeke and precincts do wth the first convenience, between this and the last of February next, make and clear a good and passable highway, twelve foot broad, from the sd Oppoque-nomin to the Red Lyon." John Tarkington was appointed overseer and was authorized to order one from each family to work on the road, under a penalty of ten gilders; Casperus Hermans and Direk Laurens were appointed surveyors.

This road was doubtless not located, as the January term of court in 1679, re-issued the order of 1675, applying it to the inhabitants of the "towne of Swanwike, Crainehoeck and all those living on the South syde of Christina creek," and naming Johannes de Haes, overseer from New Castle to the furthestmost branch of Beaver Dams; "Hendrick Williams, overseer of the people of Swanwicke and Crainehoeck, to clear from said branch of Beaver Dams, a mile past Mr. Tom's run; John Ogle, overseer over the rest of people on this side of Christina, to begin from where Mr. Williams leaves off and to Red Lyon." The same court issued a general order providing for the establishment of passable roads from town to town, and instructing the magistrates to execute the provisions referring to new highways. These instructions not being carried out, the court in 1678 provided a penalty of a hog'shead of tobacco for non-performance of necessary work by the people when

of which were named 'Grane Udden' or 'Le Cap des Cruces.' 'Stanwich' or Baie de Rivage and 'Nein Cloeland.'"

¹ Resigned May 19, 1863.

² Vincent (page 264) says: "On the river shore of New Castle Hundred, between what is now the town of New Castle and the mouth of the Christiana, were six considerable streams probably made so by the influx of tide. These streams cut the ground up into necks or capes, the principal

³ Augustus Herman's plantation was the Bohemia Manor, and Johnson, in his "Cecil County History" says, "for many years after Herman's death the road was called the old man's path."

called upon by the overseers, in order to have them completed within fourteen days.

The court at Hoerekill, or the lower counties, was organized by order of the Governor in 1673. In 1680, in a petition to the Governor for the establishment of a court at St. Jones' Creek,¹ the inhabitants complained that at that time there were no properly located roads in that sections. The petition recited that "the great grievances, Hazzards and perills, both by land and water, that wee undergoe in goeing to the Whoorekill Court, nott only the distance beinge to some of us 50, some 60 miles, want of Comodacons of man or beast there, butt the impassable, dangerous waies by reason of perillous Creekes, which many tymes cannot bee past over by man or beast, the hazardous large marshes, and myreous and difficult branches which are past through to the said Court, which doth not onely putt us to great straits and jeopardy of our Lives, but hath and doth give great discouragement to others intendinge to seate in these upward parts from Maryland."²

• At the December term of court, 1679, regulations for public highways were made as follows: "The way to bee made clear of standing & living trees at least 10 foot broad; all stumps & shrubs to bee cloose cutt by ye ground; the trees markt yearly on both sydes; sufficient Bridges to bee made & kept over all marshy, swampy and difficult, dirty places, & what ever else shall be thought more necessary in & about ye highwayes aforesd." These roads were to be attended by the overseers between December and March under a penalty of £1000, and refusal on the part of inhabitants to assist them was to be visited by a fine of four hundred pounds of tobacco.

• On the same day the following road districts were laid out by the court:

"1st. The inhabitants of the South syde of the Appoquenomen and of Blackbird Creeke to bee in one Company, their parte, or Sheare, to Klear a highway from Appoquenomen to ye head of Ducke Creeke, or where else it shall be convenient, and to make a bridge over ye sd Ducke Creeke, if possible, fitt for horse and foot to pass over. That Company to have for overseer, Captain Untwell.

"2d. The inhabitants of ye northsyde of Appoquenomen, from ye head to ye Drayer's Creeke, to bee in one company, theire part, or Sheare, to bee to make ye way good from Appoquenomen to a cartway of Casparus Herman and alsoe from ye cartway of Appoquenomen, as farr as Maryland, — Boeloff Andries, Overseer.

¹ This was afterwards St. Jones County, and later Kent County.

² In Jasper Danker's and Peter Sluyter's journal of a tour in several of the American colonies, 1679-80, the writers describe some of the difficulties encountered on the earlier Delaware roads. Among other experiences related by them is this: "We succeeded, however, in crossing over (a creek) and had then to make our way through bushes by an untrodden path, going from one newly-marked tree to another. These marks are merely a piece cut out of the bark with an axe, about the height of a man's eyes from the ground; and by means of them the commonest roads are designated through all New Netherland and Maryland, but in consequence of the great number of roads so marked, and their running into and across each other, they are of little assistance, and often mislead. . . ." The next morning they attempted to retrace their step accompanied by a local guide. Of this experience they say: "But neither he nor we could follow the now marked trees in the morning light and we soon missed the way, and no wonder, for we now had the marks behind the trees. We went again through the thickets and bushes of the woods, to and fro, for full three hours without any prospect of getting out, and that within a distance of not over three-quarters of a mile. We struck a foot-path at last which led us to Bohemia Creek, the bottom appearing to be hard on this side and promising a good passage, but when we were in the middle of it we sank up to our knees in mud."

"3d. The Inhabitants from ye Drayer's Creeke, downewards and as far as St. George's to bee in one Company, their part or Sheare to be from ye Cartway of Casparus Herman to ye halfe bridge of St. George's, — Casparus Herman, Overseer.

"4th. The Inhabitants of St. George's and up as farr as Mr. Tom's Plantation to bee in one Company, their part or Sheare to be from ye halfe of St. George's Run to the Red Lion Run, — James Crawford, Overseer.

"5th. The Inhabitants of this towne of New Castle, from Mr. Tom's Plantation upwards Swanwike, Crainehook and all those on the southsyde of Cristine Creeke, to cleare from the Towne, downwards, as farr as the Red Lion, and from the Towne upwards to the house of Mr. Joan Paul Jacquett, in Cristina, and Mr. Ambros Backer is appointed overseer in ye room of Johannes De haes, and Mr. Hendrik Vander Burg, in ye room of Mr. Hendrik William over ye Towne People aforesnamed.

"6th. The Inhabitants of ye north side of Cristina Creeke, from ye White Clays faill to ye brandywine kill, will bee one Company. They to cleare from Cristina at Jan Staleop's, Round ye head of Cristina Creeke to this Towne, and a bridge over Cristina head, neare John Ogle's, — Mr. Abram Man, Overseer.

"7th. The Inhabitants between Brandywine Creeke and so as far as Olle fransen's, in the boght, to bee in one Company. They to cleare from ye going over of brandywine Creeke and also from Jacob Vandever's, up as far as Olle fransen's, in the boght aforesd, — Hans Petemen, Overseer."

• The Sixth District embraces the territory westward from New Castle into White Clay, Mill Creek and Christiana Hundreds.* John Ogle at this time resided at Swart Nutton Island, later known as Lewden Island in the Christiana River, New Castle Hundred, and he also owned large tracts of land in White Clay Creek Hundred, from White Clay Creek to Christiana Creek, embracing the site of Christiana Village and Ogletown. • The bridge ordered over "Christina head," which was the head of navigation of the stream, was the Christiana Bridge, around which later clustered the village. The road to Christiana Bridge is shown in a survey of 1684, on record in book of surveys in recorder's office.

• The Seventh District extended from Brandywine Creek to the "Boght." This was a tract of land of over seven hundred acres on the Delaware, extending back "into ye wood," and about two miles above Vertrecht Hook, or the Edgemoor of to-day, which was taken up by Olle Fransen and others before 1673. In the division of the jurisdiction of the courts, made November 12, 1678, the territory under the court of Upland began "from ye north side of Olle fransen's Creeke, othewayes called Steenkel, lying in the boght above ye Verdrietige Hoeck," and above. Steenkil was Stony Creek (now Quarryville Creek). This part of New Castle County remained under the jurisdiction of Upland Court until March 14, 1681, when Naaman's Creek was recognized as the boundary line and so remained until the circle was defined in 1701. The Upland Court, November 12, 1678, ordered "that every person should wthin the space of two monthes, as far as his land reaches, make good and passable wayes from neighbor to neighbor, wth bridges where itt needs to the end that neighbors on occasion may come together, those neglecting to forfeit twenty-five gilders." So it would appear that the road above the Boght was made and opened by owners of the land along the river. That it was built soon after the others were opened is shown from early surveys. The Upland Court appointed overseers of highways October 13, 1680, but no mention is made of districts or particular roads in the minutes of that court.

• The road from Christiana Ferry ran up along the west side of Brandywine and joined the road from Christiana Bridge a short distance from "the falls." The King's road (as both roads in a survey of 1684 are mentioned), after crossing at "the falls," turned southward and passed down the creek, tending away from it until it reached nearly to the marshes in the rear of Vandever's land, when it turned and ran northward along the Shellpot lands, Vertrecht Hook and the Boght to Naaman's Creek and to Upland.

• The foregoing is a record of all roads made or ordered up to the arrival of William Penn, in 1682. Penn ratified and continued the existing regulations, etc., in this connection. The court records for many years from December, 1681, were lost, and little information can be obtained on this subject for a corresponding period. In 1704, New Castle Common was surveyed, and in the report of the survey reference is made to "the rode that leads to Christina ferry," the "Maryland rode," and the "rode that leads to Christina Bridge."

• Mention incidentally of few roads is found prior to 1761. Settlers on the Welsh tract in 1723 petitioned the New Castle and Cecil County Courts for a road from the head of the Elk to Christina Bridge, whence a road led to New Castle. In 1746 an act of Assembly was passed "for repairing and amending highways, causeways, bridges, etc., within the Hundred of New Castle," the text of which is not given. This act was repealed in 1762. In 1752 an act of Assembly was made for erecting bridges and causeways, and laying out and maintaining highways, in which authority for the establishment of public roads was given to justices of the Quarter Sessions; King's highways to be forty feet wide, and other roads thirty, of which all but ten feet was to be cleared. From this date until 1793 the justices of the Quarter Sessions, with eight members of the grand jury, comprised a Levy Court, under whose authority many roads, not here mentioned, were established.¹

An act of Assembly of October 31, 1761, expressed a doubt as to the validity of certain highways established as King's roads under the act of 1752, and therefore legalized them as follows:

"In Kent County the roads beginning at a run near Duck Creek, or Salisburytown, that divides New Castle from Kent County, and running from thence the several courses of the said road through Dover town, until it comes to where the said road separates and divides, about one mile to the southward of the said town of Dover, near to the place where Thomas Nixon now dwells, and from thence the road known by the name of the Drawbridge, or Lower and Upper King's roads, shall severally continue their respective courses until they intersect each other near to a branch called the Three Runns, and from thence on the several courses thereof until it comes to the place where John Clowes, Jr., now dwells, and running from thence on the several courses thereof to the Court-House in the town of Lewes, and so along the bank of Lewes town creek to the Canary Kiln; and beginning at the said Court-House and running on the several courses to a mill known by the name of Frame's Saw-Mill, being at that time the utmost limits of the said County of Sussex, next to Maryland, thence running from the said mill on the several courses to the said John Clowes's, where the said King's roads meet, as is herein described, shall from henceforth be deemed, taken and allowed to be public or King's roads within the said counties."

An act of Assembly, November 2, 1762, provided

for a change in roads located in New Castle County, under the act of 1752, as follows:

"Beginning at the road leading from Chester at the line between the Counties of Chester and New Castle, and from thence over Naaman's Creek to Brandywine Creek; and from thence two public roads or highways shall be laid out, the one over Christina Ferry, near the house of Thomas Jacquet, and from thence to New Castle, and from thence to the inn called Red Lion, where John Rankin now dwells, and from the said Red Lion to the village called St. George's, and from thence to Appoquinimink Bridge, and from thence over Blackbird Bridge to the town of Salisbury, commonly called Duck Creek. And the other from Brandywine, aforesaid, to Wilmington, and from thence to Newport, and from thence to Christina Bridge, and from thence to the Red Lion aforesaid, and from thence to the inn now kept by Walter Crow, and from thence to the inn now kept by Joseph Jacquet, and from thence to Blackbird Bridge aforesaid: Also a public road or highway shall be laid out from New Castle to Christina Bridge, aforesaid."²

The roads were to be sixty feet wide, forty feet cleared, and David Finney, John Evans, William Williams, David Ferris and Empson Bird were appointed commissioners. A supplementary act in 1764 empowered John Stapler, Thomas Tobin, David Stewart, George Monroe and John McKinley or a majority of them, to review and change the road in consequence of public complaints. The act of 1762 was further supplemented in 1769 by a provision for the straightening of the road from White Clay Creek to Christina Creek.³ In 1772 the proprietors of the St. Georges' mill dam were granted an annuity of six pounds for keeping in repair the bridge on the St. Georges' and Appoquinomink bridge road, where it crossed their dam.

In 1791 the road from Brandywine Creek to Christina Ferry, interfering with the streets of the borough of Wilmington, was, by act, of Assembly made to conform to them, and Thomas Evans, Mathew Aiken, Robert Wallace, George Gillespie, Jr., and Jacob Ferris were named as a commission to effect the necessary change.

In 1793, under authority of the General Assembly, Jacob Broom, Wm. Cooch, Wm. Armor, James McCullough and Peter Williams were appointed a commission to locate a road from the Maryland Road where the Peach Bottom Ferry and Bald Friar Ferry Roads intersect, and thence in the most direct course consistent to the intersection of the Nottingham Road and the New London Road at New Ark, and thence to Christina Bridge.⁴

¹ In the division of what is now New Castle County into road districts, in 1679, a road was ordered from Christina Ferry, to connect with the road from Christina Bridge and through Brandywine Hundred to Upland; the road then laid out crossed the Brandywine at "the falls." The site of the ford is on the creek between Jackson and Van Buren Streets, above what was formerly Ashmond's Run. A bridge was built by Peter Vandever lower down the creek, near the present Eleventh Street Bridge. The Assembly, in 1764, authorized the erection of a bridge higher up, where the road provided for in the act of 1752 was intended to cross. The Vandever Bridge was ordered destroyed after the erection of the bridge on the site of the present Market Street Bridge, but it was in use in 1767. The act of 1764 necessitated a new bridge, which was in use until 1809, when the chain bridge was built. The latter was in use until 1822, when it was replaced by a wooden bridge, which was destroyed by a freshet in the spring of 1849. A new bridge was built and was in turn replaced by an iron one in April, 1857.

² This same act required mill owners, whose water-wheels were visible to passing horses, to erect a board cover over their water-wheels.

³ This was a continuation of a road previously authorized by the General Assembly of Maryland from the Susquehanna at Peach Bottom to the Delaware State line.

In 1796 the following act relating to the roads in Kent County was passed by the General Assembly :

"That the following roads in the said County of Kent shall be laid out and straightened, to wit: the road running from the line dividing New Castle County from Kent through Duck Creek Cross Roads, Dover, and Frederica to Milford; the road from Passey, one mile below Dover, to begin above or below Punchoon Run, as may be thought best, . . . running through Camden and Canterbury, and by Richard Delliner's, to the line dividing Sussex and Kent; the road leading from the line dividing this State from Maryland by Blackiston's Chapel, through Duck Creek Cross Roads to Holliday's Landing; the road leading from the last-mentioned line, by James Scotten's, through Lewis's Cross Roads, to Duck Creek Cross Roads; the road running from the last mentioned line, near the Cypress Branch, through Lewis's Cross Roads and by Peter Miller's Mill, to Dover; the road leading from the Horsehead over Carbine's Bridge to the East Landing by John Ham's to Dover; the road leading from Little Creek Landing to Dover; the road leading from the said line of Maryland, near Samuel Milbourne's by the Horsehead to Dover; the road leading from the last-mentioned line near the River Bridges, by Thomas's Chappel, through the White Oak Swamp to Dover; the road running from the said line by Thomas's Chappel through Camden to the Forrest Landing; the road running from the said line near Furlat's Mill to Camden; the road running from the said line near Samuel Willoughby's to Camden; the road running from the said line at or near Whiteleysburgh through Berry Town to Frederica; the road running from Berry Town to intersect the upper State road at or near Bedwell Maxwell's; the road running from the said line over Vincent's Causeway by Stephen Lewis's to Milford; the road running from the said line through land late of Jonathan Emerson, deceased, by Waitman Booth's, to Milford; the road running from the said line, across Gum Island by Major Anderson's, to Milford; the road running from the said line by Marshyhope Bridge to Milford; the road from Marshyhope Bridge near Punch Hall to Whiteleysburgh; the road from Marshyhope Bridge to intersect the upper State road near Jacob Bidle's."

Under the act there were appointed as commissioners, Timothy Cummins, George Wilson and Presley Spruance, for Duck Creek Hundred; John Marim, Gilbert Lemous and Joseph David, for Little Creek and Dover Hundred; John Lockwood, Warner Mifflin and William Berry, for Murderkill Hundred; Abner Dill, Joshua Laws and Major Anderson for Mispillion Hundred, and it was provided that the roads from New Castle County line through Duck Creek Cross Roads, Dover and Frederica to Milford; from Passey, one mile below Dover, running through Camden and Canterbury, to intersection of Berry Town Road near Bedwell Maxwell's; Berrytown Road to Whiteleysburgh; Upper State Road to Sussex County line be kept in repair by the county of Kent.

A supplementary act in 1797 provided for additional commissioners as follows: William Denny, John Cowgill and Daniel David for Duck Creek Hundred; Clayton Cowgill and Thomas Lamo for Little Creek and Dover Hundred; also that Worrell's Bridge, Martin's Bridge, Jones' Bridge and the bridges across the Murderkill Creek near Frederica be supported by the county of Kent, and that the Berrytown Road be continued to Joseph Barker's landing.

In 1796 there was also passed an act relating to the public roads in Sussex County, as follows:

"That the following roads in the said County of Sussex shall be laid out and straightened, to wit: a road to begin at Milford Bridge, and to run thence through Georgetown and Dagborough, until it intersects the west line that divides the said county of Sussex from the State of Maryland; a road to begin at Lewistown, and to run thence through Georgetown until it intersects the north line that divides the county aforesaid from Maryland; and a road to begin at Georgetown, and to run thence to the west line that divides the hundred of Little Creek in the said County from Maryland."

¹ The roads above given were all State roads, and were not subject to alteration by the Levy Courts of the different counties. They were to be forty feet wide, with thirty feet cleared.

Richard Hayes, Nathaniel Mitchell, Woolsey Burton, Rhodes Shankland, Issac Cooper, Thomas Laws and Abraham Harris, Jr., were appointed commissioners.

TURNPIKES.—If the people of Delaware were poor in the matter of ordinary roads, they were afterwards compensated by a number of excellent turnpikes, which were begun with enthusiasm, built with energy and operated satisfactorily. The earlier part of the present century was particularly an age of artificial highways. The pioneer was the Gap and Newport Turnpike. It was a continuation of the turnpike established by the State of Pennsylvania under an act of Assembly, April 7, 1807, from the Philadelphia and Lancaster pike, in Lancaster County, near the Gap tavern, to the navigable waters of the Delaware River at Christiana, or Newport on Christiana Creek. The Pennsylvania act was made to take effect when the Delaware Legislature should authorize the construction of a like artificial road from the State line. The Delaware Legislature accordingly passed an act January 30, 1808, authorizing the commissioners named in the act of Pennsylvania to open subscription books at New Castle and Newport, and to incorporate under the title of The president, managers and Company of the Gap and Newport Turnpike Company. The road was to be not exceeding one hundred feet in width, twenty feet to be "an artificial road bedded with road-stone, gravel, clay or other proper material, compacted together a sufficient depth to make a solid foundation, and faced with clay, gravel or stone, in such manner as to secure a firm and even surface, rising toward the middle by a gradual arch." Persons going to and from public worship and funerals were exempted from toll. There was also a provision for the purchase of the road by the State. The turnpike was completed and used for many years, but there is very little of its history to be found.

Immediately after the passage of the Gap and Newport bill the incorporation of the Wilmington Turnpike Company was authorized by the General Assembly for the purpose of making and operating a turnpike from Wilmington to the Pennsylvania line or to connect with the Gap and Newport pike. The provisions of the two bills, and, in fact, all the turnpike acts were identical. The commissioners appointed under the Wilmington Turnpike Company bill were James Bryon, John Warner, Jacob Broom, James Lea and William Poole, who were authorized to sell two hundred shares of stock at ten dollars per share. The company was organized October 23d, 1809, with Jacob Broom, president; John Torbert, secretary and treasurer; James Brobson, Joseph Robinson, Samuel Stroud, James Canby, Joseph Grubb and John Torbert, managers. Work on the road was begun soon after and in August, 1812, the Governor appointed John Stockton, Allen McLane and George Monro to examine the road, but these three being stockholders were succeeded September 8th, by Pat-

rick O. Flynn, John Patterson and Matthew Kean, who, as commissioners, reported on October 5th, that four and one-half miles of the pike were completed and this much of it was thereupon formally licensed by the Governor and put into operation. The building of the road was continued under Thomas Maguire, contractor, and completed on December 25th, 1817, and a month later, upon a favorable report from Benjamin Ferris, Ashton Richardson and John Dixon, commissioners, the Governor licensed the final section of one mile and fifty-eight perches. The total cost of building and equipping the road was \$39,549.97. It extended from the borough line of Wilmington, through Christiana Hundred to a point near the centre of Mill Creek Hundred where it joined the Gap road and is now known as the Lancaster Pike. The company operated the road until 1877, when it was abandoned and its charter repealed by act of assembly. The road was then divided between Wilmington, Christiana and Mill Creek Hundreds and it passed under the control of the levy court. The officers of the turnpike company from its organization were:

PRESIDENTS.

Dec. 21, 1809. Jacob Broom.
Jan. 5, 1818. Joseph Bailey.
Jan., 1811. Robert Porter.
Jan., 1812. James Canby.
Jan. 2, 1854. Samuel Canby.

SECRETARIES AND TREASURERS.

John Torbet.
Jan., 1811. George Jones.
Jan., 1838. W. A. Mendenhall.
Jan., 1840. Matthew Kean.
Jan., 1859. John P. McLean.
Jan., 1866. Samuel Smith.

The New Castle and Frenchtown Turnpike Company was chartered by the General Assembly of Delaware, January 24, 1809, to build a road from New Castle to the State Line, *en route* to Frenchtown, on Elk River, in Cecil County, Maryland, subject to a similar charter from the Legislature of the latter State; the road to be completed in three years. George Read, James Riddle, Kensey Johns, James McCalmont and Jesse Higgins, were appointed commissioners to secure subscribers. The road was not completed within the specified period, and it probably would never have been finished had not the subject received a new impetus, by the proposed establishment of Steamboat communication between Baltimore and Frenchtown, which was ultimately done and on June 21, 1813, "the 'Chesapeake,' the first steamboat on the bay," made the initial trip. The time for building the turnpike was on January 28, 1813, extended to ten years, and Levi Boulden, Samuel H. Black, James Stewart Peter Williams, John Crow and Oliver R. Howell, were designated additional commissioners. Additional stock was subscribed and the road was built from Clark's corner, now Hare's corner to Frenchtown.¹

On July 1, 1814, John Caldwell, James Stroud and James Bundley, commissioners to view the completed portion of the road, reported three miles finished and it was licensed to that extent. In April, 1817, seven

miles and one hundred and forty-two perches additional were licensed.²

Subsequently a regular line of steamboats was put into operation between Elkton and Baltimore, connecting with the turnpike at Frenchtown, and this led to the location of a tramway and subsequently a steam railway adjoining the bed of the turnpike which was operated until 1853, when it was abandoned, it having in the meantime been absorbed by the Philadelphia, Wilmington and Baltimore Railroad Company. The bed of that pike ultimately reverted to former owners. This company and the New Castle company were merged in one after the use of steam was adopted.

The New Castle Turnpike Company was chartered by the General Assembly January 30, 1811, for the purpose of building a turnpike from New Castle to Clarke's Corner, now Hare's Corner, with authority to use the New Castle and Red Lion State road to its intersection with the Wilmington Bridge road at Clarke's Corner. The act empowered the New Castle and Frenchtown Turnpike Co. to buy the road at cost within seven years. The commissioners under the charter were Kensey Johns, James Rogers, James R. Black, John Crow and Benjamin Marley. An organization meeting was held on April 8, 1811, at the house of John Crow, in New Castle, and Kensey Johns was elected president; John Janvier, treasurer; James Rogers, secretary, and John Crow, Charles Thomas, Benjamin Marley and Richard Sexton, managers. John Crow and Richard Sexton were appointed a committee to estimate cost of building the road, and they reported, April 23, that they had found a quantity of gravel on the shore of the Delaware, near the mouth of Mill Creek, and also on the farm of George Read, where there was plenty of field stone. Work on the pike was commenced August 1, 1811, near the intersection of Delaware and Union Streets in New Castle, and a toll house was located, in November, in the centre of the pike about fifteen feet from the northwest side of Union Street. One mile was completed and opened March 13, 1812. Christopher Zimmerman was appointed toll keeper at \$150 per year. The use of the road was granted to the New Castle and Frenchtown stage line for \$100 per annum. The road was completed to Clarke's Corner on January 8, 1813. Lankford Herring was appointed toll keeper at New Castle February 6, 1813. In 1814 the company was authorized to macadamize the Newport road from the intersection of the turnpike to the southern abutment of the Newport Bridge; Richard Sexton was the contractor and the Newport pike was completed in October 1817 and continued in use for many years. On author-

² Among other items in the schedule of tolls was this provision: "For every cart or wagon, the breadth of the wheels of which shall be more than seven inches, and not more than ten inches or being of the breadth of seven inches and shall roll more than ten inches, two cents for each horse drawing the same; for every cart or wagon, the breadth of the wheels of which shall be more than ten inches and not exceeding twelve inches or being ten inches shall roll more than fifteen, one cent and a half for each horse drawing the same; and for any such carriage the breadth of the wheels of which be more than twelve inches, one cent for each horse drawing the same.

¹ That portion of the road from New Castle to Clarke's corner had previously been built by the New Castle Turnpike Company which was chartered in 1811.

ity of the General Assembly of February 7, 1829, the company constructed a railroad along the line of the pike, and operated it.

The road from New Castle to Clarke's Corner has long been abandoned as a toll-road, but is still in use. Among the officers of the New Castle Turnpike Company were:

| PRESIDENTS. | SECRETARY. |
|--------------------------------------|-------------------------------------|
| April 8, 1811. Kensey Johns. | April, 1811. John Crow. |
| Oct. 5, 1814. Nicholas Van Dyke. | Nov. 10, 1826. Cornelius D. Blaney. |

| Nov. 10, 1826. James R. Black. | |

The Wilmington and Kennet Turnpike Company was incorporated January 21, 1811, to build a road from Wilmington to a point at or near the house of Charles Twaddle, at Centreville, on the Pennsylvania State line, with a provision giving Christiana Hundred the right to purchase the proposed pike after 1820 and make it a free road. The commissioners under the act were Patrick O. Flynn, John Wilson, Captain James Jeffries, Joshua Wollaston, James M. Brown, Joseph Robertson, Edward Gilpin, John Hiron, Caleb Kirk and John Hedrick, who were authorized, in 1812, to extend the turnpike from the line of the borough of Wilmington until it shall intersect Chestnut Street and thence along Chestnut Street to Market Street. On October 8, 1812, John Way, Nicholas G. Williamson and Daniel Lowber, on behalf of the Governor, approved of four miles of the road and it was licensed. The remainder was approved January 13, 1813, by a committee consisting of John Way, Nicholas G. Williamson and Robert Porter, and was also licensed.

The Wilmington and Great Valley Turnpike Company was incorporated January 23, 1811, to build and operate a turnpike from or near the borough of Wilmington on the east side of Brandywine Creek through West Chester to the turnpike roads in the Great Valley, Pennsylvania. The route was along the line of the old Concord road, and the project was animated by local sentiment, as set forth in the preamble of the Act of Assembly:

"Whereas, it appears that some of the public roads in New Castle county have become impassable in rainy seasons by which the beasts of burden have been greatly increased to carry a scanty supply of such articles as the farmer must sell, and which are indispensably necessary unto mechanics and others, whereby the expenses of every citizen are much enlarged, and the spirit for improvement, which is so much wanted to put the farms in a proper state of cultivation and to promote the extension of manufactures is daily depressed, that the intercourse between Wilmington and the Great Valley has suffered for many years and at present languishes so much as to become deeply injurious and sensibly felt by the public."

The commissioners to superintend the construction were Joseph Tatnall, Samuel Canby, Albanus C. Logan, John Way, William Tally, Samuel Love and William Young. A clause in the act awarded Brandywine Hundred the option of purchase within three years. In 1813 Joseph Tatnall, president, announced two and a half miles completed. Patrick Flynn, Caleb Kirk and James Brinkley reported favorably February 24, 1818, and this portion of the road was licensed. The remainder was licensed the same year

on the recommendation of James Brinkley, Caleb Kirk and John Hiron.

The Wilmington & Philadelphia Turnpike Company was chartered February 1st, 1813, to construct a road from the east side of the Brandywine Bridge, Wilmington, to the Pennsylvania state line, toward Philadelphia.¹

The commissioners appointed were, General Thomas Robinson, John Bellack, James Grubb, John Elliott, Edward Tatnall, Adam Williamson, William Hemphill and Thomas Smith. Three and three-quarter miles of the pike were finished east from Wilmington in 1816. The remainder was completed and licensed in January, 1823, on recommendation of George Springer, John Tweed and James Thompson. The officers of the company from 1836 to date, were:

| PRESIDENT: | Jan. 1850. Edward Tatnall. |
|---------------------------|------------------------------|
| 1836. John Elliot. | Jan. 1879. George A. Elliot. |
| Jan. 1849. Samuel Hillis. | TREASURER: |
| Jan. 1871. William Canby. | 1813. Joseph Grubb. |
| SECRETARY: | 1817. Edward Tatnall. |
| 1836. Samuel Wollaston. | 1842. Joseph Tatnall. |

The New Castle & White Clay Hundred Turnpike Company was incorporated February 1st, 1813. The pike proposed by it was from New Castle Turnpike, in New Castle Hundred, to the Maryland line, via. Christiana Bridge and Newark. John Hindman, Henry Whitely, David Niven, George R. Massey, John Crow and Charles Thomas were appointed commissioners, but the road was never built.

The Wilmington & Christiana Turnpike Company was chartered in 1815, and Wm. Robinson was chosen president; Joseph Robinson, secretary and treasurer. The road was partially completed and opened prior to 1821, when one hundred and sixty shares of stock were sold, and the work of construction finished. The officers since 1848, were: President, Eli Hillis; 1852, John R. Latimer; 1865, Henry G. Banning; 1866, William P. Richardson. Secretary and Treasurer: 1848, Ashton Richardson; 1852, Joseph Bringhurst; 1880, John R. Bringhurst.

In January, 1816, an act of incorporation was passed, providing for a turnpike from the village of Stanton to Newark, "ending in the limits thereof, near Holtzbacker's gate, and from the western extremity of the village of Newark, beginning near Pritchard's tavern, to the Maryland line, in the direction of Rock Run, on the Susquehanna." The commissioners were, Andrew Gray, Andrew Reynolds, James Collins, Francis O. Daniel, Hugh Gemmill, Henry Whitely, John Herdman, James Price and John McCalmont. A supplementary act of February 7th, 1817, provided that when ten or more persons subscribed for five hundred shares, at \$25 per share, the company may organize and build the road.

FERRIES—As public roads preceded the artificial turnpikes of late days, so the primitive ferries were

¹ The main line of this route was laid out first in 1679, re-laid to nearly the present course in 1764, and was known as the King's Road. The stone-arched bridge across Naaman's Creek had been built by the Levy Court Commissioners, in 1802, and upon the completion of the road was leased by the Levy Court to the Turnpike Company.

the forerunners of the drawbridges of the last century and for maintaining the facilities for transporting man and beast over dangerous streams. The ferrymen were granted the necessary land and protected by law from competition. The first record of a ferry is found in the York records, October, 1669, in a land patent from Governor Francis Lovelace to Robert Jones. A copy of the original being appended as follows.

"Whereas there is a certain small parcell of land in Christeen Kill, at Delaware, where formerly ye flort stood, wch lyes undisposed of & it lying neare to ye water syde where is a convenient place to keep a ferry for ye gen^{al} good of ye Inhabitants in that Ryver, ye wch Robert Jones doth undertake to maintaine wth a sufficient Boate for ye same if it may be graunted him as is recomended to by ye officers at Delaware, for an Encouragment to any such undertaking as may tend to ye publike good know yee, &c., with a clause, that whosoever hath ye Land shall uphold ye ferry or be obliged to keep a boate for that purpose, he or they taking some reasonable satisfaction for ye ferriage & Quilt Rent, 1 bushel. The Patent dated 1st of October, 1669."

The court at New Castle, on January 6, 1680, directed the clerk to draw up regulations for "a ferry to be kept at Cristina," but there is not any record of the clerk having done so. On October 16, 1684, "a complaint was exhibited in Court for want of a ferry over Christeen and Brandywine Creek, ye judges order the Court to speedy care about it, y^t it may be forthwith done." And this seems to have resulted in the court ordering, two months later "yt if the owners of ye land on this side of Christeen Creek doe not speedily keep a ferry, that upon their refusall anny other person may have ye benefit."

The land on the south side of Christiana creek belonged to Jean Paul Jacquet, who was vice-director, under Stuyvesant, in 1656. He took charge of the ferry, but at the succeeding term of court, January 20, 1685, "Upon the Petition of Jan Paul Jacquet to be discharged from ye trouble of keeping a ferry, the Court order that Charles Pickering and George More consider of ye most convenient Place, with ye least damage to ye owners of ye Land, for ye keeping a ferry over Christina Creek, and to make report at ye next Court." This committee reported "y^t ye fittest place to keep a ferry on Christina Creek is on ye south side," and April 23, 1685,

"Upon ye petition of Daniel Smith to erect a ferre at Christina Creek, ye Court, having tendered the first offer to John Jacquet, Senior, ye owner of ye land, according to law, and he Refusing, ye Court order ye Petitioner to erect a ferre at ye sd Creek, and order ye Land Limited by ye Law for ye accommodation of a ferre, to be Layd out by ye Surveyor at ye appointment of James Wallains and Peter Alrichs, to ye Least damage to ye owner of ye Land, and best accommodation of ye ferre yt possibly may be, ye sd Daniel Smith being ordered to Pay one bushell of wheat pr year, as a rent to ye owner of ye sd Land."

Accordingly, Daniel Smith was appointed ferryman. This ferry was continued, and in 1764 an act was passed regulating the ferry over Christina Creek and the bridge over the Brandywine.

On October 26, 1790, the court was petitioned to make the ferries across the Christina at Newport and Wilmington free. In January, 1791, Peter Jacquet, Jr.,¹ asked for an increase of the ferriage rates established by law, and for the privilege of keeping the ferry on both sides of the creek.

¹ This was Captain Peter Jacquet, who resided in the mansion house, on the east side of Christiana Creek, on the land now owned by the Diamond State Iron Company.

An act of Assembly, February 8, 1794, instructed the keepers of the ferry over Christiana Creek to provide wharves and landings on both sides, and good substantial boats, and to make rates of ferriage. On January 21, 1797, Jacob Broom, Major Peter Jacquet and William Stidham were appointed commissioners by law to build wharves, landings and boats, rent or lease the ferry, keep it in repair and regulate its operation. Samuel Burns was keeper of the ferry. He was succeeded the following May by Thomas Frieday. According to the report of this commission made May 15, 1800, the cost of the improvement was as follows:

| | |
|---|-------------|
| " Andrew Conarroe, for Wharf, and filling..... | \$2702.30 |
| Neil Campbell, for filling Wharf on north side of Creek.. | 80.00 |
| George Miller, for two Boats, &c | 413.28 |
| John Marshall, for two Battenx..... | 40.60 |
| James McCullough, for Smith work | 349.72 |
| Richard Sexton, for Carpenter work of house on north side..... | 51.07 |
| Benjamin Yarnall, for Smith work..... | 14.35 |
| Isaac Hendrickson, for Lumber..... | 66.10 |
| Robert Sawyer, for Smith work | 30.38 |
| Peter Jacquet, for boat, before the second new one could be procured..... | 66.67 |
| do, for Gravel to fill Wharf..... | 66.00 |
| Thomas Magen's Wharf | 25.09 |
| To Sundry small amounts in 14 bills..... | 102.10 |
| | <hr/> |
| | \$4019.97 |
| Commissioners allowance 5 pr. ct..... | 200.00 |
| | <hr/> |
| Total amount..... | \$4220.06 " |

The ferry was leased to Caleb P. Bennett for seven months, at the rate of \$250 per year, and at the end of that term for \$300 per year.

In May, 1798, the old ferry over Christiana Creek and the old road were the subjects of public complaint, and the necessity of a road from Newport to Christiana Creek, to a proposed new ferry to New Castle, was urged, and Moses McKnight, James Robinson, Charles Springer, William Foulk and Robert Phillips were appointed to view and, if necessary, lay out the road. They did both and reported May 9, 1799, when Richard Mahon plotted it. The commissioners of the ferry in 1800 were Samuel P. Moore, John Bird and Jacob Alrich; in 1801, Wm. Poole, John Bird and John Way; 1804 and 1805, Samuel P. Moore, Abraham Eves and Hezekiah Niles. .

In 1803 the Levy Court appropriated \$200 to build a new flat for the lower ferry over Christiana Creek, and in 1807-8, John McClary and William Young were lessees of the lower ferry.²

In January, 1807, the Legislature chartered a company to erect a draw-bridge over Christiana Creek at Wilmington, and open a road thence through Holland's Creek Marsh to the fast land, near the house of Major Peter Jacquet, to intersect the road leading from the ferry over the river below Wilmington to the town of New Castle. In March, 1808, the County Court ordered the new bridge opened to the public, and the ferry property sold.³

² By this is meant the lower of the two boats in the same locality.

³ The ferry-house on the south side of the ferry was the mansion house of Captain Peter Jacquet, and stood on a slight elevation in the yard of the present Christiana Hoteling-Mills, where the cellar excava-

The Brandywine ferry receives mention first in an order of the New Castle County Court, in May, 1675, to the effect "that a ferry-boat bee maintained and kept att the ffalls at the west syde of this River, a horse and a man to pay for passage 2 gilders, a man without a horse ten styvers."¹

In 1684 a complaint was made of the want of a ferry over Christiansa and Brandywine Creeks. In 1689, Cornelius Empson was authorized to erect a ferry over the Brandywine Creek. While little is known of a ferry on the Brandywine, excepting their use when bridges were being built, many references are made to the "old ford" and "fording-place," which was at the foot of Adams Street. In a deed of 1727 the ford and the ford road are both mentioned, as is also the ferry and ferry road, the ferry being designated at what is now the north end of French Street. On September 6, 1729, Governor Gordon, of Pennsylvania, met at "Brandywine ferry" with the county magistrates in a case concerning property of the Swedes' Church. A deed of October 25, 1766, spoke of a lot on the south side of French Street, on the Brandywine, as "the old ferry place." The bridge over the Brandywine was built the year previous on about the present site under the act of 1762.

In a petition for the continuance of a road, about 1786, from the Brandywine bridge at the head of Market Street down the north side of the creek, past "the four lower mills on that side of the creek," to the creek, "it being in the same place and on the same ground where the publick road anciently went, while the publick ferry was kept at this place."

The court records of September 2, 1696 have the following record concerning a ferry over the Indian River, which is in Sussex County.

"Peter Whipples acquainted the Court of the conveniency of a ferry from his house over the Indian or South River for ye mutuall comodacon correspondency of the Inhabitants of this county with those of the province of Maryland and desires yt himselfe solely amongst his neighborhood may be appointed to keep the same and that ye Crt would Please either out of the Public Charge to allow him yearly for his Labour and Trouble therein, or — some certain rates that he shall take of persons for them and their horses Transient. The Ct thinks fit to grant that he alone thereabouts keep ye said ferry and that he be paid for setting over to or frow of a man and horse (viat.) Ten pence for a man and Ten pence for a horse, so much forward and so much backward and yt he provide a good conveniency for ye safe passage or ferryage both for man and beast. And all other persons, his neighbours, are hereby forbidden (upon hire or pay) to ferry any persons or horses over ye said ferry."²

tion is still to be seen. The ferry-house on the north side, also a tavern, stood on the grounds of the present Diamond State Iron Company. In 1807 it was kept by John McClary, and the jury met there when awarding damages for the road and bridge then building over Christiansa Creek and the Holland Marsh.

¹ This location was, without doubt, on the Brandywine, below the first fall, which was between Jackson and Van Buren Streets, and above what was formerly known as Ashmond's Run.

² Peter Whipples began the purchase of land on Indian River in 1692 and on Sept. 3, 1693, bought a tract called "Warwick," at which place he lived and where the ferry was established. The road from Lewistown, which was the principal settlement at the time, led across the river at this place and in later years came also from the upper part of the State and both roads united at St. George's chapel. The site of the old ferry is at what is still known as the "Old Ferry Landing," a narrow place in the river and to which the old road led. It was on the tract "Warwick," and the present name is used for the farm and mansion of old time. In later years, a ferry was established higher up the river, below Swan Creek. The name of Ferryman Billy Burton is still remembered as the one who was wont to carry "over to and frow of a man or horse," at this ferry.

The New Castle and Salem Ferry was an important institution to the people of New Jersey, who, in early days, voted at New Castle, worshipped at Craine Hook and the Old Swedes' Church, and were, for many years, under the jurisdiction of the court at New Castle. The earliest public record of a ferry across the Delaware is found in Governor Keith's answer to a petition of Weasel Alrichs, July 25, 1724:

"That the Ferry between New Castle and Salem, over the River Delaware, is very irregularly kept and not well attended, so that Passengers are frequently delayed and hindered in passing the said River on their lawful occasions, and that he is willing to keep the said Ferry as may be most convenient for the transportation of Horses, Cattle, Goods or Passengers, and to provide necessary boats and flats for the said service and submit to such Regulations as by the Laws or ordinances of the Government of our said Counties already are or hereafter shall be made for well-managing of the said Ferry, hath prayed our Letters Patent to him and his heirs for the sole benefit of keeping the said Ferry from City of New Castle in the Government of our said Counties to the Town of Salem in our Province of New Jersey, and for one mile above or one mile below either the said City or Towne under the regulations aforesaid.

"Know ye that wee, taking the Premises into our Royal Consideration, and being desirous to Render the Passage of all our loving subjects, who may have occasion to be transported over the said River Delaware from the City of New Castle to the Town of Salem, more safe, easy and commodious, and also to encourage the said Weasel Alrichs for his expense and trouble in providing suitable flats and boats for the said service,

"Have, of our Special Grace, Certain Knowledge, Mere Motion, for us and our successors, given, granted, Ratified and confirmed, and by these presents do give, grant, Ratify and confirm unto the sd Weasel Alrich and his heirs the sole keeping of the said Ferry from the City of New Castle in the Government of our Counties of New Castle, Kent and Sussex upon Delaware, over the said River Delaware to the town of Salem in our province of New Jersey and for one mile above and for one mile below either of the said City or Town."

Michael King, who lived in New Castle and was in the Revolutionary War, obtained a charter at one time to operate this ferry, and later George Monro, who died about 1800, also controlled it.

A ferry was established by act of Legislature, January 21, 1801, over the Delaware at New Castle, at the brick house, southeast corner Harmony and Front Streets, and wharf commonly called "The Old Ferry," and James McCalmont, owner of the house, was given exclusive right to operate it for twenty-one years, which term was, in 1811, extended until 1832. About 1820 the ferry-right was sold to William Callahan, upon whose death his son, James Callahan, succeeded him, and retained it as late as 1835. In later years the ferry was known as "Craven's Ferry," that being the name of the man who had charge of it on the Jersey side.³

An effort was made in 1783 to establish a ferry at Thoroughfare Neck, but without success.

On February 2, 1793, a private act of the General Assembly granted to Betty and Isaac Cannon the sole and exclusive right, for fourteen years, of maintaining a ferry over the river Nanticoke in Sussex County, to be known as Cannon's Ferry. It was renewed for fourteen years in 1807 and, on the death of Betty Cannon, in 1815, it reverted to her sons, Isaac and Jacob. At their death, in April and May, respectively, 1843, Jacob Nicholson succeeded them.⁴

³ The old ferry-house stood on the river, at the upper end of Front Street, where the coal office is now. Dr. James McCalmont lived for many years in the old Tile House.

⁴ Nicholson operated it but a short time. In 1883 the county estab-

A ferry was established at Newport prior to 1790, in charge of Thomas Duff. An effort was made to start another in the same vicinity, against which a protest prevailed for several years; but the movement was finally successful, and the General Assembly authorized the Newport Ferry by act of January 21, 1800. William Armor, John Crow and William Aull were appointed commissioners, and the ferry was maintained until the incorporation of the Newport Bridge Company and the building of a draw-bridge under act of Assembly, February 3, 1813, when it was abandoned. The several commissioners of the ferry were,—in 1800, John Crow, William Aull, William Armor; 1803-04, John Crow, David McCalmont, Jacob Robinson; 1806, John Crow, Zachariah Derrickson, David McCalmont; 1808-10, John Crow, Zachariah Derrickson, John Lynam; and the bridge commissioners were John Caldwell, James Stroud, George Read, Kensey Johns and John Crow.

The Seaford Ferry was the result of a petition to the General Assembly by the people of that village in 1807. An act was passed January 27th, appointing Richard Lawrence, John Rust, Sr., and John Hooper, proprietors, with exclusive rights. The ferry was established and operated by them for many years, and they sold it ultimately to Captain Hugh Martin, who continued it until the Seaford Bridge Company in 1832 built a draw-bridge near the ferry site, when it was abandoned. Captain Martin purchased the bridge and bridge property April 8, 1843, under authority of the General Assembly, and in 1865 the county bought it and made it a free bridge.

TRANSPORTATION.—The transportation of mails and passengers was unknown among the earliest settlers, because, perhaps, there were neither mails nor passengers; letters were carried by travelers or traders, or by messengers specially trusted with them. It was not until population had widened and extended from the river-banks that any regular conveyance of letters was necessary. The weekly post-routes between Philadelphia, Chester, New Castle and other settlements, established by William Penn, in 1683, are the commencement of the public mail facilities of Delaware. In July of that year, Henry Waldy, of Tacony, was given authority to conduct the service and to supply passengers with horses from Philadelphia to New Castle. The rates were to be: From Trenton to New Castle, seven pence; from Philadelphia to New Castle, four pence; and to Maryland, six pence. This post went once a week, and was to be fully published "on the meeting-house door and other public places."

On the 17th of February, 1691, King William and Queen Mary granted to Thomas Neale, for twenty years, power and authority to establish a postal system in America. Under this grant a general post-office was established in the colonies. The advance

of the post-office, however, was slow. In December, 1717, Jonathan Dickinson, of Philadelphia, wrote to a correspondent: "We have settled a post from Virginia and Maryland unto us, and goes through all our northern colonies, whereby advices from Boston unto Williamsburg, in Virginia, is completed in four weeks, from March to December, and in double that time in the other months of the year." In 1757 the mail to Annapolis, Md., from Philadelphia, ran once in two weeks in summer, and once a month in winter, *via* New Castle, to the Western Shore and back to the Eastern Shore.

The stages to Baltimore from Philadelphia went by way of boat to New Castle, and across the country to the head of the Elk River, from which water conveyance was taken, partly by way of Chesapeake Bay, to Baltimore. In 1757, a line was first set up between Philadelphia and Annapolis, Md., by John Hughes & Co. Stage-boats left Floyd's Wharf, Philadelphia, and sailed down to a point opposite Reedy Island, at Cornelius Carty's, where a wagon attended and proceeded to Fredericktown, from which a stage-boat went to Annapolis. The Rev. Andrew Burnaby, who traveled through North America in 1759 and 1760, left Annapolis on the 13th of June, 1759, for Fredericktown, upon the Sassafras River, in a schooner, and was greatly pleased with the scenery of the bay, and with "innumerable porpoises playing about the bows of the ship." At Fredericktown he hired an Italian chaise, with a servant and horse to attend him as far as Philadelphia. They went to New Castle, which is thirty-two miles, and thence, by the way of Wilmington, Chester and Darby, to Philadelphia, ferrying across the Schuylkill about three miles below Philadelphia, probably at Penrose Ferry.

The usual route to Baltimore from Philadelphia, after the Revolution, in spring, summer and fall, was by stage-boat to New Castle, thence by stage over the peninsula to Elk River, and thence by boat to Baltimore.¹ In 1796 a daily stage ran to Wilmington and Baltimore from Philadelphia once a week. The following description of the traveling in those days is from the *American Annual Register* of January 19, 1797: "The Roads from Philadelphia to Baltimore exhibit, for the greater part of the way, an aspect of savage desolation. Chasms to the depth of six, eight, or ten feet occur at numerous intervals. A stage-coach which left Philadelphia on the 5th of February, 1796, took five days to go to Baltimore. The weather for the first four days was good. The roads are in a fearful condition. Coaches are overturned, passengers killed and horses destroyed by the overwork put upon them. In winter sometimes no stage sets out for two weeks."

A comparison of the present route of travel through Delaware with that of the earlier part of the present century is decidedly interesting. In 1802 S. S. Moore

lished a ferry there. Residents of Delaware are ferried over free; others pay a small toll.

¹ This stage route was established by Joseph Tatlow, and ran from New Castle to Frenchtown, nearly on the line of the New Castle and Frenchtown Turnpike.

and T. W. Jones issued "The Traveler's Directory," giving the route from Philadelphia to Baltimore, with short descriptions of localities, and maps of that portion of the State. From this it is seen that the traveler proceeded from Philadelphia by way of Gray's Ferry, Cobb's Creek, Darby, Ridley Creek, Chester and Marcus Hook to Wilmington. Leaving Marcus

THE OLD STAGE COACH.

Hook, "a small town at the confluence of Marcus Hook Creek with the Delaware, where vessels are defended from the ice in winter by long wharves or piers made for that purpose," this work says:

"The State of Delaware commences between the nineteenth and twentieth mile. . . . The road continues entirely across this State through New Castle County, which is bounded on the north by Pennsylvania, on the east by Delaware River, on the south by Kent County and on the west by the State of Maryland. It is a populous and well-cultivated county, being well watered by the Brandywine and Christiana Creeks and their branches; on which are four paper-mills, two snuff-mills, one sitting-mill and sixty for grinding grain. The northern parts of this county are hilly and broken ground."

Naaman's Creek¹ was about twenty and a quarter miles from Philadelphia and was bridged. The tolls here were:

| | cents. |
|--|--------|
| Coach and four horses..... | 25 |
| Coach and two horses..... | 12½ |
| Stage Waggon..... | 18 |
| Horse and chair, sulkey or sleigh..... | 6 |
| Man and horse..... | 3 |

Grubb's Landing was nearly opposite the twenty-second mile-stone, on the bank of the Delaware, and "some distance on the eastern side of the road."

The Brandywine Creek, over which was a stone bridge, was at the twenty seventh mile. "A fine range of mills, perhaps the completest in the United States, are just below the bridge. In the neighborhood of Wilmington are thirteen, which are capable of grinding four hundred thousand bushels of grain in a year. The navigation of this creek admits vessels carrying one thousand bushels of wheat to come close up to these mills to load and unload."

"Wilmington," the directory said, "stands at the twenty-eighth mile from Philadelphia, though it may

¹ Naaman's Creek, now Claymont, received its original name from a chief and orator of the Minquas tribe of Indians. He figured prominently as a friend of the whites, particularly during Rysdugh's presence in Delaware, in the seventeenth century. Campanius says that ten Indian sachems, among them Naaman, attended a treaty meeting on Tinicum Island, July 17, 1654. The Indians complained that the Swedes had brought much evil upon them, and many Indians had died since the Swedes came into the country. The Indians were given presents, and Naaman pledged the friendship of the Indians anew to the Swedes, and said if any persons should contemplate harm to the Indians, the Swedes should warn them of it, and in the event of any plot against the Swedes, the Indians would send them word, even if it were in the middle of the night. This pledge was never violated, and the treaty made at that time was never abrogated.

be said to extend from the Brandywine to Christiana Creek. It is a port of entry and a post-town, and is the most considerable and flourishing in the State. It is regularly laid out; the principal part of it is on the north side of Christiana Creek, upon the southwest side of a hill that rises one hundred and nine feet above the tide. On the west side of the town is a stone building, one hundred and twenty feet by forty, three stories high, for the reception of paupers, and a large stone edifice built for an academy. A bolting cloth manufactory and a distillery are carried on here. The public buildings are, besides those already mentioned, a town hall, two market-houses, two Presbyterian Churches, one for Swedes, one for Baptists and one for Methodists. About the year 1736 this place was first built, and in a few years was incorporated. Its officers are two burgesses, six assistants and two constables. The Delaware Bank is established here, and has greatly aided the commerce of this town and the adjacent country."

Newport was near the thirty-second mile-stone, on the north side of Christiana Creek, in a pleasant situation, and had a considerable trade with Philadelphia in flour. Stanton was thirty-four miles from Philadelphia, within the forks of White and Red Clay Creeks, and "a place of little note." In its neighborhood were some good flour-mills.

Christiana Bridge was thirty-seven and one-quarter miles from Philadelphia and nine and one-quarter from Wilmington, situated on Christiana Creek at the head of navigation. "It is the principal carrying-place between the waters of the Chesapeake & Delaware, and has a considerable trade with Philadelphia in flour."

Iron Hill, forty-two and one-half miles from Philadelphia, abounded in iron ore. The State of Maryland began about forty-four and three-quarters miles from Philadelphia, and thence the road passed through Elkton, Northeast, Charlestown, Principio Creek, Havre de Grace, Harford or Bush Town, Abingdon, Joppa, crossing the Little and Big Gunpowder and entering Baltimore at Fell's Point. The rates of ferriage over the Susquehanna at Havre de Grace were,—

In 1826 General Bernard, Capt. Poussin, of the Engineer Corps, and a number of Maryland gentlemen, invited by the Postmaster General, began the survey of a new mail route between Philadelphia and the national capital. Messrs. Gilpin, Cooch and Torbert, of this State, accompanied the party through Delaware.

As early as 1774 a line of sailing packets, now known as Bush's Daily Steam Freight Line, was established between Philadelphia and Wilmington.

Another packet line between the same points was established in 1776, and is now known as Warner's Philadelphia and Wilmington Propeller Line. The Ericsson line of steam propellers, between Philadelphia and Baltimore, by way of the Chesapeake and Delaware Canal, was chartered on February 25, 1844, as the Baltimore and Philadelphia Steamboat Company. A line of steamboats was run over the route by private firms for several years before the formation of the present company.

CANALS.—The advantages to be derived from water communication between the Delaware and Chesapeake were discussed more than two hundred years ago. In Danker's and Sluyter's journal of a trip through Delaware and Maryland, in 1679-80, after reference to a "cart-road from Apoquemene, a small village situated upon a creek, to Bohemia Creek or River," near the residence of Augustine Herman, the pioneer engineer and surveyor of that section, the writers say:

"Upon this road the goods which go from the South (Delaware) River to Maryland by land are carried, and also those which pass inland from Maryland to South River, because these two creeks,—namely, the Apoquemene and the Bohemia—one running up from Maryland and the other from the Delaware River, as the English call the South River, come to an end close to each other, and perhaps shoot by each other, although they are not navigable so far; but are navigable for eight miles,—that is, two Dutch miles, of fifteen to a degree. When the Dutch governed the country the distance was less,—namely, six miles. The digging of a canal through was then talked of, the land being so low, which would have afforded great convenience for trade on the South River, seeing that they would have come from Maryland to buy all they had need of, and would have been able to transport their tobacco more easily to that river than to the great Bay of Virginia, as they would now have to do for a large part of Maryland. Besides, the cheap market of the Hollanders in the South River would have drawn more trade; and if the people of Maryland had goods to ship on their own account they would do it sooner and more readily—as well as more conveniently—in the South River than in the great bay, and therefore would have chosen this route, the more so because so many of their goods, perhaps, would, for various reasons, be shipped to Holland as to England. But as this is a subject of greater importance than it seems upon the first view, it is well to consider whether it should not be brought to the attention of higher authorities than particular Governors. What is now done by land, in carts, might then be done by water for a distance of more than six hundred miles."¹

In 1767 or 1768 Thomas Gilpin, with the assistance of some gentlemen, made a number of surveys and estimates for a canal from Duck Creek to the head of Chester, which he then owned, and where he occasionally resided.

The subject was again suggested in December, 1785, by the State of Maryland, which invited the concurrence of Delaware and Pennsylvania in a plan for a canal between the Chesapeake and the Delaware. Mr. Madison,² speaking of this subject, said: "If that is done Delaware and Pennsylvania will wish the same compliment paid to their neighbors." Nothing, however, was done in the matter, although, from time to time, a number of routes were surveyed and estimated from

the head of Chester, Bohemia and Elk Rivers and from Red Lion Creek to Back Creek. On December 7, 1799, the Maryland General Assembly chartered a company by the name of the Chesapeake and Delaware Canal Company, with five hundred thousand dollars capital stock, at two hundred dollars per share, and appointed a number of commissioners with authority to co-operate with the Delaware and Pennsylvania authorities in cutting a canal between the Chesapeake Bay and the Delaware River, and to open subscription books. The act, however, was not to take effect until the Legislature of Pennsylvania should declare the Susquehanna River a highway and authorize the removal of obstructions from it not later than March, 1800.

On the second Monday in May, 1803, the organization of the company was completed at Wilmington by the election of Wm. Tilghman, J. C. Fisher, George Fox, Joshua Gilpin, of Pennsylvania; Mr. Tatnall, Mr. Johns and James A. Bayard, of Delaware; and Messrs. Chew, Gale and Adlum, of Maryland, as president and directors. Messrs. Benjamin H. Latrobe, Cornelius Howard, of Maryland, and Mr. Thompson, of Pennsylvania, were appointed engineers and surveyors, and Mr. Blaney, of New Castle, was afterwards added. After numerous surveys, the route via Elk River was adopted.

The work was begun May 2, 1804, and a large sum of money was expended. Nothing practical was accomplished until September, 1821, when the Philadelphia Philosophical Society appointed a committee to examine and report upon the measures taken to build the canal. In 1823 the Delaware Legislature appropriated \$25,000 for the use of the canal company and the same year the Pennsylvania General Assembly renewed the charter of the Philadelphia Bank for fifteen years, on condition that the bank should subscribe \$100,000 to the "Delaware and Chesapeake Canal Company." In the spring of 1823, an active effort was made in Philadelphia to raise sufficient money to complete the canal, and it was estimated that \$700,000 would be required for that purpose. During the winter of 1824-25, 600 men were kept constantly employed and the following spring the force was doubled, and it was expected that the canal would be completed in two years. In October, 1825, the work was suspended, in consequence of a dispute with John Randel, Jr.,³ one of the contractors. In December, 1825, 1500 men were employed in completing the canal. In 1826 the Delaware terminus of the canal was called Delaware City and an evidence of the public confidence in the success of the enterprise is shown in the fact that the building of a "town" was commenced and a large lot of ground sold at the

¹ Memoirs of Long Island Historical Society, vol. I., p. 209. On February 3, 1786, the General Assembly passed an act appointing Thomas Collins and Silas Snow, of Kent County, and Marinas Haughey, of New Castle County, commissioners to lay out and cut a canal across three points of a marsh on Main Duck Creek, between Eagle's Nest Landing and the head of tide-water, so as to improve the navigation of Main Duck Creek.

² James Madison was present at a meeting of scientists, held in the old academy on Market Street, Wilmington, in 1786. Among others in attendance were Benjamin Franklin, Dr. Rittenhouse and Benjamin Rush.

³ Mr. Randel sued the company for relieving him of his contract to build the canal, and secured a verdict for \$226,885.74. Mr. Randel claimed that this suit ruined him. A controversy arising afterwards, both parties endeavored to collect the tolls on the canal. The suit lasted for ten years. It went through the Supreme Court of the United States, after being passed upon by the Court of Appeals of Delaware, and was finally reconciled, in 1836, by action of the General Assembly of Delaware.

rate of \$4356 per acre. In February, 1826, the force on the canal was increased to 2500 men, and later to 2600. In August, 1826, the company borrowed \$350,000, at 3½ per cent. The same month a specimen of amber was found in the deep cut of the canal. In October, 1826, the bridge over the canal, at Buck Tavern, this State, was finished. It was 225 feet long and 90 feet high. In 1827 an additional loan of \$200,000 was floated without difficulty. Early in November, 1828, water was admitted for eight miles into the canal from the Delaware and the canal was completed, excepting a link of a fourth-mile, about four miles from the Maryland end. The canal was completed and opened informally on July 4, 1829, with the attendance of military from Baltimore, but an imposing programme was necessarily omitted owing to a severe rain-storm. The canal was not put into general use, however, for some time. In September, 1829, barges were allowed to pass through regularly, and on the 28th of the same month the first schooner made the passage.

On Saturday, October 17, 1829, the canal was formally opened and was made the occasion of much rejoicing. There were many excursionists present, including two military companies from Philadelphia. The United States schooner "Ranger," lying at St. George's lock, fired several salutes, and the Boston brig "Sciot," gayly decorated, was stationed at Summit Bridge, from which place national salutes were given. Three steamboats were necessary to convey the Philadelphia party; among them the "William Penn" made her first trip. President Andrew Jackson was invited to be present, but sent a letter of regret. An appropriate address was made by Mr. Biddle, of Philadelphia. The actual cost of the canal was \$2,201,864, and the tolls soon amounted to \$100 per day. In February, 1831, the tolls were \$1800 to \$2600 per week. During the year ending June 1, 1834, the canal was considerably damaged, and the receipts fell off \$7000, owing to the navigation being suspended. In 1834 the "affairs of the company were embarrassed." Afterwards it recuperated and flourished. For many years it has been used daily by the Ericsson Philadelphia Steamboat Line and the New York and Baltimore Transportation Company's propellers in addition to the usual traffic.

THE PHILADELPHIA, WILMINGTON AND BALTIMORE RAILROAD COMPANY was originally four separate and distinct corporations—being formed of the Baltimore and Port Deposit, the Delaware and Maryland, the Wilmington and Susquehanna and the Philadelphia and Delaware County Companies.

The Baltimore and Port Deposit Railroad Company was organized under a charter from the General Assembly of Maryland, March 5, 1832 (capital stock, one million of dollars), to construct a railroad from the city of Baltimore to the Susquehanna River. The incorporators were Albert Constable, John W. Thomas, Granville S. Townsend, Henry S. Stiles, Frederick Dawson, William H. Freeman, Peter Neff

and Job Smith. The preliminary organization was effected in 1833, stock more than sufficient to complete the road was subscribed, and a survey was made, but nothing further was accomplished until 1835, when a reorganization took place, with E. L. Finley as president, and the work of construction began at once. Mr. Finley resigned October 12, 1835, and was succeeded by Roswell L. Colt, who held the office about a month and was succeeded by Lewis Brantz. All of these presidents were citizens of Baltimore.

The Delaware and Maryland Railroad Company was chartered, also by the General Assembly of Maryland, March 14, 1832 (capital stock, three millions of dollars), to construct a road from the Maryland and Delaware line to the Susquehanna River. This company organized at Elkton, April 18, 1835, with Mathew Newkirk, of Philadelphia, president. The road was begun in June of the same year, and April 18, 1836, the company united with the Wilmington and Susquehanna Railroad Company.

The Wilmington and Susquehanna Railroad Company was chartered by the Delaware General Assembly, January 18, 1832, with \$400,000 in capital stock, to build a railroad from the Pennsylvania line through Wilmington to the Maryland line. The first meeting of the Wilmington and Susquehanna Company was held in Wilmington, November 29, 1834, and in a short time a preliminary survey and estimate were ordered, toward the cost of which the city of Wilmington appropriated \$300. February 13, 1835, the committee having in charge the matter of survey recommended the building of the road, in connection with the Delaware and Maryland Railroad, to Charlestown, which was regarded as especially advantageous as a terminus. A report of the survey by William Strickland was submitted, showing that the proposed twenty-seven miles would approximate \$525,000 in cost. The subscription to the stock was immediately begun,¹ and the company organized permanently on April 2, 1835, with James Canby, of Wilmington, as president. Ground for the new road was broken near Wilmington, June 27, 1835, with imposing ceremonies, including a procession and the turning of sod by Governor Caleb P. Bennett, the veteran of 1776. The attendance included State officials, officers of the company and many distinguished guests. The work of construction was then prosecuted with energy, and in December the best locomotive to be obtained in England was ordered from Liverpool. At the same time other locomotives were ordered from G. W. Whistler, of Lowell, Massachusetts, and M. W. Baldwin, of Philadelphia, with a view of obtaining the best results from active competition. The American locomotives proved so far superior to the one imported that no other orders were sent abroad for rolling stock. On May 5, 1837,

¹ The portion of the stock allotted to Wilmington was taken in a half-hour; and the *Philadelphia Inquirer*, in March, 1835, stated that when the hour arrived for opening the books in that city, those waiting to subscribe were told that all the stock had been already taken. A few hours later the stock sold at an advance of four dollars.

a trial excursion was given from Wilmington to the Susquehanna, and the road was formally opened July 19th, when a joint entertainment was given by this company and the Baltimore and Port Deposit Company, on board the steam ferryboat "Susquehanna," which connected the two lines from Perryville¹ to Havre de Grace. On July 31st the first train ran through from Baltimore to Wilmington, being ferried over the Susquehanna, and passengers secured connection with Philadelphia by means of the steamer "Telegraph," Capt. Whildin, from Wilmington. After this time trains ran through daily between Baltimore and Wilmington. Mr. Canby resigned the presidency of the Wilmington and Susquehanna Company, August 21, 1837, and James Price was elected to succeed him. The company's right of way from Wilmington to the Pennsylvania line, which had been merely located, was ceded to the Philadelphia, Wilmington and Baltimore Railroad, November 11, 1837, in order to expedite the building of a through line to Philadelphia, and in February, 1838, the company merged with the Philadelphia, Wilmington and Baltimore Company.

The Philadelphia and Delaware County Railroad was chartered by the Legislature of Pennsylvania, April 2, 1831, with a capital of two hundred thousand dollars, and authority to construct a railroad from Philadelphia to the Delaware line, and subscription-books were opened at Philadelphia and Chester in May. The company was organized in 1835, and on January 18, 1836, Matthew Newkirk was elected president and a reorganization made under the title of the Philadelphia, Wilmington and Baltimore Railroad Company, with an increase of capital stock to four hundred thousand dollars. The road was completed to the Delaware line without delay, and the Wilmington and Susquehanna Company ceding its rights between the Delaware line and Wilmington, the tracks were extended and the road opened from Gray's Ferry to Wilmington, January 15, 1838, perfecting an all-rail route from the Schuylkill to Baltimore, with ferriage at the Susquehanna. An entrance into Philadelphia was effected also in this year by a viaduct over the Schuylkill—and the entire cost of the road to date was four million one hundred and eighty-five thousand five hundred and eleven dollars.

Notwithstanding there was one continuous line of road at this time, it was owned by three different companies—another disadvantageous situation—and, accordingly, a combination was effected, February 5, 1838, under the title of the Philadelphia, Wilmington and Baltimore Railroad Company, with Matthew Newkirk as president. Mr. Newkirk resigned in 1842 and was succeeded on June 1st by M. Brooke Buckley, who was succeeded January 12, 1846, by

Edward C. Dale. Mr. Dale resigned in July, 1848, and William H. Swift was elected January 9, 1849, to succeed him. Mr. Swift resigned February 28, 1851, and was succeeded by Samuel M. Felton, who was succeeded April 15, 1856, by Isaac Hinckley.

Prior to 1849 the Philadelphia, Wilmington and Baltimore Road terminated in Baltimore at Canton, and the passenger cars were taken by horse-power to the Baltimore and Ohio depot on Pratt Street—but the President Street Station,² corner President Street and Canton Avenue, was then built and used regularly thereafter; at the same time the depot at Broad and Prime Streets, in Philadelphia, was built.³

Efforts to procure necessary legislation to bridge the Susquehanna River proved abortive until May 12, 1853, when the desired authority was given on condition that the company would build a branch road from Perryville to Port Deposit, a distance of four and a half miles. The piers of the bridge were commenced in 1861, and were ready for the superstructure in October, 1865, and the erection of the spans began. On July 25, 1866, all but one of the spans were in position, when they were blown into the Susquehanna during the prevalence of a tornado. The piers, however, were not injured, and in less than three months they were replaced, and an engine passed over the bridge, which was formally opened November 26, 1866, several excursions being run there from Philadelphia, Baltimore and other cities.⁴

The Philadelphia, Wilmington and Baltimore Railroad was used as a connecting link between the South and North by the Baltimore and Ohio and Pennsylvania Companies for many years. In 1880 in consequence of differences between these two companies a syndicate was formed for the purpose of purchasing the Philadelphia, Wilmington and Baltimore road. The majority of the stock was held in Boston, and on February 22, 1881, it was announced that the syndicate had purchased a controlling interest in the road for the Baltimore and Ohio Company at seventy dollars per share. This statement appeared to have been premature, as the Pennsylvania Railroad Company subsequently obtained a controlling interest in the Philadelphia, Wilmington and Baltimore Company at eighty dollars per share, and with it the virtual control of the Delaware system, the Philadelphia and Baltimore Central, the Chester Creek road (leased), and the West Chester and Philadelphia and other

² The President Street Station was abandoned as a passenger depot when the Pennsylvania Railroad acquired the Philadelphia, Wilmington and Baltimore road, in 1881, and the passenger traffic was transferred to the Union Station in Baltimore. President Street Station has since been used for freight purposes.

³ In 1852 a railroad was built across the Susquehanna from Perryville to Havre de Grace, on the ice, and was used without accident from January 16th to February 24th, when the track was removed a few days before the ice disappeared from the river.

⁴ The Philadelphia, Wilmington and Baltimore Railroad Company acquired its Delaware connection originally by the purchase of the New Castle and Frenchtown Railroad in 1840, and the New Castle and Wilmington railroad in 1876. The West Chester and Philadelphia and the Philadelphia and Baltimore Central Railroad, practically owned by the Philadelphia, Wilmington and Baltimore Company, were consolidated in 1881.

¹ It was the intention of the Baltimore and Port Deposit Company to make Port Deposit the eastern terminus of their road; but, in April, 1836, a conference between them and the Delaware and Maryland Company determined in favor of a ferry at Havre de Grace, and Port Deposit, as a proposed terminal point, was thereupon abandoned. This resulted in persistent opposition on the part of the Port Deposit interests, and legislative action was necessary before the road could be built.

railroads. The Pennsylvania road took formal possession July 1, 1881.

The roads leased or owned by the Philadelphia, Wilmington and Baltimore Company are as follows:

The Delaware Railroad runs from Delaware Junction, to Delmar, at the Maryland line, eighty-four miles and includes the New Castle and Frenchtown and the New Castle and Wilmington, the former being purchased by the Philadelphia, Wilmington and Baltimore Railroad in 1840 and the latter in 1876, and the two completing the link between the original Delaware Railroad and the Philadelphia, Wilmington and Baltimore Railroad. The Delaware road is operated under a lease which terminates May 4, 1897. The Queen Anne and Kent, the Delaware and Chesapeake, the Philadelphia and Baltimore Central and the Cambridge and Seaford Railroads are operated by the company as their agents. In 1881 the Philadelphia, Wilmington and Baltimore Company purchased the Newark and Delaware City road and is operating it as a branch. In 1883 the Dorchester and Delaware road was reorganized as the Cambridge and Seaford road, and is operated in connection with the Delaware road the branches proper of which are Townsend Branch, from Townsend to Massey's Cross-Roads, Maryland; Smyrna, Branch from Clayton to Smyrna; Dorchester Branch, from Seaford to the State line. The Queen Anne and Kent road extends from Massey's Cross-Roads to Centreville, Maryland, twenty-six miles; was chartered March 8, 1856, and opened in August, 1869. The Delaware and Chesapeake road, fifty-five miles from Clayton to Oxford, Maryland, was chartered May 10, 1854, as the Maryland and Delaware Company and completed in 1857. The Cambridge and Seaford road, twenty-seven miles, from Oak Grove to Cambridge, Maryland, was chartered as the Dorchester and Delaware Company, February 6, 1866, and bought by the Philadelphia, Wilmington and Baltimore Company and reorganized under its present name June 1, 1883. At the same time the Junction and Breakwater, the Breakwater and Frankford and the Worcester Railroads were consolidated as the Delaware, Maryland and Virginia Railroad, ninety-eight miles from Harrington to Rehoboth and from Georgetown to Franklin City, Virginia, and are operated as a part of the Delaware system. The Philadelphia and Baltimore Central Railroad consolidated with the West Chester and Philadelphia road in October, 1881. It comprises, also, the West Chester Branch from Wawa Junction to West Chester and the Chester Creek road, from Lenni to Lamokin. The Port Deposit Branch of the Philadelphia, Wilmington and Baltimore road, from Port Deposit to Perryville, was leased May 1, 1882, to the Columbus and Port Deposit Railroad Company. Of the roads named as a portion of the Delaware system, the New Castle and Frenchtown line has a most interesting history as the pioneer railroad of the State of Delaware.

Jonas Preston Fairlamb, who made the first surveys

for the Philadelphia, Wilmington and Baltimore Railroad Company, was born at Marcus Hook, Pa., May 22, 1785. He married Sarah, daughter of Samuel and Ann Richards Price, the marriage being performed at the Protestant Episcopal Church at Marcus Hook, January 28, 1808. They had twelve children, only two of whom now survive.

Mr. Fairlamb was one of the most widely known civil engineers of his day, and was regarded as a man of unusual capacity in his profession. He superintended the first establishment of the water-works in Wilmington, and though many predicted his efforts would result in a failure, nothing daunted, he, confident in his own conclusions, went energetically to work and completed the enterprise with perfect success. He was a man of most positive convictions, and could not be moved from his purpose by arguments whose force and correctness did not commend themselves to his discernment.

Nicholas Fairlamb, his father, married Hannah Preston, a sister of Dr. Preston, who built the Preston Retreat at Philadelphia. The issue of this marriage was three daughters and one son, the subject of this sketch.

The following record of Mr. Fairlamb's ancestry will be found interesting:

Nicholas Fairlamb brought to Philadelphia a certificate from a Monthly Meeting held at Stockton, in Durham, England, dated Sixth Month 13, 1700. It is recorded at the Race Street Meeting, Philadelphia. It appears that he first settled in Chester township, but eventually removed to Middletown, now in Delaware County, where he purchased two hundred acres of land from Thomas and Philip Taylor, by deed dated May 30, 1704. He was a member of Assembly from Chester County in 1705, '11, '12 and '13, and sheriff of the county in 1718.

Nicholas Fairlamb and Catherine Crosby, daughter of Richard and Eleanor Crosby, declared their intention of marriage Seventh Month, 1793, before the Chester Monthly Meeting, and were probably married in the Ninth Month following. Their children were four daughters and two sons, one of the latter dying in infancy. John, the youngest child, married Susanna Engle, Eleventh Month 13, 1742, at Middletown Meeting. He died February 6, 1766, aged fifty years.

John Fairlamb was a justice of the peace and of the courts in 1761, and again in 1764; sheriff of the county from 1762 to '65; also a member of Assembly from 1760 to 1765. His children were—Nicholas, born Eighth Month 28, 1743; he married Hannah Preston.

Catherine, born Eighth Month 18, 1747; she married Peter Hill.

Ann, born Second Month 1, 1752, married J. Pedrick first, and J. Pennil for second husband.

Susanna, born Second Month 23, 1754, never married.

Eleanor, born Ninth Month 16, 1756, never married.

James Smith

Jonas Preston Furlamb

John, born Third Month 25, 1759, married Susanna Ashbridge.

Mary, born Sixth Month 16, 1762, never married.

Frederick, born Second Month 10, 1765, married Mary Pennil.

Samuel, born Tenth Month 22, 1794, married Hannah Richardson.

Thus it will be seen the genealogy of Mr. Fairlamb's family is clearly traced from the day his progenitor, Nicholas Fairlamb, left England in the year 1700 for America.

Jones Preston Fairlamb died at Wilmington, at the residence of his son-in-law, Samuel Harlan, on West Street, August 16, 1860, at a ripe old age, in full communion of St. Andrew's Episcopal Church, lamented by his friends and respected by the entire community.

THE PHILADELPHIA, WILMINGTON AND BALTIMORE RAILROAD SHOPS—*Car-Shops*.—The first car-shops of this company were built in Wilmington, on Walnut Street, between Water and Front Streets, in the year 1842. The shop had room to build two coaches and the paint-shop had room to paint the same number. The records do not show the force of men employed in the shop at that time, but have a record showing the number of men employed in the car-shop in January, 1845, the showing being as follows: January, 1845, men employed in car-shop, 19; men employed in paint-shop, 2—total, 21.

At this time the amount of the car-shop pay-roll, for men as above mentioned, was \$565.83.

In 1865 the car-shop was removed to the present site and has been enlarged from time to time as the business of the road required. The following will show the increase from 1845 to 1887: 1887, capacity of car-shop, 41 cars; 1845, capacity of car-shop, 4 cars—increase of 37 cars. January, 1887, number of employees, 361; January, 1845, number of employees, 21—increase, 340. January, 1887, amount of pay-roll, \$17,039.29; January, 1845, amount of pay-roll, \$565.83—increase, \$16,473.46.

***Machine-Shops*.**—The first engine-house was built in Wilmington in 1836 by the Philadelphia and Wilmington Railroad Company, and was located east of and fronting on Walnut Street, and at a point about fifty feet south of the present south-bound track. This house was frame and contained three tracks, each with a twelve-foot turn-table in front of the house.

In 1837 the road was consolidated with others, forming the present Philadelphia, Wilmington and Baltimore Railroad Company, and this was the first engine-house and shop belonging to this company that was located in Wilmington. Nothing but light repairs were done in this house, the heavier work being done principally by the Betts, Harlan and Hollingsworth Company. There were no alterations or additions of any importance made to the original engine-house until 1853.

In 1847 a new round-house, with a capacity for eighteen engines, was commenced and located with the centre about one hundred feet north of the centre of the present turn-table. This house was finished and occupied in 1851 and the old engine-house was after that used as a machine-shop. About this time machinery was first introduced into the shops.

In 1853 the shops at Gray's Ferry were abandoned, and the tools moved to Wilmington and the shop somewhat enlarged.

In 1854 the machine-shop was rebuilt of brick and made much larger than formerly. A new blacksmith-shop was also built of brick. This is the building now used as a hammer-shop, and is the original building.

In March, 1859, the machine-shop building was totally destroyed by fire, together with the frame building adjoining it on the north, which was used as a planing-mill for car-work. The machine-shop was at once rebuilt, and is the structure with arched roof now used as the machine-shop proper.

In 1862 the round-house was taken down and replaced with a new one with stalls for twenty-three engines, two of which were used as a boiler-shop. This house stood on the site of the present one, and the greater portion of the old walls are still in use. A building was also erected adjoining the northwest corner, which was used as an oil, pattern and store-house. The walls of this structure are a part of the building on the same site now used as offices, hospital, etc.

In 1871 the round-house, together with all the adjacent buildings excepting the machine and blacksmith-shops, were destroyed by fire, but were at once rebuilt in substantially the same shape as before. At this time the space between the back of the round-house and French Street belonged to George W. Bush & Co., and on it was a dock extending from the creek nearly up to the railroad, and the land now occupied by George W. Bush & Co. belonged to the railroad company. An exchange of these two properties was effected and the dock filled up, and the company's land extended from the Pusey & Jones Company's line on the east to French Street on the west, and from the railroad on the north to the creek on the south, which are the limits as at present.

In 1865 a number of additions were made to the shops, consisting of the two-story brick building adjoining the machine-shop, and which is now used as a machine-shop, drawing-room and pattern-shop, the engine and boiler-room, now used as such, and the structure now used as the paint and copper-shops and store-room. Also a frame building was erected back of the round-house and at right angles with the Christiana Creek, which was used as machine and boiler-shops until 1881, when it was torn down and replaced with the present blacksmith-shop.

In 1873 the building now used as offices and store-room was erected. The frame annex to store-room was

added in 1879 and has been enlarged several times since.

In 1875 the number of engines having constantly increased, and the amount of repairs being correspondingly greater, the engine-house and machine-shops had become inadequate to the needs of the road, and it was decided to build a new engine-house and use a portion of the old one for shop purposes. This programme was carried out, and the present round-house at the foot of Pine Street erected. A portion of the old one was converted into a boiler-shop at once, and in 1880 the erecting-shop was moved into it. After these changes had been made, however, it was found that the facilities were still inadequate for the work, and it was decided to build a new, large blacksmith and boiler-shop, and the present frame structure now used for the purposes named was erected in 1880. The use of the engine-house for storing engines was entirely abandoned and the house given up to shop purposes. The erecting-shop was changed to its present location and other minor changes made. Since that time several changes in the location of the shop in the smaller buildings, and some additions to these structures, have been made, until, at the present time, all of the ground is occupied and the limit of the capacity of the present shops has been reached. No more can be done on the present location, as the ground is all fully occupied and the buildings are much too small.

In 1842 there were in use nine engines on that portion of the road between Philadelphia and Perryville. These were repaired at Gray's Ferry and in private shops in Wilmington.

The first authentic account of men employed at repairs of locomotives at Wilmington shops that we can get was in 1843. The force then consisted of seven men, as follows: master mechanic at \$75 per month; two machinists at \$60 per month each; two blacksmiths at \$10 per week each, two helpers at \$4.75 per week each,—total per month, \$327.75. There was also a gang of men sawing and loading wood on engines, consisting of one foreman at \$33.33 per month, three laborers at \$30 per month each,—total per month, \$123.33. These men also loaded freight, the freight-house being located on Walnut Street, directly north of the south-bound track. The engines in use at this time were very small and light, and all of the machine tools were of the most primitive and crude design. At that time the company had no shops at Wilmington, and all repairs in that city were made in the old engine-house, or, as said before, in private shops.

In 1887 the shops at Wilmington were doing repairs for one hundred and eighty engines, and in August there were employed three hundred and eighty-four men, with a pay-roll of \$18,065.18.

The first new engines built at the company's shops in Wilmington were turned out in 1867. Since that time thirty-five new engines have been built complete, the number turned out this year being five.

The following is the list of master mechanics who have had charge of the Wilmington Shops since the organization of the road:

James Elliott, 1836 to 1844; Leonard Phlegler, 1844 to 1848; John Boddy, 1848 to 1849; Joseph Teas, 1849 to 1856; William Stearns, 1856 to 1861; Oliver Ayers, 1861 to 1864; George W. Perry, 1864 to 1872; S. A. Hodgman, 1872 to 1883; H. D. Gordon, 1883 to —.

NEW CASTLE AND FRENCHTOWN RAILROAD.—The establishment of a regular line of steamboats between Baltimore and Elkton resulted in the application of the New Castle and Frenchtown Turnpike Company (then operating the turnpike in conjunction with the New Castle Turnpike Company from New Castle to Frenchtown) to the General Assembly of Maryland, for authority to build a railroad along or near the turnpike. This authority was granted in a bill which was passed in December, 1827, and in February, 1829, a similar bill passed the General Assembly of Delaware, increasing the capital stock of the company to \$200,000, and changing its name to the New Castle and Frenchtown Turnpike Railroad Company. The use of the bed of the turnpike, excepting thirty feet, which was to be kept in good repair, was permitted, with the additional option of purchasing the right of way near the line of the pike. The latter was determined upon; the railroad was built nearly parallel with the turnpike, and terminated at a commodious wharf and landing on Elk River below Frenchtown. A supplemental act of Assembly was passed January 16, 1830, authorizing the union of the New Castle Turnpike and Railroad Company and the New Castle and Frenchtown Turnpike and Railroad Company, and reducing the width of turnpike from thirty to twenty feet.¹ The railroad was seventeen miles long and was completed in 1831.² As it was one of the pioneer railroads in this country, the following description of its primitive construction from Johnson's "History of Cecil County" will prove of interest:

"The rails were placed about the same distance apart as in modern roads, but instead of being laid upon wooden sleepers, were placed upon blocks of stone ten or twelve inches square. These stones had holes drilled in them in which a wooden plug was inserted and upon them were laid wooden rails, about six inches square and ten or twelve feet long, which were fastened to the stones by means of a piece of flat iron shaped like the letter L, which was fastened to the stone by means of a spike driven into the wooden plug through a hole in one extremity of the iron and another spike driven into a wooden rail through another hole at the other extremity. The stones were placed about three feet apart and each stone had two of these iron attachments, one on each side of the rail. Bars of flat, iron-like tire, were spiked on top of the wooden rails, and thus completed the structure."

The road was equipped with cars having a capacity for ten or twelve passengers, and drawn by one horse. Glasgow and the Bear were relay stations. In the

¹ In December, 1830, the stock of the railroad company was selling at sixty per cent. above original subscription.

² Niles' Register of March 3, 1832, says: "The Frenchtown and New Castle Railroad was opened for transportation of persons and goods on Thursday last. It may and will be very rapidly traveled by steam-power because of its extraordinary straightness. One of the coaches built to run upon it by the famous Inlay, of Baltimore, may well be called a traveling 'palace,' because of its conveniences, and it will comfortably seat fifty persons inside and out. The length of the road is sixteen and one-half miles; present time of traveling it, one hour and thirty-five minutes, including a change of horses."

latter part of 1832 a steam locomotive¹ was imported from England, put together at New Castle and introduced on the road. It was named "Delaware." Several days were required for the initial trip of the "Delaware" and the necessary supply of water was drawn from the wells and springs along the line of road.

Other locomotives² were added to the rolling stock of the road, and a trip from river to bay was made in about an hour.

The novelty of using steam as a motive-power was utilized as an advertising agent, and proved exceedingly successful. From the *Delaware Gazette* of March 26, 1833, the following characteristic announcement is taken :

"Passengers for Baltimore and those wishing a pleasant and novel excursion are respectfully informed that a train of cars drawn by Locomotive Engines leave New Castle immediately on the arrival of the Steam Boat from Philadelphia, about half past eight A.M., for Frenchtown, where passengers take steam boat and are landed at an early hour in the afternoon at Baltimore. Return train arrive at New Castle about 1 o'clock, P.M. Fare from New Castle to Baltimore, \$3.25.

"JOHN D. BIRD, Agent."

For twenty years the road continued in active operation, in conjunction with a line of steamboats from Frenchtown to Baltimore. In 1874 the company was merged with the Philadelphia, Wilmington and Baltimore Railroad Company, and became a part of the Delaware road.

DELAWARE RAILROAD.—This company was chartered by the General Assembly, June 20, 1836, with authority to build a railroad "from any point on or near the Wilmington and Susquehanna Railroad, or the New Castle and Frenchtown Railroad, to the southern line of the State, in a direction towards Cape Charles, with full power to construct lateral branches to Lewes, Seaford, or any other points or places within the limits of the State of Delaware," and John M. Clayton, Wm. D. Waples and Richard Mansfield were named as commissioners under the act. A survey was made, but efforts to realize a subscription necessary to start the enterprise failed, and the charter was forfeited to the State. In 1849 the charter was revived in a modified shape, but nothing was accomplished until 1852, when the State subscribed conditionally to 5000 shares to be paid out of revenue derived by the State from the New Castle and Frenchtown Railroad Company, as it accrued. The company was accordingly organized in May, 1852, with Samuel M. Harrington as president; William Tharp, treasurer; Thomas B. Bradford, Alex. Johnson, William Cannon, Charles Wright, Henry Ridgely, William O. Redden, Benaiah Tharp, directors.

¹ In introducing steam as a motive-power, it was found necessary to reconstruct the road with iron rails "hollow and shaped like two capital L's with the horizontal part of one of them reversed and the upper parts of the two letters joined, **JL**. These rails were fastened to the wooden sleepers by spikes driven through holes in the rail."

² "Col. Long's locomotive, on the New Castle and Frenchtown Railroad, is highly spoken of. It lately performed 27 miles in 2 hours, the whole weight moved being ten tons—performing three of these miles in 7½ minutes. The engine and its appurtenances weigh 3 tons. This was the first trial, and is equal, or superior, to any of the English performances."—*Niles' Register*, 1832.

In 1853 the Philadelphia, Wilmington and Baltimore Railroad Company became interested in the proposed road and a reorganization was effected, and Messrs. Samuel M. Felton, Edward C. Dale, Edward W. Gilpin and Charles I. Du Pont, representing the Philadelphia, Wilmington and Baltimore Company, and Andrew C. Gray, representing the New Castle and Wilmington road, were added to the directory. Work was begun on the road at once, the northern terminus being a junction with the New Castle and Frenchtown Railroad. In 1855 the State made a loan of one hundred and seventy thousand dollars to the company. On May 4, 1855, the road was leased to the Philadelphia, Wilmington and Baltimore Company for twenty-one years, with the option of a renewal, afterwards consummated for a corresponding period, at six per cent. on the capital stock and bonds and one-half of the net profits over that amount. The construction was considerably delayed by excessive demands in New Castle County for damages for right of way, but the road was completed to Middletown in August, 1855, and by a junction with the New Castle and Frenchtown Railroad, was opened between that place and Wilmington. In January, 1856, the road was opened to Dover, and in December to Seaford. The latter took place on the 11th of the month and was attended by imposing ceremonies. Special excursion trains were received with artillery salutes, and Governor Causey presided at a public meeting, at which Chief Justice S. M. Harrington, president of the company, ex-Mayor Morton McMichael, of Philadelphia, Governor Causey, and Messrs. Charles I. Du Pont, Jno. W. Houston, Willard Saulsbury, W. G. Whiteley and others made congratulatory addresses. The treasurer's report in January, 1857, showed that \$1,146,310 had been expended, towards which subscriptions had been made as follows: By the State, \$170,000; by corporations, \$62,500; by citizens of Wilmington and New Castle County, \$27,725; by citizens of Kent County, \$44,750; by citizens of Sussex County, \$35,875; by contractors, \$10,000; by citizens of other States, \$6525. In November, 1856, the Philadelphia, Wilmington and Baltimore Company took formal possession of the new road under its lease. In 1857, Col. Henry B. Fiddeman, Hon. J. W. Houston, and ex-Governor Causey, under authority of the General Assembly, secured subscriptions and began the construction of the Milford Branch Railroad, from Harrington to Milford, which was completed in 1859. The same year the Delaware road was extended to Delmar to connect with the Eastern Shore Railroad Company, which had the line from Delmar to Salisbury under contract. The extension cost \$164,073, and became a part of the lease to the Philadelphia, Wilmington and Baltimore Company. The Eastern Shore road was opened to Salisbury in 1860, and extended to Crisfield in 1866. A telegraph line was built in 1861 along the Delaware road to Harrington and Seaford. The Junction and

Breakwater road was begun through legislative aid in 1865, and completed in 1869. In 1865, President Harrington died, and Samuel M. Felton was elected in his place. In 1866 a branch was built from Clayton to Smyrna, and from Townsend to the State line, the latter being afterwards extended to Massey's Cross-Roads, where it joined the Queen Anne and Kent road. The Delaware road, also in 1867, built a branch from Seaford to the State line to meet the Dorchester and Delaware road, and loaned the latter sufficient capital to complete its line thence to Cambridge. In 1869 the Maryland and Delaware Railroad, from Clayton to Easton, was completed, and all of the foregoing became a part of the Delaware system, which is now an independent through line between Philadelphia and the South. In August, 1873, by a break in the Chesapeake and Delaware Canal and a severe rain-storm, the bridge over the canal and a number of culverts were destroyed, entailing a serious loss, and suspending traffic for a week. The peach-growing interest along the Peninsula, was a source of considerable revenue to the company, and in 1876, this class of freight aggregated 4,536,751 baskets, or 9072 car-loads. This year the State loan of \$170,000 was paid. The total cost of the Delaware road and its branches was \$2,206,719.89.

Among those prominent in the history of the Delaware Railroad Company is Manlove Hayes, who was born May 5, 1817, a few miles east of Dover, in Kent County. From a biographical sketch of his brother, the late Hon. Alex. L. Hayes, of Lancaster, Pennsylvania, and from family records, we find that his first American progenitor was Richard Hayes, who, at the age of twenty-one, emigrated from England in 1698, and first landed on James River, Virginia. From thence he came up the Delaware as far as the Schuylkill. He remained there but a short time; then he descended the river, landing at Cedar Creek, where, possibly meeting with old acquaintances, he made a settlement in Sussex County, Delaware, near the locality of Milford, where he married Dolly Manlove. He died on his farm in the year 1773, aged ninety-six. His second son, Nathaniel, married Elizabeth Carlisle, and died in 1786, aged eighty-three. Richard Hayes, the eldest son of Nathaniel, married Priscilla Polk, daughter of Charles, and granddaughter of Ephraim Polk, of Somerset County, Maryland. Richard Hayes was appointed one of the magistrates of Sussex County under the State Constitution of 1792, and died in 1797, aged fifty-three, leaving issue, three sons—Manlove, Alexander and Charles—and three daughters. Manlove, the father of the subject of this biography, was the only son of Richard, who left issue. He removed to Kent County about the beginning, if not the first year, of the present century and purchased a property near Dover. Soon after this he moved to Dover and engaged in the mercantile business, and in buying grain, which, with other products, was transported in his vessels to the city

of Philadelphia. He was thrice married. The children by his first wife, Zipporah (Laws) Hayes, were Alexander L., before mentioned, and Mary, who married the late Col. Wm. K. Lockwood. His second wife, Mary (Laws) Hayes, lived but little over two years after her marriage, and at her death left one daughter Eliza M., who married, first, Thomas M. Stout, M.D. and, after his death, the late Hon. Wm. F. Boone, of Philadelphia. In 1814 Mr. Hayes married Ann (Bell) Emerson, widow of Jonathan Emerson, of Kent County, who was of a highly respectable Quaker family, the owner by inheritance of a large estate in Little Creek Neck, in which she held dower. She was the mother, by her former husband, of the late Dr. Governor Emerson, physician and author, of Philadelphia, and of four daughters,—Mary, Sarah, Susan Blundell (who married Charles Marim, Esq.) and Ann Eliza. The children of Manlove and Ann Hayes were Harriet Sykes, Manlove and Charles Polk. Previous to this time he acquired considerable real estate, including a farm of near three hundred acres, called Troy, on the Bay road, south of Dover, which he gave to his daughter Eliza as a marriage portion, having established his sister Mary, after her marriage with William K. Lockwood, in his house in Dover. Soon after his last marriage he purchased and removed to "York Seat," the farm where he resided until his death, in 1849, in his eighty-first year. It was always a subject of regret to Mr. Hayes that in the troublous times of his youth, during the War of the Revolution, his education was limited to the advantages only of a home instruction and such schools as were in the neighborhood. He entertained most liberal views in regard to education, and hailed with delight the introduction in this State of the free-school system. He spared no expense in bestowing on his children the advantages of academic and collegiate instruction, and these generous views were in harmony with those entertained by his intelligent and estimable wife, who was a "Friend" widely known for her Christian charities. She survived him many years, and died in 1862, at the advanced age of eighty-six years. This worthy, aged and benignant couple were honored and beloved by children and step-children on either side, who shared alike their affection and the love and attachment to each other that such affection inspires. Mr. Hayes was considered one of the most advanced agriculturists of the State, enterprising and progressive in all his business relations, and as a citizen was highly esteemed in the county where he lived and which he represented, at different periods, in the House of Representatives and in the State Senate.

Manlove Hayes, the subject of this sketch, spent his youth at "York Seat," his father's farm, a few miles east of Dover; received his education at Newark Academy, then in the height of its prosperity, under the management of Rev. A. K. Russell; continued in the academy and college from 1832 till 1836, except one year which he spent at school in York, Pa. In

M. Hay

[illegible][illegible][illegible]

Mr. J. H. HAYES, President of the
University of Michigan, said that
the University of Michigan, in
1890, had a total of 1,000 students.

Mr. Hayes.

the winter of 1836, he left college, to accept a situation as assistant in the engineering corps of John C. Trautwine, and was engaged in locating and building the East Tennessee Railroad, extending from Knoxville to the Georgia State line. He was in charge of a division of this railroad until 1840, when, on account of financial troubles then existing throughout the country, further operations were suspended and the work, for the time, discontinued. This survey was made through the Cherokee country at the time when the United States government was removing the Indians from their old homes in Tennessee and Georgia to the reservation now known as Indian Territory. Mr. Hayes returned to Delaware in 1840 and engaged in farming. At the death of his father he succeeded to the ownership of the paternal homestead, "York Seat," and resided upon it until 1864. In addition to his own, he accepted the trust of other estates and continued many years in charge of two large landed possessions, embracing, among others, several of the most productive farms in the county. In 1862 he purchased a tract of land adjoining Dover, on which the year following he erected a fine dwelling, in which he now resides. In this year his lawn, designed and laid out by Saunders, the landscape gardener, was planted with a well-selected variety of evergreens, maple and other deciduous trees, which have since made a fine growth, and now furnish a delightful shade and ornament the attractive surroundings of his comfortable home.

Mr. Hayes, being a man of excellent judgment honor and integrity, has been chosen to fill various positions of responsibility and trust. In 1846, and for several years afterwards, he was associated with Chancellor Harrington and Caleb H. Sipple, Esq., of Dover, in establishing and running a steamboat line from Dona Landing to Philadelphia, and superintended the erection of the wharf, hotel and other buildings at this landing, seven miles from Dover. In 1843 he was elected clerk of the State Senate, and in 1852 was elected a member of the last Whig Legislature of his State. During the session of 1853 he had charge of the bills, as shown by the journal of House of Representatives, to obtain legislation empowering the Delaware Railroad Company to extend its lines north from Dover to connect with the New Castle and Frenchtown Railroad and the Philadelphia, Wilmington and Baltimore Railroad. Since 1864 Mr. Hayes has been a director in the Delaware Railroad Company, and from 1870 to the present time also its secretary and treasurer. In the meantime, in addition to his official duties as representative of the railroad company, he has purchased the real estate necessary for the enlargement of the depot grounds and other railroad purposes. In 1880 he wrote, and had published by the company's patronage, a complete history of the Delaware Railroad and its affairs to that date.

Mr. Hayes was one of the chief organizers of the First National Bank of Dover, and was a member of

its original board of directors, and has continued to be a member of the board until the present time. He was one of the founders of the Dover Library in 1885, was elected at its organization and continued to be president of that institution.

Mr. Hayes has always shown deep interest in agriculture, and has been instrumental in improving the business of farming and fruit-growing in his native State. He was one of the first persons in Kent County to engage extensively in growing fruits for market, planting his first peach orchard in 1849. Has been the correspondent from Kent County to the Agricultural Department of Washington from its first organization, and is corresponding secretary of the State Board of Agriculture.

In politics Mr. Hayes was a Whig of the Clay and Webster school.

In the exciting period of the Presidential election of 1860 his conservative views led him to hope that patriotism and statesmanship, combined with great business interests at stake, would devise means to subdue the turbulent, and effect a compromise which would avert the horrors of civil war. He took an active part in the campaign in favor of Bell and Everett, the Union party's candidates, was a delegate to the Baltimore National Convention, and the night after the nomination was one of the committee who waited on Mr. Bell at his hotel in Philadelphia. The result of that political campaign is part of the history of the times.

When violent hands were raised against the national government, and treason was supported by men holding the highest political offices under the Constitution they had but recently sworn to preserve, in his view it was apparent that but two parties could exist in this country—one to support the government under the incoming administration, the other to withhold its aid and assume the attitude of apologists for those rebelling against it. His Union principles were too well settled to admit of a doubt as to his choice—he gave his support to the Republican administration, and has since adhered strictly to the principles of his party.

Though in no sense a professional politician, he has sometimes taken an active part, was chairman of the County Executive Committee in 1872, when, by strenuous efforts, the State was carried for Grant and Wilson, and Lofland was elected to Congress, the only complete success of the Republican party, as to the election of electors and Congressmen, since the war. He was also made president of the State Convention in 1876, and appointed the State Executive Committee of that year.

As for political preferment to State offices, no Republican of Kent County has aspired to that, and for some years they have stood aloof from all active participation in the politics of the State.

Mr. Hayes, was married, February 17, 1851, to Rebecca Carmalt, daughter of James and Sarah (Parry) Howell, of Philadelphia. The children born of this

marriage are Mary, wife of John P. Saulsbury, the present Secretary of State of Delaware; Edith, wife of D. Mifflin Wilson, of Dover; and Anna Bell Hayes. His only brother now living, C. P. Hayes, of Philadelphia, is landscape gardener for the Philadelphia, Wilmington and Baltimore Railroad Company.

THE WILMINGTON AND NEW CASTLE RAILROAD, afterwards a part of the Delaware road, was chartered February 19, 1839, and opened in 1854, when it was operated in connection with the New Castle and Frenchtown Railroad.

THE JUNCTION AND BREAKWATER RAILROAD, a branch of the Delaware road, extended from Harrington about sixteen miles south to Dover, eastward to Milford, then south to Georgetown and thence eastward again to Lewes, near the Breakwater. It was built mainly by the State, and in 1883 became, by consolidation, a part of the Delaware, Maryland and Virginia Railroad.

BALTIMORE AND PHILADELPHIA RAILROAD.—This line was built by the Baltimore and Ohio Railroad Company to secure an independent road to New York. In 1880 the use of the Junction Railroad in Philadelphia, by the Baltimore and Ohio Company, was denied, excepting under an arrangement which was not acceptable to that company. In consequence, President Garrett, of the Baltimore and Ohio Company, formed a syndicate for the purchase of a controlling interest in the Philadelphia, Wilmington and Baltimore Railroad. In February, 1881, the announcement was made to the effect that the syndicate, through Director N. P. Thayer, of Boston, had secured a controlling interest in the Philadelphia, Wilmington and Baltimore Railroad, at seventy-five dollars per share. The Pennsylvania Railroad Company, however, immediately offered a higher figure for the stock and obtained a majority of it at eighty dollars per share, and took possession of the Philadelphia, Wilmington and Baltimore road, the purchase having cost \$16,675,692. In order not to be at the mercy of its powerful rival, the Baltimore and Ohio Company then decided to build a line of its own to Philadelphia, where an outside connection could be obtained to New York, *via* the Philadelphia and Reading and Bound Brook roads. The Baltimore and Philadelphia Railroad Company was accordingly organized for this purpose, January 31, 1883, and acquired the Delaware Western road, organized February 22, 1877, as the successor of the Wilmington and Western Railroad Company. The latter had previously built and was operating its line from Wilmington to Landenburg, Pa. The Baltimore and Philadelphia road was completed and opened through September 19, 1886, and has since been operated as the Philadelphia Division of the Baltimore and Ohio Company. Poor's Manual for 1887 gives the entire earnings of the Philadelphia Division for the year, \$114,767.30; expenses, \$95,521.02; net earnings, \$15,246.28.

THE BALTIMORE AND DELAWARE BAY RAIL-

ROAD extends from Pierson's Cove, Del., to Chestertown, Md., with a branch of ten miles, from Wootton Junction to Nicholson, Md. This line is a consolidation of the Smyrna and Delaware Bay Railroad, chartered and built in 1873, and the Kent County Railroad, chartered 1867, and completed in 1870. The Kent County road was sold under foreclosure, and reorganized in the interest of the Southern Railroad of New Jersey. The office of the company is in New York.

WILMINGTON AND NORTHERN RAILROAD.—This line, which extends from Wilmington to Birdsboro', Pa., with a branch to Reading, Pa., was the result of a consolidation of the Berks and Chester and the Delaware and Pennsylvania Line Railroad Companies, in 1866. It was opened from Wilmington to Birdsboro' in 1870, and to Reading in 1874. In 1876, after absorbing the Baltimore, Philadelphia and New York Company, the road was reorganized under the title of the Wilmington and Northern.

POMEROY AND NEWARK RAILROAD.—From Pomeroy, Pa., it extends twenty-seven miles to Newark, Del., on the Philadelphia, Wilmington and Baltimore Railroad. It was originally the Pennsylvania and Delaware Company; was sold in 1879, and known as the Pomeroy and State Line Railroad; reorganized under present name in 1881 and operated by Pennsylvania Railroad Company under lease.

NEW YORK, PHILADELPHIA AND NORFOLK RAILROAD.—This line extends from Delmar, Del., to Cape Charles, Va., ninety-five miles, with a branch of seventeen miles from King's Creek, Md., to Crisfield, Md. The roads embraced in the New York, Philadelphia and Norfolk line are the Worcester and Somerset Railroad, from Newtown Junction to Pocomoke City, the Peninsula Railroad, from Pocomoke City to Cherrystone, Va., and the Eastern Shore Railroad, from Delmar to Chesterfield. The two former consolidated as the Peninsula Railroad Company of Virginia, and, in 1884, purchased the Eastern Shore road and operated since under the present title. The road was extended from Pocomoke City, *via* Accomac and Belle Haven, to Cape Charles, in 1884, and the present operations include thirty-six miles of ferry between Cape Charles, Old Point Comfort, Portsmouth and Norfolk, for which purpose the company own two steamboats, two tugs and several car-floats.

DELAWARE BREAKWATER.—The construction of a breakwater near the entrance of Delaware Bay was discussed by the merchants of Delaware and Philadelphia for many years. The movements and discussions on this subject were of sufficient importance to influence Congress, by act of May 7, 1822, to appropriate \$22,700 for erecting in the bay of Delaware two piers of sufficient dimensions to be a harbor or shelter for vessels from the ice, if the Secretary of the Treasury, after survey being made, should deem the measure to be expedient. The survey was made and a plan reported sufficiently extensive to employ the small appropriation which had been made. The en-

gineers, however, suggested that a work upon a larger scale might with advantage be constructed of durable materials. Upon this, an application was made to the President for a more extensive and accurate survey. A board was formed, under direction of the War and Navy Departments, consisting of Gen. S. Bernard and Lieut.-Col. J. G. Totten, of the army, and Commodore William Bainbridge, of the navy. They made a thorough survey, and filed in the War Department, plans for the construction of an artificial harbor in the Bay of Delaware upon an extensive and durable plan. The President recommended the matter in an annual message, but nothing was done until February, 1828, when the Committee of Congress reported in favor of the construction of the breakwater, and Congress, on May 23d, of the same year, made an appropriation of \$250,000, to carry it into effect.

In 1828 Commodore Rodgers, General Bernard, and Mr. Strickland, of Philadelphia, were appointed commissioners to locate the Delaware breakwater, with instructions to provide a harbor for the largest class of war vessels. Up to 1833 the annual expenditures on the breakwater aggregated \$200,000 and the commissioners estimated that \$2,216,870 would be required to complete it. In 1832, 130,000 tons of stone were contracted for the work during the year 1833. At the close of operations in 1832, 1883 feet in length of stone foundation had been laid, of which 1419 feet had been reared three and a-half feet above low water level. The ice-breaker was 575 feet in length and the plan contemplated an anchorage for upwards of sixty vessels. In 1833 upwards of twenty top-sail vessels found a safe anchorage in the breakwater during a disastrous gale. In 1834 the amount of stone "deposited towards the completion of the breakwater" was 122,995 tons, and an aggregate of \$1,160,000 had been expended. The light-house, known as the breakwater light, was built in 1848.

On May 16th and 17th, 1832, the waters of "the Delaware reached an uncommon height and much damage was sustained." It was estimated that \$200,000 worth of lumber alone was lost by the flood.

CHAPTER XXI.

AGRICULTURE IN DELAWARE.

AGRICULTURAL SOCIETIES OF NEW CASTLE COUNTY.—The first Agricultural Society in New Castle county of which there is any record was organized in 1804, with Henry Latimer, president, and William Young, secretary. The other directors were Dr. James Tilton, William Hemphill, Peter Bauduy, Jacob Broom, Joseph Tatnall and Dr. George Monro. Great improvements in farming were made about this time; gypsum or plaster of paris was coming into use as a fertilizer, and was shipped to Wilmington from the coast of Maine. Clover and timothy took the

place of the native grasses, and wheat was cultivated in place of rye and barley. The land about the town which had been unproductive was converted into fields of grain, and the hillsides were covered with sheep and cattle. The raising of sheep in particular, under the stimulus given by the proprietors of the woolen mills, was an important industry as early as 1810. It is not known what part this society took in the general reform movement, the records not being now obtainable.

The second New Castle County Agricultural Society, was incorporated January 31, 1818, by an act of the Legislature. John Way, Victor Du Pont, Thomas Lea, Andrew Gray, Frederick H. Holtzbecker, Levi Boulden, John Crow, John Merritt, George Clarke, David Stewart and Abraham Staats were authorized to obtain subscriptions; the members to hold an election on the first Monday in May following for president, three vice-presidents, three secretaries, one recording secretary, a treasurer and twelve directors. They were authorized to hold land and erect buildings. This is the first society that was chartered, but in the course of a few years it died out. It had, however, accomplished some benefit for scientific and systematic agriculture while it existed, and accordingly when the project of establishing another association of the same nature was mooted, it found ready acceptance with the principal farmers and land owners.

Consequently the third and present Agricultural Society of New Castle county was organized, at a meeting held in Wilmington, May 7, 1836. Philip Reybold, of Red Lion Hundred, was made president; Edward Tatnall, of Brandywine; James O. Bird, of Christiana, and Jacob Faris, of Pencader, vice-presidents, and John Andrew, secretary. Dr. J. W. Thomson explained the object of the contemplated association, the agricultural improvement of which New Castle county was capable by scientific development and the growing importance of silk culture.

Dr. J. W. Thomson, Philip Reybold, Alex. S. Read, Jacob Caulk, Samuel Wollaston, John C. Clark, John Andrews, Samuel Canby, David W. Gemmill and Philip Reybold, Jr., were appointed a committee of organization and immediately reported a constitution and by-laws, which were adopted. The following were the first officers chosen: President, Philip Reybold; Vice-Presidents, Edward Tatnall, of Brandywine; Samuel Wollaston, of Wilmington; Jas. J. Brindley, of Christiana; Justa Justis and Andrew Gray, of Mill-Creek; Thomas Stockton, of New Castle; Jacob Faris, of Pencader; W. J. Hurlock, of Red Lion; Richard C. Mansfield, of St. George's; Wm. Rothwell, of Appoquinimink; Directors, Wm. Gibbons, M. D., Merrit Canby, John Richardson, Wm. Chandler, George Platt, John Higgins, John Clark, Thomas Robinson, Wm. Herdman, Henry Du Pont, Henry S. Cazier, Daniel Corbit, Samuel Hilles, Alex. S. Read, James McCulloch, Samuel Canby, John C. Clark; S. Naudain, Corresponding Secretary, Jas. W. Thomson, M. D., Treasurer, Jas. Canby, Recording Secretary,

Henry Gibbons, Counselor; Jas. A. Bayard, W. P. Brobeon, J. A. Bayard, Wm. R. Sellars, R. H. Bayard, Wm. Chandler and James Webb were appointed a committee to obtain a charter, and on June 13th, 1836, the act incorporating the society was passed by the Legislature.

This society was organized by active and aggressive men who took measures to gain information and disseminate it throughout the county. From the minutes of May 21st, 1836, something of the spirit which actuated the promoters of it may be gathered. On motion of Anthony Higgins, a committee was appointed to petition the Legislature to order a geological survey of the State. On motion of Dr. Thomson, the chairmen of the Agricultural, Horticultural and Silk Committees were authorized to appoint an agent, if they deemed it expedient, to visit different parts of the county to procure members of the society. They offered premiums and held a fair October 19, 1836, in the city of Wilmington, and at the same time the society held a meeting at the City Hall. The subject of silk culture received considerable attention, and Dr. Wm. Gibbons made an address on the subject. A committee was appointed to memorialize the Legislature to grant a premium on cocoons. According to a published report, preserved by Manlove Hayes, Wm. Darlington, M. D., delivered an address before the eighth annual meeting of the society and institute, held at Wilmington, September 13 and 14, 1843; and on October 9, 1843, the following officers were elected: President, Dr. James W. Thomson; Vice Presidents, Capt. Geo. Maxwell, Wm. Rothwell, Edward T. Bellak, Charles I. Du Pont, Eli Wilson, John R. Latimer, James Canby, C. P. Holcomb, Jesse Gregg, Courtland J. Fell; Corresponding Secretary, C. P. Holcomb; Recording Secretary, James Webb; Treasurer, Edward Tatnall; Counselor, Wm. G. Whitely; Directors, John C. Clark, Henry Du Pont, Samuel Canby, William Robinson, Joseph Lloyd, John S. Caldwell, M. B. Ocheltree, James S. Brindley, John W. Andrews, Philip Reybold, Bryan Jackson, William Tatnall, Joseph Carr, William S. Boulden, Richard Mansfield, John Richardson, Henry Latimer, John Higgins; Directors of the Horticultural Department, John R. Latimer, William Canby, Ziba Ferris.

The society divided the exhibits into three departments—Agricultural, Horticultural and the Mechanics' Institute. One of the features of the fair of 1843 was seventy-five yokes of oxen formed in line on French Street. The horticultural exhibit was good and the floral department especially fine, the ladies having taken a great interest. The fair was concluded by a dinner, presided over by C. P. Holcomb. The society at that time was in a prosperous condition, as is evident from the printed report of a speech by Dr. Thomson, who said in substance:

"This, gentlemen, is the anniversary of our society, and I am pleased to see instead of there being anything like an abatement of interest, there is really this

day a much larger number in its support, than on any former occasion. It is fair to suppose that this is the result of a conviction that the fair is doing good. My own opinion is, that it has been the means of adding directly and in its consequences, more than half a million dollars to the wealth of the county."

He stated further that the husbandry, the stock, the buildings and appearance of farms had improved and that the price of land had advanced.

When Dr. Thomson retired from the presidency of the society in 1845, after having served for eight years, he was tendered a vote of thanks for his devoted exertions in its behalf. That same year Jas. Canby was elected president and was succeeded in 1846 by John C. Clark, who held the office until 1856 excepting one year, when John Jones was president. Bryan Jackson held the office in 1856 and 1857; Geo. G. Lobdell in 1858; Samuel Canby from 1859 to 1864. The recording secretaries were Bryan Jackson, from 1846 to 1856; George Jackson, 1857-60; Robert McCabe, 1862-64; treasurers, James Canby, 1847-48, Samuel Canby, 1849-56, succeeded by Dr. J. A. Brown, J. H. Adams, Geo. D. Armstrong and Edwin Bringham in the order named. In 1863 the offices of secretary and treasurer were combined under Robert McCabe. The corresponding secretaries were C. P. Holcomb until 1853, when Geo. Pepper Norris held the office until he resigned in 1858, and was succeeded by E. Bringham, A. H. Grimshaw and Dr. Henry F. Askew.

In 1855 a committee was appointed to correspond with the farmers of Kent and Sussex Counties with a view to forming a State society. The committee consisted of J. W. Thomson, Edward Tatnall, Jas. Canby, P. Reybold, C. P. Holcomb, N. Wolfe and John Jones.

The society rented some seven acres of the Cleland estate, situated on the corner of Vestry Lane and the old Kings Road, for seven years, from March 25, 1855, for \$125 per year. The board of directors sub-let these grounds to Charles Murphy for \$150 per year, reserving their use for ten days each year. G. P. Norris reported a new constitution which after some alterations was adopted, and a committee was appointed to apply to the Legislature to recharter the society, as the original charter of 1836 was only for twenty years. In 1856 Bryan Jackson was elected president and J. C. Clark, T. J. Adams, Giles Lambson, Jr., B. Reybold, M. Ocheltree, John Jones, D. W. Gemmel, John Wales, C. J. Du Pont, A. M. Higgins, Samuel Canby, vice presidents; G. P. Norris, recording secretary; Geo. R. Townsend, treasurer; Chas. W. Howland, counselor; directors, J. A. Brown, J. S. Elliott, J. H. Adams, Richard Jackson, Henry L. Tatnall, Zadock Townsend, J. W. Andrews, W. T. Clark, E. T. Bellak, W. C. Barton, G. B. Tybout. On motion of G. R. Townsend, the following resolutions were unanimously adopted:

"WHEREAS, grain is the great staple of our farmers, and in selling the principle article of his production the farmer is interested to have accuracy, certainty and regular commercial usages observed; and as the practice of averaging the quantity by weighing a bag or two in a load is uncommercial, irregular and without the consent of both parties illegal. . .

"Resolved, that the society recommend selling by weight as ascertained by the scales or the patent beam."

The Brandywine Mills it was said weighed all the grain, and they knew of no other State in the Union where a bag or two was weighed and the rest estimated. At a meeting held April 14, 1833, Dr. Thomson announced the death of C. P. Holcomb, who was for a number of years corresponding secretary. The society passed resolutions in honor of his memory and a copy was forwarded to the United States Agricultural Society, of which he was vice-president. At a special meeting in 1859, the minutes state that the hearts of the few who always attend the society's meetings were made glad by seeing a large number of members present. They then decided to hold the fair three instead of two days as heretofore. The president reported that a quarter mile race track could be built for three hundred dollars, and Messrs. Griffin, Springer, Allmond and Lobdell were appointed to raise the amount. It was also decided to offer fifty dollars for the fastest horse, mare or gelding; twenty-five dollars for the second and ten dollars for the third providing they could raise money to build the race course. This inauguration of horse trotting met with considerable opposition and the premiums offered were considered very liberal. April 14, 1860, the committee on procuring grounds reported in favor of the Brobson property on Kennet Pike, which could be had for seventeen thousand dollars, and at the next meeting it was decided to make the purchase. About this time the by-laws were changed, and a silver pitcher was presented to Bryan Jackson for the interest which he had always manifested in the society.

In 1865, Samuel Canby resigned the presidency and several directors also retired. Zadock R. Townsend was appointed president, and the vacancies in the board of directors were filled. It was resolved to purchase that portion of the original agricultural farm included between Woodland Avenue and Green Hill Avenue, on the line of Seventh Street, and the northern boundary of the exhibition ground. About 1869 the financial affairs of the company became embarrassed, and in 1870, at a meeting at which Messrs. Townsend, Rogers, Hurst, Thacher and Stidham were present, it was ordered that the secretary address a circular to each stockholder stating that the directors were not able to obtain the minimum price of thirty thousand dollars that had been fixed on the property and asking for their direct vote authorizing its sale at the discretion of those having the matter in charge. In 1871 George R. Lobdell was elected president, and Dr. A. H. Grimshaw secretary and treasurer. The committee finally sold the grounds to the Wilmington Rifle Club for twenty-five thousand dollars. The last meeting of the society that is reported in the minutes took place January 11, 1872, after which it expired.

In 1848, the horticultural division of the New Castle County Society became a separate society

with Samuel Hilles president and William Canby secretary. This organization held meetings in the City Hall, Odd Fellows Hall and finally in the Wilmington Institute Building until about 1865. Great interest was taken in this society for a time. Its last officers were William Canby president, Edward Tatnall, secretary and S. D. Smith treasurer. The proceeds of the last five or six exhibitions amounting to some two hundred dollars annually were given to the Home for friendless and destitute children.

Anthony M. Higgins has kindly supplied his recollections of agricultural reform in New Castle County, beginning after the completion of the Chesapeake and Delaware Canal in 1828. "The canal," he says, "ran through the middle of a district embracing the Hundreds of New Castle, Red Lion and St. George's, unexcelled for its natural good qualities for all kinds of grain and grapes. Up to the period above mentioned it may truly be said that seven-tenths of the arable land, with the exception of the meadow farms bordering the Delaware River, was so reduced by improvident cultivation as to scarcely average twenty bushels of corn or ten bushels of wheat per acre.

The canal was contracted for up to what was called the Deep Cut, and constructed by five energetic farmers, owning their own farms along its borders, viz., Philip Reybold, John C. Clark, William J. Hurlock, James T. Bird, Henry Cazier.

After its completion these gentlemen directed their energies not only to the improvement of their home farms, but had the sagacity to buy up any farms that came into the market, thus laying the foundation of large fortunes.

Until this time the valuable qualities of lime for the improvement of the soil were little known. An enterprising and scientific gentleman, Doctor James N. Sutton, of St. George's, in a series of articles in a Wilmington newspaper, called the attention of farmers to its great value for this purpose.

In the meantime he located a lime-kiln on the south side of the canal at St. George's, the limestone being transported by vessels from the Schuylkill, and for several years sold the lime at twenty-five cents per bushel. About this time there was an interesting illustration of the efficacy of lime as an instrument in the successful growth of crops. There was, however, much skepticism among the farmers as to its value.

The lock at St. George's was being dug out, and ran through what was then called black dirt, which was in reality a bed of shell marl, containing from eighteen to twenty-five per cent. of the carbonate of lime.

William J. Hurlock, one of the contractors whose land bordered on the canal, ordered his teams to return home at night loaded with black dirt, which he dumped in a thirty-acre field along the canal. With this dressing, together with a dressing of sta-

ble manure, the field was ploughed up and put in corn,—carefully tilled by one of the best practical farmers of those times.

During the summer a passenger line of barges drawn by horses, called the "People's Line" in opposition to the New Castle and Frenchtown Railroad, ran through the canal. As a people's man, President Jackson chose this route on his northern tour. His attention was directed to the size of the corn, as he passed by the field, of Hon. Louis McLane, of Delaware, then his Secretary of the Treasury, who was standing by his side. After looking at it for some time, the President exclaimed: "By the eternal, it is equal to anything I have seen in Tennessee." The product was carefully measured and showed a yield of ninety-two bushels per acre.

"From this date agricultural reformation spread rapidly, aided greatly by one of the first successful agricultural societies ever organized in the United States, the New Castle County Society, already spoken of. This association grew to large proportions and attracted visitors from adjacent counties and surrounding States to listen to addresses from distinguished men, such as ex-Senator Jonathan Roberts, of Pennsylvania; John S. Skinner, founder and the able editor of the *Baltimore American Farmer*, which is continued into these later times by Samuel Sands and his son. There was then no necessity to attract the people by horse trotting, for compensation ploughing matches were quite as entertaining and much more useful. The general display of stock at that period has never been equaled since.

"Prominent among the exhibitors of stock may be named the Du Pont herd of Durhams, the celebrated Cotswold sheep, imported by Major Reybold, and subsequently the Devon herd of pure Devons introduced by the late lamented Chauncy P. Holcomb. The agricultural interest sustained a great loss at his death, in view of the intelligent energy he displayed in everything calculated to promote its interest.

"In 1833 I commenced farming and immediately subscribed for a live agricultural paper—for a few years it was the *Albany Cultivator* but subsequently found the *American Farmer*, of Baltimore, best suited of all leading journals to our soil and climate and for more than forty years this was a most welcome and instructive monthly visitor. In 1852 I requested some of my neighbors to furnish the figures in detail of the last year's produce of their farms for publication in the *Farmer*. The request was promptly complied with and the statements as given were published in the *Farmer*.

Bryan Jackson's Property; Two Hundred and Twenty Acres; Assessed Value, \$18,810.

| Seven hands, including board..... | 1,400 00 |
| | \$13,010 30 |

KENT COUNTY AGRICULTURAL SOCIETY was first organized in 1835. At the third annual meeting held at Dover, in 1838, a committee of two members from each hundred was appointed to receive the names of those desirous of becoming members. The following committees were then appointed: Duck Creek, Robert W. Reynolds, Robert Palmatary; Little Creek, Elias Naudain and Chas. Harper; Dover, John M. Clayton, William T. Milburne; Murderkill, Samuel Hawley, Joel Clement; Milford, Peter F. Causey, Justus Lowery; Mispillion, David Taylor, Robert Sordon. A committee to arrange for the next exhibi-

bition was appointed, consisting of M. W. Bates, G. W. Cummins, Jacob Raymond, Justus Lowery and T. L. Temple. S. M. Harrington, T. L. Temple and H. Todd were appointed to provide accommodations for stock. The third annual exhibition was held at Dover October 4, 1838, Cornelius P. Comegys, president. The following were among the premiums awarded. To John and Ebenezer Cloak for best stallion over three years old; Thos. Wallace, best colt; Thos. L. Temple, best brood mare; Jonathan Jenkins, best heifer; Thos. L. Temple, best calf; Henry Cowgill, best ram; David Onins and Jacob Kerbin exhibited two large yoke of oxen. Geo. W. Cummins grew 39 acres of wheat, averaging 25 bushels to the acre. Mrs. Ann Hayes was given a premium for best specimen of sewing silk of her own manufacture. Mrs. Chas. Kimmey, Sr., exhibited a beautiful specimen of white silk in large hanks, her own raising from the silkworm. There were a few other small premiums awarded, but the whole proceedings show that the society was in an imperfect condition, though supported by the most influential men in the county. The officers for 1839 were: President, C. P. Comegys; Vice-Presidents, Benjamin Coombe, John Cowgill, David Onins, Samuel Thawley, William Masten and Peter F. Causey; Corresponding Secretary, Henry M. Ridgely; Recording Secretary, Jos. P. Comegys; Treasurer, Caleb H. Sipple.

This society continued for a number of years, and was eventually discontinued, only to be revived through the medium of the State Agricultural Society.

STATE AGRICULTURAL SOCIETY.—The first State Society was organized pursuant to a call published in the newspapers, which induced a large number of farmers to assemble at Dover on January 17, 1849. The convention was organized by appointing John Clark president; Giles Lambson, Jacob M. Hill and Chas. Wright, vice-presidents; and Manlove Hayes, Jr., secretary. A State Agricultural Society was organized, a constitution and by-laws were adopted, and the following officers elected. President, Peter F. Causey; Vice-Presidents, John D. Dilworth, Dr. H. Ridgely, T. P. McColley; Treasurer, Dr. William Burton; Corresponding Secretaries, A. M. Higgins, W. Du Hamel, P. N. Rust; Recording Secretary, Manlove Hayes, Jr.; Managers, Daniel Corbit, David W. Gemmill, J. P. Bellville, Jacob M. Hill, John Frazer, James G. Waples, Jonathan R. Torbert, Lemuel Draper, Chas. Wright.

The following roll of members contains the names of many of the most prominent agriculturists then resident in the State: William Tharp, John C. Clark, Giles Lamson, J. M. Hill, Charles Wright, T. P. McColley, D. W. Gemmill, M. Du Hamel, Thomas Bird, Chauncey P. Holcomb, Peter F. Causey, William Cowgill, William Burton, M.D., Samuel R. Paynter, John Jones, J. K. Mitchell, M.D., H. B. Fiddeman, Samuel Draper, Anthony Higgins, William J. Hurlock, Isaac Jump, M.D., Henry Ridgely, M.D., James G. Waples, William H. Ross, N. D. Wilds, W. V.

Coulter, William R. Cahoon, James V. Moore, George W. Karsner, John Whitby, Charles Marim, Samuel Higgins, John Appleton, Bryan Jackson, Eugene Ridgely, Edward W. Wilson, George Z. Tybout, Thomas Wilson, John Frazier, Charles Wharton, William D. Clark, Walker Mitflin, Francis B. Harper, Alexander Johnson, Benjamin Gibbs, George Davis, William Thompson, Saxe Gotha Laws, Michael Lowber, Daniel Corbit, Isaac Dolby, John D. Dilworth, Caleb H. Sipple, George W. Cummings, T. L. Davis, James Postles, Henry Cowgill, Daniel Cummings, Caleb S. Layton, James S. Buckmaster, George R. Fisher, John Martin, M.D., S. M. Harrington, G. W. Green, J. P. Bellville, Levi G. Clark, Peter R. Rust, George Maxwell, Abraham Postles, Jonathan R. Torbert, M. Hayes, Jr., Henry Todd, John R. Sudler, M.D., Jacob Raymond.

This first State organization did not hold any fairs, but it promoted discussion on agricultural subjects, and out of it grew the revived Kent County Agricultural Society, in 1854, which, in 1856, had these officers: President, Thomas B. Coursey; Vice-Presidents, Alexander Johnson, Jonathan Brown; Recording Secretary, George W. S. Nicholson; Corresponding Secretary, Manlove Hayes; Board of Managers, T. B. Lockwood, Jacob Williams, William Du Hamel, James Woodall, Jacob H. Hill, James G. Waples, Henry Cowgill, McElroy Melvain, Charles Warren, Alexander Johnson, William S. Haman, Clement L. Sharp; Treasurer, Dr. Henry Ridgely.

In 1857, Dr. G. Emerson delivered before the society an instructive address, descriptive of the soil of Delaware, and the fertilizers needed. In 1859, Dr. Henry Ridgely delivered the annual address, and in 1860 Manlove Hayes was the orator. In 1872, Dr. G. Emerson delivered an address on drainage before the *Farmers' Club of Kent County*. These addresses have been bound and preserved by Manlove Hayes.

The present State organization grew out of the latest organized Kent County Agricultural Society, which was formed in January, 1878. The charter members were Thomas H. Denney, John Moore, J. Frank Denney, Edmond Bailey, Daniel P. Barnard, Jr., Joseph McDaniel, John D. Burton, William P. Seward, Richard Harrington and John B. Wharton. Thomas H. Denney was the first president, and William H. Wallace was the first secretary. In 1879 the charter was changed, and it became "The State Agricultural Society of Delaware," into which all the county associations were virtually, though not formally, merged. When the society was reorganized, Thomas H. Denney was re-elected president, a position which he held until just before he died, in 1884. Then J. Frank Denney was chosen president, and still holds the office.

Richard Harrington was elected secretary in 1879; Daniel P. Barnard, Jr., was elected in 1880 and has been continued ever since. The State Board is selected by the stockholders and consists of twenty-seven members, the president and secretary being

ex-officio members. This board meets and selects from its number nine members, who are called the board of managers, who, with the president and secretary, have full control of the fair. The company consists of one hundred and eighty-seven stockholders at present, having \$8450 worth of stock. They own thirty-five acres of land adjoining the town of Dover, which, together with the improvements thereon, is estimated to be worth \$19,498.78. The improvements consist of two grand stands and exhibition buildings, capable of holding two thousand two hundred, and five hundred and seventy-five persons respectively. These structures are well built and permanent. The premium list is steadily growing and the interest taken by the people is commendable, the ladies being especially distinguished in this respect. The premiums are widely distributed, requiring three hundred and nineteen checks to pay those of 1857, which aggregated \$2000 in the agricultural department alone, and nearly \$3000 in the speed department. The society belongs to the National Trotting Association and charges ten per cent. entrance fee for trotting horses, which helps make up premiums. The trains stop at the grounds. The officers and directors, who are also members of the State Board, were as follows for 1887: President, J. Frank Denney; Secretary, D. P. Barnard, Jr.; Treasurer, J. D. Burton; Corresponding Secretary, Manlove Hayes; Directors, Albert Curry, Geo. G. Lobdell, Ebe Tunnell, John B. Wharton, Alex. Johnson, Robert Denney, Geo. M. Fisher, Manlove Hayes, Wm. R. Allaband, Wm. G. Postles, Wm. P. Seward, Harbeson Hickman, A. S. Small, Wilson L. Cannon, Jabez Jenkins, Wilbur H. Burnite, S. D. Roe, Geo. W. Collins, H. A. Richardson, Thos. W. Wilson, Edmond Bailey, E. L. Martin, Joseph McDaniel, John Heitshu, J. D. Burton, J. Colby Smith, E. H. Bancroft.

THE PENINSULA AGRICULTURAL AND POMOLOGICAL ASSOCIATION was organized in Middletown, in 1874. Chas. Beaston was the first president; William R. Cochran, vice-president; J. Thomas Budd, secretary; Edward Reynolds, treasurer; and L. P. McDowell, Edward Lockwood and R. A. Cochran, Jr., were directors. The association rented grounds, erected buildings and fences and made a half-mile track, at an expense of some six thousand dollars.

The first fair was held in September, 1874, under favorable auspices. The people were addressed by Hon. Thomas F. Bayard and Charles Beaston, the president of the society; the attendance was large and so continued for a number of years. In 1877 William R. Cochran became president and continued to hold that office until 1883. James B. Clarkson succeeded Mr. Budd as secretary and was successively followed by James B. Nandain and W. Scott Way. In 1883 the buildings were sold and the proceeds were distributed among the share-holders of the association.

The following statistics gathered from the census reports will show the extent and value of the agricultural products of the State of Delaware since 1850:

| | 1850. | 1860. |
|--|--------------|--------------|
| Number of acres of improved land..... | 637,065 | 637,065 |
| Number of acres of unimproved land..... | 367,230 | 367,230 |
| Value..... | \$31,420,337 | \$31,420,337 |
| Value of farming implements..... | \$817,843 | \$817,843 |
| Number of bushels of wheat..... | 482,511 | 912,941 |
| Number of bushels of corn..... | | 3,492,337 |
| Number of bushels of rye..... | 8,095 | 27,209 |
| Number of bushels of oats..... | 604,518 | 1,046,210 |
| Number of bushels of barley..... | 56 | 3,616 |
| Number of bushels of buckwheat..... | 8,615 | 16,355 |
| Number of bushels of peas and beans..... | 4,120 | 7,438 |
| Number of bushels of potatoes..... | 240,542 | 377,631 |
| Number of bushels of sweet potatoes..... | | 142,213 |
| Number of pounds of butter..... | 1,055,309 | 1,430,742 |
| Number of pounds of cheese..... | 3,187 | 6,576 |
| Number of pounds of wool..... | 57,708 | 51,291 |
| Number of pounds of flax..... | 11,174 | 9,112 |
| Number of pounds of flax-seed..... | | 2,128 |
| Number of pounds of hops..... | | 414 |
| Number of pounds of tobacco..... | | 9,689 |
| Number of gallons of sorghum..... | | 1,163 |

In 1860 the number of horses was 16,562; asses, 2294; working oxen, 9530; milch cows, 22,595; other cattle, 25,596; sheep, 18,857; swine, 47,848. Total value of live stock \$3,144,706.

In 1870 the number of acres of land in farms was 698,115; woodland, 295,162; other unimproved land, 59,045; having a cash value as follows: Farms, \$46,712,870; farming implements, \$1,201,644; amount of wages paid during the year, including board, \$1,696,571; estimated value of all farm productions, including betterments and additions to stock, \$8,171,667; value of orchard products, \$1,226,893; value of market garden products, \$198,075.

The amount of improved land has been increasing slowly every decade. The amount of improved land in 1860 was 637,065 acres; in 1870, 698,115; in 1880, 746,958. The amount of unimproved land reported in 1860 was 367,230 acres; in 1870, 354,207 acres; in 1880, 343,287.

The census of 1880 showed that the value of the farms at that time was \$36,789,672; of farming implements, \$1,504,567; live stock, \$3,420,080. The estimated value of farm products sold, consumed and on hand for 1879 was \$6,320,345. The number of horses in 1880 was 21,933; mules and asses, 3031; working oxen, 5818; milch cows, 27,284; other cattle, 20,450; sheep, 21,967; swine, 48,186. Number of pounds of wool, 97,946. Number of gallons of milk sold and sent to butter and cheese factories, 1,132,434; number of pounds of butter, 1,876,275; cheese, 71,812.

The amount in bushels in 1879 of barley was 528; buckwheat, 5857; Indian corn, 3,894,264; oats, 378,508; rye, 5953; wheat, 1,175,272; flax-seed, 29,555 pounds, sorghum, 17,012 gallons; hay, 49,632 tons; clover-seed, 396 bushels.

Number of barn-yard fowls, 268,692; other kinds of poultry, 96,207; number of dozens of eggs, 1,427,087; honey, 76,234 pounds; beeswax, 2151 pounds; tobacco, 1278 pounds; potatoes, 283,864 bushels; sweet potatoes, 195,937 bushels. Value of the orchard products of all kinds, sold and consumed, \$846,692. Value of market garden products, \$166,575. Amount of wood cut, 103,890 cords; value, \$274,885.

IMPROVEMENT OF MARSHES.—As the peninsula of which Delaware forms a part consists of flat land lying low between the two great bays which embrace it on either side, the land in the vicinity of the coast and near the outlet of the principal streams is in many places low marsh, and what is here called "cripple." These marsh lands are unfit for cultivation until they are drained, or in some cases not until embankments are built along the river-sides to prevent the overflowing freshets and tides.

The early Swedish and Dutch settlers, the latter in particular, came from a country that had been wrested from the ocean in part. Taking their departure from the dykes of Amsterdam, it was in keeping with the habits of generations of their ancestors that they should begin the same kind of work here, even if a continent of uncultivated lands lay within view and could be had for the occupancy. Hence it appears that the people began to build dykes and drain the marshes by sluices soon after settlement. The first narrative obtained is of the dyke at New Castle, an account of which will be found in the history of that town, and in 1712 an act was passed for keeping it in repair. The lands along the banks were in possession of John Donaldson, Robert French and Richard Halliwell.

An act was passed in 1727 which permitted the draining of the marsh on the southwest side of the town, known as Cow Marsh, and a little later one for keeping in repair the dyke and sluices belonging to the marshes at Swanwyck, which lay to the north of and adjoining New Castle.

Dams, sluices and banks were built along the streams and the bay for many years as private property, and no legal action was taken that is of record until from 1779, when private acts were granted. A list is here given with dates and localities:

- February 1, 1779.—Supplement to act, entitled an act to enable owners of meadow, marsh and cripple on the south side of Christina Creek, called Fearn Brook Marsh, and of the marsh above on the same side, called Bozman's Marsh in New Castle County, to keep banks, dams and sluices in repair.
- April 15, 1780.—An act to drain the marsh, cripple and low land on Morris's branch in Appoquinimink Hundred, New Castle County.
- June 18, 1781.—Supplement to act of March 24, 1770, to keep banks, dams and sluices in repair on a marsh on both sides of Mill Creek below the town of New Castle.
- June 8, 1787.—Act to enable owners of marsh situated on Little St. George's Creek in St. George's Hundred, to build dams, etc., and keep them in repair.
- February 5, 1785.—Act to permit owners of marsh on Cedar Creek, Red Lion Hundred, to erect a new bank in part and keep the old bank, dams, etc., in repair.
- February 2, 1788.—Act for sloping St. George's Creek and embanking and draining about three thousand acres of land lying in Red Lion and St. George's Hundred, and keeping banks, etc., in repair.
- January 27, 1790.—Act to drain the meadows on both sides of Silver Run, fronting the Delaware, St. George's Hundred.
- February 2, 1793.—Act for improvement of marsh, commonly called Mill Creek Marshes, situated on St. Jones River in Kent County.
- June 17, 1793.—Act to enable the owners of Cow Marsh, in the forest of Murderkill Hundred, to cut a ditch through the same.
- January, 1794.—To enable owners to cut a ditch through Marshy Hope Marsh, in Mispillion Hundred.
- January 18, 1800.—Act to enable owners of Culbreth's Marsh, in the forest of Murderkill Hundred, Kent County, to cut a ditch through the same.
- January 16, 1800.—To cut a ditch through Tappan's Marsh, in now West Dover Hundred, Kent County.
- January 23, 1800.—Supplement to an act to enable owners of Mill Creek Marshes, adjoining Lewden's Island, to keep banks, dams and sluices in repair.

- drained, to embank and drain the same and keep outside banks in good repair.
- 1801.—To cut ditch in the swamps and low lands in the head-waters of Chester River, in the forest of Duck Creek Hundred (now Kenton).
- January 27, 1801.—To cut a ditch through Fishing Creek Marsh, now Milford Hundred.
- January 27, 1802.—To cut a ditch through "Wild Cat Swamp," in Murderkill Hundred.
- January 18, 1803.—Act authorizing John Bowers to cut a ditch across the public road running across Mulberry Point or Bower's Beach, in Murderkill Hundred, and to build bridge over it.
- January 26, 1804.—To cut a ditch through a marsh on Meredith's Branch, in the forest of Murderkill Hundred.
- January 26, 1804.—To drain and bank Swan Creek Marsh and cripple in Mispillion Hundred (now Milford).
- January 11, 1805.—To incorporate owners of Brandywine Marsh into a company, for the purpose of draining the same.
- January 24, 1805.—To incorporate into a company the owners of Pot-hooks Marsh, Sussex County.
- January 25, 1805.—To enable owners of marsh on Hudson's Branch, in the forest of Murderkill Hundred, to cut a ditch through the marsh.
- January 31, 1806.—To drain marshes on Ingram's Branch in the Forest of Mispillion Hundred.
- January 23, 1808.—To incorporate the "Dragon Canal Company" for the purpose of draining the marshes on Dragon Run, in Red Lion Hundred.
- January, 1808.—To enable the owners of the marsh known as "Dick's Savanna," at the head of Indian Run in Dagsborough Hundred, Sussex County, to drain the same.
- January 25, 1810.—To enable the owner of the branch and low ground extending from the bridge in North Street, in Dover, near the Methodist Church, through the westerly and southerly parts of the town land of Dover to St. Jones Creek to cut and support a ditch through branch and low grounds.
- 1810.—To enable owners of Meadow Marsh and cripple on both sides of the northwest branch of Duck Creek, below Eagle's Nest Landing, to embank and drain the same.
- January 21, 1811.—To drain the marshes at the head-waters of Black-water Mill Pond, in Baltimore Hundred, Sussex County.
- January 21, 1811.—Act to drain the swamps in the upper part of Cedar Creek Hundred, Sussex County.
- January 29, 1811.—To drain the low ground adjoining Yellow Branch, in Dagsborough Hundred, Sussex County.
- February 3, 1811.—To drain the marshes on Heron Gut, in Little Creek Hundred, Kent County.
- Same date.—To enable the embanking or wharfing the waters of a certain ditch leading from Little Bay, in Baltimore Hundred, to the head-waters of Synepuxent Bay.
- February 12, 1812.—To enable the owners of the second cove of marsh to the northward of the wild marsh on the north side of Appoquinimink Creek, St. George's Hundred to erect, maintain, and keep in repair all banks, dams, sluices, etc.

PATRONS OF HUSBANDRY.—Mr. Hamilton, then a resident of California, organized the first grange of the Patrons of Husbandry in Delaware, in West Brandywine Hundred in 1874. A number of granges were established that year and a State Grange also formed with John J. Rosa, a farmer in Milford, the first Master. He held the office eight years, when he was succeeded by Henry Thompson, who held the position four years, and was succeeded by A. N. Brown, of Wyoming, the present incumbent. The full list of officers for 1886-88 is A. N. Brown, *Master*; John Heyd, *Overseer*; John C. Higgins, *Lecturer*; A. K. Cole, *Steward*; William Peach, *Assistant Steward*; J. W. Day, *Chaplain*; T. H. Riggan, *Treasurer*; Geo. A. Jones, *Secretary*; H. D. Learned, *Gate-Keeper*; Alice R. Brown, *Ceres*; Anna Heyd, *Pomona*; Phebe J. Riggan, *Flora*; Hannah Day, *Stewardess*. The following subordinate granges were in active operation in the State at last report, Union, No. 1, 27 members; Hockessin, No. 4, 30 members; Newark, No. 5, 71 members; Milford, No. 6, 16 members; Sunnyside, No. 7, 27 members; Excelsior, No. 8, 13 members; Port Penn, No. 9, 51 members; Centre, No. 11, 27 members; Harmony, No.

12, 33 members; West Brandywine, No. 13, 90 members; Fruitland, No. 16, 119 members; Capital, No. 18, 33 members; Harrington, No. 19, 35 members; Smyrna, No. 21, 32 members; Trophy, No. 22, 86 members; Little Creek, No. 23, 13 members; Laurel, No. 24, 13 members; Midland, No. 27, 21 members; Rehoboth, No. 28, 22 members; Evergreen, No. 29, 26 members; Fairmount, No. 31, 13 members; Oak Grove, No. 32, 13 members; Friendship, No. 33, 30 members; Washington, No. 34, 18 members; Champion, No. 35, 26 members; Cereal, No. 36, 20 members, making a total membership of 911 persons.

The Patrons of Husbandry are an order composed of tillers of the soil, whose object is to promote the moral, intellectual and material interests of its members. To this end considerable attention is given to the public-school system of the Commonwealth and means of increasing popular education are discussed. The order appoints committees on legislation and does not hesitate to advocate Constitutional reform, a change in the tax laws, and temperance principles. On this point, in his report, Henry Thompson says: "No organization takes more interest in the education and care of the young; no organization takes more pride in our rural homes, in which we were reared, and from which come our greatest and most honored men. Then why not place our order in line with our other work, and with other organizations, with which we have a deep sympathy, and stand boldly for God, Home and Native Land?" The grange by concerted action seeks to have freight rates on perishable fruits lessened and made uniform. They advocate the establishing of Farmers' Institutes in every county wherein matters pertaining to farming shall be intelligently discussed. They advocate the improvement of the drainage system of the State; also a system of reading and study similar to the Chautauqua system for farmers. Co-operation is an essential principle of the order, and by dispensing with middle-men, members of the order have obtained farming and household supplies at reduced rates. In a word, the spirit of the order is progressive, tending to promote good-fellowship, thrift and industry among the farmers of the State.

1. New Castle County District Grange: D. J. Murphy, master, and Sister S. D. Hill, secretary.

2. Kent County District Grange: W. H. Burnite, master, and Wesley Webb, secretary.

3. Sussex County District Grange: Thos. J. Perry, master, and S. Harrington Messick, secretary.

Delaware State Grange, organized in Wilmington, Del., March 2, 1875, by W. Master J. M. Hamilton, of California, and the following officers elected: 1. John J. Rosa, W. M.; 2. George Jackson, O.; 3. Thos. F. Dilworth, L.; 4. Henry Thompson, S.; 5. James M. Shakespeare, A. S.; 6. John W. Day, chaplain; 7. James M. Bracken, treasurer; 8. Wm. C. Weir, secretary; 9. Wm. Dean, G. K.; 10. Sister E. M. Dilworth, Ceres; 11. Sister — Jackson,

Pomona; 12. Sister — Day, Flora; and 13. Sister — McCullough, L. A. Steward.

PATRONS OF HUSBANDRY OR STATE GRANGE.

PEACHES IN DELAWARE.¹—It is probable that the earliest settlers in Delaware planted both apple and peach trees. William Penn found such trees here on his first visit. On July 18, 1676, John Richardson had surveyed to him 2000 acres of land in what is now Little Creek Hundred, Kent County, and on the 18th of August following, he made an agreement with Thomas Crampton to live on the place, care for it and the stock upon it, and to set out and care for three hundred apple trees for three years, which Richardson was to bring to the plantation.

Just when orchards were first set out in Lower Delaware does not appear, but it was probably early in the last century. Peaches were planted in New England about 1629, and Beverly says that peaches, nectarines and apricots were growing abundantly in Virginia in 1720, there being trees at that time twelve to thirteen inches in circumference. Peaches were taken to Louisiana by the Spaniards previous to its settlement by the French, and we are told that the peach orchards were killed by frost in New York in 1737. In 1735 George Roberts obtained peach-stones from Peter Collinson, of England, and planted the seeds on "Peach Blossom" plantation, at Easton, Talbot County, Md.

During the last century both apple and peach orchards became numerous in the lower part of Kent

¹ By Wesley Webb.

County and in portions of Sussex County. In 1795 orchards designated as "large peach orchards" were assessed to the following persons in Nanticoke Hundred: Arthur Fowler, Clement Laws, Matthew Merline, John Sharp, Joseph Tindall, John Laws, Elisha Evans and Richard Hotson. Hotson's place was eight miles from Milford.

In the same year it is recorded that John Sharp had an apple orchard of three hundred trees, Peter Jackson one of one hundred trees, and William Jones, Elisha Evans and Gove Fisher are mentioned as apple growers.

These apples were largely used for making brandy, many of the growers having distilleries.

Early in this century there were orchards of 1000 to 1500 trees in the neighborhood of Bridgeville. At this time, William Shockley planted an orchard of 500 trees near where the Episcopal Church now stands in Cedar Creek, and which was later owned by his son-in-law, John C. Davis. Levi Johnson had an orchard of similar size near Griffith's Mills, in Kent County, near Mispillion Creek. These orchards were in bearing about 1830, and were widely known because of their extent. In 1820, Thomas C. Atkins set out an orchard of several hundred trees near where Rodney Station now is, four miles from Georgetown, and in a few years increased them to 1200 trees.

This orchard bore abundant crops every other year for many years, and was in good condition in 1840. The fruit was used for making peach brandy. The farm is now owned by Daniel J. Layton. Captain John S. Atkins, who now has an orchard of 4000 trees near Georgetown, is a son of this Thomas C. Atkins.

It was early in the present century that boatmen found their way up the creeks to carry peaches from Murderkill and Mispillion Hundreds, and St. Jones' Neck, and probably from other points to New York and Philadelphia, where they sold at remunerative prices.

John Potter, of Milford, turned two boats which he owned to this trade during the peach season, for several years, between 1830 and 1835. He lived near the mouth of the creek, where his good wife would watch for the appearance up the bay of these boats returning from their city trips, when she, with horse and gig, would quickly visit the farmers of the hundred, and tell them to bring on their peaches, for the boats were coming.

Lewis Chamberlain was also quite a noted buyer of those times. Mr. H. W. McColley, then a young man, tells how he, on one occasion, with a vessel of his own loaded with cordwood for New York City, "dropped down" to the mouth of the creek, and having stowed the deck-load of wood so as to make a large bin in the centre of the deck, he filled this bin with natural peaches at forty cents per bushel. They were covered during the day with canvas and uncovered at night, throughout the trip. They arrived in New York in good condition, and sold for one dollar per bushel.

Up to this time the orchards were all seedlings or "native," and the fruit was used for home supply, for making brandy, for occasional shipment as described, and much was dried in the sun and used in the family or sent to market.

So far as can be learned, the first orchards of budded fruit set out in Delaware were planted near Delaware City in 1832 by Isaac Reeves. Mr. Reeves had been for some time engaged in peach-raising in Gloucester County, New Jersey, where he had in 1828 thirty acres in trees, and his father and brothers were among the early boatmen who carried this fruit from Lower Delaware to Philadelphia. In 1828 Mr. Reeves removed to Philadelphia, and soon after planted seventy or eighty acres in peach trees at Red Bank, New Jersey, and owned in 1830 or '31 altogether about one hundred and fifty acres set in orchards. He had in the mean time formed a partnership with Mr. Ridgeway, of Philadelphia, who in 1831 came into possession of some land at Delaware City. He told Mr. Reeves that as it was sandy land, he had better go down and look at it to see if it would produce peaches. Mr. Reeves visited the place and found large native trees of the Morris White, Oldmixon, Cling, and other varieties; so in 1832 he planted, where the Delaware Battery now stands, the first orchard of budded fruit, setting out thirty acres this year, as many more the year following, and had, in the neighborhood, one hundred acres in 1837. The first peaches were sent to market in 1835. In the latter year Major Reybold planted a small orchard, and in 1836 planted largely, as did also his sons William, Phillip, John, Anthony, and his son-in-law, John C. Clark, so that as early as 1840 they together had about six hundred acres in peach trees.

In 1838 Mr. Reeves planted an orchard of one hundred acres on the farm of Ayres & Thompson, between Wilmington and New Castle, and another of one hundred acres on the farm of Dr. Thompson, at Naaman's Creek (now Claymont), Delaware. From this time orchards spread along the Delaware and Chesapeake Canal, and the whole county began to be filled with peach trees.

The prices then ranged about as they do now, in ordinary years, from 30 cents to \$1.00 per basket, for about this time the fruit began first to be shipped in baskets of five-eighths of a bushel each. One year, when peaches were very high and scarce, Reeves netted \$16,000 from 7000 baskets, and in 1837 or '38 netted a like amount from 16,000 baskets. The following year he expected a crop of 25,000 baskets and a profit of at least \$20,000, but on the 14th of May a frost killed the entire crop, so that not ten baskets were gathered.

The Reybolds shipped as many as 200,000 baskets of fruit in one year, and in 1846 an excessive crop made the price so low that Major Reybold dumped his shipments for one day into the river at Philadelphia. The next day he had a fair market.

Soon after the Reybolds went into the business,

Jefferson Clark and Wm. D. Clark also planted large orchards near Delaware City, and about 1840 Wm. Polk at Liston's Tree, Simon Spearman on Duck Creek near Smyrna, Henry M. Todd at Dover, Jonathan Stites at the "Seven Hickories" west of Dover, Jehu M. Reed, two miles north of Frederica, and Dr. Emerson at Willing Brook, near Leipsic, all planted out large orchards. Jehu M. Reed was probably in the business before this date, and as early as 1843 sold budded trees to most of the farmers of Kent and Sussex Counties who put out orchards at that time. Mr. Reed shipped his fruit generally in boats from the creek near which he lived, but in years of scarcity of fruit, and consequent high prices, he sometimes hauled his crop to Short's Landing, on Duck Creek, a distance of nearly twenty-five miles, loaded in bulk into wagons without springs. Dr. Emerson shipped his in boats of his own; Henry M. Todd and Simon Spearman shipped theirs from Short's Landing on the steamer "Kent," which began to run in 1840 between that place and Philadelphia.

Soon after 1840 Wm. Atherly, Daniel Corbit, Jonathan Fennemore and others set out large orchards along Appoquinnimink Creek from Odessa down to near the river, and so large were their crops that they kept three lines of barges running daily to Philadelphia during the peach season; and as their fruit was of the finest quality and prices very good, they made fortunes in the business. In 1840 George Hickman, father of Harbeson Hickman, now an extensive land-owner, set out a large orchard near Lewes, but it was probably not of budded fruit, as it was not intended for shipment. About the same year Giddiah Beauchamp planted a large orchard near Canterbury, but this was mostly of native trees and the fruit was dried or made into peach brandy. Two or three years later Rev. T. P. McColey and Thomas Davis set out orchards of budded trees near Milford, as did many others along the water-ways; and it was about this time, probably, that Daniel C. Curry set the orchard on "Shawnee" that in war-times became the famous orchard of that section. The orchards planted about Delaware City were comparatively short-lived, and in 1844, Mr. Reeves began to take out those planted first and to replant, and in 1850 the first one hundred acres had all been removed, and the second plantings were all gone in 1858.

In 1856, the railroad having been completed well down the State, peach-raising became common all along the line. In this year ex-Governor John P. Cochran set out about ten thousand trees one mile west of Middletown, and Serick P. Shallcross set out fifteen thousand trees three miles northeast of that town. From that time but few trees were set in that vicinity for a year or two, but in 1860 almost every farmer began to plant orchards. William Polk set out six thousand trees in this year, west of Middletown and added to them afterwards. In 1861 E. R. Cochran set out three thousand five hundred trees. Governor Biggs, Mr. Willits and others set out large

orchards, and later Henry Clayton, president of the Middletown Bank, became an extensive peach-grower, at one time having nineteen thousand trees. The business grew in that locality till in 1875, the year of the big crop, there were shipped from Middletown during the season an average of thirty-five car-loads daily, five hundred and thirty baskets to the car, making a total of one million five hundred thousand baskets in that year, and from the peninsula the shipments amounted to five million baskets.

It was in 1856 that Joseph Griffith, Joseph Ferris and Thomas B. Lockwood planted large orchards west of Smyrna, and two years later Robert H. Cummins began planting, and the business there increased till nearly three-fourths of the land was devoted to peach-growing, and as many as three hundred thousand baskets of fruit have been shipped from the station at Clayton in one year. Dr. Henry Ridgely, Manlove Hayes, W. L. Cannon and others early planted orchards near Dover. The William Ashcraft orchard, some six miles east of Wyoming, was for years a noted one. Between 1854 and 1860, Jonathan Catlin, planted more than twelve thousand trees, near Canterbury, which he purchased in Rochester, N. Y. They proved very profitable, and some of them planted in 1860 are still in bearing condition. In December, 1856, the railroad was extended to Seaford, and the next year peach orchards were planted there and at Bridgeville. In 1848, Daniel Curry, of Milford, had planted on his farm at Bridgeville an orchard of one thousand trees, and the same year William Polk planted three hundred trees, all of budded fruit, but as it then had to be hauled to the "Brick Granary," in Cedar Creek Hundred, and shipped thence by water to Philadelphia, the enterprise was not profitable and was abandoned. In 1857, William Cannon, afterwards Governor of Delaware, planted at Bridgeville five thousand trees, G. S. Layton three hundred trees, and John Kinder fifty trees; Mr. Kindersaying he had enough, as Mr. Cannon's large orchard would glut the market; but so far was this from being true that good prices were generally received and the business has steadily advanced. William Cannon planted a nursery of one hundred and fifty thousand trees in 1858, and sold them all in the neighborhood. He afterwards had another large nursery, and several others smaller ones, and most of the trees have been set in that vicinity. In 1873, twenty-four cars were loaded at this station in one day, and the orchards in the vicinity now are capable of yielding four or five times as many, nearly every farm having an orchard—some of them of fifteen thousand to twenty-five thousand trees.

At Seaford the large growers were Wm. H. Ross and Elijah, Levin and Samuel Hitch, in the earlier days,—in 1857 and the few years following. In the eastern part of the county, ex-Governor Charles C. Stockley, Judge Wooten and James Anderson began raising peaches just previous to 1860, and drew them to Bridgeville till 1868, when the railroad was

put through to Georgetown; and from that time on the orchards have steadily increased in the eastern part of Sussex County.

At the present time there is marketed from the Middletown depot the product of about one hundred thousand trees, a part of which are in Cecil County, Md.

Among the large growers are Governor Biggs, who has extensive orchards farther down the peninsula in Maryland; S. T. Shallcross, 5000 trees; R. T. Cochran, 7000 trees; Wm. Polk, 9000 trees; E. R. Cochran, 18,000 trees, who also has nurseries, from which he sells annually about 400,000 trees. Near Smyrna, which is the next centre, are Geo. W., D. J. and Alexander G. Cummins, A. L. Hudson, Samuel Roberts, James W. Anthony, Henry S. Anthony and others.

Wyoming, which has for some years past been the finest peach-growing district in the State, numbers among her peach men Geo. H. Gildersleve, J. G. Brown, E. H. Bancroft, John Dager, T. P. Hansen, Capt. J. C. Durborough, C. Frear and many others; and in a year of full crops could send to her station about half a million baskets of fruit.

Felton has John Heyd, W. H. Burnite, G. W. Killen and others, and from here should naturally be shipped the fruit grown about Frederica, which would take in that of S. W. Darby, J. M. Reed, Thomas James and Rev. Jonathan S. Willis, all of whom have large and fine orchards.

Milford is now attracting especial attention as a "peach centre," where, by a wagon haul of not over ten miles, can be concentrated the fruit of half a million bearing trees, and at the rate orchards are now being set, this number promises to be doubled within five years. Among the large growers here are John W. and Wm. F. Causey, Robert H. and Mark Davis, Col. Abel Small, John J. Rosa, Henry W. Hynson, W. R. Phillips, Gen. Van Vorst and many others. Milford is also remarkable for the large nurseries in the vicinity, prominent among which is the long established one of A. Cullen and that of W. R. Phillips, as well as many of smaller magnitude. Near it are also located most of the evaporators on the peninsula, over one hundred of them being in use in the vicinity; and more patentees of these machines live in and near the town than in any other place in the United States. The most extensive growers in Sussex County are Albert Curry and Simeon Pennewill, who have large orchards at Greenwood; Miles Messick, H. P. and P. L. Cannon, Geo. T. Traut, D. S. Myer, E. W. Layton and G. S. Layton, at Bridgeville; Jas. J. Ross, Dr. Hugh Martin and Hon. E. L. Martin, at Seaford; and ex-Governor Stockley and Harbeson Hickman, at Georgetown.

It is interesting to note in this connection that the "peach centre" has been gradually moving down the peninsula. In 1875 it was at Middletown, in 1880 at Smyrna, in 1885 at Wyoming; in 1890 it will prob-

ably move across from Milford to Bridgeville and Seaford. It is generally agreed that the predominant cause of the utter abandonment of the business at Delaware City, and the partial abandonment of it from Middletown to Dover, is the disease known as peach yellows, a fatal malady about which nothing is positively known, and for which no remedy has been discovered.

As has been noticed, the opening of the railroad down through the State gave a great impetus to peach-raising; yet there have always been unsatisfactory features connected with the marketing of the crops, and numerous efforts were made and plans adopted to effect improvements. Shippers complained that freight rates were excessive, that fruit trains were often delayed, to the damage and loss of the fruit, and that commission merchants to whom it was consigned were sometimes irresponsible or dishonest. Early in the history of the business Wm. H. Wanzer, the "peach king" of New York City, and ex-Mayor Van Vorst, of Jersey City, bought fruit at Milford, and paid for it on the spot, and shipped it to Jersey City, where it was, after inspection, sold to the dealers who were gathered there from New England and other Northern markets. This enterprise, however, did not prove profitable to its originators, and was soon abandoned. But the idea contained in it took root, and, in the brain of Wm. P. Corsa, of Milford, was perfected a plan which was materialized into the Delaware Fruit Exchange. A charter was granted to this organization in 1883, and it began operations at Wyoming in 1884. In brief, the plan consists in concentrating buyers at one point, where the peaches, previously inspected and graded, are shipped, and sold at auction to the highest bidder by the car-load. So far, however, the bulk of the fruit sold on this plan has been taken mostly in wagons to the station, where the buyers were gathered. This point was Wyoming in 1884, 1885 and 1887, and Still Pond, Md., in 1886. In 1886 several branch exchanges were formed, but were not operated on account of a scarcity of fruit. In 1887 these branches, and several others formed in that season, went into practical operation on the same plan as practiced at Wyoming, which was considered the headquarters, whither reports were sent daily. The results have been very gratifying, the freights lowered, better train service secured, the expenses of handling reduced, the commissions saved, the markets broadened and a better quality of fruit secured to the buyer. It is confidently believed by the leading fruit-growers that this system will become entirely successful, and through it all the fruit grown on the Delaware and Maryland Peninsula will be profitably marketed.

The following statement of the amount of fruit carried over the Philadelphia, Wilmington and Baltimore Railroad is interesting, though it includes a portion of that produced in Maryland as well as that of Delaware:

CHAPTER XXII.

PUBLIC EDUCATION.

THE early Swedish settlers are said to have been intelligent and it is reasonable to suppose that they had some system of instruction among them.

After the Amsterdam Company purchased New Amstel, or New Castle, of the Dutch West India Company, in 1658, they sent ministers and teachers to the colony; and after Delaware became attached to Penn's proprietorship, in 1682, it appears that steps were taken to provide for the education of the people; but Delaware became a separate colony in 1753, and from that time until 1792 no provision was made for public or free schools. The children of the wealthy were educated at private pay schools, a system which has continued in some localities until the present.

These old pay schools or academies, were some of them well conducted, and are held in grateful remembrance by many of the older people of the present, but it is plain that this class of schools left the poor without an opportunity to obtain an education.

When the Constitution of 1792 was framed, this defect was recognized, and provision was made "for establishing schools and promoting the arts and sciences," but the Legislature did not carry out this requirement until February 9, 1796, when an act was passed providing that the moneys received from marriage and tavern licenses, from the date of the act to January 1, 1806, be applied to this fund. The time was afterwards extended until 1820. Section 7 of this act provides "That the said fund shall be applied to the establishment of schools in the several hundreds or districts of the respective counties of the State for the purpose of instructing the children of the inhabitants thereof in the English language, arithmetic and such other branches of knowledge as are most useful and necessary in completing a good English education, and that the same shall not be applied to the erecting or supporting of any academy, college or university in this State." The money thus accumulated was invested and constituted a fund sufficient to warrant the Legislature in 1817, in passing an act appropriating a portion thereof for the education of poor children. Under this act from three to five persons were appointed as trustees in each hundred to superintend

its distribution for educating poor children, who were to be instructed in reading, writing and arithmetic. The trustees had full power to select the teachers and fix the salary; \$1000 was annually appropriated from the school fund to each county under this act. The teachers were required to keep a regular and distinct account of all moneys received and expended, the names, ages and condition of the children, and their progress in learning, and to make reports to the county treasurer whose duty it was to present them to the General Assembly. The trustees under this act were for New Castle County, Brandywine Hundred, Robert Forward, Jas. Grubb, Chas. Tatem; Christiana Hundred, Thos. Baldwin, Geo. Morris, Edward Roche, Jas. Brindley, Jno. McCalmont; Mill Creek Hundred, Andrew Reynolds, Washington Rice, Ellis Saunders; White Clay Creek Hundred, George Gillespie, David Morrison, David Nivin; New Castle Hundred, John Crow, Samuel Moore, James R. Black, Archibald Alexander; Red Lion Hundred, Anthony M. Higgins, John Sutton and George Clark; Pencader Hundred, William Cooch, Levi Boulden and Rev. Samuel Bell; St. George's Hundred, John Merritt, Christopher Vandergrift and David Stewart; Appoquinimink Hundred, John Crawford, Dickinson Webster, Gideon Emory.

Kent County.—Duck Creek Hundred, Thomas Rothwell, Mordecai Morris, John Raymond, James Chiffins and Benjamin Coombe; Little Creek Hundred, Daniel Cowgill, Robert Register, John Crocker, William Ruth and James Scotten; St. Jones Hundred, Thomas Canby, Philip Thomas and Cornelius P. Comegys; Murderkill Hundred, Samuel Mifflin, Mathew Cox, John Clark, Caleb Lockwood, Andrew Barrett and Caleb Sipple; Mispillion Hundred, John Booth, Luff Lewis, Jacob Biddle, Charles Polk and Daniel Mason.

Sussex County.—Cedar Creek Hundred, Curtis Shockley, Lowder Layton and Joseph Haslet; Broadkill Hundred, Bevins Morris, Sr., Isaac Atkins and Benton Harris; Lewes and Rehoboth, Daniel Wolfe, Peter F. Wright and Robert West; Indian River, Robert Burton, Joseph Waples and John Sharp; Baltimore Hundred, Arthur Williams, James Miller and Richard Clark; Dagsborough Hundred, Edward Dingle, Jr., Robert Lacy and Spencer Phillips; Broad Creek Hundred, William Ellegood, Manen Bull and Covington Messick; Little Creek, John Polk, James Derrickson and Jonathan Waller; Northwest Fork Hundred, Levin Stewart, William Russell and George Polk.

A few schools were organized under this law, and the way was opened for further improvement, but it was denominated a poor children's fund, and the law was administered as a charity, and, as a consequence, did not work well. One point had been gained, however, by this law,—the necessity of educating the masses was here recognized.

It is here interesting to observe how Sunday-schools were organized in this State. The original idea of

Sunday-school teaching, as first promulgated by Robert Raikes, was that poor children were to be taught to read on Sunday, and that teachers were to be paid for their services. This idea was at least partially carried out in the organization of the Sunday-schools of Delaware under an act passed February 3, 1821, which provided that every school instituted in the State for the education of children on the Sabbath day, should be entitled to receive a certain sum of money from the treasurer, not exceeding twenty cents for each white scholar enrolled.

The following schools were established and received aid under this act in 1829:

| | |
|--|--------------|
| No. 1. Female School at New Castle..... | 100 scholars |
| No. 2. Mill Creek..... | 40 " |
| No. 3. Immanuel Church, New Castle..... | 93 " |
| No. 4. Farm School..... | 59 " |
| No. 5. St. James' School, near Stanton..... | 95 " |
| No. 6. New Castle School..... | 93 " |
| No. 7. First Presbyterian Church, Wilmington..... | 161 " |
| No. 8. Newark Male School..... | 20 " |
| No. 9. Newark Female School..... | 31 " |
| No. 10. Mrs. Anderson's School..... | 23 " |
| No. 11. Harmony School..... | 97 " |
| No. 12. White Clay Creek..... | 120 " |
| No. 13. Brandywine Manufacturers' School..... | 191 " |
| No. 14. Methodist Church School, Wilmington..... | 213 " |
| No. 15. Second Presbyterian Church School, Wilm..... | 150 " |
| No. 16. Catholic Church School..... | 40 " |
| No. 17. Protestant Episcopal Church School..... | 84 " |
| No. 19. Brandywine Village School..... | 50 " |

These schools received \$224.09 in all.

A few Sunday-schools had been organized prior to 1829, as the Levy Court record will show. The following teachers were paid for their services: September 20, 1821, P. Quigley, teacher of Brandywine Manufacturers' Sunday-school, 86 scholars, \$17.20; January 3, 1822, teachers of Female Episcopal Sunday-school in Wilmington for tuition of poor children, \$26.40; February 5, 1822, teachers of Sabbath-day School in New Castle for teaching poor children, \$11.80; February 26, 1822, to schools for teaching poor children, Bethel Sabbath-school, \$8.40; Sabbath-schools Nos. 1, 2 and 3, in Wilmington and New Castle Hundred, \$8.20; September 24, 1822, teachers of Newark Sunday-school No. 4, \$7.20; No. 7, \$8. At every meeting of the Levy Court appropriations were made for this purpose. This law has been amended, and now each county receives five hundred dollars towards the maintenance of its Sunday-schools.

FREE SCHOOL SYSTEM.—Under this law the State was divided into school districts by Gary Longfellow, Samuel Price, Andrew Green, Huglet Layton and Benaiah Thorp, a committee appointed for that purpose. George P. Fisher, Ebe Walter, Henry Bacon and Thomas Jacobs were the committee to district Sussex County.

The Free School Law of 1829, under which this apportionment took place, provides for recording the boundaries of school districts in each county, and for their division when necessary, by the Levy Court upon a petition signed by twelve or more owners of property in any school district, providing that in the original district, and in each new one, there shall be

at least thirty-five scholars over five years of age. After such division the children may continue to enjoy the privileges and benefits of the school in the original district until the next annual meeting of the school voters, when they can organize united districts, which have the same power as original districts. A stated meeting is appointed by law on the first Saturday in April at the school-house; or, if there is none, at a place designated by the Levy Court, to be held at 2 P.M., and to be kept open one hour at least. Every person residing within the district and having paid his school-tax for the preceding year shall be a school-voter of said district. Any number of voters may proceed to business, and their acts shall be valid.

The school committee consists of three persons, a clerk and two committee-men for each district; these are elected for three years, one each year. Hon. Willard Hall, the father of this law said, "The school system under these laws is simple and plain. It forms school districts, appoints and regulates the meeting of the school voters in these districts and commits to these voters in these meetings the whole power over the subject of common schools for their districts." Every school district is a republican community constituted for the special purpose of taking care of the interests of popular education within its bounds. It depends upon the school voters whether the children of the district shall have the benefit of a school, and what kind of a school they shall have." This leaving the matter in the hands of the voters of each district is very democratic, but the power thus given was sometimes used to the injury of the district; and poor men who had children to send and whose tax would have been light, were found voting for no tax, thereby rendering it impossible to open a school in the district. Sometimes the tax was voted down for several consecutive years, thus depriving the children of a generation of all school privileges, but the State was generous and made appropriations from its vested funds of an amount equal to the amount to be raised by taxation in each district. By the law of 1861, the school committees were authorized to levy a tax of \$75 in each district in New Castle, \$50 in Kent, and \$30 in Sussex. It was the intention of the law that there should be a superintendent in each county, but he received no pay excepting his traveling expenses, and none but philanthropists would engage in such work. Hon. Willard Hall acted as superintendent in New Castle county for twenty years or more and tried to carry out the system, but it had fatal defects, and as was said in one of the reports, "The stream rises no higher than its source, and so in the very neighborhoods where the improving influence of a good district free school is most needed, there it is never found. Besides the teachers were not examined and incompetent persons were often hired by equally incompetent committee-men. If the residents of a school district were intelligent and progressive, the schools would be good, otherwise there would be no school or at best a very

poor one." Judge Hall gave the gist of the law when he said, "The design of the system is not to make schools by *its operation*, but to enable and invite the people to make schools by *their own agency*." "The governor shall, yearly before the first of March, appoint a superintendent of free schools in each county," but the superintendent had no real power and no pay except postage and traveling expenses. Among those who acted as superintendents besides Willard Hall, were Henry W. Patterson, Dr. Robert H. Griffith, Samuel M. Harrington, Peter Robinson, Joshua E. Baker, Joseph Smithers, Simon Spearman, Charles Marim, Robert O. Pennewill, William Cannon, Daniel M. Bates, Willard Saulsbury, William Johnson, John A. Nicholson, Jonathan R. Torbet, A. H. Grimshaw.

The act of 1829 was frequently amended by supplementary acts in 1830, 1832, 1833 and 1835. In 1837 an act was passed to appropriate the income of the United States surplus revenue fund for the benefit of school districts, and yet the inefficient non-compulsory idea was maintained until 1861, when a step was taken in the right direction. This act required the committee to raise a certain sum in each district for school purposes, irrespective of the action of the voters, but the voters might raise an additional amount if they chose so to do. The original school fund started under the law of 1797 was further augmented by the act of 1867, which provided that the fourth of all the money arising from licenses for auctioneering, for life and fire insurance agencies, taking photographs, selling liquors and from other sources should go to the school fund.

A general convention of those interested in the cause of education was held at Dover, in December, 1867, at which a committee was appointed to prepare a report upon the needed reforms in the school system. This committee reported in the autumn of 1868, and among the changes suggested the appointment of a State superintendent was urged as well as that of a superintendent for each county. The committee further recommended a change in the mode of levying school taxes, which at that time depended upon the vote of each school at each spring meeting. The committee were of the opinion that this tax should be levied by commissioners in each hundred or town.

In 1876 the permanent fund amounted to four hundred and forty-nine thousand dollars, yielding twenty-nine thousand two hundred and eighty-four dollars for yearly distribution. The State treasurer has been from the outset the custodian of this fund. To receive a share each district must have raised by tax or subscription at least twenty-five dollars for its school, and from 1861 to 1875 was also obliged to raise within the district by tax enough to make with this twenty-five dollars, making in New Castle County seventy-five dollars for the year, in Kent County fifty dollars and in Sussex County thirty dollars.

PUBLIC SCHOOL LAW OF 1875.—The people,

under the lead of a number of progressive men, began to awake to the necessity of a change in their school system, and in March, 1873, an attempt was made to amend the school law by providing for an enforced district taxation for free schools, for county superintendents to examine teachers, for county and State boards and for a fair distribution of the school fund among the colored population. This bill passed the lower House, but failed in the Senate. The friends of a better system, nothing daunted, renewed their efforts, and in 1875 the present school system was established under the operations of which the schools of the State have been revolutionized. March 24, 1875, an act was passed allowing the colored people of the State to levy a tax of thirty cents on every hundred dollars assessed upon themselves, which was appropriated through the Delaware Association for the education of colored people to the support of schools for colored children. The next day a general school law was enacted, providing for a fixed tax to be raised annually in each district for the support of schools therein, for the examination of teachers to be employed in them, for meetings of these teachers each year in county institutes of at least three days each, with provision for instruction and exchange of views, for supervision of the schools by a State superintendent, who should visit each school and advise with the teachers once every year, and for a State Board of Education to hear appeals from the action of school officers, to determine text books and to prepare and issue blanks for school returns, report to be made to the Governor on the first Tuesday in December in each year, of the condition of the public schools. The Secretary of State, President of Delaware College, State auditor and State superintendent were made by this act the Board of Education.

The first State superintendent under the new law was James H. Groves, who served from 1875 till 1882. In 1883 Thomas N. Williams was appointed superintendent and Henry C. Carpenter assistant. In 1887 the law was somewhat changed and the office of State superintendent was abolished and three county superintendents were provided for in his stead, at an annual salary of one thousand dollars each. Herman Bessey, L. Irving Handy and James H. Ward were appointed county superintendents. The State Board of Education now consists of the Secretary of State, President of Delaware College and the three superintendents. It is the duty of these superintendents to hold teachers' examinations, to visit the schools at least twice each year if kept open at least eight months, note the condition of the school, advise with the teacher, and they may withdraw any teacher's certificate if he or she does not comply with the reasonable directions of the superintendent. There are three grades of certificate given to persons of good moral character. The first is given to persons qualified to teach orthography, reading, writing, mental and written arithmetic, geography, history of the United States and English grammar, elements of

rhetoric, algebra, geometry and natural philosophy, for three years, when recommended to the State Board and approved by them. The certificate must be countersigned by the President of Delaware College, who is *ex-officio* president of the State Board. Applicants who answer ninety per cent. of the questions in all of the above studies, excepting rhetoric, algebra, geometry and natural philosophy, are entitled to a second grade certificate from the county superintendent, good for two years, while those only answering sixty per cent. of the questions are entitled to a third grade certificate, good for one year. If the school commissioners of any district employ teachers without certificates they can receive no pay. The State Board are empowered to determine what text books are to be used.

In 1886 there were four hundred and twenty-two districts in the State, distributed as follows: New Castle, 100; Kent, 131; Sussex, 192. The number of white children of school age in the State is New Castle County, 19,837; Kent, 7,137; Sussex, 9,822; total, 36,468. Of these the number enrolled was New Castle, 14,529; Kent, 6,100; Sussex 8,733, total, 19,235. The average number of months taught in each county was 975 in New Castle, 869 in Kent, 682 in Sussex. This is a higher average than can be found in most of the States and speaks well for the success of the present school system. The whole number of teachers in the State, including the City of Wilmington, was 635. The total amount of teachers' salaries was \$178,085.97. The State appropriation was \$60,606.52 and the total appropriation was \$246,600.62. The average salary of teachers was \$32.40 per month. The total value of school buildings was estimated at \$589,850; school grounds, \$97,395; school furniture, \$54,777.

Of the higher institutions of learning in the State, Delaware College, located at Newark, is hereafter described. Newark Academy originated in the desire to educate young men for the ministry. It was founded by Rev. Francis Allison, and adopted by the Synod of Philadelphia as its school, in 1744; in 1767 it was located permanently at Newark, and in 1769 it was chartered by Thomas and Richard Penn. Wilmington Conference Academy, located at Dover, was founded in 1873, and is under the care of the Methodist Church. There are several other academies and private schools in the State, whose history will be found in the history of those localities. The largest and best public library in the State is at Wilmington. There is also a good circulating library at Dover. The Ferris Reform School is a noble charity, founded with money donated by John Ferris, in his will, amounting to \$83,823. It was established in 1885, and is located on a large farm, near Wilmington. The following institutions for educational, literary and scientific purposes are recognized in the laws of Delaware as having been duly incorporated; many are now extinct but the very names will suggest pleasant memories to many of the older inhabitants,

and the long list of schools incorporated shows further that there was an active interest in educational matters in the early part of the present century: New Castle Academy was incorporated in 1801; St. James' School 1808; Dover Academy 1810; Newark Grammar School 1811; Georgetown Academy 1812; Newport Grammar School 1812; New Castle Library Company 1812; Union School 1815; Brandywine Academy 1815; Union Academy of Camden 1816; Female Harmony Society of Wilmington 1817; New Castle Female Benevolent Society 1817; Rittenhouse Academy 1817; Mechanics Academy of Smyrna 1817; Brandywine Manufacturers Sunday School 1817; Bridgeville Institution in Sussex 1818; Lewes School 1818; Female Union Society of Smyrna 1818; Cantwell Bridge Academy 1818; Milton Academy 1819; Seaford Academy 1819; Trap School 1821; Union Academy 1821; Franklin School 1822; African School Society of Wilmington 1824; Middletown Academy 1826; Pratt's Branch School 1829; School in Delaware City 1829; Self Supporting School in Brandywine Hundred 1832; Delaware Academy of Natural Sciences 1837; Wilmington Athenæum 1839; Wilmington Literary Institute afterwards Wilmington Female Collegiate Institute 1843; Delaware Institute for the promotion of Mechanics, Manufactures and Arts, 1847; Smyrna Union School 1852; Wesleyan Female College 1855; Delaware City Academy 1857; Dover Classical Seminary 1861; Bridgeville Academy 1865; Seaford Seminary 1865; Wilmington Conference Academy 1873. Besides these academies incorporated, there were many other private or pay schools, taught by clergymen and others. It was no uncommon thing in the early days of schools, in this State, for teachers to itinerate from district to district, teaching in some private house or building in one place as long as they could afford to pay, and then going to another district, but this system, as well as the academies, are disappearing, and giving place to the present excellent system of public instruction.

TEACHERS' INSTITUTES.—The State Teachers' Association was organized at Rehoboth, August 28, 1879. The following officers were elected: President, W. H. Purnell; Vice-Presidents, F. E. Bach, R. H. Skinner, John L. Thompson; Secretary, H. C. Carpenter; Treasurer, Miss E. D. Frazer; Executive Committee, James H. Groves, Miss Sarah M. Fell, W. A. Reynolds, Miss Clara Fulton, O. D. Postles, Miss K. B. Rodney and McKendree Downham. This organization was the result of a call issued by H. C. Carpenter and McKendree Downham. It is just to state that December 30, 1875, the first meeting for the organization of a State Teachers' Association was held at School-house No. 1, in Wilmington, Prof. D. W. Harlan calling the meeting to order, Prof. E. D. Porter, of Delaware College, was elected president; D. W. Harlan, vice-president; Prof. W. A. Reynolds, secretary and Miss E. D. Frazer, treasurer.

An adjourned meeting was held at Georgetown

during the session of the first county institute in 1876, but no results came from this organization and the first annual meeting of the teachers of the State was held at Rehoboth in August, 1879.

A number of teachers and friends of education were present and interesting discussions were held. The following standing committees were appointed: on Condition of Education, Prof. Jeffries, J. A. Whitelock and Miss Cassie Armour; on Improved Methods of Education, F. Eden Bach, Dr. Porter and L. S. Hopkins; on Order of Exercises for Next Annual Meeting, H. C. Carpenter, McKendree Downham and Miss Lizzie Maull. After congratulatory speeches from Dr. Purnell, J. Alex. Fulton, and W. T. Crossdale the first regular session of State Teachers' Association adjourned. State Associations have been held annually at Rehoboth every year since, and they have been attended by the progressive teachers in the State. Drills, discussions and evening lectures have been features of the institute work and undoubtedly teachers have been inspired with greater earnestness in their duty by the enthusiasm engendered at this association. The best talent in the State among teachers, lawyers and professional men generally, as well as talent from outside the State, has been brought into requisition at these meetings of the teachers. The officers for 1880 were: President, W. A. Reynolds; Vice-presidents, Prof. M. Heath, Miss Emma Worrell, Prof. T. N. Williams; Secretary, Herman Roe; Treasurer, Miss E. D. Frazer; Executive Committee, Rev. J. M. Williams, J. Alex. Fulton, J. H. Groves, Miss S. M. Fell, and McKendree Downham. The following persons have been presidents of the Association since; Rev. J. M. Williams, 1881; H. C. Carpenter, 1882; McKendree Downham, 1883; James E. Carroll, 1884; L. Irving Handy, 1885; W. L. Gooding, 1886; John L. Thompson, 1887.

Each county has held an annual teachers' institute since 1875, and the act of 1887 requires county superintendents to hold institutes, each superintendant to attend all the institutes. One hundred dollars is appropriated from the State fund annually for each county for institute purposes.

SCHOOLS FOR COLORED CHILDREN. In 1866, there were only seven schools for colored people in the State, three at Wilmington, two at Camden, one at Newport and one at Odessa. During that year several philanthropic gentlemen met at the house of Samuel Hilles in Wilmington, for the purpose of devising some means to improve the condition of these schools. As the result of this meeting, the Delaware Association for the Moral Improvement and Education of the Colored People was organized, with Thomas Kimber, President, and William R. Bullock, Secretary. Contributions from those interested in the work were solicited. The Freedman's Bureau was also asked for aid, and the work of organizing schools was immediately begun. Teachers were paid from the funds of the association, while the colored people in the vicinity of

the school were depended upon to furnish board for the teacher and incidental running expenses. During the first six months fourteen schools were in operation; the Freedman's Bureau furnishing lumber for ten school-houses. The first actuary or superintendent of schools for colored children, was Rev. J. G. Furey, who laid the foundation, and was succeeded by Samuel Woolman, whose efforts were very successful. He was succeeded by Abbie C. Peckham in 1868, who served until 1874, when Miss Mary S. Casperson succeeded her, and was followed by Mrs. Kate Irvine. In 1876, Henry C. Conrad, the present efficient actuary, was elected. He found that there had been 29 schools open during the month of February preceding, with a total enrollment of 1,197 pupils. There were in 1886 24 schools in New Castle county and 1,872 pupils; 25 schools in Kent county with 1,486 pupils; 24 schools in Sussex county with 1,045 pupils. There are sixty-eight schools in the state outside the City of Wilmington with 3,563 pupils enrolled. At first the schools were supported by donations from the Delaware Association. In 1875 a law was enacted giving the colored people the tax levied upon themselves towards the support of their schools. In 1881 an appropriation was made from the State Treasury, followed in 1883 by a material increase in the amount. The total distribution among the schools in 1886 was \$7,166.69. Of this amount \$4,653.63 came from the State appropriation, and \$2,511.06 from the school tax fund. The average length of school term was four and two thirds months. The Dover school, under direction of Julius B. McGinnis, is the largest, while the schools at New Castle, Middleton, Newark, Smyrna, Milford, Seaford and Lewes are strong, and the school at South Camden under Lottie E. Scott, has shown great progress. The third annual Institute of the colored teachers, was held at Smyrna in February 1886. These institutes are directed by the colored teachers, and serve a good purpose.

No special provision is yet made by Delaware for the instruction of the deaf and dumb, the blind or the imbecile, each county caring for its own, or the state bearing the expense of their care in various asylums of Pennsylvania. The number of these unfortunates thus sent out of the state, averages from 15 to 20 yearly, and they are placed in the best institutions of Philadelphia and the neighborhood, where they receive the most humane and scientific custodianship and whatever improvement their maladies and deficiencies may permit.

DELAWARE COLLEGE.¹—While the State of Delaware has a good system of free schools, it has but one college. In the early part of this century leading citizens made several efforts to establish an institution of a higher order than had previously existed, but nothing was done until 1821, when the General Assembly passed an act "to establish a college at the village of Newark or its vicinity, for the education of

¹ By Rev. J. H. Caldwell, D.D., President.

youths in the English, Latin and Greek languages, besides arts and sciences." This act provided that the institution should bear the name of "Delaware College." It required that the board of trustees should consist of not more than thirty members and be appointed by the General Assembly. This act was never carried into effect; and on the 5th February, 1833, the Legislature passed another act to establish a college which should bear the corporate name of "The Trustees of Newark College." All the stock and money of a college fund which had been created pursuant to a resolution of the General Assembly passed on January 28, 1824, were paid over to the trustees of Newark College, and on May 8, 1834, the trustees assembled in the college hall and proceeded to open the institution by the inauguration of Professors Nathan Munroe and John Holmes Agnew. Sixty-three pupils were enrolled; only one, however, in the college course, the others being in the preparatory department, some of whom were not over nine years old. Alexander Gray was the first who matriculated in the college course, and he was received into the sophomore class. In 1843 the name was changed

DELAWARE COLLEGE.

to "Delaware College," the sale of liquor to students was prohibited, and in 1851 the college was reincorporated, with essentially the same features as before. In this act of reincorporation a normal school was provided for in connection with the college, directions were given concerning the use of the endowment fund, and the Secretary of State was required to furnish the institution with certain public documents. In 1855 the Governor was made *ex-officio* a member of the board of trustees and has continued such ever since.

The institution remained under the old regime until 1859, when it was suspended and closed until 1870. During the twenty-five years of its active career, four hundred and fifty-four students matriculated. Many most useful and eminent citizens were educated within its walls, and many of the alumni became distinguished for virtue, honor and fidelity to principle. It was established by State authority

and has continued under State control ever since. Although not richly endowed nor abundantly equipped, it has been noted for the surroundings and thoroughness of its training.

In 1862, the Congress of the United States passed an act donating to the several States thirty thousand acres of the public lands or an equivalent of land scrip, for each of their Representatives and Senators. Delaware, having two Senators and one Representative, was entitled to ninety thousand acres of land or the scrip equivalent. The object of the donation was to enable the States to establish agricultural colleges, wherein, without exchanging classical and other scientific studies, and including military tactics, the leading purpose should be to teach such branches as are related to Agriculture and the Mechanic Arts, in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life. The funds arising from the sale of land scrip were to be invested in State, United States, or some other safe stocks, at not less than five per cent. interest; and the money so invested should constitute a perpetual fund, the capital of which should remain forever undiminished. To make the grant available the previous assent of the Legislature was required, but the Legislature of Delaware, for some cause, passed no act giving assent until March 14, 1867, nearly five years after the Congressional donation had been offered. It was doubtless on account of the want of suitable buildings for college purposes, and the then financial condition of the State, that the General Assembly withheld assent so long.

It was an epoch in the history of Delaware College which had a commodious building and an adequate amount of valuable apparatus and which for eleven years had remained unoccupied. The Board of Trustees now saw the opportunity for a still closer connection with the State, and the advantage to be derived from a more complete control of the institution by the State. The trustees therefore proposed to convey to the State a joint and equal interest in the grounds, buildings, libraries, apparatus and vested funds, upon condition that the State should vest that income to be derived from the sale of land in a board of trustees, not more than one half of whom should be Representatives of the State, to be appointed by the Governor, and the other half representatives of the original corporation. It was thus proposed to meet the requirements of the Act of Congress by enabling the State to provide the buildings, ground and appliances necessary to carry out its objects.

The proposition of the trustees was accepted by the Legislature, and Delaware College was adopted as the institution to be provided as an Agricultural College in accordance with the act of Congress. An act of reincorporation was passed in 1869, by which the president of the college and the Governor of the State were constituted members *ex-officio* of the Board of Trustees. In the same year an act supplemental to that of 1867 was passed, prescribing the

manner in which members of the Legislature should in their respective Hundreds appoint to the thirty free scholarships which were allowed to the State. The institution thus re-established was opened for students on September 14, 1870, under the presidency of Hon. W. H. Purnell, LL.D., who was an alumnus of the college. He continued in charge of the institution until June, 1885, and was succeeded by Rev. John H. Caldwell, D.D., who at the time of his election on the 13th of July was presiding elder of the Easton District, Wilmington Conference.

Subsequent acts of legislation were that of 1871 making the Professor of Chemistry *ex-officio* State chemist; that of the same year, which limited the number of State students to ten from each county, and struck out the previous requirement that they should be appointed annually; in the same year an act was passed directing all the funds arising from the sale of land scrip to be transferred to the State treasurer and held by him in his official capacity, and the Governor was required by resolution to issue to the president of the college, upon his requisition, such arms, equipments and military stores belonging to the State as may be required from time to time for the purpose of instruction. In 1873 three thousand dollars annually for two years were appropriated to the college for a normal department. This department did not succeed well, and the appropriation was not renewed. By the act of 1875 the president of the college was made *ex-officio* president of the State Board of Education. In 1877 the old bonds, eighty-three in number, amounting to eighty-three thousand dollars, were all canceled, and, in their stead, a certificate of indebtedness was directed to be issued to the president of the board of trustees for that sum. On this amount six per centum is paid semi-annually, on the 1st of January and July.

In 1872 females were admitted to the institution, but were finally excluded by a resolution of the board in 1885. During the time that they were permitted to attend the college courses there were not fewer than eighty students, and some of them became the best scholars in the institution, frequently winning the best prizes and the highest honors. Many friends of the college deplore the act of the board which excluded females and regard it as a misfortune to the institution. In 1885 the Legislature appropriated eight thousand dollars to enlarge the college oratory, and provide additional laboratories and dormitories, with other needed improvements and repairs. When the college receives the appropriation provided for in the act of Congress, approved March 2, 1887, its annual income will amount to about twenty thousand dollars, and its facilities to do the work of a college, especially of an agricultural experiment station, will be ample for all its requirements. The location of the institution is one of great beauty and attractiveness, and the abundant railroad facilities render it accessible to a large patronizing territory in Delaware, Maryland and Pennsylvania.

CHAPTER XXIII.

THE PRESS OF DELAWARE.

It has been a matter of just pride to the descendants of the settlers of Penn's colony that the printing-press was at work in Philadelphia within four years of the foundation, and it naturally follows, from the close political, social and business connections existing between the Philadelphians and the people of the three counties on the Delaware, that the latter shared in the circumstances and sentiments which attended the birth of journalism in this vicinity and promoted its growth. The first paper published in the colonies was the *Boston News Letter*, the earliest number of which bore date of April 29, 1704. Next came the *Boston Gazette*, which sent out its first issue on December 21, 1719, and the next day, December 22d, Andrew Bradford printed at Philadelphia the initial number of the *American Weekly Mercury*. It was on a pot half-sheet (fifteen by twelve and one-half inches), about a page of ordinary letter paper, in other words, and bore the imprint, "Philadelphia: Printed by Andrew Bradford and sold by him and John Copson." In 1721 Copson's name was dropped, and the imprint altered to "Philadelphia: Printed and sold by Andrew Bradford at the Bible in Second Street, and also by William Bradford, in New York, where advertisements are taken in." Its appearance and make-up are thus described:¹

"The *Mercury* sometimes appeared on a whole sheet of pot, in type of various sizes, as small pica, pica and english. It appeared weekly, generally on Tuesday; but the day of publication was varied. Price, ten shillings per annum. Editorial matter seldom appeared, and so little notice was taken of passing events in the city, with which at that time everybody was supposed to be acquainted, that little information with regard to local affairs is to be found in the paper. It was principally made up of extracts from foreign journals several months old, with a few badly-printed advertisements. Two cuts, coarsely engraved and intended as ornaments, were placed at the head, one on each side of the title; that on the left was a small figure of Mercury, represented on foot with extended wings and bearing his caduceus. The other was the representation of a postman riding at full speed. These cuts were sometimes shifted, and for the sake of variety Mercury and the postman exchanged places."

On December 24, 1728, was established the second newspaper in the colony, the *Universal Instructor in all Arts and Sciences and Pennsylvania Gazette*, the founder of which was Samuel Keimer, the eccentric and pedantic printer, in whose office Benjamin Franklin set type and worked the press. Within a year it passed into the hands of Franklin & Meredith, who lopped off most of Keimer's pretentious title, and as the *Pennsylvania Gazette* it entered upon a famous career of influence and usefulness. Following it came the *Pennsylvania Journal and Weekly Advertiser*, established in 1742 by William Bradford, nephew of Andrew, and the *Pennsylvania Chronicle and Universal Advertiser*, first issued by Wm. Goddard in 1767.

But before Mr. Goddard had embarked upon his enterprise Delaware had ceased to be dependent upon Philadelphia for printing and publication. It is fair

¹ "History of Philadelphia," Scharf & Westcott, vol. 1., p. 227.

to presume that she had conferred a proportionate degree of patronage upon Bradford and his early successors, and that her more ambitious men came to yearn for a press in their midst. At any rate, James Adams came to Wilmington in 1761 from Philadelphia, where he had been in the employ of Franklin & Hall. He was a native of Ireland and learned the art at Londonderry, from whence he emigrated when of age. He began business for himself in Philadelphia about 1760, but removed his press to Wilmington the next year and published his "Proposals for Printing a Newspaper." He received sufficient encouragement to start a weekly entitled the *Wilmington Chronicle*, which, after six months, was discontinued. He continued his printing-office, however, and from it were issued some publications for the colonial government, several small works on religious subjects and an annual almanac. He also bound and sold books, and up to 1775 was the only printer in Delaware.¹ After the failure of the *Chronicle* he confined himself for some years to the other branches of his work, but in 1789 he and his son, Samuel, were publishing the *Delaware and Eastern Shore Advertiser* at Wilmington. He died near the close of 1792 and bequeathed his business to his sons. Two of them, Samuel and John, established a press at New Castle, and the edition of the Delaware laws, published in 1797, bears their imprint and that of the town. The elder Adams was a man of much importance in his day and highly esteemed.

James Wilson in 1799 began the publication at Wilmington of the *Mirror of the Times*, a paper which advocated the principles of the Federal party and supported the administration of John Adams, then President of the United States. It was printed on beautiful snow white paper, a novelty in those days, which was made at the Gilpin Paper-Mills, up the Brandywine from Wilmington. The process of manufacture was then new and was the invention of Thomas D. Gilpin, one of the owners of the mill and a native of Wilmington.

The *Mirror of the Times* appeared as semi-weekly, printed on Wednesdays and Saturdays on a Franklin press. The motto under the title was the following significant couplet:

"Here sovereign truth for man's just rights contends,
Alike unawed by foes, unswayed by friends."

Mr. Wilson² was an able editor and produced a strong and intelligent paper measured by the standard of his time, but he was not making a fortune. When the New Castle County elections of 1802 took place at the town of New Castle, he announced to his patrons that

he would spend the whole day at Captain Caleb Bennett's tavern there, where he "would wait with his account-books open, hoping that all subscribers will call on him and inquire after the condition of his purse, which was affected by a lingering consumptive complaint."

The next trial that this newspaper-man had to contend with was the yellow fever, which prevailed in Wilmington in the fall of 1802. In the issue of October 23d of that year he said: "The publication of the *Mirror* will be suspended for a short time, until our hands are willing to return from the country, whither they have retired at present, on account of the ill state of health in our borough. Patrons will be remunerated for any deficiency caused by these imperious circumstances by occasional extra-papers in the future." Within three weeks the hands returned to their cases and the *Mirror* reappeared at the original price, \$4.00 per year. It was then the editor announced that "intelligence, essays, communications will be received and promptly attended to if postpaid." In March, 1803, Mr. Wilson informed his patrons that he would "wait on them at Christiana Bridge and New Castle for full settlement of arrearages, as circumstances rendered immediate payment necessary." He further said that he did not want any of them to say "call again." In 1809 he changed the name of the paper to the *American Watchman* and a few months later purchased the *Republican*, merged the two papers in one, and conducted it as a vigorous supporter of the administration of James Madison during the War of 1812-15. It was now an ardent anti-Federalist journal, whose columns during that eventful period teemed with patriotism. M. Risely was assistant editor for several years.

The *Christian Repository* was published by Peter Brynberg at the corner of Fourth and Shipley Streets before 1800.

The *Federal Ark* appeared as a Wilmington newspaper in 1803.

The *Museum of Delaware*, "a political, literary and miscellaneous" weekly, was started by Joseph Jones Saturday, June 30, 1804. It continued six years.

³ Of the papers issued in Wilmington, the *Delaware Gazette*, its able and early rival, the *Journal*, the various publications that were merged with these papers from time to time, and the *Commercial*—Wilmington's first daily—have, by successive purchase and consolidation, been merged with the *Every Evening*, now one of the leading newspapers of the State.

The *Delaware Gazette* was established in 1784 by Jacob Craig. Of its early history but little is known, except from the volume for the year 1787, which was preserved and is now in possession of the Historical Society of Delaware. A perusal of this volume shows that the paper was conducted on the same plan as other newspapers of its day—that is, devoted exclusively to foreign news, national politics and miscellany, with no local publications whatever,

¹ "History of Printing in America," by Isaiah Thomas, Worcester, Mass., 1810, vol. II., p. 125.

² James Wilson was born August 24, 1764, in Harford County, Md. He learned the printer's trade in Wilmington, with Mr. Craig, publisher of the *Delaware Gazette*. Soon after starting the *Mirror* he opened a book-store at what is now 417 Market Street, then known as the "Sign of Shakespeare," and also had a book-bindery on Shipley Street. He died in 1841, aged seventy-seven years. His son, Alfred, succeeded as proprietor of the book-store. It was later owned by another son, E. A. Wilson, and Joshua T. Heald. One of his daughters is Mrs. Joseph C. Seeds, of Wilmington.

³ By Morris Taylor.

save those referring to political contests and the advertisements. After an existence of several years the *Gazette* was sold to Moses Bradford, a well-known citizen and father of the late United States Judge E. G. Bradford, who subsequently disposed of the concern to Major Samuel Harker. The latter conducted the paper for a number of years, and under his management it assumed a prominent tone and character among the newspapers of that day, with whom it discussed questions of national import with freedom, equality and vigor.

Established as a weekly, the paper continued as such until about 1820, when it was issued semi-weekly. The date of this change is not known, as the bound volumes now in existence do not date prior to 1822, and the change had then been made for some time. The paper, at this latter date, was published by Samuel Harker, at No. 16 Market Street. It supported the Federal ticket in the State election of that year, consisting of James Booth for Governor and Louis McLane for Representative in Congress. It bore at its head the motto, "Faithful and Fearless," which had been adopted by Major Harker on assuming control of the paper, and was maintained as long as it continued in existence.

In 1825 the office of publication was removed to No. 6 Market Street, and in 1827 to No. 17 East Water Street. On August 27th of the latter year another change was made to No. 4 Market Street. For years the paper had been a pronounced advocate of the Federal party, but in 1825 the editor announced his disapproval of the selection of John Quincy Adams for the Presidency by the House of Representatives, and a change of political sentiment began, which eventuated, in 1828, in the paper heartily supporting General Jackson for President.

On December 12, 1828, the *Gazette* absorbed by purchase the *American Watchman*, Mr. Wilson's paper, which had already bought out the *Republican* and also the *Patriot*, the latter only a campaign sheet established to aid in the election of Jackson to the Presidency. After the consolidation the *Gazette* was changed to the *Delaware Gazette and American Watchman*. In 1830 it was sold by Major Harker to his brother, John Newton Harker, who, on June 10, 1834, sold the establishment to D. A. J. Upham, under whose management the paper was, July 1st of the same year, considerably enlarged. December 13, 1836, editorial announcement was made of the fact that John C. Klonegar would carry on the practical business of the office, Mr. Upham continuing as editor. In 1838 John Newton Harker again purchased the paper and returned to the old name of the *Delaware Gazette*. Mr. Upham emigrated to Wisconsin, and subsequently became mayor of Milwaukee and Governor of the State.

The next change in proprietorship was on November 4, 1842, when H. Bosee, who had been proprietor of the *Cecil Gazette*, published at Elkton, Md., bought an interest in the paper, and the firm of Harker &

Bosee was formed. This arrangement existed but a short time, as on January 1, 1843, the firm was dissolved, and announcement was made that H. Bosee and Caleb P. Johnson had purchased Mr. Harker's entire interest in the paper. Within a year—on January 1, 1844—the firm of Bosee & Johnson dissolved, and John Newton Harker again appeared as one of the proprietors, the firm then being Harker & Johnson. On January 1, 1845, Mr. Harker resold his interest to H. Bosee, and the firm of Johnson & Bosee was formed. Next year, on January 28, 1846, Mr. Bosee again sold out to John Newton Harker, and the firm became Harker & Johnson once more. On February 17th of this year the paper was enlarged, and William Huffington was announced as editor.

On February 9, 1847, John Newton Harker permanently retired from the paper, and was succeeded by William Penn Chandler, as part owner and editor-in-chief. The firm then became Johnson & Chandler. Mr. Chandler was a lawyer and an able writer. Harker & Johnson, in 1844, removed their office to the new Temperance Hall building, No. 2 East Fourth St., and in March, 1853, Mr. Johnson bought the property No. 416 Market St., and removed the *Gazette* office to it, where the paper was still published in 1883.

The firm of Johnson & Chandler continued until January 1, 1853, when Mr. Chandler retired and C. P. Johnson became sole editor and proprietor. Under his management the paper grew and prospered, and for years the *Gazette* was one of the most influential papers of the vicinity. During the troublesome times of the Civil War, when many Democratic papers were in constant difficulties with the dominant party, Mr. Johnson conducted the paper with rare judgment and discretion, and with loyalty to the party whose principles he supported, as well as to the general government.

During all this time the *Gazette* had been a weekly and semi-weekly publication, but on April 1, 1872, Mr. Johnson converted the semi-weekly into a daily, still continuing the weekly edition.

John Johnson, the grandfather of Caleb Parker Johnson, the subject of this sketch, came to America from England prior to the Revolution of 1776, and settled in, or near, Darby, Pa. He shortly after married Hannah Mitchell, the daughter of Benjamin Mitchell, a Quaker gentleman of that place, whose wife's maiden-name was Rudolph, a niece of Tobias Rudolph, of Elkton, Maryland. When the War for Independence was declared, John Johnson joined the patriots and served in a light horse company. Being a fine scholar, he was promoted to the responsible position of commissary, which he held until the close of the war. Some time after, he removed to the "Head of Elk Landing," to take charge of the grain business for Tobias Rudolph, large quantities of wheat and corn from Pennsylvania being then sent by vessels to Baltimore. The vessel by which he was coming from the latter city became frozen up, and desir-

He was elected to Congress in 1850, and moved to No. 15 East Street, and in 1851 to No. 17 East Water Street. On August 1, 1852, on the other coast another election was held, and No. 4 Market Street. For years there was a strong opposition and advance on the part of the great masses. The election announced his election, and of the election of John Quincy Adams to the Presidency, to the House of Representatives, and a change of policy in the administration, which represented, in 1858, to be a most hearty supporting George Jackson for President.

On December 1, 1848, the *Gazette* absorbed by purchase the *Delaware Freeman*. Mr. Watson's paper, which had formerly bought out the *Freeman*, and also the *Age* of the latter, only a cartoon or sheet, as published to excite the election of Jackson to the Presidency. At the consolidation, the *Gazette* was changed to the *Delaware Gazette and American Freeman*. In 1849 it was sold by Major Hacker to his brother John Newton Hacker who, on June 10, 1849, changed the publication to D. A. F. Freeman, under whose management the paper was, July 1st of the same year consolidated with the *Age*. On December 1, 1846, editorial announcement was made of the fact that John F. A. Hacker would carry on the paper and business of the paper. Mr. Ugham, continuing as editor, in 1848 John Newton Hacker again purchased the paper and changed it to the old name of the *Delaware Gazette*. Mr. Ugham moved to Wisconsin, and subsequently to Chicago, where he was Mayor and Governor of the State.

The next essential ingredients were on November 1, 1911, when H. B. Shaw, who had been proposed in 1906 by G. C. C. to be the director of Historic Sites, brought in letters of introduction, and the firm of Hacker &

Boston was formed. This action, however, was not
 final, as on January 1, 1846, the firm was
 dissolved and an agreement was made by which
 each of P. Johnson, J. Newton Barker, and W. H. Chis-
 olin, interested in the paper, withdrew. On Janu-
 ary 1, 1846, the firm of Bosse & Barker was
 solved, and John Newton Barker, one of
 one of the proprietors, the firm name of P.
 Johnson. On January 1, 1846, Mr. Barker
 his interest to P. Bosse, and the firm of P.
 Bosse was formed. Next year, on January 1,
 Bosse again sold out to John Newton B.
 the firm became Barker & Johnson once more.
 February 17th of 1846, the paper was sold
 and W. H. Chisolin was the proprietor.
 On February 1, 1847, John Newton Barker
 retired from the paper, and was suc-
 ceeded by W. H. Chisolin, as part owner of
 the paper. The firm then became W. H. Chis-
 olin & Co. Mr. Chisolin was a permanent owner of
 Barker & Johnson in 1844, removed the printing
 new Temperance Hall building, No. 255 Es-
 St., and in March, 1847, Mr. Johnson removed to
 No. 410 Market St., and removed the
 office to it, where the paper was still published.

The firm of Johnson & Clark was organized on January 1, 1857, when Mr. Johnson purchased of P. Johnson, his associate partner and proprietor, of his ownership the paper press and printing office for years the *truth* was one of the best of the papers of the vicinity. During the troublous times of the Civil War, when many of the papers were in constant difficulties with the military, Mr. Johnson conducted the paper with independence and discretion, and with the aid of a party whose principles have survived, as well as the general government.

During that time the *Star* had been a daily and semi-weekly publication, but on April 1, 1901, Mr. Johnson converted the semi-weekly into a daily paper, and the weekly edition.

Taken Johnson, the grand father of the late Johnson, the proprietor of the skating rink, came from England prior to the Revolution and settled in, or near, Dard's Point. He subsequently married Hannah Mitchell, the daughter of John Mitchell, a Quaker gentleman, whose wife's maiden name was Dard's. At the outbreak of the War for Independence was declared, Johnson joined the patriots and served in the horse company. Being a first sergeant, he was promoted to the responsible position of captain, which he held until the close of the war. Some time after he received a commission as "Lieutenant" to the charge of the militia of the town of Dard's, and a large number of men from Dard's and along the coast of the Chesapeake Bay. The vessel by which he came from the latter city became the "Dard's."

C. P. Johnson.

ing to reach his family, Mr. Johnson undertook to walk over the river on the ice and was drowned. Thus his family became scattered. John Johnson, his youngest child, was put in care of Tobias Rudolph, and, receiving a fair education, learned the tailoring business. He served as a private in several campaigns in the War of 1812, and married Margaret Alexander. Six children were born to them, of whom Caleb Parker Johnson was the youngest son, Joseph M. dying when a lad of ten years. John A. Johnson, for many years favorably known in Cecil County, Maryland, as an extensive lumber merchant, was the eldest son.

Caleb Parker Johnson was born in Elkton, Cecil County, Maryland, on the 14th of February, 1820. He attended school until he was about twelve years of age, when he entered as an apprentice to the printing business with Richard P. Bayley, publisher of the *Cecil Republican*. When this paper ceased publication he engaged with Lambert A. Wilmer and George W. Venzey, publishers of *The Central Courant*, and afterwards, in 1834-35, with Henry Bosee, on the *Cecil Gazette*.

Having become proficient in the business appertaining to a country newspaper office, in 1837 the young printer left his native town and found employment at the profession he desired to be master of, in the cities of Philadelphia, New York, Baltimore and Washington. He spent the winters of 1840-41 in the latter city, and visited the Capitol frequently. Returning to Philadelphia, he "took a case" in the composing-room of L. Johnson & Co.'s stereotyping establishment, and continued there until November, 1842, when he was induced by Mr. Bosee, his former employer, to come to Wilmington and purchase one-half interest in the *Delaware Gazette*, then a Democratic weekly paper, published by John N. Harker and Henry Bosee.

On the 1st of January, 1843, the *Delaware Gazette* changed hands and appeared with the names of Henry Bosee and C. P. Johnson as publishers. From that time the *Gazette* was under the successful management of Mr. Johnson, although one-half of it was owned for ten years by either J. N. Harker, Henry Bosee, or William Penn Chandler.

On the 1st of January, 1853, Mr. Johnson bought the remaining interest in the *Delaware Gazette*, and became the sole owner and editor. Introducing steam presses, he increased the circulation of the *Gazette* and made it rank as one of the most reliable and potent Democratic newspapers in the Middle States. Delaware, which at that time had not given a Democratic majority for many years, was soon turned over to the Democratic party mainly through the determined advocacy of a more liberal policy in the State, through a Constitutional Convention. Sustaining the war with Mexico, the annexation of Texas and the acquisition of California and New Mexico, and the settlement of the northwestern boundary, the *Gazette* and Mr. Johnson became so pop-

ular in his party that he was for many years made the sole custodian of all the returns of nominations and elections, and in no instance was ever fraud found. The arduous duties of editor, reporter and manager were frequently performed by Mr. Johnson for months at a time, and no publisher on the Peninsula enjoyed greater credit. While the *Gazette* remained thirty-nine and a half years, from January, 1843, to May, 1882, under the control of Mr. Johnson, it was the most prosperous and successful newspaper in Delaware. An eminent gentleman, one who has been a constant reader of the *Gazette* for thirty years, remarks that "during the period Mr. Johnson was in control of the *Gazette*, from 1843 to 1882, the paper was a political and social power. It was emphatically the organ of the Democratic party of the State of Delaware in the highest sense. It gave direction to the best Democratic thought as well as voiced the party sentiment. The gifted men of the party sought its columns to reach their constituents, and its editorial rooms were frequented by the leaders of the party for information and counsel. Party policy, principles and platforms were largely moulded and controlled by its able suggestions. In the rural districts it was a frequent saying: 'The *Delaware Gazette* is the Democratic Bible.' The moral tone of the paper was unexceptionable. Its columns were closed to merely personal, scandalous and obscene articles, while full of general news and valuable information, making it a welcome weekly visitor to the family fireside. A first-class newspaper, healthy in tone, morals and politics, vigorous and able in a marked degree."

In 1848, Mr. Johnson married Ann Eliza, eldest daughter of Thomas Young, who was subsequently twice elected mayor of Wilmington. Unfortunately, this lady died in 1849, and in 1853, Mr. Johnson married Martha Bush Young, fourth daughter of Thomas Young. The fruit of this union, which has been happy and prosperous, is found in a family of six children,—three sons: Horace Cole, Caleb Parker and Albert Sidney, and three daughters: Martha Young, Helen Hales and Lola Alexander Johnson.

Mr. Johnson has always been held to be one of Wilmington's most honorable and liberal business men. He has contributed his influence and his money to every great improvement, having been a subscriber to the stock of every railroad built through Wilmington since 1842, and to the Odd Fellows', Masonic and Institute Halls, and was never known to evade or refuse the payment of a debt, but suffered the loss of many thousands of dollars rather than resort to legal modes for collections. His name was prominent in nearly all the Democratic county meetings and State conventions, as secretary or delegate, and on one or two occasions he was requested to allow his name to be used for nomination for Governor and Representative in Congress. But he neither asked nor sought office, and when appointed United States marshal for the Delaware District by President Johnson in 1866,

resigned after holding the position about a year. On May 1, 1882, Mr. Johnson sold the daily and weekly *Gazette* and the entire printing establishment to J. B. Bell and Merris Taylor, who then became proprietors, under the firm-name of Bell & Taylor.

The new firm did not meet with the success that had attended previous proprietors. They purchased the establishment at the instance of a number of Democratic politicians, but did not receive the support expected. The obligations assumed by the new firm were too heavy to be borne by them alone, and on December 10, 1883, the old *Gazette*, after an existence of ninety-nine years, was sold to the proprietors of *Every Evening*, and merged into that paper. Mr. Bell now devotes himself exclusively to the *Sunday Star*, which he started before going into the *Gazette* venture, and Mr. Taylor is connected with the *Every Evening*.

The *Delaware Journal*, for years the rival and contemporary of the *Gazette*, was first issued on April 24, 1827. The firm of Robert Porter & Son were proprietors, and Moses Bradford was the editor. It was issued semi-weekly, and was a staunch Whig paper, supporting John Quincy Adams for the Presidency with great vigor throughout the national campaign of the following year. The office of publication was at No. 97 Market Street. In 1835 it was published by Porter & Mitchell, and a year later Robert & J. B. Porter became the publishers. During this time Moses Bradford retired from the editorial chair, and was succeeded by William P. Brobson, a talented Wilmington lawyer of that day, and a clear, vigorous writer. On December 10, 1838, by reason of the death of Robert Porter, Henry H. J. Naff associated himself with J. B. Porter in the publication of the paper, and the firm became Porter & Naff. In the Presidential campaign of 1844 the paper ardently supported Henry Clay, and mourned greatly at his defeat, though its grief was mitigated by the fact that its vigorous work had kept Delaware safely moored in the Whig column.

Mr. Naff continued as editor of the *Journal* until 1849, when he retired to accept the postmastership of Wilmington. He lived to a ripe old age, was an active member of the Board of Education for years and was regarded as one of Wilmington's most honored and respected citizens. He was succeeded in the *Journal* office by Henry Eckel, the firm becoming Porter & Eckel, with Joseph M. Barr as editor. The latter was soon succeeded by John A. Alderdice, a prominent lawyer and politician, who purchased J. B. Porter's interest, the firm then being Eckel & Co. Mr. Alderdice continued as editor of the *Journal* until 1855. In this year the *Statesman*, which had been established the previous year by James F. Hayward, was sold to the *Journal*, after an existence of only nine months. The papers were merged, under the title of *Journal* and *Statesman*. In this year Dr. James F. Wilson (son of the James Wilson who published the old *American Watchman*) purchased Mr.

Alderdice's interest, and Joshua T. Heald also became a member of the firm, but remained so only a few months. The firm of Eckel & Co. (Mr. Eckel and Dr. Wilson) continued until 1862, when Mr. Eckel became sole proprietor of the establishment and editor of the paper.

Henry Eckel, one of the most worthy and useful citizens of Wilmington, was born in Philadelphia, Pa., December 30, 1816.

His father was a German. His mother was a native of Philadelphia of German ancestry. Mr. Eckel is thus a true type of a successful German-American. From his mother, who lived to an advanced age, he inherited vigor both of physical and mental constitution. From her also he derived those moral characteristics which have been always so prominent in shaping his prosperous career.

In his well-prolonged life six months would probably cover the time during which he has been disabled by physical illness. Smaller perhaps (even) than this proportion of his natural life, is that of the willful errors which even his rivals or critics would charge to his account in the course of an exceptionally upright life. Because of the death of his father, his early scholastic education was limited. He enjoyed the advantages of the instruction given (on Chester Street) in his native city, at the first Model School of the Lancasterian system. A period of three years covered his privileges at this school, and afforded him all the opportunity he ever had to attend a scholastic institution. Graduating without formalities at the Model School on Chester Street, he at once entered that wider school of "life in earnest" in which he has since had large experience and success.

Guided, perhaps, by the development of his special aptitudes at the Model School, Mr. Eckel selected a printing-office as probably best adapted to his traits and capabilities. He began as a "printer's devil," about the year 1829, in the office of Messrs. Crissy & Goodman. Devoting himself with characteristic conscientiousness to his business, he advanced, in due time, step by step, through all the grades of his vocation, up to journeyman and managing editor, and proprietor. Wishing to escape from the crowded city to the freer air of a country neighborhood, he came in 1849 from Philadelphia to Wilmington to work, on lower terms also, as a journeyman in the office of Messrs. Porter & Naff, who were at that time publishing the *Delaware State Journal*, the leading Whig paper in Delaware. Here, observing the defective and coarse style of printing prevailing, he addressed himself with his acquired skill to the task of producing finer typographical work than could then be found in the State. He was successful in his endeavor, and was instrumental in bringing his chosen art up to the high standard that it now maintains in Wilmington.

Among the strong elements in Mr. Eckel's character, one which has been specially prominent is his indomitable perseverance. Despair of accomplish-

Henry Eckels.

Henry Eckel.

ment found no abiding-place with him in any undertaking approved by his judgment and conscience. Having once settled in his mind that the thing proposed could be and ought to be done, and by him, he addressed himself to the work and considered that failure was not to be thought of. The result was, success. Straightforward in endeavor, with an unconquerable aversion to bribes and chicanery, a fixed ambition to be true and pure and faithful, with a resolute inflexibility of purpose and devotion to the right, Mr. Eckel has attained an enduring and acknowledged success.

Preferring his chosen vocation and aware of the unnumbered snares of public office, Mr. Eckel has declined to accept lucrative appointments under the government. In this spirit he declined the position of postmaster at Wilmington, which had been offered to him during the administration of President Lincoln. As editor of the *Delaware State Journal*, Mr. Eckel thought he could better serve the cause of his country, and in this position he remained until 1872. As a citizen, however, he has not declined service for the public good. If he declined places of profit in which emolument exceeded labor, he has not refused to serve his fellow-citizens in positions of responsibility where the labor exceeded the reward. Mr. Eckel has been identified with every public interest of Wilmington for nearly forty years. For twenty-two years, first as journeyman, and finally as editor of the *State Journal*, his energies were devoted through that paper and otherwise to the widest developement, in the largest and most liberal sense, of every enterprise, civil and religious, which promised substantial benefit to the city of his choice.

He has served the interests of the city as a member of the Boards of Health and of Education. At a great sacrifice of personal ease and pleasure, he has rendered invaluable service as a member of the City Council, of which he is now the presiding officer. In politics he is a consistent, conservative Democrat, of the Jeffersonian school, always devoted to pure politics and cordially abhorring the disreputable finesses of the demagogue.

In religion, Mr. Eckel and his wife, who is also a native of Philadelphia, are esteemed members of the Presbyterian denomination.

He is also a member of the Masonic order and of the order of Odd Fellows. In the latter organization he has rendered conspicuous service and done much to shape its laws and policy through a period of thirty-seven years. He has a pleasant home and family at his residence on King Street, in Wilmington.

Mr. Eckel has two children,—a daughter, Laura I., who resides with her parents, and a son, Edward Henry, now taking the usual course of preparation for active service as a minister in the Protestant Episcopal Church. He is pursuing his studies at the General Theological Seminary in New York City.

The *Journal* supported the Republican party until 1868, when it became Democratic in politics. On May 1, 1872, Mr. Eckel turned the semi-weekly issue into a daily, but a month later he sold the *Journal and Statesman* to the proprietors of *Every Evening*.

During its existence the paper was for years published in the building on the southeast corner of Fifth and Market Streets, but in 1869 Mr. Eckel removed the establishment to the building No. 510 Market Street, adjoining the City Hall.

Wilmington had no permanent daily paper until 1866. About 1857 an attempt was made by Henry L. Bonsall, of Camden, N. J., to establish a paper under the name of the *Daily Enterprise*, but it did not last a week. No other attempt was made until 1866, when a Mr. Tyler canvassed the town for subscriptions and advertisements for a daily paper he proposed to start. Before he had proceeded far, Howard M. Jenkins and Wilmer Atkinson came here from Norristown, Pa., purchased of Mr. Tyler the interest he had then acquired in the field, established a complete newspaper and job printing-office at the southwest corner of Fifth and Market Streets, and on October 1, 1856, issued the first number of the *Wilmington Daily Commercial*, a Republican journal. The paper prospered, and a weekly edition, called the *Delaware Tribune*, was soon added. Until 1878 the establishment was in good financial shape, but the protracted panic that began that year evidently had its effect upon the proprietors. In the summer of 1876 it was reduced in size, and the price lowered from two cents to one cent. This move failed to restore prosperity to a sufficient degree, and on April 2, 1877, the paper was sold to the proprietors of *Every Evening*, which paper thus absorbed the first daily, as it had already acquired the two oldest weekly publications of the State. The *Commercial* job office was sold to Ferris Brothers, by which firm it is still conducted. Of the publishers, Mr. Jenkins, who was the editor of the *Commercial*, is now editor of the *Weekly American*, of Philadelphia, and Mr. Atkinson is publisher of the *Farm Journal*, also of Philadelphia.

The *Every Evening* that thus gathered in, one by one, its aged rivals, was first issued on September 4, 1871, by William T. Croasdale and Gilbert G. Cameron, under the firm-name of Croasdale & Cameron. Mr. Croasdale was an editor of some experience, having conducted a weekly paper at Georgetown, Delaware, and been city editor of the *Wilmington Daily Commercial* from its establishment until that time. Mr. Cameron was a printer and learned the trade in the *Republican* office. Mr. Croasdale conceived the idea of the *Every Evening*, and was firm in the belief that a bright, newsy, independent paper, at one cent per copy, would succeed in Wilmington. The starting was on a very modest scale. Two rooms were secured on the second floor of the building, No. 4 E. Third street, one for a composing room and the other for an editorial room and a business office. The paper

was printed at the establishment of the James & Webb Printing and Stationery Company, a few doors away.

The venture was a success from the start. The paper was bright, newsy and cheap, and the people were at once attracted to it. Mr. Croasdale was not only a pleasing and vigorous editorial writer, but had a keen eye for news, and the paper from the start established a reputation for giving, promptly and fully, all the important events of the day. In less than six months it had acquired a circulation of over 2500 copies daily, figures that were then deemed enormous.

The subject of increased accommodations and better press facilities had begun to bother the proprietors, when an opportunity to secure both was afforded by purchasing the *Daily Journal* and its weekly issue, the *Delaware State Journal and Statesman*, then published by Henry Eckel at No. 510 Market Street. The purchase was consummated about the 1st of June, 1872, and *Every Evening's* plant was removed to the *Journal's* quarters, which were convenient and commodious. The *Journal* was merged into *Every Evening*, and the *Delaware State Journal and Statesman* continued as the weekly issue of the united papers. With this change *Every Evening's* growth continued, and its circulation increased so rapidly that a fast double-cylinder press had to be put in. Within a year after the removal the circulation of the paper reached 6000 copies daily.

In 1875 the paper was disposed of to the "Every Evening Publishing Company," Messrs. Croasdale & Cameron retaining a controlling interest in the concern and Mr. Croasdale continuing as editor. Two years later, on May 1, 1877, the younger journal surprised the community by buying out its older daily contemporary, the *Commercial*. The latter paper was merged into *Every Evening*, and its weekly edition, the *Delaware Tribune*, lost its identity in the *Delaware State Journal and Statesman*. The *Commercial*, at that time, was published in the large building at the southwest corner of Fifth and Market Streets, and to this location the *Every Evening* plant was removed. By reason of this consolidation it was deemed advisable to increase the size of the paper to an eight-column folio, and this demanded an increase in price to two cents. The circulation fell off somewhat in consequence, but the paper increased its already excellent news features to such an extent that it soon regained those customers that had been temporarily frightened off by the increase in its selling prices.

In 1882 the sale of the building in which the office was located, rendered it necessary to seek new quarters, and the lot immediately in the rear, fronting on Fifth and Shipley Streets, was secured. Upon this site the company erected a four-story brick building, especially adapted to the newspaper business, and possessing all the arrangements and conveniences necessary for the successful management of a leading newspaper. Here the paper is now published, and it will, doubtless, continue in these comfortable quarters for years to come.

On December 10, 1883, the Every Evening Publishing Company purchased from Messrs. Bell & Taylor the *Daily Gazette* and its weekly issue, the *Delaware Gazette*. The *Daily Gazette* was merged into the *Every Evening*, the full title of that paper being *Every Evening Commercial and Gazette*. The *Gazette's* weekly issue was merged into *Every Evening's* weekly issue, under the title of the *Delaware Gazette and State Journal*. In this shape the *Every Evening* publications have since continued, ever increasing in circulation and influence, and forming a prosperous and profitable newspaper property.

The title of the proprietary company has recently been changed to the Every Evening Printing Company, and Messrs. Croasdale & Cameron, the original proprietors, are no longer connected with it. Mr. Croasdale, in March, 1882, went to Baltimore and assumed editorial control of the *Day* of that city. He subsequently went to New York, was for several months editor of the *New York Star*, which position he resigned to become an editorial worker on Henry George's labor journal, the *Standard*. He is prominently identified with the Labor party of New York City and State. Mr. Cameron is now connected with the mercantile agency of R. G. Dun & Co. Edward N. Vallandigham succeeded Mr. Croasdale as editor of *Every Evening*. He is now on the staff of the *New York Mail and Express*, and was succeeded on *Every Evening* by the president editor, George W. Humphry. John M. Whitford is the capable business manager of the paper.

Dr. William Gibbons edited and published the *Berean*, a religious journal, from 1824 to 1827.

William Penn Chandler, in January, 1847, began the publication of the *Delaware State Democrat*. Previous to this he had been an assistant editor of the *Gazette*. In February, 1847, he became a partner with C. P. Johnson in the publication of the *Gazette*.

Blue Hen's Chicken was the significant title of a paper started August 22, 1845, by William T. Jeaudell and Francis Vincent. It devoted more space and attention to local news than any paper previously published in the State. In 1847 Mr. Jeaudell sold his interest to Augustine Maillé, a Frenchman, and three months later Francis Vincent became sole proprietor. He continued to publish court proceedings and the reports of public bodies, and gave accounts of the erection of new buildings, the manufacturing interests and all noted improvements in Wilmington, as a leading feature of his paper. In 1846 its editorial columns advocated the transfer of the political power in the State from the hands of the Whigs to the Democrats, and in 1852 favored the calling of the convention which revised the State Constitution. The paper was bought in 1854 by Dr. James F. Heyward, then mayor of Wilmington, and who had previously published the *Statesman*. He united the two, and called them the *Statesman and Blue Hen's Chicken*,—an ardent anti-slavery organ, which he continued to publish for about a year, and then sold

out to Henry Eckel, who united it with the *State Journal*.

Francis Vincent was born in England in 1822, and came to this country at the age of seventeen years, and learned the printer's trade in the office of the *Delaware Gazette*, and gained a reputation as a newspaper man of enterprise in his management of the journal above-mentioned. He joined the Republican party when it was organized. In 1861 he bought the *Commonwealth*, changed its name to the *Blue Hen's Chicken*,—the same title as the paper he previously owned,—and continued it as an ultra Republican journal until the fall of 1863, when he sold it. In 1868 he wrote an essay for the Cobden Club of London, recommending an Anglo-Saxon Confederation, and in 1875 was elected an honorary member of that club. He was an alderman of Wilmington from 1864 to 1869, and city treasurer from 1873 to 1879. He died June 23, 1884. Francis Vincent was a man of a great deal of general information, and during his whole life was a diligent student. In 1870 he published one volume on the early history of Delaware.

Dr. John Lofland, known, as the "Milford Bard," in his early days lived in the town of Milford, and while there wrote a number of poems which appeared in the columns of the *Delaware Gazette*. He was also a contributor to the *Philadelphia Casket* and the *Saturday Evening Post*. A few of his productions were poetical gems. In 1847 he became an associate editor of the *Blue Hen's Chicken*, and wrote a great many stories and sketches for that paper. He died in Wilmington, January 21, 1849, age forty-nine years, and his remains were interred in St. Andrew's Church-yard.

The *Delaware Inquirer* was started during the political campaign of 1860 by James Montgomery. It advocated the election of Stephen A. Douglas as President of the United States. It continued for about five years under the proprietorship of its founder. It was then bought by James B. Riggs, who continued it a few months, when its publication ceased.

The *Morning Herald*, the first morning daily paper published in the State, was an outgrowth of the *Wilmington Advertiser*, a small advertising sheet, started by George Chance in connection with his job printing establishment. The leading spirit in the establishment of the *Morning Herald* was John O'Bryne, Esq., a leading member of the Philadelphia bar, who came to Wilmington and took up his residence. It was controlled by three of his sons and a sister, Miss Catherine O'Bryne, under the firm-name of George O'Bryne & Co. The first number was issued in August, 1876, and for some months it gave promise of vigor and long life, but it soon showed lack of management, and got tangled up financially, but continued to appear until March, 1880, when it passed into the hands of John H. Emerson, one of the pioneer newspaper men of the Peninsula, who, with

Henry C. Conrad, a member of the New Castle County bar, soon afterwards started the *Morning News*.

The *Morning News*¹ was first published under this name on March 1, 1880, the property then being owned by Henry C. Conrad and John A. Emerson, under the firm-name of Emerson & Conrad. It was a new venture in Wilmington journalism, and was especially distinguished by securing the news-service of the New York Associated Press, which had never before been done by a Delaware paper. It was Republican in politics, and at once took advanced ground on many of the unsettled questions of State reform. After four months of hard work, chiefly devoted to the organization of the paper, Mr. Emerson withdrew from the firm, and Isaac R. Pennypacker, the well-known editorial writer of Philadelphia, took his place. The firm of Conrad & Pennypacker conducted the journal with much ability until January, 1882, when Mr. Conrad, the senior partner, decided to resume his law practice. The property was accordingly purchased by the News Publishing Company, a stock association, organized under a charter obtained by Conrad & Pennypacker from the Legislature. The stockholders, at the time of this sale and reorganization, consisted of the late owners, a number of representative manufacturers, merchants and professional men of Wilmington, the late Isaac Henderson, formerly joint owner with the late William Cullen Bryant of the New York *Evening Post* for forty years, and Watson R. Sperry, a graduate of Yale University in the class of '71, who had held an editorial desk in the office of the *Evening Post* from the date of his graduation until the sale of that journal by Mr. Henderson and Mr. Bryant's heirs, and during the last six years of this period had been the managing editor, and after Mr. Bryant's death had been for about three years the responsible editor. Mr. Henderson and Mr. Sperry were the principal stockholders, and the latter became editor-in-chief. The controlling stockholders are Mr. Sperry and Edgar M. Hoopes. Mr. Hoopes is a product of the Western Reserve, Ohio, and after completing his education, received a thorough newspaper business training in the counting-rooms of the *Chicago Times* and the *Cleveland Leader*. He is secretary of the company and business manager of *The Morning News*, and has direct charge of all its business affairs. Mr. Sperry, in addition to exercising full editorial control, is the president and treasurer of the company. The paper was at once enlarged, its reportorial force increased, and its general usefulness much extended. Three months later it was moved from Shipley street into the *Morning News* Building, its present handsome and commodious quarters, at No. 511 Market Street. The *News* became at once an enterprising force in the community. Municipal, State and national politics received a large share of its attention, and the fierceness with which it discussed local abuses is gauged, probably, by the fact that during

¹ By Frederic E. Bach.

the first eighteen months of its progress under the new management three different libel suits were brought against it. The justice of its criticisms may also be measured by the consequent fact that not one of these suits was pressed to a conclusion.

On April 6, 1883, the first number of the *Weekly Morning News* was issued, a journal that has since become deservedly popular, partly on the ground that it publishes weekly, probably, more local news of the city and the Delaware and Maryland Peninsula than any of its sixty odd contemporaries.

In December, 1884, the daily *News* went safely through the ordeal of a printers' strike, ordered by the Typographical Union, which took exception to a non-union employee. The paper did not miss a single issue, and in a week thereafter was running along as usual, with a non-union force of printers, which has been retained up to the present time, and which is now organized as part of the Delaware Fraternity, No. 4, of the National Printers' Protective Fraternity.

In the spring of 1886 the great morocco strike of the city of Wilmington occurred, when, on March 23d, at noon, over fifteen hundred morocco workers walked out at the command of the Executive Committee of the Knights of Labor. The strike was so sudden, so general and so ruinous to the business interests of the city, that the community was paralyzed. The following morning the *News*, giving a full account of the strike itself and the causes or motives that led to it, expressed in unmistakable and forcible words its judgment that the strike was wrong and wicked in inception, and that it would result not only injuriously to the community, but disastrously to the strikers. This position it maintained alone among all the journals of the city for fully two weeks, or until the brunt of the bitter contest was over.

In the mean time, however, on March 31st, the Typographical Union ordered a boycott on the paper, mainly on the ground that it was opposing the demands of "organized labor," and all the usual methods of boycotters were employed to break it down. But this act proved a failure, as it brought to the journal the prompt and generous support of the business portion of the community. The *News* has always avowed its sympathy with the real welfare of workingmen, but in its utterances has declared that property rights which have been established by successful workingmen must be protected from other workingmen who were trying by a short-cut to secure the rewards of successful labor without working for them.

The *News* has labored indefatigably for the many reforms that are now being agitated in Delaware. It has urged earnestly and unceasingly upon its constituents the necessity for a Constitutional Convention, and has advocated district representation, elective county officers, a free ballot and the suppression of bribery. In local affairs it waged a relentless war against the policy-writers and other gamblers who had fastened themselves upon the city, and in this

particular it saw its labors crowned in the partial suppression of these social vampires in the autumn of 1887. It also very early discarded from its columns all lottery advertisements, and discussed the matter so thoroughly that these advertisements do not appear now in the other reputable newspapers of the State.

The *News* is the only general morning newspaper in the State, and it therefore fills a very large and important place in the dissemination of news and opinions in the territory between the Delaware and Chesapeake Bays, which includes Wilmington, and which is peculiarly its field. While it has been and is now staunchly Republican in opinion, its readers are very largely divided between the two great political parties, and under the impetus of the recent movement for a Constitutional Convention, of which it had long been the especial and earnest champion, its influence was greatly extended among the liberal people of all parties and factions.

The *Morning News* has been enlarged three times since it came under its present management, and is now a four-page paper of eight columns each. It has just added to its plant a fresh dress of type and one of Hoe's improved and fast-printing presses, with folders. It prides itself upon having built up a solid and profitable business without depending upon political patronage, its customers coming to it because they find its advertising columns of service to them. It is published daily, except on Sunday, and is sold at two cents a copy.

The *Delaware Republican* under its present name was first published as a weekly in Wilmington in February, 1841. Henry Cannon began the publication of the *Republican* in Georgetown in 1839. In 1841 he came to Wilmington and, with John H. Barr as partner, merged the two journals last named into the *Delaware Republican*. A few months later William T. Jeandell and William S. Mills, both printers, purchased the interest of John H. Barr, and the paper was continued under the name of Cannon & Co. In less than a year this partnership was dissolved by Henry Cannon disposing of his share in the business to John A. Alderdice, who in 1853 was mayor of Wilmington, having been elected by the Whig party. Disputes arose among the three partners and the paper passed under the control of gentlemen appointed by the Court of Chancery. In 1844 Henry S. Evans, of West Chester, purchased the *Republican* and placed it under the editorial management of his brother, Columbus P. Evans. Shortly afterwards, in February, 1845, George W. Vernon, the present senior proprietor of the *Republican*, joined Mr. Evans in its publication, and the firm became Evans & Vernon, which continued until the death of Mr. Evans, in 1845, when Mr. Vernon became sole proprietor.

In 1860 the *Republican* favored the election of Bell and Everett as candidates for President and Vice-President of the United States, but during the Civil War it was an ardent supporter of the administration

of Abraham Lincoln, and since then has always advocated the principles of the Republican party in local and national affairs. The office of the paper until 1848 was at the southwest corner of Third and Market Streets, Wilmington. In the same year it was removed to the southeast corner of the same streets, where it was published until 1866, when the proprietor, George W. Vernon, bought of the heirs of Daniel Hully the present site at the southeast corner of Third and King Streets, upon which he erected the present offices.

Mr. Vernon is a native of Chester County, Pennsylvania, and when a boy learned the art of printing in the office of the *West Chester Village Record* with Henry S. Evans. Among his associates in the office of the *Record* were Bayard Taylor, Judge William Butler, Edward Paxson and Columbus P. Evans, afterwards his partner. Since he first came to Wilmington, in 1845, Mr. Vernon has devoted his entire time and attention to the *Republican*.

In 1874 he established the *Daily Republican*, a prosperous paper published in the afternoon.

A few years ago Mr. Vernon took into partnership his three sons—W. Scott, George F. and Howard E. Vernon. At the session of 1877 the General Assembly incorporated the Republican Printing and Publishing Company, which has since conducted the paper.

Captain Columbus P. Evans, who, for nine years, was a partner in the publication of the *Republican*, was born in Montgomery County, Pennsylvania, September 6, 1824. His father died when he was nine years old and his mother moved to West Chester, where she trained and educated her children. At fourteen he entered the office of the *Village Record* as an apprentice. In 1844, when but twenty years old, he took charge of the *Republican*, and the next year, as has been stated, took in as partner George W. Vernon. In 1847, as second lieutenant of Company F, Eleventh Regiment of United States Infantry, he went to Mexico and participated with his command in all the battles of General Scott's triumphant march from Vera Cruz to the city of Mexico. At Molino del Rey he led the advance at the storming of the enemy's works, and with his own hands captured the sword of a Mexican officer. At Chapultepec he was in command of his company. He was promoted to first lieutenant in February, 1848, and the same year breveted captain for gallant and meritorious conduct in the war. On February 20, 1849, he was presented with a sword by the Delaware Legislature. After the close of the war, in 1848, he returned to his duties in the newspaper office, was mayor of Wilmington, elected by the Whig party in 1851. In 1853, being prostrated with consumption, he went to spend the remainder of his days in West Chester with his sister. He died there Feb. 19, 1854, at the age of thirty years.

The *Delaware Sentinel* was started in Wilmington by a faction of the Whig party in 1840, with William Naudain as editor. Its career was not successful,

and at the end of nine months from the date of its origin, a committee of gentlemen who were financially interested in it, headed by Dr. James W. Thomson, took charge of it and changed the name to the *Delaware Democrat*.

The *Delaware Pioneer*, a weekly, twenty-two by twenty-four inches, published by Frederick Haehnle, made its appearance in 1859 as the first paper in Delaware printed in the German language. Herman Rau owned it from 1861 to the time of his death, in 1876, when Francis Sheu, who was then business manager, purchased it. In January, 1881, he established the *Freie Presse*, a daily, twenty-four by thirty inches, also a German paper. He continued to be the owner and editor of both journals until September, 1886, when he died. His widow, Nannette Sheu, has since owned them, Gustavus Sheu, her son, being the editor. These papers circulate quite extensively among the six thousand German-speaking people in Wilmington and vicinity, and are also taken and read in all the counties of the State. They are both independent in politics and are devoted to news and general literature. Francis Sheu was a native of Würtemberg, Germany, and emigrated to Philadelphia in 1849, where he remained several years in the printing business, and then for fourteen years conducted a German paper in Egg Harbor, New Jersey. He afterwards published the *Sonntags Zeitung* in Philadelphia, until he removed to Wilmington.

The *Peninsula Methodist* is the only religious newspaper now published in Delaware, and is devoted to the interest of the Wilmington Methodist Episcopal Conference. It was started in 1875, under the name of the *Conference Worker*, by W. S. Armour and Charles H. Sentman. At the end of six months Mr. Armour retired and F. J. Lindsay and R. F. Cochran became associated with Mr. Sentman in its publication. A year later Charles H. Sentman became sole proprietor and continued until June 16, 1884, when he sold the paper to J. Miller Thomas, who, on June 28th following, first issued it under its present name. It is an eight-page paper, nineteen by thirteen and a half inches. Rev. T. Snowden Thomas is the editor, and his son, the proprietor, is assistant editor.

The *Wilmingtonian* was established April 1, 1882, by the present editor and proprietor, Dr. Henry C. Snitcher, as a journal treating upon subjects of domestic and sanitary science. The demands of the times called for an occasional expression of opinion upon current questions of social, religious and political nature, and finally every phase of interest to the community was given attention. Politically it is an independent Democratic journal in discussing State and national affairs. In county and city affairs it aims to indorse and sustain the best man for office. The *Wilmingtonian* still retains its earliest phase of a family journal and in that field finds its largest success. It is a four-page, seven-column weekly and is printed and published at 211 Shipley Street. J. E. Nicholson, now of Baltimore, was associated with

Dr. Snitcher until 1884; since that date Mr. J. Travers Jones has assisted in the editorial management.

The *Farm and Home*, a weekly eight page agricultural and family paper, was started in Dover October 15, 1885, by Wesley Webb, its present editor and proprietor. He continued to publish it at the State capital until October 20, 1887, when he removed it to Wilmington. In 1886 the *Ploughshare*, published in Wilmington, was merged with this journal.

The *Weekly Times* was published in Wilmington from October, 1886, to February, 1887; the *Delaware Prohibitionist* from September 13, 1884, to September 17, 1886; and the *Temperance Herald* in 1882.

The first Sunday paper published in Wilmington was the *Sunday Dispatch*, and was started by Francis Sheu in 1878. It continued two and a half years. In 1880, D. Taylor Bradford started the *Sunday Mirror*. It suspended publication at the end of five months. William P. Bancroft published the *Sunday Critic* for two years. It succeeded the *Sunday Mirror* mentioned above.

The *Sunday Republic* was started in December, 1887; Charles H. Vary, editor, and W. S. McNair, assistant editor and business manager.

The *Sunday Morning Star* first appeared March 6, 1881, with Jerome B. Bell as editor and proprietor, and it has since prospered under his management. He was born in Camden County, North Carolina, came to Wilmington in 1871, learned the art of printing in the office of *Every Evening*, filled various positions on that paper and was its managing editor when he embarked in his present enterprise. The *Star* at first was a six-column folio twenty by thirty inches; at the end of ten weeks it was enlarged to twenty-two by thirty-four inches, and three months later to twenty-three by thirty-eight inches, and on July 8, 1883, to its present size, twenty-five by forty inches. It is devoted to general news and literature, and aims to treat the subject of politics as news. In 1887 the paper was purchased by the Star Publishing Company.

The *People's Witness* was established December 4, 1886, by Worthington Brinckley. It is the only newspaper in Delaware published in the interests of the colored people, and is quite liberally patronized by them. It is an eight-page journal, and is published at 826 King Street. The *Standard*, the semi-monthly organ of the Delaware Conference of the Colored Methodist Episcopal Church, was issued from this office for one year, and is now published in Philadelphia.

DOVER.

The *Federal Ark*, the organ of the Federalist party, was the first newspaper printed in Dover. It was started in 1802, but ceased publication a year or two later. The *Delaware Herald* appeared in 1805, and disappeared the next year. Augustus M. Schee was its publisher. The *Record and Federal Advertiser*

was started by J. Robinson, on February 7, 1825, in the interests of John Quincy Adams as a candidate for President. The paper had a brief existence.

Samuel F. Shinn in 1822 and the following year published the *Delaware Intelligencer*. William Hufington, mayor of Wilmington in 1856, published the *Delaware Register and Farmer's Magazine* in Dover, the first number being issued in February, 1838. It was an ably-edited monthly, and ceased to exist with the close of the second volume in January, 1839. Samuel Kimmy, who published the *Register*, ran a paper in Dover for two years, and William Wharton, in 1851, began a Whig organ, called the *Sentinel*. After being published for three years, it ceased.

The *Delaware State Reporter*, with George W. S. Nicholson editor and proprietor, first appeared March 1, 1853, as a Democratic paper. It opposed the cause of temperance, and was continued by the founder until August 1, 1859, when William Sharp purchased it and conducted it a few months, when its types and presses were sold in Philadelphia. The *Protectionist* was published for a short time in Dover.

The *Delawarean*, a weekly newspaper, was established May 7, 1859, by a stock company, with James Kirk as editor. It has since been the State organ of the Democratic party, and has always been favorably known in journalism for the strength and character of its political editorials. Another feature worthy of note is its excellent mechanical execution. The paper was conducted by James Kirk until March 4, 1876, when Hon. Eli Saulsbury became proprietor, and Charles E. Fenn manager. On the 1st of January, 1884, John F. Saulsbury and John P. Saulsbury succeeded to the ownership. The latter retired from the business in January, 1887, and it is now continued by John F. Saulsbury, who was born in Mispillion Hundred. He is a prominent leader in Delaware politics. His editorials are vigorous and fearless in tone. Mr. Saulsbury has been a clerk and member of the House of Representatives. It is an eight-column folio, twenty-eight by forty-two inches.

The *State Sentinel*, a weekly, was established at Dover May 15, 1874, by Henry W. Cannon, its present editor and proprietor, who is a native of Kent County. The *Sentinel* is a representative Republican journal, and fills an important position in the journalism of the State. Originally this paper was a seven-column folio, twenty-eight by thirty-two inches. On October 2, 1875, it was enlarged to nine columns, thirty by forty-four inches. The office is in the Burton Block, corner of State and Lookerman Streets. The *Sentinel* is a well-conducted local newspaper, is edited with ability and is neat and attractive in appearance.

The *Index*, an eight-column folio, Democratic newspaper, was started July 21, 1887, under the editorship of H. C. Carpenter, with F. M. Dunn as manager. It is a bright, newsy and enterprising weekly. The office is at the northwest corner of Lockerman and Bradford Streets, Dover.

GEORGETOWN.

The *Republican and Peninsula Advertiser*, the pioneer newspaper in Georgetown, made its first appearance in 1835. William S. McCalla, who came from Philadelphia, was its editor and proprietor. About 1838 he sold it to Thomas Sipple and returned to the Quaker City, where, for many years, he published the *Episcopal Recorder*, a church journal. Thomas Sipple continued the paper for a time, when it ceased publication.

The *Super-Luminary* began its publications in the county-seat of Sussex in 1836. It published the proposals for the erection of the new jail; the next year fell a victim to "the great panic of 1837," and ceased publication.

In 1839 Henry H. Cannon started the *Georgetown Republican*, which for a short time was the only paper published in the State outside of Wilmington. In 1841 he moved his paper to Delaware's metropolis, united it with the *Sentinel* and, with John H. Barr as partner, founded the *Delaware Republican*. The history of this journal is given on a preceding page.

The *Union* originated September 11, 1863. It stood up bravely for the administration of Abraham Lincoln, and received considerable patronage from Governor Cannon. L. W. Wallazz was its first editor, J. P. McGuigan its second and William T. Crowsdale, one of the founders of the *Evening*, at Wilmington, its last. It ceased publication about the latter part of 1865.

The *Sussex Journal* was established by Colonel William Fiske Townsend, of Easton, Md., who bought the type and presses of the *Union*. The first number of the *Journal* was issued August 9, 1867. It has since exerted a commanding influence in the lower part of the State, and is a well-conducted newspaper. Colonel Townsend was editor and proprietor until the time of his death, November 24, 1879. David T. Marvel and McKendree Downham bought the *Journal* February 7, 1880, and continued it under the firm-name of Marvel & Downham, with the former as editor.

In January, 1882, J. B. Clark became editor with Mr. Marvel. On January 27, 1883, Mr. Marvel retired and Clark & Downham continued as publishers, with J. B. Clark as editor. It is an eight-column journal.

The *Delaware Democrat* was founded at Georgetown, January 7, 1882, by the Delaware Democrat Publishing Company, composed of John R. McFee, John H. Paynter, now a judge of the Superior Court of Delaware, Edwin R. Paynter and William B. Tomlinson. These gentlemen a few days before purchased the plant of the *Delaware Inquirer*, and with its types and presses began the publication of the *Delaware Democrat*, a weekly newspaper, with John H. Paynter as editor, and Edwin R. Paynter manager, Charles W. McFee acting as associate. The paper was soon enlarged and a valuable power-press substituted for

the old hand-press. In 1884 the company built a handsome building to the rear of the court-house, using the upper part for its own purposes and leasing offices on the lower floor.

In politics the paper has always been strongly Democratic, and has exerted no little influence in the county and State. Though the number of newspapers has greatly increased in the county since the *Democrat* was established, its circulation has steadily increased until the number of subscribers exceed that of the paper it succeeded.

In April, 1887, upon the appointment of John H. Paynter to the position of a judge of the Superior Court of Delaware, Edwin R. Paynter succeeded to the editorship. The paper is established upon a firm foundation, and is growing in circulation and influence.

MILFORD.

The *Milford Beacon* was founded in 1848 by John H. Emerson, afterwards editor of the *Union*, published at Denton, Md. He sold the *Beacon*, in 1851, to Colonel J. Hart Conrad, of Philadelphia. Colonel Conrad died the next year, and the paper was purchased by James B. Mahan, who previously was its foreman and assistant editor. George W. Mahan, a brother, was taken into the business as a partner, and the paper was continued by the Mahan Brothers at Milford until 1859, when its name was changed to the *Diamond State* and the office removed to New Castle, where the paper was continued under the same management.

The *Sussex Journal* was started in South Milford in 1856, but did not succeed. In 1857 the name of the *Beacon* was revived in a newspaper started by a Mr. Chambers, from Maryland, and he, soon after its inception, sold it to W. W. Austin, who discontinued it in a few months. In the same year, 1857, two other papers were started in Milford,—the *Peninsular News and Advertiser*, by James D. Prettyman, and the *Observer*, by Truitt & Ennis. Three newspapers seemed to be more than were needed, and the result was the discontinuance of the *Beacon* and the *Observer* and the survival of the *News and Advertiser*. The latter had a stormy and varied existence. It was an ultra Republican journal, favored the abolition of slavery, and was the first organ of the Republican party published in the State of Delaware. In answer to a call a public meeting was held to decide whether or not the community would allow the paper to continue. A committee was appointed by the meeting to wait upon Dr. John S. Prettyman, the editor, and urge that he modify the tone of his paper. He, however, continued it in the same spirit. Its ownership, however, changed hands several times, E. P. Aldred, James B. Mahan and W. H. Hutchins succeeding each other as proprietors until it was discontinued, after an existence of six years. The *Milford Statesman* was published for a short time by Mr. Briggs, of Wilmington.

In 1867 James B. Mahan again came to the front

and started the *Milford Argus*. In a few months it was sold to the Revell Brothers, who published it about a year when J. Lowery & Co. purchased it and changed the name to *Our Mutual Friend*. In 1870 it passed into the hands of General Levi Harris & Co., who ran it a year, when Dr. John S. Prettyman purchased the whole establishment, and in 1872 started the *Peninsula News and Advertiser*, associating with himself Dr. W. C. Davidson as editor, and William P. Corsa as publisher. Dr. Prettyman continued to control it for several years, and in January, 1880, sold it to his son, Harry H. Prettyman, who, in March, 1880, took in Henry Harris, of Michigan, as a partner. In August, 1880, Henry L. Hynson bought Prettyman's interest and it was published by Harris & Hynson until November, 1881, when H. L. Hynson became sole proprietor, by whom it is at present ably conducted. Its circulation and patronage is continually increasing, being a live and popular journal.

The *Milford Chronicle* was started October 1, 1878, by Julius E. Scott and Theodore Townsend. On January 1, 1881, Mr. Scott sold his interest to William P. Corsa, and it was published by them until 1883, when Wm. Corsa went out and R. H. Gilman, as a representative of the Democrat party, was taken into partnership. This plan did not work satisfactorily, and in 1886 Mr. Townsend purchased a controlling interest in it, since which time it has been independent in politics. The *Chronicle* is a live, progressive newspaper, and influential in the community where it circulates.

William P. Corsa was prominent in 1873 in stimulating the Delaware Fruit-Growers' Association, from which the fruit drying and evaporating business, which has so advanced Milford's prosperity, was greatly extended. Mr. Townsend was a traveling correspondent for New York and Philadelphia papers before he came to Milford. He has served four terms as member of the Council.

SMYRNA.

The *Delaware Star*, first issued in 1832, and continued but a short time, was the pioneer newspaper in Smyrna. Mr. Mitchell was its owner. Samuel L. Jones began the *Smyrna Telegraph* in 1849. It was a fair local paper, but was discontinued within two years from the time of starting. Abraham Poulson secured the presses and type, and for three years, beginning in March, 1851, was engaged in the publication, in the same town, of the *Delaware Herald*, a temperance paper. On March 22, 1854, he sold it to his son, Thomas L. Poulson, and Robert D. Hoffeecker. In July of the same year Mr. Hoffeecker purchased the interest of his partner and changed its name to the *Smyrna Times*. Thomas L. Poulson entered the ministry, and afterwards attained success in that profession.

The *Smyrna Times*, which has since continued, was the first permanently established newspaper in the

town. It grew in public favor, with Robert D. Hoffeecker as its editor and publisher, and its circulation increased. During the Civil War it was a strong defender of the Union cause, and ardently supported the administration of President Lincoln. In 1865 Joseph H. Hoffeecker, a brother of the former proprietor, purchased the *Times* and successfully conducted it until 1877, when, on account of impaired health, he retired. Robert D. Hoffeecker then returned to the journal which he founded, and has since been its proprietor.

The *Smyrna Record* was established by F. S. Phelps, June 30, 1883, as an eight-column folio. The motto of the founder was "Our town and county first—the world afterward." The paper, as an advocate of the principles of the Democratic party, soon secured a considerable circulation, and nine months after the first issue it was enlarged to a nine-column sheet, and its circulation extended. In May, 1886, the paper passed by sale from its founder into the hands of G. B. Taylor and H. D. Boyer, and under the editorship of the former has pursued the general policy mapped out by its founder. Mr. Boyer withdrew from the business management in the following September, and it has since been under the exclusive control of Mr. Taylor. With the first issue of 1887 it was changed to an eight-page, six-column paper of the standard size, presenting an excellent typographical appearance. The patronage of the paper has been excellent, being derived from a town of three thousand inhabitants, and a surrounding country thickly populated by citizens of more than average means and intelligence.

NEW CASTLE.

The *Gazette*, founded in 1836 by Enoch Camp, and the *Diamond State and Record*, established a few years later by George W. Mahan, were the first newspaper venture, in the town of New Castle. Neither one was continued more than a year or two.

The *New Castle Star* was founded by Joseph C. White, who still retains an interest. Samuel H. Black is associated with him.

NEWARK.

The *Saturday Visitor*, the pioneer newspaper in Newark, was first issued February 11, 1876, by J. H. Rowleson, who, after the sixth issue appeared, decided to call it the *Newark Record*. The centennial year had not quite ended when J. M. Armstrong, of New York, bought it. He sold out to Samuel D. McCartney, of Philadelphia, who preferred the name of *Ledger*. Scarce a year had gone by after the change, when L. Theodore Esling succeeded to its ownership. He continued it as the *Newark Ledger*, of which he was the editor and proprietor until his death, in January, 1881. It was suspended for three months, and the right and title were purchased by Major F. A. G. Handy, of Washington. His brother, Egbert G. Handy, was placed in charge, and four months later, changed

its name to the *Delaware Ledger*, its present name. Under this management it was published for two years, and then purchased by the present editors and proprietors, J. M. & L. K. Bowen, who came to Newark from Elkton, Md. They changed it from an independent to a Democratic newspaper, disposed of the old type and presses and refitted their printing-office. In 1835 they obtained a steam printing-press.

The *Delaware Good Templar* first appeared in April, 1861, as a four-page monthly, devoted to the interests of the Grand Lodge of Independent Order of Good Templars.

At the annual session of the Grand Lodge at Felton, on the 20th and 21st of October, of the same year, the *Good Templar* was adopted as its official organ.

In April, 1871, the sheet was enlarged to eight pages and a share of its columns appropriated to the W. C. T. U. of Delaware and its auxiliaries. This is the only paper published exclusively in the interest of temperance in the State. It is published at the *Ledger* office in Newark, and is edited by Fred. E. McKinsey.

MIDDLETOWN.

The first newspaper in the southern part of New Castle County was the *Middletown Transcript*, established January 4, 1868, by Henry & Wm. D. Vanderford. It continued a joint enterprise till March 21st of that year, when Henry Vanderford became the sole owner and editor. On January 1, 1870, Charles Hamilton Vanderford became the proprietor. He was sole owner till June 29, 1872, when he associated with himself Edward Reynolds, who, September 28th of the same year, purchased the entire interest. W. Scott Way, the next editor, bought the newspaper and took charge of the office November 1, 1877, and continued until June 27, 1885, when he sold out to John B. & Alexander L. Moreau, the present owners and editors.

On December 25, 1884, a job printing office was opened in Middletown, by C. J. Freeman and F. W. Reeve. In January following they decided to establish the *New Era* in connection with their job work. The first issue appeared January 29, 1885. The paper was conducted by them till May, 1886, when F. W. Reeve sold his half-interest to M. W. Weber, and since that time Freeman & Weber have been editors and proprietors.

SEAFORD.

In 1869 Donoho & Stevens founded the *Seaford Record*, at Seaford. It was neutral in politics. Mr. Stevens sold his interest to his son, who, with Mr. Donoho, continued to publish it, changing the name to the *Sussex Record*. In 1872 it was sold to a Mr. Kavano, of Maryland, who changed the name to the *Sussex Democrat*, and afterwards to the *Seaford Democrat*. The paper soon suspended.

In 1882 the *Seaford Enterprise* was established by Rev. C. W. Teasdale, and Charles D. Judson was placed in editorial charge. Mr. Teasdale sold out to

Samuel D. Gordon, who was proprietor one year, when the paper reverted to Mr. Teasdale, who next disposed of his interest to Ulysses S. Roop. The name was changed to the *Seaford Item*, but Mr. Teasdale again came into possession and removed the plant to Vienna, Maryland.

On the 3d of July, 1886, J. E. Griffenberg began the publication of the *Delaware Weekly Review* at Harrington, but at the end of seven weeks transferred the office to Seaford, where the *Review* has since been published. The first issue at Seaford bears date August 21, 1886. Mr. Griffenberg was editor and proprietor until February, 1887, when the ownership passed into the hands of *Review* Publishing Company, of which Mr. Griffenberg is managing editor. The paper is independent in politics, and has much patronage.

DELAWARE CITY.

On July 2, 1887, the *Delaware City News* made its first appearance. The paper is published by the News Publication Company and is edited and managed by Chas. W. B. Marshall.

LEWES.

The *Breakwater Light*, a seven-column folio, was first issued August 12, 1871, by its present editor and proprietor, Dr. I. H. D. Knowles. It is the only newspaper published in the town of Lewes, and is independent in politics.

HARRINGTON.

Joseph E. Horney and Robert Downs, July 7, 1883, established the *Harrington Enterprise*, a seven-column folio. It is conducted by B. Howard Johnson and is Democratic in politics.

LAUREL.

The *Laurel Gazette*, the only paper ever published in the town of Laurel, was established August 15, 1885, by Samuel D. Gordon and C. W. Kinney. On January 9, 1886, it was sold to the Laurel Publishing Company. Joseph F. Smith was made business manager and Samuel D. Gordon editor. October 12, 1887, Samuel D. Gordon purchased the entire interest and has since been editor and proprietor.

LITERARY MEN.—Delaware has not been unpropitious in the number of her sons who have made lasting names as workers in journalism and general literature. It is true that the majority of her native writers have achieved their renown outside the State in which they were born, but in each instance their training and work is in some manner connected with the soil and the institutions of their birth-place. Her journalism has been notably a training-school for professional newspaper men who have achieved distinction in broader fields, but who never forgot that they began their careers in the Diamond State and received there their most useful tuition and experience. The authors and journalists whose names have become famous make a goodly roll, and sketches of some of their lives and accomplishments are herewith appended:

Rev. Dr. Samuel Davies, a prominent Presbyterian divine and scholar, was born in New Castle County, November 8, 1723. His father, Davis Davies, a pious Welsh farmer, gave him a careful religious education and he was subsequently sent to Mr. Blair's school at Fogg's Manor. He was licensed to preach July 30, 1746, and ordained February 19, 1747. He officiated at various points in Hanover County, Virginia, where dissenters of the established Episcopal Church of that section, being objectionable to the civil authorities, his success led to a controversy between Dr. Davies and the King's attorney-general, as to whether the English act of toleration extended to Virginia, which question was subsequently decided in the affirmative. In 1753 Dr. Davies was sent with Gilbert Tennent to England to solicit aid for the College of New Jersey, in which labor he was successful, and preached with much acceptance in England and Scotland. He returned in February, 1755, and resumed his ministerial work. The same year the First Virginia Presbytery was established mainly through his efforts. On July 26, 1759, he succeeded Jonathan Edwards as president of New Jersey College. His sermons were published in London, in 1767, in five volumes, and ran through several editions in Great Britain and this country. Dr. Davies was an elegant preacher and also wrote poetry of considerable merit. He died in Princeton, N. J., February 4, 1761. His son, Col. William Davies, left New Jersey College in 1755, and entered the army as an officer, enjoying the esteem of General Washington. He was an efficient sub-inspector under Steuben in 1778. He was afterwards in the auditor's office, Richmond, and removed to Sussex County, where he died.

Rev. James Anderson, prominent among the clergy of New Castle in the early part of the eighteenth century, was born in Scotland November 17, 1678. He was the first Presbyterian minister of New York. He was ordained by the Irvine Presbytery November 17, 1708, with a view to his settlement in Virginia, but he located at New Castle, where he remained until October, 1717, when he took charge of a new church in New York City. He was installed in August, 1727, in Donegal, Pa., where he died July 16, 1740.

Isaac Collins, a prominent publisher, was born in Delaware, February 16, 1746, and died in Burlington, N. J., March 21, 1817. He acquired his trade as printer and removed to Philadelphia. In 1770, having been appointed printer to George III., he went to Burlington. In 1778 he removed to Trenton, and published the first quarto family Bible in this country. In 1796 he removed to New York, but returned to Burlington in 1808. He was for several years one of the governors of the New York Hospital, and several of his sons became prominent as New York booksellers and publishers.

Rev. James Patriot Wilson, D.D., a writer of considerable note, a lawyer and a divine, was born in Lewes, February 21, 1769. He was a graduate in

1788 of the University of Pennsylvania, which institution conferred on him the degree of D.D. in 1807. Dr. Wilson studied law, was admitted to the bar in 1790, and became distinguished in his profession. He afterward studied theology, and from 1806 to his death was pastor of the First Presbyterian Church. Among his contributions to literature were published "Lectures on the Parables and the Historical Parts of the New Testament," 8vo., 1810; "Introduction to Hebrew," 1812; "Essay on Grammar," 1817; "Common Objections to Christianity," 1829; "Hope of Immortality," 1829; "Primitive Government of Christian Churches," 1833, etc. Dr. Wilson died in Bucks County, Pa., December 10, 1830.

Dr. John M. Harvey, celebrated as a poet, was born in Sussex County March 9, 1789. He was the second son of Thomas Harvey, of Revolutionary fame. The family emigrated to Tennessee in 1791, and subsequently removed to Louisiana. Dr. John Harvey settled in Bardstown, Ky., where he died January 15, 1825. After the death of his wife, in 1818, he went to Europe, and, receiving a naval appointment, spent several years at Buenos Ayres. He then conducted a political paper at Savannah. Of his poems, "Chrysellina," a fairy tale, appeared in 1816. Other productions were published in the *Western Literary Journal*, and among them "Echo and the Lover" obtained a wide celebrity.

Elizabeth Margaret Chandler, celebrated in literature by reason of her poetical works, was born at Centre, near Wilmington, December 24, 1807. She was the daughter of Thomas Chandler, a Quaker farmer, and was educated at the Friends' school in Philadelphia. Her poetical talent developed early, and at eighteen years of age she wrote "The Slave Ship," which secured the prize offered by the *Casket* magazine. The majority of her subsequent productions were first published in a Philadelphia anti-slavery periodical called the *Genius of Universal Emancipation*. All of her poetical works, with a memoir by Benjamin Lundy, were published in Philadelphia in 1836. She removed to Tecumseh, Michigan, in 1830 and died November 22, 1834.

James Barton Longacre, the distinguished engraver, was a descendant of the early Swedish settlers on the Delaware. He was born in Delaware County, Pennsylvania, August 11, 1794. He served his apprenticeship as historical and portrait engraver with Murray of Philadelphia, and from 1819 to 1831 was engaged in illustrating some of the best works issuing from the American press. From 1834-39, with James Herring, of New York, he published four volumes of the "National Portrait Gallery of Distinguished Americans," which he afterward completed alone, many of the portraits being from Mr. Longacre's drawings from life. During the last quarter century of his life he was engraver at the United States Mint, and all the new coins issued during that period were made by Mr. Longacre from his original designs. He was commissioned by the Chilean government to

superintend the remodeling of the coinage of that country, and completed the task a year before his death, which occurred in Philadelphia January 1, 1869.

Rev. Morgan Edwards, A.M., a Welsh Baptist, became pastor of the First Baptist Church of Philadelphia in 1761, upon the recommendation of the celebrated John Gill, D.D., of London. He resigned this pastorate in 1771, and removed to Pencader Hundred, near Newark, Del., where he lived until his death, January 28, 1795. He was the founder of Brown University, in Rhode Island, and was a deeply learned scholar. He was the pioneer Baptist historian in this country, and traveled extensively in collecting what he called his "Materials toward a history of the Baptist Churches in all the colonies." It was to have been completed in twelve volumes. The first volume was issued in 1770, and treated of the churches in Pennsylvania. The next volume, which was upon the New Jersey Baptists, was issued in 1792. His history of the Rhode Island Baptists was published in 1867, by the Rhode Island Historical Society. Volume iii., which contains the history of the early Baptists in Delaware, was published in 1885, by the Pennsylvania Historical Society in its *Magazine*, and ran through two numbers, with an introduction by Hon. H. G. Jones. This volume is also published separately.

The most of Morgan Edwards' historical writing was doubtless performed during his twenty-four years' residence in Delaware. The original sheets of his "History of the Delaware Baptists," in possession of the American Baptist Historical Society, 1420 Chestnut Street, Phila., is like all his manuscript, a model of exactness and beauty.

Rev. Abel Moragan, a Baptist divine, born at Welsh Tract, Del., in 1713, was one of the ablest men of his day. He wrote some of the most important documents published by the Philadelphia Baptist Association. In 1742 he accepted the challenge from Rev. Samuel Finley, afterwards president of Princeton College, N. J., to discuss the baptismal question. After the discussion Mr. Finley wrote "A Charitable Plea for the Speechless," to which Mr. Morgan replied in his "Anti-Pædo-Baptism," or Mr. Finley's "Charitable Plea for the Speechless" examined and refuted; the "Baptism of Believers Maintained and the Mode of it by Immersion Vindicated," which was printed by Benjamin Franklin, in Philadelphia, in 1747, now sells for twelve dollars or more.

Philip Hughes, a noted Baptist minister of Delaware and Virginia, came to Wilmington about 1785, where he published a book on Baptism and another of Hymns, some of which were of his own composition.

Rev. David Jones, A.M., a chaplain in the American army during the Revolution, born in New Castle Co., Delaware, in 1736, and ancestor of Hon. H. G. Jones, of Philadelphia, was the author of several works. There was a journal of two visits made to

some of the Indian nations west of the Ohio River in 1772 and 1773, published in 1773, and reprinted in New York by J. Sabin in 1865; a treatise on "The Work of the Holy Spirit;" a treatise on "The Laying on of Hands," and another on the same subject in reply to Rev. Samuel Jones, D.D., and to Peter Edwards' "Candid Reasons Examined."

Gouverneur Emerson, M.D., was born in Kent County, Delaware. In 1818 and the two years succeeding he made a long voyage at sea as surgeon of a merchantman. He practiced medicine with success in Philadelphia. He possessed a decided literary taste, writing mostly on agricultural, medical and statistical subjects. He prepared a series of tables exhibiting the rate of mortality in Philadelphia and its causes during thirty years from 1807. Among his contributions to the literature of agriculture is the "Farmers' and Planters' Encyclopedia of Rural Affairs," an octavo of 1300 pages, replete with valuable information. He was the first to introduce Peruvian guano in the Atlantic States, and to recognize the great advantages of the phosphatic and other concentrated fertilizers, proving their good effects on his own extensive farms in Delaware. His last work was a translation from the French of De Play's remarkable treatise on "Organization of Labor." Dr. Emerson succeeded in making interesting everything he wrote. He was a member of the American Philosophical Society, the Academy of Natural Sciences, the United States Agricultural Society, the Philadelphia Horticultural Society, the United States Pomological Society and the Franklin Institute of Philadelphia. He died at his residence on Walnut Street, Philadelphia, in July, 1874.

Benjamin Ferris, of whom a sketch appears in the "History of Wilmington," wrote a "History of the original Settlements on the Delaware," a work of three hundred and twelve pages, containing a vast fund of interesting and valuable historical information, obtained by several years of diligent research. It was published, in 1846, by Wilson & Heald. Copies of the work are now very rare.

Hezekiah Niles was perhaps the most useful contribution Delaware ever made to the ranks of the journalists and historians of the United States. If it were ever attempted to collect the records of this nation for the middle period of the first half of the present century without the aid of *Niles' Register*, the work would be lamentably incomplete and unreliable. As an industrious, painstaking and accurate gatherer of the public events of his time he has never been surpassed in the field of journalism. He was born October 10, 1777, in Chester County, Pa., at a farmhouse near Jefferis' Ford, to which his parents had fled from Wilmington during the campaign in which occurred the battle of the Brandywine and the occupation of the city by the British. He was educated in Wilmington, and learned the art of printing as an apprentice. It is a tradition that before he had served his time he could set type faster and present a

cleaner proof than any other compositor in America. In 1800 he became the junior member of the firm of Bonsall & Niles, book publishers, at Wilmington, but they did not meet with financial success and Mr. Niles abandoned the composing stick and the printer's form for steady work with his pen. The firm was, in fact, wrecked on their re-publication of "The Political Writings of Governor John Dickinson," in which they invested a large amount of money, and failed to obtain any adequate return. Mr. Niles entered journalism as the author of humorous papers entitled "Quill-driving, by Geoffrey Thickneck" and edited a daily paper in Baltimore for a short time. On September 7, 1811, he began at Baltimore the publication of *Niles' Register*, a weekly paper in which was concisely and faithfully epitomized the live news of the time. He retired from the management of the *Register* on September 3, 1836, turning it over to the sole control of his son, William Ogden Niles, who had been associated with him since 1827. On September 2, 1837, the son removed his publication office to Washington and issued the weekly there under the name of *Niles' National Register*, but on May 4, 1839, it was returned to Baltimore. Hezekiah Niles had become disabled by paralysis and returned to Wilmington, as he said, "to die and be buried with his kindred." His death took place April 2, 1839, and on October 19th his widow sold the *Register* to Jeremiah Hughes who continued to publish it until February 26, 1848, when it ceased to exist. It was resumed in Philadelphia in July, 1849, under the charge of Charles Beatty, but it was not a success. William Ogden Niles died in Philadelphia, July 8, 1858. Hezekiah Niles also compiled a valuable work entitled "Principles and Acts of the Revolution." He was one of the most potent advocates of the American system of tariff protection to home industries, and his writings are still quoted. His labor was often performed in conjunction with his friend, Matthew Carey, of Philadelphia.

Dr. Cornelius G. Comegys, known to literature by his "History of Medicine," published in 1856, was born in Delaware and removed to Cincinnati, where he was Professor of Institutes of Medicine in Miami College. His father was Gov. Cornelius P. Comegys.

Dr. Thomas B. Wilson, the distinguished naturalist and scientist, who died at Newark, March 15, 1865, was born in Philadelphia January 17, 1807. He was educated at the Friends' School in Philadelphia and in England. In 1822 he studied pharmacy, and after devoting several years to it applied himself to geology. In 1828 he adopted medicine as a profession and after graduating, in 1830, went to Paris and continued his studies, taking up also zoology, botany and geology. He afterward attended a medical course in Dublin, and returned home, and, owing to failing health, soon applied himself to botany and ornithology as a means of relaxation and recuperation. In 1832 he removed to Chester County and remained there with his brother several years and subsequently bought a farm in that section. He devoted himself assiduously to

natural sciences, and secured at home and abroad the valuable collections of plants, birds, insects, etc., which make him justly celebrated and famous. In 1841 he removed with his brother to Newark, where he settled permanently, continuing his scientific researches and contributed both time and money to them. He was one of the principal benefactors of the Academy of Natural Sciences of Philadelphia and of the Entomological Society of the same city, and was chiefly instrumental in providing their collections, library and buildings. His contribution of birds to the Academy of Natural Sciences aggregated twenty-eight thousand specimens, nearly all of which were mounted. He also donated extensive collections of minerals and fossils to the same institution. Of the fifty thousand insects in the Entomological Society, the majority were donations from Dr. Wilson. He also contributed largely to the Episcopal Church building in Newark. Dr. Wilson's remains were taken to Philadelphia for interment and his funeral was attended by some of the leading scientists of this country. He was one of the most prominent naturalists of his day, laboring zealously to advance the peculiar branches in which he was so deeply interested and expending liberally of his ample means in prosecuting the work and assisting the institutions founded to perpetuate its results.

Rev. Richard B. Cook, D.D., pastor of the Second Baptist Church, Wilmington, is the author of the following works: "The Early and Later Baptists," being a history of the Baptists of Delaware from 1703 to 1880, of 156 pages, illustrated, and which reached a circulation of 1000, and is published by the American Baptist Publication Society, Philadelphia; "The Story of the Baptists," being a popular general history of the Baptists, of 450 pages, with over 100 illustrations, and which, in three years, has reached a circulation of 20,000 copies.

Besides, Dr. Cook is author of smaller productions, such as "Baptist Leadership in Education;" "History of the Second Baptist Church, Wilmington, for the first fifty years of its existence;" "History of the Baptists in Delaware;" in the "Encyclopedia of Delaware," and several sketches in Dr. Cathcart's "Baptist Encyclopedia."

Rev. Alfred Lee, D.D., late bishop of Delaware, and formerly rector of St. Andrew's Church, Wilmington, was born in Cambridge, Massachusetts, September 9, 1807. He studied law and practiced in Norwich, 1831-33. In the latter year he entered the General Theological Seminary in New York, and was ordained deacon in June, 1837, and priest a year later. From September, 1838, to September, 1841, he was pastor of Calvary Church, Rockdale, Pennsylvania, and on October 12, 1841, was consecrated bishop of Delaware. Bishop Lee wrote a "Life of the Apostle Peter," in 1852; "Life of St. John," and "Treatise on Baptism," 1854; "Memoir of Miss Susan Allibone," 8vo., 1856; and "The Harbinger of Christ," 12mo., 1857. He died in April, 1887.

Isaac Lea, LL.D., the distinguished author and naturalist, was born in Wilmington, March 4, 1792, of Quaker ancestry. At the age of fifteen years he was placed under the care of an elder brother in Philadelphia and devoted his leisure to the collection and study of fossils and minerals. In 1815 he became a member of the Philadelphia Academy of Sciences, and soon after published his first paper in the journal of the academy, describing the minerals in the neighborhood of Philadelphia. He married a daughter of Matthew Carey, and from 1821 to 1851 was associated with Mr. Carey in the publishing business. In 1827, Mr. Lea began a series of memoirs on new forms of fresh water and land-shells, which were continued for many years. In 1832 he visited Europe and the following year published "Contributions to Geology," describing two hundred and twenty-eight species of tertiary fossils from Alabama. In December, 1858, he was elected president of the Philadelphia Academy of Natural Sciences and was a member of many scientific organizations of America and Europe. He also published, in 1851, "Description of a new genus of the family of Melaniana," and in 1852, "Fossil footmarks in the red sandstones of Pottsville," and "Synopsis of the family of Naiades." Allibone contains a list of fifty-five of Dr. Lea's publications.

George Alfred Townsend, the active newspaper writer and author, was born on Market Street between Front and the Court-House Square, Georgetown, Del., January 30, 1841. He was the son of Rev. Stephen and Mary Milbourne Townsend, who were of one of the earliest peninsula families, which probably came from Virginia to Somerset and Worcester Counties, Md., early in the seventeenth century. One of Sir Walter Raleigh's "Adventurers" for Virginia in 1620, as set down in Captain John Smith's history, was "Leonard Townson," and the shipping lists to Jamestown of about the same date mention John and Richard Townsend as having embarked.

Rev. Stephen Townsend was born in what is called the Forest, between Princess Anne and Snow Hill, in 1808. He turned from the carpenter's business to become a Methodist minister, and filled the pastoral relation in almost every county of the whole peninsula, dying in Philadelphia, August, 1881. He graduated in medicine at the age of forty-eight and also earned the degree of Doctor of Philosophy as a student in the Pennsylvania University at the age of seventy. His wife died in 1868, aged sixty-six. She was a woman of strong will and great local acumen. They are interred at South Laurel Hill Cemetery, Philadelphia, in Mr. Townsend's lot, where is also an inscription commemorative of Dr. Stephen Emory Townsend, their oldest son, killed in the Nicaraguan War, 1856. The third and youngest child,—all sons,—Dr. Ralph Milbourne Townsend, married Ida Hollingsworth, of Wilmington, Delaware, daughter of the

eminent ship-builder, and lies interred in the Hollingsworth vault, Brandywine Cemetery.

George Alfred Townsend moved with his itinerating minister father till he was fourteen years old, and attended the academic departments of Washington College, Chestertown, Md., and of Delaware College, Newark. After 1855 the homestead was in Philadelphia, his mother ceasing to travel, and Mr. Townsend graduated at the Philadelphia High School in February, 1860, and went upon the daily newspaper press next day.

At the school he had published and written for newspapers, and he commenced to compose in prose and verse at the age of fourteen. The local coloring of the Delaware peninsula affected his work for years, and in 1880 he collected "Tales of the Chesapeake" which contains the Delaware tales of "The Ticking Stone" and "The Big Idiot," the latter a painstaking picture of old New Castle in the time of the Dutch, the former a psychological tale of the White Clay Creek country. In the same book is the long colonial poem "Herman of Bohemia Manor."

Much earlier than this Mr. Townsend had written "Swedes and Finns," "John Dickinson," "Arnold Naudain," and other Delaware ballads.

In 1869 he delivered the college poem at Delaware College, showing an accurate recollection of the minutest scenes and characters there, though he had been but ten years old when at Newark Academy. In 1880 he visited General Torbert and the venerable Mrs. Richards at Georgetown,—the latter present at his birth,—and recited the Fourth of July ballad "Cæsar Rodney's Ride." In 1884 Mr. Townsend wrote the historical novel with the quaint title of "The Entailed Hat, or Patty Cannon's times," a work of great imagination and historical construction, every locality of which was visited to insure freshness in the picturing; it is the topographical and antiquarian romance of this peninsula, the vivid characters being passed through Seaford, Laurel, Georgetown, Lewes, the great Cypress Swamp, Dagsborough, Rehoboth Beach, Dover and Wilmington. The subject of the story is the kidnappers, who stole free people of color out of Delaware as long as slavery had a legal and commercial existence, and it contains sketches of John M. Clayton, Jonathan Hunn and Thomas Garrett.

Literature has been the industrious by-play of Mr. Townsend's comprehensive newspaper life of nearly thirty years, in which he has been engaged by every journal and publication of means and enterprise in the land. Commencing in the *Philadelphia Inquirer* and the *Press*, he was the first to rehabilitate local reporting and editing in the Quaker City. At the breaking out of the Civil War he became the youngest and most cultivated of the war correspondents, first for the New York *Herald* and afterward for the New York *World*. In the latter paper his battle of Five Forks, closing scenes about Richmond, and letters on President Lincoln's murder, created such a furor that he was called to lecture all

over the country; and has lectured at intervals ever since and delivered public addresses before the Army of the Potomac Society, Dickinson College and many other institutions. For almost twenty years he reinvested his earnings in foreign and home travel, books and experience, until he settled down in New York, at the age of thirty-nine, master of every department of his craft, from political and physical correspondence to *belle lettres*. He has made six voyages to Europe, reported the war of 1866 between Prussia and Austria, has crossed the American continent and British America three times and visited every State and Territory in the Union, and the West Indies. In 1862 he was writing for the *Cornhill Magazine*, and other publications in London. Nearly every great public event in American recent history has passed under his eye. For the past eighteen years his newspaper engagements have mainly been in the great West, where his pseudonym of "Gath" is better known than George Alfred Townsend.

In 1886, Mr. Townsend published a sequel to the "Entailed Hat," called "Katy of Catoctin, or the Chain-breakers," a story of the John Brown raid and of the Civil War, located in the South Mountain country of Maryland, where he has built his country-house and ultimate family-seat, called "Gapland." It stands on the old battle-ground of Crampton's Gap, and consists of large and picturesque stone buildings, at an elevation of one thousand feet above the neighboring Potomac River and valleys.

Mr. Townsend has published several other volumes, as "Campaigns of a Non-Combatant," 1865; "The New World Compared with the Old," 1869, 750 pages; Poems, 1870; "Lost Abroad," a story, 1871; "Washington Outside and Inside," 1873; "Bohemian Days," tales, 1881; "Poetical Addresses," 1883; "President Cromwell," an historical drama, 1885. He has nearly ready to issue, "Tales at Gapland," and "Dr. Priestley, or the Federalists," a novel. No journalist in the country disconnected from proprietary ownership in the journals has been as generally employed, as well rewarded or has occupied so many fields. The qualities of his writings are their informing power, breadth and fertility of treatment, boldness of depiction, temerity in the face of clamor, sympathy for the beaten and poetical quality. His newspaper work is nearly all dictated to shorthand writers, and he has been known to prepare twelve thousand words of copy for the press in one day.

Mr. Townsend married, in 1865, Miss Rhodes, of Philadelphia, and has two children and two grandchildren, while himself still under forty-seven years of age.

Felix O. C. Darley, the artist, who resides at Claymont, Delaware, was born June 23, 1822. At an early age he was placed by his parents in a mercantile establishment, where he devoted his leisure to drawing, and, receiving from the publisher of the *Saturday Museum* a handsome sum for a few designs,

he applied himself wholly to that pursuit. For several years he was employed by large publishing houses in Philadelphia, and soon acquired a distinguished reputation. The series published in the "Library of Humorous American Works" was very popular in the Southern and Western States. In 1848 he removed to New York, where he illustrated "The Sketch Book," "Knickerbocker," etc. He had previously made a series of designs in outline from Judd's novel of "Margaret," which were published in 1856.

The committee of the American Art Union commissioned him to illustrate in similar style Irving's "Rip Van Winkle" and his "Legend of Sleepy Hollow," both of which are highly creditable productions. Offers were made to him to settle in London, which he declined. He has also been engaged in the preparation of vignettes for bank-notes, and in illustrating Cooper's works; has executed the "Massacre at Wyoming," and four other Revolutionary pieces of merit, and has contributed designs to Irving's "Life of Washington," Dickens' and Sims' novels. Another of his works is an illustration of the wedding procession in Longfellow's poems of "The Courtship of Miles Standish." For Prince Napoleon, when in New York, he executed four drawings illustrative of American life—"The Unwilling Laborer," "Repose," "The Blacksmith's Shop" and "Emigrants attacked by the Indians." Among his pictures of the late Civil War are "Giving Comfort to the Enemy" and "Dahlgren's Charge at Fredericksburg." He married the daughter of Warren Colburn.

Henry Lea Tatnall, justly called the "Father of Wilmington Art," was born in Brandywine Village, Del., in the old historic Tatnall mansion, December 31, 1829. He was of the fifth generation in direct line of descent from Robert Tatnall, of Leicestershire, England, who died in his native land in 1715. The widow, with her five children, emigrated to Pennsylvania in 1725. Edward Tatnall, the youngest of these children, was married, in 1735, to Elizabeth Pennock, in Friends' Meeting, at London Grove, Chester County, removing to Wilmington as their future home. Joseph Tatnall was the third of five children by this marriage, and the grandfather of Henry Lea Tatnall, and the first of the name to engage in the milling business on the Brandywine at Wilmington, being also the first president of the Bank of Delaware. He was married, in 1765, to Elizabeth Lea. Edward Tatnall, the sixth of their seven children, was born in 1782, and married, in 1809, to Margery Paxson; and the subject of this sketch was the eleventh of twelve children by this marriage.

Being of Quaker parentage, he was educated according to the custom of Friends at Westtown Boarding-School, in Chester County, an institution exclusively their own, receiving a plain but thorough and substantial education, as Friends deemed it not only inexpedient but unnecessary to

J. H. Taylor

A. S. Pataullo

give their children anything beyond that, trusting very properly to the home training and influence to further develop mental and moral culture. After leaving school he entered the celebrated flour-mills of Tatnall & Lea as clerk, where he remained but a few months, on account of the dust giving him asthma. It was there he accidentally picked up an old violin, belonging to a colored man employed in the mill, and played two or three tunes upon it, without ever having received any instructions, or being aware himself that he could do so. This was the first intimation of the hidden talent which was destined to perform such an important part, later in life. He was of a very inquisitive turn of mind, determined always to know the whys and wherefores of everything. His spare moments in early life were not idly spent. It was one of his pastimes to frequent the shipyards, opposite the mills on the Brandywine, where, with his knife, he would sit and chisel model after model. He made a perfect model of a ship, rigging it out correctly, and even manned it with little wooden sailors, which is in possession of his family at the present time.

Leaving the mill, he turned his attention to farming, and took great pleasure in agricultural pursuits. In 1851 he married Caroline Gibbons, daughter of Doctor William and Rebecca Donaldson Gibbons, and the youngest of fourteen children. In 1856 they left the country and moved to Wilmington, residing for a few years on West Street, where they purchased the old Gibbons mansion, and the square upon which it stood, known as "Vernon Place." At the time the house was built there were but two others between it and Market Street, and it commanded an uninterrupted view of the Delaware River from New Castle to Edgemoor. Mr. Tatnall engaged in the lumber business successfully for some years, identifying himself with the business interests of the city. Socially, he was most genial, bright and hospitable. His individuality was most pronounced, and his attachments strong and lasting. His good fellowship was ever apparent and the enthusiasm, frankness and openness of his nature, with his entertaining originality in conversation, made him a welcome guest everywhere, and drew about him a large circle of warm friends. He cultivated his musical talent, which showed itself in early life, entirely himself, never having taken a lesson, and became a most proficient performer on the violin, accompanying his children, upon whom he bestowed a liberal musical education upon the piano, organ and other instruments, realizing the safeguard he was throwing around them, by leaving no stone unturned to make the home the most attractive spot on earth to them. Besides this, he published many original compositions, and set to music several campaign songs. His celebrated "Rail Splitter's Polka," composed for the Lincoln campaign, was played by all the bands of the North at that time. His residence at that period was opposite the United States Hos-

pital Tilton, and it was always thrown open with its grounds to the sick and wounded soldiers, while many a poor home-sick fellow's heart was cheered by his hospitality and the sweet tones from his violin.

When about forty years of age he had the opportunity of seeing Philadelphia's noted artist, Hamilton, at work on a marine view in his studio, and was struck with the magical effects produced by his brush. His criticisms of the artist's work were so intelligent that his friends encouraged him to try painting himself, which he did. Mr. Tatnall's own story of his first attempt was a strange one. Mr. George Hetzel, Pittsburg's celebrated landscape artist, was in Wilmington, at work in Rudolph's Gallery, then newly opened. Being there one day when Mr. Hetzel was absent, Mr. Rudolph playfully bantered Mr. Tatnall to compete with him in painting a picture. Mr. Tatnall demurred, saying, he knew nothing about painting, but was persuaded to try his hand. Two easels, with paints, brushes and canvas, were at hand, and each sitting down in the same sportive spirit in which the contest was projected, the work commenced. Soon after they started, Mr. Rudolph was called away, leaving Mr. Tatnall alone in the gallery. Mr. Tatnall averred he had no distinct recollection of what followed, until he seemed to awake as from a dream or trance, and found upon his easel a complete painting, a river scene with vessels under sail, and was conscious of his friend standing behind him, admiring his picture, and acknowledging himself out of the race. It was soon manifest that he had a decided genius for that branch of the fine arts, and his friends induced him to fit up a studio over his counting-house, where the intervals of business were devoted to applying himself to the study of the principles and the practice of marine and landscape painting.

His success was rapid and extraordinary, and in a few years his orders were so numerous that he turned the lumber business over to his sons and opened a studio in more commodious quarters and devoted the remainder of his life to his adopted profession. At the time of the formation of the "Delaware Artists' Association" he was elected president, unanimously. This was a faithful recognition of his talent and his services, and an assurance that around his name clustered all that exists of the earlier art aspirations of Wilmington and of Delaware, and naturally entitles him to be called the father of art in his native city and State. He has well earned the title, and it will descend to posterity, adding new laurels to a family name already shown prominence in Delaware. He was an earnest student of nature, spending the summer and autumnal months in the woods beside the murmuring brooks, watching all the varying aspects they presented under light and shadow, in sunshine and in storm. Along his beloved Brandywine, on Shellpot Creek, and at Kiamensi, and also Mt. Desert, he found beautiful landscapes, which were transferred to his canvas with great fidelity of

drawing and perspective and truthfulness of color. When asked one day how he could account for his being able to paint such pictures without ever having taken even a lesson in drawing, he replied, "I cannot answer you, except by saying, I do not do it myself—it is an inspiration." "Do you understand mixing colors, and know just what you want?" "I know nothing about them; my hand goes right to the one the picture calls for." He was ingenious in mechanics—his easel, palette, painting-box and other paraphernalia for out-door work were marvelous contrivances, affording facilities for work not obtainable by most of the painters' outfits of the present day. He died at the age of fifty-six years, just as he was taking high rank in the list of American painters, and when the highest honors of his profession seemed within his grasp. In addition to all his other attainments, he was also a natural born architect, having draughted several of the finest residences in Wilmington for his numerous friends. But his busy, useful life is ended here on earth, being crowned with the assurance left, that in another sphere of existence he will attain to an immeasurably higher, broader and grander realization of the aspirations of his inmost soul than ever could have been reached in this earthly life.

CHAPTER XXIV.

MEDICINE AND MEDICAL MEN.¹

To attempt now to trace the precise condition of medical science in the State of Delaware during the first hundred years of its history would be a fruitless task, as we have no records bearing upon the subject. It may be assumed, however, that pioneer physicians skilled in their profession who first came here were supplied with all the medical and surgical appliances known to England, Holland and Sweden at that time. An enlightened knowledge of medicine began to develop in Great Britain when the seventeenth century opened, and its fruits were shown among the most progressive of the early settlers on this side of the Atlantic. But there was a large number of the early medical men on this Peninsula who never had the opportunity of acquiring any more knowledge of their profession than was obtained from their preceptors, many of whom were comparatively, speaking, "blind leaders of the blind."

We know from what has been handed down by tradition that the faith in the curative powers of the decoctions of some venerable grandmother, were held by many to be superior to the remedies which an educated physician could pro-

vide. The fifteenth and the sixteenth centuries had given to the people some good medical works, but there were others made up of absurdities, and the latter were readily adopted by the ignorant. In Egypt, where the healing art was first cultivated, and among the Jews under Moses, the office of priest and physician were often combined in the same person, and such was the case to some extent among the early settlers on the Delaware. The pioneers brought a few medicinal herbs with them, and they were propagated in their gardens. The early settlers were familiar with the virtues and properties of these. The native plants which the American Indians applied in the curing of disease were also used. It was part of the duty of the housewife to store away each year a quantity of hore-

A DOCTOR IN THE OLDEN TIMES.

hound, boneset, pennyroyal, sassafras and well-known herbs. In every settlement there was some elderly matron of skill and experience in midwifery who attended cases of obstetrics. She was also familiar with the properties of medicinal herbs then in use and applied them in administering to the wants of the sick. When a wound was received, or a bone broken, there was often no surgeon available, and the wound was doubtless treated by unskilled hands, and left to the cool water of the brook or spring to allay the pain and inflammation; the broken bone was placed at rest in the least painful position to the sufferer, and then left to nature to cure. The few scattered skilled physicians on their arrival in this State encountered great difficulties and inconveniences in administering to the wants of the sick. There were few roads through the forests between the settlements, and no bridges across the streams. In many places the trail of the Indian was the only route for them through the wilderness, and their mode of travel was invariably on horseback. But withal, there were a number of educated men who came over and settled in Delaware, or who came here from New England. These were men whose culture was acknowledged by the better class of the people, and who gradually spread the influence of their skill and science by transmission to others, and thus laid the foundation for a more healthy and rational treatment of disease.

¹ By Lewis P. Bush, A.M., M.D.

EARLY PHYSICIANS. — Dr. Tyman Stidham was doubtless the pioneer physician within the territory now embraced in the State of Delaware. He was born in Sweden and seems to have come here with Governor Risingh, sailing from Gotenberg February 2, 1654. The vessel in which he arrived, with other emigrants, landed at Fort Casimir (now New Castle) May 21, 1654. Dr. Stidham afterwards settled at Fort Christina, now known as "The Rocks," within the present limits of Wilmington. When the Swedish rule on the Delaware was overthrown by the Dutch, in 1655, he, with others, took the oath of allegiance to the government of the New Netherlands. He acquired a large tract of land under Dutch patents which were confirmed by Governor Francis Lovelace, May 23, 1671, and a portion of Wilmington occupies the site of the original grant.

Dr. Stidham made affidavit, January 4, 1656, of the cure of some soldiers, under Captain Smetz, at Fort Christina. On February 20, 1662, William Beekman, vice-director of the West India Company, wrote from Christina that Jacob De Commer, the city surgeon, sent here from Amsterdam, Holland, had been discharged. He recommended the appointment of Tyman Stidham to the position. In a letter dated September 14, 1662, Beekman mentions him as Tyman Stidham, the surgeon. During the progress of a court trial in the fort, April 7, 1663, the record mentions the fact that "Tyman Stidham was called to bleed a man." Dr. Stidham died in 1686. He was twice married, and had several children, whose descendants are in Delaware and other States.¹

Dr. John Rhoads was an early settler at Horekill, in what is now Sussex County. On November 28, 1673, he was appointed a magistrate, and the following year was murdered by the Indians.

Thomas Spry was a physician and an attorney among the early emigrants to the lower part of New Castle County. Some of the old records designate "Doctor Swamp" and "Doctor Creek" as certain tracts of lands owned by him.² Spry's name appears on many petitions for roads and other legal records until the time of his death, in 1685.

Dr. John Des Jardins practiced medicine in what is now Kent County as early as May 15, 1675, and on that day received a patent for a tract of land on St. Jones' Creek, previously belonging to Dr. Wholebat. He died in November, 1678.

¹ Jonas Stidham, a descendant, married Mary Colebury. Their son was Isaac Stidham, M.D., who was born July 18, 1762.

² I. Cloud Elliott, of Wilmington, has in his possession Dr. Stidham's surgical case, on which is neatly inscribed the name and title of the original owner.

³ Justice John Moll, July 12, 1677, complained that Dr. Spry had without provocation, struck him with a cane. The latter apologized in open court, and was fined two hundred guilders, which Justice Moll gave to the church. On May 4, 1680, Dr. Spry presented a bill of two hundred guilders for curing the leg of Evert Brake, a poor man, and was given one hundred guilders and a cow.

James Crawford, who is called a doctor on the early assessment rolls, succeeded him.

Dr. Smith resided on a tract of land which he bought near Horekill in 1676.

Hans Peterson practiced medicine in New Castle County in 1676, and during that year Maurice Powell petitioned the court to be relieved from paying Peterson a doctor's bill of one year's standing on the plea that from the treatment administered he had lost the use of "his body, so that he could not support his wife and family." Peterson testified in his own behalf that the maltreatment was the result of a mistake. He was ordered to pay the costs of the suit and one hundred and fifty guilders damages.

Dr. Daniel Wills came to New Castle, October 5, 1677, in the ship "Marther" from Hull, England.

Dr. Thomas Wynne, a member of the first General Assembly of Pennsylvania of 1683, from Philadelphia, and became its first Speaker. He was a Quaker, and, before he came over with William Penn, had followed his profession in the city of London. He took an active part in politics, and became a resident at Lewes in 1685.

Dr. Charles Haynes, of Lewes, in 1695, was "bound over to keep the peace for using his lance to cut an arm without cause." He died in 1708.

Dr. John Stewart was sheriff of New Castle County in 1702.

Dr. Peter Clowes settled in Broadkill Hundred and was in practice there before 1735. In 1743 he was elected sheriff of Sussex County. He is not known to have left any descendants. The farm upon which he resided is now owned by Jesse E. Dodd.

Dr. Cheetwod practiced in St. George's Hundred in 1746; Dr. Reese Jones, of Christiana Bridge, died prior to 1756; Drs. Matthew McKinney, David Thomas and David Thompson during the Revolution were in Red Lion Hundred.

The following members of the Delaware regiment in the Revolutionary War were then or subsequently known as practicing physicians: Joseph Hall, Charles Ridgely, Matthew Wilson, J. Augustus Jackson, James Jones, John Miller, David Stewart, William Molleston, Thomas Macdonough, Thomas Nixon, Nicholas Way and James Rench.

Dr. Samuel Platt lived in Newark in 1772; Dr. Nathaniel Silsbee in St. George's in 1779; Dr. Robert Baynes in Mill Creek Hundred, on "the Limestone Road," in 1780. The last-named died in 1804, as did also Dr. Kithcart. Drs. Nathan Thomas and William Carpenter were in St. George's in 1797, and Henry Merritt and Henry Peterson in 1804 and Drs. John Kern and John Finney in Christiana in 1798. The latter lived in New Castle in 1758.

Dr. Nathan Thomas, April 14, 1797, inoc-

ulated four persons at Port Penn ; and seven days thereafter Fanny Riddle, one of them, was ill with the " fever of the small-pox." Her three brothers, Cornelius, Daniel and James, developed the same disease on the following day.

Dr. Robert Wiltbank was an early physician at Millboro', and died there while a member of the Legislature. Dr. William Murray lived in North East Fork Hundred in 1764, and Dr. John Derickson at St. Johnstown in 1796, and twenty years later, in 1816, Dr. Joseph Sudler, father of Dr. William Sudler, now of Bridgeville was a prominent physician. Dr. Simon K. Wilson practiced at Dagsboro', in 1825. Dr. Joseph Maull, in 1809, practiced at Broad Kill. He was the father of Dr. George Maull, who graduated in medicine in 1831. Dr. John White died at Lewes in 1829, aged fifty-four years. He practiced there a quarter of a century. Dr. Samuel A. Hall, a native of Baltimore Hundred, studied medicine with Dr. Jacob Wolfe, of Lewes, and in 1800 settled in his native place and practiced until 1853, when he died.

Dr. Henry Fisher was probably the first physician of eminence in the territory now known as Delaware. He came to this country from Waterford, Ireland, in 1725, and the vessel in which he was a passenger anchoring in the roads of Lewes, he, with several other gentlemen, went ashore for recreation. Dr. Fisher was so much pleased with the town and its surroundings that he concluded to locate there and accordingly sent for his wife to come over. The latter soon reached New Castle and journeyed thence to Lewes on horseback. Dr. Fisher obtained at once an extensive and lucrative practice and was frequently called over into Kent County, Maryland, for consultation in serious cases. He stood unrivaled in his profession and was the only regularly educated medical practitioner in Sussex during his life. Dr. Fisher repeatedly declined tempting offers, brought to him through his wide reputation, to go to Philadelphia, and remained at his home in Lewes. His residence was patterned after the English country-seats, and from its elegant construction and beauty his neighbors called it "a paradise." Dr. Fisher died in 1748, leaving a widow, two daughters and a son. The latter, Henry Fisher, was afterwards a prominent citizen and rendered valuable service to the merchants of Philadelphia. He was also an important aid to the government during the Revolutionary War, using his pilot and whale-boats as a medium of obtaining information which proved of inestimable value to the Continental forces.

The Delaware State Medical Society is one of the oldest institutions of the kind in this country, being probably antedated only by the Massachusetts and the New Jersey Medical Societies. It

was incorporated in the year 1789, February 3d, by the Legislature of Delaware, on behalf of the following corporators, resident physicians of the State—viz: John McKinly, Nicholas Way, Jonas Preston, Ebenezer Smith, George Monro, Thomas Macdonough, Joshua Clayton, Ezekiel Needham, James Tilton, William Molleston, Edward Miller, James Sykes, Nathaniel Luff, Robert Cook, Matthew Wilson, Joseph Hall, John Marsh, John Polk, John Stephens Hill, Julius Augustus Jackson, William McMechen, Henry Latimer, James McCallmont, Joseph Capelle, Archibald Alexander, Henry Peterson and Levarius Hooker Lee. The name and title of the society as conferred by the Legislature was, and still is, "The President and Fellows of the Medical Society of Delaware," and its powers were such as are usually granted to such corporations.

In pursuance of the act of Assembly, the first meeting of the society was held at Dover, May 12, 1789. It was called to order by Dr. James Tilton, who was unanimously elected chairman *pro tem.*, and Dr. Edward Miller was chosen secretary. A committee consisting of Drs. Preston and Miller was appointed to prepare a draft of a constitution. The committee reported in the evening, and the constitution was ratified, after which the following were elected officers of the society for the ensuing year: President, James Tilton, M.D.; Vice-President, Jonas Preston, M.D.; Secretary, Edward Miller, M.D.; Treasurer, James Sykes; Censors, Nicholas Way, M.D., Matthew Wilson, M.D., D.D., Joshua Clayton, Nathaniel Luff.

In May, 1790, Dr. Edward Miller delivered at Dover the first anniversary oration of the society, which early showed its public spirit by raising a fund for the presentation of a premium upon some subject of general medical or hygienic interest.¹

The first subject proposed and adopted was "What is the origin and nature of the noxious power which especially prevails in hot and moist climates during summer and autumn, and produces intermittent and remittent fevers, and certain other diseases; and by what means may this insalubrity of climate be corrected, and the diseases thence arising be most successfully prevented and treated?" A "program" containing the conditions to be observed by the competitors, whether in the United States or elsewhere, was published in English and Latin, and it concluded as follows:

"The interesting nature of this question must appear on the most cursory observation. A large portion of the earth, and especially those countries which otherwise enjoy the richest blessings of nature, are, from this cause, annually subject to sick-

¹ In December, 1791, the society received from John Dickinson, Esq., a letter with an enclosure of £33 3s. 4d. to furnish that object, and in the following year a further contribution for the same purpose.

ness and depopulation. And it may be safely affirmed, that of all the sources of disease incident to mankind, this is one of the most extensive, malignant and fatal.

"A successful investigation of the origin and nature of this morbid principle would greatly enlarge the boundaries of science, and advance the comfort and happiness of society, and whoever shall discover a certain and easy method of correcting its virulent effects, while he renders a splendid service to medical philosophy, will have a just claim to the applause of his contemporaries, and to the gratitude of posterity.

"The society acknowledges and laments the obscurity which involves this question, trusting, however, that this objection, though formidable at first view, will deter no person from inquiry so pregnant with importance, ability and reputation. The obscurity, how great so ever it may be admitted to be, implies not any absolute inscrutability.

"At the same time that the society deprecates the censure of the learned world for the indulgence of expectation, which eventually may prove to have been over-sanguine, it still hopes that the discovery now contemplated is within the reach of the human mind, assisted by the enlightened views of modern science, and animated by the enterprise and ardor which distinguish the present inquisitive and philosophic age."

It was a most creditable step on the part of the society to propose a prize dissertation on this obscure subject; and it does not derogate from the scientific character of its Fellows, that the paper or papers presented were, after a critical analysis, decided to fail of successful competition, on account chiefly, as stated by the committee, "of the assumption of many facts without evidence, the want of experimental inquiry and the defect of all original discovery."

At various meetings, either on their introduction as members, or subsequently, the following were among the subjects on which papers were presented by the members: Dr. Snow on "Ophthalmia;" Dr. Barrett on "The Influenza;" Dr. Capelle on "The Tænia in the bowels of rats;" Dr. Tilton on "Cholera Infantum;" Dr. Theo. Wilson on "Phthisis Pulmonalis;" Dr. David Bush on "Small-pox;" on an "Epidemic of Bilious Colic in Dover," on a case of "Typhus Fever," on a case of "Hydrocephalus Internus successfully treated by mercury," on "Cholera Infantum," on "Succedanea for Peruvian Bark;" all by Dr. Edward Miller.

It is recorded in the minutes of one of the meetings in 1795 that a printed communication was received from Dr. Samuel L. Mitchell, Fellow of the Royal Society of Edinburgh, and Professor of Chemistry, Natural History and Agriculture in

the College of New York, entitled, "Remarks on the gaseous oxide of azote, or nitrogen, when generated in the stomach, inhaled into the lungs, or applied to the skin; being an attempt to ascertain the true nature of contagion, and to explain thereupon the phenomena of fever." At the same meeting a paper was presented by Dr. Edward Miller, entitled, "A cursory view of the question whether the noxious power producing intermittent and remittent fever originates from a deficiency of oxygen gas, or the generation of a positive poisonous gas in certain insalutary portions of the atmosphere."

In 1791 Dr. James Sykes delivered by appointment the anniversary oration; in 1793 Dr. David Bush fulfilled the same appointment; in 1793 Dr. Laws; Dr. Allen McLane in 1812; and in the same year a paper was presented by Dr. Harris "on the final cause of the diseases, death and dissolution of the human body." In 1823 Dr. McLane was appointed to deliver a eulogy on the life and character of Dr. James Tilton, which, with the oration of Dr. Wm. D. Brincklé on Medical Education, was published by the society; and in 1824, Dr. J. F. Vaughan read a memoir on the life of Dr. James Sykes, which was also printed. These are but a few of the deliverances before the society in its earlier history.

The original charter of this society only contemplated an association for the promotion of the unanimity and scientific and practical advancement of the profession of medicine in the State. But at the instance of the Society, the Legislature, in the years 1819, '20, '21, '22 and '35, conferred upon the society the authority to appoint annually a body from their own number, to be called the "*Board of Medical Examiners*," with power to permit any applicant to practice medicine and surgery within the State, upon the presentation of a diploma conferred by a reputable college of medicine, or who otherwise submitted to a full, strict and impartial examination by the board, and read a satisfactory thesis upon some medical subject; and the Assembly also imposed a penalty upon any one who should practice medicine in the State without proper authority from this board. The charter of this society and of this board of Medical Examiners still exist, although the powers of the latter have been much restricted since the year 1835.

With a few intervals of torpor, the society has continued in active operation to the present time, exercising a beneficent social as well as professional influence by striving to maintain the standard of medical requirement and of moral character; and thus, as we think, its labors have not been in vain.

The several presidents of the society and the date of their election were:—James Tilton, 1789; James Sykes, 1822; Arnold Naudain, 1823; Allen McLane, 1824; Arnold Naudain, 1828; Allen

McLane, 1829; James Lofland, 1830; W. W. Morris, 1832; John F. Vaughan, 1834; James Couper, 1835; James W. Thompson, 1841; W. W. Morris, 1845; J. D. Perkins, 1849; Henry F. Askew, 1851; James R. Mitchell, 1855; J. Merritt, 1856; Isaac Jump, 1857; R. R. Porter, 1858; E. D. Dailey, 1859; Lewis P. Bush, 1860; Gove Saulsbury, 1861; J. F. Wilson, 1862; W. N. Hamilton, 1863; James Couper, 1864; Albert Whitely, 1865; James A. Draper, 1866; Charles H. Richards, 1867; J. W. Sharp, 1868; William Marshall, 1869; T. S. Vallandigham, 1870; J. E. Clawson, 1871; R. G. Ellegood, 1872; Swithin Chandler, 1873; Nathan Pratt, 1874; Henry F. Askew, 1875; John J. Black, 1876; William T. Collins, 1877; Hiram Burton, 1878; John K. Kane, 1879; Ezekiel Dawson, 1880; David H. Hall, 1881; Howard Ogle, 1882; Robert W. Hargadine, 1883; Charles H. Richards, 1884; Read J. McKay, 1885; George W. Marshall, 1886.

DR. JAMES TILTON.

Dr. James Tilton was born in Kent County, Delaware, in 1745. His father, who died when he was only three years of age, left but a small estate, sufficient, however, to enable his mother to afford him the opportunity of a classical education at Nottingham Academy, Maryland, under the Rev. Samuel Finley, afterwards president of Princeton College. On leaving Nottingham he entered the Medical Department of the University of Pennsylvania, and was graduated in the year 1771, six years after the organization of the Medical Department of the University. He immediately entered upon the practice of his profession at Dover, Kent County, Delaware, and was beginning to achieve a reputation for ability and conscientious devotion to his duties when the independence of the United

States was agitated. In 1775 he addressed a letter to his friend and classmate in the University of Pennsylvania, Dr. Jonathan Elmer, of Bridgeton, New Jersey, upon the critical condition of affairs in this country, and expressed his determination, if the colonies should take up arms, to offer his services in their defense. He afterwards showed his earnestness and sincerity by becoming the first lieutenant of a company of light infantry; but after the Declaration of Independence he was appointed surgeon in the First Delaware Regiment. He was with the Continental forces at Long Island and White Plains, and in the subsequent retreat to the Delaware River. In 1777 he was in charge of the General Hospital at Princeton, New Jersey, where great neglect and consequent suffering existed among the troops, he himself narrowly escaping death from an attack of fever contracted there.

Said he, "It would be shocking to humanity to relate the history of our General Hospital in the years 1777 and '78, when disease swallowed up at least one-half of the army, owing to a fatal tendency in the system to throw all the sick of the army into a general hospital, whence crowding, infection and general mortality resulted, too affecting to mention."

Convinced that much of this was owing to the union of the Directing and Purveying Departments in the same person, he afterwards wrote as follows: "I mention it without a design to reflect on any man, that in the fatal year, 1777, when the Director-General had the entire direction of the practice in our hospitals as well as the disposal of the stores, he was interested in the increase of sickness and consequent increase of expense, as far, at least, as he would be profited by a greater amount of money passing through his hands."

In the winter of 1779-80 the sufferings of the sick in the tent hospitals was very great, and although an improved system, free from overcrowding, was recommended by Dr. John Jones, Professor of Surgery in King's College, New York, it had not been adopted. Doctor Tilton was at that time in charge of the General Hospital at Trenton, New Jersey, and to him has been ascribed the origination of a new system of hospital construction by the erection of log-huts, roughly built, so as to admit of free ventilation through the crevices. The floors of these buildings were hardened clay, and each was intended to accommodate not more than six men. The fire-place was in the centre, and the smoke escaped through a hole at the top.¹ The result reached his highest expectations; the typhus fever patients rapidly improved, and the plan was generally adopted.

General Washington, in a letter, September 9, 1780, writing of a proposed reorganization and

¹ The original suggestion of this form of military hospital has by some been ascribed to Marshal Saxe.

consequent decrease of the force in the medical department, spoke of Dr. Tilton as a gentleman of great merit, and who had a just claim to be retained.

In September, 1781, through the exertion chiefly of Dr. Tilton, an act was passed by Congress providing for promotion by seniority in the medical corps. About this time Dr. Tilton was elected a professor in the University of Pennsylvania, which honor he declined, unwilling to desert his situation in the service of his country. After the surrender of Cornwallis at Yorktown he returned to his native State, and recommenced the practice of his profession in Dover, in 1782. He was a member of Congress in 1782, and repeatedly served in the Legislature of his own State. Finding that the influence of malaria, then so abundant in Kent County, was undermining his health, he removed to Wilmington, New Castle County, and there resumed his profession. Soon afterwards he was appointed by the government commissioner of loans, which was a great relief pecuniarily, as he had entered and left the army without money. This office, however, he soon relinquished on account of a change of the national administration, with which he did not coincide.

With a reputation well established, his professional services were much sought; and the highest confidence was reposed in him, both by his patients and professional brethren, as a most honorable man and judicious physician. He continued thus in full practice for several years, when, having purchased a small farm adjoining the town, he removed thither. On this delightful spot, which commands a view of the Delaware, Christiana and Brandywine Rivers, with the town and also the intervening country of many miles in breadth, so beautifully interspersed with fields and woods, he built his house of the blue granite which underlies the ridge, and there removed, expecting to be permitted to enjoy his remaining years, disengaged from the more arduous duties of his profession. Fond of horticulture and pomology, he adorned his grounds with flowers and fruits, and here he administered to the diseased, or entertained his friends at his frugal but hospitable table, upon the products of his own farm.

At this time most of the surgeons who had acquired reputation in the War of the Revolution were either superannuated or had died, and the government of the United States, having declared war with Great Britain, remembered his valuable services to the country, and, recalling him to its aid, appointed him surgeon-general of the army of the United States. After much reflection and with much reluctance, on account of his age and impaired health, he consented to afford his ripe experience and sound judgment to his country, having received assurance that his duties would be

chiefly administrative, and his headquarters generally at Washington.¹

On the acceptance of this appointment Dr. Tilton considered it his duty to visit and inspect the hospitals on the Northern frontier. At Sackett's Harbor he found that the troops under General Dearborn, which had been concentrated during the winter, had been visited by severe sickness, and the hospitals were filthy and neglected as to their hygienic condition. He immediately convened the medical board, broke up the hospital there, and established it at Watertown, twelve miles distant. Along the Northern frontier he introduced his hospital regulations, and the benefits were soon visible in the improved health of the army. Of the second visit contemplated to the North, he was disappointed by the occurrence of a tumor on his neck, and on the disappearance of this, a formidable tumor attacked his knee, which, after causing much suffering, necessitated the amputation of his thigh. This operation was performed December 7, 1815, at his residence, probably by Dr. Physick, assisted by Dr. Smith, of Wilmington, and others. He bore the amputation with surprising fortitude and calmness, showing no sign of suffering, although then just beyond seventy years of age.² He survived the operation, but died May 14, 1822, in his seventy-fifth year. About the year 1857 his remains were disinterred, and deposited in the Wilmington and Brandywine Cemetery, and the Delaware State Medical Society took measures for erecting a monument to his memory by the appointment of a committee, of which the late Dr. Henry F. Askew was chairman. This memorial now stands in his burial-place, a fitting tribute to a great and good man. Besides the work on Military Hospitals above mentioned, Dr. Tilton prepared and published the following papers: "Observations on the Yellow Fever;" "Letters to Dr. Duncan on Several Cases of Rabies Canina;" also a second one on the same subject; "Observations on the Curculio;" "On the Peach-Tree and its Diseases;" "A letter to Dr. Rush Approving of Bleeding in Yellow Fever;" and oration in 1790 as president of the Delaware Society of the Cincinnati; "Queries on the Present State of Husbandry in Delaware."

¹ At the outbreak of the war he had prepared a work entitled "Economic Observations on Military Hospitals, and the Prevention and Cure of Diseases Incident to the Army," in which he elaborated the plan for hospital organization presented by him to Congress in 1781. In this work he condemned the practice which had hitherto prevailed of conforming to the organization which obtained in the European armies. This was the first publication on this subject which had been written in this country as the result of personal experience, and was highly commended by medical authorities of that day.

² Dr. Tilton was a member of and constant attendant at the Wilmington Presbyterian Church. Miss Montgomery in her reminiscences describes him as "about six feet tall, had dark hair, keen black eyes, very dark, swarthy complexion, loud and quick voice, finished in the art of chewing tobacco, always in a pleasant humor, no misanthrope, an old bachelor of the first order who always loved the society of ladies." In attending the levees in Washington, Dr. Tilton wore plain homespun clothes, one of the products of his farm.

The subject of his thesis for the degree of Bachelor of Medicine was "Respiration," and his inaugural dissertation for the degree of Doctor of Medicine in 1771 was "Hydrops." He also published his observations "On the Beneficial Effects of Sea-air Upon Children Suffering from Cholera Infantum or Chronic Diarrhœa," and recommended the town of Lewes, Delaware, as a proper place of resort in such cases. Some of these papers were read before the Delaware Medical Society, and some were published in the *Medical Repository*.

We are indebted to a memorial address delivered by Dr. Allen McLane, of Wilmington, Delaware, before the State Medical Society in 1823, for many of the facts in the foregoing paper; and to Dr. Toner, of Washington, for a part of the above list of Dr. Tilton's papers.

Dr. Edward Miller, one of the corporators of the Delaware State Medical Society, was born near Dover, Delaware, in the year 1760. He was the son of Rev. John Miller, A.M., who removed from Boston, Massachusetts, to Dover, where he resided forty-three years, in charge of the Presbyterian Church. He was a ripe scholar, and well versed in the Hebrew, Latin and Greek languages. His son, Edward, received his primary training in classical literature with his father, and afterwards took a collegiate course at Newark Academy, Delaware, under the tuition of Rev. Francis Allison and Alexander McDowell. His preceptor was Dr. Charles Ridgley, of Dover, but before he had concluded his studies, he entered the army as surgeon's mate, and afterwards as surgeon to an army ship. On his return home he resumed his studies at the University of Pennsylvania, and was graduated in medicine in 1785, the subject of his thesis being "De Physconia Splenica."

He then returned to Sussex County to enter upon the practice of medicine. At the first session of the Delaware Medical Society he was called upon, although then only five years from his graduation, to deliver the inaugural address. In 1793 he prepared a paper defending the theory of the domestic origin of yellow fever, then for the first time prevalent in Philadelphia, a copy of which he sent to Dr. Benj. Rush, who was led from its perusal to declare its author 'second to no physician in the United States.' In 1796 he removed to New York, and there, in conjunction with Dr. Mitchell and Dr. Elihu Smith, established the *Medical Repository*, the first medical journal issued in the United States. This work everywhere bears the marks of his genius and cultivation, by the brilliancy of his style, his lucid arguments, his originality and varied knowledge. He became port physician of the city of New York, Professor of the Practice of Physic in the University of New York, one of the physicians of the New York Hospital and a member of the Philosophical Society of Philadelphia.

His reputation and the attractiveness of his writings brought him into correspondence with eminent men in Great Britain, Germany and France.

In the *Medical Repository* of A.D. 1800, Dr. Miller published some observations on cholera infantum in which he recommended calomel and opium in that disease, in a different form from that prescribed either by Drs Cullen, Rush or Physic. Believing the liver to be involved materially in the production of the disease which bore that name, and considering that opiates and aromatics alone were merely temporizing remedies, he suggested the use of calomel in addition, in small doses: to wit, for a child two years of age, opium, gr. 1-6, calomel gr. 1-3, every two, three or four hours as required. In another paper he elaborated the importance of abstemiousness in warding off the effects of the malarial poison, and also its value as a remedy. Another paper is devoted to the "Medical Laws of Evidence," which he considered necessary to set forth in consideration of the deceptions which everywhere abounded on this point. In 1806, while port physician of New York, he reiterated the convictions which he retained, after having passed through the epidemics of 1798 and 1803, on the subject of "the domestic origin of yellow fever and its non-contagiousness." He was also an advocate of the use of water in fevers.

The death of Dr. Miller, which took place March 17, 1812, at the age of fifty-two years, was universally lamented, and by no one, outside of his own relations, more than by Doctor Rush, who wrote a touching memorial of his life, as did also other distinguished physicians of that time.

Dr. Nathaniel Luff¹ was also one of the incorporators of the Delaware Medical Society. His father, Hugh Luff, came from England in the latter part of the seventeenth century, and took up land from William Penn on the western shore of the Delaware Bay. He had two sons, Nathaniel and Caleb. Nathaniel settled in Mispillion Hundred and died there; and Caleb's residence was in St. Jones' Hundred. Caleb was a member of the State Legislature during the Revolution, and warmly supported the cause. He had two sons, Nathaniel and John. Nathaniel, the subject of this sketch, was born in St. Jones' Neck, Kent Co., April 23, 1756. His father was a farmer in comfortable circumstances, and his mother, Mary, was an intelligent woman. She was partially educated in Philadelphia, and was a member of the Episcopal Church, in the principles of which denomination she instructed her son.

Nathaniel's education commenced in Dover in the care of Rev. Charles Inglis, afterwards bishop of Nova Scotia. From this school he was sent to

¹ This sketch is taken from Dr. Luff's autobiography, prepared and published privately by him for his family and friends.

Philadelphia to receive a classical course. During this period his mother died and his grandmother deeded to him her property, reserving an annuity of £60.

On leaving the institution where he was educated he commenced the study of medicine with Dr. Glentworth, of Philadelphia, who had studied medicine first with Dr. Jno. Hunter, and afterwards in Scotland, and attended the medical lectures of Drs. Shippen and Chovet. Before his graduation, in 1776, he entered the army as assistant surgeon. After his first campaign he was promoted to the post of surgeon in a battalion from old Chester, under the command of Colonel Hugh Lloyd. In an interval from duty he attended the lectures of Dr. Benjamin Rush on chemistry and practice of medicine, Dr. Shippen's course of anatomy and Dr. Bond's chemical lectures.

Toward the close of 1776, being then twenty years of age, Dr. Luff was made surgeon of the First Battalion of the city of Philadelphia, commanded by Colonel Morgan, which on the 25th of December was ordered to cross to New Jersey. The command was present at the repulse of the British at the Trenton Bridges.¹

These soldiers were wretchedly provided for, almost destitute of clothing, and of the necessities of life, and the officers but little better off. Soon afterwards this battalion was discharged, at the expiration of their term of service.

By the advice of Hon. Caesar Rodney, then a member of Congress from Delaware, Dr. Luff left Philadelphia and went down to some point between Dover and Lewes, and engaged in the practice of medicine. Not feeling the necessity of such an arduous life, amid malaria, swamps, constant work and very little pay, he removed, with his wife, the sister of Dr. F. Fisher, whom he had recently married, to a farm on Mispillion Creek, where he resolved to engage rather in agriculture than the practice of medicine. At the time he abandoned practice in his first settlement the people were generally very poor, and six to eight hundred bushels of grain were paid frequently for an ordinary horse, while salt was from £3 to £5 per bushel. After the death of his father, Dr. Luff removed to Frederica, where he resumed the practice of medicine in 1797. Becoming somewhat embarrassed in finances, he again removed to his farm in St. Jones' Neck; but soon after concluded to go to Wilmington, where his wife died. Dr. Luff then abandoned the practice of medicine finally, and having joined the Society of Friends, of which his wife had been a member, he spent his time chiefly in traveling and attending upon their religious assemblies in Kent and New Castle Counties, Phila-

delphia and the Eastern Shore counties of Maryland.

In September, 1798, he married Lydia Boon, widow of John Boon, of Frederica, and daughter of Garreit Sipple, near Camden. Soon afterwards he removed to Maryland, near Greensboro, into a small house, which had belonged to Mrs. Luff's former husband; but in a short time returned to Frederica. From this time until 1805 he seems to have spent his time in attending the various meetings of the Quakers, partly from religious motives, and partly to obtain the influence of the Friends at those meetings in arranging some business affairs connected with the estate of James Boon, but paying little attention to his medical practice. He stated that he had resigned his position as censor of the Delaware State Medical Society, and also as a fellow, long before the year 1798, not believing that the advancement of medical science was the principal object of the society, "but the loaves and fishes,"—an opinion in which the fellows of this society ninety years later will not be disposed to coincide.

Judging from his diary, Dr. Luff was evidently an intelligent and cultivated man; erratic in disposition and not much attached to his profession, but conscientious in the discharge of his religious duties, and while in the Society of Friends he was doubtless a prominent member, not rising, because of natural timidity, to the position of a teacher in their assemblies. He died January 21, 1806, at Frederica.

Dr. John McKinley was born in Ireland, February 24, 1721. He resided in Wilmington and practiced his profession for some years. In 1777 he was elected President of the State of Delaware, being the first to fill that office after the formation of the Constitution of the State. On the evening after the battle of Brandywine, September 13, 1777, a detachment of British troops entered the town of Wilmington, and having learned where the President resided, made their way in the dark to his house, took him prisoner and carried him to Philadelphia.²

¹ In the "Life and Correspondence of George Read" several letters are found, dated the 4th and 7th of December, 1776, from General McKinley, as he is called, to George Read, then in Congress in Philadelphia, in which he says that "the troops of the first and second battalion of soldiers called for from Delaware to reinforce the American army at Philadelphia are not willing to march upon the terms set forth upon the requisition made by the proper authorities, to wit, to continue in service for three months, with no provisions for pay or supplies set forth. This being made definite, or satisfactory, they will readily go to Philadelphia." On December 16, 1776, in the same book, is a letter from Colonel Thomas Duff, of Newport, New Castle County, who says, "I am sorry to hear that Brigadier McKinley should discourage the men from marching. . . . I make what defense for the brigadier that I can, but I am afraid that the backwardness which seemed to be shown by him and some others on this alarming occasion will grow here."

William S. Read remarks: "These charges may be unfounded." Soon after this he was elected President of Delaware.

Notwithstanding the doubts in regard to General McKinley's position in military affairs, in the same work are several letters from George Read, Vice-President of the State (acting President), in relation to President McKinley, which are indicative of confidence on the part of Mr. Read. One letter, of November 25, 1777, was addressed to Commodore Griffith, commander of the English frigate "Solebay," then in the Delaware River, and was placed in the hands of Mr. George

¹ The light infantry of the battalion was composed chiefly of the sons of Quakers, men of property, and were popularly known as the silk-stocking gentry.

During the summer of 1778, Dr. McKinley was permitted to return home on parole. In the mean time, however, Caesar Rodney had been elected President of the State. Dr. McKinley resided in Wilmington during his Presidency until captured, and on his release returned to that city. He erected a large and commodious dwelling at the corner of Third and French Streets and laid out a garden, ornamented with rare flowers and fruit trees. Among those who enjoyed his hospitality was Archibald Hamilton Rowan, the Irish refugee, whose hut was on the Brandywine near the town, and who ostensibly supported himself by the product of his own labor, bringing it into the town on a wheelbarrow. Mr. Rowan was the intimate friend not only of Dr. McKinley, but also of Mr. Poole, Robert Hamilton, Caesar Rodney and other of the best citizens of the place. He was eventually restored to his family and estate on the coast of Ireland.

Dr. McKinley died August 31, 1796, and was buried in the cemetery of the First Presbyterian Church of Wilmington, a pillar at the front of which commemorated his bounty to that church. Although a Presbyterian, he at one time offered to the vestry of the Old Swedes Church a lot of ground at the corner of Seventh and Market Streets if they would build a church there, which, however, they declined to do.

On the slab which marks his grave is the following inscription: "This monument is erected in memory of John McKinley, who was born in the Kingdom of Ireland on the 24th of February, 1721, and died in this town on the 31st of August, 1796. He settled early in life in this country, and, pursuing the practice of physic, soon became eminent in his profession. He served in several important public employments and particularly was the first person who filled the office of President of the State after the Declaration of Independence. He died, full of years, having passed a long life usefully to the public, and honorably to himself." He was one of the founders of the Delaware Medical Society.

Dr. Matthew Wilson¹ was born in Chester County, Pennsylvania, in 1729. His education was directed by Francis Allison, D.D., who stood at the head of the educators of that day, and recognized the native ability and earnestness in

study of his pupil. The direction of his mind on leaving the seminary of Dr. Allison was to theological studies, which he accordingly prosecuted with his natural enthusiasm, and connected himself with the Synod of New York and Philadelphia, of which he was a member for thirty-five years, and to which he was always an ornament and an honor. The most satisfactory testimony to his usefulness and ability is shown by the fact that he was selected a principal member of a committee to prepare the "New Constitution of the Presbyterian Church in the United States." "As a Christian, his piety was fervent, uniform, enlightened and full of good works. As a preacher he was learned, orthodox, solemn and instructive."

Dissatisfied, however, with one profession and believing himself able in body and mind to undergo the labors of another, he studied medicine with Dr. McDowell, who was also a divine, a physician and a linguist. "For nearly twenty-four years the joint functions of minister of the gospel and physician were sustained and discharged by him with an ability and popularity which demonstrated that he was a man of extraordinary talents, attainments and energy." From the results of his medical practice he chiefly obtained the support for his family.

He wrote an able compend of medicine, which he called a "Therapeutic Alphabet." It was prepared for the press, used by himself, and transcribed by his students, but never published. He also wrote and published a "History of a Malignant Fever," which prevailed in Sussex County, Delaware, in 1774, in Aitkin's *American Magazine*; also, "Observations on the Severity of the Cold during the Winter of 1779-80" in the "Transactions of the American Philosophical Society;" also an essay on the diseases arising from the air, attempting to show that most diseases are caused by miasmata in the air, with an enumeration of some of them: in Carey's *American Museum*, vol. iv. 1786. For a number of years before his death, in addition to his other employments, he engaged in the direction and care of an academy, and in this his energy, learning and affability were conspicuous. In these three important employments Dr. Wilson labored with a constancy and an ardor equaled by few. His aim was without bound, or at least bounded only by his comprehensive powers, and his efforts for the good of others knew no weariness. His death occurred March 31, 1790, in Lewes, in the sixty first year of his age.

Dr. Wilson was an ardent Republican and a friend of his country's liberty. He warmly favored the measures adopted by the citizens of Philadelphia, previous to the Revolution, in opposition to the arbitrary measures of the mother country. He opposed the Stamp Act, encouraged his friends and parishioners in the non-importation agreement,

Latimer, together with a letter to President McKinley, to be delivered by permission of the commodore, in which he begs to have the President treated with all the indulgence and kindness possible. There is also a letter of the same date from Mr. Read to General Washington, in which he says, "we have been peculiarly unlucky in the captivity of our President and capture of our public papers, money and records," and entreats General Washington's efforts towards procuring the President's exchange as soon as practicable. "His usefulness," says he, "was such that his loss was severely felt throughout the State, and particularly by myself, upon whom the business of the executive department devolved."

These letters show the solicitude of Mr. Read for the welfare of President McKinley, and for his release from the hands of the British, and evince a high opinion of Dr. McKinley in State affairs.

¹ Taken from a sketch by Dr. Edward Miller in the *Delaware Register*.

and when the vessels brought the tea to the Delaware River, on which three pence per pound was to be paid (but which was not permitted to go to Philadelphia), he resolved to drink no more of that refreshing beverage nor introduce it into his family. He also opposed the use of it by his pen, showing its unfriendly effects as they appeared to him, and enumerated seventeen vegetables which he proposed as substitutes for it. This paper was published in Aitkin's *American Magazine*, of which Thomas Paine was editor. But the doctor's resolution was forced to yield at home, when on one occasion, his wife's sister brought from Philadelphia some tea which, she said, had not paid the duty.

The following instance of his refined honesty occurred much to the amazement of his friends. At the close of the American War a vessel was shipwrecked near Lewes, and her cargo was sold. The doctor attended and purchased a cask of aniseed cordial. Upon opening it he found a large bottle marked oil of rhodium. Alarmed at the discovery, he ran to the auctioneer and announced the fact, requesting him to send for the bottle and sell it again. The auctioneer replied that he would neither send for the bottle nor take it if sent to him, for if instead of oil of rhodium he had found brickbats, he should pay the price at which the cask was knocked off to him. The cask and oil of rhodium were sent to Philadelphia and sold for ten times their first cost. Dr. Wilson was buried in the Presbyterian Church cemetery at Lewes, Delaware. He was the father of the distinguished divine, the late James P. Wilson, D D. of the First Presbyterian Church of Philadelphia, and of Theodore Wilson, who was shot in the hotel in Lewes, Delaware.

Dr. Charles Ridgely was born in Salem, New Jersey, Jan. 26, 1735. He was the son of Nicholas Ridgely, of Dover, Delaware, and Mary Vining, widow of Benjamin Vining, who resided near Salem, New Jersey. Soon after his birth his parents removed to Delaware, and he received his early education in Dover. To obtain a knowledge of medicine at that time was no easy matter in this country; but his parents were able to give him all available advantages, and sent him to Philadelphia, where he prosecuted his studies in the Academy of Philadelphia. Dr. Phineas Bond was his medical preceptor. His life was spent in the practice of his profession in Dover; but his talents, cultivation and honorable character were the means of his being called to a variety of public offices, which he filled, in conjunction with his private duties, with much credit to himself and satisfaction to the community. He died November 25, 1785, of pneumonia, which followed a severe attack of bilious remittent fever, the result of fatigue and exposure in the discharge of

his professional duties. His son, Nicholas Ridgely, was chancellor of the State.

Dr. Joshua Clayton, another of the incorporators of the Delaware Medical Society, was born in Cecil County, Maryland, in 1744. He was the son of John Clayton, who, with his brother Paul, came to this country with William Penn. To John Clayton Mr. Penn gave an inheritance in Little Creek Hundred, and to Paul he gave lands in Penn's Manor, Pennsylvania. Dr. Clayton acted as surgeon or assistant surgeon at the battle of Brandywine. He married Mrs. McCleary, daughter of Governor Bassett. He was the last President of Delaware and afterwards Governor for two terms. He was elected to the Senate of the United States, and while in attendance at its session in Philadelphia, in 1798, was seized with yellow fever. Doctor Rush, with whom he was intimate, and whom he had assisted in the care of his yellow fever patients, desired him to remain in Philadelphia under his care, but Dr. Clayton declined to do this and proceeded to his home, where he died from the effects of the disease, at the age of fifty-four. Dr. Clayton had three sons—Dr. James L. Clayton, a surgeon in the United States service, Richard and Thomas Clayton—and several daughters, all of whom died young.

Dr. Joseph Hall was born in Lewes, July 31, 1748. He was the son of David Hall, of Lewes, and descended from an ancestor of the same name, who was one of the Plymouth settlers, and who located at Lewes. He is believed to have been a medical graduate of the University of Pennsylvania. He was one of the founders of the Delaware Medical Society. From the scarcity of physicians in his day Dr. Hall's practice was very extensive, reaching to remote parts of the country, and at times obliging him to be absent from home several days at a time. He served as a surgeon in the Revolutionary War, but is not known to have left the State in that capacity. In person he was robust, and of large stature; temperate habits; was connected with the Presbyterian Church in the capacity of an elder; and in that faith he died, September 15, 1796, at the age of forty-eight years. He was buried in the Presbyterian cemetery at Lewes. Dr. Hall married Elizabeth Fisher, daughter of Major Henry Fisher. Of six children, Dr. Henry F. Hall alone survived.

Dr. Nicholas Way was the son of Mr. Francis Way, of Wilmington, whose ancestors were members of the Friends' Society, and very respectable. The manners and appearance of Francis Way were those of a gentleman, and his residence, with its garden and grounds, bore evidences of taste and cultivation. He married late in life, and Nicholas Way was born of this marriage about the year 1750, or a little earlier. He

was a graduate of medicine in the University of Pennsylvania in 1771. He was one of the corporators of this society, and on the second day of the initial meeting of the society, May 13, 1789, was elected one of the curators. The only meeting, however, in which his name appears was held in Wilmington, December 10, 1793, the year in which the yellow fever prevailed in Philadelphia.¹

As a practitioner Dr. Way was highly prized for his skill. In 1793, when the yellow fever first appeared in Philadelphia, crowds of citizens sought an asylum in Wilmington. So great was the dread of the epidemic, that many were at first refused entrance into the town. Doctor Way used his influence by interceding for their reception. Immediately every door was open, and every house was filled.²

Dr. Way had his leg broken by being thrown from his horse and consequently gave up his country practice. This resulted in such a protest that in 1796 he removed to Philadelphia where he died of yellow fever, September 7, 1797. He was appointed president of the mint and never married.

Dr. Henry Latimer was born at Newport, New Castle County, April, 1752, and graduated at the University of Pennsylvania. In July, 1773, he received the degree of Master of Arts. He commenced the study of medicine in Philadelphia, and completed it at the Medical College of Edinburgh. On his return he entered upon the practice of his profession in Wilmington. In 1777 he was appointed surgeon in the Continental army, and served from Brandywine to Yorktown with such acceptance that his name was mentioned by General Washington for surgeon-general of the Northern Division of the army. He was elected a member of the Legislature of Delaware after the State organization; and from 1793 to 1795 was a Representative in Congress. From 1795 to 1797 he was elected to the Senate of the United States; and re-elected in 1797; but in 1801 he resigned his seat. He died in December, 1819, and was buried in the cemetery of the First Presbyterian Church, of Wilmington.

The father of Dr. Henry Latimer was James

Latimer, who was born in and lived at Newport, and was engaged in the grain and shipping business with Philadelphia. He married Sarah Geddes. The grandfather of Dr. Latimer came from Ireland, but the family was originally from Normandy. Dr. Latimer's children were Henry, John, Mary, James and Sarah, all deceased; and all, except John, are buried with their father and grandfather in the cemetery of the First Presbyterian Church, Wilmington.

Dr. James McCallmont was born at Newport, New Castle County, in 1755. His father was John McCallmont, a resident of Newport, and engaged in the flour business, and an elder in the Red Clay Creek Presbyterian Church during the pastorate of Rev. Wm. McKennan. He died in 1776, aged sixty-five years, and was buried in the cemetery of the church of which he was a member. Dr. McCallmont's mother was Sarah Latimer; her father was James Latimer. She was born in Ulster County, Ireland, and came to America when five years of age. The ancestors of the family emigrated to Ulster from Eastern Wales. Dr. McCallmont was educated at Newark Academy. His medical preceptor was Dr. Matthew Wilson, of Lewes, and while prosecuting his studies he lived in Dr. Wilson's family, in company with others engaged in the same occupation. In the year 1777 he was a surgeon in the United States navy, and in that year was in a naval engagement near Long Island. Later in the same year his ship was boarded by a Spanish privateer, and his life, with that of a younger brother, was saved by his giving the Masonic sign to the Spanish officer, just as they were about being forced to "walk the plank." They were then taken to a Spanish prison in the West Indies, and finally released through the influence of the United States consul. After leaving the navy Dr. McCallmont settled in New Castle, and practiced his profession until his death. Dr. McCallmont was one of the founders of the Delaware Medical Society; of studious habits, so fond of literature that his patients, to detain him, would, at times, place a book in his way, in reading which he failed to note the passage of time. He was a gentleman of fine personal appearance and robust health. He was very cheerful and youthful in his disposition, and temperate and regular in his habits. He respected religion, and was attached to the doctrines of the Presbyterian denomination, although he was never connected with the church. He died at New Castle of bilious fever, after an illness of ten days, Oct. 4, 1824, aged sixty-nine years, and was buried in the cemetery of the Presbyterian Church of New Castle. Dr. McCallmont was twice married. His first wife was Mary Monro, sister of Dr. George Monro, late of Wilmington. The children of his first marriage were Anna, who became the wife of Allan Thompson; Sallie Maria,

¹ Miss Montgomery in her reminiscences says: "He was an eminent physician, and a gentleman of the old school. His popularity was unbounded. He commenced practice in 1775, and was associated much with the officers of the American army, and with gentlemen from other States, which gave him acquaintances from abroad, and drew to him many students, especially from South Carolina." There is probably an error in the above date, as Dr. Way graduated in 1771.

² Matthew Carey refers to this in his history of the epidemic: "Humanity, tender and friendly as were the worthy inhabitants of Wilmington in general, two characters have distinguished themselves in such a very extraordinary manner as to deserve particular notice. These are Dr. Nicholas Way and Major George Bush, whose houses were always open to the fugitives from Philadelphia, whom they received without the smallest apprehension, and treated with a degree of genuine hospitality that reflects the highest honor upon them."

"The instances of this kind through this extensive country have been very few; but they are, therefore, only the more precious, and ought to be held up to public approbation."

wife of Hon. Kensey Johns, Jr.; John, who studied medicine, but died early in New Jersey; Arthur, for many years clerk of court in New Castle; James, who commenced the study of medicine, but relinquished it on account of failing health; Susan and George. His second wife was Martha McMullen, to whom he was married in 1807, and whose children were Matilda, George (2d), Francis, Marianna, wife of the late Dr. George McCallmont, of Philadelphia, and another.

Dr. Joseph Philippe Eugene Capelle was born in Flanders (or Courtray) in 1757. He came to this country during the Revolutionary War with Count de Rochambeau, and was subsequently placed on the staff of Gen. Lafayette as surgeon or surgeon's mate.¹

Dr. Capelle was a member of the Episcopal Church. After the war he settled in Wilmington and continued in the practice of his profession until November 5, 1796, when he died. His wife was Mary Isabella Pierce, of Baltimore; and their children were Phillippe Henri, Marcus Eugene, Marie May Capelle, Henry Ward Pearce. His funeral took place on Sunday, November 7, 1796, in the cemetery of the Old Swedes' Church, with imposing Masonic and religious ceremonies. Dr. Capelle was one of the incorporators of the State Medical Society, and was repeatedly elected one of its censors. As a professional man he was very popular.

Dr. Robert Cook was also one of the founders of the State Medical Society. He was born in Kent County. He married the widow of Gov. Daniel Rogers, and lived and died in South Milford. He was appointed at the first meeting of the State Medical Society in the spring of 1789, in conjunction with Drs. Molleston, Sykes and Miller, to report rules of order, and to draft an ordinance regulating admission of members.

Dr. David Bush was the youngest son of David and Ann Bush (*née* Thomas). He was born in Wilmington, December 6, 1763. Three of his brothers—Lewis, George and John—were officers in the army of the Revolution. Lewis studied law in York, Pennsylvania, entered the army soon after he was admitted to the bar, was appointed major, and killed at the battle of Brandywine. George was also a major, and was wounded in the side. He was appointed by Washington the first collector of the port of Wilmington; and died from the effects of his wound. John was appointed captain—he passed through the war unhurt—mar-

ried a lady in Kent County, Maryland, and died there.

Dr. Bush was elected a member of the State Medical Society December 10, 1793, having presented a "Dissertation on Small Pox," which was considered as evincing so much ability that he was honored by the appointment of orator of the next annual meeting. Dr. Bush was highly esteemed by all classes in Wilmington. He was married ~~March 5, 1879~~ to Miss Betsy Price, of Chester County, Pennsylvania. He was named for a half-brother, also a physician, whose death took place in Grenada, shortly before his brother's birth, he having gone abroad for his health. Dr. Bush died February 15, 1799, at the age of thirty-six years. Four children were born of this marriage, but all died early. He was buried in the cemetery of the Old Swedes' Church, having been a member of the Lutheran Church. On the death of Dr. Capelle, Dr. Bush was appointed to deliver a eulogy upon the character of the deceased. In this, his own religious faith was set forth, as well as his estimation of the Christian, and otherwise excellent character of his friend.

Dr. George Monro was born in New Castle, February 22, 1760. His father came over from Scotland a few years before the birth of George. His mother was Lydia Hall, a niece of Governor Hall, of this State. Dr. George Monro was educated at Newark Academy, and subsequently graduated in medicine at the University of Pennsylvania. During the Revolutionary War he served as surgeon in the Virginia line, and at the close of hostilities went to Europe and further prosecuted the study of medicine in London and Edinburgh. In 1786 he returned to this country and settled on his farm near St. George's. He married the youngest daughter of Col. Haslet, of Revolutionary fame, and in 1797 moved to Wilmington, where he resumed the practice of medicine. He soon obtained a high position among the leading physicians, and by his skill in medicine and surgery, his liberality and benevolence, won the esteem of a large circle of friends and acquaintances. He became an earnest Christian in middle life, although his early years were tinctured with infidelity, and his whole character showed the reforming and benign influence of his religious views. After a brief illness, he died suddenly on the 11th of October, 1819, in his sixtieth year. Although a man of superior education, Dr. Monro left but few productions of his pen, the only prominent contribution to medical literature being published in the *New York Medical Repository* on the yellow fever in Wilmington in 1798. Dr. Monro was one of the secretaries of the Society of the Cincinnati.

Dr. James Sykes,² was born March 27, 1761, in

¹ It is stated that when General Lafayette was shot in the leg at the battle of Brandywine, Dr. Capelle rode up and offered to dress the wound, but the general declined his services, remarking that his injury was trivial, and the wounded soldiers were in more urgent need of the physician's attentions. The general's wound was bound up by a camp follower named Belle McCuskey, who, until her death, wore a bullet suspended from her neck, which she declared was taken from General Lafayette's leg. When the general visited the United States in 1824, while in Wilmington he called on this old woman, and expressed his gratitude to her for her services on that occasion.

² During Dr. Sykes' first period of practice at Dover, the community was greatly excited over a number of cases of mysterious poisoning,

the vicinity of Dover. His father, after whom he was named, held several State offices, was a member of the Privy Council at different periods and took part in the convention which revised the Constitution of the State. James Sykes, the younger, was educated in Wilmington and Dover. He read medicine with Dr. Clayton, an eminent practitioner of Bohemia Manor, and attended the lectures of Drs. Shippen, Morgan, Kuhn and Rush. He began his professional career at Cambridge, Maryland, where he remained four years, and while there married Elizabeth Goldsborough, daughter of Robert Goldsborough. Returning to Dover, he soon acquired a fine practice in medicine and surgery, and became so skillful in the latter branch that Dr. Tilton, surgeon general of the United States army, declared him to be unsurpassed as a lithotomist. Dr. Sykes was elected to the State Senate repeatedly, and was executive of that body for fifteen years, after which he was chosen Governor. In 1814 he removed to New York, where he remained nearly six years, when, not meeting with the encouragement he had anticipated, he went back to Dover, where he remained until his death, October 18, 1822. His son, Samuel Sykes, was his partner after his return from New York. A second son, William Sykes, was the father of General Sykes, a commander in the Army of the Potomac. The only daughter of Dr. Sykes survived her father but a few days, her death being caused by grief at his demise.

Dr. John Brinklé¹ was born in Kent County, Delaware, September 1, 1764. His father was John Brinklé, of St. Jones' Neck, a farmer and captain in the Continental army, and his mother, Elizabeth, was a daughter of John Marion, of Kent County.

Dr. Brinklé was educated at Newark, and at the University of Pennsylvania. His medical studies, begun in 1787, were completed under Dr. Shippen, and he was elected a member of the Delaware State Medical Society in 1811; resigning in 1828, when his name was placed on the honorary roll. He settled in Kent County, where he practiced his profession and managed his farms; also engaged in shipping wheat, in which business he was interested with John Welch, father of the late William Welch, of Philadelphia. In 1830, Dr. Brinklé retired from practice and removed to Wilmington. He

which Dr. Sykes soon traced to Peruvian bark, employed largely as a remedial agent, and found it contained red oxide of lead, a weighty and deleterious drug. Investigation showed that the druggist from whom the bark was obtained had employed a negro to reduce it to a powder, and the latter, being paid by the pound for the work, surreptitiously introduced the oxide of lead to increase his remuneration. In a sketch which Dr. J. F. Vaughan prepared for the State Medical Society and published in the *Delaware Register*, the "adulteration" was charged upon Philadelphia.

One of Dr. Brinklé's ancestors was a member of Penn's Council, and on one occasion, considering that the Quaker proprietor was assuming too much power, he withdrew from the Council. Another ancestor, Edward Brinklé, in the reign of Edward VI. advocated the transfer of the confiscated monastic estates to the Protestant Church.

was identified with the Episcopal Church from about 1816, and was active in building St. Andrew's Church, Wilmington, and Grace Church, Philadelphia, he and his wife being among the original communicants of the former. He died, January 9, 1835, of heart trouble. When the fatal attack came on he got up and looked at the clock, and then sat with his finger on his pulse for a few moments, when death intervened. His remains were deposited in a vault at Grace Church, Philadelphia.

Mrs. Dr. Brincklé² was Elizabeth Gordon, daughter of Joshua Gordon, and niece of Judge Thomas Rodney and Caesar Rodney, a signer of the Declaration of Independence. She spent much of her youth with the last named until married, on January 6, 1790. Dr. Brincklé had eight children—Mary, who died in infancy; Joshua, who studied law with Caesar A. Rodney and practiced in Dover; John Rodney, a manufacturer and merchant; Samuel Crawford, a minister; Wm. Draper, who studied medicine; Charles Marion, died in infancy; Henry Marion, died aged twenty-two; Thomas Rodney, who studied medicine.

Dr. Pierre Chetard was born at Cape Francois, St. Domingo, July, 1766. His father, Pierre Chetard, was born in St. Yrieix in the ancient province of Limousin, France, whence he emigrated to St. Domingo, and was the owner of a large coffee plantation at the time of the Revolution on that island. His mother was Louise Helene Joulair, and her father was a resident of St. Domingo.

Pierre Chetard resided during his youth with his father's relatives in France, and was educated at Toulouse, where he obtained the degree of A. M. in August, 1785. He subsequently entered the medical school at Montpellier, obtained the degree of Licentiate of Medicine, in March, 1788, and that of M. D., in April. After graduating he returned to St. Domingo, and resided there for a short period. He then went to Paris and studied surgery for two years. While in Paris the Revolution of St. Domingo occurred, and his parents being obliged to flee from the island, came to the United States and took up their residence in Wilmington. Dr. Chetard arrived in Wilmington in March, 1794. He commenced the practice of medicine, and remained until the death of his parents. In 1794 he became a member of the Medical Society of Delaware, and delivered the anniversary oration. His father died in April, 1796, and his mother in February, 1797. He then availed himself of the permission granted by the chief of the island of St.

¹ Elizabeth Brinklé was a lineal descendant of Sir Henry Seymour, the grandfather of Edward VI. Her grandmother Gordon was the daughter of the Rev. Thomas Crawford, a native of Scotland, but a missionary of the Church of England to this colony. He was the first clergyman sent out by "the Society for the Propagation of the Gospel in Foreign Parts" after its organization in 1701, and the first rector of Christ Church, Dover. His wife was the only daughter of Arthur Meston, of Kent County. He was buried in the chancel of his church.

Domingo to return and take possession of his estates. He remained in St. Domingo from the latter part of 1797 to 1800, when, fearing a renewal of the massacre of the whites, which afterward occurred, he returned to the United States. He sailed about the last of May, 1800, on the ship "Sympathy," which was captured shortly afterward by the British ship "Alarm." Dr. Chetard's claim as an American citizen was recognized by the British captain, and he was transferred to the schooner "Elizabeth," of Baltimore, of which city he became a permanent resident, and was soon actively engaged in his profession.

Dr. Chetard contributed largely to medical literature, and in 1812 was elected a member of the Baltimore Medical Society; in 1818 a corresponding member of the New Orleans Medical Society; in 1820 corresponding member of the Royal Medical Society of Marseilles; in 1825 a corresponding member of the Medical Society of Mexico; and in 1835 a corresponding member of the Royal Academy of Medicine of Paris. He was a Roman Catholic, and died in that faith June 5, 1848. He was married October 28, 1801, to Jeanne Marie Adelaide Françoise Boisson, daughter of Jean Thomas Boisson and Adelaide Cœnu. She was born at Cape François, St. Domingo, but was educated in France. They had eight children, of whom the following survived their father: S. M. Chetard, M.D., Ferdinand Edmund, Frederick Peter (formerly of the United States navy), Emily, who married Frederick Dungan, of Baltimore, and Josephine, the wife of Dr. Chew Van Bibber, of Baltimore.

Dr. Elijah Barratt was born December 29, 1770, on his father's estate near Frederica, Kent County. He was the son of Philip and Miriam Barratt.¹

Dr. Elijah Barratt studied medicine under Dr. Nathaniel Luff, and became a practitioner, although he never graduated, a not uncommon occurrence in those days. He was elected a member of the Delaware Medical Society in 1790, and was active in it until his death, which occurred April 11, 1809. Dr. Barratt was prominent as a physician and politician; was a strong Federalist, and refused to be a candidate for Congress. He was sole devisee of his brother, Nathaniel Barratt, who died November, 1797, and also devisee of the farm which had been allotted to him, upon the partition

of his father's estate, by Judge Thomas White, Richard Lockwood and Governor Richard Bassett. Dr. Barratt married Margaret Fisher, and left five children—Susan F. Barratt, who married Nathaniel Smithers, Jr.; Mary Barratt, who married Andrew Green; Margaret, who married Mr. ——— Knott; Eliza F., who married Mr. ——— Prettyman; Edward F., who died unmarried in 1819.

Dr. John May Laws was born in Nanticoke Hundred about the year 1770. His father was John May Laws and his mother was Elishe Tingley Beswick. He graduated from the University of Pennsylvania in medicine in 1790, and became a member of the State Medical Society in 1792. He commenced the practice of medicine in Milford. He was appointed a justice of the peace in 1818, and died childless, either in Milford or Frederica, while still young.

Dr. Theodore Wilson, the son of Rev. Matthew Wilson, M.D., D.D., of Lewes, was born June 28, 1772 and studied medicine with his father. He became a member of the State Medical Society in 1792, and practiced in Lewes until his death, which occurred in 1815.

Dr. Julius Augustus Jackson, "a practitioner of physic" in 1775, obtained a warrant from Penn for a tract of land in Seaford Neck, where he built a house and wharf and became a large landed proprietor. At his death he left half of his medical books and instruments to each of his sons, Jeremiah Rush and Peter, who were also physicians. He was one of the founders of the Delaware Medical Society in 1789. Dr. Peter Jackson, Jr., was born in 1792. He settled in Milton in 1838, and died December 3, 1863.

Dr. Edward Dingle was born near Dagsboro', June 8, 1779. He was the son of Edward Dingle, and grandson of Rev. Edward Dingle, a native of England, and who in 1731 became rector of St. Mary's parish in Worcester County, Maryland. Dr. Dingle studied medicine with Dr. Jacob Wolfe, of Lewes, and began to practice in Dagsboro', where he prospered. He was appointed an associate justice of the County Court, and was a member of the convention that framed the State Constitution of 1831, and suggested the biennial elections which became a feature of that instrument. He died September 8, 1847.

Dr. James P. Lofland, for thirty years a prominent physician in Delaware, died in August, 1851. Dr. Mark G. Lofland, his son, was born May 17, 1827, and died December 4, 1881. He studied medicine with his father, was graduated at Jefferson Medical College, and continued his studies afterward under Drs. Pancoast and Wistar and then removed to his native place and took up his father's practice.

Dr. John Miller, eldest son of Rev. John

¹ Philip Barratt was the first of the name to settle in Delaware, where he acquired an extensive tract of land and engaged in farming and shipping bark and staves to Philadelphia, in a vessel belonging to him. He was a Methodist, and gave the site of the first church of that denomination in that section. It was built of brick imported from Holland, forty-four by forty-eight feet, and was at that time "far the grandest place of worship of the Methodists in America." It was begun in 1780 on Philip Barratt's farm, where it still stands, and although used for worship, was not finished for sixty years. Philip Barratt was appointed high sheriff of Kent County by Caesar Rodney, President of the State, and was in office during the Revolutionary War. He protected Bishop Asbury from mob violence. He died in 1797.

Miller, of Delaware, died February 28, 1777, at the early age of twenty-five years. He was a surgeon in the Revolution in a Jersey regiment; was seized with a fever at Darby, Pa., and died of exposure and hardships of military life.

Dr. Joseph Hall, of Lewes, born 1750, was one of the founders of the State Medical Society. He died in 1796. Dr. Henry Fisher Hall, born 1789, died 1865, was his son. Dr. David Fisher, born April 24, 1831, son of the last named, is now (1888) practicing at Lewes.

Dr. Thomas Macdonough, father of Commodore Macdonough, the hero of Lake Champlain in the War of 1812, was born at Macdonough in St. George's Hundred. He was practicing medicine when the war of Independence opened, and entered the army as major of Col. Haslet's regiment. At the close of the war, he returned to his home, continued his profession, served as a court justice for a time, and died 1795.

Martin Barr, M.D., was born in Strasburg, Lancaster County, Pa., in 1792. In 1810 he entered the office of Dr. Benjamin Rush as a student of medicine, and in 1813 was graduated from University of Pennsylvania, and then moved to Middletown, Delaware. He died September 14, 1874. He joined the State Medical Society in 1813. Dr. William H. Barr, his son, born 1825, studied medicine with his father, was graduated in medicine at University of Pennsylvania in 1850, began practicing in Middletown, and is a resident physician there.

Dr. Daniel G. Fisher, son of Alexander Fisher, was born November 25, 1823, studied medicine with Dr. William Atlee, of Philadelphia, graduated at University of Pennsylvania in 1852, and located to practice his profession in Seaford, Delaware, where he continued until 1863. He then was chosen an enrolling surgeon of Delaware. After the war he resumed his profession at Milford, where he died in 1881.

William H. White was born at Snow Hill, Md., in 1825; started to practice at Pittsville, Md.; remained but a short time there; graduated at Jefferson Medical College in 1851; remained in Laurel two years and opened an office at Sixth and King Streets, Wilmington, and practiced there until his death April 19, 1867. He was Brigade Surgeon, appointed in 1861; remained until 1863, when he was honorably discharged on account of sickness. On his return from the army he was presented with a case of surgical instruments, costing \$500, by the citizens of Wilmington.

Dr. William Cummins was born in Smyrna, June 21st, 1814, son of John and Susan Cummins. Dr. Cummins received his preliminary education in Smyrna, after which he entered Yale College, and having completed his course there, he entered the Medical Department of the University of Pennsyl-

vania and was graduated in medicine in 1838. He became a member of the State Medical Society of Delaware in 1838, and was elected Secretary in 1841, in which office he was continued for several consecutive years. Dr. Cummins was of medium size, of gentle and pleasing presence, kind and faithful in the performance of his duties in his profession, and to the community of which he was a valuable member, and highly respected. In addition to his attachment to his profession, he was also fond of and interested in the pursuits of agriculture, to the exercise of which his landed estate furnished ample opportunities. In later years of his life he had strong religious convictions, and being a member of the Protestant Episcopal Church, he was admitted to perform the functions which pertain to the office of a lay reader. Dr. Cummins was a member of the Kent County Bible Society, and a director of the Farmers' Mutual Insurance Company, of Wilmington. His children were Margaret Baily, William Alexander Cummins and Robert Lawber Cummins.

Dr. William Baldwin¹ was born in Chester County, Pennsylvania, March 29, 1779. His father was Thomas Baldwin, a Quaker preacher, by whom he was liberally educated and began to teach. He read medicine with Dr. William A. Todd, of Downingtown, and in 1805 was appointed surgeon on a merchant vessel bound to China. On his return he resumed the study of medicine and graduated at the University of Pennsylvania. He located at Wilmington and married Miss Hannah M. Webster, of that city. He became a fellow of the Delaware State Medical Society May 14, 1811. His health failing, he removed to Georgia. In 1812 he was appointed surgeon of a gunboat flotilla at Savannah, and in 1817 surgeon on the frigate "Congress" bound on a South American mission. This last appointment was due to his scientific acquirements, and while abroad he collected many new botanical specimens, a portion of which are in the Philadelphia Academy of Sciences. In 1818 he returned and again settled in Wilmington. In 1819 he was a delegate to a general medical convention in Philadelphia. The same year he was appointed botanist to Long's expedition to the Upper Missouri, but died *en route* at Franklin, Missouri, September 1, 1819, at the age of forty-one years, leaving a wife and four children.

Dr. William Gibbons, son of James and Eleanor Peters Gibbons, was born August 10, 1781, in Philadelphia. He was the youngest of thirteen children, and was given a superior education. He studied medicine with Dr. Jacob Ehrenzeller, an expert Revolutionary surgeon living at West Chester, and with Dr. John Vaughan, of Wilmington. He was a graduate in medicine of the Pennsylva-

¹ Dr. Baldwin was also a distinguished botanist, and wrote many valuable articles on this science and on medical topics.

nia University. In 1806 he bought a farm in Chester County and married Rebecca, the daughter of David Donaldson, of Wilmington. In 1807, upon the death of Dr. Vaughan, Dr. Gibbons removed to Wilmington and located there permanently, soon rising to the front rank of the local practitioners. He devoted considerable attention to natural sciences and languages, and was celebrated in both, being one of the founders of the Delaware Academy of Natural Sciences. He was also extensively known through his articles on religious, scientific and other topics. He died July 25, 1845, leaving eight sons and five daughters. One of his sons was a member of the faculty of the Medical College of the Pacific, at San Francisco. His children were James Henry, died August, 1807; Henry, died 1885; James Sloan; William Peters, died 1886; Charles, died 1884; Sarah Ellen; Edward, died 1882; Louis, died 1875; Margaret D., died 1865; Rebecca Elizabeth; Redmond; Francis, died 1861; Caroline. Mrs. Rebecca Donaldson Gibbons died in 1869, aged eighty-one years. Dr. Gibbons established and conducted a religious periodical called *The Berean*, 1824 to 1827.

Dr. Samuel Henry Black, son of David William and Margaret Ferris Black, was born in New Castle County December 20, 1782. He received a liberal education, and when about nineteen years of age commenced the study of medicine with Dr. John Groome, of Elkton, Maryland, completing his medical course at the University of Pennsylvania. He settled in Glasgow, New Castle County, and for more than twenty years prosecuted his profession. His practice extended to Newark, Elkton, Middletown and Port Penn. In the latter part of the year 1817 he married Dorcas Armitage Middleton, daughter of Robert and Mary Middleton, of Glasgow. He died April 17, 1827, in the forty-fourth year of his age, leaving a widow and nine children. Dr. Black was a man of more than ordinary endowments in all the relations of life, and had one of the finest private libraries in the State.

He was a member of the General Assembly for several sessions and a popular writer on medical and agricultural topics. He was particularly zealous in his advocacy of vaccination.¹

Dr. Black was one of the trustees of Delaware College, and at a meeting of the board he was seized with apoplexy, which terminated his life in a few hours.

Dr. William Winder Morris was born near Snow Hill, Worcester County, Maryland, January

26, 1784. His father was James P. Morris, and his mother was Leah Winder, daughter of William Winder and sister of Governor Levin Winder, of Maryland, and of Dr. John Winder, of Northampton, Virginia. His professional studies were prosecuted under Dr. Samuel Kerr, of Princess Anne, and Dr. Thomas James, of Philadelphia. He commenced practice in Dover in 1808, and continued it until 1855, when his health failed. Dr. Morris died in Dover December 16, 1857, and was buried in the Presbyterian Church of that place. His wife, Mary, was the daughter of the late Dr. Charles Ridgely, and half-sister to Chancellor Ridgely. Three children survived Dr. Morris,—Anna Maria, who became the wife of Hon. Caleb Layton, of Georgetown; Emily, who remained single; and William, who studied law with Hon. John M. Clayton, and practiced his profession successfully in York, Pennsylvania, for many years, after which he retired to his farm in the neighborhood of Dover. He married Miss Catharine Harris, of Harrisburg, Pennsylvania. Their daughter, Mary Middleton, married Caleb S. Pennewill, of Dover.

Dr. Allen McLane was born in Smyrna, Kent County, in 1786. His father was Colonel Allen McLane and his mother was formerly Rebecca Walls. Dr. McLane was the brother of Hon. Louis McLane, minister to England. Colonel McLane, his father, served in the Continental army throughout the Revolution; was a lieutenant in Caesar Rodney's Delaware Regiment; and was afterwards under General Washington at the battles of Long Island, White Plains, Trenton, Princeton and Brandywine. He was a major in Lee's Legion, and served at Paulus Hook, Stony Point and Yorktown. After the war he was a member and Speaker of the Delaware House of Representatives, judge of Court of Common Pleas, marshal of Delaware and collector of the port of Wilmington from 1808 to the time of his death, in 1829. Dr. Allen McLane was educated at Newark Academy and Princeton College, and received his medical diploma from the Pennsylvania University, his preceptor being Dr. Benjamin Rush. Immediately after his graduation in 1811 he commenced practice at New Castle, but soon removed to Wilmington, where he remained until his death, which occurred suddenly, January 11, 1845, from heart disease. Dr. McLane served as surgeon in Caesar A. Rodney's company in the War of 1812; he was one of the first mayors of Wilmington, a member of the vestry of the Old Swedes' Church and one of the founders of Trinity Chapel. He married Catherine G., daughter of George and Mary Thompson Read, June 18, 1812, and his children were Samuel, Allen, Mary, Julia and George, of whom the sons died in early manhood. Dr. McLane was one of the most prominent citi-

¹ In order to demonstrate his confidence in vaccination as a protective agent, it is stated that on one occasion Dr. Black took his little son, Robert, who had been vaccinated some time previously, to a camp of Indians, then at Cooch's Bridge, on their way to Washington, and in which there were some cases of small-pox, and placed him among the diseased Indians. The experiment proving a success, it did much to convince the community of the merits of vaccination.

zens and leading physicians of his city, and his death was regarded as a public calamity. His remains were followed to the graveyard of the Methodist Episcopal Church by the clergy, the mayor and City Council, the members of the bar and medical profession, and a large concourse of his fellow-citizens. The funeral services were performed by Rev. J. McCullough, of the Episcopal Church; Rev. John Kennaday, of the Methodist Church; Rev. William Hogarth, of the Presbyterian Church, and Bishop Lee, of the Episcopal Church.

Dr. Ezekiel Cooper was born near Willow Grove, Kent County, November 28, 1788. He was the son of Hon. Richard Cooper, one of the judges of the Superior Court of Delaware, and Sarah Alford, daughter of Aaron Alford. The ancestors of the family emigrated from England. Dr. Cooper read medicine with Dr. James Sykes, Sr., of Dover, began practice in Camden, Delaware, and in 1822 joined the State Medical Society on a certificate from the Maryland Medical College. His name appears upon the minutes of the society up to 1827, when he removed to Philadelphia, where he died several years later and was buried in St. George's cemetery, Coates Street. He was married, January 25, 1814, to Louisa Baggs, daughter of Andrew Baggs, of Caroline County, Maryland. His children were Richard, Ezekiel, Henrietta, Andrew Baggs and Mary Louisa.

One of the most widely known men in the profession—alike as man and physician—and one whose life linked the early years of the present century to the middle years of its latter half, was Dr. Henry F. Askew, of Wilmington (born 1805, died 1876). Not only was Dr. Askew one of the oldest citizens of Wilmington, but he was a descendent of one of the oldest families of the State. He was a descendant of Sergeant John Askew, who, after the surrender of New Amsterdam, in 1664, accompanied Sir Robert Carr's expedition against Fort Casimir. He was present at the storming of the fort and for his services received the grant of a piece of land near where it was destined that the city of Wilmington should arise and grow, and here his descendants lived and yet live. Henry F. Askew was born June 24, 1805, in a house which afterwards was a part of St. Mary's College. He read medicine under the preceptorship of Dr. William Gibbons and subsequently attended the Medical Department of the University of Pennsylvania, from which he graduated at the age of twenty-one years in 1826. He had a strong inclination to settle for the practice of his profession in the West, and moved to Ohio for that purpose, but soon came back as far as Centreville, Delaware; and it was not long before he returned to his native place, which

proved to be a wise step, for he here attained a great success, not only professionally, but socially. His practice soon became extensive. "While in his prime he was probably out at least half the nights of the year," says one of his contemporaries, and it may readily be believed, for he was as ready to answer a call from the poor as the rich, and, in addition to his purely professional ability, he had a charm and cheeriness of manner and a subtle feeling and tact which go further in the sick-room than medicine. At the time of his death his practice was not only the largest in the city, but in the State. He was an active and influential member of the Wilmington and the State Medical Societies, and the American Medical Association. He was elected president of the last-named society, filled the same position in the State organization, and, also, for several years that of treasurer. As these honors indicate, he was held in high regard not only in the place of his residence, but by the members of his profession everywhere and that high estimation in which he was held was apparently won and held by the sterling qualities of the man almost as fully as by the acknowledged abilities of the physician.

Dr. Askew was a man of strong constitution, active habit of mind and body, and exceedingly sympathetic and social in his nature. Large as was his professional practice and as exacting as were its duties, it could not exhaust his energy nor satisfy his desires, and thus the former found activity and the latter satisfaction in many employments entirely outside of medical study and practice. Close as was his application to his profession, he took a deep interest in politics and in that close-knit of the interests of mankind to be found in some of the secret and benevolent orders; nor was he for all of this less admirable in domestic relations, for he was a model husband and father. Politically he was a Democrat, and when in his prime took a leading place in the management of the party and had a marked influence in that capacity. His devotion to his profession and its exacting demands made it well-nigh impossible for him to accept office, which would remove him from home or engross his time. He was a member of the Council from 1845 to 1847; was postmaster of Wilmington during the last year of Pierce's and the whole of Buchanan's administration; was port physician and physician to the Almshouse several times; was prominently talked of for Governor and United States Senator, and in 1876 was appointed as State Centennial Exposition commissioner. Had he chosen to have entered upon a political career, almost any place at the disposition of the State might have been his. He was an active member of the I. O. O. F., holding in succession the principal offices of the order, and at the time of his death was the oldest Past

Wm. L. Brown

Alfred Russel Wallace

Grand Master in the State. A member of the Delaware Historical Society from its inception, he became its president and held that office for several years, upon his retirement being made president *emeritus*.

But to enumerate offices held and societies identified with would be in the case of Dr. Askew too much of a task. He was a charter member of the Savings Fund Society, founded over fifty years ago; was prominently connected with the founding of the Wilmington and Brandywine Cemetery, and took a leading part in the movement which resulted in the erection of a monument to Dr. James Tilton. It seems, almost, in reviewing Dr. Askew's life, that he knocked at almost every portal of happiness and usefulness, entered in, and was adequate in every one, to better himself and those with whom he came in contact. He became a member of the Methodist Episcopal Church during the year before he died.

Dr. Askew died March 5, 1876, after an illness of considerable length, which his indomitable spirit concealed from the general public, and from every one except those nearest to him.

Dr. Henry Fisher Hall,¹ born in Lewes, September 8, 1789, was the son of Dr. Joseph Hall and Elizabeth, daughter of Henry Fisher. Dr. Hall was educated at the University of Pennsylvania, studied medicine with Dr. John White, and on April 15, 1814, was appointed by President Madison surgeon of the Forty-second Infantry, where he served for seven years and resigned. In 1820 he was made surgeon's mate in the Third Infantry and served with credit in the Northwest. In 1814 Governor Maull commissioned him brigadier-general in Sussex County, and he was subsequently collector of customs at Lewes. He continued the practice of medicine for fifty-four years and died in 1865. His remains were interred in the Presbyterian burial-ground at Lewes. In 1823 he married Hester, daughter of Caleb and Betsy Rodney. Their children were Elizabeth, Margaret F., Joseph R., David, Eliza L., Mary D., Rebecca B., and Henry R. Hall.

Dr. Arnold Naudain² was born at Snowland, the residence of his parents, near Leipsic, Kent County, January 6, 1790. His father was Andrew Naudain and his mother was formerly Rebecca

Snow. Dr. Arnold Naudain was educated at Dover and Princeton and graduated in medicine at the Pennsylvania University from the office of Dr. James Sykes in Dover, where he began his professional career. In 1810 he married Mary, daughter of Thomas Schec, who came here from Holland in 1740. Dr. Naudain was major in the War of 1812; a member of the Legislature and of the State Senate; was United States Senator from 1829 to 1836, when he resigned; collector of port of Wilmington 1841 to 1845. In the latter year he removed to Philadelphia and resumed his professional duties. He lived on Broad Street and assisted in establishing the Green Hill Presbyterian Church, of which he was an elder. In this capacity he was succeeded by his son, who was the fifth generation of Presbyterian elders in the Naudain family. Dr. Arnold Naudain was frequently a delegate to the Presbyterian General Assembly. He died in Odessa January 4, 1872, aged eighty-two years.

Dr. James P. Lofland, a noted physician of Kent County, Del., was born in St. Jones' Neck, Kent County, in the year 1793. His father, Purnel Lofland, was a ship-builder and merchant, who intermarried with Mary Robinson, the daughter of a leading farmer of the Neck. When old enough to attend school, he was sent to the academy at Lewes, which at that time had quite a reputation as a place of learning. He afterwards graduated at the University of Pennsylvania, and entered the office of the celebrated Dr. Benjamin Rush as a student of medicine. He was associated with Dr. Franklin Bache, afterwards and for many years Professor of Chemistry in the Jefferson Medical College, in Philadelphia. After receiving his degree as a Doctor of Medicine, Dr. Lofland settled in the town of Milford, Kent Co., and was engaged in a large and extensive practice until within a year before his death, which occurred in Philadelphia, in August, 1852. Dr. Lofland acquired the reputation of a very skillful and successful physician and surgeon, and stood at the head of his profession in Delaware, being often called in consultation in various parts of the State. Perhaps no other physician of his time enjoyed a wider or greater reputation in the State. His handsome and commanding presence, his genial and courteous bearing and his great conversational powers made him many friends in all parts of the State, and, in fact, none knew him but to admire him. He had a high regard for the usefulness and dignity of his profession, and his charitable feelings and earnest attention to the poor endeared him to all classes, and when he died, he was regretted by all and mourned for as a personal friend. No matter what the circumstances were, in every instance he was prompt to respond to duty, and there are many to-day who cherish his memory as a public

¹ The pioneer of the Hall family in Delaware was Nathan, who had three sons—Colonel David Hall, who served in the Revolution; Peter, a lawyer; and Dr. Joseph Hall. On the mother's side was Dr. Henry Fisher, who had two sons, Henry and John. Henry Fisher was a pilot, and afterwards major in the Revolutionary army.

² Elias Naudin, a Huguenot, and an ancestor of Dr. Arnold Naudain, was naturalized in London, March 8, 1682. His family consisted of his wife, Gabriel Arnaud, and three children—Arnaud, Mary and Elizabeth. The Leroux family was also naturalized at the same time, and with the Naudins, came to this country about 1690. Elias Naudin's son, Elias, great-grandfather of Dr. Naudain, married Lydia Leroux, July 21, 1716. He purchased a very large tract of land near Odessa, about 1716, where he erected a substantial residence with English bricks and native oak, which is still in the family. Elias Naudin was a member of the first Presbyterian Synod in Philadelphia, in 1717.

benefactor. In those days there were not many clocks, as now, and it is said that his watch hung in more houses of the poor, both white and colored, than any other in the county. The same old watch is held as a memento and is now in the hands of a grandson who is preparing to follow the profession of his grandfather.

Dr. Lofland was never an active partisan in politics, but he connected himself with the old Whig party, and up to the time of his death yielded it an ardent and earnest support. He was a great admirer of Henry Clay, and an intimate and social friend of the Hon. John M. Clayton. The doctor served several terms in our State Legislature, and was once the Speaker of the Senate. His death created a void that was hard to fill. He left a widow and four children to survive him; two of the children still reside in Milford,—James R. Lofland and Peter L. Lofland. His widow and two of the children have died since,—one of them the late lamented Dr. Mark Greer Lofland, who succeeded his father in the practice, and gained an enviable position in the profession.

Dr. James P. Lofland took great interest in Masonry, and had great reputation among the craft as a lecturer; he filled almost every position from Master of a lodge to Grand Master of the State. His remains were followed to the grave by an immense concourse of people, and he was laid away with the honors of Masonry, and lies buried in the family grave-yard on a farm near Canterbury, in this county.

Dr. Joseph Hartshorne, the celebrated physician and surgeon, who died near Wilmington August 20, 1850, was born in Alexandria, Va., December 12, 1779. Richard Hartshorne, the pioneer of the family, settled on the highlands of the Neversink in 1669, and became one of the largest landholders in East Jersey. Dr. Joseph Hartshorne, at the age of five years, became a cripple for life. He was resident apprentice and apothecary to the Pennsylvania Hospital, Philadelphia, from 1801, and went as surgeon and supercargo of an East Indiaman in 1806. On his return, he graduated at the University of Pennsylvania (1808), and soon became eminent as a practitioner and surgeon. In 1815–1821 he was surgeon to the Pennsylvania Hospital, and was a member of the Philadelphia Medical Society, the American Philosophical Society, and the College of Physicians. He prepared and published "Boyer on the Bones" in 1806, with appendix and notes. Drs. Edward and Henry Hartshorne are his sons.

Dr. Samuel M. Fisler was born in New Jersey and removed from Port Elizabeth to Smyrna in 1820. He was a graduate of the University of Pennsylvania in 1819 and a member of the Delaware Medical Society in 1822. He married Susan

H., daughter of John and Susan Cummins, of Smyrna. His father was a physician and local Methodist preacher in Port Elizabeth, New Jersey, and a brother, Lorenzo, was a practicing physician in Camden, N. J. Dr. Samuel Fisler died in May, 1868, aged seventy-one years, and was buried in St. Peter's Cemetery, Smyrna.

Dr. Joseph B. Harris was born in Lewes about 1796, and was a medical practitioner of considerable local reputation. He was an active member of the Delaware Medical Society for several years and was a very prolific writer on medical topics. He lived at Smyrna and held the office of auditor of that town. In consequence of mental troubles he abandoned his profession and returned to Lewes, where he died.

Dr. Thomas James Boyd was born at Trappe (now Macdonough), New Castle County, Oct. 15, 1798. His father was John Boyd, a farmer and merchant, and his mother was Mary S., daughter of Thomas Read, D.D., of Wilmington. Dr. Boyd was highly educated and graduated in medicine from the University of Pennsylvania in 1818. He began practicing in Baltimore in 1820, and in 1821 was admitted to the United States navy as surgeon's mate. He was attached to the frigate "Constitution" on her cruise to the Mediterranean in 1821, during which the vessel was visited, among other foreign celebrities, by Lord Byron. In 1824 he was on the war sloop "John Adams" to the West Indies. In 1826, at the age of twenty-eight, he was surgeon of the frigate "Brandywine" on a cruise to the Pacific; was afterwards surgeon of the "Constitution" for a second cruise, and in 1836 was made fleet-surgeon. At intervals, up to this time, Dr. Boyd was on duty at the Washington, Philadelphia, and Brooklyn navy-yards, and his family lived in a handsome residence on Shellpot Hill, near Wilmington. Subsequently he was placed in charge of the Brooklyn Hospital, where he died of paralysis March 26, 1839, aged forty-one years. He was buried in the cemetery of the First Presbyterian Church, Wilmington. In 1824, Dr. Boyd married Mary Ann, daughter of Dr. George Monro, who, with five children, survived him. The latter were Mary Stanley, Harriet M., George Monro, William S. and Thomas James.

Dr. Wm. Draper Brinckle,¹ son of Dr. John and Elizabeth Gordon Brinckle, was born in St. Jones' Neck, Kent County, February 9, 1798. He was first placed under the care of a private tutor and subsequently completed his education at the Wilmington Academy and Princeton College. He began the study of medicine with his father

¹ Dr. Brinckle was the recipient of many testimonials, among them a silver vase from the commissioners of Spring Garden District, Philadelphia, for distinguished professional services as chief of the medical staff of Buttonwood Street Hospital, and member of the Philadelphia Board of Health during the cholera epidemic of 1832.

and was afterwards a student of the celebrated Dr. Physick, graduating in 1820 from the Pennsylvania University. He then practiced in Smyrna for a year, when he returned to Wilmington and removed to Philadelphia in 1825. From 1827 to 1839 he was physician at the Philadelphia City Hospital, on Bush Hill.

Dr. Brinckle was celebrated as a writer on medical, agricultural, and pomological subjects, and was a finished musician. He was president of the American Pomological Society and exceedingly popular in many spheres. He was a member of the Protestant Episcopal Church; a delegate to the Diocesan Convention, at Dover, in 1819; for several years a warden of Grace Church, Philadelphia, and for many years identified with St. James' Church in that city. He died December 16, 1872, and was buried in Mount Vernon Cemetery, near Philadelphia. He was married in April, 1821, to Sarah T., daughter of Henry W. and Adriana Physick, and niece of Dr. Philip S. Physick, in the parlors of the Dickinson house, the site of the present Wilmington Institute. Dr. Brinckle's children were William Henry, attorney-at-law in Philadelphia, deceased; John Dorsey, died, aged sixteen; Adriana Physick; Elizabeth Gordon, died in infancy; Caroline, died in infancy. His first wife died in 1830, and in September, 1832, he married Elizabeth Bispham, daughter of Benjamin and Abigail Reeves, of Philadelphia. Their children were Emily Reeves, married to Edward R. Shubrick; Virginia Gordon, married to Austin E. Brady; Mary Reeves, married to Edward Stewart; Clara Victoria; Benjamin Reeves, deceased; Abigail Reeves, died in childhood; and Fanny Rodney, married to Wm. R. Brinckle.

Dr. William Wells Wolfe was the son of Dr. Jacob Wolfe and Elizabeth, formerly a Miss Burton. Dr. Jacob Wolfe was killed by lightning in the court-house at Georgetown, Delaware, on the 16th of July, 1805, in the thirty-second year of his age. William Wells Wolfe was born July 22, 1799, near Lewes, Sussex County, Delaware. He received his early education at Lewes, Milford and Philadelphia; taught school for awhile in Milford and was principal of the academy at that place; studied medicine under the direction of his uncle, Dr. William Burton, afterwards Governor; entered the University of Maryland at Baltimore, and graduated in 1824. He was married February 2, 1826, to Miss Ann Hazzard, daughter of the Hon. David Hazzard, late Governor, and associate judge of the Superior Court of the State of Delaware. In July, 1823, he became a member of the Methodist Episcopal Church, and remained an active and faithful member until his death. Dr. Wolfe located in Milton and remained there. He was remarkable for the purity of his life and his devo-

tion to his profession. He died March 27, 1866, and was buried in the cemetery of the Milton Methodist Episcopal Church.

Dr. William Collins, son of William Collins, was born at his father's farm, near Smyrna. His mother was Nancy, daughter of James Bellack. Dr. Collins studied medicine under Dr. S. M. Fisher. He was a graduate of the University of Pennsylvania in 1823 and a member of the Delaware Medical Society. He gave promise of becoming eminent in his profession, but died at the age of thirty-six. His remains were buried at the Protestant Episcopal cemetery at Smyrna.

Dr. Elisha Sheekley Rickards was born in Milford in 1799, and died in Baltimore, while on a visit, November 13, 1882. He was the only son of Molton Rickards. He was educated in Milford and a graduate of the Medical Department, University of Pennsylvania. He married Margaret Leland and located in Georgetown, Delaware, where he practiced medicine thirty years. He removed to Philadelphia in 1851 and continued his professional career. He was a member of the Delaware Medical Society and the American Medical Association.

Dr. William Bonwill¹ was the son of Michael Hall and Mary Moore Bonwill, who settled in Delaware from Maryland in 1790, and established the Leamington Mills. William was one of four children who were born here, and he did not have the advantages of a good education. He, however, overcame this difficulty by his energy and perseverance, and after reading medicine with Dr. Lofland, of Milford, obtained his diploma from the University of Pennsylvania. He began a successful practice at Camden, this State, and married the widow of Dr. Ezekiel Cooper. Of his three children, Dr. Bonwill named one William Gibson in recognition of the kindness of Professor Gibson, of the University of Pennsylvania, who had befriended him in a former financial extremity. In 1849, after the death of his wife, he removed to Philadelphia, but soon returned to Delaware, where he died in 1864. Dr. Bonwill was of a very inventive turn of mind. He constructed a church organ and suggested several other important appliances.

Dr. William Alexander Tatem was born in Philadelphia, June 10, 1800. He was the son of Samuel Tatem, a tailor. His mother was formerly Mary Alexander. Dr. Tatem's youth was spent on a farm, but at the age of twenty years he was led to study medicine, through the death of a friend from what he believed to have been unskillful treatment. He read medicine with Drs. Charles B.

¹ The Bonwill family were originally from Normandy, and in the time of William, Duke of Normandy, and later in English history, were conspicuous. When Henry VI. was made a prisoner at the battle of Southampton he was placed in charge of William, Lord Bonville, who was captured at the second battle of St. Alban's and beheaded.

Fithian, of Woodbury, N. J., and Joseph Parrish, of Philadelphia, and graduated in 1823. He began practice at Frederica, removed in 1827 to Denton, Maryland, and in 1852 settled in St. George's permanently. He was a member of the Delaware Medical Society from 1824, and a strict Presbyterian. In 1818 Dr. Tatem married Miss Maria West. He died in March 27, 1877, and was buried in St. George's Cemetery, in New Castle County. His first wife dying in 1819, he was married again, May 19, 1824, to Miss Martha W. Tabele, whose children were Phæbe; Ann H. wife of Prof. I. W. Mears, of Union College; Wilhelmina, widow of Dr. Wm. M. Tilden; Anna L., Benjamin H. and three others who died in infancy.

Dr. Robert Hiram Griffith, son of Seth Griffith, was born in Concord, Sussex County, in 1800. His mother was Anna Houston, daughter of Robert Houston, of Sussex. From the age of thirteen years, Dr. Griffith lived with and was educated by his uncle at Cynthiana, Kentucky. He returned to his native place in 1822 and finished reading medicine with his cousin, Dr. Francis Phelps, of Federalsburg, Md., graduating at the Baltimore Medical College in 1824. He practiced successfully at Laurel, Sussex County, until 1836, when he went West and settled first at Palmyra, Missouri, and then in Hannibal, where he served four years as receiver of public money of the land office. He died January 4, 1864, leaving a large estate. His remains were interred in the Riverside Cemetery, at Hannibal. In 1828 Dr. Griffith married Miss Mary A. Houston, eldest daughter of John and Elizabeth Houston, of Concord, this State, who shared his estate with Mrs. Ann Ellegood, of Concord, sister of Dr. Griffith.

Dr. Wm. W. Baker settled in Wilmington from Chester County, Pennsylvania, and joined the Delaware Medical Society in 1822. He had a large practice and stood high in the ranks of his profession.

Dr. George R. Baker was a younger brother of Dr. William W. Baker. He was born in Pennsylvania, settled in Wilmington and joined the Delaware Medical Society in 1841. He was a graduate of the University in 1836 and died at the age of forty-five.

Dr. John Owens was born at St. Johnstown, Sussex County. He read medicine with Dr. Joseph Sudler, of Milford, and commenced practice in that place about 1807. In 1809 he married Mary James, the daughter of Isaac James, a tanner, of Milford, who was considered one of the prosperous men in that community. Dr. Owens died April 15, 1845, and was buried in the Protestant Episcopal Church-yard in Milford, leaving nine children,—William Henry, John, Edwin, Mary Jane, John, Frederick J., Isaiah, Franklin and Sally.

Frederick is a physician at Vernon, Kent County. Dr. Owens' wife and one daughter were legatees under the will of Col. Benj. Potter. Mrs. Owens died two years after her husband's death.

Dr. John D. Perkins was a graduate of the University of Maryland, and in addition to practicing medicine, was a Methodist local preacher. He removed to Smyrna, and was greatly respected in his dual character. He joined the Delaware Medical Society in 1824. In his later years his mind became impaired. He left a widow and five children, one of whom is a practicing physician in Philadelphia.

Dr. James Couper, son of Dr. James Couper and one of the most prominent of Delaware's practitioners, was born in Christiana, October 3, 1803, but a few years later removed with his parents to New Castle. He was educated in Newark, and in New Garden, Pa., and in 1824 graduated from the University of Pennsylvania Medical School. Dr. George McClellan was his preceptor. Dr. Couper began practice near Downingtown, Pa., but soon returned to New Castle, where he ranked among the leading physicians. He was one of the most active members of the Delaware Medical Society, and represented that body repeatedly in the American Medical Society, of which he was a vice-president. He was a zealous member of the Presbyterian Church. Although at one time in comfortable circumstances, he was one of the sufferers by the failure of the Bank of the United States. Dr. Couper died suddenly of heart disease, and his death was the subject of much regret in the community of which he had been a very popular member.

Dr. Robert R. Porter was born in Wilmington in the year 1811. He was a son of Robert Porter, founder of the *Christian Intelligencer*, and for many years editor and publisher of the *Delaware State Journal*, and one of the most influential and highly respected men of his day in Wilmington. The son obtained his preparatory education in the best schools of his native town, and in the famous academy of Rev. Dr. Magraw at West Nottingham, Chester County, Pa. Early in life he evinced great fondness for the profession of medicine, and after leaving school prepared himself for it with great assiduity. He entered the University of Pennsylvania and was graduated M.D. from that institution in 1835. Immediately after his graduation he entered the Philadelphia Almshouse Hospital, afterwards called Blockley, and there enjoyed the medical and surgical teachings of the professors of the University of Pennsylvania. Subsequently he was elected resident physician of the Frankford Lunatic Asylum, and while there prepared and published in the *American Medical Journal* his observations on the condition and treatment of those under his care. While

Alfred R. T. 1880

Robert H. Porter

Robert H. Porter

in Philadelphia he assisted Dr. Morton in the preparation of the poem to his work on Phthisis Pulmonalis. In 1836 he returned to Wilmington and settled in practice, where as a young man of much promise, ardently devoted to his profession, he soon acquired a large and lucrative practice. Being also a man of enterprise and public spirit, sympathizing heartily with the interests of the community around him, he soon took a leading position in public affairs, but still continued his professional labors. He was elected a member of the State Medical Society in 1841; continued a member until his death; served as its president in 1858, and was repeatedly a delegate to the American Medical Association. He was a director in the Bank of Delaware for a long period, was a member of City Council for many years and served as chairman of the Financial Committee with the greatest fidelity of purpose. He became extensively engaged in real estate operations in the eastern part of Wilmington, purchasing many tracts of land, improved some of them and sold others on improvement contracts, requiring little or no cash payment and giving long credits. In all these contracts he was liberal and generous, seeking to benefit others as well as himself. Many men of small means thus secured homes through his courtesy and liberality.

During his long career as a physician in Wilmington he acquired an extensive knowledge of his profession, and won prominence as a practitioner. He possessed high professional honor, was uniformly courteous and polite toward the members of the medical fraternity, and was held in highest esteem by all with whom he associated. His life was marked by a conscientious devotion to the welfare of his patients, to the support of every enterprise that resulted in public good, and to the development of that broad principle of humanity that made the world better for having lived in it. Some of his personal characteristics were great equanimity of temper, affability of manner, kindness of heart and purity of character.

Dr. Porter was not only a diligent student of the modern works of his own profession, but was well versed in history and general literature. When the Delaware State Historical Society was about to be organized he supported the enterprise with all the enthusiasm of his nature. It was greatly through his efforts that the society was removed to its present rooms. His taste was cultivated, his reading extensive and his love of knowledge ardent. He collected about him a choice library in which he found a solace from the labors of his profession. Firm in his religious convictions and conscientious in carrying them out. For many years, until his death in 1876, he was a prominent member of the Hanover Street Presbyterian Church.

Dr. Robert Montgomery Bird,¹ the celebrated author, dramatist and journalist, was born in New Castle, February 5, 1805. He was educated at Germantown and was a medical graduate of the University of Pennsylvania, but did not devote any considerable portion of his life to that profession. A year after receiving his diploma he entered upon the literary career which afterward distinguished him. He resided in Philadelphia until 1839, when he removed to New Castle, where he lived until 1847. In the latter year he returned to Philadelphia and was associated with Morton McMichael in the publication and editorial management of the *North American and United States Gazette*. In 1841-43 he was Professor of Materia Medica in the Pennsylvania Medical College. He married Mary Eliza, daughter of Philip and Lucy Woodbridge Mayer, in July, 1837, and his only child was Frederic Mayer Bird, born June, 1838. Dr. Bird died of brain fever January 23, 1854, and was buried in Laurel Hill Cemetery, Philadelphia.

Dr. Alex. Lowber was born in Newark, October 4, 1805. He was the son of Thomas Lowber, merchant and farmer, of Frederica, and Catherine, daughter of Alexander MacBeth. Dr. Lowber received his education at the Newark Academy and from Enoch Lewis, a famous tutor of Chester County. Dr. Allen McLane was his medical preceptor, and his diploma was awarded by the Pennsylvania University in 1827. He entered upon his professional career at Greensboro', removed to Frederica in 1830 and settled in Newark in 1842. He was secretary of the Delaware Medical Society in 1834. On January 9, 1838, he married Adeline, daughter of Col. Henry Whiteley, and their children were Catherine, Dr. Alexander, Adeline Eugenia, and Mary Steele, who died in infancy. Dr. Lowber died August 26, 1883, and was buried in the cemetery of the Head of Christiana Church.

Commodore Jacob Jones, of whom a sketch will be found in the chapter on the War of 1812, was a practicing physician in Dover before he entered the Navy. He studied with Dr. James Sykes, Sr., whose sister he married.

Dr. William Harris practiced in Smyrna for several years, and subsequently removed to Lewes. He died in the latter place.

Dr. Edward D. Dailey was a resident of Smyrna, and a member of the Delaware Medical Society in 1854. He was a surgeon in the late Civil War; now dead.

Dr. John Brinckloe, who practiced in Milford, was a member of the House of Representatives

¹ Dr. Bird was the author of "Calavar, the Infidel," "Hawk of Hawk-Hollow," "Nick of the Woods," "Sheppard Lee," "Peter Pilgrim" and "Robin Day," and dramatized "The Gladiator," "The Broker of Bogota," "Oralooza," "Metamora" and "Pelopidas."

1. The first group of variables, *demographics*, includes age, sex, and marital status. The second group, *education*, includes years of schooling and highest grade completed. The third group, *employment*, includes whether the respondent is employed, the type of job, and the number of hours worked per week. The fourth group, *income*, includes the respondent's annual income and the number of people in the household. The fifth group, *health*, includes whether the respondent is in good health, whether they have a chronic condition, and whether they have a disability. The sixth group, *social capital*, includes whether the respondent is a member of a community organization, whether they have a strong sense of community, and whether they have a strong sense of civic responsibility. The seventh group, *attitudes*, includes whether the respondent is pro-environment, whether they are pro-sustainability, and whether they are pro-social responsibility. The eighth group, *behaviors*, includes whether the respondent recycles, whether they conserve energy, and whether they use public transportation. The ninth group, *values*, includes whether the respondent values the environment, whether they value sustainability, and whether they value social responsibility. The tenth group, *demographics*, includes age, sex, and marital status. The eleventh group, *education*, includes years of schooling and highest grade completed. The twelfth group, *employment*, includes whether the respondent is employed, the type of job, and the number of hours worked per week. The thirteenth group, *income*, includes the respondent's annual income and the number of people in the household. The fourteenth group, *health*, includes whether the respondent is in good health, whether they have a chronic condition, and whether they have a disability. The fifteenth group, *social capital*, includes whether the respondent is a member of a community organization, whether they have a strong sense of community, and whether they have a strong sense of civic responsibility. The sixteenth group, *attitudes*, includes whether the respondent is pro-environment, whether they are pro-sustainability, and whether they are pro-social responsibility. The seventeenth group, *behaviors*, includes whether the respondent recycles, whether they conserve energy, and whether they use public transportation. The eighteenth group, *values*, includes whether the respondent values the environment, whether they value sustainability, and whether they value social responsibility.

S. F. Vaughan

and of the Senate. He was Speaker of the Senate when he died, March 18, 1828, aged thirty-five years.

Dr. Thomas Mackie Smith was born in Philadelphia, June 27, 1809. He was the son of Francis Gurney Smith and Eliza, daughter of Thomas and Eliza Mackie. Dr. Smith was educated at the University of Pennsylvania, and also received his medical diploma from that institution, graduating in 1831. He served a year as resident physician of the Philadelphia Almshouse; in 1834 settled on the Brandywine, four miles above Wilmington. He joined the Delaware Medical Society in 1847, after returning from a trip to Europe for his health. In 1852 he died suddenly of rheumatism, from which he was a sufferer for years. He was buried in the Du Pont family cemetery. Dr. Smith was a conscientious member of Trinity P. E. Church, Wilmington, and was celebrated for his benevolence. He was married September 18, 1834, to Eleuthere, daughter of Eleuthere Irene and Sophie Madeleine Du Pont, who survived her husband twenty-four years. They had no children.

Dr. Charles Henry Black was born in Glasgow, New Castle Co., March 23, 1810. He was the son of Dr. Samuel Henry Black, of Glasgow, and Dorcas Armitage Middleton, daughter of Robert Lewden Middleton, and the grandson of David and Margaret (Ferris) Black. He was educated at the Newark Academy; read medicine with Dr. Allen McLane, of Wilmington, and graduated at the University of Pennsylvania in 1830. He settled in Delaware City in 1830; removed to New Castle in 1840 and was appointed clerk of the peace until 1850. While in New Castle he became interested in agriculture and made large purchases of land in New Castle County, which, in company with the late William Couper, New Castle, he was engaged in cultivating when he died, February 8, 1852. Dr. Black was a member of the Levy Court, trustee of the New Castle Commons, director of the Farmers' Bank of New Castle and held various other positions of trust. He was buried in the Episcopal Cemetery of New Castle. In January, 1837, he married Ann, daughter of John and Margaret (Wiley) Janvier, and left a family of eight children—John Janvier, Margaret Janvier, Dorcas Armitage, Charles H., Harriet Lawrence, William Janvier, Frank Middleton (deceased) and Samuel Henry.

Dr. Edward Dingle was the son of the Rev. Edward Dingle, rector of Christ Church, Snow Hill, Md. He studied medicine and settled at Dagsboro', where he died in 1841. He was one of the last judges of the Superior Court of the State under the Constitution of 1792, and a member of the Constitutional Convention of 1832.

Dr. Edward C. Dingle, a native of Kentucky,

was born about 1810, and brought, when quite young, to this State. He was the nephew of Dr. Edward Dingle, judge of the Court of Common Pleas of Kent County. Dr. E. C. Dingle was a graduate of the Jefferson Medical College, and was elected a member of the Delaware Medical Society in 1827. He began practice in Millsboro', Sussex County, and married a daughter of Paul Waples, of Dagsboro' Hundred. He removed to Philadelphia, and in 1845, while on his return, was taken suddenly ill at Milford and died. His remains were interred on the farm of his father-in-law. His daughter Emma survived him and is a resident of Texas.

Dr. James Schee Naudain, a member of the Delaware Medical Society from 1832 to '84, was the son of Hon. Arnaud Naudain, M.D., and Mary Schee, whose ancestor was Arnaud, the grandson of Elias N. and Ghael Arnaud Naudain, Huguenot refugees, naturalized in London in 1682. Dr. James S. Naudain was born in Dover, September 24, 1811. He was educated at West Point, and attended medical lectures in Baltimore and Philadelphia. He commenced the practice of his profession in Middletown, Del., where his father had previously been located for thirteen years, and prosecuted it with marked success. He married Ann E., daughter of James and Jemima Foard Blakiston, of Maryland, in 1832. After the death of his wife, Dr. Naudain made his home with his father, in Wilmington, where he died May 23, 1884, a year later, and was buried in the cemetery of Drawyer's Church.

Dr. Andrew Naudain, son of Andrew Naudain, of Kent County, was born December 30, 1812, and on the death of his mother, a month later, was adopted into the family of his brother, Dr. Arnold Naudain, with whom he subsequently read medicine, graduating from Jefferson College in 1836, and joining the Delaware Medical Society. He began practice near Dover, whence he removed to Philadelphia and engaged in other business. He married Virginia Chambers, of that city. Subsequently he located at West Farms, New York, and resumed practice. He died there in 1864, leaving three orphan children, his eldest daughter becoming the wife of Dr. Robie, of the State of Massachusetts.

John Vaughan, M.D., one of the most eminent physicians of his day, was born in Uwehlan township, Chester County, Pa., June 25, 1775. His grandparents, John and Ruth Vaughan, were both of Welsh descent, and resided in the same county. Joshua Vaughan, his father, married Jane Taggart, and during the period of the Revolution was deputy sheriff of Chester County, and custodian of the prison. In 1780 he became a member of the First Baptist Church of Philadelphia. In 1787 his membership was transferred to the church at

1881

the 1990s, the number of people in the world who are illiterate has increased from 1.1 billion to 1.5 billion. The number of illiterate people in the world is projected to reach 1.8 billion by the year 2015. The number of illiterate people in the world is projected to reach 2.1 billion by the year 2020. The number of illiterate people in the world is projected to reach 2.4 billion by the year 2025. The number of illiterate people in the world is projected to reach 2.7 billion by the year 2030. The number of illiterate people in the world is projected to reach 3.0 billion by the year 2035. The number of illiterate people in the world is projected to reach 3.3 billion by the year 2040. The number of illiterate people in the world is projected to reach 3.6 billion by the year 2045. The number of illiterate people in the world is projected to reach 3.9 billion by the year 2050. The number of illiterate people in the world is projected to reach 4.2 billion by the year 2055. The number of illiterate people in the world is projected to reach 4.5 billion by the year 2060. The number of illiterate people in the world is projected to reach 4.8 billion by the year 2065. The number of illiterate people in the world is projected to reach 5.1 billion by the year 2070. The number of illiterate people in the world is projected to reach 5.4 billion by the year 2075. The number of illiterate people in the world is projected to reach 5.7 billion by the year 2080. The number of illiterate people in the world is projected to reach 6.0 billion by the year 2085. The number of illiterate people in the world is projected to reach 6.3 billion by the year 2090. The number of illiterate people in the world is projected to reach 6.6 billion by the year 2095. The number of illiterate people in the world is projected to reach 6.9 billion by the year 2100.

by **James Davidson, a member**

1. The first of these is the fact that the United States has a large and growing population of people who are not citizens of the United States. This is a result of the large number of immigrants who have come to the United States in recent years, and the fact that many of these immigrants are not naturalized citizens.

S. nardus was first recorded from the island of Sardinia in 1897. It was later found growing abundantly together with *S. nardus*.

S. Vaughan

Brandywine; he was ordained pastor of this church, and also preached at Bethesda Church. He was an eloquent and impressive speaker, and loved and revered by his people. He died August 30, 1808.

Dr. John Vaughan, his son, was educated at Chester, where he was carefully taught the English branches, and obtained a knowledge of the classics. This acquirement was, however, rendered more perfect by his diligent and close attention to classical literature in after-life. He studied medicine with Dr. William Currie, of Philadelphia, and attended medical lectures at the University of Pennsylvania in 1793 and 1794. In March, 1795, he located for the practice of his profession at Christiana Bridge, in Delaware, where he continued until 1799, when he removed to Wilmington. His scientific attainments and success speedily introduced him into an extensive practice in Wilmington, and acquired for him a reputation which few men of his early age have ever had the good fortune to enjoy. Among his intimate friends were many persons of eminence and celebrity.

He was a corresponding member of the Philadelphia Academy of Medicine, honorary member of the Medical Society of Philadelphia, member of the American Medical Association, and an active member of the Delaware Medical and Philosophical Societies. Before the latter society, in 1799 and 1800, he delivered courses of lectures on chemistry and natural philosophy in the Town Hall at Wilmington. In 1802, when the yellow fever raged in Wilmington, he was unremitting in his care of the persons who were afflicted with that dread disease, being the only physician who remained during the continuance of that fearful epidemic.

The next year, at the request of the American Philosophical Society, he wrote a pamphlet entitled "A Concise History of the Yellow Fever." During the winter of 1806-7 his health became gradually impaired; his constitution naturally weak, was evidently yielding to the fatigue and exposure necessarily incident to a very extensive and laborious practice. In March, 1807, he contracted a severe cold, was attacked with a violent cough, which, after continuing for several days, developed into typhoid fever, and in the course of one week deprived medical science of a bright ornament and society of a highly-esteemed and useful member. He died March 25, 1807. His publications were an edition of Dr. Smith's Letters, a "Chemical Syllabus," and numerous communications on a variety of subjects to the *Philadelphia Medical Museum* and the *New York Medical Repository*. He also published "Observations on Animal Electricity," in explanation of the metallic operation of Dr. Perkins, the object of which was to explain the operation of the metallic tractors, for which he was a zealous advocate.

In manner and appearance Dr. Vaughan was sedate and thoughtful—but in his intercourse with the afflicted he was always affable and peculiarly kind and gentle. It was truly said of him, "the tears of the poor and friendless bedew his memory, for his bosom was the seat of humanity and feeling, kindness beamed in his countenance and active benevolence warmed his heart."

Dr. John Vaughan was married in 1797 to Eliza, daughter of Joel Lewis, marshal of Delaware. He left four children, of whom Dr. Joshua Franklin Vaughan was one. He was born in Wilmington, Del., in 1802, and, like his father, he adopted the profession of medicine, and practiced in Wilmington, having graduated from the Medical Department of the University of Pennsylvania in 1823. He married Louisa M. Sellars, and died in the year 1834, leaving one son, J. Frank Vaughan.

Dr. J. Frank Vaughan was born in Wilmington, Delaware, March 12, 1833; he was the son of Dr. Joshua Franklin Vaughan, above mentioned. He was educated in Wilmington.

He then entered the office of Dr. Henry F. Askew as a student of medicine, at the same time attending the regular course of lectures at the University of Pennsylvania.

He graduated from the Medical Department of said institution in 1854, and immediately commenced the practice of his profession in Wilmington. He was an active member of the Delaware Medical Society, continuing his membership even after he had ceased the practice of his profession; being very deeply interested in biological research, especially through the medium of the microscope.

In 1857 he married Mary, the only daughter of Benjamin Masden, a wealthy retired English gentleman. After his marriage, the Civil War breaking out, he devoted his time and ability to the furtherance of the Union, which he so greatly loved, holding many important and arduous positions during that most trying period. He was prominent in the formation of the Union League and was chosen its president, also serving as chairman of many committees, being always foremost and unflagging wherever his duty called, in season and out.

Under the severe strain consequent upon these duties his health gave way and he was forced to abandon his practice.

His health continued unimproved,—he suffered acutely from rheumatism, and finally, on July 15, 1866, he died, leaving a widow and three children—two sons and a daughter, named respectively, William, B. Masden, and Annie M.

Dr. Vaughan was a man of handsome presence and most charming manner, of sterling worth and integrity, and great kindness; he was honored

and admired by all, and loved by those who knew him well.

Dr. William H. Barr,¹ of Middletown, Delaware, was the son of Dr. Martin and Jane Adams Barr, of the same place. He was a graduate in medicine of the University of Pennsylvania in 1850 and immediately began practice in Middletown, and became a member of the Delaware Medical Society in 1873. Dr. Barr was identified with the Episcopal Church, and was celebrated for his piety and his success in his profession, to which he devoted all his time and energies. He died suddenly, on the 13th of May, 1884, and was buried in the Forest Cemetery. Dr. Barr never married.

Dr. Richard S. Culbreath was a native of Frederica. He studied medicine with Dr. Cloud, at Annapolis, Md., graduated and joined the Delaware Medical Society in 1841; removed to Smyrna and died in 1857. Dr. Culbreath left a widow and five children, one of whom, George S., was a surgeon in the United States navy, and was lost on the coast of North Carolina in that memorable storm in which the United States ship "Huron" was wrecked. His body was buried on the coast, and afterwards disinterred by his brother Richard and brought to Smyrna for interment in St. Peter's cemetery, by the side of John G. Black, his wife's father.

Dr. John Merritt was born at St. George's, New Castle County, March 21, 1816. He was the son of John Merritt, who was the first collector of the District of Delaware after the War of 1812, and during his life was engaged in responsible public positions. His occupation was that of a farmer. The family descended from the Swedes, and owned property in what was called Vance's Neck, in St. George's Hundred; his mother's maiden-name was Elizabeth Van Home.

Dr. Merritt was one of four brothers, all of whom were physicians. He was educated at the old Middletown Academy, studied medicine with Dr. Cuthbert S. Green, of Middletown, and received his diploma from the University of Pennsylvania in 1843. He became a member of the Delaware Medical Society and began practice in Middletown, where he remained until 1856, and was for several years president of the academy. In 1856 he was appointed consul to Tunis, but resigned in a year and returned to his practice in Middletown. In

1860 he was appointed clerk of the peace of New Castle County by Governor Burton, in which office he was retained by Governor Saulsbury. Dr. Merritt was a member of the Episcopal Church. He died suddenly of apoplexy and was buried at St. Anne's Church, Middletown. His wife was Sarah Elizabeth, daughter of Peter B. Delaney, of New Castle, to whom he was married in 1844. They had five children, of whom only one, John, survives.

Dr. Thomas Cahall, born at Burrsville, Kent County, Maryland, June 19, 1819, was the son of Archibald Cahall. He was educated at Denton, Md., and studied medicine with Dr. Gove Saulsbury, of Dover, graduating from Jefferson Medical College in 1848, when he located permanently at Frederica. He was a member of the Delaware Medical Society; was a State Senator from 1863 to 1867 and an influential member of the Methodist Episcopal Church. He died in July, 1885. Dr. Cahall was married, September 4, 1849, to Sarah A., daughter of Thomas and Elizabeth Sipple Vickrey, and their children are Thomas V. Cahall, a physician practicing in Dover, and Samuel Cahall.

Dr. Charles Edward Ferris,² born in Pencader Hundred, New Castle County, December 23, 1820, was the son of Jacob and Susan Whann Ferris. He was educated at the New London and Newark Academies and Delaware College; attended lectures in the Medical Department of Yale College and obtained his diploma from Jefferson College in 1849. He located at Newark, and in 1851 was elected Professor of Chemistry in Delaware College until 1858. In 1859 he removed to New Castle, established a drug-store and practiced medicine; in 1864 was appointed surgeon to the military hospitals, Alexandria, and afterwards attached to the Ninth Delaware Regiment, at Fort Delaware, as assistant surgeon, and was mustered out of service with that command in January, 1865. Dr. Ferris then returned to New Castle, where he remained until his death, March 30, 1881. He was buried in the Pencader Presbyterian cemetery. His wife, Maria Louisa, was the daughter of Samuel Garrett.

Dr. Benjamin F. Chatham was born in Mullica Hill, New Jersey, in 1821, and graduating from the Pennsylvania School of Medicine in 1846, settled at Leipsic, this State. Dr. Jump, of Dover, was his preceptor. In 1847 he became a member of the Delaware Medical Society. From Leipsic

¹ The male ancestors of the Barr family all bore the names of John or Martin. Their family dated back to the twelfth century. They were always Protestant, and belonged to the Albigenses. In 1590 they removed to the South of France, near Languedoc, and remained there until the revocation of the Edict of Nantes forced them to flee to England. There they met William Penn, and selling all the family jewels came with him to America, and settled in Pennsylvania, near Lancaster city. There they purchased thirty thousand acres of land. The head of the family, John Barr, built or purchased a mill, and during the Revolutionary War supplied Washington at Valley Forge with flour. John and Martin were born there. The latter studied medicine in Philadelphia with Dr. Benjamin Rush, graduated at the University of Pennsylvania in 1816, and settled in Middletown, where he died in 1874.

² On February 16, 1730, Robert Ferris, from the North of Ireland, bought from James Sykes two hundred and eighty acres of land in Pencader Hundred, which Sykes had purchased from John Welsh, and he from the original Welsh proprietors. This property is now in the possession of D. Brainerd Ferris, brother of Dr. Charles E. Ferris. Robert Ferris died in 1749; and his son William, who married Jane Steel, bought in 1750, of Henry Whiteside, a tract of land in Pencader Hundred of one hundred and fifteen acres, which is now in possession of William I. Ferris, his great-great-grandson. William Ferris died in 1760; his son, Jacob, married Kesia Sharp, and died in 1818. His son was the father of Dr. Chas. E. Ferris, who was the second of four children. He died February 22, 1858.

Charles

... and was ...

The first of these was born at St. George's, New York, on 10 March 1816. He was educated at the University of the Holy Spirit for the priesthood and then at the West of 1842, when he was ordained into the priesthood. He was a priest in America until 1860, then he went to Sweden, and served parishes in the dioceses of Västerås and Skövde. He died at Halmstad in 1885. His mother's first name was Anna, with Västerås.

The Newell was a colorful character, and a when we spoke to him. He was educated at the old Andover Academy, studied medicine with Dr. Charles S. Green of Middletown, and received his diploma from the University of Pennsylvania in 1866. He became a member of the Denison Medical Society and was a lecturer in Middlebury, where he remained until 1875 and was afterwards vice-president of the association. In 1880 he was elected professor of the subject. In 1882 he was promoted to full professor, but resigned in a year, and returned to his private life in Middletown.

[illegible][illegible]

He was a member of the First Baptist Church of this city, and a physician. But he was somewhat of a reformer. He was a member of the Independent Church of this city, and of the First Baptist Church of Middletown. His wife was Elizabeth, the sister of Peter B. Johnson, of Middletown. He had five children, of whom only one, John, survives.

Dr. Thomas Chas. H. Bond, of Barstow, Cal., is County, Maryland, June 20, 1881, was born at Annapolis, Md. He was educated at the University of Maryland, and studied medicine with Dr. J. C. H. Bond, of Dover, graduating from the University of Maryland in 1885, when he received his M.D. degree. He was a member of the College of Physicians, Baltimore, Md., and an instructor in medicine at the Maryland College of Physicians, Baltimore, Md. He was married, September 4, 1885, to Julia A., daughter of Thomas H. Bond, of Annapolis, Md. He and his wife are now residing at Annapolis, Md., and are practicing medicine in the city of Annapolis, Md.

Dr. Charles Lewis and Peck, residing in the Hundred, New Castle County, Delaware, 1890, was the son of Samuel Lewis, of Leeds. He was educated in the New York and Newark Academies and University College, and gave lectures in the Medical Department of the latter, and obtained his degree in medicine from the same place in 1840. He lectured at Newark, and was elected Professor of Chemistry in the College until 1848. In 1850 he removed to the Episcopal Church, and during the same year, being in 1854 was appointed superintendent of the normal schools Alexandria, and father of the late Nathaniel Lawrence Robinson, M.D., as a general surgeon, and was married, at view with that command in the army, and is then returned to New Castle County, until his death, March 20, 1894. He was in the Episcopal Presbyterian community with, Maria Louisa, was the daughter of Captain A.

Dr. Benjamin F. Chatham was born in 1811, New Jersey. In 1837 he graduated from the Pennsylvania School of Veterinary Medicine at Philadelphia. He was his country's first veterinarian. In 1847 he was elected to the Delaware Medical Society, the

[illegible]

Lucian Chandler

he removed to Wilmington, and thence to Odessa, where he was made cashier of the New Castle County Bank. In 1867 he was appointed assistant cashier, and subsequently cashier of the Philadelphia National Bank. Dr. Chatham died in Nov., 1879. He was a member of the Fortieth Street Methodist Episcopal Church of Philadelphia. Dr. Chatham's wife was Elizabeth, daughter of Cornelius P. Comegys, late Governor of the State of Delaware, who still survives him. He left several children.

Dr. James W. Thomson was born in Virginia, and was a medical graduate of the University of Virginia. He removed to Wilmington about 1830, and soon obtained a good practice, which gradually increased until he ranked among the first physicians of that city. He also became interested in agriculture, and, with Manuel Eyre, of Philadelphia, purchased a large tract of land about three miles east of Wilmington. This speculation did not prove successful, and from various causes, Dr. Thomson's professional business declined, until, eventually, with broken health and impaired mind, he removed to Philadelphia about the year 1868. He died in 1882. He became a member of the State Medical Society in 1828, and in 1841 was elected president. He was president of the State Agricultural Society, and took an active part in the agricultural and horticultural exhibitions which were annually held in Wilmington. He married the daughter of Colonel Robinson, of New Castle County.

Dr. John Kintzing Kane was born in Philadelphia, December 18, 1833. He was the son of John Kintzing Kane, a native of Albany, New York, whose father was Elisha Kane, son of John and Sybil Kent Kane, and whose mother was Alida Van Rensselaer, daughter of General Robert Van Rensselaer. John Kintzing Kane, the elder, was a resident of Philadelphia, a lawyer and judge of the United States District Court for Pennsylvania, and his wife was Jane Duval, daughter of Thomas Leiper. Dr. John K. Kane was educated at the University of Pennsylvania. He spent a year in Maine with Alexander Dallas Bache, superintendent of the Coast Survey, and read medicine with Dr. John K. Mitchell and Dr. S. Wier Mitchell, graduating at the Jefferson College. He passed an examination before the Naval Commission at Washington, and sailed on the polar expedition sent out in 1854 to search for Dr. Elisha Kent Kane, his brother. The expedition used the government vessel "Rescue," in connection with the "Arctic," and after an absence of a year, returned with the celebrated explorer. Dr. John Kane, on their return, accompanied his brother Elisha to Cuba, and remained with him until he died. He then went to Paris to pursue his medical studies, and returned to Philadelphia

to practice. In 1861 he was appointed army surgeon at the Cairo (Illinois) Hospital, and subsequently surgeon at the Government Hospital at Chester, Pennsylvania, where he remained a year, attending to a private practice at Wilmington at the same time. In 1868 he was appointed surgeon of the Philadelphia, Wilmington and Baltimore Railroad Company; in 1876 was a commissioner to the Centennial Exhibition; and in 1879 was elected president of the Delaware Medical Society. Dr. Kane was highly educated, a finished linguist, very literary and domestic in his tastes, and was somewhat of a musician and artist. He was greatly esteemed as a physician and citizen. He died at Summit New Jersey, March 22, 1886, after ten days' illness from erysipelas. At the time of his death he was on a visit to a sick daughter. Dr. Kane was buried in the cemetery of the Old Swedes' Church. His wife was Mabel, daughter of Hon. James A. Bayard, to whom he was married October 1, 1863. Their children were Annie Frances, John Kintzing, Jean Duval Leiper, Florence Bayard, Elizabeth Bayard, James A. Bayard, John Kent and Robert Van Rensselaer.

Swithin Chandler, M.D., of Faulkland, was born in Mill Creek Hundred, New Castle County, Delaware, January 5, 1830. The Chandlers are supposed to have been Normans who went over to England with William the Conqueror. In the parish of Wilcot, in England, the records show the entries of marriages and baptisms dating back to 1568. George Chandler, the ancestor of the family in this country, left his home at Greathodge, Wiltshire, England, in 1687, with his wife Jane and seven children, named as follows: Jane, George, Swithin, Thomas, William, Charity and Ann. The father died at sea, December 13th of that year. Swithin, who was born Sixth Month 24, 1674, married Ann ———, and they had twelve children. The sixth, Swithin, born Tenth Month 1, 1715, married Ann Wilson, and they had eight children, the first being Esther, born Seventh Month 4, 1740. George, another son of the ancestors George and Jane, married Ruth Bezer in 1698. Their first child, George, married Esther Taylor in 1724, and *their* first child, Isaac, was born Tenth Month 30, 1732. He, being a great-grandchild of the ancestors, George and Jane, married Esther Chandler, also a great-grandchild of the same through descent from Swithin, one of the seven children who came from England.

Isaac and Esther had twelve children; the sixth, Swithin, born Fourth Month 1, 1769, married Ann Gregg, born Eleventh Month 14, 1774. She was a daughter of Abram and Mary Heald Gregg, and granddaughter of George and Mary Gregg. Swithin and Ann Gregg Chandler had eleven children, and the third, Thomas Jefferson, born Ninth Month 1, 1800, died May 15, 1872, married

Sarah Craig Yarnall, daughter of Ephraim and Mary Craig Yarnall and granddaughter of ——— Yarnall, whose ancestors were in Delaware County, Pennsylvania, in 1684. She was born Eighth Month 24, 1807, and died August 27, 1880. They had twelve children, four of whom are living. The second was Dr. Swithin Chandler, the subject of this sketch, and one of the sixth generation of descendants of George and Jane. The Yarnalls are also from an English family that came to the United States in 1684. Several generations of both Chandlers and Yarnalls have lived in Mill Creek Hundred and were members of the Society of Friends.

When between the ages of six and seven years our subject went to live with his grandfather, who died a year or two later. Young Swithin remained with his grandmother until he was sixteen years of age. He worked on a farm in 1846, spent the summer of 1847 in a grocery store in Wilmington, returned home in the fall and worked on a farm during the summers of 1848, 1849 and 1850, attending public schools during the winter seasons. In the fall of the last year he entered the academy of the Rev. Samuel A. Gayley, in Wilmington. He went to Dr. William Notson's office and drug store in December, 1851, and attended lectures at the Pennsylvania Medical College during the sessions 1852-53 and 1853-54, and graduated March 4, 1854, without missing a lecture. During his summer vacation of 1853 he taught a public school at Lebanon, Kent County, Delaware. In April, 1854, he left for Texas in a sailing vessel, and landing at Galveston, spent two months with Hon. Anson Jones, M.D., in Middle Texas, near Washington. Having returned home in August of the same year, he located at Hockessin, Mill Creek Hundred, in the October following, and engaged in the practice of his profession. He married Sarah Lindsey, December 24, 1856, and removed to Brandywine Springs (same hundred), April 13, 1857. His wife died January 4th, following. On January 29, 1863, he married R. A. Rubincame.

Dr. Chandler was a member of the Red Clay Creek Presbyterian Church, in which he was a ruling elder, and president of the board of trustees. He represented his church in the Presbytery of New Castle, and the latter body in the Synod of Baltimore. In 1858 he was elected clerk of School District No. 33, was re-elected in 1861, and served by successive re-elections until his death. In politics he was a Democrat, and was on that ticket as candidate for State Senator in 1866, when he was defeated by less than one hundred votes. In 1878 he was elected to the House of Representatives, and on the organization of that body was chosen Speaker. He was elected State Senator for four years in 1882, and re-elected to the House of

Representatives in 1886. During the four sessions of the Legislature he attended he repeated his college record, and never missed a roll-call. He was a member of the Delaware State Medical Society, of which he was secretary, vice-president, president, member of various committees and president of the Board of Medical Examiners. At the commencement exercises in 1863 he introduced an innovation by presenting a graduate in medicine a book instead of flowers, and his example has turned the tide in that direction. Dr. Chandler always took a lively interest in educational affairs and was a trustee of the Newark Academy. He was chairman of the Democratic County Committee, many times a delegate to the State Convention, and presided over that body. He was for years a member of the State and County Executive Committees of his party, and for many years served in the capacity of chairman. Dr. Chandler was a prominent Odd Fellow and Free Mason. In the former he served as District Deputy Grand Master of Delaware, and in the latter, to which he was admitted in 1870, he held important positions in the Blue Lodge, and served as Deputy Grand Master of the Grand Lodge of Delaware. He died of heart disease suddenly at his home, near Brandywine Springs, December 21, 1887. He was subject to attacks, and had been feeling unwell for some time, but the last attack was unexpected. He was buried on Christmas day. Over one thousand friends and relatives attended his funeral, many of his old associates in the Legislatures in which he had served participating. The services were conducted by the Rev. George Porter, and the funeral cortege proceeded to the Red Clay Presbyterian Church, where further services were held and interment made.

Following is a list of deceased members of the Delaware Medical Society, whose history could be obtained:

that date until the present time, January, 1888. In addition to the arduous duties inseparable from the profession of a physician, Dr. Bush has been appointed, and found time, to prepare many interesting and valuable papers upon various topics germane to his regular work. He has prepared and read before the State Medical Society of Delaware, of which he was president in 1860, thoughtful papers, "On Typhoid Fever," "The Life and Character of Dr. Edward Miller," "The Proper Registration of Births, Marriages and Deaths," "A Plea and Argument for the Continuance and Governmental Support of a National Board of Health at Washington," "A Report setting forth the Importance of the State Board of Health, and asking the support of the members for it," "A Report on the Amendments to the Charter of the State Medical Society," and one on the "Vital Statistics of the City of Wilmington from 1847 to 1877." Also sketches of the "Lives and Character of seventy-five deceased members of the State Medical Society." The doctor served as port-physician of Wilmington, and, at different times, for ten years, as a member of the Board of Health of Wilmington, for five years serving as president of it. He is a member and the corresponding secretary of the Delaware Historical Society, and also a member of the Pennsylvania and Virginia Historical Societies. He is the present president of the Delaware Bible Society. He is the president of the Association of Resident Physicians of Blockley Hospital, Philadelphia. In 1886 he was president of the American Academy of Medicine. At this time he is president of the Board of Managers of Delaware College. The Delaware Historical Society also has been the recipient of valuable papers from Dr. Bush's facile pen. He has contributed to it a sketch of the "Life and Character of Benjamin Ferris," another of the "Life and Character of Alexander Hamilton Rowan," a paper on "Iceland one thousand years ago," "A Report on the Seals of the State of Delaware." For the American Academy of Medicine he has prepared and submitted a paper on "Vaccination;" one on the "Delaware State Medical Society and its Founders in the Eighteenth Century;" one on the "Value of a Classical Education to the Physician and Student of Medicine," and while president of the academy, an address on the "best means of increasing the number of its members and the influence of the Academy." For the Delaware State Board of Health, he prepared papers on "The Hygiene of Homes," on "Malaria," and on "The Resuscitation of the Drowned." These abundant labors combine to prove that the doctor is devoted to his profession and earnest in his advocacy of all right and practicable efforts to promote its cultivation and ethics. In his religious life, Dr. Bush is an intelligent and influential member and elder of

¹ This sketch and the remainder of this chapter were prepared and inserted by the editor.

the Presbyterian Church, holding these local relations in the Central Presbyterian Church of Wilmington. In 1839 Dr. Bush was married to Maria, daughter of Morgan and Mary Hemphill Jones, and to them have been born seven children, viz: Mary Hemphill, who married the late C. Rodney Layton; Martha Potter, who married Henry Ward; Lewis Potter, Eugene Elmer, Alexis Kean, James Hemphill Jones and Florence. Of these William Ward and the two youngest children just named, survive, and have their homes in Wilmington.

In person, Dr. Bush is rather spare. He is five feet eight and one-half inches in height, active in his movements, of agreeable countenance and cultivated manners, in his carriage and courtesy perpetuating the refined deportment which marked the gentleman of the last generation. His general health is still good, and he is so highly esteemed as a skillful physician that he is not permitted by those who know him to withdraw altogether from labors, which have now been extended over half a century. As a consequence, he is still (1888) more or less active among the respected physicians and families of Wilmington.

Dr. James H. Wilson, of Dover, Kent County, Delaware, now one of the leading physicians in that section of the State, is of Scotch-Irish lineage. His ancestors about 1642 went with the Scotch emigration to the northern part of Ireland. William Wilson, the great-great-grandfather of the subject of this sketch, was born March 8, 1708; married to Ann Niell August 24, 1736; came to this country in 1737 and settled on a tract of land which he purchased in Kent County about eight miles south of Dover, where they reared a family of ten children. James Wilson, the eldest son of William and Ann Neill Wilson, was born on the ocean during an unusually prolonged voyage, June 18, 1737, while they were en route for America. On May 3, 1782, he married Elizabeth White. William Wilson, born of this marriage May 3, 1783, was the grandfather of Dr. Wilson. James Wilson died August 19, 1786; his wife Elizabeth survived him until March 18, 1812, when she died at the age of sixty-five years. Their son William Wilson married Ruth Cardean, a member of a prominent family of Delaware, of French descent. Their children were Sally Ann, Elizabeth White, John Cardean and William Niell Wilson. Sally Ann married a well-known citizen of this State, Thomas B. Coursey, candidate for Governor in 1810. Elizabeth White married McIlroy McIlvaine, of Magnolia, Kent County, whose land adjoined the tract upon which William Wilson, the founder, settled in 1737, known for more than a century as the "White House." William, the youngest son, died in 1853 in his twenty-third year.

John Cardean Wilson, father of Dr. Wilson, and

the eldest son of William and Ruth Cardean Wilson, was born July 21, 1817, and died November 22, 1876. He was an enterprising and progressive farmer in Kent County, took an active interest in State and National politics, and as a Whig was frequently nominated a candidate for the State Legislature when that party was in the minority in his county. He was a jovial, affable and popular man and always received more than the party vote. Subsequently, as a candidate of the Democratic party, he was twice elected a member of the Delaware House of Representatives. By his first marriage with Susan Hopkins, daughter of James and Mary Coomb Hopkins, he had two children, Dr. James H. Wilson and Samuel Coomb, who died an infant. His first wife died in 1845, at twenty-two years of age. He was subsequently married to Elizabeth Satterfield, by whom he had eight children. The following survive: William S, residing in Dover; Arthur in Philadelphia; Charles B. and Ella reside with their mother on the homestead in Kent County.

Dr. James H. Wilson was born in Kent County, Delaware, June 3, 1842. After leaving the schools in the vicinity of his birth, he entered the Smyrna Academy, taught by Rufus Sanders. He next attended the Fort Edward Institute in Washington County, New York, an institution which has educated a great many prominent men. Having completed his preliminary education, he returned to his native State and began the study of medicine under the instruction of his uncle, Dr. Benjamin C. Hopkins, at Felton, Delaware. In 1863 he entered the Medical Department of the University of Pennsylvania, attended four full courses of lectures, graduating in 1867. Dr. Wilson then began the practice of medicine in Philadelphia, and in the meantime took a post-graduate course of one year each at the University of Pennsylvania and Jefferson Medical College, which gave him superior advantages for a thorough preparation for his profession. He remained seven years practicing in Philadelphia, during which time he was also physician to the Northern Dispensary and city physician. Health failing, he came to his native State to recuperate, and after fully recovering settled in Dover in 1877, and has since devoted all his time and attention to the duties of an extensive and successful practice in the State Capital and over a large area of the surrounding country. Dr. Wilson is a diligent student of the modern literature of his profession, and is an expert and skilful surgeon. While a resident of Philadelphia he was an active member of the Pathological Society and Northern Medical Society of that city, and is now an honorary member of both. Since 1872 he has been a member of the Delaware State Medical Society, and since 1874 surgeon for the Pennsylvania Railroad Company. On December 11,

17

the family, including these local relatives, are now in Kent County, Del. William Wilson, the youngest son of Dr. Wilson, was married to Mary Ann Jones, daughter of William Jones, of Kent County, who was married, the first time, to William Weston Porter, who married Susan Porter's sister, Eugene Porter, Alexis Porter, and George and George H. Jones and Fouché. Of the family of Wilson, the two youngest grand-children still survive, and have their homes in Kent County.

Dr. James H. Wilson is an octogenarian. He is not only a physician, but has a delight in the statements of his grandsons, and is particularly interested in the average and courtesy being shown the colored population, which marked the celebration of his jubilee. This grand-son is still good and well, so much interested as a student in research that he is not permitted by those who believe in withdrawing altogether from patients, whose legs have been extended over half a century. As a consequence, he is still, 1888, one of the active and respected physicians and teachers of Wilmington.

Dr. James H. Wilson, of Dover, Kent County, Delaware, now one of the leading physicians in that section, was born in Scotland, Irish lineage. His ancestors in 1742 went with the Scotch generation to the continent of Ireland. William Wilson, the grandfather, on the 1st of November, 1768, sailed for America, and on March 8, 1768, married to Ann Neill, August 24, 1769, came to this country, in 1770, and settled on a tract of land in the northern part of Kent County about eight miles south of Dover, where they resided many years and where James Wilson, the son, and William and Ann N. Wilson, was born on the ocean during an unusually protracted voyage, June 18, 1767, where they were en route for America. On May 3, 1770, the vessel of Patrick Wilson, William Wilson, brother of this James Wilson, 1782, was the grandfather of Dr. Wilson. James Wilson and August 9, 1780, he was killed, decapitated, and March 18, 1781, he died at the age of sixty-five years. Their son William Wilson married Sarah Chilton, a daughter of a poor, nameless Irish Doctor, of Philadelphia. Their children were Sally Ann Elizabeth White, daughter of William Neill Wilson, now John George Fawcett, now in the State of Texas; P. C. Wilson, and John George, in 1810, Thomas Wilson married Mary McPherson, of Maryland, Kent County, whose father owned the tract on which William Wilson, the grandfather, settled in 1770, and who came from a country called "White Horse." William, the youngest son, did not marry until he was thirty.

On April 1, 1800, at the age of 19, Wilson and

the eldest son of William and Ann Chilton, a son, was born July 21, 1807, and died September 22, 1846. He was an attorney, and lived the greater part in Kent County, but also resided most in Delaware. No formal education, and was generally considered a common school education. He was a member of the Legislature when that body was composed of farmers only. He was a journalist, and a common hand and always a devoted member of the vote. Subsequently, as a member of the Legislature, he was twice elected a member of the Delaware House of Representatives. He married first, Susan Hopkins, daughter of Mr. and Mrs. George Hopkins, he died. Mr. James H. Wilson and Susan Hopkins died an infant. His first wife was 31 years of age at two years of age. He was soon married to Elizabeth Satterthwaite, a widow, eight children. The first wife, Elizabeth, died in 1846, leaving in Dover, Virginia, a son, Charles Richard Wilson, with his mother, the homestead in Kent County.

Dr. James H. Wilson was born in Dover, Delaware, June 1, 1812. At the age of 16, in the vicinity of his birth, he was educated by a private tutor, Ramsdell Stevens. He attended the Port Howard Institution, West County, New York, at first, for one year, and a great many prominent men. He passed his preliminary examination in his native state, and began the study of medicine under the instruction of Dr. C. H. Haskins, of Faison, Delaware. In 1834, he joined the Medical Department of the University of Pennsylvania, attended four semesters, graduating in 1837. Dr. Wilson then practiced medicine in Philadelphia, and in the meantime took a postgraduate course in the University of Pennsylvania, and at the Medical College of Washington, D. C., for a thorough preparation for a thorough professional session. He returned to Philadelphia, during which time he was elected to the National Dispensary, then, Haskins failing to accept the opportunity, and was elected to Dover in 1857, and has since practiced the highest and most successful practice in the State. One of the great areas of the State, for the son is now a great State physician. He is a physician, and a surgeon. William Wilson, president of the Delaware Medical Association, and a member of the American Medical Association, has been a member of the Delaware Society, and since 1848, a member of the Philadelphia College of Physicians.

J. H. Wilson

1867, Dr. Wilson was married to Sarah Emily McIlvaine, the daughter of McIlroy and Elizabeth White McIlvaine. Both he and his wife are members of the Methodist Church in Dover. In politics he is a Republican.

Dr. Wilson, his brothers and sister are the only members of the family bearing the Wilson name in Delaware. Hugh, the son of Hugh, and great-grandson of William Wilson (the first American settler), in 1835 moved to Indiana and settled on the present site of Fayetteville, Fayette County, which county town is built on land formerly owned by him. He accumulated a large amount of property.

Ebenezer, another great-grandson, and Ann Neill, the great-granddaughter of the first William, moved to Iowa in the same year, where the family at the present time is quite large.

HOMŒOPATHY.

The Homœopathic school of physicians follows the theory and practice first adopted by Samuel Hahnemann, a native of Germany, who was born at Meissen, in Cur Saxony, April 10, 1753. He passed several years at Stadtschule, and at the age of sixteen began to attend the Furstenschule of Meissen, where he remained eight years. His father was poor and frequently took him from school, but his teachers encouraged their ambitious pupil and gave him instructions free of charge. He entered Leipsic with twenty crowns in his pocket, the last money ever received from his parents. He was robbed of the greater portion of this money and being thus thrown upon his own resources, supported himself for two years at the University by translating celebrated works into German. In order to accomplish this he was in the habit of sitting up altogether every alternate night. He subsequently studied at Vienna with Dr. Quarin, and practised in the hospital for two years. Thence he went to Hermanstadt as a private physician, and afterwards to Erlangen where he took the degree of Doctor of Medicine, August 10, 1779. He practised at various places until 1789 when he returned to Leipsic and applied himself with his accustomed energy to the study of medicine, chemistry and kindred subjects. He wrote eighteen treatises, and made many experiments. He observed that Peruvian bark, a well-known specific for intermittent fever, when taken in large doses produced a condition similar to the disease. He tested a number of drugs, convinced himself and advanced the theory that a remedy which would cure a certain disease would also produce a disorder very similar to that disease in a healthy person, and that the reverse was equally true—that a drug which produced a certain disease in a healthy body would cure it in a sick one. From experiments which he made

upon himself and induced others to make he was led to found the system of medicine which he termed homœopathia, a term derived from two Greek words *homoios* (similar) and *pathos* (feeling or suffering).

Many German physicians tested the principles of Hahnemann, and afterwards advocated them. Dr. Hahnemann devoted himself to his profession, wrote ten volumes of the "Materia Medica Cura," and attended to a large practice, effecting cures on persons of eminence in promulgating the theory of minimum doses. His greatest work is entitled the "Organon of Rational Medicine," which has always been and doubtless will continue to be a text-book of the homœopathic profession. In 1831 he rendered efficient service during the prevalence of the cholera, and in 1836 he left Leipsic to reside with the Duke of Coëthen, where he perfected his system. During his residence at this place he cured Mademoiselle D'Hervilly Gohies, a member of a prominent family of France, of a dangerous malady and married her when he was eighty years of age. He removed with his wife to Paris where he died July 2, 1844, aged eighty-nine. He had a slender body, but his head was large and well proportioned, and he was known among his contemporaries as a man of fine intellect.

Homœopathy was first introduced into the State of Delaware by Dr. J. C. Gosewisch, a graduate of the North American Academy of the Homœopathic Healing Art, at Allentown, Pa. Dr. Gosewisch settled in Wilmington in August, 1839. The law of the State provided that no person not a practitioner prior to February 4, 1802, should practice medicine or surgery or collect fees therefor without having obtained a license from a Board of Examiners, which board consisted of three members of the State Medical Society. Dr. Gosewisch passed a satisfactory examination, but the next day he received an official communication refusing to grant him permission to practice. This action of the board led the friends of homœopathy to send a petition to the next legislature resulting in the passage of an act exempting physicians of the Thomsonian, Botanic and Homœopathic systems from examination by this board. Dr. Gosewisch after having fought the pioneer battle for the homœopathic system died in May, 1854. Dr. J. Richardson Andrews, the pioneer of the system in Camden, N. J., was in Wilmington a few months in 1843. Doctors Harlan, Negendank, Thomas, Tantum and others came after Gosewisch, and carried on a controversy with the allopaths for a number of years through the medium of public debate and newspaper discussions, until the system had become established in the State. In 1876 there were nine homœopathic physicians in Wilmington and about twenty in the State. There are now

sixteen in Wilmington and quite a number throughout the State.

The organization of a State medical society by the homœopathic physicians was attended by many difficulties. About the year 1868 the first society was formed with August Negendank president, and Drs. Kittinger, Tantum, Anderson, Shaw, Thomas, Isaiah Lukens and Quinby members; but, as its president declared, it died a natural death. Afterwards the Delaware State Society was organized by Drs. Kittinger, Lukens, Lawton, Curtis and others, and also resulted in a failure. The third and successful movement was made in 1883, when the homœopathic physicians of Wilmington issued a call for their colleagues throughout the State and Peninsula to meet in Wilmington on Thursday, January 10th, 1884, for the purpose of organizing a medical society. To this the following responded: Drs. A. Negendank, L. Kittinger, L. A. Kittinger, Isaiah Lukens, J. Paul Lukens, J. M. Curtis, C. H. Lawton, J. Harmer Rile, Peter Cooper, A. E. Frantz, S. Chadwick, of Wilmington; and J. W. Crumbaugh, of Hockessin; C. O. Swinney, of Smyrna; and T. H. Cooper, of Chestertown, Maryland, and letters of sympathy and encouragement were sent by Dr. Dawson, of Milford; Dr. Kennedy, of Middletown, and others. This meeting resulted in the formation of the present "Homœopathic Medical Society of Delaware and the Peninsula." The officers elected were L. Kittinger, president; T. H. Cooper, vice-president; J. Harmer Rile, recording secretary; J. Paul Lukens, corresponding secretary; W. F. Kennedy, treasurer; Messrs. Negendank, Swinney and Crumbaugh, censors; J. M. Curtis, delegate to the American Institute of Homœopathy.

On January 8, 1885, the society again met in Wilmington, and J. W. Crumbaugh was elected president; and on January 13, 1886, the society again convened and A. Negendank was chosen as the executive. At the latter meeting the date of the annual meetings was changed to November.

On November 11, 1886, the society held a very interesting and successful meeting at Dover. A number of new members were received, and a rule was adopted referring candidates who desire to read medicine with any member of the society to a board of examiners, whose duty it was to examine all such applicants as to their educational fitness to study medicine. The officers chosen for 1887 were J. G. Dawson, president; Peter Cooper, vice-president; I. M. Flinn, recording secretary; R. K. Colley, corresponding secretary; A. E. Frantz, treasurer. The members of the society are Drs. A. Negendank, E. T. Negendank, L. Kittinger, L. A. Kittinger, J. M. Curtis, C. H. Lawton, J. H. Rile, J. P. Lukens, S. Chadwick, A. E. Frantz, Peter Cooper, L. W. Flinn, I. M. Flinn, J. W. Crumbaugh, J. W. Cooper, T. H. Cooper, W. C. Kars-

ner, W. Urie, C. O. Swinney, J. G. Dawson, W. F. Kennedy, E. S. Anderson, J. Smith, J. Moore, E. B. Fanning, W. D. Troy, R. K. Colley.

The officers for 1888 are Peter Cooper, president; E. S. Anderson, vice-president; I. M. Flinn, recording secretary; R. K. Colley, corresponding secretary; A. E. Frantz, treasurer.

Caleb Harlan, M.D., was born in Milltown, Mill Creek Hundred, New Castle County, October 13, 1814. His father, John Harlan, was born in the same place, August 31, 1773. He was, therefore, forty-one years old when his only child was born. He belonged to the Society of Friends. The doctor studied medicine three years and graduated at the old University of Pennsylvania in March, 1836. From his mother, Elizabeth (Quinby) Harlan, he inherited a very frail constitution, which compelled him, while a student, to live on a very low diet, and to travel on foot a thousand miles. At the age of twenty-one he began the practice of medicine near the Brandywine Springs, and established his health by riding eleven years through the country in the discharge of his professional duties. By careful attention to fresh air and proper diet he has been able to practice over fifty years without the loss of a day from sickness. While residing in the country he became a convert to homœopathy. In 1847 he moved to Wilmington to practice the new system. Here he met with such opposition that he was induced to publish "A Lecture on Allopathy and Homœopathy." This was noticed by the eminent Dr. Herring, in his periodical, in the following terms: "Very ably written; full of interesting remarks, and a great many new ideas."

In 1863 the doctor purchased Plumgrove farm, a few miles from the city, and required his farmer to plow in green crops for manure. These experiments, continued for years, were so satisfactory that the doctor wrote a work upon the subject, which sold freely all over the country. A second edition, revised and enlarged, has since been published in a handsome volume, with a portrait of the author, by J. B. Lippincott & Co. Being a full treatise on farming with green manures, "this volume," it is said, "has no equal in Europe or America." It is in demand as a text-book and as a book of reference upon the subject of which it treats.

Dr. Harlan is very fond of polite literature, and while living in the country he wrote "Elflora of the Susquehanna" and "The Fate of Marcel." In Wilmington he wrote "Ida Randolph." "Elflora" is a poem in the heroic couplet, which Byron says "is perhaps the best adapted measure to our language." The doctor's poetic taste, endorsing this judgment of the well-known poet, selected this measure for his own favorite work. One is constantly reminded, as he reads "Elflora," of that

W. Hartland

C Harlan M.D.

graceful flow of verse which is so attractive in Campbell's "Pleasures of Hope." Of the general character of this work as a poetical production some idea may be had by the perusal of a portion of the impassioned utterances of one of her admirers, who vainly hoped to captivate the heart of Elflora by the seizure and incarceration of her beautiful person. After her imprisonment in a secluded cave, Marcel, her ruffian captor, tries to move her to admiration by saying, . . .

"The dark-eyed daughters of chivalric Spain,
And all of Grecia's honored old domain,
The maidens of Italia's rosy land,
The dames who tread Ciræa's lofty strand,
The noble Briton, and the Frank less free,
Whose stars of beauty burn beyond the sea,
Do not possess, in form nor earthly shrine,
A soul whose flashes lighten brows like thine."

The effect of this extravagant adulation upon the beautiful, heroic captive is expressed in similar rhythm, as follows:

"Enough! enough! for all that thou canst say,"
Exclaimed the maiden as she turned away,
"Shall not avail thee, never change my mind,
Though servile praises be with force combined.
I do disdain thee, and I fear thee not;
I scorn thy homage, I despise this plot.
Stand back! Hands off! I am not in thy power!
Alone I am not in this trying hour.
In God I trust; I know that He is here,
And will protect me if I have no fear;
For ever paralyzed that hand shall be
If laid with passion's dark intent on me."

Canto II., Sects. VI., VII.

From the Rev. Dr. R. W. Landis, of Kentucky, who is well known as a profound classical scholar, this work and its author received high praise. Among other things, Dr. Landis says: "The versification has nothing to fear from a comparison even with Dryden." To the author he says: "You have the flow, cadence and rhythm of Dryden; your power of description is equal to his." Other critics have concurred in the foregoing estimate of the poem and its author. A high mark of appreciation and confidence was shown towards Dr. Harlan by his cousin, John Ferris, late of Wilmington, who died in 1882 worth a quarter of a million of dollars. He selected Dr. Harlan as his sole executor and trustee, and stated in his will that the doctor "should not be required to give security for the faithful performance of his duties." After the estate was settled there was a residue of over eighty thousand dollars, "to be applied," says the will, "by Dr. Harlan for the benefit of the necessitous portion of the human family that may come to his knowledge." The testator suggested that "if used for a *House of Refuge* it would have his approval." Hence, "The Ferris Reform School" was established and all the residue assigned to the institution. Dr. Harlan (Caleb, not Charles, as has been published) prepared and published a little Memoir of John Ferris, believing that the life and deeds of Mr. Ferris deserve some space in the world's thought. In December, 1886, Dr. Harlan published a work in pamphlet form entitled

"Mental Power, Sound Health and Long Life—How obtained by Diet." This work is full of valuable instruction and sells rapidly. It promises and almost guarantees, if its counsels are followed, a century of comfortable, vigorous, happy life without an excess of infirmity, and free from the wearisome decrepitude which so often accompanies old age. At the age of twenty-seven the doctor married Eliza Montgomery, a young widow lady, a member of the Presbyterian Church, and remarkable for her piety and good sense. They had three children: Elgarda, Elizabeth and John. The first was married to Dr. T. C. Hutchinson, of Philadelphia. She died at thirty-two, leaving no children. Elizabeth died in her nineteenth year. John studied medicine, and received his degree as a physician at the Hahnemann Medical College. Fifteen months after graduation, he died with consumption. It is the conviction of Dr. Harlan that the children inherited hepatic disease from their grandmother, who died five weeks after the birth of her only child, the subject of this sketch.

Dr. August Negendank was born in Gustrow, Mecklenburg-Schwerin, August 6, 1823. He was educated at the high school of his native place, and attended the Klinik at Kiel, in Holstein. He emigrated to this country in 1849, and entered the office of Dr. G. Pehrson, of Philadelphia, where he remained three years, attended lectures and graduated at the Philadelphia College of Medicine. After acting as assistant surgeon with Dr. C. Hering for two years, he removed to Wilmington, where he has since been engaged in the active practice of his profession. He is a member of the American Prover's Union and the American Institute of Homœopathy, and has also been active in forming the Peninsular Society of Homœopathic Physicians. He has contributed his services as attending physician to the Home for Friendless Children and the Orphanage, two charitable institutions of Wilmington. He is the Medical Director of the Homœopathic Free Hospital. One of his sons, Egmont T. Negendank, read medicine with his father, studied at the University of Pennsylvania, and graduated at the Hahnemann College in Philadelphia, in 1887. He has commenced the practice of medicine at Wilmington.

Dr. Joseph R. Tantum was born in Monmouth County, N. J., April 12, 1834. He was educated in the best schools in that section of the country, and at the age of twenty-one engaged in mercantile pursuits, and afterwards in the drug business, which he was obliged to abandon on account of failing health. Having a taste for medical studies, he read medicine with Dr. O. B. Gause, of Philadelphia, graduating in 1865 from the Homœopathic Medical College of Pennsylvania, and removed to Wilmington, where he established a good practice. He died in 1887. Dr. Percy L. Tantum, his

son, was born in 1863. He studied medicine with his father and, under the direction of Prof. Pancoast, graduated from Jefferson Medical College in 1885. He located in Wilmington.

Dr. William W. Thomas was born in Delaware, and received his early education in Wilmington. His parents died when he was young, and he lived with his uncle, Judge Way, until of age, when he engaged in mercantile business. Having been cured by homœopathy of asthma, from which he was a sufferer for many years, he decided to adopt that science as a profession, and became a student of Dr. J. C. Gosewisch, entered Jefferson College, of Philadelphia, and graduated at the Western Homœopathic College, Cleveland, Ohio, in 1860. He located in Wilmington and practiced until about 1877, when he retired. Of his seven children, five were boys, one of whom, C. F. Thomas, is a merchant in Wilmington.

Dr. Isaiah Lukens was born in Montgomery County, Pa., November 4, 1816, and was educated in the Friends' schools at Burlington and Hadsborough. He read medicine with Dr. G. Y. Jones and graduated at the University of Pennsylvania in 1848. He succeeded Dr. Jones, and remained in Montgomery County six years; then removed to Cleveland for two years, and in 1855 returned to Philadelphia, where he was professor of oral surgery in the Pennsylvania Medical College for six years. Becoming a convert to homœopathy, Dr. Lukens in 1868 removed to Newport, and in 1880 to Wilmington, where he practiced medicine until his death, August 9, 1887.

Leonard Kittinger, M.D., was born in Philadelphia, April 27, 1834. Dr. John Kittinger, his paternal ancestor, came to Germantown, Pa., from Germany prior to the Revolutionary War, and became a large landholder in that place. His son, Leonard Kittinger, was a merchant in Philadelphia. His first wife was Sarah Cress, of Germantown, and their only child, Henry C. Kittinger, married Ann Eliza Dixey, and practiced law for a number of years in his native city, when he removed to Trenton, N. J., where he became judge of the Court of Common Pleas two terms of five years each, by appointment, and the last term, owing to a change in the Constitution, by election,—making a period of fifteen years that he served on the bench. Originally a Democrat, he became a Republican at the breaking out of the war, and was a warm friend and supporter of President Lincoln. He was a man of sterling worth and commanded the respect of those who knew him. He removed to Washington in 1864, where he died in 1879, aged sixty-six. His children were Dr. Leonard Kittinger and three daughters, two of whom are married in that city.

Dr. Kittinger was graduated at Princeton Academy, N. J., also at Edge Hill Grammar

School, from which he was graduated with honor. After completing his literary education he removed to Trenton, N. J., with the intention of carrying out his life-long desire of studying medicine; but his health being delicate, he relinquished his design under advice of a physician, and engaged in mercantile pursuits; but merchandising was uncongenial to his tastes, and upon regaining his health in 1859, he entered as a student the office of Dr. O. B. Ganse, professor of obstetrics and diseases of women and children in the Pennsylvania Homœopathic Medical College, an institution which has since been consolidated with Hahnemann Medical College. He was graduated in 1863 with the degree of M.D., after completing a very thorough course of instruction. He immediately commenced practicing medicine in Flemington, Hunterdon Co., N. J., where he remained until April, 1866, when he removed to Wilmington, where he still resides; here he has earned the well-merited respect of his contemporaries in the profession, and has met with great success, especially in obstetrics and diseases of women and children—a success of which he might justly feel proud. He was in 1869 elected a member of the American Institute of Homœopathy. In 1871 he was appointed one of the physicians to the New Castle County Almshouse and Insane Asylum, a position which he held for one year, until a political change took place in the board of trustees, adding by his success to the reputation of the homœopathic system of medical treatment.

He has also served as physician in charge of the Home for Aged Women, a noble institution, conducted by the benevolent ladies of Wilmington. He has taken an active part in promoting the interests of his chosen profession, and was at one time president of the Homœopathic Medical Society of Delaware and Peninsula. He is a physician in charge of the maternity department of the Homœopathic Free Hospital. He is a Republican, and has served on the Board of Public Education in Wilmington; but he devotes his best energies to his profession, in which he has achieved deserved eminence.

In 1859 Dr. Kittinger married Miss Emma, only daughter of Hon. Obadiah Howell, a prominent citizen of Trenton, N. J., and of an old and highly-respectable family. They have three children,—Leonard Armour, M.D., (in partnership with his father), Charles Howell, and George Batchelder, the latter a graduate of Cornell University, are bankers in Seattle, Washington Territory.

Dr. Leonard Armour Kittinger, oldest son of Dr. Leonard Kittinger, was born in Trenton, N. J., April 22, 1860. He graduated at Pennington Seminary in 1878; studied medicine with his father; graduated at Hahnemann Medical College, Philadelphia, in 1881, and located with his

Ginepro
Ed.
La. 11.

He attended the Union, with the exception of Prof. Pan-
cetta, who was at the Medical College
of Philadelphia.

Dr. Way was born in Del-
aware, his education in Wil-
mington when he was young.
He remained in the Union, until
1840, when he was elected
Judge Way, until
1845, when he was elected
Judge of the peace of justice.
For many years he
served as a professor, and
Dr. J. C. Grew, who entered
the Union in 1845, and graduated in
1848, at the College, Cleveland.
He was elected to the Union and
remained there until he retired. Of
the many who have been of whom,
he was not in the Union.

Dr. Way was born in Montgomery
County, N. Y., April 4, 1816, and was educated
at the Union and the University of
Trenton. He commenced his study with Dr. C. Y. Jones
at the University of Trenton, N. J., in 1835. He studied of Dr. Jones and remained
in the Union, N. Y., until 1838, when he removed
to Trenton, N. J., and remained there for two years, and in 1840 he removed to
Trenton, N. J., where he was professor of anatomy and surgery in the Pennsylvania Medical College for six
years. He removed to Trenton, N. J., in 1848, and in 1850
to Wilmington, where he practiced in N. J. until
his death August 9, 1887.

Leonard Kittinger, M.D., was born in Phila-
delphia, Aug. 27, 1810. Dr. John Kittinger, his
father, came to Germantown, Pa., from
Germany prior to the Revolutionary War, and
became a successful merchant in that place. His son,
Leonard Kittinger, was a merchant in Phila-
delphia. His first wife was Sarah Cross, of Ger-
mantown, and their only child, Henry C. Kittinger,
born in 1810, and Ann Eliza Dixie, who married
law for a number of years in his native city, when
he removed to Trenton, N. J., where he became
judge of the Court of Common Pleas for two terms of
five years each, by appointment, and the last term,
owing to a change in the Constitution, by ap-
pointment, during a period of fifteen years. He
served on the bench. Originally a Democrat, he
became a Republican, and the brother-in-law of the
late President Lincoln. He was a warm friend and supporter of
President Lincoln. He was a man of sterling
character and command the respect of those who
knew him. He removed to Wilmington in 1850,
where he died in 1887, at the age of seventy-six. He had
one son, Dr. Leonard Kittinger, who remained in
Trenton, N. J., where he was a successful physician.

Dr. Kittinger was married at Philadelphia
Armstrong, N. J., at Large Hill, Germantown

School, from which he was graduated in 1835.
After completing his literary education, he
moved to Trenton, N. J., where he was engaged
in carrying out his lifelong desire of studying
medicine, but his health being such that he could not
he designed to become a physician, and he
in mercantile pursuits; but it was not
uncongenial to his tastes, and when he
in 1839, he entered as a student in the
Dr. O. B. Garso, professor of obstetrics and
cases of women and children, in the Pennsylvania
Homoeopathic Medical College, and in
which has since been considered one of the
best in the country. He was graduated
1863 with the degree of M.D., after a course
very thorough course of instruction. He
then commenced practicing medicine in Trenton,
Huntendon Co., N. J., where he remained until
April, 1866, when he removed to Wil-
mington, where he still resides. He has earned the
well-earned respect of his contemporaries as a
physician, and has met with great success, espe-
cially in obstetrics and diseases of women and
children—a success of which he is justly proud.
He was in 1869 elected a member of the
American Institute of Homoeopathy. In 1870
was appointed one of the physicians of the
Castle County Almshouse and Insane Asylum.
His position was held for one year, and during
that time he took place in the discharge of his
duties. His success in the practice of the
homoeopathic system of medical treatment.

He has also served as physician in the
the Home for the Colored Women, a home in-
stituted by the benevolent ladies of Wil-
mington. He has taken an active part in
the interests of his chosen profession, and was
one time president of the Homoeopathic Med-
ical Society of Delaware and Pennsylvania. He
has been a member of the Association of
Physicians of the State of Delaware, and
of the Homoeopathic Free Hospital, a
Republican, and has served on the Board of
Physicians of Wilmington, but he devotes his
energies to his profession, in which he has
deserved eminence.

In 1839 Dr. Kittinger married the only
daughter of Prof. Garso, who was a native
citizen of Trenton, N. J., and of an old and
respectable family. They have three children,
Leonard Armour, M.D., an physician, son of
father, Charles Cross Kittinger, and George
the latter a graduate of Case Western Reserve
University in Seattle, Wash., in 1880.

Dr. Leonard Armour is the son of Dr.
Dr. Leonard Kittinger, who was born in
N. J., April 22, 1860. He was graduated in
Trenton Seminary in 1878, attended the
father, graduated in Philadelphia
type, Philadelphia, in 1881, and

Sincerely Yours
L. Kittinger M.D.

father. He was secretary of Hahnemann Medical Institute when a student, and is now secretary of the Homœopathic Medical Society of Delaware and the Peninsula. He is a member of the American Institute of Homœopathy and physician for the Home of Aged Women. He has figured somewhat in politics as chairman of the Republican City Executive Committee and as Secretary of the New Castle County Republican Executive Committee.

Dr. Jackson K. Bryant came to Newark about 1858, and was the first homœopathic physician in that place. He removed to New Jersey in 1862, and is now in Philadelphia. Dr. Alexander Shaw succeeded him in Newark, and remained until about 1870, when he also removed to Philadelphia. Dr. Lee M. Whistler was born in Harford County, Md., in 1839. He was educated at the Belair Academy; studied medicine with Dr. J. B. Crane; graduated at Pulte Medical College, Cincinnati, in 1868, and practiced there for ten years; then he removed permanently to Newark.

Dr. Watson F. Quinby was born near Brandywine Springs, New Castle County, in 1825. He was educated at West Town and Haverford schools; studied medicine with Dr. Harlan, and graduated from Jefferson Medical College in 1847. He commenced the practice of medicine in Mobile, Ala., and went from there to California in 1849. He returned to Wilmington in 1852, where he has since remained in the practice of his profession, applying allopathic treatment, when requested, but preferring the Hahnemann system.

Dr. Edwin S. Anderson, a native of Lawrence County, Ohio, was born January 13, 1844, and studied medicine with Dr. Stanley, of Marietta, Ohio. He graduated at Hahnemann Medical College, in Philadelphia, in 1866, and located in Marietta. In February, 1868, he settled in Dover, and his predecessors at Dover were Dr. John F. Baker, of Attica, N. Y., who came in 1866 and removed about 1870, and Dr. Cator, who came about the same time, but did not locate permanently.

Dr. Thomas O. Clement, a native of Kent County, read medicine with Dr. E. S. Anderson and Dr. J. Nicholas Mitchell. Graduating at Hahnemann Medical College in 1880, he practiced medicine a short time on the Eastern Shore of Maryland and then removed to Dover.

Charles Henry Lawton, M.D., was born in Newport, R. I., February 15, 1832. His father, Job Lawton, married Rebecca Cranston, a descendant of John Cranston, who was Governor of the Colony of Rhode Island, as was also his son Samuel—the latter for many successive terms, until he died in 1727. The Cranstons are descended from the Scottish Lord Cranston, whose son married into the royal family of the Stuarts. Dr. Lawton, having received a good English education, at

the age of fifteen was apprenticed to his brother, W. F. Lawton, to learn the plumbing business. In 1851 he was made a partner, under the firm name of William F. Lawton & Co. During the financial panic of 1857 the firm became embarrassed and the partnership was dissolved. Mr. Lawton was always fond of the study of human nature, and during his leisure hours he familiarized himself with phrenology and physiognomy—partly for amusement; but he has since found the knowledge thus obtained has been beneficial to him in his practice. About this time Mr. Lawton met with Dr. A. Page, of Boston, who was obtaining wonderful success in the use of electricity as a therapeutic agent. He became his student, and, after a thorough course of instruction, commenced the practice of electro-therapeutics. He made this treatment a specialty for fourteen years, performing many remarkable cures, and meeting with uniformly good success. Having an inherent antipathy to the allopathic school of medicine, and at that time, knowing of nothing better, he sought, as far as possible, to avoid all kinds of medication. In 1870, through the influence of a patient, he was led to investigate the claims of homœopathy, and it was not long before a new light dawned upon him. He for the first time saw that there was a science in medicine, that homœopathy was the exponent of a universal principle. From this time forth his life-work was decided, and he immediately enrolled himself as a student in Hahnemann Medical College at Philadelphia, from which he was graduated in 1872. While there he was elected consecutively to the offices of president and treasurer of the Hahnemann Medical Institute. In 1872 he was elected a member of the American Institute of Homœopathy, and has served as chairman of the bureau of pædology, member of the bureau of materia medica, also on committee on legislation in Delaware.

In 1880, while a member of the Bureau of Materia Medica, he read a paper before the American Institute of Homœopathy, on "Proofs of Medicinal Power above the Sixth Decimal." He discussed the subject of Potentization from a scientific stand-point, tracing an analogy between the action of our potentized medicines and a law of physical science. He also prepared a paper on Therapeutic force, or proofs of medicinal power beyond the limit of drug attenuation, which was published a few months later in the "North American Journal of Homœopathy." This article elicited high commendation from Dr. Lilienthal, the editor, and Dr. H. N. Guernsey declared that it was beyond criticism. He also wrote among other things that have been published on the question, "*Is similia similibus curantur* a universal law, and is it reliable in cases of emergency?"

"Proofs of medicinal presence and efficiency in attenuations above the 30th decimal as furnished by the tests of clinical experience;" "What is Homœopathy?" "Shock, its etiology and diagnosis;" "Physiology of Dentition."

He was elected a member of the International Hahnemann Association in 1882, and has served as chairman of the Bureau of Surgery and as member of the Board of Censors.

He assisted in organizing the Delaware Homœopathic Medical Society, and has served as corresponding secretary, member of the Board of Censors and president. He has been twice elected delegate to the American Institute of Homœopathy. In 1884, when an organized effort was made on the part of the homœopathic profession throughout the country to create a fund for the benefit of the National Homœopathic Hospital at Washington, he was appointed chairman of the executive committee for the State of Delaware. He is a member of Eureka Lodge No. 23 A. F. A. M., Delta Royal Arch Chapter No. 6, and of St. John's Commandery No. 1 K. T., also a member of the Improved Order of Heptasophs, Wilmington Conclave, No. 22, being its medical examiner.

In 1857 Dr. Lawton married Miss Elizabeth West. They have one child, Ella E., the wife of Rev. Edward P. Tuller, a Baptist clergyman, in Newport, R. I.

Dr. Irvine M. Flinn was born October 20, 1854, near Newport. Having taken a preparatory course of study with Professor Wm. A. Reynolds, of Wilmington, he was elected Professor of Mathematics in Conference Academy, Dover, in 1874. In the fall of 1876 he entered the sophomore class at Lafayette College, Easton, Pa., and graduated in 1879. In 1880 he was principal of the Pottsville Grammar School, and in 1881 took a two years' course of medicine in Jefferson Medical College of Philadelphia. Then he entered Hahnemann Medical College, and on graduating located in Newport.

Dr. Lewis W. Flinn was born at Newport, Delaware, September 15, 1858. He received his early education at Newport, and in Professor Reynolds' School, graduating at Lafayette College in 1880. He read medicine with Dr. Boyer, at Pottsville, graduating at Jefferson Medical College, in 1883, and subsequently at Hahnemann Medical College. He commenced practice at Wilmington the same year.

Dr. J. F. Frantz was born in Lancaster, Pa., graduated at Hahnemann College in 1876, and entered into partnership with Dr. J. R. Tantum. In 1882, he retired from the active practice of medicine, and is now President of the Wilmington Dental Manufacturing Company, and of the Welch Dental Company of Philadelphia.

Dr. A. E. Frantz was born at Lancaster,

Pa., September 2, 1858. He graduated at Millersville State Normal School, and studied medicine with Dr. J. R. Tantum and J. F. Frantz, graduated at Hahnemann College in 1882, and located in Wilmington.

Dr. James Paul Lukens, son of Dr. I. Lukens, was born March 29, 1855, and was educated in Philadelphia High School, and Swarthmore College. He studied medicine with his father, and graduated from Hahnemann College in 1878. He first located at Newport, and removed to Wilmington in 1882.

Dr. Peter Cooper was born February 4, 1858, in Kent County, Delaware. He was educated at Felton Academy, and read medicine with his brother, Dr. C. H. Cooper, of Chestertown, Maryland. After graduating at Hahnemann College in 1881, he commenced practice with his brother and in 1882 removed to Wilmington.

Dr. J. Harmer Rile, who was born in Philadelphia, May 13, 1857, has resided in Wilmington since 1864. He was a pupil of Professor Reynolds, a member of the first graduating class in 1875, began the study of medicine under Dr. Leonard Kittinger, and entered Hahnemann College from which he graduated in 1879. He began the practice of medicine in Wilmington and was one of the organizers of the State and Peninsula Medical Society. In 1887 he became a member of the American Institute of Homœopathy. His wife is a daughter of Jones Guthrie, Esq., of Wilmington.

Dr. Sylvester Chadwick was born in Delaware County, Pennsylvania, and was educated in Brandywine Academy and Delaware College. He studied medicine with Dr. Harlan, graduating at Hahnemann Medical College in 1880, and commenced practice in Wilmington. He is a member of the Wilmington Board of Public Education.

Dr. Curtis O. Swinney, class of 1878; Dr. Thomas C. Moore, class of 1884; Dr. E. B. Fanning, class of 1885; all graduates of Hahnemann Medical College, of Philadelphia, are practicing medicine at Smyrna; Dr. Benj. G. Frame, of the class of 1885, is practicing in Kenton; Dr. J. G. Dawson, successor of Dr. Strong, is at Milford; Dr. J. C. Kennedy at Middletown; Dr. J. M. Smith at Moorton, and Dr. Kirkpatrick at New Castle.

EPIDEMICS AND VITAL STATISTICS.—Regarding the health of the early settlers of Delaware, little is known of the diseases or epidemics from which they suffered. Noah Webster, in his *History of Epidemics and Pestilential Diseases*, alludes to the terrible severity of the winter of 1641, and the great sickness that prevailed among the Swedes during the following summer. In 1647, the Swedes were visited similarly by an epidemic that

C. . .

C. H. Landon.

prevailed throughout all of the colonies. From what he says it is certain that there were few, if any, of sufficient medical skill to cope successfully with the epidemic.

"Such as were bled or used cooling drinks, died; such as used cordials or more strengthening things, recovered for the most part." Eight years after, another fearful epidemic came on. Of the nature of these contagions nothing definitely is known. The first positive information of epidemics in Delaware, commences with the yellow fever in 1793. This dread disease had been raging with such virulence in Philadelphia as to cause an immense overflow to Wilmington. The Christiana River was crowded with Philadelphia sailing vessels to so great an extent that there was scarcely any room left for the passage of boats; every available house, or part of house, was inhabited by fugitives; all the stables and other out-buildings were devoted to the storage of goods and property of the strangers, and in consequence of their presence the scourge made its appearance also in Wilmington, but from all accounts was largely confined to the Philadelphians.

Notwithstanding the risk and danger the people of Wilmington treated their enforced guests with every consideration, and Mathew Carey, the Philadelphia publisher, in his work on the scourge acknowledged their disinterested kindness and sympathy in the following terms:

"The people of Wilmington have acted in the most friendly manner toward our distressed citizens. At first they were a little feared and resolved on the establishment of a quarantine and guards. But they immediately dropped these precautions and received the people from Philadelphia with the most perfect freedom. They erected an hospital for the reception of our infected citizens, which they supplied with necessaries. Yet of eight or ten persons from Philadelphia who died in that town of the malignant fever only one was sent to the hospital. The others were nursed and attended in the houses where they fell sick. Humane, tender and friendly as were the worthy inhabitants in Wilmington in general, two characters have distinguished themselves in such a very extraordinary manner as to deserve particular notice. These were Dr. Nicholas Way and Major George Bush, collector of the port, whose houses were always open to the fugitives from Philadelphia, whom they received with the smallest apprehension, and treated with a degree of genuine hospitality that reflects the highest honor on them. The instances of this kind through this country have been very few, but they are, therefore, only the more precious, and ought to be held up to public approbation."

In 1798, following a reappearance of the scourge in Philadelphia, the yellow fever reached Wilmington in August, creating a panic, particularly in the lower part of the town near the Christiana, where it broke out, and extending to the higher portions of the town and the village of Brandywine. A number of prominent citizens were among its victims, a list of whom included James Lea, Sr., residing near the Town Hall; two sons of Joseph Tatnall; Ebenezer McComb, the merchant trader and his wife; the wife of Colonel Tilton; Major Patten, the grandfather of Judge Wales; Joseph Miller, a young lawyer; ten out of a family of eleven at McComb's Wharf; J. Provost, at Hemphill's Wharf; and the wife of Isaac Henderson, a merchant trader.

A third visitation of yellow fever occurred in Wilmington in 1802, following another epidemic in Philadelphia. The Board of Health inaugurated a rigid quarantine, and took every possible precaution against the introduction of the plague, but without effect. The disease appeared on August 2d, and a week later there were several cases in town. There were, however, no deaths until September 1st, when Johnson Owens, a shallopman employed by Cyrus and Robert Newlin, succumbed. A week later the fever assumed a malignant shape in the lower part of the borough, principally on King Street below Second Street; the alarm became general and people fled to the country in large numbers. Thirty-four deaths occurred during September. On October 1st there were only six hundred and five people in town south of Market Street, of which number twenty-five were sick. The disease raged with increased violence subsequent to October 15th and thirty-one deaths occurred from that time to November 2d, when the appearance of frost stopped the contagion. Among the later deaths was that of John Ferris, Jr., who during the epidemic of 1798, and the present year, had been unceasing in his attentions to the sick. He died on October 31st. Colonel Thomas Kean, an officer of the Revolutionary army, was also one of the victims. The latter numbered eighty-six out of one hundred and ninety-seven cases, of which one hundred and fifty-six cases and fifty-five deaths occurred east of Market Street and south of Third Street.¹ Following is a list of the deaths which occurred during the period:

| | |
|---------------------------|---------------------------|
| Johnson Owens. | John Armstrong's child. |
| Thomas Musgrove, a child. | James McMinn. |
| Mary Brown. | Edward Smith. |
| Mordecai Cloud. | Cleland Boyd. |
| Ann Hadley. | Edward Carpenter. |
| Peter Lowther. | Lydia Warner. |
| Hannah Robinson. | Elizabeth Blays. |
| Mary Bates. | Cleland Boyd, a child. |
| Penelope Days. | Sarah Kean. |
| Sweetapple, a child. | Henrietta Gairy. |
| Hannah Swayne. | John Martin. |
| Heather Warner. | Peter Young. |
| Abner Dickinson. | Thomas Kean, Esq. |
| Ann Jackson. | Elizabeth Blays, Sr. |
| Levina Wital. | Wilson Kendall. |
| Elizabeth Springer. | William Preston and wife. |
| Eliza King. | Mary Reynolds. |
| Phoebe Mendenhall. | Sarah Thompson. |
| Ann Catherwood. | Ruth Alderdice. |
| Andrew Catherwood. | R. Fenwick's child. |
| Rachel Peterson. | Mary Smith. |
| Joseph Burton. | Ester Carpenter. |
| Isaac Stevenson's child. | Walter Cummins. |
| Ann Thompson. | John Hadley's child. |
| Thomas Musgrove. | Josiah Coolen. |
| Phoebe Jordan. | Christian Bourman. |
| William Sharp. | Alphonso Aldeidse. |
| John Harvey's child. | William Thompson. |

¹ Dr. John Vaughan, an eminent practitioner of that day, attended a large number of the yellow fever patients of this period in Wilmington, and by request of the American Philosophical Society published a history of the origin and nature of the disease. Dr. Vaughan introduced vaccination in Wilmington in 1804.

E. Joice, a child.
Samuel Musgrove.
Linah Hindman.
Susanna Kawn.
Elihu Chandler.
Lydia Vallet.
Samuel Whitaker.
Margaret Kean.
Sarah Hartley.
Thomas Clarke.
James Brown.
Sarah Webb.
Susanna Kendall.
William Hawkins.

Mrs. Bodill's child.
Sarah Brian.
Manassah Scantling.
Jonas Airicha.
John Hogg.
Mary Janvier.
Rebecca Taylor.
Hetty Sutton.
William Shorer.
James Smith's child.
Hannah Harlan.
John Ferris.

In 1853, there were a few cases of yellow fever on the north bank of the Brandywine, which were traced to bilge-water and decayed vegetable matter in an old shipyard.

A short time before the Revolutionary War a disease known as "Welsh Fever," developed among the passengers on the ship "Liberty," just in from Wales. It extended to the town of Wilmington and a great many of the inhabitants contracted it. Hospitals were improvised in tents and adjacent farm-houses.

Up to August, 1832, Wilmington was celebrated as a refuge from cholera, and many fugitives from various portions of the country came here to escape the plague. At this time, however, the disease made its appearance in Wilmington, but in a mild form, the cases aggregating but forty-seven; deaths seventeen.

In 1849, the cholera reappeared in Wilmington, and between June 29th and August 3d, there were sixty-five deaths and one hundred and sixteen cases altogether. The majority of the cases were at the almshouse, where seventy-eight inmates out of one hundred were affected and forty-seven died.

Wilmington was visited by smallpox for the first time late in the eighteenth century, and it prevailed in a mild form on several occasions until 1871, when it continued for one hundred and sixty-six days from November 24th. Within that period there were three hundred and sixty-one cases reported to Henry Eckel, president of the Board of Health, and there were fifty additional cases, making four hundred and eleven altogether. In 1876 there were few fatal cases. In 1881, it prevailed from January 1st to May 1st, resulting in eighty-one cases and did not really disappear until May, 1882. From January 4, 1883, to June, two hundred and fifteen cases of smallpox were reported, and to December, two hundred and fifty cases and eighty-one deaths.

The number of deaths in Wilmington annually from 1848, when the registration was commenced, to 1888, was as follows:

| | | | |
|-----------|-----|-----------|-----|
| 1848..... | 410 | 1864..... | 420 |
| 1849..... | 377 | 1865..... | 412 |
| 1850..... | 304 | 1866..... | 461 |
| 1851..... | 351 | 1867..... | 510 |
| 1852..... | 355 | 1868..... | 428 |
| 1853..... | 358 | 1869..... | 458 |

In a paper read before the Delaware Medical Society in 1877, Dr. L. P. Bush, President of the Wilmington Board of Health, gave the following statistics regarding that city:

In 1870, the population of the city was 30,840, of which 3211 were colored. The population in 1877 was nearly 38,000. The average number of deaths yearly from 1870 to 1877 was 725, or 1 to each 47 inhabitants. The number of deaths annually from typhoid fever from 1865 to 1871 was 154; from 1872 to 1877, 21. This disease made its appearance in 1838, at Brandywine Springs, from which point it spread north and west. The first case recognized as diphtheria appeared in Wilmington in 1860. From 1847 to 1860, only 9 deaths were reported from throat diseases. From 1860 to 1865 inclusive, 71 deaths from diphtheria were reported, and for the six succeeding years 46; from 1872 to 1877 there were 61. During the years 1847 to 1851, when the typhoid fever prevailed to an alarming extent, almost no deaths from throat disease were recorded, showing that the causes of these diseases are not identical. This conclusion also seems justifiable from the additional fact that the mortuary record of the two diseases here, after the establishment of the diphtheria, bear no especial relation to each other. From 1855 to 1860, there were one hundred and sixty-eight deaths from cholera infantum; from 1860 to 1872 there were 292. From 1871 to 1877, there were 79 deaths from croup; 153 from marasmus and inanition; 91 from pneumonia and 325 from phthisis.

In 1794, when Wilmington contained about 2900 inhabitants, William Poole and Isaac Starr made a list of 147 persons in the borough who were over 60 years of age; 13 of whom died between 60 and 70; 50 between 70 and 80; 52 between 80 and 90; 16 between 90 and 100; and 2 over 100; average longevity, 80 years. In 1820, population 5268; inhabitants 80 years old, 50; 1866, population 25,000; octogenarians, 150. In 1881, out of 1341 deaths, 102 were between 60 and 70; 73 between 70 and 80; 44 between 80 and 90 and 4 between 90 and 100 years. In 1882, out of 1143 deaths, 70 were between 60 and 70; 78 between 70 and 80; 36 between 80 and 90, and 10 between 90 and 100 years. In 1883, out

of 1091 deaths, 90 were between 60 and 70; 71 between 70 and 80; 47 between 80 and 90; 6 between 90 and 100, and 2 over 100 years. In 1884, out of 1191 deaths 140 were over 70 and 4 nearly 100 years old. In 1885, out of 1019 deaths, 142 were over 70 and 8 over 90 years. In 1886, out of 905 deaths, 80 were over 60; 71 over 70; 37 over 80 and 4 over 90 years.

REGISTRY OF PHYSICIANS.

The physicians registered in the office of the clerk of the peace of New Castle County, together with the institutions from which they graduated and their location, are as follows:

| | |
|---|------|
| Bullock, Wm. B., Wilmington, University of Pennsylvania..... | 1847 |
| Bush, Lewis P., Wilmington, University of Pennsylvania..... | 1835 |
| Burwell, John P., Wilmington, Jefferson Medical College..... | 1840 |
| Broughman, George W., Stanton, Jefferson Medical College..... | 1863 |
| Barr, W. H., Middletown, University of Pennsylvania..... | 1850 |
| Belville, Frank, Delaware City, College of Physicians and Surgeons, Baltimore..... | 1875 |
| Bliss, Oliver, Wilmington, American Eclectic..... | 1876 |
| Blockson, J. W., Wilmington, Jefferson..... | 1871 |
| Brown, Thos. A., Wilmington, Jefferson..... | 1873 |
| Black, John L., New Castle, University of Pennsylvania..... | 1862 |
| Burr, Horace, Wilmington, Yale College..... | 1842 |
| Bayd, John, Wilmington, University of Pennsylvania..... | 1834 |
| Burr, Wm. H., Wilmington, University of Maryland..... | 1864 |
| Burr, Martin W., Middletown, University of Pennsylvania..... | 1864 |
| Ball, L. Heister, Stanton, University of Pennsylvania..... | 1855 |
| Bush, J. H. J., Wilmington, Jefferson Medical College..... | 1846 |
| Boeswald, F., Wilmington, Eclectic Institute..... | 1886 |
| Bradford, Thos. Budd, Wilmington, University of Pennsylvania..... | 1884 |
| Ball, C. D. E., Wilmington, University of Maryland..... | 1890 |
| Corse, W. H., Wilmington, University of Pennsylvania..... | 1872 |
| Chamberlain, G. G., Middletown, University of Pennsylvania..... | 1848 |
| Cameron, John, Wilmington, Hygeia Therapeutic, N. Y..... | 1860 |
| Carrow, Flemming, Wilmington, National Medical College..... | 1874 |
| Chandler, Swithin, Faulkland, Medical Department of Columbia University and Pennsylvania Medical College..... | 1854 |
| Cooper, Smith, Wilmington, University of Pennsylvania..... | 1876 |
| Cooper, Peter, Wilmington, Hahnemann Medical College..... | 1881 |
| Cumbough, J. W., Hockessin, University of Pennsylvania..... | 1878 |
| Chandler, Jos. H., Centerville, Jefferson Medical College..... | 1890 |
| Calvin, Wm., Booth's Corner, Philadelphia College..... | 1864 |
| Chadwick, S., Wilmington, Hahnemann Medical College..... | 1880 |
| Cardosa, John T. M., Claymont, University of Pennsylvania..... | 1844 |
| Carleza, John D. M., Claymont, University of Pennsylvania..... | 1877 |
| Curtis, J. M., Wilmington, Hahnemann Medical College..... | 1869 |
| Costes, L. P., Summit Bridge, University of Pennsylvania..... | 1886 |
| Cantwell, Geo. H., Wilmington, Jefferson Medical College..... | 1883 |
| Corkran, Willard F., Wilmington, University of Maryland..... | 1884 |
| Draper, Jas. A., Wilmington, University of Pennsylvania..... | 1890 |
| Dunlap, Francis S., Delaware City, University of Pennsylvania..... | 1861 |
| De Witt, J. W., St. George's, Jefferson Medical College..... | 1863 |
| Day, F. Harvey, Rockland, University of Pennsylvania..... | 1865 |
| Devon, I. L., Wilmington, Hahnemann Medical College..... | 1872 |
| Eberts, J. E., Wilmington, Washington University and College of Physicians..... | 1876 |
| Enos, Thos. A., Townsend, Jefferson Medical College..... | 1879 |
| Evans, Wm. D., Newark, University of Pennsylvania..... | 1881 |
| Flinn, Irvine M., Newport, Jefferson Medical College..... | 1883 |
| Flinn, Lewis W., Wilmington, Jefferson Medical College..... | 1883 |
| Frantz, A. E., Wilmington, Hahnemann Medical College..... | 1882 |
| Fraser, Edward E., Wilmington, Jefferson Medical College..... | 1887 |
| Greenleaf, B. P., Henry Clay P. O., Medical Department of Pennsylvania College..... | 1855 |
| Goswich, E. W., Wilmington, Hahnemann Medical College..... | 1877 |
| Green, C., Wilmington, College of Physicians and Surgeons, New York..... | 1840 |
| Grimshaw, A. H., Wilmington, University of Pennsylvania..... | 1846 |
| Green, Chas. D., Kirkwood, University of Pennsylvania..... | 1848 |
| Gardiner, Richard, Wilmington, Hahnemann Medical College..... | 1870 |
| Griffiths, J. P., Wilmington, Eclectic Medical College..... | 1862 |
| Harlan, Caleb, Wilmington, University of Pennsylvania..... | 1836 |
| Hamilton, W. N., Odessa, Jefferson Medical College..... | 1836 |
| Hughes, M. J., Wilmington, Jefferson Medical College..... | 1883 |
| Henry, Columbus, Newark, University of Pennsylvania..... | 1871 |
| Heald, Pusey, Wilmington, Hygeia Therapeutic College, New York..... | 1863 |
| Heald, Mary H., Wilmington, Hygeia Therapeutic College, New York..... | 1864 |

| | |
|---|------|
| Hitch, Wm. S., Wilmington, Jefferson Medical College..... | 1861 |

CHAPTER XXV.

THE BENCH AND BAR.

LAW was first transplanted to the shores of the Delaware from Sweden, and justice first dispensed—probably in 1643—by the ponderous, irascible Governor Printz, described by shrewd, observant, caustic David Pieterseon De Vries as "Captain Printz, who weighs four hundred pounds and takes three drinks at every meal." This executive was enjoined to "render justice without distinction, so that there may be no injury to any man," "to decide all controversies according to the laws, customs and usages of Sweden" and again "to adopt and follow all the laudable manners, customs and usages of the Kingdom of Sweden." Beyond any doubt it was at Tinicum, in the present county of Delaware, Pennsylvania, where Printz established his home or "hall," that the laws alluded to in his instructions were first capriciously, crudely and it is to be feared, sometimes cruelly administered. The Governor had a difficult task to perform for (according to the Record of Upland Court), the laws of Sweden had then but recently been codified, and, even in the sparsely settled colony, he must occasionally have been confronted with problems which he would doubtless have preferred that others should solve. He had no legal lore—indeed, no knowledge of executive duties—his whole education and experience having been in the line of the military. The fact that he was expected at all times to look out for the interests of the Swedish Company, and thus compelled, occasionally, to act in the role of plaintiff as well as in the capacity of judge, did not tend to mitigate the unpleasantness of his position. In one of his earliest reports he says, "I have several times solicited a learned and able man . . . to administer justice and attend to the law business, sometimes very intricate cases

occurring, in which it is difficult, and never ought to be, that one and the same person appear in the court as plaintiff as well as Judge."¹

Very little is or can be known of the Swedish administration of justice upon the Delaware. The Governor's jurisdiction, of course, extended to the settlers upon the Christiana and, for that matter, to all in what was known as New Sweden. He had authority to act in judicial capacity in both civil and criminal matters and could punish the more serious class of offenses not only by imprisonment, but by death, though the capital penalty could only be inflicted, as his instructions read, "according to the ordinances and legal forms, and after having sufficiently considered and examined the affair with the most noted persons, such as the most prudent assessors of justice that he can find and consult in this county."² The Swedish Governor had not long, however, to be burdened with legal or other responsibilities, nor had any of his nationality, for the Dutch in 1655 relieved them of all cares of government in colonial America.

The Dutch have left scanty records of the working of the law among them, but far fuller accounts than did their predecessors, and indeed they had much more to preserve. The Pennsylvania Archives, the twelfth volume of New York Colonial Documents, relating entirely to the settlements upon the Delaware, Acrelius' "New Sweden" and various other works throw some light upon the nature of their civil tribunals. It appears that when Jean Paul Jacquet was appointed Vice-Director, on the 25th of November, 1655, he was instructed "to administer law and justice to citizens as well as to Soldiers," and the secretary, Andrew Hudde, was to keep a record of all arrests, complaints, etc., and also of "all judgments, sentences and decisions." One of the principal duties of the Vice-Director was to rigidly enforce an order against the sale of liquor to the Indians. He was also to enforce laws against the profanation of the Sabbath, the robbing of gardens and plantations, etc. The courts where breaches of these ordinances were to be tried was a meeting of Council to be convened only by order of the Vice-Director. In all cases in which the soldiery or the company's interests were involved, the Vice-Director was instructed to add two sergeants, who were to sit as a part of the court; but in cases "between freemen and servants of the Company"—purely civil ones—"two suitable free-men were to be substituted instead of the sergeants." The tribunal appears to have exercised legislative as well as judicial functions, for it is recorded that on February 13, 1656, all persons in New Castle, or New Amstel, were re-

quired, under penalty of paying a fine of five guilders, to inclose their lots before the 15th of the following month. Several other laws or ordinances were enacted.

It seems probable that the court alluded to as being held in February, 1656, and perhaps some others, were held in Tinicum, but that point was practically abandoned by the Dutch after they had obtained absolute sway in the colony, most likely in 1657, and it was undoubtedly in that year that the first court was held within the limits of the present State of Delaware.

THE NEW CASTLE COURTS BEFORE THE COMING OF PENN.—Certain it is, that early in 1656, Jacob Alrichs was appointed Vice-Director of the city's colony (that part of the Delaware territory from the Christiana River to Bombay Hook, transferred to the city of Amsterdam by the Dutch West India Company), and in the latter part of April he arrived at New Castle. The fact that the Swedish inhabitants petitioned that a court messenger and provost might be appointed for them, that Sheriff Van Dyck proposed "one Jurgen, the Fin on the Crooked Kil," for the office, and that on June 12, 1657, the suggestion received the approval of Governor Stuyvesant, indicates that a court was then held at New Castle. That it was constituted in a manner not conforming to usually accepted ideas of a judicial tribunal appears from a letter written by Alrichs to Stuyvesant March 30, 1658, in which he says: "I found the government here to consist and be attended to by the Vice-Director or Commander, sitting over military delinquents, with military persons, and over citizens with citizens, as ordered by your Honor, to whom I, upon my arrival, represented and showed the charges, which were to be taken in consideration afterwards."³ From this, Mr. Nead, in his historical notes on the Duke's book of laws, avers that a regular set of laws or ordinances had been promulgated for the general government of the settlements along the river soon after the conquest by the Dutch, and that Alrichs' instructions contemplated their continuance—"a conclusion," says H. G. Ashmead, "which is doubtless correct."⁴

The earliest recorded appearance of an attorney within the limits of Delaware was at this court of 1658. Alrichs, under date of the 30th of March, writes: "I have also to pay the attorney Schelluyn for salary earned by him in the suit against Dirck Cornellissen Heunich, skipper of the ship "Prins Maurits," but it seemed the expenses ought to be paid out of the deposited sum, the proceeds of the sale of goods, unless your Honor understood we should not consider this."⁵

⁵ Pennsylvania Archives, Second Series, vol. vii., p. 528.

The courts for the company's colony were held for several years at Fort Altena (as Fort Christina was renamed by the Dutch), under Vice-Director William Beekman, and the sittings occurred "three or four times during the year, according to demand or circumstances." It was the policy of the Dutch at first to retain in office the Swedish magistrate, as the majority of the colonists were of that nationality, but after the lapse of two or three years some of them were appointed from among the Hollanders. In 1663 the court having jurisdiction in the company's colony (the territory north of the Christiana), and sitting at Fort Altena, consisted of Vice-Director Beekman, Oele Stille, Mats Hanson and Peter Cock, commissioners, and about the same time the court sitting at New Castle consisted of Magistrates or Commissioners Hans Block, Israel Helme, Petes Rambo, Peter Cock and Peter Alrichs. Magistrate Cock thus appeared to occupy a place in both courts. These officials were retained in place by Governor Nichols, according to the terms of the articles of capitulation, when the English under Sir Robert Carr subjugated the Dutch in 1664. The articles also specified that "The Scout, the Burgomaster, Sheriffe and other inferior magistrates should use and exercise this customery power in adminis'ion of justice, within their precincts, for six months, or until his ma'ties pleasure is further known." On the 21st of April, 1668, Governor Lovelace commissioned Sir Robert Carr as "Shcout," and Block, Helme, Rambo, Cock and Alrichs as Councilors, "to advise, hear and determine by the major vote what is just, equitable or necessary in the case or cases in question." In the following year, for the Whorekill (or Hoornkill) and the surrounding territory, it appears that Heermanus Fredrickson was appointed "Scout" and Slander Matson (Alexander Mollestine) Otto Wolgast and William Cleasson as commissioners with magisterial powers. This is the earliest mention of the establishment of anything like a judicial tribunal in the region of the present Lewes in the State of Delaware.

The judicial system of England was steadily but slowly pushed into practice by Governor Lovelace and made to supplant the Dutch dispensation of justice. This was shrewdly done, and so gradually that no sudden shock unsettled the people, but it was done surely, and whenever circumstances permitted. The Governor did much to enhance the dignity of the bench and to hedge it round with all the pomp of circumstance and power, causing, among other things, that the King's arms should be emblazoned in the sitting places of the courts and borne aloft upon the staves of the court officers.

A case which must be ever memorable as the

first trial by jury upon the Delaware occurred in 1669, and offered Governor Lovelace an opportunity to make several radical innovations in criminal procedure. This was no less than the trial at New Castle of the "Long Finn," Marcus Jacobs (or Jacobsen), *alias* John Binckson, *alias* Mathews Hincks, claiming to be a son of the Swedish General Coningsmarke, for insurrection. The "Long Finn" was arrested in August or September, 1669, and was speedily brought to justice. In his instructions as to the form of court for this trial the Governor, after directing that "a jury of twelve good men be empannelled" and prescribing the form of oath to be administered to them, proceeded to announce the style of the formal indictment, the essential parts of which were as follows:

"John Binckson, Thou standest here indicted . . . for that not having the feare of God before thine eyes, but being instigated by the devill, vpon, or about the 28th day of August, in 21st year of the Reigne of or Sovereigne Lord Charles the 2d, etc. . . . Annoque Domini 1669, at Christina & att severall other times & places before, thou didst most wickedly, traitorously, feloniously & maliciously conspire and attempt to invade, by force of arms, this Government, settled vnder the allegiance and protection of His Ma'tie, & also didst most traitorously sollicit & entice divers and threaten others of his Ma'ties good subjects to betray their allegiance to his Ma'tie, the King of England, persuading them to revolt & adhere to a forraigne prince, that is to say the King of Sweden. In prosecution whereof thou didst appoint and cause to bee held, Riotous, Routous and Unlawfull Assemblyes, breaking the peace of or Sovereigne Lord, the King, and the laws of this Government in such cases provided. John Binckson, &c., what hast thou to say for thyself. Art thou guilty of the felony & treason layd to thy charge or not guilty? If hee say not guilty, then ask him by whom will thou be tryde. If hee say by God and his countrey, say, God send thee a good deliverance."

After directing how the witnesses should be sworn and give their testimony, the instructions continued—

"Vpon which the Jury is to have their charge given them, directing them to find the matter of Fact according to Evidence, and then let them bee called over as they go out to consult upon their verdict in which they must all agree;"¹

and so on through the details concerning their return and the announcement of the verdict. The "Long Finn" was found guilty and the sentence pronounced upon him is recorded as follows:

" . . . It is adjudged that ye said Long finne deserves to dye . . . Yet in regard that many others being Concerned with him in that Insurrection might be involved in the same Premunire, if the Rigour of the Law should be extended, & amongst them divers, Simple & Ignorant People, it is thought fitt & Ordered that the said Long finne shall be publicly & severely whipt, & stigmatized or Branded in the face with the letter (R), with the inscription written in great Letters, & putt upon his Breast. That hee received that Punishment for Attempting Rebellion, after which that hee bee until hee can be sent & sold to the Barbadoes, or some other of those remoter Plantations."

Whether that portion of the culprit's sentence pertaining to corporeal punishment was carried out is unknown, but it is a matter of record that he was transported to Barbadoes and sold, leaving Manhattan January 26, 1670. Thus ended what may be called the first of the *causes celebres* in the courts on the Delaware.

On May 17, 1672, it appears that a "Towne Court," whatever that may have been, was ordered to be held at New Castle, to be presided over by

¹ Documents Relating to the Colonial History of New York, vol. xii, pp. 467-468.

the bailiff and six assistants, to try all cases of debt or damage to the amount of £10, and from its decisions there was no appeal.

When the Dutch again became, in July, 1673, the sovereign power upon the Delaware they continued the courts at New Castle, Upland, and the one at the Whorekill. The inhabitants on both banks of the Christina Kill were within the jurisdiction of the Upland Court. The English again supplanted the Dutch by the terms of a treaty held on February 9, 1674; but Sir Edmund Andross, representative of the Duke of York upon the Delaware, did not take possession until October following, and it is probable that the courts at New Castle and elsewhere were held under the Dutch authority up to that time. On the 2nd of November the Governor ordered that all of the old magistrates, *except* Peter Alrichs,¹ who had held over in office from the time the Dutch captured the province, should be continued in authority for at least six months.

The justices of New Castle were ordered to hold a Court of Oyer and Terminer February 28, 1675, and May 13-14, the same year, a special court was held at New Castle in reference to highways and churches. At this court Governor Andross was on the bench. Governor Carteret was on the right and Captain Salisbury on the left. Mr. Minville, Mr. ——— and Mr. William Tom, the clerk of all the courts on South River, were also present. The commissions for the magistrates of the several courts were read and all present were sworn.

The first jury of which any account is found was empaneled at this court and was constituted as follows: Samuel Edsell, Thomas Wandell, Joseph Smith, John Jackson, Mart Rosemond, John Desjardins, Otto Ernest, Hendrick Jonsen, Guysbert Direks, Henry Jones, and Ralph Hutchinson. The first case brought was by Sheriff Edmund Cantwell against James Sandelands, of Upland, on suspicion of being the cause of the death of an Indian. The verdict rendered by the commissioners was, "They find him not to be guilty; Hee is ordered to be cleared by proclamation."

On the 15th of August, 1675, the magistrates of New Castle wrote to Governor Andross desiring

"That there may bee more Magistrates named in this Towne for the completing the Bench, Mr. Moll being to goe to Maryland, where his business will keep him most part of the winter Ffop Outhout² when

¹ The reason for the exception in regard to Alrichs, was his too eager and ardent attachment to the Dutch interest. The records of the Sussex County Court concerning the appointment of the magistrates at this time (1673) contain the following: " . . . except Peter Alrichs, Bayliffe, he having professed himselfe to ye Dutch at their first coming, of his own motion, and acted very violently (as their chief officer) ever since."

² Ffop Outhout, sometimes written Fop Jansen Outhout and sometimes Fop Jansen, was earlier than this date a tavern-keeper in New Amstel (New Castle), later purchased land on the east shore, then under juris-

there is ice on the river cannot come over. Mr. Chew living so farre as Apaquenamy not to be relied upon, the same reason for Hans Block in foul weather he being ancient, so are none to be relied on but Capt. Cantwell and Dirick Albertsen, who will make a slender Court, that your Honor would be pleased to send over a new Lawe Booke and if to be got some other paper bookes for the keeping of the records in order, none being here to be purchased."

Just here we may not improperly digress slightly to show that the humble character with the queer name of Ffop Outhout, heretofore mentioned as unable to "come over" when there was ice in the river, serves to prove in history an important and interesting fact, viz.: That New Castle Court had jurisdiction upon the east side of the river—that is, a portion of New Jersey—before the "twelve-mile circle" was drawn. On October 26, 1678, he was chosen by Governor Andross to act with "Overseers, Select Men, or Commoners" on the west side of New Jersey, at Salem or Swamptowne, in the words following: "If any dispute or difference hapen to arise amongst them and old inhabitants of those p^{ts}, that then Mr. ffof Outhout, who hath been an antient Inhabitant there and is now one of the Justices of New Castle, have notice thereof, who is authorized upon such Occasion to bee one of the Court & being there is to preside and you or any four of you to keepe a Court."

The evidence that New Castle Court's jurisdiction extended over a portion of the region on the opposite side of the Delaware is substantiated by a list of taxables taken in 1677 (given in another place) of all living in the jurisdiction of New Castle Court, and containing names of those residing "on ye east side of ye river." Numerous instances are also found of cases before the courts, prior to 1680, of land disputes on the east shore tried in this court.

The Duke of York's laws were formally promulgated on September 22, 1676, by Governor Andross, and his ordinance was reiterated by his deputy Nichols with especial reference to New Castle and Upland Courts the former of which was referred to as the "Court of the Towne, River and Bay." Immediately following the order establishing courts upon the Delaware, in conformity with the Duke's laws, several commissions were issued by "Edward Andross, Esq., Seigneur of Sansmares, Lieut. and Govnr. Gen'all, under his Royal Highnesse, James, Duke of Yorke and Albany, and of all his territories in America." One of these appointed Captain John Collier as commander on the Delaware River and Bay, and another made the same personage sub-collector of His Majesty's customs. Instructions were also drawn up and forwarded to be presented upon the organization of the courts. The preamble recited that,

"WHEREAS, The last year of my being att Delaware upon application of the Inhabitants Representing that my Predecessor, Governor

diction of this court (now West Jersey). He lived there ever after, and was a magistrate until Penn's arrival and perhaps later.

Lovell, had begun to make a Regulation for the due Administration of Justice, according to the Lawes of this Government, Pursuant to wch I did appoint some magistrates and make some Rules for their proceeding the yeare ensuing or till further order. In wch haveing upon mature deliberation By the advice of my Council made some alteration, They are to Remaine and bee in force in forme following."

The purport of these instructions was as follows :

"1st. That the books of laws practiced in New York, Long Island, and dependencies be in force and practice in this river and precincts, except the constables courts, County Rates and some other things peculiar to Long Island."

"2d. That there be three courts held on the several parts of the river and bay as formerly, viz., one at New Castle, one at Upland and one at the Whorekill.

"3d. That the courts should consist of justices of the peace, of whom three should constitute a 'coram,' to have the power of a Court of Quarter Sessions and decide all matters under twenty pounds without appeal; the eldest justice to preside unless otherwise agreed, among themselves.

"4th. 'All small matters under a few pounds may be determined by the court without a jury unless desired by the Parties; as also matters of Equity.'

"5th. That the court for New Castle be held once a month and those for Upland and the Whorekill quarterly.

"6th. By-laws made by the courts for their guidance to be binding for one year.

"7th. Provided for regulating fees.

"8th. Provided for a High Sheriff for 'the town of New Castle, River and Bay to act as in England.'

"9th. Provided for the procuring of books in which a record of all court proceedings was to be kept in the English language.

"10th. Made provision for the appointment of a 'clerke.'

"12th. Enjoined the courts from imposing any 'rates' except by the approbation of the government."

In regard to lands it was decreed that those desiring to take up and become possessed of tracts or parcels of the same, should apply to that court within the bounds of whose jurisdiction the lands might be, and that a certificate from such court should be a sufficient warrant for the surveyor to survey the same.

The first session of the court at New Castle was held on the 10th of October, and that at Upland on November 14, 1676. Both courts at their first meetings requested Mr. William Tom, the former clerk, to deliver the court records to Mr. Ephraim Herman, the new clerk. The first volume of New Castle Court records is opened as follows :

"*Liber A.*"

"Records of ye court of New Castle, in Delaware, Begun ye 10th of October, 1676, ending ye Last of Decemb^r, 1676. Capt. John Collier, commander, was president of the court."

Then followed the organization of the tribunal entered thus :

NEW CASTLE IN DELAWARE, Octob^r, 10th, 1676.

"His Honor, Govern^r Edmond Androm, haveing issued out a commission for New Magistrates and Justices of the Peace in the Towne and Jurisdiction of New Castell, the following persons where this day sworn and establish't in their Places by Captⁿ John Collier and Captⁿ Edmond Cantwell, viz. : Mr. John Moll, Mr. Henry Ward, Mr. William Tom, Mr. Gerrett Otto and Ephraim Herman, Clarke.

"The severall New Commissions Granted by his Honor, the Govern^r, to Captⁿ John Collier, as also to the Justice, wth their Instructions and the Commission to the Clarke being openly Read ; It was ordered that the same should be Recorded.

"By the Govern^r."

"[COPIA.]

"These are to authorize Captⁿ John Collier and Captⁿ Edmond Cantwell, or either of them to give the oaths to the New Magistrates att New Castell and up the River att Delaware, as also at the Whorekill, the doing whereof shall bee yo^r Warrant. Given under my hand in New York the 27th day of Septemb^r, 1676.

"(Signed)

— ANDROM."

In addition to the four justices mentioned as be-

ing sworn into office on October 10th. Ffopp Out-hout, who was not present, was administered the oath on October 12th, and it was taken by Jean Paul Jacquet on the 7th of November following, there thus being six justices or magistrates.

The New Castle Court worked under some disadvantages and perplexities, but its best efforts were devoted to perfecting a system. On October 12, 1676, two days after its organization, it appears that it was agreed "to draw several necessary things for the best interests of the place, &c., into a Peticon and send to his Honor, the Governor, for his approbation, which was accordingly done. But there being no opportunity in a good wyll after, the justices att their court held the 7th, 8th and 9th of November made some alterations in the . . . Peticon and so sent the same to his honor."

The petition pertained chiefly to militia matters, but requested some instructions for the guidance of the court. The justices seem to have been all at sea in regard to what portions of the Duke's laws pertained to the territory in their jurisdiction, and they particularly requested "That your Honor will be pleased to send us a Law booke of his Royall Highness, corrected of all such laws and orders as do not concerne this River."

To this the Governor responded in due season, promising to send the "Law booke" at the first opportunity and giving them instructions upon various topics pertaining to civil affairs, but not particularly connected with the conduct of the courts.

The New Castle Court on February 8, 1676-77, made acknowledgment of the Governor's communication in a manner which indicated that it was appreciated. It began :

"Wee have Received yo^r Honor^s Gracious answer dated y^e 26th of Novemb^r Last part too^m of the 8th of the same month, and doe hereby Returne yo^r honor^s humble thanks for his Reddyness, to Improve all opportunitys for the good of the River, and in particular of this place, whereof we are daily more sensible."

and then continuing, alluded to the building of a prison at New Castle, and various other matters of public business. It was requested that Captain John Collier or the court might be empowered to prove wills and grant letters of administration, and also that some fit person might be appointed as vendue master or the court be empowered to act in such capacity. Lastly, the magistrates requested that his honor might admit of "a General or meeting of all the justices as heretofore (if only for the making up of the Levys, Collecting of General Revenues and other public and General afayres)", or if that were not allowed, that the Governor might point some more expedient way of disposing of such business.

This last request was not granted, the Governor saying in his answer, dated August 14, 1677 that he saw "no need of a General or High Court in the River, every court having power to make it-

ting rates for the highwayes, Poor, or other necessaries, as is practiced in England." The other requests were favorably responded to.

The fact that the justices of the court at New Castle were constantly seeking instructions from the Governor and making suggestions in regard to changes shows that they were keenly alive to the needs of the people and the peculiar conditions of the times and the new settlement. In this respect the New Castle Court was far superior to the one at Upland, which kept upon the even tenor of its way, complacently ignoring, so far as they could, the new needs of the people and the changes, modifications and advancements made and contemplated by the newly introduced judicial system. Unfortunately, some of the earliest records of the court have been lost. They were very poorly kept by William Tom who was clerk, until he was superseded by Ephraim Herman in the fall of 1676. The former was then ordered to deliver to the latter "The records of ye Court & other Publique Books and Writings." These were accordingly delivered at the court held June 5, 1677, and forwarded to Governor Andross who, as they were very obscure and poorly written, ordered that they be copied into a "fitt booke." In March, 1678, the matter again came before the court, and thereafter nothing further appears concerning these valuable first records, nor have they since been found.¹

Returning from this digression, it may be remarked that the next court (pursuing the regular order) which was held at New Castle was upon Sept. 4, 1677. Magistrates John Moll, William Tom, Fopp Outhout, Jean Paul Jacquette and Garret Otto were present. The commission of Captain Christopher Billop as commander on the Delaware River and Bay was read, but, contrary to the custom which had been observed up to this time, he was not made the presiding officer of the court. To this position John Moll was elevated, and he served acceptably as president justice until October, 1683.²

¹ Judge William G. Whiteley has been known to say that when he was prothonotary an old book of records was abstracted from his office. This may have been the court record referred to, which, could it be found, would doubtless clear up many matters now in the dark.

² John Moll was very prominent in New Castle and Delaware in the seventeenth century. He was one of the justices of the Court at New Castle during the entire period of the Duke of York's government, and was for some time its presiding justice. The New Castle Court was an appellate tribunal for all the courts on the Delaware. He was named as commissioner, with Ephraim Herman, in a deed of feoffment from the Duke of York to William Penn to give possession and seizin of the town of New Castle and a circle of land twelve miles around it. His account of the ceremony is curious. He says that on the first arrival of Mr. Penn at New Castle from England, in October, 1682, the commissioners considered for twenty-four hours the deeds which Mr. Penn showed them from the Duke of York, and then, "by virtue of the powers given us by the said letters of attorney, we did give and surrender, in the Duke's name, to Mr. Penn actual and peaceable possession of the fort at New Castle, by giving him the key thereof to lock upon himself alone the door; which being opened by him again, we did deliver to him also one turf, with a twig upon it, a porringer with river water and soil, in part of all that was specified in the said indenture, and according to the true intent and meaning thereof."

On March 2, 1681, Abraham Man, who was a very troublesome man in

At the sitting of the court on June 4, 1678, there came up a case which baffled the judicial minds that then adorned the bench; but this does not seem so very strange when it is taken into consideration that the singular charge against the defendant was that of *marrying himself* to a woman of the settlement, and that the matter was further made difficult of adjudication by the fact that he was a magistrate and a member of the court. Walter Wharton had married himself, "contrary to the known laws of England and of the laws and customs of this province, and entered the same on his book before having an order or grant from the court." Concerning this case the record contains the following, which shows the court's perplexity:

"The said Walter Wharton, not appearing three following court days, and to the End the Reproach may bee taken away from the River and that such notorious Breaches of the Lawes and disorders may for the future not passe unpunished, Especially on persons of Lower qualitie, whoe if this of Mr. Wharton's (who is in Commission and beares the office of a Justice of ye Peace ought to give good examples to others) had not been Regarded might att all tymes hereafter bee held for a Bad precedent.

The Court doe, therefore, thinke itt necessary humbly for to offer the

the colony, on his own accord in open Court, declared and impeached Justice Moll, saying that he was not fit to sit as Judge and offered to prove his assertion. Justice Moll retired from the bench during the investigation, and the court ordered Mr. Man to give one hundred pounds security to answer and prosecute Moll at the next term of court. On April 6, 1681, Man brought in his indictment of impeachment, but failing to sustain the charges, Justice Moll, on November 1, 1681, resumed his duties as presiding justice.

Mr. Moll was also identified with the Labadist colony which was established at Bohemia Manor in 1684. The Labadists were settled there by Jasper Dankers and Peter Sluyter, missionaries from the Labadists of Wieward, in Friesland, who first visited the colonies under assumed names and made some converts, among them Ephraim Herman, son of Augustine Herman, proprietor of Bohemia Manor. Bohemia Manor was in Maryland adjacent to the Delaware line, and was patented with manorial privileges to Augustine Herman, October 12, 1683, by Lord Baltimore in return for a map of the country made by Herman, and by subsequent additions it was increased to nearly twenty thousand acres lying in both Maryland and Delaware, immediately west of Elk River. Ephraim Herman, a prominent citizen of Delaware, and clerk of the courts on the Delaware River, being the eldest son of the proprietor of Bohemia Manor, persuaded the latter to deed a large portion of the tract to the Labadists for colonization purposes. This was done, and the final conveyance was made August 11, 1684, to Peter Sluyter, *alias* Vorreman, Jasper Danckaerts, *alias* Schilders, of Friesland; Petrus Bayard, of New York; John Moll and Arnoldus de la Grange, of Delaware; embracing three thousand seven hundred and fifty acres, "bounded on the west by Long Creek; north by the great cart road leading to Reedy Island, in the Delaware; east by the Appoquinimink path leading from the great cart road to the head of Bohemia River, and south by the Bohemia River." This land was subsequently known as the Labadie tract.

John Moll and Arnoldus de la Grande released their land immediately to Sluyter and Dankers; Bayard made a similar assignment, in 1686, and Sluyter became sole proprietor ultimately. A few families came over from Wieward and, with some others from New York and Ephraim Herman, constituted the original Labadist colony. Peter Bayard was a New York hatter, a son of Annake Bayard, sister of Governor Stuyvesant. Bayard and Ephraim Herman abandoned their wives and business to join this peculiar people. Herman, however, "soon repented of his folly and returned to his wife, but in less than two years was taken suddenly sick, became crazy and died, fulfilling, by his untimely end, the malediction of his father, who, as it was said, pronounced the curse upon him that he might not live two years after uniting himself with the sect. Augustine Herman died in 1686, leaving a will in which he speaks in emphatic terms of condemnation of the connection of his son with the Labadists." (*Long Island Historical Society*.)

The Labadist community was limited to one hundred persons, with Peter Sluyter as its head and his wife installed as abbess. Sluyter grew rich, dealt in slaves and tobacco and lived well, while the members of the colony suffered many privations. Sluyter died in 1722 and the Labadist colony scattered and none were left five years after his death. In 1698, Sluyter divided up a portion of the land, of which he had become sole proprietor, and conveyed three necks to Herman Van Barkelo, Nicholas de la Montaigne, Peter D. Koning, Derick Kolchman, John Moll, Jr., Hendrick Sluyter and Samuel Bayard.

premises to y^e judgement of his hono^r the Governo^r for to Inflict such punishment as his hono^r, in his wisdom, shall thinke fitt and expedient."

The matter of jurisdiction of the several courts remained vaguely defined for five years after their re-establishment by the English in 1673, but upon Dec. 3, 1678, the boundary between Upland and New Castle Courts was exactly laid down. The record says: "The limits and bounds betweene this court and the court of Uppland are with both courts' consent agreed to be in the boght at Olle Fransen's creeke ortherways called the Stony creeke and so over the river (Delaware) to the singel tree point." The stream that flows into the Delaware at Quarryville, it may be said in explanation, was the old Stony Creek, and the south line of the "boght," while the single tree point was directly opposite upon the New Jersey shore. The bounds of the court so remained until March 14, 1681, when Naaman's Creek was recognized as the north line of the jurisdiction of New Castle Court, and continued until the circle line was struck in 1701, since which time it has remained unbroken. The Whorekill Court held jurisdiction from its organization, in 1673, in the territory now known as Kent and Sussex Counties until 1680, when St. Jones Court, in what is now Kent County, was established. From the dates given, the courts of New Castle, St. Jones and Whorekill continued until reorganized, Dec. 25, 1682, by Penn, as the counties of New Castle, Kent and Sussex, since which time they have been practically unchanged.

That the New Castle Court still retained jurisdiction over certain parts of the eastern shore in 1678 is shown by the following letter from Governor Andross, who speaks also of several other matters of interest, as the law concerning liability of property for debts, etc:

"GENTLEMEN: I have Rec'd you^r addresse in answer to which yo^r desire of a Minister is allowed by the Lawe. A new Commission for Magistrates is hereth sent, and alsoe a Lawe Booke. . . . The Courts have power to order matters Relating to the Surveigho^r in every Respect according to Regulation and Lawe.

"The Booke of Lawes gives directions for weights and measures to bee English; but Antient Custom may bee lookt upon as Lawe and the Publick weight-house is to bee grono^r weights only for above a quarter of a hundred.

"Payment for wolves' heads and other necessary Charges are to Continue on the East syde as formerly.

"When the acts of publick debts are Stated and allowed care shall bee taken for their management as desired.

"Houses and Improved Lands are Lyable to pay debts as well as moveables and where none administers the Court may appoint some Responsible person to doe itt haveing due Reguard to widdowes.

"All favour may be expected as to trade, so that the acts of parliament & orders thereupon bee not Infringed wth due Reguard to the custome-house here.

"The Late Commander is here and to give an acct of his actings on yo^r part and if any have been wronged by him they shall have rights & alsoe any publick matter w^{ch} may further acrow, Rectified as soone as may Bee. I remaine,

"Yo^r Verry affectionate friend,

"ANDROSS.

"New Yorke, Oct. 26, 1678.

"For the Justices of the Court of New Castle, In Delaware."

It does not transpire that anything further of particular interest occurred in the New Castle Court during the remaining years of its continuance under

the Duke of York's government. The greatest good that was done by the court, which seems to have constantly been solicitous for the best interests of the people, was in causing the improvement of roads and regulating the sale of strong drink, from the abuse of which many evils had sprung up in the community. Not only were laws prohibiting the indiscriminate sale of spirits spread on the statute-book, but Governor Andross had repeatedly called the attention of the courts to them and urged the utmost watchfulness concerning their observance. At one time he wrote: "Pray take care and fitting Orders for Ordinaryes, that they bee fitt persons, duly Lycenced and well provided according to Lawe, and that none else be admitted to retaile." The laws of the Duke of York were an improvement upon those of the Dutch, and especially within the jurisdiction of the New Castle Court, where they were for the most part wisely administered; they well served the needs of the time, but they were destined to be supplanted by others in many respects superior to them, and the time was almost at hand.

The last court held in New Castle prior to the arrival of William Penn and the establishment of his government was on the 3d of October, 1682, at which were present as magistrates John Moll president, Johannes De Haes and William Sempill, together with Capt. Edmund Cantwell, high sheriff. There is an entry in the record following the minutes of the court which was made Oct 28, 1682, and is as follows:

"On the 27th of October, 1682, arrived before ye Towne of New Castle, in Delewar, from England, William Penn, Esqr., Proprietor of Pennsylvania, who produced two certaine deeds of feoffment from ye Illustre Prince James, Duke of Yorke and Albany, etc., for this Towne of New Castle and twelve miles about itt, also for ye Twoe Lower Counties of Whorekill and St. Jones's, w^{ch} ad deeds fore date 24 August, 1682, and pursuant to the true Intent, Purpose and meaning of his Royall Highnesse in ye same deeds bee y^e ad William Penn Received possession of ye Towne of New Castle, ye 28th of October, 1682."

Just a month after the last court was held under the Duke's government, the first under Proprietor Penn had its sitting at New Castle, Deputy William Markham presiding. Following is a minute of that court:

"Att a Court Held in the Towne of New Castle upon Delaware the Name of our Sovereigne, Lord Charles the 2nd, by the Grace of God, of England, Scotland, France and Ireland, King, defender, of the faith, and by commission and appointment of William Penn, Esqr. Proprietor and Governo^r of Pennsylvania, etc., on Thursday, the 2nd of November, in ye 35th yeare of his Maj^{ty} Raigne, Annoh Dom, 1682.

"The R^t Hono^{ble} Propriet^r, etc.

"CAPT WILLIAM MARKHAM,

"MAYOR THOM. HOLMS,

"MR. JOHN SIMCOCK,

"MR. THOMAS BRATTE,

} Of the Council.

"MR. JOHN MOLL,

"MR. JOHANNES DE HAES,

"MR. WILLIAM SEMPELL,

"MR. ARNOLDUS DE LAGRANGE,

"MR. JOHN CANN,

} Justices of the Peace.

"The Right Hono^{ble} Proprietor, William Penn, by his publick speech, directed to the Inhabitants in General, did in open Court declare that hee had appointed and called this Court and cheefly to signify and declare unto them in a more publick manner—"

various regulations concerning lands and survey

(given elsewhere in this work), concerning the "Towne of New Castle" (presented in the chapter upon that borough) and upon other matters appropos to the present subject as follows :

"3dly. That if any persons had requests or petitions to present unto him he willed them to doe itt for an answer at ye next Court-day.

"4thly. In Regard that for want of a present Assembly there are not yet fitting Lawes, Regulacions, orders and by-laws for ye Country, provided Hee ye Propriety, therefore, recommended the Magistrates in ye Interim to follow and take the Lawes of his Royall Highness, provided for the Province of New Yorke, for their guide, Soe farr Forth as they are Consistent and not Repugnant to ye Laws of England, assuring ye Inhabitants of this and the other two Counties downward, that they should have and enjoy full, equall and ye same Priviledges wth those of ye Province of Pensilvania, that for future they should bee Governed by such Lawes and orders as they themselves, by their Deputy^s and Representatives, should Consent to; and that hee would call an Assembly for ye purpose, as soon as conveniently might bee, etc."

Penn exercised his usually great common sense in determining to continue for a time the courts already established, and with whose system of administering justice the people had become familiar. It is true that after his government had become well established he made innovations and indeed established a new order of things, but these changes he was not in haste to begin nor in a hurry to carry out, and the result was that the people became accustomed to them by degrees and no violent jarring of the judicial machinery or of the feelings of the people resulted. The changes, too, were brought about by the acts of legislative bodies drawn from the people. The general result of these was the removal of much of the severity from the criminal code and the enlargement of the responsibility of the individual to the community. A law enacted Dec. 7, 1682, requiring all persons who were not by birth subjects of Great Britain, within three months thereafter, to make declaration of their intention to become "freemen," had as one of its results the temporary retirement of the Swedish justices, but most of them qualified and reappeared upon the bench.

With the advent of Penn the trial by jury became a more regular and fixed institution than before. The form of attestation for the jury was given to the New Castle Court Feb. 22, 1683,—

"You solemnly promise in ye presence of God and this Court that you will justify, try & deliver in your verdicts, in all cases depending that shall bee brought before you during the sessions of court according to evidence and ye Lawes of this Government to ye best of yo^r understanding."

The first grand jury in Pennsylvania or Delaware was summoned at the court held at Upland June 27, 1683, and consisted of seventeen persons. One of the new and peculiar adjuncts of the courts under Penn's administration were the "Peacemakers," of whom three were appointed by each court to serve for one year. The litigant parties could refer their difficulties in writing to these peacemakers, and their conclusions were regarded as decisive as those of the court. These were minor innovations and there cannot be said to have been any considerable change in the judicial system until a later period, viz., May 10, 1684, when the Pro-

vincial Court was established, and what was practically a new *régime* went into effect throughout the whole of what is now Delaware. Of this we shall treat later in this chapter. In the mean time it remains to give something of the history of the early, or ante-Penn courts in Sussex and Kent Counties, before following the development of the system which from 1684 was common to all three counties. Though to some extent general in its application, the greater part of the foregoing matter pertains more specifically to New Castle County. The courts of Sussex County rank second in importance and chronology to those of New Castle, and their history follows.

EARLY COURTS OF SUSSEX COUNTY.¹—The Whorekill, as the region round about the present Lewes was originally called, was first occupied in 1658 by a trading-post on or near the site of the now flourishing town. It was successively under the command of Alexander D'Hinjossa and Peter Alrichs. It was practically under the jurisdiction of New Castle Court until 1669, when Governor Francis Lovelace appointed as commissioners or magistrates to constitute a court here Slander Matson (otherwise Alexander Mollestine), Otto Wolgast and William Claessen, and as "schout" or sheriff, Herman Wiltbank. These officials held their positions for several years. A new election was ordered to be held May 6, 1672, and on April 14th of the following year, at a council held at Manhattan, it was ordered :

"That a commission be sent to ye officers and magistrates at Delaware (New Castle), to goe to ye Whorekill, there to keep a Court in his Maj^{ties} name and to make inquiry of all irregular Proceedings and to settle the Government and Officers there as formerly under his Maj^{ties} obedience and the Protection of his Royal Highness for the wch there shall likewise be sent particular instructions."

This evidently was for the purpose of organizing the court in a judicial capacity entirely, as prior to this service it had been partly military in its nature. It is not likely the order was obeyed, for soon afterwards the Dutch came into possession of the territory and Gov. Anthony Colve was in command. The election had been held and in accordance with it he issued the following :

"28th 9^{bre} (November), 1673

His Honor the Governor has selected, upon the nomination by the Inhabitants of the Horekill, the following persons to be Majestates there for the next year:

"MR. HARMONUS WILTBANK,
"SANDER MOLLSTEYN (ALIX. MOLLSTINE),
"DR. JAN ROOTS (RHODES),
"WILLIAM CLAESSEN."

Peter Alrichs, who at once took the oath of allegiance to the Dutch, was appointed "Schout" and commander at the Horekill, September 27, 1673.

Prior to this time, on September 14, 1673, the Dutch Council, in session at New York, had issued an order applying to the whole South River territory, which, among other things, prescribed the juris-

¹ The minutes of the Whorekill, Deale or Sussex Court, from Nov. 8 1661, to 1709 are in the possession of the Pennsylvania Historical Society.

diction of the court at Lewes as follows: "The court for the inhabitants of Horekill to have provisional jurisdiction over the people on the east and west of cape Henlopen and northward to Boomtees (Bombay) Hook."

The territory was in 1674 again captured from the Dutch by the English, and November 2d of that year it was ordered that the officers who were in command in July, 1673, when the Dutch came to these parts, be reinstated.

The oath was administered to the magistrates and officers at the Horekill by Captain Edmund Cantwell, under authority of Governor Edmund Andross, on November 11, 1674. Dr John Roodes, one of the magistrates, was killed by the Indians shortly after the reinstatement.

The courts under Gov. Andross were all reorganized by instruction dated September 25, 1676, in which he declares "that there bee held three Courts in the several parts of the River and bay as formerly: to wit, one at New Castle, one above att Upplands, another below at the Whorekill. That the court for New Castle bee held once a month, to beginn the first Tuesday in each month, and the Court for Uppland and the Whorekill quarterly, and to begin the second Tuesday of the month or oftener if occasion." At this time authority was given the court at Whorekill, the same as at New Castle and Upland, to grant warrants for land to settlers, subject to approval at New York.

From this time on for a couple of years there was no occurrence of especial importance in the Whorekill courts, but on the 8th of October, 1678, we find that a new board of justices were chosen, viz.: John Avery, Francis Whitwell, Alexander Mollestine, John Kippshaven, Luke Watson John Rhoads and James Wells—all, but two, according to the evidence of their names, English. Cornelius Verhoofe was made clerk, and in July, 1679, John Vines was appointed sheriff. Under this court the civil affairs of the district were continued until the division of the Whorekill in February, 1680, and the formation of that part of its territory north of Cedar Creek into St. Jones County or District. Following this, upon May 26th, the court was reorganized by the commissioning of Luke Watson, John Rhoads, John Kippshaven, Otto Woolgast and William Clarke as justices of the peace "at the Whorekill and its dependencies, the said court to begin at the south side of Cedar creek, and soe to go downwards."

Upon the reorganization of the court, in 1680, William Clarke was chosen clerk in place of Cornelius Verhoofe, who was requested to "give over to the new clerke the minutes of the court," which he refused to do, and on the 14th of August, 1681, the "commander-in-chief authorized the magistrate at Deale to make search for and if found to deliver to William Clarke, the present clerke, and if not

found to bind Verhoofe over to next court for trial." It is not known whether the minutes were found or not, but they are not known to exist and no account of the clerk's trial is found upon the records.

The first jury impaneled within this jurisdiction was at the court held in February, 1681, and consisted of Alex. Draper, Alexander Mollestine, Colonel Johnson, Alexander Chambers, William Ecola, Henry Stretcher, Robert Johnson, William Townsend, Richard Williams, John Oakey, Robert Fuike and William Prouting.

A change of the name of the district or county was brought about this year (1681). A petition from divers inhabitants had requested such a change, and it was granted. In the minutes of the court held November 8th and 9th, at which were present Justices Luke Watson, John Rhoads, William Clarke and John Kippshaven, it is mentioned as being "held at Deale, for the Towne and County of Deale." The chief business of this court for several sessions was granting land to settlers.

Shortly after William Penn's acceptance of the territory upon his arrival at New Castle, John Moll, president of the court there, Ephraim Herman, clerk, and Edmund Cantwell visited the lower counties and obtained from the justices of Deale an acknowledgment of their allegiance to the proprietor and recognition of the authority of his government. On the 29th of October, 1682, Penn wrote from Upland to the magistrates of the lower counties as follows:

"These are to desier you meet me next Thursday, noe called at the Towne of New Castle, being the second of November, where I intend to hold a general court for the settling the jurisdiction of these and your parts in which you will oblige

"Your loving friend,

"Wm. Penn.

"Upland, the 29, 8ber 1682.

"If there be any person of note or others that desier to be present they may come freely with and desiered to communicate.

"W. P."

Penn commissioned the justices or judges of the court by the issuance of the following document:

"I doe, in the King's name, hereby constitute and authorize you, Luke Wattson, William Clark, John Roodes, John Avery and Hermanus Wiltbank, or any three of you to be judges and court of judicator for the county of Whorekill, alias New Deale, to act in the said employment and Trust for the preservation of the peace and justice of the province. Hereby willing and charging all persons within the said limits to take notice hereof. And accordingly to yield you all due and just obedience in the discharge of your said Trust, and this command to be of force for the space of one whole year from the date hereof until further orders.

"Given under my hand and seal In New Castle, this 7th day of November, 1682.

"Wm. Penn.

"To my loving friends, Luke Wattson, Wm. Clark, John Roodes, John Avery, Hermanus Wiltbank."

After receiving the foregoing, the justices subscribed to the following oath of office, viz:

"In pursuance of our said commission, according to law, do hereby, In the presence of God, declare and solemnly promise, by the help of God, to be just and faithfully discharge the same in obedience to our said commission, and act therein according to the best of our understanding.

"Witness our hands and seals this fourteenth day of November, 1682.
 "Witnesses present:
 "EDWARD SOUTHRIN,
 "WM CLARK,
 "JOHN HILL,
 "HENRY STRETCHER."

"LUKE WATSON,
 "JOHN RHODES,
 "HARM WILT BANKS."

Passing over for the present, some matters which pertain to all of the courts in what is now Delaware, (and to which we shall hereafter revert,) we find that William Penn, in a communication to this court, under date of December 25, 1682, bestows upon the county its present name of Sussex, and decrees the bounds of the court's jurisdiction.

"William Penn, proprietor and Governor of Pennsylvania and Territory thereunto belonging.

"By virtue of authority devolved unto me I do hereby, in the King's name, constitute, appoint and authorize you, William Darvall, Luke Watson, Norton Claypoole, John Rhoads, Edward Southrin, Robert Hart and John Kipbaven, to be Justices of the Peace in the jurisdiction of the Whorekill which my will and pleasure shall from henceforth be called by the name of Sussex, the extent thereof shall be from the maine branch of Mispillion Creek, called the three runs, northward and southwards to Assawomet Inlet. Reputed and accounted Cape Henlopen, which said Cape Henlopen, I will, from henceforward have called by the name of Cape James, and you or any four of you to be a court of Judicature.

"Given under my hand and seal, at Chester, the 25th day of 10 mo., 1682. Being the second year of my Government.

"(Signed)

WM. PENN."

The justices acknowledged this commission and certified to the same on the 9th day of January, 1682, O. S. (1683, N. S.) and as the last clause of the entry is peculiar, it is here given: "And if we shall unwittingly and willingly act or doe any thing contrary to law or fidelity to our proprietary and the trust reposed in us by him, we doe hereby oblige ourselves to suffer and undergoe the same fine or punishment that the matter shall in law . . . (illegible) as if we had actually taken an oath."

The following letter of the same date as the preceding one was sent by Penn to the justices of Sussex:

"To my loving friends, William Darvall, Luke Watson, Norton Claypoole, John Rhoads, Edward Southrin, Robert Hart and John Kipbaven, Justices of the Peace, for the County of Sussex and those friends,

"Since it hath pleased God to put the government of the west side of the Delaware River and Bay into my hands, I cannot, but in good conscience, endeavor to promote justice and righteousness among the inhabitants thereof, knowing that he who is the Judge of the quick and dead, will remember us for good if wee forget not him, and that a government laid and begun by the love of Equity and true judgment will not fall of prosperity. I therefore, most earnestly recommend to you who are the ministers of Justice for the County you live in vigilantly and fidelity, that you may neither neglect nor prevent Justice, and in order, thereunto, that you keep your courts with Constancy and Gravity, and that you have your ears open to hear all, as well the poor as the rich, and in all cases to judge according to the truth of the evidence without fear, affection, favour or reward, that God may bless you and the people bless you which seldom faileth to be the reward of wise, just and virtuous Magistrates. I doe also think fitt that an exact catalogue be returned to me of the names of all the people of your county, Masters, Mistresses and servants, parents, children, also the number of acres each free-holder hath, and by whom and when granted, all in distinct columns with a Mark, or non-residents that have claims, and if any disputes should arise about title of land they must be determined according to the Rules and orders that the court of your county has limited and prescribed for the seating and improving of Land. And so I bid you all heartily farewell.

"Given at Chester the 25, 10 mo., 1682, In the second year of my Government,

"WM. PENN."

The opening of the Court upon April 27, 1683, was attended with unparalleled *eclat* from the fact

that William Penn and his deputy, William Markham, were present. The justices on the bench on this occasion were William Darvall, Luke Watson, John Rhoads, Robert Hoit and John Kipps-haven. At this Court the proprietor confirmed the following action concerning the "peacemakers," who have already been mentioned as a peculiar adjunct of the New Castle Court:

"This day Henry Jones, Norton Claypoole and Alexander Draper is by the Inhabitants of this county, chosen and appointed to be Peacemakers, to end and determine all differences that shall any wayes happen or arise between man and man, if they can, for one whole year ensuing from the date hereof which said peacemakers are ordered and appointed by the Governor and the rest of the court to sett about such matters the last Thursday of the week in every month."

The persons chosen took the oath of office the next day. On the same day, at the same Court, Alexander Mollestine, Herman Wiltbank, Cornelis Verhoofe, Cornelis Johnson, Ifframe Henry, Cornelis Pluckhoy and Anthony Harmon were naturalized.

That some of the justices of the Court and attending officials transgressed the prime proprieties of place and time, if they did not violate actual law, appears from an entry in the minutes of the Court held on the 11th of December, 1683. It seems that upon that occasion John Vines, the Sheriff, Henry Stretcher, Andrew Draper, Alexander Mollestine and Luke Watson were each fined fifty pounds of tobacco "for smoking tobacco in the court-house."

The Courts of Sussex were held continuously at Lewes until 1792 when they were removed to Georgetown. It appears from the records for 1706, when one Luke Shields called upon the Court for compensation for past labors, that the curious custom of calling the Court together by beating a drum, prevailed during the early years at Lewes, and that Shields was the functionary to whom this duty was assigned. This was one of the latest lingering vestiges of the military idea in connection with judicial tribunals. The Provincial Courts were held at Lewes from time to time as occasion required, and the first Chief Justice of the State, Ryves Holt, was a resident of that place.

Here we must take leave of the Sussex County Courts as a separate institution, only pausing to say that it was again graced by the presence of Penn on August 12, 1684; but we shall revert to them again in that portion of this chapter devoted to the consideration of the systems of tribunals developed by the Quaker proprietor and his successors in authority, and applying with equal pertinency to all these counties.

FIRST COURTS OF KENT COUNTY—The territory now Kent County was embraced in the jurisdiction of the Third Judicial District of the Duke of York's government, on the Delaware, known as the Whorekill, from the establishment of a regular court in 1673 until the winter of 1679-80, when a fourth judicial district was established

called St. Jones. The first Magistrate, viz.: Francis Whitwell, John Hilliard, Robert Hart and Edward Pack received their commissions dated May 18, 1680, and held their first court in June following, at the house of Edward Pack, one of their number, who then lived on a tract of land called "Town Point," it being the first fast land on the north side of St. Jones Creek, above its mouth. At this court the record shows that no business was done except granting lands.

In August following it appears that the court was much alarmed about the threatening attitude of Lord Baltimore, whom they apprehended was about to invade their jurisdiction. On the 10th of the month they addressed a petition to Captain Anthony Brockholls, then in command at New York, craving protection against the Governor of Maryland, "whom," they wrote:

"We do expect every day to come and subdue us with force and arms to bring us under him and also hath made proclamation, who will come into this presunks to take Land, he will maintain their Intrest and take from us those privileges granted us under this government wh^{ch} is intended, as we understand, About the Later part of this Instant month, to make their progress both in surveying of land and also settle a Corte under his Authorety, we do not know how he may Deall with us, for we have sene a very bad aspect before us for some few years past which was the rune of many of your peppel which had their houses and provisions Burnt, which may be our case if we do Apose them, so we humbly crave your Instructions how we shall act for our safety, expecting, if it be your honor's pleasure, by this bearer, for if it be as it is reported that his royal hines hath serendered it to Mr^r Lord Baltimore, we must submit, so being satisfied til we can have report from your honor, rest in obedience to your honor's pleasure.

"(Signed)

FERRA WHITWELL,
"JOHN HILLIARD"

Although there is no exact or absolute authority for the statement, it is evident that the name of St. Jones County was changed to Kent, and the jurisdiction established, practically as it now is constituted, upon the 25th of December, 1682, at the same time that the name Sussex was bestowed upon the southern county.

The seal of Kent County was ordered at a council held in Philadelphia, March 23, 1683, to be "three ears of Indian corn." Courts were held at the original meeting-place until after 1688, where the place was changed to the "Ordinary," of James Maxwell, which then stood on the site of the present Dover Water Works, near Dover, where they were held until a court house was built in 1697, on the town plot, on the site of the present court-house, on the public square in the town of Dover. Here the courts were held until the court-house lot, whereon the old court-house then stood, was sold to John Linsey, February 22, 1722. A court-house was built on the site of the present State-house, where courts were continued until the sale of the building to the State in 1873, when a new court-house was erected on King Street and the Public Square, where the courts are now held. A new court-house was erected on the site of the old one in 1788, which gave accommodation also to the Legislature of the State, and was used in common until 1873, when the State

purchased the property and refitted it entirely for their purposes.

THE COURTS UNDER THE PROPRIETARY AND COLONIAL GOVERNMENTS.—As heretofore intimated the changes brought about in the County Courts or Courts of Common Pleas and General Quarter Sessions, underwent no abrupt changes under Penn's government. They were the object of repeated legislative enactment, but these were for the most part, of so little importance, that we shall not attempt to follow them. By an Act of October 27, 1701, three justices were made to constitute a quorum. They were given powers of "good delivery;" could award process; hold all manner of pleas of the crown; exempting felonies punishable by death. Their practice was made to conform as closely as possible to that of the Common Pleas of England, and "all fictions and color in pleadings was to be avoided. The court had equity powers and jurisdiction in all maritime matters not cognizable by the admiralty court. Appeals were allowed from the final judgment of these courts, and as at present, the party appealing was required to enter security. The Courts of Quarter Sessions did not appear as distinct from the County Courts until after the partial separation of the three lower counties from Pennsylvania consummated in 1704. An Act of the Assembly of New Castle, Kent and Sussex Counties in 1719 instructed the courts somewhat minutely upon various matters. They were to have jurisdiction in all cases of high and petty treason, observing in trial for the same, the directions of the statute laws of England. Some of the provisions of the act in regard to punishments were peculiar although in strict accordance with the law of England. For instance, the statute against stabbing passed in the first year of the reign of King James was extended here. This took away "the benefit of clergy" from the prisoners. For "disabling the tongue, putting out an eye, slitting the nose, cutting off the nose, or cutting off or disabling any limbs or members of any of the King's subjects," the culprit was to suffer death as in cases of felony, without benefit of clergy. King James' statute against "conjuraton, witchcraft, and dealing with wicked and evil spirits" was also extended here, and this clause was not repealed until June 5, 1779, when it was replaced by a provision for punishing pretenders to "conjuraton," etc. The act of 1719 made burglary punishable "by death without benefit of clergy," whether the felonious intent of killing or stealing was committed or not. The burning of dwelling-houses or even of buildings not inhabited, if they contained property, was also made a capital crime. Persons concealing robbers, burglars, felons or thieves, or receiving or buying goods from them, knowing them to be stolen, or being convicted of the same were to be "burnt

with a T upon the brawn of the left thumb," which "marks were to be made by the Goaler in open court, as is usual in Great Britain." Lesser crimes were to be punishable by imprisonment in the houses of correction, for which purpose it was enacted, the prisons in the respective counties should be used until others were provided. Subornation of perjury was punishable by a fine of £40, one-half to go to the governor for the benefit of the province and the other half to the "party grieved." In cases where this was not forthcoming, the offender was to be imprisoned for six months, and "stand on the pillory the space of one whole hour in some market or public place where the offence was committed." All of these offences were to be tried by juries¹.

Some curious provisions were made early in the eighteenth century (during Lieutenant-Governor Gordon's term, 1726-36) by an act creating a special tribunal for the trial of negroes, (slaves). This act made it lawful for any two justices of the peace who should be particularly commissioned by the Governor in their respective counties, together with six of the most substantial freeholders, to hear and determine all offenses committed by negro or mulatto slaves. The Court of Justices and freeholders was to sit at the usual places for holding courts, and they had power to acquit or condemn according to the evidence produced, and order execution of sentence. In case the justices or freeholders neglected their duties, they were subject to a fine of five pounds. The court had cognizance of capital crimes. Slaves condemned to death were valued, and two thirds of their value were paid to the owner out of the County treasury. Some of the punishments were exceedingly barbarous. Attempted rape of a white woman by a negro, was to be punished by standing the criminal four hours in the pillory at the Court House on some court day, with both of his ears nailed to the pillory, and before he was taken from the same, both ears were to be cut off close to his head. In case of theft by a slave his master was compelled to make restitution, and the negro was to be whipped. Negroes carrying arms without the master's special license were to receive twenty-one lashes on the bare back, and if any negroes above the number of six not belonging to one master, should assemble, not on lawful business of their owners, each one was to be whipped at the discretion of the court with any number of lashes not exceeding twenty-one. The special court for the trial of negroes was not abolished until February 4, 1789, when its powers were conferred upon the courts of General Quarter Sessions of the Peace for each county.²

The duties and powers of the Courts of Quarter Sessions and of the Court of Common Pleas were

enlarged and systematized by an elaborate law adopted by the General Assembly of New Castle Kent and Sussex, during the term of Lieutenant-Governor Gordon (1726-1736). This law entitled "an act for the establishing courts of law and equity within the government," pertained also to the Supreme Court, but that part of it is elsewhere summarized in this chapter. By its provisions the Courts of Quarter Sessions were to be held four times a year in each County, as formerly, and dates were specified for their sittings. The Governor was to commission a "competent number" of justices in each county, any three of whom might hold the General Sessions of the Peace and Goal Delivery "according to law, and as freely and effectively as any Justice of the Peace, Justices of the Assize, and Justices of Oyer and Terminer, or of Goal Delivery may or can do." They could take recognizances for the peace, returnable, according to their nature to the Court of Quarter Sessions or the Supreme Court of Oyer and Terminer. Courts were to sit for three days at each term. Cases could be carried to the Supreme Court upon writs of error.

Courts of Common Pleas were by the provisions of the same act decreed to be held four times per year in each County at the time and places that the General Quarter Sessions were directed by three justices commissioned by the Governor or Lieutenant-Governor. These courts were to "hold Pleas of Assize, *scire facias*, replevins, informations and actions upon penal statutes and hear and determine all and all manner of pleas, actions, suits and causes, civil, real, personal and mixt" the same as in the corresponding courts of England. They could also hold special courts, and courts of equity, the latter near the times of the regular sessions. This equity jurisdiction was by the Constitution of 1792, separated from the common law courts, and vested in a chancellor, but during its continuance of this power the Court of Common Pleas was virtually a Court of Chancery and its rules and practice were patterned after those of the High Court of Chancery in Great Britain. No matters determinable by common law were heard in the Equity Court, and when matters of fact arose they were tried in the Courts of Common Pleas.

Still another court was established in each County under the Colonial government, called "the Court of Delegates," and composed of three persons who were authorized to hear and determine all appeals from the Register for the Probate of Wills.

Jury trials have been shown in the early portions of this chapter to have become a fixed institution of the Courts within the territory now Delaware, as early as 1675, and it is probable that a jury was impaneled in 1669, for the trial of the

¹ Laws of Delaware, Vol. I, pp. 64-70.

² Laws of Delaware, Vol. I, pp. 102-104.

"Long Firm." The jury of 1675 was impaneled in the New Castle Court, and there were others in that court during the succeeding years, but it is not probable that the two lower counties with their smaller population had very frequent need of this adjunct of the courts, and record of them does not occur often during the years prior to 1700.

The first grand jury is mentioned in the records of the Sussex County Court of May, 1687, and this was in all probability the first within the present limits of the State. It consisted of Richard Law, Richard Harney, John Fritchberg, Jacob Warren, Anthony Intoyre (McIntyre?), Francis Williams, Edmund Benbrick, Rodger Gum, Michael Chambers, Charles Bright, Richard Ward, John Richards, Henry Peddington.

No act distinctly relating to juries was passed by the General Assembly of the three counties on the Delaware, until about 1730, and up to that time juries were summoned and impaneled under the old Duke of York's laws. A peculiarity of the law alluded to was a provision that all Grand jurors were "to serve the space of one whole year, notwithstanding their being sworn at each respective court to attend that present service only." In 1742 a law was enacted making it the duty of the sheriff to summon twenty-four Grand jurors and forty-eight Petit jurors, ten days before the court, the former to be chosen from among the "most able, sufficient and substantial freeholders, within their respective bailwick," and the latter from "the most discreet and judicious freeholders."¹ From these the juries were to be drawn and the law continued the old provision that the Grand jury should serve for one year. The jury law was somewhat changed by later enactments and considerably altered by the act of February 2, 1793.

The Orphans' Court had its origin in 1683. Prior to that time, from at least as far back as 1676, all duties pertaining to the settlement of estates, were discharged by commissioners especially appointed to act in the capacity of administrators or executors, who made a final accounting to the court, but an act of March 10, in the year mentioned, provided that the justices of each county court should sit twice in every year, "to inspect and take care of the estates, usage and employment of orphans, which shall be called the Orphans' Court." In New Castle County the first sitting of the Orphans' Court occurred on March 2, 1686, and in Kent and Sussex there are no earlier sessions recorded. An act passed May 10, 1688, extended the jurisdiction of these courts to the control of decedents' estate, with power to order sales of real property for the payment of debt, or the maintenance or education of children, the support of the widow or the disposition of a part

of the land to raise funds for the improvement of the remainder. It was necessary, however, that the Governor or council should approve of the exercise of these powers. The court was only contemplated as a temporary institution, the law distinctly stating that it was to be in force for one year and no longer, but it became so important a factor in the mechanism of government that it had a permanent place, although frequently the object of amendatory statutes. An act passed early in the administration of Governor Keith (1717-1726) "by and with the consent" of the General Assembly of the three counties on the Delaware, enlarged and definitely defined the powers and duties of this court. It provided that "the justices of the Court of General Quarter Sessions of the peace in each county, or so many of them as are or shall be enabled to hold those courts" should in the same week they were directed to hold those courts, or at such other times as they might "see occasion," should hold a Court of Record, to be called "The Orphans' Court." They were to "award process, and cause to come before them all and every such person and persons who, as guardians, trustees, tutors, executors, administrators or otherwise, are, or shall be entrusted with or anywise accountable for, any lands, tenements, goods, chattels, or estate belonging, or which shall belong to any orphans, or any persons under age," and exact from them inventories and accounts, and also to cause the Register or such person as should have the power to probate wills and granting letters of administration, to bring true copies of all bonds, accounts, etc., as should relate to such estates. Elaborate instructions followed, which, though of no particular interest or importance here, and beyond the scope of this chapter, indicate that the usefulness of the Orphans' Court had in the early part of the eighteenth century become fully recognized, and that it was a fully organized and well equipped institution.

No high appellant's court existed under Penn's government (save that constituted by the Governor and council) until May 10, 1684, but upon that date an act was passed creating a Provincial Court, to consist of five judges. This court was to sit twice a year in Philadelphia, and two of its members at least were required twice every year, in the Spring and Fall, to "goe their circuits into everie respective county in the province," and hold courts of appeals, and also to try all criminal causes of a high grade, questions of land title and other cases of which the county courts had no jurisdiction. That part of its jurisdiction relating to land was however abolished in the following year, but at the same time the powers of the court in relation to criminal cases were enlarged and more exactly defined. Those with the cases of appeal were to be the chief subjects of the courts

¹ Laws of Delaware, vol. I., 241.

inquiry. The number of judges was reduced to three, but, after a time the number was restored to five. Under the colonial government all criminal cases punishable with death were tried before the Provincial or Supreme Court, and for that reason very little concerning such cases is found in the records of the old county courts; unfortunately the greater portion of the records of the Provincial Court were lost. The judges of this court frequently, but not with absolute regularity, visited the counties of New Castle, Kent and Sussex. That they did not always make their appearance when they ought and were expected, appears from an entry in the records of the Sussex County Court, held at Lewes, in the year 1697. William Dyse, the sheriff of the county, presented a bill against the county at the December term of court in that year, "for his trouble and disappointment in providing accommodation for ye Provincial Circular Judges, who should have held court here on ye 13th October last past but came down no further than Kent County."

The Court gave the account, forty shillings, to the Grand Jury, who allowed it, and addressed a letter to the Court, a part of which is as follows: "and farther with other inhabitants of the county desired the Court would enter it upon record that the said judges having had due notice to attend as above said and not coming, they look upon it not only a great breach and Trespass in point of Law, but gave grounds of much dissatisfaction, slight and abuse to ye county, and great infringement of privileges in general as well, a delay and wrong to private persons interested in ye appeals then and there pending, and further desired ye same might be so represented to ye Government and General Assembly to be next held." What action was taken in the matter does not appear.

By an act passed February 10, 1710, the judges of the Supreme Provincial Court (as it had by that time come to be called), were not required to go their semi-annual circuits outside of Philadelphia unless cases were pending in the counties for trial and commissions of oyer and terminer were issued by the Governor. This act was repealed by Queen Anne and on the 20th of July, 1714, Lieutenant-Governor Gookins following the precedent of Governor Evans, published an ordinance of like tenor, establishing the general courts in the provinces.¹ The first act affecting the courts by the council of the three lower counties on the Delaware, partially separated from Pennsylvania in 1704, was passed in 1719, and applied only incidentally to the Supreme Court, enlarging its powers somewhat in common with those of the other courts. This act is interesting, as containing

the first mention made in the law of Delaware concerning the allowance of affirmation in lieu of oath, from deference to the scruples of the Friends or Quakers.

An act of much more importance, and bearing particularly upon the Supreme Court which was established as a distinctly Delawarean institution, was passed by the General Assembly of the counties of New Castle, Kent and Sussex, early in the term of Lieutenant-Governor Gordon (1726-1736). This provided that the "Supreme Court of the counties of New Castle, Kent and Sussex, upon Delaware," should consist of three judges, to be commissioned by the Governor or Lieutenant-Governor, one of whom was to be distinguished as chief justice. These judges were to hold a Court of Record twice every year in each county, viz.: on October 5th and April 21st, at New Castle; on October 9th and April 25th, at Dover, and October 13th and April 29th at Lewes. The judges, or any two of them, were to have power to hold the courts alluded to "and therein to hear and determine all causes, matters and things, cognizable in the said court and also to hear and determine all manner of pleas, complaints and causes in law or equity, which shall be removed or brought there from the respective General Quarter Sessions of the Peace, . . . by Writs of Certiorari, Writs of Error or Appeal, or from any other court of law or equity of this government." They were also to correct the errors of justices of the peace, punish the faults of officers and "generally administer justice as in the King's bench in Great Britain;" and were to have general powers of "goal delivery."²

All of these provisions were repealed and supplied by "an act for the better regulation of the Supreme Court within this government," passed April 28, 1760. This law did not make any change in the name of the court, nor did it materially change the time of sittings in the several courts. It provided for an increase of the number of judges from three to four, one to be known by the title of Chief Justice as before, and any two to have power to hear and determine causes. A new feature under the act of 1760, was the right of appeal from the decision of this tribunal "to his majesty in council, or to such court or courts, judge or judges, as by our lord the King, his heirs or successors, shall be appointed in that part of Great Britain called England, to receive, hear and judge of appeals from his majesty's plantations,"³ a provision which it is needless to say was abrogated by the Constitution of 1776. The next act relating to the Supreme Court passed June 16, 1769, enacted but little more than a

¹ History of Delaware County, Penn. By Henry G. Ashmead, Esq.

³ Laws of Delaware, Vol. I, pp. 374-379.

change in the dates of holding courts, and no essential modifications were brought about until the formation of the Delaware State.

The attorney's oath was first prescribed by a law passed in 1704 by the General Assembly sitting at New Castle "for preventing abuses and irregularities" in the courts within Her Majesty's government. Section 7 defined the qualifications of an attorney and presented the form of oath. Concerning the former it was enacted "That before any Attorney, Solicitor or other person whatsoever, shall be admitted to plead for any reward or fee in any of the courts of this, Her Majesty's government, such Attorney, Solicitor or other person, . . . shall take the oaths and repeat and subscribe the declaration prescribed by act of Parliament in England and shall take the oath hereafter mentioned, viz.:"

"You shall do no falsehood or deceit, nor consent to any to be done, in this court, to your knowledge; and if you know of any to be done you shall give knowledge thereof to the chief justice or any other justices of this court, that it may be reformed; you shall delay no man for lucre or malice, having reasonable fees first allowed you for the same; you shall plead no foreign plea, nor sue any foreign suits, unlawfully to the hurt of any man, but such as shall (according to your judgment) stand within the order of the law and your own conscience; you shall not wittingly or willingly sue, or procure, to be sued, any false suits, nor give aid or consent to the same, on pain of being expelled from this court forever.

And further, you shall truly use and demean yourself in the office of an attorney within this court, according to your learning and discretion, So HELP YOU GOD."¹

A law passed thirty years later prescribed further qualifications as follows: "Thou shalt behave thyself in the Office of an Attorney within the Court, according to the best of thy learning and ability and with all good fidelity *as well to the Court as to the Client.*" The same act provided that attorneys should subscribe to the foregoing qualification, and instructed the courts "That there may be a competent number of persons of an honest disposition, and learned in the law, admitted by the justices of the . . . courts to practice as attorneys there, who shall behave themselves justly and faithfully in their practice."²

The provision in regard to subscribing to the declaration "prescribed by act of Parliament in England" which was a part of the law of 1704 was of course repealed after Independence had been declared—in fact was repealed by act Feb. 22, 1777, and the Constitution of 1792 provided that the political test and oath of office for attorneys and others should be "by oath or affirmation, to support the constitution of their State and to perform the duties of their respective offices with fidelity."³

THE COURTS UNDER THE STATE GOVERNMENT.—Some important innovations and sweeping changes were introduced by "the Constitution or System of Government of the Delaware State, formerly styled the Government of the counties of New Castle,

Kent and Sussex upon Delaware" which was ordained September 20, 1776, by the convention of deputies called for the purpose. This instrument of which the authorship is traditionally ascribed to Thomas McKean, provided in its twelfth section that:

"The President (of the Delaware State) and General Assembly shall by joint ballot appoint three Justices of the Supreme Court for the State, one of whom shall be chief Justice, and a Judge of Admiralty, and also four Justices of the courts of Common Pleas, and Orphans' court for each county, one of whom in each court shall be styled Chief Justice (and in case of division on the ballot, the President shall have an additional casting voice) . . . who shall continue in office during good behaviour" and receive, "an adequate fixed but moderate salary. . . . The Justices of the Peace shall be nominated by the House of Assembly, That is to say, They shall name twenty four persons for each county, of whom the President, with the approbation of the Privy Council, shall appoint twelve, who . . . shall continue in office during seven years if they behave themselves well."⁴

Oddly enough, as it seems at present, it was ordained that "the members of the Legislature and Privy shall be Justices of the Peace for the whole State during their continuance in trust" It was also provided that the justices of the Courts of Common Pleas should be "Conservators of the Peace" in their respective counties. The justices of the Courts of Common Pleas and Orphans' Courts were to have the power of holding Inferior Courts of Chancery as theretofore, unless the Legislature should otherwise direct.

Appeal was allowed in all matters of law and equity to a court of seven persons to consist of the President of the State, at the time being, who was to preside, and six others, to be appointed, three by the Legislative Council and three by the House of Assembly, to continue in office during good behavior. This was known as "The Court of Appeals."

The courts as constituted in 1776 underwent but little change until the adoption of the Constitution of 1792. The most important items in their history during that early period of the State's existence were the transference of the Admiralty Judges' jurisdiction from the State to the Federal government by the Constitution of the United States framed in September, 1787; and the substitution in 1789 of regular trial by jury in the Court of Quarter Sessions, of slaves charged with capital offenses, for the old plan adopted early in the century, of trial before a special court consisting of two justices and six freeholders, which tribunal was abolished.⁵

The Constitution of 1776 provided for a Court of Common Pleas, and an Orphans' Court of the counties of New Castle, Kent, and Sussex, independent of the Superior Court of the State. These courts were presided over by a chief justice and three associate justices, and continued until abolished by the Constitution of 1792.

By the Constitution of 1792—adopted June 12th—it was ordained (Article VI. Sec. 1) that “The Judicial power of this State shall be vested in a Court of Chancery, a Supreme Court, and courts of Oyer and Terminer and General Goal Delivery, in a Court of Common Pleas and in an Orphans’ Court, Registers’ Court, and a Court of Quarter Sessions of the Peace for each county, in Justices of the peace and in such other courts as the Legislature, two-thirds of all the members of each branch, concurring, may from time to time establish.” A general provision gave the Governor the power of appointing all the judges.

The most important change brought about by the Constitution of 1792 (Article VI. Sec. 14) was the separation of the equity jurisdiction theretofore exercised by the judges of the Court of Common Pleas, from the common law jurisdiction and its investment in a chancellor, whose office was then created. It was provided that this new member of the judicial branch of government should hold courts of chancery in the several counties. Cognizance of cases in which the chancellor was in-

terested, was to belong to the Court of Common Pleas with an appeal to the High Court of Errors and Appeals.

The last mentioned court was created by the Constitution (Article VII.) which provided that it should consist of the chancellor and of the judges of the Supreme Court and Court of Common Pleas, any four of whom could proceed on business. The chancellor was to preside except when he could not sit judicially, in which case the place was to be filled by the Chief Justice of the Supreme Court. If any of the judges had rendered judgment or passed a decree, in any case before its removal to the High Court of Errors and Appeals, he should not sit.

The Orphans’ Court which theretofore had been composed of judges of the Quarter Sessions, was by the Constitution of 1792 constituted of the judges of the courts of Common Pleas, with power in any two to act. It was invested with the equity jurisdiction formerly exercised by the court except in adjusting and settling the accounts of executors, administrators, and guardians. Appeals were allowed to the Supreme Court. A radical change was made by an amendment to the Constitution ratified February 5, 1802, by which the powers of the Orphans’ Court were vested wholly in the chancellor who was to sit in each county.

The Supreme Court was made to consist of not fewer than three or more than four judges, who by virtue of their office were also to constitute the Court of Oyer and Terminer and General Jail Delivery in the several counties. The Court of Common Pleas was to be composed of the same number of judges. The jurisdiction both of the Supreme Court and the Common Pleas extended over the State, and any two of the judges could act as if all were present.

The Registers’ Courts were to be held by the Registers of the several counties, in whom was vested the probate of wills, granting of letters of administration, and the settlement of the accounts of administrators and guardians. When causes were ligated an appeal was allowed to the Supreme Court, and in case of accounts to the Orphans’ Court.²

The several courts as ordained in 1792 came under the provisions of the Constitution on the first Tuesday of October, 1793. They were regulated and their powers more exactly defined by various acts, as those of June 14, 1793, February 7, 1794, and February 7, 1795, but until the change brought in the orphans’ court by the constitutional amendment of 1802, heretofore noted, no essential modification ensued, and in fact there was no other important legislation upon the courts after that time, until the adoption of the Constitution of 1831.

¹ There also occurs in minutes of Kent County Courts, the following officers of Court of Quarter Sessions for Kent County: July 18, 1785, Charles Ridgely, President; April 12, 1786, Nehemiah Tilton, President.

² Constitution of 1792, Laws of Delaware, Vol. I. pp. XXVIII-XLVIII.

The courts as they exist at present were ordained by the third Constitution, approved December 2, 1831. Section 1, Article VI, of this instrument provided that "The judicial power of this State shall be vested in a Court of Errors and Appeals a Superior Court, a Court of Chancery, an Orphan's Court, a Court of Oyer and Terminer, a Court of General Sessions of the Peace and Gaol Delivery, a Register's Court, Justices of the Peace," and such other courts as the General Assembly might establish. It will be noticed that the most important change here effected was the extinguishment of the Supreme Court and the Courts of Common Pleas. To fill their place the Superior Court was created, and given the entire jurisdiction formerly vested in them.¹ To compose the several courts of superior jurisdiction mentioned there were to be five judges in the State. One of them was the Chancellor who was also the president of the Orphans' Court. Of the other four composing the Superior Court, Court of Oyer and Terminer and Court of General Sessions of the Peace and Gaol Delivery, one was to be Chief Justice of the State and the other three Associate Judges, one to reside in each county.

The Superior Court was made to consist of the Chief Justice and three Associate Judges, but as it was provided, that no associate should sit in the county where he resided, it may be said to be virtually composed of the Chief Justice and *two* Associates—and such in fact is the language of the Constitution. Two of the judges constitute a quorum, and in the absence of the Chief Justice the senior associate of those whose sitting is permissible, presides. This Court has "jurisdiction in all causes of a civil nature, real, personal and mixed, at common law, and all other the jurisdiction and powers" formerly vested in the Supreme Court and the Court of Common Pleas.

The Court of General Sessions and Jail Delivery is composed in each county of the same judges and in the same manner as the Superior Court and its jurisdiction and powers are the same as those vested in it prior to 1831.

The Court of Chancery is held by the Chancellor. It has power to hear and determine all matters and causes in equity and when the Chancellor is interested, the Chief Justice, sitting in the Superior Court without the Associate Judges, has jurisdiction, with an appeal to the Court of Errors and Appeals, in such cases to consist simply of the three Associate Judges, the Senior presiding.

The Court of Oyer and Terminer consists of all the judges except the Chancellor, three constituting a quorum. This court which has no regular term, being only held upon a precept issued by the judges has jurisdiction in all offenses, capital in their na-

ture, and of the crime of manslaughter and of being accomplice or accessory in such crime.

The Orphans' Court in each county is held by the chancellor and the associate judge residing in the county, the former presiding. Either in the absence of the other may hold the court. When they concur there is no appeal from their decision, except in the matter of real estate, but in such cases or when a decision is made by only one of them, there is right of appeal to the Superior Court for the county, the decision of which is final.

The Register's Court in each county was not affected by the Constitution of 1831, except in the matter of appeal, which it was provided should be made to the Superior Court instead of the Supreme Court as formerly.

The Court of Errors and Appeals was ordained by the Constitution of 1831, (Section 7, Article vi.) to have power to issue writs of error to the Superior Court and to receive appeals from the Court of Chancery, and to determine all such matters finally. The court upon a writ of error to the Superior Court must consist of three judges at least, viz: the chancellor who presides, the associate judge, who could not because of his residence sit in the cause below, and one of the associates who did sit in the cause originally. The method of determining which one of the associates is to sit is prescribed in a long clause of the Constitution. In case any judge required to sit in the cause below did not sit he is required to sit in the Court of Errors; and if any judge who did sit in the cause below and whose turn it is to sit in the Court of Errors, be absent or disqualified, then either of the other judges who sat below may sit in the court. Upon an appeal from chancery the Court of Errors and Appeals consists of the chief justice and three associate judges. Provision was also made for the removal to this tribunal of cases from the Superior Court, whenever the court should determine that a question of law should be heard before all the judges. In such cases the court is composed of the chancellor and four judges. A judge *ad litem* may be commissioned by the governor when there is legal exception to the chancellor or any judge, provided that such appointment is necessary to constitute a quorum.

The evolution of legal justice upon the Delaware has been followed in this chapter through all of its principal stages, and a cursory view given of the present judicial system, which has remained without essential change for more than half a century. That the system is seriously defective is universally admitted, and that it will be ultimately amended is believed by everybody, but that the masses of the people have been quite apathetic to its improvement is indicated by the rejection of the Constitution of 1853, and the inadequacy of

¹Amended Constitution of 1831, Laws of Delaware, Vol. VIII, p. 12.

the favoring vote upon the question of holding a constitutional convention, in November, 1887. The chief defect lies in the construction of the Court of Errors and Appeals, sitting in causes removed by writ of error from the Superior Court, which makes possible the obviously wrong result of final adjudication by a minority of the judges against the opinion of the majority. The convention which sat in 1853 sought to remedy this and other defects, but the Constitution then framed was rejected by the people. The next attempt at amending the Constitution was made in the Assembly of 1882-83, when an act reforming the judiciary was passed, which subsequently received the approval of the governor. It needed, however, to become operative, a ratifying vote of three quarters of the members in the next succeeding assembly, and this not being given, it was lost.

THE FEDERAL COURTS.—Jurisdiction is also possessed in Delaware by the United States Circuit Court of the Third Circuit, including this State, Pennsylvania and New Jersey, and by the United States District Court for the district of Delaware. The former as originally organized under the Constitution of 1788 went into effect in 1789 in what was called the Middle District of the United States, and James Wilson was its first judge. Its present judge is William McKennan, of Washington, Penn. The court rarely sits in Delaware, sometimes as many as two, three, or even five years, lapsing between its sessions. The Circuit Court has exclusive jurisdiction in patent cases, appellate jurisdiction in admiralty and bankruptcy cases, concurrent jurisdiction with the State courts in equity and common law causes, in which one of the parties is not a resident of the district, and in which over \$2000 is involved; and both the Circuit and District courts have original criminal jurisdiction in causes for the violation of the criminal law of the United States.

The District Court of the United States for the district of Delaware was formed under the provisions of the Constitution and went into operation in 1789, with Gunning Bedford, the younger, upon the bench, and George Read, Jr., as District-Attorney. Gunning Bedford remained judge until 1812, and Mr. Read held the position of clerk until the administration of James Monroe when his son of the same name was appointed. The court was originally held alternately at New Castle and Dover, but for many years it has been permanently located at Wilmington, though special courts may be held in any county.

In the first suit tried, an action by the United States to recover \$400 from Adam Caldwell, on the fourth Tuesday in November, 1789, George Read appeared for the prosecution, and Kensy Johns, Sr. and James A. Bayard, the elder, for the defense. The jury—the first ever empannelled in

this court, was composed of William Lees, Joseph Israel, Joseph Boggs, Levi Adams, James McCalmont, William Pluright, Samuel Preston Moore, James Eves, William Scott, Fresly Lloyd, John Crow and Thomas Aiken. They found judgment for the United States. The next cause was not tried until May, 1792, and such intermissions in activity were not infrequent during the early years of the court. The records until comparatively recent years were very poorly kept, and it is impossible to ascertain many facts which would prove interesting could they be presented. The court at present has regular sessions, held on the second Tuesdays in January, April, June and September. Its business consists chiefly of admiralty causes, cases concerning the violation of the United States criminal laws, and proceedings in bankruptcy.

The District court has jurisdiction derived from the Constitution and the laws of the United States, in all crimes and offenses cognizable under the Federal authority, committed within the district, or upon the high seas, the punishment of which is not capital; of all cases arising under the act for the punishment of piracy, when no circuit court is held in the district; of all suits for penalties and forfeitures, under the laws of the United States; of all suits at common law brought by the United States; of all suits in equity to enforce the lien of the United States upon any real estate for any internal revenue tax; of all suits for the recovery of any forfeiture or damages; debts due by or to the United States; of all causes arising under the postal laws; of all civil causes of admiralty and maritime jurisdiction; of all proceedings for the condemnation of property taken as prize; of all suits by the assignee of any debenture for drawback of duties, issued under any law for the collection of duties; of all suits authorized by law to be brought by any person for the recovery of damages on account of any injury to person or property, or of the deprivation of any right of a citizen; by any act done in furtherance of a conspiracy; of all suits at law or in equity authorized to be brought to redress the deprivation under color of any law or ordinance or usage of any State; of any right, privilege or immunity secured by the Constitution; of all suits to recover possession of any office except that of president or vice-president, representative or delegate to congress, or member of a State Legislature; of all proceedings by the writ of *quo warranto* for the removal of any person from office, excepting a member of Congress or of a State Legislature; of all suits by or against any association established under any law providing for national banking associations, within the district for which the court is held; of all suits brought by an alien for a tort only, in violation of the laws of nations, or of a treaty of the United States, and, of all suits against Consuls, except for offences above

the description aforesaid. The District Courts are also constituted courts of bankruptcy, and have in their respective districts original jurisdiction in all matters and proceedings in bankruptcy.

Judge Gunning Bedford was succeeded by John Fisher in 1812, who in turn was followed by Judge Willard Hall, and he, upon his death, by Judge Edward G. Bradford who died in February, 1884. Judge Wales, the present occupant of the bench, was commissioned upon March 20th following, and was sworn in upon the 29th. Thus but five judges have occupied the bench during a period of almost a hundred years. Sketches of these Judges appear in the next succeeding chapter.

The United States District Attorneys appear to have been especially appointed by the court during the first four years. George Read who appeared in that capacity at the first session of the court and frequently thereafter was regularly appointed in 1795 and held the office until 1817, when George Read, Jr., was appointed and remained in position until 1837. From that time to the present the attorneys have been as follows: 1837 to 1840, James A. Bayard, the younger—(1840 to 1846, a period during which the duties of the office seem to have been discharged by special and temporary appointees) 1846 to 1848 William Horsey Rogers; 1848 to 1852, Perry Sherwood Johnson; 1852 to 1854, Thomas Francis Bayard; 1854 to 1861, Daniel M. Bates; 1861 to 1867, Edward G. Bradford; 1867 to 1868, John L. Pratt; 1868 to 1869, John B. Penington; 1869 to 1876, Anthony Higgins; 1876 to 1880, William C. Spruance; 1880 to 1888, John C. Patterson.

Matthew Pearce appears to have been the first clerk, though this name does not appear until in the year 1790. He was succeeded by John Conway who held the position from 1792 to 1794. He was succeeded by Thomas Duff, Jr., who held the office until 1796, and he by Thomas Witherspoon who occupied the office most of the time until 1831, though A. Johns appears to have held it for a short period dating from 1813. After Witherspoon came W. A. Mendenhall, and in 1840 T. Booth Roberts who was succeeded by Leonard E. Wales in 1849. He gave place to Hanson Harmon in 1865 and he to Charles G. Rumford who was succeeded by Major S. Rodmond Smith, the present incumbent, in 1873. The officials of the court at present are Judge, Leonard E. Wales; United States District Attorney, John C. Patterson; Marshall, Chas. M. Newlin; Clerk, S. Rodmond Smith; U. S. Commissioners, Henry C. Conrad, Charles Kinney, Samuel A. McAllister, Lewis W. Mustard, S. Rodmond Smith.

CHIEF JUSTICES.—The Supreme Court of the Province of Pennsylvania was established under the Royal Charter to William Penn, March 4, 1681, and by order of the Provincial Council, April 1, 1684, and reorganized at different periods.

Under the act of 1684 five justices were commissioned for two years: Dr. Nicholas More, William Welsh, William Wood, Robert Turner and George Eckley. William Welsh is known to have died before July 10, 1684, and William Clarke, of Lewes, was appointed in his place, styled "Justice in General" and was called the President of the counties of Philadelphia and New Castle. He was one of the early settlers at Lewes soon after the occupation by the English, and was one of the magistrates, a surveyor and a member of Penn's Council. He served as president of the courts of Pennsylvania and the Lower Counties until 1707.

Jaasper Yeates, who succeeded William Clarke, was a native of Yorkshire, England, and came to this country soon after Penn. He married Catherine, the daughter of James Sanderland the elder, (one of the early settlers at Upland), and bought in 1697, a tract of land and mill on Naaman's Creek, in Brandywine Hundred, where he resided, and at the same time erected a granary and storehouse at Chester, between Chester Creek and Edgemont Avenue. In 1701, he was one of the burgesses of Chester, and in 1707 became Chief Justice of the Provincial Court of the Lower Counties and served three years; was again chosen in 1717, and died before May 2, 1720, as his will was probated in New Castle on that day. After his death in 1720, Col. John French of New Castle was made chief justice.

Of David Evans but little is known, except that he filled various positions of public trust in the Lower Counties.

Dr. Samuel Chew, a native of Maryland, came to Kent County, about 1725 and purchased a large tract of land near Dover. He was appointed to the position of chief justice in 1741, and died in 1743. He resided at Dover in the Clayton house, adjoining the Court-House, which is also known as the Old Chew House, and was buried on the home farm now the property of Edward O. Eckels, about a mile and a half from Dover. His son, Benjamin Chew, filled several positions in Kent County, and was admitted to practice in Philadelphia in September, 1746, and in Sussex County in May, 1748. He later moved to Philadelphia, where he became eminent as an attorney, and was the founder of the family at Germantown. A daughter of Dr. Samuel Chew became the wife of Edward Tighman, the eminent jurist.

William Till succeeded Dr. Samuel Chew as chief justice, in 1743, and continued until October 26, 1745, when Ryves Holt succeeded to the position. William Till was a descendant of the John Till, who before 1700, settled on "the Neck" in Cedar Creek Hundred of Sussex County. After his retirement from the Bench as chief he was made associate justice August 7, 1754, to succeed Jehu

Curtis, deceased. He was also collector of the Port of New Castle, which position he held at the time of his death, April 13, 1766.

Ryves Holt, of Sussex County, was the first chief justice of the State who is found designated as such in the records of the Supreme Court. Provision for the designation of one of the judges of the Supreme Court as chief justice was made by Assembly enactment some time between 1726 and 1736. In 1745, he sat with Jehu Curtis and Nicholas Ridgely, respectively the second and third justices. He appears to have held the office until 1764, when he was succeeded by John Vining, and the fact that his incumbency continued during more than a score of years, is presumptive evidence that he discharged the duties devolving upon him, satisfactorily. Ryves Holt was a resident of Lewes early in the eighteenth century, but whether a native or not is unknown. He was born in 1696, and was therefore at his death in 1763, in his sixty-seventh year. Much of his life was spent in office. He was Sheriff as early as 1724, and in 1733 was appointed King's attorney for Sussex County, which office he held until he became chief justice, his successor being John Neill. He was also Prothonotary of the county from 1753 until about a year prior to his death.

John Vining, second chief justice, in office from October 30, 1764, to the time of his death in 1770, was another man of character, ability and high standing. He was a native of Salem, New Jersey, and was the son of Benjamin Vining who died while he was yet a lad. His mother, Mary Vining, married Nicholas Ridgely, of Salisbury, Kent County, who, after a short residence in Salem returned to Delaware and settled in Dover. The two children of Benjamin and Mary Vining, John and Mary, were well cared for in the house of their stepfather, and the former at least received, what was for the times, a good education. He married, and remaining in Dover, soon exhibited traits of character and forms of ability which made him a leader in all the public movements of the period. He became a member and speaker of the House of Assembly of "the Lower Counties on Delaware," and in addition to his judicial office held that of prothonotary of Kent County. He died near Salem, New Jersey, November 13, 1770. Of his career, the *Pennsylvania Chronicle*, (Philadelphia), for December 3d, said: In the several offices he bore in the government his conduct was fair, irreproachable and uniform. His opinions in matters relative to freedom, property or life were plain, solid and decisive. He entertained a very high regard for all the well determined claims and rights of mankind, and while he paid a due deference even to the critical and strictest adjudication of law, still his greatest pleasure was in the more ob-

vious dictates of common sense and the milder administration of equity." Chief Justice Vining left a son named John, but commonly called "Jack" Vining, who became an attorney and was a member of Congress.

Richard McWilliams, Jr., in office 1773-77, was born October 9, 1754, and died May 9, 1786.

William Killen was Chief Justice from 1777 to 1793 and chancellor (the first) from 1793 to 1801. A sketch of his life appears with those of other chancellors.

Richard Bassett succeeded Chief Justice Killen and was the first incumbent of the office under the constitution of 1792, receiving his commission September 6th, 1793. He was not only an eminent lawyer and a judge, but Governor of Delaware, a member of the old congress of 1787, and a United States Senator, being elected to that office only a few days after the issuance of his commission as chief justice. He was also a delegate from Delaware to the convention which framed the Constitution of the United States in 1789. He became converted to Methodism and devoted a great part of his energies during his later years to the advancement of that cause. He was a man of wealth and had three homes, one in Dover, one in the Bohemia Manor and another in Wilmington, among which he divided his time. He died in 1815 leaving a daughter, the wife of James A. Bayard, Jr.

George Read, who was one of the signers of the Declaration of Independence was the successor of Chief Justice Bassett and was commissioned September 30, 1793. He held the office nearly six years, or until his death, on the 28th day of September, 1798. A full sketch of his life appears with those of the other signers from Delaware elsewhere in this volume.

Of Kensy Johns, Sr., who succeeded Chief Justice Read, January 3, 1799, and held the office only a few days, a sketch will be found among the lives of the chancellors of whom he was one.

James Booth, Sr., who received appointment, January 28, 1799, after Kensy John's resignation, filled the office for about twenty-eight years, or until his death. Prior to his occupation of this office he had for several years been clerk of the General Assembly, was secretary of the convention which framed the Constitution of 1776 and had held several offices in New Castle County, connected with the courts. He was largely influential in the public affairs of the times, a Federalist in politics. In the Life of George Read, it is said of him: "He was a man of sound judgment, unspotted integrity, and though not trained to the bar, of sufficient legal knowledge. His stature, features and figure were good and his dress and address those of an old school gentleman. He was . . . indebted for his high social position, not to

his birth or family, wealth or influence, but to his exertion, perseverance, tact and good conduct." He was born February 6th, 1753, and died February 3d, 1828.

Thomas Clayton, United States Senator and first Chief Justice of Delaware under the present Constitution, (1832-37), was a son of Joshua Clayton, M.D., a surgeon in the Continental Army, who was subsequently Governor of Delaware. Thomas was born July, 1777, at Massey's Cross-roads, Md., whither his mother had been conveyed to avoid the excitement attending the march of the British army across the State of Delaware. Dr. Clayton was a descendant of Joshua Clayton, who, with his brother Powell, came to this country from Lincolnshire, England, with William Penn. Thomas, his son, received a classical education at the Academy of Newark, which was then in high repute as a place for instruction. At nineteen he began the study of law in the office of Nicholas Ridgely, of Dover, and three years afterwards was admitted to the bar.

Although thus introduced to a company of legal giants, he enjoyed their respect and confidence, and soon obtained a large and profitable practice. In 1808 he was made Secretary of State, under Governor Truitt, and in 1811 he was appointed Attorney-General by Governor Hazlett. In 1814 he was elected a member of the House of Representatives. During this term Mr. Clayton supported a bill, which passed both Houses of Congress, to change the mode of compensating members. For this unpopular act he was defeated at the next election for Representatives in the National Legislature. But the State Legislature demonstrated its unabated confidence in him by electing him, soon after, to hold the place in the United States Senate which Hon. Caesar A. Rodney had resigned to assume the responsibilities attaching to the position of Minister of State to Buenos Ayres. Mr. Clayton took his seat as United States Senator January 15, 1824, in the Eighteenth Congress, and remained in the Senate until the close of the Nineteenth Congress. In 1828 the judiciary of the State was reorganized and Governor Charles Polk appointed the Ex-Senator to be Chief Justice of the Court of Common Pleas. When this court and the Supreme Court were abolished by the provisions of the Amended Constitution, which became operative on the third Tuesday in January, 1832, Mr. Clayton was made Chief Justice of the State. This office he held until January 16, 1837, when he was chosen again to the United States Senate to fill the vacancy made by the resignation of Hon. John M. Clayton. On the 19th of the same month he took his seat in the Senate chamber. In 1841 he was again chosen Senator for the term beginning March 4, 1842. After serving through this term,

Mr. Clayton retired from public life, preferring the privacy and comforts of his home in New Castle, where he had lived since 1833, to the excitements and cares of public station. He died suddenly at his home, August 21, 1854. His remains lie in the cemetery of the Presbyterian Church, at Dover with the ashes of others with whom the course of his eminent public life began.

A career so conspicuously useful must have been the outcome of more than ordinary ability. The endowments of Chief Justice Clayton were not so much of the dazzling as of the effective order, although he did most admirably adorn the positions that he held. His current history shows the place he occupied in the esteem of his fellow-citizens. A signal evidence of his eminence as a jurist as he was estimated by his cotemporaries, is afforded by the appointment of Mr. Clayton to the position of Chief Justice. This appointment was made by Governor Polk under circumstances which subjected the State to the expense of four judges, when, if another appointment had been made, three would have sufficed. By the death of Chief Justice Booth, then residing in New Castle County, it became necessary to appoint a successor. As Mr. Clayton resided in Kent County, his appointment would make an additional judge necessary to satisfy the requirements of the Constitution. Three judges would have sufficed for the State, if the successor of Chief Justice Booth had been selected from New Castle County. But, in order to secure a tried and approved jurist for the vacancy, the governor determined to appoint Mr. Clayton and risk the approval of the people. In his explanatory message to the Legislature the governor said: "I selected the present Chief Justice of the Common Pleas solely with a view to his learning, talents, integrity and superior capacity for the station, which have been amply tested by the records of the court over which he presided." Chief Justice Clayton was profoundly versed in the principles of the law. He had a marvelous skill in perceiving the vital points of a case, largely due to his almost intuitive grasp of fundamental principles. He was prompt in deciding the merits of an issue and felicitous in the precision with which he formulated facts and conclusions. His words were few but masterly in force and point. He is pre-eminent among those who have filled the position of Chief Justice; and such is the esteem in which his learning, acumen and force are held that Delaware lawyers are apt to feel that their cases are practically won if they are supported by a *nisi prius* decision of Judge Clayton. Judge Clayton was eminently impartial in his judicial capacity. Neither distinction of the person nor relationships swayed his judgments. With respect to the lawyers at the bar, he made no difference in the administration of rules between the

W. L. L.

J. Clayton

eminent John M. Clayton and his own son who was a practitioner at the same bar. He meted out to all the same even-handed justice, and required of all the same respectful regard for the law and for decorum.

Instances of this kind were not few. On one occasion, he required his son¹ to "sit down" in open court, because he insisted upon urging points which the chief justice had twice told him were "not law and not *ad rem*."

Hon. John M. Clayton once thought to try the mettle of the Chief Justice by a similar experiment. On the second recital of the same thing he was admonished not to try a third statement. It was not hazarded.

Being ten minutes late one time, he directed the clerk to "fine Thomas Clayton ten dollars." One dollar a minute was a small price for that which was indispensable to all human effort, and when lost or squandered could never be replaced.

Philip Reybold, whose eminent activity and usefulness were known to all the community, was once summoned as a witness, but thought he would first attend to some business of his own in Baltimore before appearing at court. Not appearing until after the second day, the judge asked him for his excuse. Mr. Reybold replied that "he thought he would attend to some private business before coming to court." "Is that your only reason, sir?" asked Judge Clayton. "Yes, sir," said Mr. Reybold. Turning to the clerk, the chief justice said, "Fine Philip Reybold twenty dollars." Then to the sheriff he said, "Take charge of Mr. Reybold until he complies with the order of the court."

John Middleton Clayton. There can hardly be imposed a much more difficult task than that of writing a *short* memoir of the professional career of one, who, in his day, (and that not a distant one) held so high a rank as a lawyer as did John M. Clayton. For the last twenty-five years of his life he was statesman, politician, agriculturist; but the fifteen preceding years had been devoted to the law. He was a student of it for three years, and active practitioner twelve. Admitted to the bar in Sussex County in the then Court of Common Pleas, at the October session of 1819, he at once commenced the practice in Kent, and continued, assiduously, to pursue it, until he was elected to the senate of the United States by the legislature at the January session, 1829. After that he ceased to devote much of his time to legal business, and gradually withdrew from the practice. Still, he would, occasionally, when some old personal friend sought his aid, or some case of wrong and outrage challenged his services, enter the legal arena, and do battle with all who came against him, and usually to their defeat. It is

because of the great success that almost always attended his arguments with the court, or addresses to the jury, that it is so difficult to avoid yielding to the impulse of extravagant praise. Besides, it is also so hard to tell, in the case of one so uncommon in almost everything, what can be suppressed without injustice to him. But to the task.

John M. Clayton was the first son of James Clayton and Sarah Middleton, his wife, and was born on the 24th of November, 1796, at Dagsborough, in Sussex, on the spot now occupied by a hotel called "The Clayton House." His father was brother to Dr. Joshua Clayton, the last chief executive officer under the constitution made in 1776, and the first under that of 1792, and was, therefore, uncle to that one of his brother's sons, who, afterwards, became so eminent as chief justice of the State. The Claytons came over with William Penn, and were, originally, Quakers. Sarah Middleton, John M. Clayton's mother, was of an Eastern Shore family of consequence; her maiden name was made his middle name, and he was John Middleton Clayton. His Christian name was bestowed upon him from the affection his father bore to his brother, John Clayton, who was at one time sheriff of that county where he resided, and also judge under both the constitutions mentioned. Young Clayton was, therefore, well-born; and was, moreover, a scion of a stock remarkable for robust persons, fine health and strong sense. His father is said to have been a very remarkable man, not only for intelligence and cultivation as a student of the English classics—Shakespeare being his favorite author—but for a sturdiness of understanding, and vigor and aptness of expression, which impressed all who knew him. His mother had remarkable fluency of speech, and grace and sweetness of manner in delivery of it, that captivated her listeners. Their children inherited more or less these combined qualities, but none in so great a degree as the subject of this sketch.

When he arrived at sufficient age to be sent far away to school, he was taken to a New England village and there fitted for Yale where he was afterwards matriculated, and whence he was in due time graduated, with the highest honors of his class. Returning home, after an uninterrupted absence of nearly five years, he soon after entered the office of his cousin Thomas Clayton as a student; and, when the rules of court allowed, was duly admitted to the bar, as is mentioned before. But he had spent two years of his student term at Litchfield, Connecticut, at a law school of great renown there, presided over by the distinguished Judge Gould. It is said of him that so anxious was he to master the law before he undertook its practice, he studied at Litchfield sixteen hours a day. Certainly he must have been a very laborious student there, for he brought home with him

¹ Colonel Joshua Clayton.

five quarto volumes of closely written manuscript of notes of the lectures by his preceptor.—It cannot but be thought very beneficial, in fact to Clayton, that simultaneously with his admission to the bar, came the financial troubles of his father, which broke him down entirely and soon carried him to his grave—thus throwing upon the young man, and a brother-in-law, the duty of providing for the family the father had left. Of a very sensitive and affectionate nature, Clayton shouldered his burden manfully and willingly; and, thanks to troops of kind, devoted friends, who took up his case and upheld him in his efforts, and to the splendid training he had had for professional life, at college, law school and law office, he soon entered upon a career of success at the bar, which had never been attained here before his day. This was not merely good fortune in a pecuniary point of view, but fame, distinction, renown. So distinguished was his progress, that report of it went over the State, and beyond it. While other young men were but stepping cautiously and fearfully along the path of professional life, he strode over it; not with any false assurance, but with a real consciousness, that he knew its every turn. And he did know the road, as an admiring bench, and fascinated juries and audiences testified by their close attention to all he said. And the hold he thus gained upon the attention of an audience of whatever kind, was never weakened, to the last hour that he stood up to speak in public. It was impossible to resist the influence of Clayton, when he addressed an audience. None but the judiciary could avoid yielding to his power of speech; it was so cogent in its terms, so persuasive in its utterance. A thorough master of human nature, which he had made a part of his study; a rich copiousness and yet simplicity of language which enabled him to clothe his thoughts with perfectly intelligible speech; a large figure, commanding and handsome; and an earnestness of manner with graceful and yet forcible gesticulation, it is hard to say what could be wanting to make the perfect orator. And yet, as oratory is generally understood—studied attitudes and gestures, and fine figures and flowers of speech—he had not a particle of it. But as it is better understood—the supreme power of captivating an audience and holding it as long as he chose, by vigorous thought and no less powerful speech, he certainly has never had in this State, an equal, and but few superiors anywhere. The moment he arose to speak, all eyes were turned upon him; and every murmur of conversation in the assembly was hushed. The dullest knew that a great treat was about to be given. Clayton never disappointed his audience; he was always interesting; and, when the occasion called for it, powerful in his manner and speech. He went to the bottom of every question he under-

took to discuss; and avoided none that required to be considered. In this way he impressed his auditors with his candor, and the conclusions he compelled, assured them of his great power as a reasoner as well as orator. The acuteness of one's intellect and skill in marshaling facts and theories in support of a proposition, are never so well shown as in the trial of a cause before a court and jury. The public always take a lively interest, whatever their opinions may be as to the merits of the particular question debated, in the intellectual struggles of those actively engaged in the discussion. A debate upon whatever subject, with strong men engaged in it, will always attract a crowd; but whether such body will remain an attentive listener, or draw away from lack of interest, depends entirely upon the reasoning or oratorical powers of the speakers. How much soever the people admire the fine speeches of the florid orator, they are fixed in their admiration of the reasoner, and hang upon every word that falls from him, provided, he has the art, which comes by nature, of incorporating, as it were, his mind and feelings with theirs. It was the ability to do this that gave Clayton his great advantage over other speakers. Others might reason cogently, but their manner had neither vigor nor attractiveness; he had the power of logic, with the skill of the rhetorician in all its art and effectiveness. He was not one of those men who never shine, but, upon some great occasion, (not counting for much in the requirements of social and political life) but his sensitive nature and alert and active mind fitted him for interesting displays of ability upon all proper occasions. Looking back at the career of Clayton at the bar, it is impossible not to regard him, taking the shortness and success of his life at it, as altogether the most extraordinary lawyer every way the State has produced. And such was his legal reputation, that in a very few years after he entered political life in the Senate of the United States, he was made Chairman of the Judiciary Committee, the highest honor, at that day, of the body.

In the beginning of the January session 1837, of the Legislature of the State, Mr. Clayton having resigned the United States Senatorship to which he had been re-elected in 1835, Thomas Clayton, the chief justice, was elected to fill the unexpired term. This made a vacancy (upon the acceptance by the chief justice) in that office, and Governor Polk induced Mr. Clayton to accept it, though he wanted very much to retire to private life. He retained the place for about three years, when he resigned it.

The career of John M. Clayton upon the bench was too short for any protracted display of judicial ability, but it was long enough to show him to the public as a prompt and ready and thoroughly well

the particular question debated in the inter-
ests of these actively engaged in
sion. A debate upon whatever subject is
men engaged in it, will always attract
and whether such body will remain, and
listener, or draw away from him, of course
depends entirely upon the reasoning, or the
powers of the speakers. How much so-
people admire the fine speeches of the rhy-
tor, they are fixed in their admiration
respect, and hang upon every word that
from him, provided, he has the art, whic
by nature, of incorporating, as it were, th
and things with theirs. It was the ability
this that gave Clayton his great advantage
other speakers. Others might reason
but their manner had neither vigor nor
ness, nor had the power of logic, with th
the rhetorician in all its art and effective-
ness, and one of those men who never sh
upon some great occasion, (not counting, of
in the requirements of social and polit
but his sensitive nature and alert and acti
fitted him for interesting displays of abilit
all proper occasions. Looking back now
of Clayton at the bar, it is impossible not
him, feeling the shock and succeeding to
it, as altogether the most extraordinary
every way the State has profited by it.
was his legal reputation, that in a very sh
after he entered political life in the Sen
United States, he was made Chairman
Judiciary Committee, the highest honor
day, of the body.

In the beginning of the January session of the Legislature of the State, Mr. Clark having resigned the United States Senate to which he had been re-elected in 1864, Mr. Clayton, the chief justice, was re-elected on an unexpired term. This was a great acceptance by the chief justice of the Governor Polk's desire. Mr. Clark, although he wanted very much to continue in it. He retained the position until the 1st of March when he resigned it.

The career of John M. Bayne was too short for any profound study, but it was long enough to public as a prompt and ready re-

From the

equipped judge and master of the law, and as carrying upon the bench with him those same fine qualities of heart and manner that distinguished him in private life. Courtesy, urbanity, considerateness were his essential characteristics. His charges to the jury were transparent pieces of address, his aim being to put the case upon the testimony of both sides so clearly before the jury, that the dullest member of it could comprehend it. His great power of illustration and of exemplification enabled him to do this perfectly. Toward every member of the bar he was respectful and kind, hearing all where there was ground for question, with attention and patience. From his judgments there was never a writ-of-error. He was particularly kind, also, to young practitioners; helping them out of their troubles when he could do so with any propriety, and encouraging their efforts, not only by attention but also by those looks of encouragement which a face so eloquent as his, could show forth. There was, every where, a universal expression of regret when he gave up the bench.

While the main purpose of this sketch is to exhibit John M. Clayton, as a logist, (a memoir of him generally having been written for, and published a few years ago by 'the Historical Society of Delaware') yet it would not be at all complete, nor comport with the purpose and quality of this "History of Delaware," if it did not contain an account, although it must necessarily be a brief one, of his career, as politician and statesman.

By the use of the first of these terms, it is not meant that he was a political man in the sense of being a mere partisan leader, concerned above all things for himself, though professing unmeasurable regard for everybody else; he was nothing of the kind. As the sole leader of his party, from 1828 until he retired from politics practically, upon the death of General Taylor in 1850, he had its interest alone at heart, asking nothing for himself, and rarely seeking to influence appointments by the Governor or legislature. This concern for that interest was because he believed his party to be right in its own aims, whatever might be its errors of action from unsagacious counsel. In that party, as such, he found but little to condemn. He believed it to be a party better suited to the requirements of the country than its opponent and therefore to be maintained and upheld with courageous spirit. He looked upon it as a party of safer purposes than was its rival; with a wider view of the needs of the nation as a growing political society, and with less of the disposition so apparent in those times, to compromise the true public weal by solicitations of votes. It is most probable, viewing Clayton socially as an individual, and with respect to his habit of ease and personal comfort (only suppressed by necessity of

mental activity (in his legal practice) that he had no ambition for party leadership, which entails the necessity of so much mental exercise, and involves one in so much strife and vexation also. But when the great contest came on in 1828, between Adams and Jackson, the Adams' party in Delaware had no one else in it who was qualified to take command of it, and regulate its action. It was the dominant party; but nearly every political man of distinction in the State—old Federalist and old Democrat—was a Jackson man. And the leading Federal newspaper in the State, indeed the only one, the *Delaware Gazette*, was a Jackson organ. Clayton was a Federalist, as was all his family, under the old state of things. As such, he had been clerk of the legislative houses, auditor of accounts, member of the lower house, and secretary of State, under Governor Samuel Paynter, to fill the vacancy in that office occasioned by the resignation of Henry M. Ridgely, chosen for the Senate of the United States to fill the place of Nicholas Van Dyke, deceased. He was also secretary under Charles Polk. Still he had not gone much into politics, as people say. But when the campaign for President to succeed Adams, culminated in vigor in that year (it had been in progress from the time he was elected by the House in 1824), the call of the Adams party in Delaware was for Clayton as its leader. He responded to it, and gave up his time and talents to securing its ascendancy in the State. He was successful; success was his, when he attempted anything.

The new Legislature, elected in 1828, had to elect a senator of the United States; and Clayton was chosen, though he did not seek the place. In fact he accepted it reluctantly, for various reasons. He took his seat in the senate the day General Jackson was inaugurated, 4th of March, 1829, wanting then near five months of being thirty-three years old.

Webster, Clay, Benton, Grundy, White, Holmes, Robbins, Calhoun, Livingston and Hayne were there, besides other distinguished men. The great *nullification debate*, as it has been called, took place in 1830, upon a resolution about the public lands introduced by Senator Foote, of Connecticut. Clayton entered into it, though having only three months' experience of senatorial life, and discussed all the topics involved in it; public lands, executive power of removal, and the right of a State to nullify an act of Congress. His speech gained him great applause on all hands as an uncommon performance in one so young; and he was, at once, given a high place of rank as an orator and statesman. He also spoke on the graduation bill and appropriation bill, important public measures. In the first week of the session of December, 1831, he introduced his celebrated

resolution to inquire into the abuses of the post-office department. With the greatest possible opposition on the part of the administration, whose appointments, under the system of removal from office then undertaken with vigor, filled that branch of the public service he toiled in his duty, which finally resulted in a report sustained by the fullest proof, showing a rankness of corruption in the public service of the post-office department which shocked the public sense all over the country.

Notwithstanding, the great influence and power of Mr. Clay, and his prestige of ability to compromise difficulties which other statesmen were powerless to deal with, he yet was unable to effect any arrangement of the tariff system in 1833 that would satisfy the quiet portion of the country, and also repress the turbulent spirit then rife in South Carolina, threatening not only nullification, but secession also. He had championed a bill in the Senate to regulate the tariff which, in fact, was not acceptable to the tariff men, nor to the nullifiers. Things seemed to be at a dead-lock, as it is said, when Clayton took the matter up and obtained the appointment of a special committee which afterwards reported the bill, that the North generally supported and which the South, as represented in the Senate, was compelled to support also. Thus Clayton was in fact the pacificator in 1833, more than any other member of Congress. This is set forth at length in the memoir before referred to.

The appointment of John M. Clayton to the chairmanship of the Judiciary Committee of the Senate—the highest honor that body could confer—necessarily threw upon him the duty of passing upon all the legal and constitutional questions that arose. He had able supporters in the other members; but the labor of investigation and preparation of reports was with him. So well satisfied was the Senate with its choice of him, that it was renewed at every election until he left the Senate in January, 1837. None but one reckoned as the first lawyer of the dominant party in the Senate is ever elected chairman of the Judiciary Committee.

The limited space allowed for this sketch forbids that, except in a particular matter hereafter treated, more should be attempted than a simple statement of some of the important events of his senatorial life. In 1832 he spoke upon the Apportionment Bill: in 1834 upon the celebrated *Protest* of General Jackson, and the Removal of the Deposits; in December 1835 on Benton's famous National Defense resolution, a snare laid for the Whigs. (In the meantime, Clayton had sent in a letter declining a re-election to the Senate, which his friends in the Legislature disregarded and sent him back.) It was in the debate upon that resolution, that he made his splendid defense of Webster from the attack made on him in the House by John Quincy Adams.

In 1831 a State Convention was called to amend the Constitution. It met in November 1831 and gave to the people the Constitution under which we now live. The most important of the amendments, those relating to the Judiciary, are his. All the delegates signed it, and it was put in operation by the people's representatives, the Legislature, in 1832. Some of the members of that body were very able men: but he was, unquestionably, the master mind among them.

On the 25th of August, 1836, Mr. Clayton received from President Day, of Yale College, a letter announcing that he had been honored with the degree of LL.D., by that body.

On the 16th of August 1839 Clayton resigned his office of Chief Justice. In 1842 he removed from Dover to the town of New Castle. At the special session of the Legislature of 1836, he procured the passage of the act to incorporate the Delaware Railroad. It was his preparation also, and he thus became the father of the road, and was made one of the commissioners to lay it out.

At the January session 1845 of the Legislature, Clayton was again elected to the United States Senate. He soon took up the French spoliation question, and by his ability and perseverance succeeded in doing, what no one else had ever done—passing the bill through both branches of Congress. President Polk, however, vetoed it, and Clayton reviewed his message very thoroughly in a speech delivered on the 11th of August, 1846. In the same session the Oregon question ("54° 40' or fight") came before the Senate, and Clayton took part in the fierce debate arising out of it. It was a very fine effort, and tended, greatly, to allay public excitement, which was very high.—Clayton supported the Mexican war which began in 1846—not because he approved it, but that the country being in it, he said, it was our "duty to fight it out."

In 1848 General Taylor, the hero of the Mexican war, was elected President, and chose Clayton, a perfect stranger to him personally, for his Secretary of State, and entirely harmonious relations existed between the President and his Secretary. At the death of Taylor in the summer of 1850, Clayton resigned his post as Secretary and returned home to Delaware, intending never again to go into public life. But an event occurred afterwards which, for the first time, made him desire to be back in the Senate. This was a movement in that body, made by General Cass, afterwards actively supported by Stephen A. Douglas and James M. Mason, to throw discredit upon the administration of General Taylor, for the negotiation of the Clayton-Bulwer treaty. Perhaps, if there was any one achievement of Clayton's public life that he took more pride in than any other it was the making of that treaty. And this was the reason. The British, for a very long time had, under color of

a protectorate of a miserable Indian tribe, squatted along the coast of Nicaragua, in Central America, had established themselves at San Juan de Nicaragua, on the river San Juan (Greytown the British called it), and, after the manner of that people, were asserting rights in that region very much to the annoyance of our own trade along the Central American coast, but offensive also to our people, who had a strong idea that the "Monroe doctrine," so called, was right. Besides, at this time, the subject of an Isthmian canal was a good deal talked of, and certain of our citizens had procured from the State of Nicaragua a concession for a canal to the Pacific by way of the valley of the San Juan, Lake Nicaragua and an affluent of it on the Pacific side. Clayton felt sure that the British had no valid right to any territory in Central America, and availed himself of an occasion which offered in the beginning of 1850, to make a treaty with the representative of England, Sir Edward Lytton Bulwer, about the canal, which he so shaped as to negotiate the British out of Central America entirely. This great success was duly appreciated at the time, and won great renown for the Taylor administration, not only for what the treaty actually secured (among other things the co-operative protection of the canal by England) but because it was the first step that any administration had taken to carry the Monroe doctrine into practical effect.

When the attack on the treaty was made, Clayton was at his home at Buena Vista, near New Castle, suffering all the anguish a father can feel from the recent death of his youngest son, who was of extraordinary promise. He immediately expressed a desire to get back to the Senate to defend the treaty and himself. The Legislature, though the Senate was opposed to him politically, sent him back there, and at the first opportunity he rose to answer the attacks by General Cass. One of the most exciting, and in some respects, important debates ever held in that body, began then, and continued from time to time, irregularly, until it finally closed, and with the universal judgment of those who heard it or read the speeches of the debates, that Clayton had not only vindicated the treaty and the administration of Taylor triumphantly, but that he was more than a match for all his assailants. His friends looked on admiringly while he dealt, first with one of them, and then with another; but they refrained, by their own inaction, from depriving him of any of the meeds of the victor. When it is remembered that Cass and Douglas and Mason took turns of attack upon him, it cannot but be conceded that his abilities must have been of the very first order to have enabled him to come out conqueror.

Clayton's health at this time was sensibly failing; but he was kept in his place by what he felt to be the duty of defending a public measure which he

had approved, and particularly a very special friend who was furiously assailed for the part he had in executing it, in the performance of the duty assigned him in that particular. The bill establishing the Naval Retiring Board is the measure referred to, and Captain, afterwards Admiral Du Pont, the friend. It were too long a service to go into an explanation of the bill and of the part assigned Du Pont in carrying it out, and what he and the other members of the Board did under it. The result was that the navy was rid of many inefficient officers to the great indignation of themselves, their families and friends. Captain Du Pont was the member of the Board who was made the target for the arrows of wrath, shot from every quarter. Clayton took up his defense, and that of the bill also, and succeeded in all he aimed at, to the great admiration of the people of his own State particularly, who were very proud of Du Pont as well as of him. This virtually closed Clayton's public life. His end soon after came. His life had been desolated early by the death of his wife, from which he never entirely recovered; and towards the period of the close of it, he lost both his sons. He came to Dover in September, 1856, to spend the remainder of his days, and there died on the 9th of November following.

Certainly, no man in Delaware ever had such a career as John M. Clayton, and, unquestionably, he achieved it for himself. Nature and education combined had produced a very extraordinary person—one of unbounded influence as an orator over an audience, and of surpassing attractiveness socially. And then, he had a tender, sympathetic heart, full of natural affection, and ready always to respond to appeals made to its charity. His death was a great public loss.

For the superior distinction such a man was worthy of—the whole country considered—it is unfortunate Clayton did not belong to a great State like New York or Pennsylvania.

Richard H. Bayard, who succeeded John M. Clayton, was born in Wilmington, Delaware, near the close of the eighteenth century, and was the eldest son of James A. Bayard. He was graduated from Princeton College in 1814. He was admitted to the New Castle bar in December, 1818, and very soon attained prominence in his profession. He was a United States Senator from 1836 to 1839, and upon his retirement was commissioned as chief justice September 19, 1839, and served until March 12, 1841, resigning his office to enter the Congress again as Senator, to which position he had been elected as a Whig in 1840, when the Democrats of Delaware suffered sweeping defeat, and the Legislature was in consequence strongly Whig. He served until 1845, and in 1850 was appointed as charge-d'affaires to Belgium.

James Booth, Jr., fourth in the order of chief

justices under the Constitution, served from 1841 to 1855; was the son of that James Booth who filled the office for the remarkable term of nearly twenty-nine years (1798-1828). He was born November 27, 1789, and died while still on the bench, March 20, 1855. At that time his character was thus summed up: "A great judge, a just man; noble, high-minded, at the same time affable, sometimes facetious; generous, kind-hearted; apt to teach—to instruct—the friend of all, but especially of the friendless; an arbiter of justice, yet delighting in mercy, and by all suitable means seeking to harmonize the conflicting elements and turbulent passions embraced in the causes on which he was so often called to sit in judgment."

Samuel M. Harrington succeeded James Booth, Jr., as chief justice, and received his appointment April 3, 1855, and occupied that station until May 4, 1857, when he was appointed chancellor, an account of which will be found in the list of Chancellors in the succeeding pages of this chapter.

Hon. Edward Woodward Gilpin, the fifth chief justice of Delaware under the Constitution of 1831, was born in Wilmington July 13, 1803, and died at Dover April 29, 1876. He was the son of William and Ann (Dunwoody) Gilpin. Until he reached the age of seventeen he resided with his grandparents at their homestead on the Brandywine, attending during that time the schools of the vicinity and a short time in Wilmington. He for a short period entered as a clerk with a merchant in his native town, but remained here, however, but a short time, joining his father, who then resided in Philadelphia. The latter placed him to learn the trade of a tanner and currier with a Mr. Fennimore. After a year in Philadelphia his father and himself returned to Wilmington, and young Gilpin continued his trade under Reuben Webb. He remained with him but a short time, finally abandoning his trade to enter the store of his brother Josiah. These various employments were not suited to one of his mind, but did much to endow him with what was in after-life many of his chief characteristics. It gave him a thorough knowledge of business affairs and in all things practical. While his early education was not advanced or collegiate, it was of such a nature, together with his early occupations, as to endow him with a large fund of discriminating common sense. While in the store of his brother he entered, fitted as he was, as a student-at-law with the Hon. John Wales. His early life had been one of application, and in no walk of life is this faculty of more avail than in the law. He was a close and intelligent student, never allowing any of the intricacies of the text-books to dull his ardor or hamper his pursuit of legal knowledge. Being without the many advantages that many students have, he knew that upon his own efforts alone depended his success in his chosen profession, and, in consequence, he left no effort unturned to become fully conversant with everything connected with that profession; and possessing a mind capable of intelli-

gently receiving that knowledge, he was at the time of his admission, October 3, 1827, eminently fitted to enter upon the practice of his profession. Of a nature more than ordinarily sensitive, careful of his personal integrity and always quick to resent any reflection upon the honesty of his motives, he rapidly gathered around him a large and lucrative clientage, by being industrious and attentive to the smallest detail of every matter intrusted to his care. His cases while at the bar were well prepared, every point being carefully and conscientiously brought out, and his advice when once given could be depended upon as sound. He belonged to the old Whig party, so many of whose former leaders are now prominent in Delaware politics. He never, however, was an ardent partisan, being conservative in his views, but when he once took a position his views were positive.

Upon the expiration of the term of Attorney-General James Rogers, Judge Gilpin was appointed to fill the vacancy, February 12, 1840, by Governor Comegys. This position he held for ten years, being reappointed in 1845 by Governor Stockton. Here his natural ability showed itself. He prosecuted the cases that came before him fearlessly. A theory of his that has become one of the historic expressions of the Delaware Courts was, "that one mode of preventing the increase of crime, is by the punishment of the criminal." Having been appointed at the early age of thirty-seven, after but thirteen years at the bar, he left the office, in 1850 at the age of forty-seven, with a reputation on a par with any of his cotemporaries, so faithfully and so well had he done his duty to the State. He was engaged for the next seven years in the practice of his profession, and upon the appointment of Chief Justice Harrington as chancellor, Mr. Gilpin became at once the choice of his fellow-members of the bar and the general public for the vacant position of chief justice. Governor Causey, recognizing this public sentiment, and being personally conversant with his many qualifications for the high position, appointed him on the 6th day of May, 1857. For nearly twenty years he presided over the Civil and Criminal Courts, and as a member of the Court of Errors and Appeals. While Chief Justice Gilpin may have been excelled in some particular point by his predecessors upon the bench, he, when all his various qualifications are taken into consideration, was without a superior. He was remarkable for the fact that his mind was of that nature that is denominated solid in every particular. He was careful to be impartial, whether in his charges to the jury, rulings at *Nisi Prius*, which were always quickly given, or his opinions in *banc*. The first four volumes of Houston's Superior Court Reports contain opinions from him on every point, and one of the best evidences of their value is the high estimation in which they are held by the bars of every State. They are upon almost every known branch of the law. They are all practical, pains-

taking and thorough, and with elaboration upon technicalities and seldom if ever theorizing. The immediate cause of his death was *angina pectoris*. He died suddenly, while holding court at Dover. He was for many years president of the Union National Bank and a director in the Philadelphia, Wilmington and Baltimore, and Delaware Railroads. His death was universally regretted; for over fifty years he had been before the public, giving most of his service to the public, while he could, had he so desired, obtained pecuniary profit had he attended to his profession. In religion he was a believer in the doctrines of Swedenborg and connected with the New Jerusalem Church. March 15, 1842, he was married to Miss Elenora Adelaide La Motte, who died eighteen months before him, leaving one child to survive them.

Hon. Joseph P. Comegys, the present chief justice of the State of Delaware, was born about four miles east of Dover, at the old family seat of the Marims, called Cherbourg, on the 29th day of December, 1813. He was the third son of Cornelius P. Comegys, Governor of the State of Delaware from 1837 to 1841, and Ruhamah, his wife (*née* Marim), who was the daughter of John Marim and Hannah Stevens, his wife.

The governor was a man of the strictest integrity and superior business qualifications; but of such profuse and unbounded hospitality and charity as to keep him always in straitened circumstances and to prevent him from bestowing upon his many sons a collegiate education. There was, however, in those olden days an excellent classical academy in Dover, conducted under the auspices of such men as Thomas Clayton, Henry M. Ridgely and Governor Comegys, where a lad of good sound mind and desirous of learning might acquire a mathematical and classical education almost, if not quite, equal to that which could be had at most colleges in those times. It was at this old academy, situated at the south end of State Street, in Dover, that Chief Justice Joseph P. Comegys received his education. The last three years of his academical course this school was conducted by the Rev. Ashbel Strong, one of the best classical scholars and elocutionists of that day. Young Comegys, by his exemplary deportment and his aptitude and strong desire for the acquisition of knowledge, very soon became a favorite with this good old master; so that when he went from the academy to begin his law studies in the office of Hon. John M. Clayton, who was then filling his first term in the United States Senate, the latter was quite surprised to find his young student, then only seventeen years of age, so well-versed in the classics, history, mythology and mathematics, and predicted for him that successful career in his profession which was fully realized in his early and middle life, and crowned in his later years with the highest honor which his native State could confer.

It is a remarkable fact, that of the eight children

left by Governor Comegys, to survive him, all except one have lived to be over sixty years of age, and six of them are still living, of whom the chief justice is now the eldest. They were all hale, robust and fine-looking men and women, and all endowed with minds far above mediocrity. Though now in his seventy-fifth year, Judge Comegys, still hale and vigorous, still preserves the "*sana mens in sana corpore*," and on the bench not only acts, but looks the chief justice. Having completed his law studies with Mr. Clayton, he passed a most excellent examination, and was admitted to the bar at the April term of the Superior Court, 1835, and in a few years took rank with the foremost members of his profession in the State. For many years he enjoyed probably the most lucrative practice of any lawyer in Kent County, and was frequently employed in important cases in New Castle and Sussex. In 1855, on the death of Chief Justice James Booth and the promotion of Associate Judge Harrington to fill the vacancy, his old Whig friend, Governor Causey, without solicitation upon the part of Mr. Comegys or any of his friends, sent him the commission of associate to fill the vacancy occasioned by Judge Harrington's promotion, which he had the good sense to decline, and continued to practice at the bar until May, 1876, when, upon the sudden death of Chief Justice Edward W. Gilpin, a Democratic Governor, John P. Cochran, tendered him the commission of chief justice, although he was not a member of that party, and had never voted the Democratic ticket or attended a political meeting for many years before. This position he has ever since filled with signal ability and marked impartiality. In 1882 the University of Pennsylvania, recognizing his high excellence of character and legal ability, conferred on him the degree of Doctor of Laws, an honor well merited by the Judge, and creditable to that institution of learning.

But for the liberal and charitable disposition, which he honestly came by, as an inheritance from both his father and mother, the extensive practice which he enjoyed for so many years would have enabled Judge Comegys to have amassed quite a handsome fortune. He has been satisfied, however, to indulge that spirit of liberality, and content himself with a simple competence.

In his earlier life, and so long as the old Whig party maintained its organization, Judge Comegys was an ardent partisan and was several times elected clerk and member of the House of Representatives, in the General Assembly, in which, when a member, he was a leader, and in 1856 was appointed by Governor Causey to fill the vacancy in the United States Senate occasioned by the death of Hon. Jno. M. Clayton. He never, however, permitted his political ambition to interfere with his social relations, or to divert him from his steady purpose of pursuing his profession with diligence and fidelity to his clients.

In his manner and bearing he mingles great dignity with a pleasing suavity and cordiality; so that in

his company one feels that he is in the presence of a gentleman of the old school.

To his public spirit and tenacity of purpose the town of Dover is, in a great measure, indebted for its public buildings and other improvements and ornamentalions, which have given it the reputation of being the most beautiful town in the State, and, in fact, one of the most beautiful in the whole country.

When he had been about two years at the bar he married Miss Margaret A. Douglas, a lady of the highest mental endowment and most finished manners and education, the daughter of the late Walter Douglas, of Mordington Mills, sister of James C. Douglas, late paymaster in the United States Navy, and the niece of Hon. Jno. M. Clayton, his old law preceptor. He went at once to reside in an old family mansion, on the south side of the Public Square in Dover, where he has continued to live ever since, and where, in the month of March last, he and his bride of fifty years celebrated their golden wedding.

They had but three children,—Walter Douglas, Harriet Clayton and Cornelia, of whom Harriet only is still living.

THE ASSOCIATE JUSTICES.—The associate justices in the province, and also under the Constitutions of 1776 and 1792, were not men "learned in the law." A few facts are here given concerning some about whom anything can be obtained while sketches of others of their number appear elsewhere in the history. The first of the Higher Courts under Penn were the Provincial Courts, and of their officers none were residents of the lower counties until 1684. In that year William Clarke, of Lewes, Sussex County, was chosen "Justice in General" to succeed William Welsh, and served as president judge. Arthur Cooke was appointed associate justice in 1685, but declined. He was again appointed November 21, 1690, with John Simcock, Edward Blake and Griffith Jones. Cooke and Simcock were prominent Friends. The former resided in Philadelphia until his death, October 2, 1699. The latter was a Public Friend and resided in Chester County. He was one of Penn's trusted advisers and counselors, and died January 27, 1702. Griffith Jones was one of the early settlers under Andross on St. Jones River, and later was one of Penn's Council. Edward Blake was a resident of New Castle and continued a member of the Provincial Court after 1694. Richard Halliwell, appointed soon after 1690, was a member of the court in 1694, and was one of those who, in that year, settled the dispute between the justices in relation to the county-seat of Kent County. He was a resident of New Castle and donated the glebe to the Immanuel Church in that place.

William Rodney, who was appointed justice in December 3, 1707, was the ancestor of the family in this country. He first settled in Sussex County, where he was sheriff in 1685, but soon after settled in Kent County, where he resided when he was justice. In

1704 he was Speaker of the Assembly of the three lower counties.

Jonathan Bailey, appointed justice in 1710, was a resident of Lewes and a miller. He had served as sheriff of Sussex County, and held other trusts.

Thomas Bedwell resided west of Dover, where, with his brothers, he was in possession of large tracts of land.

Barclay Codd, who was twice a justice, was a resident of Cedar Creek Hundred and a descendant of Richard Perrott, who, in 1672, emigrated from Maryland.

Joseph England was a Friend who resided in the western part of Appoquinimink Hundred (now Blackbird), on the old King's Road.

Joseph Wood was one of the early sheriffs of New Castle County.

John Brinkloe was a resident of St. Jones Hundred (now East Dover).

Timothy Hanson was a resident of Little Creek Hundred, near Dover.

Robert Gordon was from New Castle, and was prominent in many official positions.

Benjamin Shurmer came from Bristol, England, and settled in Kent County. He was recorder many years, and commissioner to lay out Dover in 1717.

Jehu Curtis, who was appointed justice April 5, 1743, was a son of Jehu Curtis, of New Castle, who was prominent in the affairs of his time. Jehu Curtis (2d) served as speaker of the Assembly of the three lower counties, as treasurer and trustee of the Loan Office, and served as justice until his death, November 18, 1753, aged sixty-one years. He is buried in Immanuel Church-yard at New Castle. A characterization of him is best given in the language of Benjamin Franklin, who was an intimate friend:

"If to be prudent in council,
Upright in judgment,
Faithful in trust,
Give value to the public man;
If to be sincere in friendship,
Affectionate to relations
And kind to all around him,
Make the private man amiable,
Thy death, O Curtis,
As a general loss,
Long shall be lamented."

William Till, formerly chief justice, was appointed justice in 1754 to succeed Jehu Curtis, continued to 1764, and died in 1766.

John Vining was appointed justice in 1757, and continued until his appointment as chief justice in 1764.

He was succeeded by Jacob Von Bebbber, who was a descendant of Michael Von Bebbber, of Bohemia Manor, and at that time resided not far from what is now Kirkwood.

Richard McWilliams, who was appointed third justice November 27, 1764, and second justice May 4, 1769, was a native of Ireland, and settled in New Castle about 1735 or 1740. In 1743 he was chosen clerk of the peace and recorder, and for many years was treasurer of the lower counties. In 1748 he

married Mary, the daughter of the Hon. Jehu Curtis, who died two years later, and as a second wife he married Margaret, the daughter of William Shaw, Esq., who was attorney-general and treasurer of the lower counties in the early years. Chief Justice Richard McWilliams was his son.

John Clowes, a justice in 1765, was a resident of the western part of Broad Kiln Hundred, Sussex County.

Cæsar Rodney, of whom much is said, had occupied several positions of trust in Kent County before coming to the bench in 1769, and from this time became foremost in councils, not only of the province, but of the colonies.

David Hall, a justice in 1769, was a farmer, and resided near Lewes. He was the father of Colonel David Hall, of the Revolution, and of Dr. Joseph Hall, both of Lewes. His daughter, Mary, became the wife of James P. Wilson, an attorney of Lewes, and later an eminent Presbyterian divine of Philadelphia.

Samuel Chew, who was attorney-general from 1760, was appointed third justice October 30, 1773, and served until the Constitution of 1776 went into operation. He was a son of Dr. Samuel Chew, who was chief justice in 1741, and brother of Benjamin Chew, of Philadelphia, eminent as an attorney.

In the year 1773 the court was composed of Richard McWilliams, chief justice; Cæsar Rodney, second justice; Samuel Chew, third justice; and David Hall, fourth justice, which, as so formed, continued until re-organization under the Constitution of 1776. This occurred in July, 1777, with William Killen as chief justice; John Evans, of New Castle, second justice; and John Cook, of Smyrna, Kent County, third justice. Evans and Cook were succeeded respectively by David Finney, of New Castle, and John Jones, January 27, 1778. As thus organized, the court continued until after the Constitution of 1792 was adopted, when, on the 6th of September, 1793, it was reorganized, with Richard Bassett as chief justice, and Thomas Macdonough, Daniel Rodney and John Clayton, associates.

Thomas Macdonough was a physician, and the son of James Macdonough, who resided at "The Trap" (now Macdonough), in St. George's Hundred. He was a major in Col. John Hazlet's regiment, and served during the Revolution, after which he returned to practice in his native place; appointed justice in 1793, and served until his death, in 1795.

Daniel Rodney was a native of Lewes, where he was born September 10, 1764. He was chosen justice in 1793, and served until 1796, and in 1813 was elected Governor of the State, succeeding Gov. Joseph Hazlett; an elector in 1817; member of Congress in 1822, and United States Senator in 1827. After this active, busy life he retired to Lewes, and died in 1846.

John Clayton, one of the first justices under the Constitution of 1792, was a descendant of the Joshua Clayton who emigrated from England with William Penn.

He was a brother of James Clayton (father of John M. Clayton), of Dr. Joshua Clayton, Governor of the State, and father of Chief Justice Thomas Clayton. John Clayton was sheriff of Kent County twice—the last time preceding his appointment as justice, during which, as sheriff, he compelled the Legislature of the State, then in session (May, 1792) to abandon the Court-House, and they adjourned to Duck Creek Cross-Roads (now Smyrna).

Kensley Johns, who succeeded Daniel Rodney in 1796, held the position until 1799, when he was chosen chief justice.

Andrew Barratt was the eldest son of Philip Barratt, of Murder kill Hundred, near Barratt's Chapel. He was chosen a member of the Convention of 1792, and was appointed associate judge January 23, 1799. He was a member of the State Senate, and Speaker of the sessions of 1812, '13, '14. He died in 1821. His son, John Barratt, was an attorney in Dover, and Secretary of State, and died a young man in 1818.

Peter Robinson, a brother of Thomas Robinson, the Loyalist, resided in Indian River Hundred, at St. George's Chapel. He was chosen judge October 30, 1793, and served many years.

Richard Cooper, of Kent County, was born in 1755, at Tuckahoe Neck, Caroline County, Md., and early in life settled at Willow Grove, where he kept a store, later moved to Passey (Coopers Corners), where he died August 29, 1818. He was appointed associate justice May 11, 1804, and served until his death.

Isaac Davis was born near Milford, Kent County, in 1765. He was elected member of Assembly in 1793, of the Senate in 1794, and Speaker of that body, and register of wills in 1799. After he retired from this office he removed to Smyrna, where he passed the remainder of his days, and died March 30, 1856. He was appointed justice January 7, 1814, and served until the re-organization of the court under the revised Constitution of 1831.

William B. Cooper, a native of Sussex County, born near Laurel, was appointed associate justice, September 26, 1817, and served several years. He was elected Governor of the State October 18, 1840.

Samuel Paynter was born in 1768, at Drawbridge, Broad Kiln Hundred, Sussex County. He descended from Richard Paynter, who settled at Lewes before 1700. Samuel Paynter was appointed justice in February, 1818; elected Governor of the State in 1823, and in 1844 was a member of the House of Representatives, and died at the homestead in 1848.

Kendall Batson was a native of Sussex County, and was clerk of the peace and sheriff of the county before he was chosen justice in 1820.

Jacob Stout was born at Leipsic, Kent County, where his ancestors had settled before 1700. He was a member of and Speaker of the State Senate in 1820, and upon the death of Governor-elect Henry Molleston, who died before taking the oath of office, Jacob Stout, by virtue of his office, became Governor

of the State, and served the term, and upon his retirement was appointed associate justice January 21, 1822, and served many years.

Dr. Edward Dingle, of Dagsborough, the last justice appointed under the old Constitution, was a grandson of the Rev. Edward Dingle, who was rector of St. Martin's parish as early as 1740. He was appointed associate justice October 6, 1827, and served until the reorganization of the courts under the new Constitution. He was a prominent and influential member of the Constitutional Convention, and was instrumental in introducing the system of biennial elections.

Under the Constitution of 1831, with the exception of David Hazzard, the associate justices have all been learned in the law.

The family represented by Hon. Caleb S. Layton, the subject of this notice, has long been recognized as one of the oldest and most influential in the State of Delaware. About the year 1700 or the beginning of the eighteenth century, Tilghman Layton, who was not himself the original emigrant, however, came with other early families from Virginia, and made a settlement in what is now North West Fork Hundred, in Sussex County. He had two sons—William Lowder and James. William died in 1745, and left three sons,—Hewitt, Lowder and Robert, of whom the second named was the grandfather of Judge Caleb S. Layton. He also had a son Lowder, born August 21, 1770, who married Sarah, daughter of Caleb Sipple, of Kent County, on April 27, 1797. He passed his active life in Milford, where he engaged in mercantile life—never, however, losing his interest in agricultural pursuits. He was a man of character and influence, and exerted a strong influence for good in his day and generation. He died June 26, 1849.

Caleb S. Layton, the oldest of a large family of six sons and three daughters, was born on the family homestead April 12, 1798. Soon after that date his father moved to Milford, where the son enjoyed such educational advantages as the then excellent local schools afforded, and subsequently received more advanced instruction at the Philadelphia Grammar School. After completing his academic course he returned to his native county and engaged in business with his father. On October 14, 1819, he married Penelope, daughter of Gov. Caleb and Elizabeth (West) Rodney, and the year following was appointed clerk of the peace for Sussex County. He resigned this office in 1822, and entered upon the study of law with Thomas Cooper, of Georgetown, one of the leading members of the Sussex bar. At the session of the State Legislature in 1824–25 he served as clerk of the Lower House, and was duly admitted to practice as an attorney at-law in 1826. He entered earnestly upon the performance of the active duties of his profession, and by close application and systematic and intelligent work soon established a wide reputation for himself as a wise and learned counsel-

or and a zealous and popular advocate before the jury. In 1826 he was elected a member of the lower branch of the State Legislature, and was re-elected for several successive terms. In 1830 he was elected a member of the State Senate.

During the administration of Governor David Hazzard he served as secretary of State, and was again appointed to the same office by Governor Charles Polk, in 1836. While occupying this position he was duly appointed an associate justice of the Superior Court of Delaware, and successfully and ably occupied that exalted place until July, 1844, when, owing to the insufficiency of the pecuniary returns from the office, he was compelled to resign, greatly to the regret and disappointment of the citizens of the State. He returned to the practice of his profession in Georgetown, and added still further to the repute which he had previously enjoyed in the State as one of the leaders of the Delaware bar.

Aside from his professional prominence, Judge Layton exerted a wide influence in the domain of politics, and labored zealously and successfully in advocating the principles and sustaining the purposes of the political organization to which he belonged. Originally identified with the Federalist and Old-Line Whig parties, he passed, by a natural transition, into the Republican party at the time that the burning questions which preceded the late war between the States gave it birth; and during the darker days that followed proved an able and efficient advocate of those principles that preserved the Union and with it the life of the nation. He was a forcible speaker, a close and accurate reasoner and a recognized leader in political life from 1825 or '26 until within a few years of his demise. He was the real author of the free-school system of the State, having caused the bill to be introduced which established it, and always felt a warm interest in all movements tending to foster and maintain her educational, moral and religious institutions.

He was strongly opposed to slavery, and, as a member of the Legislature, caused the first abolition bill to be introduced in the State of Delaware.

For nearly half a century he was a consistent member of the Protestant Episcopal Church and a liberal contributor to all evangelical and missionary objects.

In his social and domestic relations he was of an exceedingly amiable character. His pleasing address, polished manners and intelligent conversation made his presence welcome in every company; while in his family he was the centre of an affectionate circle, to which he set the constant example of gentleness, peace and mutual confidence. Physically, he was erect and graceful, even at a very advanced age, and preserved in a remarkable degree the manly strength and development of earlier years. Finally, in the ripeness of advanced age, he passed away, after a brief illness, on October 3, 1882, leaving behind him the fragrant memory of a well-spent life.

For "The Boston Herald" - 1867

Wm. L. Dayton

J. H. Milligan

S. S. Milligan

Judge Layton's first wife died in July, 1855. She was a lady of rare excellence of character and possessed of many virtues, a devoted wife and mother, and an exemplary follower of Christ. She had nine children, as follows: Dr. Joseph R. Layton; William L., died; Samuel H., residing at Frankford; Caleb R., late colonel in the army of the United States, who died August 20, 1887; Sarah E., died; Hester A., died; Daniel J., a prominent citizen, resident of Georgetown; Penelope, wife of Rev. John Linn McKim; and Lavinia J., who married Rev. George F. Plummer.

For his second wife Judge Layton married Anna M., daughter of the late Dr. William Morris, of Dover, who proved a worthy help-meet and comfort in his declining years, and who died in the fall of 1886.

The Constitution of 1831 did not provide that the associate justices should be attorneys learned in the law, but, with one exception, it has been the rule, and in the appointments made January 18, 1832, James R. Black, then an attorney at New Castle, was the first one mentioned. He was at that time in the prime of life, and had been for many years a successful practitioner at the bar of the State. He was a native of Newark, Delaware, where he was born in 1785. After attending academy in his native town, he entered Dickinson College, at Carlisle, from which he graduated. He then went to New Castle, and entered the office of the Hon. George Read (second), with whom he studied law, and was admitted to practice at the bar of New Castle County at the November term, 1806.

He at once opened an office, and by his abilities, strength of character and steadfastness of purpose, soon became one of the leading lawyers of the time, and upon the reorganization of the court in 1832, was appointed with Samuel M. Harrington and Peter Robinson, associate justices, which position he held until his death, September 3, 1839.

At a meeting of the bar of New Castle County, held on September 5, 1839, the following resolution was adopted:

"Resolved, That in the death of James R. Black, one of the associate judges of this State, we recognize a public misfortune which we individually, and as members of the legal profession, must peculiarly feel and deplore; regarding this sad event not only as the loss of a friend, whose character in private life justly endeared him to the whole community, but of a judge whose sound legal learning, uncompromising integrity and faithful discharge of duty gave inestimable value to his official labors, and adorned and dignified his station."

Of Samuel M. Harrington, who was upon the bench from 1832 to 1836, as a member of the first court under the new Constitution, a sketch appears among those of the chancellors.

Peter Robinson, the third of the trio of associate judges forming the first court under the present Constitution, held the position from his appointment, January 18, 1832, to the time of his death, in 1836. He was born October 14, 1775, in Sussex County, and was a son of Thomas Robinson, the Loyalist. He read law with Chancellor Ridgely, was admitted to practice April 23, 1799, and soon became the leader

of the bar in his native county, and one of the foremost lawyers of the State. He became prominent also in politics, and prior to his appointment to the bench was three times Secretary of State, his terms beginning respectively in 1805, 1814 and 1822. His ability and integrity won for him the respect even of those opposed to him in politics. He married his cousin Arcada, daughter of his uncle, Peter Robinson, and left three children—Thomas Robinson, Jr., Alfred P. Robinson and Mary, wife of the late Judge Edward Wootten.

David Hazzard of Sussex County, who was appointed to the bench in December, 1844, and held the position until his resignation in 1847, when he was succeeded by the late Judge Wootten, was the only one of the associate judges under the Constitution of 1831 who was not a lawyer, but he was well equipped for the office, being a man of marked ability, unquestioned uprightness and judicial mind. Judge Hazzard was of prominent family, and distinguished by reason of his own abilities, having been Governor of the State long before he went upon the bench, and also State Senator in 1844. In 1852 he was a member of the convention to alter the Constitution of the State, and took a leading part in the deliberations of that body.

David Hazzard was born May 18, 1781, and died July 8, 1864. He was a son of John and Mary (Houston) Hazzard, of Broadkirk Neck, Sussex County, and was a descendant of Coard Hazzard, who settled in that vicinity about 1700, and who, according to family tradition, had emigrated from England some years prior to that time, and located in Virginia.

John J. Milligan was born December 10, 1795, at his father's residence, Bohemia Manor, Cecil County, Maryland. He was of Scotch descent, his grandfather, George Milligan, having come from Ayreshire, Scotland, and settled in Maryland toward the middle of the last century. The judge's father, Robert, was sent to Scotland and educated at the University of St. Andrew's and read law at the Middle Temple, London. On his return to this country he was admitted to the bar at Annapolis, Md., but resided chiefly on his estate, Bohemia. His wife was a daughter of John Jones, Esq., of Delaware, whose family estate was situated near Cantwell's Bridge (now Odessa), and whose mother was Lydia Cantwell, direct descendant of the Quaker martyr, Mary Dyer.

In Judge Milligan's early childhood his father purchased the house then standing on the southwest corner of Seventh and Market Streets in Wilmington, in which the judge's family so long resided. It was intended as a temporary home for a season when the Bohemia residence was subject to malarial fevers, but the father having died soon after, it was thought best for his family to live in Wilmington, where there were better facilities for their education than at their country home. As a child Judge Milligan attended the old academy, Wilmington, and later

went to St. Mary's College, Baltimore, where he remained until he entered Princeton College, where he was graduated in 1814.

After his graduation at Princeton he studied law in the office of his brother-in-law, the Hon. Louis McLane, and was admitted to the bar in New Castle County December, 1818. After his admission to the bar his health became so delicate that he was unable to engage closely in the practice of his profession. He was elected to Congress in 1832, and served three consecutive terms, and his nomination for the fourth time indicated that during that time he had not lost or impaired the attachment or trust of his party. Within a year after the expiration of his Congressional career he was appointed by Governor Comegys as associate judge of the Superior Court for New Castle County to succeed Judge Black, who was then just deceased. His commission bears date the 19th day of September, 1839. This office he continued to hold until his resignation, on the 16th of September, 1864, a period within three days of twenty-five years.

As a general rule a judicial life is uneventful, and Judge Milligan's life afforded no exception. That he wisely, prudently and usefully conducted himself in his honorable and responsible station was the judgment of those members of the bar who practiced before him. On the bench he was always patiently and thoughtfully attentive to the business before his court, and in the exercise of his judgment he was deliberate, dispassionate and never consciously influenced by the bias of partiality or prejudice. While he was not insensible to popular favor or approval—few men are, though they profess the contrary—he would not indorse or advocate what his sense of justice condemned to win popular applause. An illustration of his judicial and manly independence occurred some years ago. The Legislature had recently passed an act rigidly limiting the freedom of the colored people and restricting their privileges of traveling to and from the State to a very narrow compass and made it the duty of the courts to specially give the law in charge to the grand jury at the spring term of the court in each county. This Judge Milligan did, but at the same time took occasion to denounce the statute as unnecessarily harsh and unjust, and recommended its speedy and unconditional repeal.

On the formation of Mr. Fillmore's Cabinet, Judge Milligan was offered the position of Secretary of the Interior, but declined it, not feeling his health equal to the discharge of its onerous duties. On the occasion of his resignation of the office of associate judge, the regret of the people of the State was very generally and warmly expressed. It was voiced by the Governor of the State, who, through the Secretary of State, addressed to Judge Milligan a letter accepting his resignation and expressing his profound regret that the State was to lose the public services of one who had "performed the duties of his office with fidelity, dignity and ability."

In personal intercourse, in the daily life of citizen,

neighbor and friend, Judge Milligan's work and conversation were beyond reproach. His presence was commanding and engaging, and his address perfect. His manners were natural and unstudied, being the outcome of an amiable disposition and a kind heart. No one ever left his society without carrying away an agreeable and pleasant impression of the man. But with all his noble gentleness of mind and graceful bearing, he was possessed of a manly spirit of courage and a high tone of thought. Though sensitive to anything which might be supposed to touch his character, he was not quick to give or take offense, as he knew when and how to assert himself without being over-sensitive or expecting wrong where none had been intended.

To the younger members of the bar his kindness was ever manifested; and at the time of his death many of them recalled to their professional brethren instances in which it had been strikingly exhibited.

After Judge Milligan's retirement from the bench, he removed to Philadelphia, where he died April 20, 1875.

Hon. Edward Wootten, for forty years associate justice of the courts of Delaware, was born in Laurel October 2, 1810. He was the son of Peter G. Wootten, who was one of that early class of business men on the Lower Peninsula who combined all the attributes of the old style gentleman and successful man of business. He was interested in politics, and as men in the mercantile life in those days were always men of importance, he occupied a leading position in his party councils. He was several times a member of the Legislature. His father, Peter G. Wootten, Sr., emigrated to this country from England, settling his four sons upon a large body of two thousand acres, located near the town of Laurel. The subject of this sketch received his early education at the old Laurel Academy, which was a famous institution of learning in that day. After completing his studies here he entered upon a course of legal study with Thomas Cooper, of Georgetown, with whom he continued until his death, when he completed his course with James Rogers, Esq., of New Castle, being admitted to practice in 1830, opening an office in Georgetown. He immediately took a position of prominence at the bar, and in 1845 he received the unanimous vote of the Democratic Convention for Congress. This nomination, coming in such a complimentary manner, he declined, preferring his profession to a public life. Though a Democrat, his fitness for the position of a judge was so apparent he was urged by leading lawyers of both political parties upon the Whig Governor Cooper for the position of associate justice in 1846. Political lines in Delaware then, as now, were so tightly drawn that the Governor would not go outside of them; but the next year, the new Governor, Tharp, appreciating the sentiment expressed the preceding year, appointed him to a vacancy on the bench. His appointment gave general satisfaction to

John W. Norton

his brethren at the bar and to the public, who had long honored him for his vast fund of legal knowledge. His decisions were sound, and his knowledge of the law was equal to any of his cotemporaries of his forty years' service. He had a wonderful memory. He had but to read or hear a fact and it was stamped indelibly upon his mind. In addition to his service upon the bench, he was, for thirty years, a trustee of the Georgetown Academy, for sixteen years a director of the Farmers' Bank of Delaware at Georgetown and also a vestryman and senior warden of the Protestant Episcopal Church. He died of pneumonia, at his residence in Georgetown, March 1, 1887, after a short illness of one week. The cold was contracted from an open window, while riding on the cars from Wilmington to Georgetown, upon returning from sitting in court at the former place.

At a meeting of the bar, held at Dover after his death, Chief Justice Comegys said, among other things: "He had had the honor of sitting with him for eleven years, and in all that time he never beheld in him the slightest disposition to avoid any performance of duty, nor weakness of purpose to do exact justice." He spoke of his excellent and remarkable accurate knowledge of the law and his uncommon recollections of decisions made by the courts and of all matters and details pertaining to the administration of justice. His funeral was largely attended by State officials and members of the bar; a special train was run from Wilmington and Dover. He was buried beside his wife, in the cemetery of St. George's Chapel, Indian River Hundred. He was married, in June, 1833, to Mary, the daughter of Judge Peter Robinson. Alfred P. R. Wootten was the only son of this marriage. Mrs. Wootten died June 3, 1877.

Hon. John Wallace Houston, one of the judges of the courts of the State of Delaware, was born at Concord, Sussex County, May 4, 1814. His grandfather, Robert Houston, was a man of great strength of character, was highly respected, and lived a noble and exemplary life. He was chosen one of the commissioners to establish the county-seat of Sussex County, but died in 1791 of yellow fever, contracted in Baltimore before the task was completed. The Houston family is of Scotch descent, and the original American ancestors emigrated to New York, which city has a street named in honor of one of them. The family branched off, some settling in Pennsylvania, and others in Delaware and North Carolina, and their descendants in Tennessee and Texas. Of that branch was General Samuel Houston, the hero of the battle of San Jacinto, the crowning victory in the war for Texan independence from Mexico.

John Houston, the father of Judge Houston, was a merchant at Concord. He was also the owner of vessels engaged in the coasting trade and in the trade of the city of Baltimore. He was married to Elizabeth, daughter of Cornelius Wiltbank, who lived by the Broadkill River, on lands which he in-

herited in direct succession from Helmanus Wiltbank, one of the first Dutch settlers on the Delaware. Helmanus Wiltbank was sheriff of the Dutch Court at Hornkill (now Lewes), and subsequently was one of the justices of the court under the government of the Duke of York. He obtained patents for several large tracts of land on the Broadkill, near Lewes, before the duke's deed of feoffment to William Penn for the three lower counties was given, and before Penn had obtained letters patent from the King for the province of Pennsylvania. He died in 1695.

The preparatory education of Judge Houston was acquired in the schools of his native village, and at an early age he went to the Newark Academy, where he was prepared for college. In 1830 he entered Yale, where he remained four years, completing the course in 1834. He is now the oldest representative of that honored institution in Delaware. The class with which he graduated had less than eighty members, forty of whom were living and engaged in the active duties of life in 1874, or forty years after graduation. Being thoroughly equipped for the study of one of the learned professions, he decided upon the law, and, immediately after leaving college, entered the office of Hon. John M. Clayton, then one of the most eminent statesmen of this country, and in the height of his power and influence in the State of Delaware, being a member of the United States Senate. After three years of diligent and well-directed study he was admitted to the bar and settled in Dover for practice. He remained there two years, and then moved to Georgetown, where he soon acquired a lucrative practice. His leisure time was spent in reading and more thoroughly preparing himself for his profession, thus laying a broad and deep foundation for the superstructure of after years. By this means he soon won prominence at the bar. His solid attainments and real worth brought him conspicuously before the people of his native State.

In 1841, at the early age of twenty-seven, Governor Cooper appointed him Secretary of State, and he filled the constitutional term of four years with great acceptability.

Being an ardent Whig in the days of the ascendancy of that party, and a forcible and fluent speaker, Mr. Houston entered the field of politics with an energy and devotion of purpose that commanded the attention of the public in general, and the party of whose principles he was an earnest advocate. He made numerous speeches during the political campaigns that followed. In 1844 he was nominated by the Whig party, and elected the representative in Congress from Delaware. His course being approved, he was re-elected in 1846 and 1848, serving three successive terms before he had completed his thirty-sixth year.

His interest in political affairs was first particularly awakened while preparing for college, during what is termed "the nullification era," by reading the speeches of Mr. Webster and others on Foote's reso-

lution in regard to the public lands in the Senate of the United States, and entering college not long afterwards, where the heresy of nullification found too much favor, as he thought, among some of his Southern classmates, and was not unfrequently earnestly advocated by them, he soon became so strongly impressed with a presentiment that he would live to see the danger then menacing the integrity of the Union from that doctrine culminate in a civil war in the Southern States, that it never entirely left his mind until after the occurrence of the apprehended calamity in 1861, on the election of Mr. Lincoln to the office of President of the United States. And it was only strengthened and confirmed by observation and experience during his six years' service in Congress, and after he had retired from party and political life and became one of the judges of the State. And the following reminiscence connected with Hon. John M. Clayton, only a week or two before his death, will serve to show how strong and abiding it remained in his mind down to the year 1856. It was during his last ride on a pleasant day, in the vicinity of Dover with Mr. Clayton, who had been in very feeble health so long as to abandon all hopes of recovery, and, although very despondent and unusually depressed in spirit, he soon turned his thoughts and conversation on the condition and prospects of the country. He was then a member of the Senate of the United States, and said that until Colonel Benton had failed to be re-elected to that body after thirty years of continuous service in it at the last Senatorial election in Missouri, he had entertained a hope that they would together be able to avert in it any danger of a civil war that might seriously threaten the country. But with his loss of a seat in the body, and his own declining health, he had abandoned the hope forever, and was now convinced that civil war in this country was inevitable and must come. But it would not come in his day, for he had not many more days to live, but come it must, and when he contemplated the magnitude and horrors of such a fratricidal conflict in this country, and the great extent of it, which was too large for such a form of government, he thought it would be better to peacefully acquiesce in the threatened separation of it. Judge Houston, with equal gravity and solemnity, replied that it was in vain to think of or hope for the peaceful dissolution of the Union, or secession of any State or States from it; that he considered was utterly impracticable. That he sincerely hoped that his dear and venerated friend, Mr. Clayton, might be spared many more years for the benefit and welfare of the country, but for himself he felt compelled to say that he had been convinced by a firm presentiment ever since his first year at their common *alma mater*, Yale College, that he would live to see the effort made, even at the hazard and expense of civil war, to dissolve the Union, and though you may not live to see it, he would live not only to see it, but also to see it signally defeated by the strong arm of the government

and the invincible and uncompromising devotion of a vast majority of the people to the Union of the States.

In 1851, after the completion of his last term in Congress, Mr. Houston turned his entire attention to his chosen profession and was recognized as an able lawyer. His legal acquirements were thorough and exhaustive. Five more years of successful practice followed, and on May 4, 1855, he was elevated to the bench as associate judge of the State of Delaware resident in Kent County, a position which he has since continuously filled, a period of thirty-two years. His long judicial career has been marked and prominent. Many important cases have come before him for decision, on which his opinions are now quoted as authority in the practice of law in Delaware and throughout the country. Judge Houston is *ex-officio* reporter of the judicial decisions of the courts of Delaware, and six volumes known as "Houston's Reports" have appeared.

By industry and devotion to business, by fairness and impartiality in looking at both sides of every case, and by his courtesy of manner to the members of the bar and to all who come in contact with him, Judge Houston has given great satisfaction, and in his official position has enjoyed the highest respect of the people of the State. In the days of his political prominence in Delaware he exerted a controlling influence in public affairs, but he is a believer in a non-partisan judiciary, and as a judge on the bench his rulings and decisions are noted for their candor, impartiality and ability.

Judge Houston has a great fondness for the ancient and modern classics. He has diligently studied the works of the greatest English and American poets, and prose writers, and has thus acquired an excellent *belles-lettres* taste. In 1861 he was elected by the Legislature a delegate from Delaware to the memorable Peace Congress which met in Washington City.

Soon after his return home from the Peace Conference at Washington he was formally invited to attend the opening of the Mechanics' Institute in Wilmington, Delaware, then recently completed, and to address the public on the occasion, and as he had so lately left that body and the city of Washington with a sad and painful conviction that the country was then on the verge of a gigantic civil war, it naturally became the sole and absorbing subject of his remarks on the occasion. Such a war he considered was absolutely inevitable, for which every one who properly appreciated the transcendent value of the Constitution and Union of the States should be prepared to take his stand in support of them, without distinction of class, sect, vocation or political party. For in the result of it would be shown whether such a free, popular and republican form of government, founded not in force, but in compact, as ours, and hitherto sustained by the enlightened patriotism and devotion of its citizens to its best interests, and their pride in its glory and prosperity,

possesses the inherent strength, which it was more important that such a government should possess than any other form of government, to maintain and successfully enforce all of its rightful powers and authority in such an extraordinary emergency, and what that important demonstration shall be in this momentous exigency will depend on the manner in which it is supported and sustained by every true and patriotic friend of the Union through the struggle to preserve and perpetuate it on the part of the government, by giving their earnest and cordial support to it.

"If it should prove equal to this great emergency, as, with my faith in Divine Providence and trust in the patriotism of my fellow-countrymen, I believe it will, then it will have conclusively demonstrated to the world that it possesses in common with other and less liberal forms of government, an inherent strength and stability, even in such a stupendous crisis in its history, which too many in our own, as well as in other countries, have been slow to believe in. If he was not mistaken, the question thus presented of the dissolution or preservation of the Union by contending armies on the field of battle, will soon rise high above all other questions or matters of consideration, and while it will have the effect to unite the people of the seceding States in favor of their hopeless cause, it will at the same time have the effect to unite the people of all the other States in the cause of the Union and the government to which it is committed by the Constitution. The great inequality in the two divisions of the republic of the United States as here presented to us, in point of population, power, wealth and all the resources that can best fit contending States for an appeal to that ultimate resort of nations for the redress of either real or imaginary wrongs,—the arbitrament of arms,—would seem in itself to be sufficient to satisfy any reasonable person that whatever may be the vicissitudes or the fluctuations of fortune either way attending the prosecution of military operations pending such a war, that it can in the end have but one result, and as both ancient and modern history, down even to the time of the great Napoleon and the last of his twenty years of wars and victories, clearly shows that the fortune of war generally favors the side which brings and combines the strongest battalions on the field of battle, and always decides in favor of the belligerent party who is able to maintain the war the longest, and in the end to bring the greatest number of men into the field against the other. Whatever, therefore, may be the dread or solicitude with which any of us may contemplate the coming conflict, let no man despair of the republic, or of the ultimate victory of the Union and the Constitution in it. But with all this overwhelming inequality against the seceding section of the Union, he would not overlook or underrate the magnitude of the obligation and undertaking thus imposed upon the country and the government, or the skill and courage,

resolution, or even the fanaticism of bravery with which the gallant, but misled and mistaken, men of that section will wage the horrible conflict which they are so rashly rushing into and forcing upon the country. The insane ardor and overweening confidence in their ability to achieve their separation from the Union, and to establish an independent sovereignty of their own in the United States, as well as their true policy, will, of course, impel them and their constituted authorities, both civil and military, to strive to make the war of as short duration as possible, and, as may well be expected, their achievements and auguries of success will be best and most encouraging in the commencement of it, and this will only the sooner exhaust the resources of the war in that region and lead to the conclusion of it. But he did not think it would last less or much longer than four years; for his idea was that before that time had elapsed the South would discover the utter hopelessness of their efforts, and as a last resort would only seek to protract it until the next Presidential election, with the hope and expectation upon a change of administration their chances would be increased for obtaining a more favorable accommodation with the government on finally making their submission to the inevitable doom of the struggle. And if Mr. Lincoln and his administration should succeed in accomplishing no more than they all might reasonably hope for and expect of it under the circumstances, he would venture to predict, if Mr. Lincoln lived until that time, that he would be re-elected President of the United States, and that would, in effect, close the colossal conflict, and would, at the same time, constitute the crowning victory of the Constitution over the most formidable and insane assault that has ever been made against it.

"As to the expense of all this, he was content to compute the number of Union soldiers required for the exigency at not less than one million of men. As to its prodigious cost in life and treasure and debt to the country, he would not attempt to estimate it in dollars and cents; but would only say that in his judgment the salvation of the Union would be well worth it all, for, if saved, all except the irreparable loss of the gallant thousands who must die to save it, will, in due time, be repaired and paid; but if lost, what imagination can conceive or measure the decay, ruin and desolation that must ensue in this country?"

In 1878 Judge Houston, by request, prepared and read, before the State Historical Society, a learned and exhaustive paper, on the boundary lines between Delaware and each of its adjoining States.

The late Hon. Wm. G. Whiteley was upon the bench as associate judge from his appointment, March 31, 1884, to his death, in April, 1886. He was born near Newark, August 7, 1819, and was a son of Henry and Catharine Whiteley, both from Maryland. He was educated at Delaware College and Princeton, graduating from the latter in 1838. He commenced the

study of law, the same year, in the office of James A. Bayard (2d) and was admitted to practice in 1841. He followed his profession successfully and unremittingly in Wilmington until 1852, when he was appointed prothonotary, which necessitated his removal to New Castle. In 1856 he was nominated by the Democratic party as their candidate for Congress, and elected. Two years later he was re-elected and his second term expired March 4, 1861. He then resumed the practice of law, and after the close of the war removed to Wilmington, where he resided until his death. He was mayor of the city from 1875 to 1878, and one of the most popular incumbents of the office that the city ever had. He was one of the commissioners appointed to arbitrate the territorial controversy between Delaware and New Jersey. He was an active politician and a leader of the Democratic party. Judge Whiteley had a strong love for local history and was probably more familiar with the annals of the city and State in which he lived than any other citizen. He wrote an account of the Delaware soldiers in the War of the Revolution, which exhibits much research as well as grace of style, and he had a large mass of valuable historical notes which he would doubtless have used had his life been spared a few years longer. Judge Whiteley was a man endowed with solid intellectual faculties, coupled with the most attractive qualities of the human heart, and he had a very strong hold upon the affections of the people. He was popular alike as man, as lawyer, as judge, and in all of his official relations to the public was respected for the ability and conscience he possessed. He died April 23, 1886, and his remains were interred at Bridgeton, N. J. He was married, June 13, 1844, to Nancy P., daughter of the late Dr. William Elmer, of Bridgeton. Their surviving children are Margaret Potter (wife of Lewis P. Bush, Jr.), Henry, William and Charles E. E. Whiteley.

Hon. Ignatius C. Grubb, associate judge for the State of Delaware, resident in New Castle County, was born April 12, 1841, at Grubb's Landing, Brandywine Hundred, New Castle County, Delaware, in the old homestead of his family, known as "Stockdales," which had been in the continuous possession of his paternal ancestors from the time of the original Penn conveyance. His ancestors, therefore, were among the earliest colonial settlers, and were of English lineage.

John Grubb, the first of the family to settle in this country, came from Cornwall, England, to Upland (now Chester), Pennsylvania, where he purchased lands in 1679, three years before William Penn's arrival, and there is reason to believe that he had been upon the New Jersey shore of the river a few years earlier. From this pioneer are descended those of his name in Delaware, New Jersey and Pennsylvania, and the subject of this sketch is the lineal descendant of his eldest son, Emanuel Grubb, said, in the early histories of the colony,

to have been the first male child born of English parents in the province of Pennsylvania. Emanuel Grubb is known to have settled about 1699 at Grubb's Landing, Delaware, where he purchased lands, became prominent and influential, and was, in the first year of the reign of George II., commissioned one of the colonial justices to hold the courts of Common Pleas, Oyer and Terminer, etc.

Ignatius C. Grubb in 1848 removed to Wilmington with his parents, and has since resided there. He received a classical education at the Delaware Academy, under the direction of Colonel Theodore Hyatt, late president of the Pennsylvania Military Academy at Chester. He read law under the preceptorship of his guardian, Victor Du Pont, Esq., one of the leading lawyers of Wilmington, and was admitted to the bar of Delaware in November, 1862, and since that time has been actively engaged in the practice of his profession and in political and public affairs. Despite the fact that the prominence of political and official life frequently eclipses the quieter activities of professional life, Judge Grubb's career as a lawyer has contained much to command appreciation and respect. Prominent among his successful efforts were his able arguments in the Ninth Ward and the Water Commission mandamus cases before the Court of Errors and Appeals. To his legal investigation and judgment is due the adjustment of the trouble during Governor Cochran's term, respecting the Delaware-New Jersey boundary line within the "Twelve-Mile Circle," which at that time made an appeal to armed force imminent between the fishermen of the two States. Judge Grubb, then Secretary of State, as Governor Cochran's legal adviser, in a joint conference in Philadelphia with Governor Bedle and the attorney-general of New Jersey, suggested, as the only practicable plan for the solution of the then pending trouble, that the State of New Jersey file a bill in equity in the United States Supreme Court, to have the boundary line established and in the mean time have a preliminary injunction laid upon the State of Delaware, restraining its officers, agents, etc., from interfering with the rights of the citizens of New Jersey to fish within the circular boundary, etc.; all of which was done and is still pending, awaiting the determination of the Supreme Court.

The most notable, however, of all Judge Grubb's public actions was that in connection with what was known as the "Grubb Representation Amendment" to the State Constitution, devised and advocated by him as a possible compromise, for the present, of the differences existing between New Castle County and Kent and Sussex respecting the former's rightful claim to increased representation in the Legislature. This representation amendment to the Constitution was cordially supported by Governor Stockley and all the ablest leaders of his party, in and out of the Legislature, and was proposed by more than a three-fourths vote of the General Assembly of 1883 for ratification by the Legislature to be elected in 1884.

James C. Smith

son of James A. Garfield, and the only son of the late President and Vice-President of the United States, when he was appointed to the position of associate justice of the Supreme Court of the United States in 1901. He then resided in the city of Washington, D.C., for the close of the year 1901, and he then resided until the year 1902 in the city of New York, where he resided until the year 1903, when he was one of the commissioners to negotiate the territorial compact between the State of New Jersey and the State of Delaware. He was a member of the Democratic Party, and he had a very strong love for his country, and he was particularly proud of the fact that he was a native-born citizen of the State of Delaware, in which he was born and bred. He wrote an account of the life of his father, James A. Garfield, and he wrote a book on the life of his mother, Julia Garfield, and he wrote a book on the life of his father-in-law, William Brewster, and he wrote a book on the life of his mother-in-law, Julia Brewster. He was a very successful lawyer, and he was a very successful politician, and he was a very successful statesman. He was a very successful man in every way, and he was a very successful citizen of the State of Delaware.

Hon. Jeremiah C. Garfield, associate judge for the State of Delaware, and chief justice of New Castle County, was born April 14, 1841, at Garfield's Landing, Brandywine Township, New Castle County, Delaware, on the eastern end of his father's farm, known as "the domain," which had been in the continuous possession of his father's ancestors from the time of the original Pennsylvanian settlement. His ancestors, therefore, were among the earliest colonial settlers, and were of English lineage.

John Garfield, the first of the family to settle in this country, came from Canton, England, to Philadelphia, Pennsylvania, where he purchased three acres of land, three years before William Penn's arrival, and there is reason to believe that he had been on the New Jersey shore of the Delaware River. From this point he came to the city of Philadelphia, and he followed New Jersey and Pennsylvania, and he was one of the first settlers of this section of the country. He was a very successful man in every way, and he was a very successful citizen of the State of Delaware.

and he was one of the first settlers of the State of Delaware, and he was a very successful man in every way, and he was a very successful citizen of the State of Delaware. He was a very successful lawyer, and he was a very successful politician, and he was a very successful statesman. He was a very successful man in every way, and he was a very successful citizen of the State of Delaware.

Jeremiah C. Garfield, an 1868 removal from the city of Philadelphia, and his father-in-law, received a classical education at the Academy, under the direction of the Hon. Hyatt, late president of the Pennsylvania Academy at Chester. He read law under the tutelage of his guardian, Judge Garfield, and he was one of the leading lawyers in Wilmington, and he was to the State of Delaware in November, 1868, and at that time he had been actively engaged in his profession and in political life. Despite the fact that the family had not officially been admitted to the bar, and his professional life, Judge Garfield's career has done a much to the State of Delaware, and he was a very successful man in every way, and he was a very successful citizen of the State of Delaware. He was a very successful lawyer, and he was a very successful politician, and he was a very successful statesman. He was a very successful man in every way, and he was a very successful citizen of the State of Delaware.

The most notable, however, of the Garfield family was that in 1868, when he was known as the "Grain People," and he was a very successful man in every way, and he was a very successful citizen of the State of Delaware. He was a very successful lawyer, and he was a very successful politician, and he was a very successful statesman. He was a very successful man in every way, and he was a very successful citizen of the State of Delaware.

Inspector C. G. Smith

During the campaign of 1884 Mr. Grubb was selected by the leaders of his party to make the argument before the people in support of his amendment. He had the satisfaction of carrying the election upon this issue by a decisive majority against the most determined and strenuous efforts of its opponents. Having achieved a triumphant success at the polls, after having previously secured the unanimous indorsement of the measure by the Democratic State Convention of 1884, he confidently left the ratification of the amendment and the realization of his county's hopes to the solid Democratic legislative delegation from New Castle County, and to the members from the other counties elected under the pledge of their State Convention to ratify the same. But, owing to the lukewarmness of some and the defection of others, his own successful efforts were rendered futile by the failure of the Legislature to ratify the amendment, and thus the nearest approach ever made towards an increase of representation for New Castle County was defeated for lack of but one vote in the House of Representatives of 1885.

From his earliest manhood he had been an ardent Democrat, and, until his elevation to the bench, an untiring laborer for the success of his party, especially in State and national issues, and, in recognition of his conspicuous services and personal qualifications, numerous positions of trust and emolument have been conferred upon him. In 1867 he was elected clerk of the Delaware House of Representatives. In 1869 he was appointed deputy attorney-general of the State for New Castle County by the Hon. John H. Paynter, attorney-general, and held the position until the latter resigned his office because of a constitutional disqualification. In 1871 he was elected city solicitor, or corporation counsel for the city of Wilmington, *vice* Samuel M. Harrington, whose term had expired. During the summer and fall of 1874 he was prominent and influential in shaping the events which led to the nomination and election of Hon. John P. Cochran as Governor of Delaware, and in express recognition of his valuable services was by him appointed Secretary of State January 19, 1875, and filled the office until the close of his term in 1879, zealously and efficiently supporting the Governor in the various public measures which distinguished his administration.

While Secretary of State he exhibited an especial interest in the public-school system of the State as a member of the State School Board, also in the reduction of taxation and the decrease of the State debt, and was active in the advancement of all measures tending towards the improvement and permanent welfare of the State and its institutions.

In February, 1879, he was appointed a member of the National Democratic Campaign Committee, created to take the place of the Congressional Committee. In June, 1880, was appointed by the Cincinnati Convention as the Delaware member of the Democratic National Committee, and, in July, 1884,

re-appointed by the Chicago Convention. In 1884, finding that his health had been impaired by the severe labor of his professional and public life, he sought, for the sake of temporary partial rest from these, the office of register of wills for New Castle County, to which he was appointed by Governor Stockley in October of that year. While holding this office he was appointed by Governor Stockley, May 25, 1886, to the position of associate judge for the State of Delaware, resident in New Castle County, which he now holds, as the successor of the late Hon. William G. Whiteley. Judge Grubb has thus had experience practically in the three departments of civil government—the legislative, executive and judicial—and it may be truly said that he has proven himself fully adequate to perform the duties of every position to which he has been called.

John Henry Paynter was born in the city of New York on the 26th day of February, 1838, whilst his father was a temporary resident of that city, engaged in a large grain commission business. He is descended from one of the oldest Delaware families, and his ancestors have ever been prominent in the political councils of the State. His father, Samuel R. Paynter, was a successful merchant of Sussex County, and the son of Governor Samuel Paynter. His mother was Sallie A., daughter of Caleb Ross, and the sister of Governor William H. Ross.

The subject of this sketch removed to Laurel, Delaware, with his parents in 1842, and in 1844 to the Drawbridge in Sussex County, where his father carried on a heavy mercantile business, embracing large speculations in grain, wood and bark, and the building of vessels. He received his primary education at the best schools of Laurel, Milton and Georgetown. In the spring of 1853 he was sent by his mother (his father having died in 1851) to Newark Academy to complete his preparations for college. In the fall of 1854 he was admitted to the freshman class of Delaware College, and was appointed monitor of his class, which at that institution was an honor conferred by the faculty upon the student who passed the best examination. After completing his freshman year, in 1855 he was admitted to the sophomore class of Union College, Schenectady, N. Y., at that time presided over by Dr. Eliphalet Nott, with Dr. Laurens Hickok as vice-president, and John Foster, Isaac Jackson, Tayler Lewis and Prof. Gillespie in the faculty. After remaining at this institution three years he graduated with the degree of A. B. in 1858. In the spring of the same year he was registered as a student of law in Georgetown, under the Hon. Edward Wootten, one of the associate judges of the State of Delaware. After a three years course of reading under the rules of the court at that time, he was admitted to the bar at the April term of the Superior Court of Sussex County, in 1861. Immediately upon his admission he was appointed deputy attorney-general by Hon. Alfred R. Wootten, then attorney-general of the State, and was engaged in criminal prosecutions

for three years and until the attorney-general from whom he received the appointment died in 1864. During this period, in addition to the practical experience gained in the performance of his official duties, he extended the number of his acquaintances and friends, and took a very active part in the political contests of the State. He allied himself with the Democratic party, which was also the party of his ancestors and immediate family, and contributed both of his means and his labor to its success. Regarded by his party as one of their most effective speakers from the rostrum, he was always in demand during the exciting political contests of his State, and in 1866, when the Republican party made unusual exertions to carry the State, he was asked and consented to be a candidate for State Senator. After his nomination and election he took his seat in January, 1867, and was probably up to that time the youngest member who had ever occupied the position. Previous to his election it had been customary to choose for the place grave and gray-haired men of wealth, position and influence, and the selection of a young man barely eligible in age was a new departure in Delaware politics. His experience as a lawyer and an active politician served him in good stead in the State Senate, and during the sessions of 1867 and 1869 he served his constituents with signal ability, being an active and influential worker as well as a fluent and forcible speaker. He took an active, if not a leading part, in the debates, and was a member during both sessions of the Finance Committee, which had under consideration important revenue bills. A close student of parliamentary and constitutional law he attracted the attention of the State politicians, and in the fall of 1869 was appointed by Governor Saulesbury to the office of attorney-general of the State. His official term of State Senator had not then expired, and a question as to his eligibility to the attorney-general's office during his term as Senator was raised on account of a law passed at the preceding session of the Legislature, which technically increased the emoluments of the office, and though there was a serious question whether the law did virtually increase his salary, he resigned within three weeks after his appointment, giving as his reason that he was unwilling to hold a position where his right could even be questioned.

In the campaign of 1870 his voice was again heard upon the rostrum, and his labors as chairman of the Democratic County Central Committee of Sussex County resulted in an overwhelming victory to the Democratic party. In January, 1871, he was appointed by Governor Ponder to the office of secretary of State, which position he held for four years, to the end of the Governor's term, giving satisfaction to the appointing power and to the people. During this period he was employed by the Legislature, in company with James L. Wolcott, to draft the tax bills, which are still the statutes of the State, and from which most of the State revenues are derived.

During the session of 1871 the Legislature, in answer to a demand for the revision of the statute laws, appointed Mr. Paynter to perform the important and arduous labor. No codification had been made since 1852, a period of nearly twenty years, and the laws had become so altered and cut up by amendments, repeals and additional acts that it was almost impossible to tell what the exact law was. Upon the adjournment of the Legislature, Mr. Paynter, with the responsible and arduous duties of the secretary's office taking much of his time, and his legal and private business requiring much attention, betook himself to the laborious task imposed upon him of reducing the chaotic mass of statute law of the State to a codified system. Herculean as the task may appear he completed it in time to report to the Legislature of 1873. A joint committee from both Houses was appointed to examine the work, and reported it correct. The laws of 1873 were then ordered to be incorporated in the book and provisions made for its publication. In 1874 the book was issued from the press of the publisher under the name of the "Revised Code, 1852, as Amended &c., 1874." It has been accepted and used as the law of the State since that time, no important error having been found unless merely of a typographical nature, from which no publication can be absolutely free, and is a monument to the industry, legal acumen and sound discrimination of the compiler.

On the 4th day of June, 1872, Mr. Paynter was married to Miss Sallie Custis Wright, the daughter of Colonel Gardiner H. Wright, a prominent citizen of Georgetown. She died January 18, 1876, leaving to survive her one son, Rowland G. Paynter, who is still living.

In 1878 Mr. Paynter's name was prominent for the Congressional nomination, and he received a large vote in the convention for this honor, and in 1882 he was again a prominent candidate for the nomination of Governor. June 19, 1885, he married for a second wife Miss Hannah E. Stockley, daughter of Governor Charles C. Stockley, of Sussex County.

In April, 1885, he was again appointed to the office of attorney-general (which he had resigned in 1869) by Governor Stockley, and held the position for nearly two years, prosecuting during the time some very important cases, among which were the State *vs.* Becker, State *vs.* Robinson, State *vs.* Davis, and State *vs.* Falley. On the 25th of March, 1887, he resigned the office of attorney-general to accept the position of associate judge of the State, to which he had been appointed by Governor Biggs to fill the vacancy caused by the death of Judge Wootten. Though only holding the latter place a short time, he is gaining the confidence of both bench and bar by his cautious decisions, sound judgment and courteous judicial bearing.

In addition to Judge Paynter's professional and official labors he was five years (from 1881 to 1887) engaged in conducting a political newspaper in his

John A. D.

John H. Paynter

town. During this period he was editor-in-chief of the *Delaware Democrat*, and his editorials were noted for their strength of expression, their accurate and forcible presentation of party principles, and their honest, candid statement of facts. He has also been a contributor to the columns of other papers on political and other subjects. He was a member of the Democratic County Central Committee for ten years, from 1862 to 1872, and chairman of the same from 1868 to 1872, was a member of the Democratic County Convention in 1870 and 1880, was a delegate to the Democratic State Convention in 1860, 1866 and 1872, the latter of which he was chairman, and was elected a delegate to the Democratic National Convention in 1872, where he did everything in his power to defeat the nomination of Horace Greeley. Judge Paynter is held in high respect in Georgetown, where he resides, and enjoys the confidence and esteem of his neighbors and friends. His personal integrity has never been called in question, and his remarkable energy, industry and power of execution have always been the admiration of all. By those acquainted with his character and ability much high hopes are entertained of his future career in the exalted judicial position which he now occupies.

CHANCELLORS OF DELAWARE.—William Killen, first Chancellor of Delaware, was born in one of the northern counties of Ireland, in 1722. His parents were Scotch Presbyterians, who had settled in the north of Ireland. He himself was a thorough Presbyterian throughout life; so thorough that his faith seemed to be a second nature.

Mr. Killen came to this country, while quite a boy about 1737. He landed at Philadelphia, and thence went to Kent County on the Delaware, where he became an inmate of the family of Mr. Dickinson, father of the late John Dickinson, on his fine estate, near the Delaware Bay, which still bears the family name.

After a few years Wm. Killen became deputy surveyor of Kent County, under the proprietary government. An entry in his family Bible, in his hand writing, states that on the 10th of April, 1753, William Killen, "surveyor of lands," and Rebecca Allee were married. She died September 23d, 1773, in her thirty-seventh year.

Mr. Killen was admitted to the bar in Kent County, and was many years in practice. He was a man of sound legal mind and well instructed. His law library was judiciously chosen, indicating a man of reading and reflection. Under the State Constitution of 1776, he was appointed Chief Justice of the Supreme Court, which office he held until he became Chancellor under the Constitution of 1792.

Throughout the Revolutionary period Mr. Killen was a staunch Whig. He was then a member of the Committee of Public Safety for Kent. Afterward, under the division of parties in the State, he became a Democrat; and was as fixed and thorough in his

political sentiments as in his religious creed,—earnestly and actively supporting his party.

Under the new Constitution of 1792, it became necessary to reorganize the courts. The offices of Chief Justice of the Supreme Court and of the Court of Common Pleas became very important, from an accumulation of business after the war. It was of much public concern how, properly, to fill them. Richard Bassett, of Kent County, was settled upon as the most suitable person for Chief Justice of the Common Pleas; while such was the high estimation in which George Read, of New Castle, was held for ability and integrity, that his appointment as Chief Justice of the Supreme Court was deemed indispensable to the character and influence of the new judiciary. But Mr. Killen had previously been Chief Justice of the Supreme Court, and to take the office would, in appearance, be superseding him. To this Mr. Read would not consent. But the Chancellor was to be the official head of the new judiciary. To appoint Mr. Killen to that office would be a promotion; and in that case Mr. Read was willing to accept the office of Chief Justice of the Supreme Court. The party in power was strongly opposed to the party of which Mr. Killen had always been an uncompromising member. There were members of the party in power seeking the appointment of Chancellor; but Mr. Read was resolute, and Mr. Killen was appointed. The motive which influenced Mr. Read to this course was once stated by him, in a conversation with the late Judge Hall, from whom these recollections were obtained. Mr. Read said, that Mr. Killen had accepted the office of Chief Justice, and had discharged his duties with firmness, in dangerous times; if the mother country had succeeded in suppressing the rebellion, his life might have been the forfeit; his administration of the office had given general satisfaction; and he ought not to be cast off. This incident is certainly worth preserving; it is honorable alike to both the parties concerned.

The Court of Chancery was then a novelty in our judicial system. The bar had no experience or training for it. There was, therefore, very little business in it for years. The transfer of the Orphans' Court jurisdiction was not made from the Common Pleas to the Chancellor until the year 1802, when it was effected by an amendment of the Constitution of 1792, through the influence of Chancellor Ridgely.

Judge Hall, in some memoranda respecting this period, writes thus: "When I came to this State all knowledge of the decisions of the courts prior to the Constitution of 1792, seemed almost to have passed away. There were some written reports by members of the bar, made by them on private account; and of these only the decisions by Judge Read or of the High Court of Errors and Appeals, passed as authority—all these being after the Constitution of 1792, which, to the bar as I found it, seemed the birth-place of the judiciary. Edward Tilghman, Thomas McKean and Moses Levy, all distinguished in other

States, had practiced at our bar. George Read, James A. Bayard and Nicholas Van Dyke, leaders of our bar in 1803, were all young men when the Constitution of 1792 was formed."

Of Mr. Killen, as a chancellor, little is now known. The system was new, few cases arose for his adjudication, and no notes of his opinions remain. He resigned the office in December, 1801, understanding Nicholas Ridgely, then Attorney-General of the State, would be appointed to succeed him. Governor Hall had been elected by the Democratic party and was to come into office in the January following. Mr. Killen was censured for not deferring his resignation, so that Governor Hall might appoint his successor. His answer was, that he restored the office to the party from which he had received it, that he considered it his duty to do so, although himself a Democrat. Probably his knowledge that the appointment of Mr. Ridgely was the best that could be made, and the importance of making a good appointment, had a proper influence.

The last years of Mr. Killen's life were passed much in seclusion. He occupied himself, chiefly, in mathematical studies, retaining for them the fondness of his early life. He retained, in an extraordinary degree, the recollection of his general reading in former years. Judge Hall mentions that he in conversation with the Chancellor, in his old age, referred to the account of Palmyra, given in Gibbon's History, which he had just been reading. The chancellor, who had read the account many years before, related it with more minuteness, as the Judge says, than he himself could do.

Chancellor Killen died October 5th, 1803, and was buried in the Presbyterian church yard, in Dover.

Nicholas Ridgely was born at Dover, September 30th, 1762. He was the eldest son of Charles G. Ridgely, an eminent physician and highly respectable gentleman of the same place. After acquiring a liberal education, Mr. Ridgely adopted the law as his profession, and completed his studies under the direction of Robert Goldsborough, of Cambridge, Maryland. The unwearied industry and well-regulated mind of Mr. Ridgely soon overcame all difficulties in obtaining a knowledge of his profession; for we find him, while yet in the first flush of manhood, assuming a distinguished standing at the bar, as an able and sound lawyer; at a time, too, when the profession in Delaware was graced by the exhibition of the splendid talents of such men as James A. Bayard, Cesar A. Rodney and Nicholas Van Dyke, whose well earned fame as lawyers, orators and statesmen, has become alike the property and the care of the State and the nation.

In 1791, Mr. Ridgely received the appointment of Attorney General of the State, the duties of which office, during the term of ten years, he discharged with credit to himself and satisfaction to the public. He was also elected, in 1791, a delegate from Kent County, in the convention which formed the Constitu-

tion of 1792. During the whole period occupied by the two sessions of that body, he was found constantly at his post, and ever active in the discharge of his duties. Our country had just come successfully through its memorable struggle for independence, and was engaged in perfecting its forms of government, upon the liberal and enlightened principles for which it had been so long contending. The Convention of 1792 proved itself worthy the sacred trust reposed in it, and equal to the arduous and important duties with which it was charged. The Constitution then established remained in force during the period of forty years; and was considered, at least, equal to that of any other State. Its principal features still remain in force; although it has since been thought expedient to alter and modify some of its provisions with respect to the judiciary system, and a few other points, of minor importance. Mr. Ridgely, although, perhaps, the youngest man in the Convention, took at once a decidedly high standing in the deliberations of that body, and was among its most efficient members.

In 1792 he was elected under the new Constitution a Representative from the County of Kent, in the General Assembly of the State. The system of law, then in force, required to be newly modelled, to fit it to the principles established and brought about by the events of the Revolution,—a task requiring in the Legislature an intimate knowledge of the law as it existed, and of the changes necessary to be made, in order to effectuate the purpose above mentioned. And it will be found on examination of the proceedings of the Legislature of 1793, that the legal talents and enlightened understanding of Mr. Ridgely were mainly relied upon to perfect the system of Delaware law, in accordance with the genius of the new Government. Most of the laws, of a general and public nature, passed during that session, were framed and drawn by Mr. Ridgely, and were generally adopted without amendment. He was repeatedly afterward a member of the General Assembly, and invariably performed his duties with fidelity and ability.

In the year 1801 the Honorable William Killen, then Chancellor of the State, resigned his office; and Mr. Ridgely was appointed to succeed him. At that time the Chancellor, by virtue of that office, was also sole Judge of the Orphans' Court.

Chancellor Ridgely was looked upon with the highest respect by every member of the bar, who practiced in his courts. He was strictly impartial between them, and never suspected of the slightest bias, even in favor of his only brother, who had the care of many cases confided to him as solicitor, and which had to be determined by Mr. Ridgely in his character of judge.

Several years before Chancellor Ridgely's death he suffered considerably from ill health; but for the last two years of his life, his health seemed to have greatly improved; so much so, that his friends had hopes of his living many years longer. He, however, was under the impression, from his own feelings,

that he had long labored under an affection of the heart, probably aneurism, which he well knew often proved suddenly fatal. And this impression seems to have been well grounded, when we consider the manner of his death, which took place at Georgetown, in Sussex County, while he was there in the discharge of his official duties as Judge of the Orphans' Court, on the first day of April, 1830, under the following circumstances. He had been, all that day, and until some time in the night, laboriously and attentively engaged in hearing a case of appeal in the Orphans' Court,—in which, in pursuance of his usual course, he had taken full notes of the evidence and arguments of counsel. The Court was adjourned at about eight o'clock in the evening; he went to his inn, ate his supper, and after talking pleasantly some time with the family, retired to his chamber. A servant woman attended him with water, which he had ordered to his room; and as she departed, he informed her that he felt very unwell, and would be pleased to see Mr. Short, the landlord. The Rev. Mr. Higbee, a boarder in the house, whose room was next the Chancellor's, overhearing his complaint, immediately waited on him, offering his assistance; as also did Mr. Short. Every attention was bestowed upon him, but no relief could be afforded. The final summons had come; and he ceased to exist in less than half an hour from the time of first complaining—apparently suffering but little pain. His remains were brought to Dover, for interment; and he was buried in the Protestant Episcopal burying ground, near the remains of many of his family. A plain marble slab, upon which is simply inscribed his name, age, and the fact of his death while in the discharge of his official duties, points out the spot where his ashes are deposited. His body was followed to the grave by the largest concourse of friends and acquaintances ever known to attend, on a like occasion, in the County of Kent, thus evincing to the world the high estimation in which his memory was held by the community among whom he had passed his long and useful life.

During the whole period Mr. Ridgely was Chancellor of the State, he carefully took and preserved notes of all the cases argued and determined before him; which, together with his opinions in all causes of importance, were written out at length. From these it was his intention to make selections, with a view to the publication of several volumes of Chancery Reports. Had he lived only a few years longer it is probable the Bar would have been in the possession of a very valuable book for reference and authority, the want of which is now often felt and regretted.

In person Mr. Ridgely was about the common size—the cut of his coat was the same for fifty years; and he constantly wore short breeches with knee buckles and long fair top boots to correspond.

Kensey Johns, Sr., was born on West River, in Maryland, in 1759, and commenced the study of the

law with Samuel Chase, afterward a judge of the Supreme Court of the United States; but, before his admission to the bar, he removed to this State, and completed his legal education at New Castle, in the office of George Read. Mr. Johns married the daughter of Governor Van Dyke, and very soon, by his talents and position, he obtained a lucrative practice, and in a few years accumulated a handsome estate. Among the earlier proofs of the popular confidence in him was his election, as a delegate from New Castle County, to the convention called to form a new Constitution for the State. In this capacity he became the associate of Richard Bassett and Nicholas Ridgely, both of them distinguished in the judicial annals of Delaware; and, by his learning and experience as a lawyer, he essentially contributed in framing the Constitution of 1792, which still forms the basis of that system under which we have so long prospered as a State. As another mark of the distinction to which Mr. Johns had early attained, it may be mentioned that in March, 1794, he was appointed by the Governor (Dr. Clayton) to fill a vacancy in the Senate of the United States, occasioned by the resignation of George Read. It being the first instance when the question arose as to the power of the Executive to fill such a vacancy, it was determined that, a session of the Legislature having intervened after the vacancy occurred, the appointment was invalid. Mr. Johns, therefore, did not take the seat to which he was appointed. Notwithstanding Mr. Johns had attained to great success at the bar, he was induced to forego it and become an associate with Chief Justice Read, who had been appointed to that office in the Supreme Court under the new Constitution. There is reason to suppose that he did this at the suggestion of Mr. Read, for whom Mr. Johns entertained not only, in common with all others, the highest respect on account of his great learning and integrity, but also a warm regard, as the preceptor of his professional studies. It was also expected that he would succeed to the office of chief justice, which, in fact, he did upon the death of Mr. Read, in 1798. Mr. Johns thus became elevated to a position for which he was well fitted both by his learning and experience, and he continued to discharge its important duties with satisfaction to the people for more than thirty years,—a length of service seldom reached by a judge.

Upon the death of Chancellor Ridgely, in April, 1830, Chief Justice Johns was appointed, by Governor Hazzard, his successor. By his education and learning as a lawyer, by his gravity and dignity as a judge, and, above all, by his long experience as President of the Court of Errors and Appeals in all chancery causes, he possessed great advantages for this higher office; and he entered upon its duties with the approval of the profession, and discharged them to the satisfaction of all. He was now, however, becoming advanced in years; and upon the adoption of the amended Constitution of the State, in 1832,

he voluntarily withdrew from the excitements and labors of his long official career, to enjoy the quiet of private life. Chancellor Johns was a polished gentleman of the old school, being distinguished for his politeness, suavity and good breeding. He was an upright judge and, in all relations, a good man; and, having long and faithfully served the public in the most important stations of honor and trust, he quietly passed down the vale of years. He died, in the full possession of his mental faculties, in his ninetieth year.

Kensley Johns, Jr., was born in New Castle, in the year 1791, and graduated at Princeton College in the year 1810. He studied law with Nicholas Van Dyke, Esq., his maternal uncle, then one of the most distinguished members of the Bar of this State; and, after completing his studies in the law-school at Litchfield, Connecticut, was admitted to practice in 1813. He began his professional career under favorable auspices, and soon acquired a good standing at the bar. He was reputed a sound and able lawyer while yet a young man. Mr. Johns, after pursuing with increased reputation the practice of the law for several years, relaxed somewhat his attention to it and engaged in public life. He was selected, on account of his high professional and moral character, as a candidate for Congress, to fill the vacancy occasioned by the election of the Hon. Louis McLane to the Senate of the United States. He was elected, and afterwards re-elected to represent the State in Congress. In this position he upheld the dignity and honor of the State, and bore himself in such a manner as to enjoy the respect and good opinion of his most distinguished associates. After retiring from Congress he began anew his professional life, but was not long so engaged before a change in the Constitution of the State led to a reorganization of the judiciary. Then it was that his venerable father, who had filled the office of chancellor since the death of Chancellor Ridgely, proposed to retire; and the executive, acting in accordance with the wishes of the bar and of the people, conferred that high office upon the son, Kensley Johns, Jr. This position seemed well suited to the personal and professional character of Mr. Johns.

Chancellor Johns continued to perform his duties as an equity judge, and also as presiding judge of the Orphans' Court and of the Court of Errors and Appeals, for over twenty-five years, never failing to meet the engagements of every term by reason of voluntary absence, and very rarely from sickness. Like his predecessor, Chancellor Ridgely, he may be said to have died almost in the performance of official duty. He had been holding the term in Sussex, in March, 1857, from which he returned at the close of the week, and on the same day, March, 1857, under circumstances somewhat similar with those which attended the death of Chancellor Ridgely, and by a transition as sudden, he was called from the very midst of active life. It may be added that the chan-

cellor was not only a strictly moral and upright man, but he was also a conscientious and consistent Christian from his youth, and passed quite a long life of usefulness as a member of the Presbyterian Church, in New Castle, in the churchyard of which he was interred after his death, which occurred March 28, 1857.

Samuel Maxwell Harrington was born in Dover, Delaware, February 5th, A.D. 1803. On his father's side he was of English descent, on his mother's of German extraction. His academic studies were completed at Washington College, Maryland, of which Dr. Francis Waters was president. He was graduated in 1823, with the first honors of his class. During his minority the death of his father imposed upon him the charge of his mother and two sisters. His first public employment was in the office of the clerk of the Supreme Court of Kent County. By the invitation of Henry M. Ridgely, he entered into his office as a student; and, subsequently, finished his legal studies with Martin W. Bates. He was admitted an attorney of the Supreme Court at the October term, 1826. In 1828, upon the retirement of John M. Clayton, as Secretary of State, he was appointed his successor by Governor Polk, and was subsequently re-appointed by Governor Hazzard. A vacancy having occurred in the office of chief justice of the Supreme Court, Mr. Harrington was selected, in 1830, to fill that position; and, upon the abolition of the Supreme Court and the Court of Common Pleas, by the Constitution of 1831, he was appointed one of the associate judges of the Superior Court. Then, as now, the peculiarity of the judicial system of Delaware rendered the position of an associate judge exceptionally important, the administration of every branch of jurisprudence falling directly within his functions. In this situation he continued until April 3, 1855, when he was made chief justice, in place of James Booth, and occupied that station until May 4, 1857, when he was appointed chancellor, which place he held until his death, on Tuesday, November 28, 1865, at the Washington House, in the city of Philadelphia. From 1832 to 1855 he was the official reporter of the judicial decisions of the State. In 1849 he was appointed by the Legislature, in connection with Joseph P. Comegys and Daniel M. Bates, to revise the public statutes then in force, with general discretion to omit such provisions as they should consider unnecessary, and to vary whatsoever they might deem proper to render the general system consistent, or more perspicuous, or better adapted to circumstances. This delicate and responsible duty was faithfully performed by the commissioners; and the Revised Code was passed by the unanimous vote of both Houses of the Legislature, February 27, 1852. In 1853 the honorary degree of LL.D. was conferred upon him by Delaware College.

Without any extraordinary advantages of social or political influence, a career so remarkable could have been accomplished only by the manifestation of un-

Wm. L. G. L.
1850

usual merit. At a time when the bar was filled with lawyers of the highest eminence, that a practitioner of three years' standing should have been elevated to the dignity of chief justice of the Supreme Court, might reasonably have appeared a wanton experiment upon public forbearance; but that he should have maintained his position with credit, discharging its duties with admitted capacity, gaining public confidence and professional esteem, and steadily advancing to the attainment of the highest judicial station, amply vindicated the wisdom of his selection.

For the position of a judge he was by nature admirably adapted. With a mind reflective rather than suggestive, he was not prone to indulge in legal speculations, but was content to found his judgment upon the law as it had been established. The maxim, "*stare decisis*," which he adopted as the motto of his reports, constituted the index to his judicial character.

His whole life was a system of labor, and in this respect each day was but a repetition of the former. Stricken with paralysis, he was for two years almost prostrated; but so unconquerable was his determination to do something, that disease could not overcome it; and with him to cease to work was to cease to live.

In the midst of his judicial labors he was not forgetful of the material interests of the people. He found time to advance a system of internal improvements; and, intense in whatsoever he undertook, to him, perhaps, more than to any other, we are indebted for the completion of that line of travel and transportation which has done so much to enhance the value of our lands and develop the resources of the State. Had he effected nothing else, the Delaware Railroad ought to endear his memory to this people, and endure as a monument of his wisdom and perseverance in securing this instrument of their prosperity.

Though a judge, he was not unmindful of his duty as a citizen; and his views of the relation subsisting between the States and the national government induced him to take a decided stand with reference to the conflict that threatened the disruption of the Union. The measures of the administration for the suppression of the Rebellion found in him a warm supporter. He regarded secession as rank treason, and he had neither toleration for the act nor sympathy with the actors.

Thus faithful to his government, he did not neglect the higher obligations which he owed to his God. A member of the Methodist Episcopal Church, he was unobtrusive in his devotions and unostentatious in his piety. Acknowledging his dependence upon a Higher Power, he manifested, in his life, that his actions were governed by the principles of a religion which he was not ashamed to confess.

Daniel Moore Bates was born at Laurel, Delaware, January 28, 1821. He came from a line of pious an-

cestry, to whom was largely due the nurture and growth of the infant Methodist Church upon this peninsula. Throughout its length and breadth his grandfather, Elzey Moore, was known. Piety and length of days gave him almost saintly repute. His son, the Rev. Jacob Moore, was distinguished by energy, ardent piety and intellectual acumen. With these, unhappily, was combined a frail physique, inherited by the subject of this sketch. In those days a Methodist preacher traveled as ceaselessly as the Apostolic founders of the Church. At a very early age the Rev. Jacob Moore felt the powers of life giving away. His sole anxiety was for his motherless son, then eight years old, the constant companion of his travels. This was relieved by the Hon. Martin W. Bates, of Dover, and his wife.

Possessing warm hearts, large hospitality and some means, their home was truly a "Clergy-house" to all who sought its shelter. Kindly and eagerly this childless couple welcomed the bright, delicate boy to their hearts upon the death of his father. He had been christened Daniel Elzey Moore, but as he grew up he became known by the name of Bates, which was made his legal name by act of Assembly, and to the end of their lives he gave to his adopted parents the deepest filial devotion, counting any sacrifice light which enabled him to be with them, ministering aid and comfort to their declining years. For this end he left Wilmington in 1868, where he had been many years established, and did not quit Dover till the end of his father's life. This devotion was only the natural result of that bestowed upon the adopted son. Encouraged by his intellectual promise and won by his sweetness of disposition, the adopted parents resolved to give him every advantage.

He entered Dickinson College, having been prepared by the Rev. John Patton, D.D., at the early age of fourteen, graduating thence in 1839. From his *alma mater* he received not only the usual degree of A.M., three years after his graduation, but, in 1869, the honorary one of LL.D. After studying law in Dover he was admitted to the bar three years later, and, as the partner of his father, plunged at once into active practice of his profession.

In November, 1844, he married Margaret Handy, daughter of the late Isaac P. Smith, of Snow Hill, Maryland, and adopted daughter of her uncle, the late George Handy, of Philadelphia.

He gave his whole intellectual force to the study of his profession, which he regarded as one of the most honorable and useful which could engage the mind of man. Obligations to his clients were sacred. To them he gave the very best that was in him, with a persistent zeal often sadly detrimental to his health. He did not arrive at conclusions by brilliant flights of fancy, nor were courses of action suggested to him by rapid and uncertain flashes of inspiration. What he accomplished was by exhaustive labor. His mind was clear as crystal and of the first order of the analytical. Probably no lawyer has ever surpassed him in

the power of concentrating his mind without the loss of a moment upon any question which required attention. He was a rapid worker, doing more in an hour, often, than most men can accomplish in half a day. His peculiar facility of directing his mental forces enabled him to carry the burdens of a large practice at a time when his feeble health restricted his capacity for work to about four hours a day. The fundamental principles of the law were perfectly familiar to him, and his method of dealing with a case presented for his opinion, both at the bar and on the bench, was to apply to the facts the principles which were pertinent, and then, having reached his own conclusions, to test them by the examination of precedents and decided cases.

So thoroughly assured was his professional standing that, during the period of his active professional life, he appeared in most of the important cases tried in his own county and in the large majority of those from all the counties in the Court of Errors and Appeals. His own conception of the true function of his profession in a well-ordered social system was thus set forth by himself in a memorial address delivered shortly after the death of a leading member of the bar in these words:

"Think, for a moment, of the very serious relations which the legal profession bears to society and what important interests depend upon the character of its members.

"Consider, for one thing, the influence exercised by this comparatively small body of men in forming our civil institutions and the whole frame-work of our laws; and to how great an extent the courts and the bar are concerned in the administration of justice between man and man. Now, good laws, well administered, are the very bond of the social state. They are to society what the great law of gravitation is to the solar system, giving order and harmony, where, without them, all would be anarchy and chaos. It is, then, of momentous consequence that our laws and social institutions should be based on Christian principles and truth, purity and righteousness, and how far they will be so must depend greatly on the Christian character of the profession from whose hands, in so large a degree, they come to us.

"Again, lawyers are, in a substantial sense, the mediators of society. It belongs to the infirmity of our condition that controversies will continually arise between man and man in the manifold avenues of business, touching legal rights and legal responsibilities. From necessity, in every condition of civil life, there has been a class of men trained to represent these conflicting interests. How important that they be men of Christian integrity, purity and truthfulness! In the hands of worldly, sordid men the profession sinks to be a fomentor of strife and discord, but if it be controlled by Christian principle and imbued with Christian temper and spirit, it becomes the pacificator of society, adjusting needless controversies, and bringing to a right decision such controversies as are unavoidable. So conducted, the legal profession would help to fulfill the very mission of Christ, as announced at His birth, which was 'peace on earth, good will to men.'

"Another point to be here noticed is, that lawyers, to so large an extent, hold the confidence of men in matters deeply affecting their welfare. To very many, the lawyer becomes not only a legal adviser, but also a friend and confidant, as to many delicate and important interests. What a field of usefulness is here opened to a man of Christian sympathy, truth and fidelity!

"Once more,—from the influence of the profession, in the framing and administering of our laws, and from their position as advisers on so many questions of legal right and legal duty, it unavoidably results that on them depends not a little the standard of business integrity, whether it shall be high or low. And here, surely, is a point on which a controlling Christian influence within the profession is all important; that the dealing of common life may be raised up, not only to the standard of what the law requires, but even to that of the golden rule of the Gospel—the doing as one would be done by.

"But some one will say that these are touches of an ideal picture—that the profession does not fill any such large measure of usefulness—that it numbers in its ranks many unworthy members. This cannot be denied. But equally so do other professions fall below their ideal of excellence. There are hypocrites in the pulpit, quacks in medicine, as well as pettifoggers at law. In all human conditions and vocations the tares and wheat must grow together until the great Divider comes, who shall separate them in the judgment."

For four years, from January, 1847, Mr. Bates was Secretary of State, during which time, in 1849, he removed to Wilmington. Though conscientiously discharging the duties of this office, he was, above all things, a lawyer.

After thirteen years of arduous practice he made a short trip to Europe in 1855. Returning, he devoted his renewed strength with unfaltering zeal to his profession.

In 1849, by resolution of the General Assembly, passed February 28th of that year, he, with the late Chancellor Harrington and the present Chief Justice Comegys, formed a commission to revise and codify the laws of the State. Of this trust the three jurists acquitted themselves in such manner as to bestow a lasting benefit upon their State and confirm their own legal reputation.

In 1852 Mr. Bates was appointed by President Pierce United States district attorney for Delaware, which office, by reappointment of President Buchanan, he held till the close of his administration. He served as one of the five commissioners sent from Delaware to the Peace Congress at Washington, which, at its outset, sought to avert our Civil War. From this body he was chosen one of the committee of nine to prepare the plan of readjustment submitted to Congress.

In 1865, upon the death of Chancellor Harrington, he was found to be the unanimous choice of the bar of the State as his successor. He was accordingly appointed without demur by Governor Saulsbury, and more than fulfilled the high expectations formed upon his entrance to office.

Both mind and temper were eminently judicial. No judge was more conscientiously receptive of both sides of a controversy. His patience was unwearied and courtly. It will never be forgotten by those younger members of the bar, whom it encouraged and incited. Before so able and kindly a hearer they were capable of their best. Having performed the first duty of a judge in hearing his cause, he summoned his judicial powers to their work. These were always under control, apt to his command. He first stripped the subject of all that was extrinsic, as one would an ear of corn of its husks. Having, with trained and faultless instinct—the true genius of the judge—reached the core of the matter, he dealt with it in a manner pronounced, by as high authority as the Supreme Court of the United States, masterly.

It was a marked characteristic of his judicial career that he listened patiently to the arguments of counsel, even if, at the time, they impressed him as unsound, or upon a point not necessarily involved in the decision of the case. He firmly believed in the right of a suitor to have his counsel heard according to his own view of the case, and seldom interrupted an argument except to put a question, which was helpful to the lawyer, because it directed his argument to the precise point which required elucidation. After his retirement from the bench, in reply to a committee of the

1816.

Millard T. Loring

bar who called to present to him some resolutions passed on the occasion of his resignation, he expressed very informally his views upon the subject.

An extract from the report of his remarks upon that occasion will not be inappropriate here:

"He recognized the fact that the bench and the bar were dependent on each other,—were, in fact, parts of our system of the administration of justice, and that their mutual sympathy and co-operation were essential, both to the public interests and their own comfort and welfare. He was glad to acknowledge that he had received great assistance from the fact that the cases tried before him had been thoroughly and exhaustively presented and argued. It was impossible to over-estimate how essential an aid to the court are the arguments of counsel. The chief risk of erroneous decision arises from a judge's falling imperceptibly into a partial view of the case before him—a danger to which the strongest minds are liable. The best corrective of this tendency and the security against error is a patient attention to the views taken by the counsel from their different standpoints, so that no aspect of the case shall escape the attention of the judge."

To the pursuit of his profession and performance of his duties he had conscientiously sacrificed any extended gratification of his keen literary tastes. Owing to always uncertain health, he was obliged to forego those studies and pursuits which many professional men find so recreative and beneficial as aside from sterner duties, instead of these, giving himself to his profession with a whole-heartedness never excelled. Immediately upon his assumption of the duties of the chancellorship, he revised the rules and practice of his court, preparing a manual which has proved of great value to those engaged in the mazes of Chancery practice.

He returned to Wilmington after the death of his father, in 1869. In October of that year Mrs. Bates died, leaving four children, all of whom still survive. One son had died in infancy. In 1873 the chancellor's rapidly-failing health caused serious alarm. By the imperative advice of his physicians, he resigned his office and went to Europe with his family. For the first time in over thirty years his mind was free from professional cares and at liberty to seek its own gratifications. It eagerly sought recreation, when physical strength permitted, in the best in art and nature which the Old World offered, constantly preparing for fuller enjoyment by assiduous reading. His travels in Hungary were particularly delightful, and his letters from Italy were singularly interesting and reflected the keen intellectual enjoyment which he derived from his sojourn among the masterpieces of art in that country. He returned in the fall of 1875, so benefited, as his friends hoped, that a fuller and stronger life lay before him than he had hitherto enjoyed. For a time this was realized. Disdaining idleness, when not enforced, he set about collecting the Chancery Reports of Delaware, till then

existing only in mouldering, fragmentary manuscripts. He published two volumes, bringing the decisions up to his own time.

Feeling continued improvement in health and scarcely beyond a man's prime, in 1877 he partially returned to the active practice of his profession, purposing rather to be consulting counsel than active advocate in court.

Being called to Richmond for the argument of an important case in March, 1879, he left home in his usual health, which apparently continued for two weeks, but being taken suddenly ill, he died there on Friday, the 28th of the month. The sense of loss was expressed by the press throughout, and even beyond the State, by its bench and bar, and by personal friends in touchingly sincere tributes of unfeigned sorrow. He was a loss to the church, of which he had been a faultless, unswerving member from early childhood. His piety took root in the very fibres of his being. It was gentle, liberal, enlightened. Its only suspicion of lack of charity, its sole rigidity, was directed toward himself. In 1872 he represented Wilmington Conference in the General Convention at Brooklyn. The Delaware Bible Society missed his generous, cordial support, while the Delaware Historical Society lost in him its president, he having succeeded the venerable Judge Hall in both these offices. Many young men who studied law in his office looked to him as a safe mentor, whose wise counsels insured their success. His interest in the younger members of the bar was strikingly illustrated in a remark made by him on one occasion upon leaving the bench. After hearing an argument by a very young lawyer he said: "Nothing makes me so happy as to see the young men doing well." His concern for what might be termed the corporate interests of his profession never flagged. During his visit to Richmond, exactly one week before his death, he was advised by telegraph of the passage of the bill removing the courts of New Castle County to Wilmington. His response was characteristic: "The first hope excited by the news is that the bar may be inspired with a new spirit and enter upon a new course of self-improvement."

By his death the Democratic party lost an enlightened adherent, ably versed in Constitutional principles and Jeffersonian precepts. Though a strong party man and recognized leader, he was quite unsolicitous of political office.

Hon. Willard Saulsbury, Chancellor of the State of Delaware since 1873, and United States Senator from 1859 to 1871, was born in Mispillion Hundred, Kent County, Delaware, June 2, 1820. William Saulsbury, his father, was a man of strong character, sterling worth and commanding influence in the community where he lived. His mother, Margaret Saulsbury, was a daughter of Captain Thomas Smith. She was a most exemplary woman and possessed great mental power, a marked characteristic of her distinguished son, two of whose brothers, the late Dr. Gove Saulsbury, Governor of Delaware and Hon. Eli

Saulsbury, a senator in Congress, also attained a national reputation.

The early years of Chancellor Saulsbury were spent on his father's farm and the rudiments of his education acquired at the schools in the vicinity of his home. At thirteen he was sent to an academy at Denton, Caroline County, Maryland, remaining two years. He then spent one year as a student in Delaware College, at Newark, and one year at Dickinson College, Carlisle, Pa. At the age of twenty years he became a student-at-law under the direction of James M. Bartol, late Chief Justice of the Courts of Maryland, and completed his legal studies in the office of Hon. Martin W. Bates, being admitted to the bar at Dover, Delaware, in April, 1845. Immediately after his admission to practice Mr. Saulsbury opened a law office in Georgetown, the county-seat of Sussex, where, by his adaptability to his profession, his native energy and strong intellectual powers, he soon became the acknowledged leader of the Georgetown bar. By his studious habits he laid the foundation broad and deep for the solid superstructure of after years. He early became noted for the care and ability with which the legal business entrusted to him was managed, and as a natural consequence he made rapid progress in the ranks of his profession and soon became known throughout his native State, as an able advocate, an eloquent speaker and a young man of brilliant promise.

In 1850, five years after his admission to the bar, Governor Tharp appointed Mr. Saulsbury Attorney-General of Delaware. This position gave him an excellent opportunity to develop his strong natural powers. Being a quick and accurate judge of character, ready and skillful in the performance of legal duties and persuasive and convincing in argument, he filled the constitutional term of five years in that office with eminent satisfaction. He then returned to his practice. In the meantime he took an active interest in the politics of his State and nation and became the most conspicuous political orator in Delaware. He was a delegate, in 1856, to the National Democratic Convention which nominated James Buchanan for President of the United States.

In January 1859 he was elected by the Democratic party to the United States Senate. Nature gave to Senator Saulsbury, a powerful voice, a pleasing presence, strong physical constitution and a magnificent robust form. These qualities, together with a well-trained and well-stored mind and great powers of oratory, made him a conspicuous figure in Congress. He was able to cope in his oratorical encounters with the great intellectual lights of the Senate during that eventful period. With irresistible energy, keen powers of logic and great force of thought he opposed all measures which eventually caused the War for the Union. He discussed in the Senate many intricate questions during that crisis, producing arguments which, in the light of subsequent events, illustrated the greatest foresight and the most renowned patriotism. He was

re-elected to the United States Senate in 1865, and served in that body until 1871, a period of twelve years and then returned to his home in Georgetown. In 1874, he moved to Dover, where he now resides. Governor Ponder, on November 3, 1873, appointed him Chancellor of the State of Delaware, which office he has since filled with eminent ability. He is endowed with great versatility of powers and being deeply versed in the principles underlying the science of the law, his career as a jurist has been marked and prominent. When in the fullness of his intellectual vigor Chancellor Saulsbury has an extraordinary capacity for work, his mind operating with exceptional accuracy and quickness. He has been known to dictate to two persons at the same time on intricate and abstruse points of law, and keep both writing with rapidity. His greatest forensic efforts in the highest tribunal of the land when engaged in exciting intellectual combats, with the statesmen of the day were fortified with a vigorous style of argument, a clear and logical force of reasoning, and impassioned eloquence of expression that commanded the attention and admiration of all his hearers.

Chancellor Saulsbury was married May 11, 1850, to Miss Anna M. Ponder, daughter of Hon. John Ponder, a prominent merchant at Milton, Sussex County, and sister to the late Governor Ponder. The children of this marriage are: Hon. John P. Saulsbury, an attorney-at-law and now Secretary of the State of Delaware; Willard Saulsbury, Jr., an attorney in Wilmington, and Margaret, who died at the age of nineteen years.

JUDGES OF THE UNITED STATES DISTRICT COURT.—Gunning Bedford, the younger, appointed by Washington in 1789, as the first judge of the United States District Court for the District of Delaware, was of English descent, born in Philadelphia, in the year 1747, and a cousin of Governor Gunning Bedford, of Delaware. He graduated at Nassau Hall, Princeton College, in 1771, among his classmates being James Madison and Hugh M. Breckenridge. He was one of the first scholars of his class and probably the best speaker, for he was selected to deliver the valedictory oration at the commencement. He had previously been married to Miss Jane Ballaroux Parker, of New York, and his wife traveled to Princeton with her baby to witness her husband's triumph. On leaving college young Bedford studied law with Joseph Reed, an eminent attorney of Philadelphia, and having been admitted to the bar removed to Dover, Del., where he practiced successfully until the unhealthiness of that town compelled him to leave, when he took up his residence in Wilmington. "He was a handsome man," says William T. Read,¹ "and a very fluent and agreeable speaker, and the high place he gained in the esteem and confidence of his fellow-citizens was shown by the offices of trust and importance which he filled." He was attorney-gen-

¹ Life of George Read, appendix p. 810.

eral of the State, a member of the Assembly of Delaware, of the Continental Congress, from 1783 to 1787; a member of the convention which formed the Constitution of the United States and signer of that instrument, and it was largely through his efforts that Delaware, in common with Rhode Island and other small States, was put upon an equality with the large states in numerical representation in the United States Senate. Upon the organization of the government he was appointed Judge of the United States District Court, and he filled that high office honorably for himself and satisfactorily to the public until he was disabled by disease which terminated his life in 1812, in the sixty-fifth year of his age. He had several children, of whom the last surviving was Henrietta I. Bedford, who caused a handsome and enduring monument to be placed over her distinguished father's grave in the First Presbyterian Churchyard, in Wilmington, in the year 1858, and induced William T. Read to compose the epitaph which it bears.

Hon. John Fisher, the second son of Jabez and Elizabeth, was born near Lewes, in Sussex County, May 22, 1771.

His father having died when he was very young, his brother, General Thomas Fisher, some eight years his senior, gave him a classical education, and placed him under the tuition of their cousin, Joshua Fisher, Esq., of the Dover bar, to which John was admitted to practice in 1792, when barely twenty-one years old. Though he had not the advantage of a collegiate course of study, he was regarded by his brethren of the bar as a remarkably fine Latin and Greek scholar, and ranked high in his profession. He possessed a genius as well as a fine taste for poetry, and was, withal, a great wit and humorist. It was always a treat for the members of the learned professions in Dover to listen to the conversation of him and his next-door neighbor, Dr. Arthur Johns, and to enjoy their passages in wit and pleasantry. The story is to this day told and relished by the old inhabitants of the present day who knew them, that on a certain occasion when one of them had been discoursing on the marvelous wisdom of Solomon, the other rejoined by saying,—“Oh, yes; Solomon, no doubt, was a wonderfully wise man in his day and generation, but were he this day living in Kent County, he would not have been here a twelve-month before Isaac Davis would have held his judgment bond for all he was worth and a little more.” Davis was a man of great business tact and ability.

Mr. Fisher's first wife was Lavina Rodney, a niece of Caesar Rodney, the signer of the Declaration of Independence, by whom he had three children,—Rodney, Robert and Mary. Rodney Fisher was for a long time employed as a clerk in the old United States Bank. He afterwards went to China and engaged in the tea trade. On his return home he became a director in the Bank of Commerce at Philadelphia, where he died in 1863.

After the death of his first wife, John Fisher married Elizabeth Wilson (a cousin of his first wife), by whom he had quite a large family of children, only two of whom are still living—Albert and Louisa. These both reside in Philadelphia. He was an ardent Democrat of the old regime, and was appointed United States District Judge for the District of Delaware by President Madison in 1816. This position he filled with great fidelity and ability until September, 1823, when, at the age of fifty-two years, he died suddenly of gout at Claremont Farm, near Smyrna, and was buried in Christ Church Cemetery at Dover.

Willard Hall was born in the town of Westford, Middlesex County, and State of Massachusetts, on the 24th of December, 1780. His father, Willis Hall, was born and died in that town; his mother, Meheta-bel Poole, was of Hollis, New Hampshire.

He inherited from his ancestry a constitution singularly sound and vigorous in all its parts—physical, intellectual and moral. His entire organization—body, intellect, affections, conscience and will—was healthful, active, and symmetrical,—a remarkable example of the *mens sana in corpore sano*. His mother was of a highly-respected and influential family settled in Hollis, New Hampshire; her father, a deacon in the Congregational Church in that place. On the father's side, Judge Hall was connected with the family of the Willards, from whom he derived his Christian name, and probably the controlling elements of his character. This was an ancient English family, seated originally in the county of Kent as early as the Conquest. It is also noteworthy, as indicating the moral and religious elevation of this family, that from the period of the Reformation, in every generation, it gave some of its sons to the holy office.

The progenitors of the American family of Willards were a brother and sister, Simon and Margery Willard, who, in the year 1634, came to this country and settled in Cambridge, Mass. Margery Willard, from whom, in the fifth generation, sprang the subject of this sketch, became the wife of Captain Dolour Davis. Their only daughter, Ruth Davis, was married to Stephen Hall, whence came the surname of the deceased, who thus in his name represented the two families of Willard and Hall.

Of his school and college life few incidents remain to us. It was one of hardship, marked by the determination and struggles of a lad, conscious of strong mental capacities, to develop them, with inadequate means and against difficulties and discouragements.

As the boy grew, the academy at Westford, established mainly through his grandfather's efforts, held out hope to his maturing aspirations after an education. Here he remained two years, with such proficiency and promise as to enlist on the part of his preceptor, Levi Hedge, an interest which ripened into a never-forgotten friendship. At thirteen years of age (in 1794) he was examined

and received into the Freshman class at Harvard University. But from some unexplained cause, most likely prompted by that abhorrence of the superficial which through life was one of his marked characteristics, he seems to have reconsidered his plan. He returned to the academy at Westford and spent another year in preparation for the university course. He entered the Freshman class in 1795, and graduated in 1799.

Among his contemporaries at college were Horace Binney, William Ellery Channing, Joseph Story, Washington Allston, and Lemuel Shaw, not to speak of many of less note.

After graduating at Harvard, in March, 1800, he took his place as a law student in the office of Mr. Dana, then a practicing lawyer at Groton.

Of his proficiency in legal study, and his full qualification for the profession of his choice, the sequel affords, perhaps, the most impressive evidence; but it may not be amiss to record the testimony of Judge Dana, in a remark made to his pupil many years afterward. Said he, "When you left my office, I had not a misgiving concerning you. I was as confident of your success as a farmer is of a crop from a well-cultivated field."

After a three-years' course of study in Mr. Dana's office, in March, 1803, he was admitted to the bar of Hillsborough County, New Hampshire.

We reach now, in this rapid sketch, what is the critical period of a young man's career,—his first assumption of the responsibilities of manhood. He must seek a sphere of professional life more congenial to his nature. But where to find it? The question was perplexing.

While revolving in his mind the uncertain future, there fell under his eye a speech of that elder James A. Bayard, then in Congress, in which he represented the bar of Delaware as of high moral position, and the practice as reasonably remunerative. To use his own expression in a casual conversation, years ago, "he slept upon that speech." In the morning his determination was reached, and following his decision with that promptness of action which marked his life, he addressed to Mr. Bayard a letter so characteristic of the man, and so expressive of his situation, prospects, and impulses at this interesting crisis, as to warrant its preservation. Under date of October 9, 1802, at Groton, he thus addressed Mr. Bayard,—

"SIR,—Perhaps I intrude upon moments devoted to better purposes. Perhaps to comply with my request would be a waste of your time and attention. If so, pardon the presumption which urges a distant stranger thus to address you, and bestow not upon him that consideration to which he pretends no claim.

"I was born in Westford, in the commonwealth of Massachusetts; was educated at Harvard University, in Cambridge, and am now reading law with Samuel Dana, Esq., a gentleman with us eminent in his profession, probably to you unknown. In this part of the country three years' uninterrupted study completes a law education. By this rule I shall finish mine in March next, and shall in that month be admitted to the bar in this county. In this part of the country there are too many lawyers in proportion to the law business. This disproportion has

occasioned many low practices (among some lawyers) in a profession which I expected was worthy of the esteem and respect of society. On this account I shall seek some quarter where the prospects of the profession are more promising than with us. From some observations made by you on the floor of Congress, I have been induced to wish a settlement in the State of Delaware. The circumstances, prospects and encouragements of the profession in that State are the objects of my inquiries. I would request you, sir, to give me some information relative to these points by sending me an answer to this letter. You will thus assist a man to set out in life and confer a favor which may cost you little trouble, but which may do me great service, and which a grateful mind shall never forget.

"This request is made on the score of universal philanthropy. Compliance will lay an obligation on one from whom there is small prospect of return, and can have no reward but the reflection that you have increased the happiness of a brother of the human race, and added one to the number of those who bless God for giving you existence.

"I am, sir, with respect, yours

"WILLARD HALL."

"The gentlemanly and favorable answer of Mr. Bayard,"—so afterwards wrote Judge Hall of this incident,—"induced me to make choice of this State for prosecuting my profession." Judge Hall, on one occasion, thus testified his own appreciation of Mr. Bayard's high character: "His was not," writes the judge, "a noisy fame; but no man's was more solid. Those who knew him held him in the highest estimation,—a man of elevated principle and commanding intellectual power." . . . "Of the bar of his State he was the pride, and most justly; he was an ornament of that of the nation."

Admitted to the bar in New Hampshire in March, 1803, with no delay he left his father's house in Westford, April 7th, and, travelling the whole distance on horseback, he reached Wilmington, Delaware, on the 16th of the same month. Finding Mr. Bayard absent from home, in attendance upon the court in Georgetown, he pursued his journey to that place, where he was admitted an attorney and counsellor of that court, and in the following month of May settled at Dover for the practice of his profession.

As a counsellor at the bar, he became distinguished for his legal learning, sound judgment, and such fidelity to a trust as made the client's interest all his own. In argument, his method was to grasp firmly the governing principles of the case in hand and to present them lucidly and forcibly, compelling conviction. He has been represented by the elder lawyers as being, on occasions, eloquent; yet few, if any, had less of the common arts of oratory. His eloquence was that of an earnest mind, itself possessed by overmastering convictions, which, when great interests were at stake, expressed themselves without art under the promptings of a refined and cultivated nature, and commanded, as he always sought to do, not so much the applause of his hearers as their assent. In all professional transactions he was singularly painstaking, conscientious in devoting his whole energy to any business, without measuring its importance, and for one trait especially distinguished, viz., a marvellous faculty of being always ready. It was once the remark of the late Chancellor Ridgely, made

111

Willard Hall

from the bench, that he had never called a cause of Willard Hall's in which the answer was, "not ready." In 1812 he was appointed Secretary of State under Governor Haslett, which office he held during the Governor's term of three years. Soon afterwards, in 1816, he was elected, together with Louis McLane, to represent this State in the Congress of the United States; and he was re-elected to the same station in 1818. Congressional life was distasteful to him; so, after two terms, he declined a further service in Congress, and returned to professional life. In 1821 he was again appointed Secretary of State under Governor Collins. In 1822 he was elected a member of the State Senate; and on the 6th day of May, 1823, on the decease of Judge Fisher, he was appointed by President Monroe District Judge of the United States for Delaware District. Soon after this appointment he removed to Wilmington, where he resided until his decease. He retired from the profession, as he has himself expressed it, "wearied with twenty years' labors and anxieties; toiling, as he had, harder for his clients than they would work for themselves; and feeling more deeply than they felt for their own interests." To him the appointment brought relief from a profession harassing to a sensitive temperament, with a congenial employment for the future, and much leisure for maturing those plans of larger usefulness which he had already begun to meditate. To the office, the appointment brought a judge combining in a rare degree all the requisites of learning, exalted purity, dignity and the public confidence.

He held the office of District Judge through the exceptionally long term of forty-eight years, retiring from it in December, 1871, in his ninety-first year, with faculties still unimpaired, except that bodily infirmity had disabled him from protracted labor. His judicial administration was eminently conservative. Though possessing an exquisite sense of justice, and ever anxious to bring into harmony the law and the right of the cause before him, yet he was never known to warp the rules of law, much less to be drawn into the error of judicial legislation. It will be quite safe to add that no act of his long judicial administration encountered criticism save one. That was the discharge by him, in the year 1866, under a writ of *habeas corpus*, of certain prisoners held at Fort Delaware by the military authorities of the United States, under a conviction and sentence by a military commission, upon a charge of murder committed in the State of South Carolina. The murder was charged to have been committed upon soldiers of the United States army while in service; and on that ground, although the prisoners charged with the murder were themselves not soldiers, but citizens (three of the State of South Carolina and one of Georgia), and although the civil authority

had been re-established and the courts were open, they were held to be answerable to the military power. They were tried by a military commission in South Carolina, convicted, and sentenced to death. The sentence was commuted by the President of the United States to imprisonment for life at the Tortugas, and they were sent by his order to Fort Jefferson, in Florida. Thence, under another order from the War Department, the prisoners were removed, in August, 1866, to Fort Delaware. While there, in custody, relief for them was sought by a writ of *habeas corpus*, bringing them before Judge Hall.

Probably never in the history of constitutional government has the judicial function been subjected to a more severe trial than under the exigencies growing out of the late Rebellion, one of the marked instances of which was the case brought before Judge Hall. No citizen more highly than he estimated the value of the Union, nor more loyally sustained the government by all his influence in the struggle for its preservation, nor more heartily rejoiced in its final and complete success. Nor could he, with indifference, find himself placed officially in conflict with his government, nor be insensible to the gravity of the question. "I feel," he says, in announcing his opinion, "the peculiar burden of it." But he could neither fail to see nor shrink from declaring, that under the Constitution, which was the supreme law of the land, the persons before him, being citizens,—not belonging to the army or navy of the United States,—could not be held under sentence of a military commission, but were amenable for their crimes only to the civil tribunals. The dangerous assumption that for an alleged offense against soldiers they should be themselves the judges, while the civil courts were open for redress, was but a cobweb to his legal discrimination. "This assumption," he says, "is neither logical nor legal. In so small a body comparatively as the army, so associated, and united with so much in common, there must be an *esprit de corps* that, in cases of collisions with citizens, will not allow us to expect impartial justice, while the broad ground of citizenship is liable to no such objection." He then proceeds, with his wonted perspicuity and force, though at the close of his eighty-sixth year, thus to set forth the origin, scope and value of those safeguards so anxiously provided by the Constitution for the protection of the citizen against illegal acts of power. "Our government," he declares, "is a government of law, both National and State. This is its distinctive character, the element of its freedom, constituting its excellence, and insuring its permanence. The fundamental principle, upon which rests the objection taken for the prisoners to the cause of detention set forth in the return in this case, has come down to us from remote

times, marking as noble the men who asserted it, and exalting in historic estimation the generations in which it has been maintained. With the general principles of freedom it specially had occupied the minds of the extraordinary men contemporaneous with the original settlement of these States, and in subsequent times to and immediately following our Revolution; it led to this Revolution, gave it its form and spirit, and inspired the institutions growing out of it. It was diligently studied, under instructive experience, and carefully framed and embodied in the organic laws of the States of the Union,—the conventions of the people, when adopting the Constitution, exacting as a condition that the explicit assertion of this principle should be added to the original draft and established as fundamental law. We read it as thus established: 'No person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia when in actual service in time of war or public danger;' . . . 'nor be deprived of life, liberty, or property, without due process of law.' 'In all criminal prosecutions the accused shall enjoy the right to a speedy and public trial by an impartial jury of the State or district wherein the crime shall have been committed.' Such language, so used and sanctioned, cannot be a dead letter; such enactments must have force. They are where we find them, placed there with great deliberation, because the lights of experience had manifested that the people needed them for protection and safety." The enunciation of these principles—perhaps the most important within the range of constitutional law—was among the last acts, perhaps the last important act, of his judicial life; and, rightly considered, was its crowning glory. To the honor, be it added, of the Executive Department, it acquiesced in the authority of the Constitution judicially declared; and thus, so far at least as its action could go, it was shown that a great and powerful government, able to subdue armed rebellion against its just authority, could submit itself to the fundamental law which had created it and defined its powers.

The business of the District Court during Judge Hall's term of service was of limited amount. The draft from this source upon his attention was light, leaving him much leisure. But let it be noted that from his entrance upon the office until he was quite disabled by age, his leisure from judicial duty was devoted mainly to the service of the State in other fields of labor. To some of these we must now advert. In 1824, shortly after his appointment as judge, he was requested by the Legislature to revise and digest the statutes of the State. The work was completed in 1829, reducing six volumes to one octavo volume; and this so far

served the object proposed, that during the twenty-three years which elapsed before another revision was made, in 1852, it has been truly said that "not a difficulty in practice, nor a vexed question, nor a perplexity, was occasioned by the work." The Legislature, at its session in 1830, acknowledged the service by a vote of thanks to Judge Hall "for the very able and faithful manner in which he had acquitted himself of that important trust."

To another and perhaps higher trust he was called in the year 1831, by his election as a delegate from New Castle County in the convention convened to frame a new Constitution for the State. He received then a rare and impressive testimony of the universal confidence and high estimation of the people, in that for this, perhaps the highest of all political trusts, he was placed on the ticket of both parties and chosen without opposition. It was to the reconstruction of the judicial system that the labors of the convention were chiefly given; that being, in fact, the controlling purpose for which the convention had been called by the people. It should be noted as significant of the thorough and disinterested attachment of Judge Hall to the State, and of his abiding solicitude for the honor and prosperity of the bar, that, although now permanently separated from the profession and excluded from any part in the judicial system of the State, whatever it might be, he devoted his best powers to a subject so deeply involving the welfare of his former profession as well as of the people. "I feel upon this subject," he says, in his usually earnest manner, when first addressing the convention in relation to it, "more anxiety, probably, than upon any other worldly matter." He, together with some other professional delegates, supported what is known as the *one judge* system, vesting the whole judicial power of the State in three judges, one to reside in each county. His views were certainly maintained with ability and force; but the convention was not prepared for so great a transition as to accept three judges instead of nine, the former number. The present system of five judges was adopted. Few reported discussions upon constitutional questions will be found more interesting or instructive than those then elicited by this subject.

Judge Hall was the founder, the ever-watchful guardian of our system of free schools; the organizer and maturer of the present excellent system of public-school instruction in this city.

The policy of general primary instruction was first adopted in Delaware very early by the recognition of the principle in the Constitution of 1792 and the action of the Legislature of 1796 in setting apart certain revenues to be invested as a school fund.

In 1817, the fund having accumulated, an effort was made to apply it to the education of the poor

children through trustees in the counties. Few, however, of our people were found willing to have their children schooled as paupers and the attempt failed, as it should have done.

The failure of this first effort to deal with a new and perplexing subject produced discouragement, which continued until Judge Hall, having again become Secretary of State in 1822, took up the interest of popular education in this State with a grasp which relaxed only, after fifty years of labor, under the infirmities of great age. He matured, and the Governor, in a message, with great force of reason presented, what in principle and outline became and still remains the school system of this State. The counties were divided into school districts and the voters were authorized to establish and maintain free schools, and a distribution of a share of the income of the school fund was conditioned upon the raising in the district of a sum adequate with the dividend from the school fund to maintain a school. The school law of 1829 was prepared by Judge Hall at the request of the Legislature.

In 1852 a separate school system, under the charge of a Board of Education, was established in Wilmington, which had theretofore comprised ten districts under the original school law of 1829. Judge Hall took an active part in the discussion of that period, insisting that a liberal education at the public expense should be extended to all who might desire it. His wise and liberal views prevailed, though against much difference of opinion, and the act of 1852 was framed with the approval of the people in town-meeting.

Through all the wonderful growth and expansion of the system thus inaugurated Judge Hall's interest never flagged until his enforced retirement, by reason of his infirmities of age, from active service in connection with it. On the evening of the 28th of March, 1870, he met, for the last time, the Board of Education, over which he had presided since its organization, in 1852. He then announced in few words the necessity, through age, of his retirement; received from the Board, by a unanimous, rising vote, its testimony, given "in the name of the people of the city of Wilmington," to "his untiring, faithful, and efficient service in the cause of education in the State of Delaware and in the city of Wilmington;" and thus, with the simplicity and unostentation so characteristic of his whole life, he closed the long record of his forty-eight years of service to the educational interests of this State, commencing, as we have seen, while he was Secretary of State, in 1822.

To the Delaware State Bible Society Judge Hall gave forty-eight years,—we do not say of membership, but of service,—being thirty years its president. During all these years he carried its

interests in his mind and on his heart; met once a year, in one part of the State and in another, a few kindred spirits; set before them in an annual report the operations of the society, the claims upon it and its resources; suggested methods of work; held high the standard of duty, and encouraged to renewed effort. In all those thirty years the society never met without him save once, when he was detained at home by sickness; and then, so missed by his associates was the accustomed presence and guidance, that their sense of his absence was expressed upon the record of the meeting.

A marked example, sufficiently illustrative of the breadth of his philanthropy, was his long and active connection with the Wilmington Savings-Fund Society, as its president, from its organization in 1832 until he was disabled from this service by great age.

The Delaware Historical Society was probably the very latest social institution with which Judge Hall connected himself, being then in his eighty-fourth year, far beyond the limit at which ordinary men are held discharged from public service. But, at the organization of this society, he (together with Mr. Rogers, of New Castle) alone survived to connect the present generation with the public men of our early State history; and more for the eminent fitness of his association with the objects of the society than to add, at his advanced age, to the list of his life-long labors for the public, his connection with the society as its president was earnestly desired.

He readily acquiesced in the desire of the society; and for his remaining years gave to it the prestige of his revered name, the help of his influence, and, until disabled by failing health, the encouragement of his presence.

He became a member of Hanover Street Presbyterian Church, March 8, 1827. Soon after, September 23, 1829, he was elected a ruling elder, the office most influential and responsible after that of the pastor. This office he held until his death. He was once, if not oftener, a delegate to the General Assembly of the Presbyterian Church.

Always and with scrupulous punctuality, he was present in the Sabbath assemblies for public worship, the week-day meetings for religious exercise, the sessions of the elders and the Sabbath-school. In the latter he taught a succession of Bible classes through the long period of over forty years.

A notable feature of Judge Hall's life was his readiness to give his support by his character and influence to measures and instrumentalities of social improvement at times when they required the benefit of his advice or the influence of his commanding position in the community. The character and scope of these efforts may be well illus-

trated by the occasions of many of his public addresses. Before a school for apprentices he delivered a lecture designed to impress apprentice boys with the value and efficiency of self-help. In the Delaware Academy of Natural Sciences he made an address exhibiting, with all his wonted force and learning, the incalculable benefits of science to the interests of daily life. Before the literary societies of Delaware College he illustrated his ceaseless flow of sympathy for young men in the pursuit of an education.

His interest in the great moral questions that from time to time agitated society was indicated by a pamphlet against lotteries issued in 1846, his "appeal for the Sabbath, addressed to the legal profession," read before a convention in Baltimore in 1844, his continuing interest in the temperance cause, and his scheme of African colonization, which he supported from conviction, being for many years president of the Colonization Society of this State. After a contrary solution of the vexed question concerning the negro population of this country had been evolved, he took an active part in the establishment and management of the Delaware Society for the Education of the Colored People.

In person he was rather below the average stature, slightly built, with naturally a quick, active movement, indicative of purpose,—of some great purpose in life,—which, if not always before his mind, was ever present as an inspiration. His countenance was strongly expressive both of intelligence and benignity. His whole aspect has been, for a generation or more, exceptionally venerable, such that one could not pass him without a conscious sentiment of reverence. In demeanor, he was at once grave and cheerful, equally removed from austerity and levity,—a happy balance, not frequent nor easy to be maintained.

In the winter of his ninetieth year, the rapid decay of his physical powers, connected with a disordered and sometimes distressing condition of health, withdrew him from all activity; and it was only left him, that having so long and faithfully discharged the active duties of life, he should now for the few remaining years exemplify, as indeed well he did, its passive virtues. With varying conditions of health, but steady decline of strength, he lingered through several years, awaiting with patient submission his expected change,—the end of his toils and suffering, the fruition of his hopes, the great reward of his faith and devotion. The change came to him on the evening of the 10th of May, 1875, as gently as sleep comes to an infant.

Hon. Edward Green Bradford, late judge of the United States District Court for Delaware, was born at Bohemia Manor, Cecil County, Maryland, July 17, 1819. He came of old Puritan stock, and was the lineal descendant in the seventh gen-

eration of William Bradford, the second Governor of Plymouth Colony, and also a near relative of the late Dr. Ashbel Green, president of Princeton College.

His father was a native of Massachusetts, coming to Wilmington from Maryland in the early part of the present century and was the editor for a number of years of the *Delaware Gazette*, at that time the organ of the Federal party. He was a man of scholarly attainments and sterling character. His mother was Phoebe George, and was descended from a wealthy and influential family, which emigrated from Ireland about 1720, and located on Bohemia Manor, where they become possessed of large tracts of land. Judge Bradford's parents removed to Wilmington soon after his birth, and he spent the remainder of his life in his adopted city. His early education was obtained in the Wilmington schools and Bristol College, Philadelphia, and he completed his education at Delaware College, from which he graduated September 28, 1839. The following year he commenced his legal studies under the direction of Chief Justice Gilpin, at that time a practicing lawyer of eminence. He completed his studies and was admitted to the bar at Georgetown, Sussex County, April 11, 1842. He was at once appointed deputy attorney-general by his preceptor, who was then attorney-general. This position he held until the end of Judge Gilpin's second term, in 1850. Such was the confidence reposed in his judgment and ability that in a short time by far the larger portion of the business of the office was entrusted to his sole management. The experience gained in this position was of great value, giving him an intimate knowledge of criminal law, a familiarity with the practice of the courts and a readiness and skill in the trial of cases. Naturally fluent of speech, endowed with acute perceptive faculties and possessed of a vivid imagination, he was always an attractive speaker and rarely failed to enlist the attention of court and jury. He maintained a high position while at the bar, having the confidence of the court, the respect of his brother lawyers, and was esteemed by the public as one whose professional and personal character was without reproach. Impatient of the drudgery of office work he was more enthusiastic in the study of purely legal questions in the preparation of his arguments, and appeared to the best advantage in the actual forensic.

While yet a law student he began his political life by making speeches in the campaign of 1840, advocating the election of Harrison and Tyler. In 1849 he was a Representative from New Castle County in the Legislature, and during the ascendancy of the Whig party in this State was offered the nomination as Representative in Congress, but declined the honor. In 1861 he was appointed

United States district attorney for Delaware by President Lincoln, and was re-appointed by President Johnson July 22, 1865, but resigned the office the next year for the reason of his inability to approve of the President's policy. On the 12th of December, 1871, he was appointed, by President Grant, judge of the United States District Court, for Delaware, an honor richly merited by his efficiency as a lawyer, and his irreproachable personal character. He was also City Solicitor of Wilmington and for thirty years a director of the Farmers' Bank, and a long time a vestryman of Trinity Church. Of his political career a gentleman said of him: "There were four epochs in the life of Mr. Bradford, one of them was when he, with Edward Betts and other of the younger men of the Whig party, dared to differ openly with Mr. Clayton, the second was the organization of the Republican party in Delaware, which resulted in 1856, in three hundred votes for Fremont and is expressive not only of his courage, but of his clearness in perceiving the real issues which seemed radical and extreme, were so soon to become the standing place of a vast majority of the people of the free States; five years later when the test of secession or union sifted all, his course was again brave, open and patriotic. He was unflinchingly faithful to the unity of his country and uncompromisingly hostile to the effort of disruption, resolute in his denunciation of the treason of the time, and eloquent in his appeals for the forces that symbolized liberty and union; again, five years later in the reconstruction period, his course was straightforward and courageous, and in behalf of impartial suffrage he was an ardent advocate and he did not stop to debate whether the republic dared be trusted with the free franchise of all the American people, but stood for the justice of equal political rights and against the injustice of disfranchising a citizen on account of color."

His judicial career was highly creditable though uneventful. The business of the United States courts was greatly increased after he went to the bench, and many important cases involving large interests were brought before him. The opinions delivered by him on disputed questions of law were carefully and ably prepared, and there was no unnecessary delay in the disposition of cases. The last year of his life was one of ill health and his strength was not always equal to the demand of business, and finally he abandoned it entirely and passed away peacefully January 16, 1884.

Leonard Eugene Wales, district judge of the United States for the District of Delaware, was born November 26, 1823. He was descended from a long line of New England ancestors, going back to the first colonists. He was a third child of the Hon. John Wales and Ann, the daughter of Major John Patten. Of his father and mater-

nal grandfather sketches appear elsewhere in this work, containing the genealogy of the family.

Judge Wales' academic education was completed at Hopkins' Grammar School in New Haven, Connecticut, from which he entered the freshman class in Yale College and graduated from that institution in the class of 1845. He studied law under the direction of his father in Wilmington, and on the 8th of May, 1848, was admitted to the bar in New Castle County and commenced the practice of the law in Wilmington. For two years he was associated with the late John A. Allderdice in the editorial control of the *Delaware State Journal*, then the organ of the Whig Party in the State. For several years he was clerk of the United States Courts for this district, and in July, 1853, was elected City Solicitor, to which office he was re-elected in the following year. In April 1861, he enlisted in Company E, First Regiment Delaware Volunteers, for three months and was chosen second lieutenant. The services of this regiment consisted entirely of guard duty along the line of the Philadelphia, Wilmington and Baltimore Railroad, where it was apprehended that efforts might be made by the rebels to burn the bridges and cut off the direct communication between Washington and the North. At the end of his term of service, Lieutenant Wales was honorably mustered out. In May, 1863, he was appointed Commissioner of Enrolment for Delaware to superintend the draft then made necessary to fill the ranks of the Union armies. The duties of this post were arduous and not at all times agreeable, involving the exercise of much discretion and often of decision, but they were performed with fidelity and efficiency. While yet engaged in the duties of this office, Mr. Wales was appointed by Governor Cannon, October 1, 1864, associate judge of Delaware for New Castle County, to fill the vacancy caused by the resignation of Judge Milligan. He continued to perform the duties of this office with great acceptability, both to the profession and to the people of the State, until after the death of Judge Bradford, he was appointed by President Arthur United States district judge for the District of Delaware, his commission being dated March 20, 1884. That office he still holds and performs its responsible duties with the utmost fidelity and with great ability.

During the temporary disability of Judge Nixon of the New Jersey District, Judge Wales has been assigned to hold the United States Courts in that State, and has carried the burden of the very large business of that District without in the least interfering with the prompt and regular fulfilment of all his engagements at home.

In the administration of the judicial office Judge Wales is distinguished for a patience and courtesy which finds constant and grateful recognition from

the members of the bar. He is painstaking in his attention to the smaller as well as the larger duties of his office. His judgments are well considered; his opinions thorough in their examination both of law and facts, and are delivered with that decision born of confidence in the result of his examination of a case which is so necessary to the successful administration of the judicial office.

In politics Judge Wales was originally a Whig, but has been a member of the Republican party since its organization in Delaware in 1856. During his judicial life, however, he has not participated in political or party contests. He is a member of the Presbyterian Church, and has always been keenly alive to the general interests of society, taking an active interest in many public enterprises. In the Historical Society of Delaware he has always been a leading spirit, and was in 1879 elected President of that body, and has since that time been annually re-elected. He has also taken a very keen and active interest in the establishment of the Ferris Reform School and is a member of the board of trustees of that institution. The judge is a bachelor, and lives with his sister in an old-fashioned house in Wilmington, which was formerly the mansion-house of the old Lovering farm, now constituting one of the most attractive and well-built portions of the City of Washington.

Chief Justices¹

Of the Three Lower Counties.

² An order of Council of New York, May 16, 1677, forbids attorneys to practice.

³ Admitted in Philadelphia, but resident in New Castle County.

⁴ Prior to 1792 a practice of two years in the lower courts was necessary before admission in the Superior Court. This fact accounts for disagreement of dates in some cases, and in which both dates are right.

⁵ The following record is of interest and shows the form of oath taken by attorneys at that time. May 22, 1777, Mr. Siator Clay upon application to this court is admitted as an attorney-at-law of said court within this county and took the oath prescribed by law accordingly,—

"I, Siator Clay, will bear true allegiance to the Delaware State, submit to its Constitutions and Laws and do no Act wittingly, whereby the Freedom thereof may be prejudiced."

ATTORNEYS OF DELAWARE.—The first account of an attorney practicing in a court within the limits of what is now the State of Delaware is found in a letter of Vice-Director Jacob Alrich, of date March 30, 1658, in which he mentions paying "Schelluyn an Attorney" for conducting a suit against Dirck Cornelliessen Heinrich, the skipper of the "Prints Mauritz." Cases in court were represented from time to time by persons having power of attorney, but the first recognized attorney-at-law under the English government was one Dr. Thomas Spry, who took up land in what is now St. George's Hundred in 1675, and followed the practice of medicine. He also studied law, was admitted to practice in the courts of New Castle and Upland, November 7, 1676, and practiced in both courts until the order disbaring attorneys. The following minute is taken from the court records:

"Upon the petition of Thomas Spry desiring that hee might be admitted to plead some people's cases in the court, etc.:

"The worshipful Court have granted him leave so long as the Petitioner Behaves himself well and Carrys himself answerable thereunto."

On the 2d of January, 1677, John Adams appears at court as attorney for Henry Ward, one of the justices. About all that is known of this pioneer lawyer is that he lived on the east side of the Delaware, on the north side of the mouth of Salem Creek, where he owned a tract of land of two thousand acres, taken up in 1671.

John Mathews, on the 5th of June, 1677, "desiered to be admitted and was sworn" as an attorney in the jurisdiction of New Castle Court. On June 16th, at Upland Court, he was also admitted to practice, and in the oath he bound himself "not to exact unallowed fees, not to take fees from both plaintiff and defendant, and that he will not take any apparent unjust cause in hand, but behave as all Attorneys ought to do."

On the 19th of May, 1677, the Governor and Council, at Fort James (New York), passed the following order:

"Resolved and ordered that pleading attorneys bee no longer allowed to practice in ye Government but for ye depending Causes.

(Signed)

"M. NICOLLA, Clerk."

This order seems not to have been understood, or, if so, was not in any way obeyed, as John Mathews was admitted to practice after the date of the order, and on the 11th of September, the same year (1677), the court made the following rule:

"That all declarations must be entered, at least, the day before the Cort at which the Clarke is to attend att Upland, and that no persons bee admitted to plead for any other person as an Attorney in Cort without hee first have his admittance to the Cort or have a warrant of Attorney for his so doing from his Clyent."

No attention having been paid to the order of May 19, 1677, it was ordered "openly read in full Cort" on November 13, 1677, from which time, for many years, no attorneys-at-law appear.

The early court records show, besides those given, the names of Captain John Carr, John Moll, Robert Hutchinson, Captain Edmund Cantwell, Ephraim Herman, Abraham Man and a few others. These

men, with the exception of Robert Hutchinson, were all in official position and appeared as attorneys (verbal or written) for parties having cases in court—all, with the exception of Captain John Carr, under the rule of September 11, 1677. J. Hill Martin, in "The Bench and Bar of Philadelphia," mentions Abraham Man as an attorney-at-law in 1683, but there is no evidence to prove that he was. He acted as attorney, as did many others, under the rule of 1677. He resided at Bread and Cheese Island on Red Clay Creek and was one of the magistrates under Governor Andross, and when John Moll was president of the court, and Man at that time impeached the president, who retired from the bench until the affair was settled by the Council at New York, favorably to the president. Man, not discouraged, declared his intention to carry the case to the King, and publicly announced his intention and called upon all his debtors to settle, as he was going to London. He was also sheriff before Penn's time, and in all his career appears to have been very quarrelsome.

The first action concerning the admission of attorneys after the government passed to William Penn is found in Volume I., page 56, "Delaware Laws." An act was passed by the Assembly of the three lower counties, under the Governorship of John Evans, between the years 1704 and 1709, in which it is prescribed that attorneys should take the form of oath prescribed by Parliament in England in such cases. There is no record of any attorneys-at-law under this act.

In an act passed under Governor Patrick Gordon, who was in office from 1726 to 1736, it was enacted "That there may be a competent number of persons of an honest disposition and learned in the law admitted by the justice of the said respective courts to practice as attorneys there," who, before their admission, shall take an oath, as prescribed by act of Parliament in England.

Under this act then, and during the term of Governor Patrick Gordon, there appear three attorneys-at-law, residents of New Castle County, but probably admitted in Philadelphia or Chester County. The court records from 1700 to 1765 are very imperfect, and facts given for those years are gleaned from other sources.

Alexander Henry Keith, a son of Governor William Keith, was one of the number admitted to practice in Chester County. He resided at New Castle, and died in 1742.

James Keating, a barrister of Dublin, was admitted to practice in New Castle County before 1736, and resided there. He died in Chester in 1741.

John Robinson, a resident of New Castle, was admitted to practice in Philadelphia June 3, 1734, and died in New Castle in 1752.

The next record in the three lower counties is found in Sussex County in the minutes of the November term, 1746, as follows:

"To the Worshipful, his majesties justices of Sussex County, setting forth the petition of Hugh Neill, Humbly sheweth

"That your petitioner hath for some time Past been studying the Law, and hath now a Desire of being admitted an Attorney in this Worshipful Court. Your Petitioner, therefore, humbly prays to be admitted by your Worships an attorney of this court, According to an Act of Assembly of this government. And your Petitioner, as in duty bound, shall pray, &c.

"Lewes, Nov. 4, 1746.

HUGH NEILL."

The prayer was granted and he was admitted, but his name does not appear later as an attorney. It may be stated here that in 1750 the Rev. Hugh Neill was stationed at Dover as a missionary for the Society for the Propagation of the Gospel in Foreign Parts. There is no authority for saying that the attorney and the missionary Hugh Neill were one and the same person, but it is not improbable.

There is no record to show that Ryves Holt, of Lewes, Sussex County, was a recognized attorney, but he was the King's attorney from 1733 until he was appointed chief justice in 1745, when he was succeeded by John Neill, of whom no information is obtained.

Benjamin Chew, who, in his early days, resided with his father, Dr. Samuel Chew, near Dover, Kent County, was admitted to practice law in Philadelphia in September, 1746, and also in Lewes, Sussex County, in May, 1748. His name appears in connection with a suit at that term of court. He practiced much in the three lower counties, but resided in Philadelphia. At the same term of court one Mark Smith was admitted to practice as an attorney, but nothing is known concerning him.

In this connection is given Shepherd Kollock, who succeeded John Neill as King's attorney in 1752. The time or place of his admission as attorney is not known, but he is mentioned in Martin's "Bench and Bar of Philadelphia" as being admitted to the bar. He died before August 8, 1758.

About the middle of the century the bar began to flourish from the accession of men of character and ability, and truly "there were giants in those days." It was then that there were ushered into the arena as young men, Thomas McKean, John Dickinson and George Read, who a few years later took prominent part in the conduct of politics and affairs of State, and exerted their powerful influence in moulding a new nation. Closely following these men, destined to be famous, not indeed as lawyers, but as statesmen, came such men as the senior Nicholas Van Dyke, Alexander Porter, who lived in New Castle County, Elisha Price, who practiced much in the courts, although a non-resident, and Joseph Earle. These were the leading practitioners of the times.

That Thomas McKean, signer of the Declaration of Independence, was a lawyer is a fact which, naturally, is not as commonly known as are many others concerning him. An extended sketch of his life appears elsewhere in this volume, but it is proper that some account of this distinguished man as an attorney should appear in this connection, especially as it adds to the roll a name of almost overshadowing importance. The signer was not only a lawyer, but one of

the earliest in the State, having been admitted in Sussex—at Lewes—in November, 1754. He was described in his application as "Thomas McKean, Gent., of New Castle," and was at that time living there. In May, 1755, he was admitted to the bar of Chester County, Pa., and on April 17, 1758, to the Supreme Court of the Keystone State. A fact which has escaped his biographers, and is believed to have been unknown to his descendants until recently, is that he studied law in the "Middle Temple," London, and that he sailed for England immediately after his admission to the bar of the Supreme Court of Pennsylvania, is attested by the record of his admission to the Society of the Middle Temple on May 9, 1758.¹ How long he remained in London is not known, but it was certainly for only a brief period. It is a notable fact that in 1762, in conjunction with Cæsar Rodney, he was appointed to revise and print the laws, and that he discharged that duty during the following ten years. He was appointed in 1765 sole notary public for New Castle County, and a justice of the peace, and clerk of the Court of Common Pleas and Quarter Sessions and Orphans' Court. "He concurred with his brethren of these courts in the orders to their officers to use only *unstamped* paper, being the first of the courts in the colonies to do so."² He was licensed to practice in 1766 in all the courts of New Jersey. In 1769 he was appointed to procure in New York copies of all papers concerning real property in Delaware, and these were declared of authority equal in value to their originals. About this time the life of this illustrious man began to flow in the broader channel which is better known and which is treated of elsewhere in this work.

Another illustrious name on the roll of attorneys of the same period to which McKean belonged is that of John Dickinson, far better known however, as political writer and statesman than as a lawyer. He was admitted to practice in Philadelphia about 1763, and was doubtless admitted in Delaware shortly before or after that date, for he is mentioned as one of the powerful competitors whom George Read had to encounter when, in 1754, he settled in New Castle. Thomas Jefferson once characterized him "as a lawyer of more ingenuity than sound judgment, and still more timid than ingenious," and in so doing was guilty of an injustice, which he appears to have himself recognized and in some measure made amends for, as in his writings he afterwards spoke of the great Delawarean as "so honest and able." Dickinson lived for many years on what was known as "Dickinson Manor," near the mouth of St. Jones Creek, in Kent County, but his later years were spent in Wilmington, where he died in 1808. His father Samuel Dickinson, was for a term presiding judge of the Kent County Court of Common Pleas.

Nicholas Van Dyke, Sr., is known to have been admitted in Philadelphia in 1765, and was presumably

admitted earlier in Delaware. He was a man of ability, and became President of the State, holding the office from 1783 to 1786. He died upon his farm in St. George's Hundred, February 19, 1789, in his fifty-first year.

Joseph Earle, admitted in October, 1765, was an attorney from Maryland, but practiced much in Delaware for many years, and lived at Lewes for a time.

Alexander Porter, Jr., was a member of the bar of New Castle County, admitted in 1765. But little is known of his career, except that his name appears frequently in connection, in public record and in public affairs, with Read, McKean, Dickinson and others. He resided on an estate called "Hamburg," below New Castle.

Joseph Anderson, at one time a prominent member of the Delaware bar and a distinguished Revolutionary soldier and statesman, was born in New Jersey, November 5, 1757. He received a liberal education and studied law, but in 1775 was appointed an ensign in the New Jersey Line. He was soon promoted to a captaincy and fought at the battle of Monmouth. In 1779 he was a member of Sullivan's expedition against the Six Nations, and in the following year was at Valley Forge. In 1781 he was at the siege of Yorktown. After the close of the Revolutionary War, Captain Anderson was breveted major, and practiced law in Delaware. In 1791, General Washington appointed him judge of the territory south of the Ohio River, in which position he continued until Tennessee was formed. He assisted in framing the Constitution of Tennessee and represented that State in the United States Senate from 1797 to 1815, during which period he was twice president *pro tempore* of that body. He was first comptroller of the United States treasury from 1815 to 1836, and died in Washington, April 17, 1837.

William Polk, who was admitted to practice in 1776, was a native of Sussex County, but no information has been ascertained concerning him as an attorney.

A number of attorneys were admitted to practice in Sussex County in 1783 and later of whom nothing is known, some of whom were also admitted in other counties.

The name of Clay was well known in New Castle County from the time of the Revolution until after 1850. One Slaton Clay, about 1750, married Ann, the daughter of Judge Jehu Curtis, of New Castle, who occupied many official positions in the three lower counties. On the 1st of October, 1754, a son, also called Slaton Clay, was born, who passed his early manhood in New Castle, then the capital of the lower counties; under the influence of George Read, Nicholas Vandyke and others, he was led to the study of the law and was admitted to the bar of New Castle County, May 22, 1777, and began practice in his native town and continued until 1779.

Upon the organization of the Council of the Delaware State, October 29, 1776, Slaton Clay was chosen its clerk and served in the Councils of 1776 and 1777,

¹ Martin's "Bench and Bar of Philadelphia," p. 22.

² "Life of George Read," p. 333.

and was succeeded by Benjamin Vining, son of John Vining.

In 1779 he accepted the invitation of a friend, who was a captain of a vessel, to take a trip to the West Indies. The vessel was captured by the British and Mr. Clay was taken to the Island of Antigua, and soon after took passage in a vessel for New York, that city then being in the possession of the British. The vessel was wrecked on the rocks of Bermuda, but Mr. Clay landed in safety. Finding little prospect of getting off the island, he opened a school and taught for six years. While there his views were changed and he desired to enter the ministry, and in 1786 embarked for Philadelphia, and on December 23, 1787, he was ordained to the Order of deacon by Bishop White, in Christ Church, Philadelphia, and on February 17th following he was ordained to the Order of priests in St. Peter's Church. He married in Philadelphia, and settled in Upper Merion, Montgomery County, as rector of St. James' Church, Perkiomen, St. Peter's, Great Valley, Chester County, and St. David's, Radnor, and as associate minister of Christ Church, Upper Merion. In July, 1799, he removed to St. James' Church, where was a glebe of thirty acres and a parsonage, and continued there until his death, September 25, 1821. The Rev. Jehu C. Clay, long rector of the Swedes' Church, Wicaco, now Philadelphia, was a son, and the Rev. Robert Clay, rector of Immanuel Church, New Castle, for thirty-six years and died in December, 1831, was a brother.

John Vining, son of Chief Justice John Vining, was born at Dover, December 23, 1758; studied law with George Read, of New Castle, and was admitted to practice in New Castle County, February 21, 1782, and at once took a prominent position at the bar of the State, not so much by his solid legal acquirements as by his brilliant intellectual faculties. He was elected to the House of Representatives of the United States soon after he reached the required age, and in January, 1795, was elected to the United States Senate. Robert G. Johnson, of Salem, New Jersey, writing of him, says he "was considered a very acute advocate at the bar, a very able debater in Congress, and a highly creditable representative of his native State." He died at Dover in 1802.

Joshua Fisher was the son of Frederick, and a direct descendant of John Fisher, who came over to America with William Penn, bringing with him his two sons, Thomas and John. Thomas was the private secretary of Penn. Joshua, the descendant of Thomas, and the subject of this sketch, was admitted to the bar shortly after the Revolution, and settled in practice at Dover, where he at once acquired a lucrative practice, whereby he amassed a handsome fortune for that period, although he died quite a young man. He was a brother of Dr. James Fisher, of Camden, and the uncle of the wife of Hon. John M. Clayton. He never married. He was esteemed to be one of the ablest lawyers in the State. From the proceeds of his practice he purchased quite a large landed estate in and near

Smyrna, where he erected the hotel now known as the Smyrna Hotel. He also built the house in the southwest corner of the public square in Dover, where Hon. Joseph P. Comegys, the present chief justice of the State, now resides, and has resided continuously for more than fifty years. He died in 1791.

Dyre Kearney, who was admitted to the New Castle bar in 1784, was a lawyer of ability, and enjoyed the confidence of his fellow-citizens, as is manifested from the fact that he was elected a delegate from Delaware to the Continental Congress. He served in that capacity with credit from 1786 to 1788.

William Peery, of Sussex, was admitted to practice in the Court of Common Pleas in 1785, and in the Supreme Court in November, 1793. He was a native of Broadkilm Hundred, near the head-waters of Cool Spring Run. He was in command of a company during the Revolution, and treasurer of the county from 1785 to 1796, practiced at Lewes and at Georgetown, died at the homestead and lies in the Cool Spring Presbyterian Grave-Yard. He left no descendants. His brother James left two sons, whose descendants still own the homestead.

James A. Bayard was the first of this illustrious family who had a place upon the attorneys' roll of Delaware, being admitted to practice in New Castle in August, 1787. He was born in Philadelphia, July 28, 1767, and was the second son of Dr. James A. Bayard, a physician of promising talents, who died at an early age, January 8, 1770. After the death of his father James A. was placed under the guardianship of his uncle, Col. John Bayard, of Philadelphia, with whom he remained most of his time until he entered Princeton College, from which he graduated September 28, 1784. He studied law with General Read and afterwards with Mr. Ingersoll, who was later the attorney-general of Pennsylvania. Upon completing his studies he decided to practice his profession in Delaware, a selection to which "the State was in a great degree indebted for a political weight in the national councils, which neither its population nor resources, its local advantages nor geographical extent, could have secured." He devoted himself to arduous study, not alone of the law, but of political science, and attained that intimate and thorough knowledge of public affairs and social principles which afterwards made him a great power in Congress. His attainments as an attorney were very soon eclipsed by the ability which he displayed in official life. He had been at the bar only nine years, when, having identified himself prominently with the dominant political party, he was elected, in 1796, to the Fifth Congress, in which he took his seat May 22, 1797. His subsequent political career is given elsewhere. It was upon the conclusion of the treaty of Ghent in 1814 that Mr. Bayard was attacked by the malady which terminated his life. After long delays, while negotiating the treaty in Europe, and in his embarkation and passage to America, during which Mr. Bayard suffered

severely, the ship on which he was a passenger arrived in the Delaware on August 1, 1815. But after an absence of two years from his family he had returned only to say farewell forever, for upon the 6th he expired, and so in the maturity of his powers and usefulness passed away one of Delaware's most distinguished lawyers and statesmen, the first to make illustrious in the annals of the State and nation the name of Bayard.

The wife of Mr. Bayard, to whom he was married February 11, 1795, was Miss Bassett, daughter of Richard Bassett, subsequently Governor of Delaware.

Of the Bayard family, of which the subject of the foregoing sketch was the earliest famous representative in Delaware, it may be remarked they were an ancient and historic family in the Old World, and very early settlers in the New. They trace their lineage back for centuries, to the time when one member of the family lived, who is known to history and romance as "the Knight without fear and without reproach"—Pierre du Ferrail, Seigneur de Bayard—and even earlier still, when successive generations of the family were noted for fidelity to their sovereigns and gallantry in war. For the purposes of this brief sketch, however, it is sufficient to begin with the immigration of a portion of the family to Holland. This occurred during the persecutions which followed the massacre of St. Bartholomew, and the exodus of the three brothers, Jacques, Thomas and Phillipe Bayard, was imperative, from the fact that they had espoused the Huguenot faith. One of their descendants, Samuel, married Anneke or Anna, daughter of Balthazar Stuyvesant and sister of Peter Stuyvesant, Governor of New Amsterdam, and she, being a widow at the time of her brother's appointment, came with him to America, bringing her three sons—Balthazar, Nicholas and Petrus—and a daughter Catherine. From these three brothers all of the Bayards in this country are descended, those of the first and second being in New York. Petrus Bayard became a convert to the Labadists and accompanied them to Cecil County, Maryland, where they settled on the Bohemia Manor grant to Augustus Herrman. Petrus Bayard had an interest in these lands, and upon the dissolution of the Labadist Society and the partition of the lands in 1698, his son, Samuel, became possessed of a portion, and lived there all of his remaining years. His father lived there too nearly all the rest of his life, but died in New York in 1699. Samuel died in 1721, leaving three sons,—Samuel, Peter and James,—and one daughter, Mary Ann. James, the third son, married Mary Asheton, of Virginia, and of this marriage were born two sons,—John and Dr. James Asheton, the father of James A. Bayard, first of the Delaware statesmen of his name, and the subject of the preceding sketch.

Robert Clark, a brilliant attorney of his day, was admitted to the bar February, 1789, and practiced his profession in Dover, where he died comparatively a young man. He was one of the commissioners

appointed to superintend the construction of the Court House and State House in Dover.

Dagworthy Jones, who was admitted in October, 1789, was a large land owner in Dagsborough Hundred, but does not appear as an attorney of any note.

James P. Wilson was a native of Lewes, and the son of the Rev. Matthew Wilson, pastor of the Presbyterian Church at that place. He was admitted to practice in Sussex County Courts in April, 1790, and in the Supreme Court November 19, 1793. He began practice in Lewes, and after the removal of the courts to Georgetown, removed there and opened an office on the northwest side of the public square, where he practiced until his abandonment of the law for the ministry about 1806 or 1807. The tragic death of his brother, Dr. Theodore Wilson, at Lewes in 1805, made a strong impression upon his mind, which led him to make the change. He studied for the ministry, and after his ordination accepted a call as pastor of a congregation in Philadelphia, then newly formed, which built the church on Washington Square, known as the Dr. Barnes Church. With this congregation he lived and died. He was buried in the churchyard. It is related that a few years after his settlement, his growing family necessitated an increase of salary. He mentioned the subject to the trustees, but no attention was paid to it, and shortly after he called a meeting of the trustees, explained the matter to them and proposed that he preach two sermons on the Sabbath and be allowed to practice his early profession in the courts of Philadelphia. This proposition was not accepted, and his salary was increased.

Nicholas Van Dyke, Jr., one of the most distinguished lawyers of the State during the close of the last century and the early years of the present, was born in New Castle December 8, 1770, and died May 21, 1826. He graduated from Nassau Hall in 1788; studied law in the office of his brother-in-law, Chief Justice Kensey Johns; was admitted to practice in 1791, and soon obtained a large practice. He was a sound lawyer, and was particularly noted for his fluency and grace, his success as an advocate and his skill in managing cases. He was remarkable too, for the ease and elegance of his manners and conversation. He had a taste for architecture, and exercised it in the erection of two fine houses in New Castle, where he lived, and two near that town, his ample fortune enabling him to gratify this taste. He was a man of pure character and of piety—a member and ruling elder of the Presbyterian Church. His public or political life began with his election to the Legislature in 1799, and this was succeeded by his election to the House of Representatives in 1809, to the Senate of Delaware in 1815 and to the United States Senate in 1817. To this body he was re-elected, and he was a member of it when he died.

Thomas Bellach, who studied law and was admitted to practice at the bar of Kent County February 17, 1792, was a brother of James Bellach, who was one of the justices of Court of Common Pleas of Kent

County from 1786 to 1792, and later moved to Naaman's Creek, New Castle County. After admission to the bar, he opened an office in Dover, and practiced until his death, which occurred a few years later and while yet a young man.

William Hill Wells was an attorney, but where and when admitted is not known. He first appears in Dagsborough Hundred, where he married Rachael, the daughter of General John Dagsworthy. He resided part of the time at Dover and Georgetown, and the remainder of the time at the Dagsworthy homestead, of which his wife came in possession. He succeeded Dr. Joshua Clayton in the United States Senate, January 18, 1799; resigned November 6, 1804, and was again elected May 28, 1813. He died in 1829 at Dagsborough and is buried in Prince Georges Church-yard.

Joseph Miller, admitted in Sussex County, April, 1796, was a son of the Rev. John Miller, of Dover, and practiced mostly in that place. He died early.

John Wise Batson, a brother of Kendall Batson, was admitted in the Court of Sussex County in 1796, but nothing is known of him as an attorney. He was a member of the Constitutional Convention in 1792.

Cæsar Augustus Rodney was one of the most notable of the Delaware lawyers of what may be called the middle period—as prominent in public as in professional life. He was born in Dover, January 4, 1772, was a son of Col. Thomas Rodney and Elizabeth Fisher, the descendent of a family having a very ancient history in England and early settled in America. His earliest ancestor here was William Rodney, who, having married a daughter of Sir Thomas Cæsar, came to Pennsylvania about the time that province received its first influx of English settlers, and not long afterwards removed to Kent County. He was the first Speaker of the Assembly of the Three Lower Counties. He left eight children, among them Cæsar Rodney, the father of the eminent Cæsar Rodney, the signer, and Thomas, the father of our subject, who, like his elder brother, had large ability and, unlike him, marked eccentricity. He was appointed by President Jefferson a judge in the Territory of Mississippi and died there in office. Our subject was brought up by the uncle whose name he bore, and evidently his character, especially his intense admiration for American civil institutions, was attributed in considerable measure to the influence of the patriot. The latter made provision by will for the education of Cæsar A. Rodney, and it was completed at the University of Pennsylvania, from which he graduated in 1790. Shortly after he commenced the study of law with Joseph B. McKean and was admitted to the New Castle bar in 1793. He soon took a high rank, but not the highest, among the lawyers of the day, "while he brought to the forum" says William T. Read,¹ "competent power as a dialectician, with extensive knowledge of legal principles and decisions, it was in addressing a jury that he ex-

celled. Always fluent, he could be pathetic, or delight his hearers with declamation adorned by figures from his prolific fancy, or by facts from his ample store of general knowledge . . . The court, the jury, the bar and the bystanders listened to him with favor and were inclined to his side of the case. Old-fashioned lawyers sometimes thought he got out of bounds. Chief Justice Read, when he quoted 'Beccaria on Crimes and Punishments,' stopped him, saying, 'that book is no authority in any court.'" The characterization of Mr. Rodney as a lawyer, which we have followed, is continued at some length, but probably enough has been given to convey a general idea of his professional abilities and peculiarities. It may be added that his library was the largest in the State and it was well and wisely used. He was early involved in politics "because then as now it was difficult for the eminent lawyer to avoid being a busy politician." A strong evidence of his popularity was his election to Congress as a Democrat, in 1802, by a majority

CÆSAR A. RODNEY.

of fifteen votes over James A. Bayard. He won distinction in the impeachment trial of Judge Chase in 1804, and a year later in several others. In 1807 he was appointed Attorney-General of the United States, which office he held four years, during a critical and momentous period, enjoying the confidence of the President and Cabinet; and among his many opinions, delivering but one which is known to have been questioned. He returned to the practice of law at Wilmington, which he followed with marked success and distinction until 1817, when he was appointed by President Monroe as head of the mission sent to South America to solve the doubt concerning the advisability of the recognition by the United States of the newly-formed Republics. The high duties of the commission and the interesting problems devolving upon it for solution, made the position a gratifying one to Mr. Rodney, and he hopefully entered upon the work. He visited the countries in question, and, returning in the summer of 1818, made a report to Congress, which increased his reputation and went far towards extending recognition to the Argentine Republic. In 1820 he was a second time elected to the House of Representatives, and in 1822 was elected

¹ "Life of George Read," p. 231, Appendix.

by the Legislature of Delaware to the Senate of the United States, being the first of his party to receive this distinction, as he was the first Democrat chosen to the lower branch of Congress. In 1822 it was resolved by Congress that the "United Provinces of La Plata ought to be acknowledged by the United States;" and in 1823 Mr. Rodney was appointed Minister Plenipotentiary to that government. He sailed from Wilmington on the frigate "Congress," June 8th, to enter upon his diplomatic duties, having received a testimonial from the people of the town in the form of an elegant banquet, and in this they little thought they were extending to their honored citizen a farewell forever; but so it proved. His health, previously impaired, rapidly declined in his new home, and he died on the 10th of June, 1824, in the city of Buenos Ayres, where his bones still rest.

Prominent among the men of the colonies in the important events preceding, during and at the close of the Revolutionary War was Jacob Broom, who acted with George Read, John Dickinson, Thomas McKean and others. He resided at Wilmington and was engaged in manufacturing, and later moved to Philadelphia, where he died April 25, 1810.

Hisson, James M. Broom, was born in 1778, entered Princeton College and graduated in 1794, after which he studied law in New Castle and was admitted to practice at the bar of that county in April, 1801, and began practice in that town. He was elected a member of Congress in 1804-05, after which he moved to Baltimore, Md., and in 1815 moved to Wilmington and, with John Wales, began the practice of law.

About 1819 he removed to Philadelphia, became a member of the Philadelphia bar and entered upon a successful practice, which he continued until within a year of his death, which occurred in January, 1850. He was a member of the Pennsylvania Legislature about 1824. His son, Jacob Broom, born in Philadelphia, was a member of the bar of that city, member of Congress from Pennsylvania and candidate of the Native American party for the Presidency of the United States in 1852, and died in Washington in November, 1864.

Henry Moore Ridgely, of Kent County,—admitted in March, 1802—was not only one of the ablest and most successful lawyers of his time, but a business man of unusual sagacity, a political leader of marked prestige, the recipient of numerous public honors, and a man at once of versatile mentality and sterling moral character. He was a son of the eminent physician of Dover, Dr. Charles G. Ridgely (of whom a sketch appears elsewhere in this work), and was born August, 6, 1779. His father died while our subject was a boy, and his education devolved largely upon his mother—a lady well endowed for the task—*nee* Ann Moore, a daughter of William Moore, of Moore Hall, Pa. His later education was obtained at Dickinson College, and he read law with his relative Charles Smith, Esq., of Lancaster, Pa. About the time he was admitted to the

bar Mr. Ridgely became involved in a duel which came very near costing him his life. The circumstances were as follows: Dr. Barratt, of Dover, had been grossly insulted by a Mr. Shields, of Wilmington, and, in accordance with the spirit of the times, sought satisfaction through the "code," and desired Mr. Ridgely to be the bearer of his challenge. The latter did so, and Shields refused to meet Dr. Barratt, but challenged the bearer of the message. Ridgely felt that he was obliged to accept, the duel was fought, he was severely wounded and for a time it was thought he could not live. He recovered after a painful prostration, and public feeling was so aroused against his antagonist that he left Wilmington never to return.

Mr. Ridgely, upon his admission, found at the Bar such lawyers as Caesar A. Rodney, George Read, and Nicholas Van Dyke, yet he soon forced his way into a large practice, and obtained a position of almost commanding influence. He was a pleasant and strong speaker, alike in courts, in political contests, and in legislative halls. The esteem in which his honor and ability were held was indicated by his election as president of the Farmers' Bank of Dover, upon its incorporation, in 1807, a position which he held for forty consecutive years. He was elected as a Federalist Representative to Congress in 1811; re-elected by a large majority in 1813, and declined nomination in 1815. He was appointed Secretary of State in 1817, and again in 1824, and in this office performed a valuable work for posterity, in collecting and arranging in proper form for preservation the scattered and poorly kept archives of the State. He was repeatedly elected to the Legislature, and framed some of its most important laws. Mr. Ridgely apparently cared nothing for office for personal ends, and he refused the chancellorship in 1830, and afterwards the honorable position of chief justice, and still he had the interests of the public so much at heart that he accepted the comparatively unimportant office of levy court commissioner, and by patient labor restored the affairs of Kent County to an orderly condition, and when he found that there was mismanagement in the County Almshouse, he requested to be made trustee, brought about many reforms, added greatly to the comfort of the paupers, and saved the County much expense. He was elected to the United States Senate in 1827, where he was especially influential in many matters, and particularly known (as he had been in the House) as an advocate of a protective tariff. Mr. Ridgely retired from public life and from the arduous duties of his profession in 1832, and gave much attention to farming during his remaining years. He was twice married, the wife of his youth being Sarah, daughter of John Banning, of Dover, with whom he was united in 1803, and his second wife, Sallie Ann, daughter of Governor Cornelius P. Comegys. He left six children by his first wife. His death occurred August 6, 1847, upon his birthday, and at the completion of his sixty-eighth year.

Henry M. Rice

U. S. Senate

2 Dec 1827

Washington City D. C.

Thomas Cooper, a brother of Governor William B. Cooper, was born in Little Creek Hundred, Sussex County, studied law with James P. Wilson, then in Georgetown, about 1803, and was soon after admitted in Sussex County, where he continued in practice until his death, in 1829, about sixty-five years of age. Judge Edward Wootten and Judge Caleb S. Layton were students under him. He was a very able lawyer and highly esteemed.

James Rogers, a native of New Castle, was born in 1779, studied law for three years in Dover, Delaware, part of the time in the office of the Honorable Nicholas Ridgely, and was admitted to the bar of New Castle County in April, 1803. He at once entered upon practice in New Castle County, and continued until his death, which occurred September 15, 1868. A meeting of the bar of New Castle County was held on the 22d October following his death, at which the following resolutions were passed:

"Resolved, that by the death of James Rogers the community in which he has lived for many years, has lost one of its most respected citizens; the State, one who has filled with honor and advantage to the public service several offices of high responsibility; and the Bar of Delaware, its oldest and one of its truly distinguished members.

"That this sad event has severed one of the few remaining links which connect the present body of our profession with the distinguished men of its earlier history, the deceased being in his life-time a type of the same dignity and ability which marks their career.

"That for twenty years Mr. Rogers held the responsible office of Attorney-General of this State bringing to the discharge of his duties a mind thoroughly imbued with the knowledge of the Law and fulfilling the various requirements with an ability and zeal combined with a moderation which have never been excelled.

"That we recognize among the elements of his professional character a pure morality and a pains-taking industry—traits which doubtless contributed to his success.

"That after almost half a century spent in the active labors of his profession, reaping its honors and rewards, he returned to private life and spent the remainder of his days in pursuits congenial to mental and physical repose and has, at last, sunk peacefully to the grave full of years, leaving to his children the heritage of an honored name, and to the Bar an example not unworthy of their highest ambition."

Outerbridge Horsey, admitted in 1807, was a native Delawarean and was born in 1777. He studied under James A. Bayard first and became eminent in his profession. He entered politics, rose rapidly, was for many years attorney-general of the State and a Senator in Congress from 1810 to 1821. He died at Needwood, Md., June 9, 1842.

Louis McLane, whose sketch appears elsewhere, was one of the old-time attorneys of the State who became distinguished in public affairs. He was a son of Allen McLane, and when twelve years of age was appointed a midshipman in the navy, on leaving which, in 1801, he studied law and was admitted in December, 1807.

Nicholas G. Williamson, the son of Abram Williamson, was a native of Brandywine Hundred, and was born in 1780. He studied law under the direction of Cæsar A. Rodney, and was admitted to the bar of New Castle County in April, 1809, and practiced in Wilmington many years. In 1822 he was appointed postmaster of Wilmington, and in 1825 was elected the second mayor of the city. His official business in connection with these offices required so much of his time that he abandoned the law. He occupied both positions until his death, which occurred October

15, 1843. He is buried in the burial-ground of the Friends on Fourth and West Streets, near the burial-place of the Hon. John Dickinson.

Archibald Hamilton, who was admitted to the bar of New Castle County in April, 1809, was of an old family in the county. He resided in Wilmington, and practiced his profession thirty-three years, and until his death in 1842. His last case in the appearance docket is in November, 1841. He was an earnest advocate for the removal of the county-seat from New Castle to Wilmington, and a caricature of "Archie Hamilton" with the court-house on his back was one of the amusing pictures distributed through the county during one of the campaigns for that purpose. Alexander H. Hamilton, a brother of Archibald, was also an attorney and was admitted to the bar of New Castle County, in October, 1827, and settled in Philadelphia, where he practiced his profession. For some reason he was again admitted to the New Castle County bar in May, 1838, and is then mentioned as of Philadelphia.

Isaac Fisher, who was admitted in Sussex County in November, 1812, soon after removed to Lewistown, Mifflin County, Pennsylvania, where he practiced many years and died at an advanced age.

Alexander L. Hayes, of Kent County, and afterwards of Pennsylvania, was admitted in 1815, but practiced in Delaware only a few years, being a conspicuous contribution of the lesser to the larger State. He was descended from Richard Hayes, who came to America in 1698, and settled in Sussex County, and was the son of Manlove and Zipporah (Laws) Hayes, who lived at York seat, Kent County. He was born March 7, 1793; he graduated from Dickinson College in 1812, and entered upon the study of the law with Henry M. Ridgely, of Dover, being admitted, as before stated, in 1815. About 1820 he removed to Philadelphia, in the following year to Reading, Pennsylvania, and in 1827, having been appointed assistant judge of the District Court of Lancaster and York Counties, took up his residence in the seat of justice of the latter. He was appointed president judge in 1833, and resigned to follow the practice of his profession in 1849. He became largely interested in manufacturing, but in 1854 was returned to the bench in Lancaster as law judge, and in 1864 was re-elected. Upon the expiration of his term in 1874 he had served altogether forty-two years upon the bench. He died on the 13th of July, 1875, in his eighty-third year, leaving several daughters, who are now residents of Lancaster.

John Wales was born at New Haven, Connecticut, July 31, 1783, and died at Wilmington, Delaware, December 3, 1863. His American ancestors were among the early settlers of New England. Nathaniel Wales landed in Boston, in 1635. Rev. John Wales, a great-grandson of Nathaniel, graduated at Harvard College in 1728, and for thirty-four years was pastor of the First Congregational Church of Raynham, Massachusetts. He married a great-granddaughter

Very truly yours
Martin W. Bates

of James Leonard, who, together with his brother Henry, had emigrated from Pontypool, Monmouth County, England, a district on the border of Wales, rich in deposits of coal, iron and tin, and in 1652 located at Raynham, then included in the town of Taunton. Here the Leonard brothers "set up a bloomary work," with license to cut wood and take ore "in any of the commons appertaining to the town where it is not proprietary." This was the first iron manufactory established on the American continent. It was enlarged from time to time by additional furnaces, and continued in the possession of the Leonards and their descendants for many years. During the colonial history of Massachusetts, members of the Leonard family filled important positions in the church and magistracy, and to this day their representatives are to be found among the public and active men in different parts of the United States. ("History of Raynham," by Rev. E. Sanford, 1870.) One of the family became conspicuous during the early part of the Revolution as a Loyalist, and was obliged to flee the country. This was Daniel Leonard, who was subsequently appointed chief justice of Bermuda as a reward of his loyalty, and as some compensation, it may be supposed, for his personal sacrifices.

Rev. John Wales died February 23, 1765, having survived his wife. They left two children, Samuel and Prudence. The daughter became the wife of Rev. Percy Fobes, who succeeded his father-in-law in the pulpit of the Raynham Church. Samuel graduated at Yale in 1767, entered the ministry, and, as recorded by himself, "was ordained over the First Ecclesiastical Society in Milford (Conn.), Dec. 19, 1770, in his 23d year." He was afterwards made a Doctor of Divinity, and at the time of his death, at the comparatively early age of forty-seven, was a professor in the Theological School at New Haven. He had the reputation of being an accomplished scholar and an able and eloquent preacher. He married Miss Catharine Miles, of Milford, who, with their four children—three sons and one daughter—survived him. The subject of this sketch was the second son of this marriage, and was yet in his early boyhood at the time of his father's death, but he was blessed with the watchful care and tender devotion of a good mother, a woman of fine understanding and practical good sense, who blended firmness with indulgence in the management of her children, and thus won both their love and respect. She lived to see her children educated and settled, and, dying at an advanced age, retained to the last their grateful and reverent affection. Her son John never omitted an opportunity to praise her virtues and to honor her memory.

As was the custom in those days, the youth was received into the family of a clergyman to be prepared for college, and in due time entered Yale, where he graduated in 1801. Intending to adopt the law as a profession, he pursued his legal studies in the office and under the direction of his brother-in-law, Seth P.

Staples, and on his admission to the bar commenced to practice in his native State, but in a short time, not meeting with the success he had hoped for, or, perhaps, stirred by the impulse which prompts so many young men to seek fortune in a new country, or in a place distant from their native home, he first set out for Washington City, taking with him letters of introduction. His friend, the late Charles Chauncey, advised him to pitch his tent in Philadelphia, then, and for a long time, the El Dorado of the legal fraternity, but after surveying the field there and at Wilmington, he was persuaded to open an office in Baltimore. Here he had remained only a few years when he accepted the invitation of James M. Broom to form a partnership with that gentleman in the practice of law in Delaware. In pursuance of this plan, he came to Wilmington in 1815, and on the 30th day of October, in that year, in the Court of Common Pleas, at New Castle, on motion of Nicholas Van Dyke, was admitted to the Delaware bar. He was not at this time an entire stranger in Delaware, having made the acquaintance of several families when traveling through the State on his annual visits to his New England relatives.

The law-firm of Broom and Wales continued in active operation until 1819, when the senior partner removed to Philadelphia. The court dockets show that they had a lucrative business. Mr. Broom was a lawyer of considerable attainments in his profession, of scholarly tastes and of attractive conversational power. On the dissolution of the partnership, Mr. Wales continued the business on his own account, and for nearly thirty years afterwards his presence and voice were familiar to all who attended the courts at New Castle, or the Court of Appeals at Dover. He had become almost a veteran lawyer before a regular series of reports was begun in this State, but the earlier volume of the Delaware Reports (Harrington) shows that he had a large share of business, both in the equity and law courts, and from the character of the cases in which he appeared, and from the brief notes of his arguments, he stood among the foremost of his contemporaries at the bar. He had acquired quite a reputation as a Chancery lawyer, and his practice in that branch of the profession was correspondingly extensive. A naturally strong mind, improved and kept alert and bright by the constant exercise of its faculties, combined with a sound and vigorous body, enabled him to perform the most laborious duties without suffering from the exhaustion which so often follows the studious preparation and the protracted trial. He was an animated speaker and always secured the attention of the court and jury.

Thoroughly identified in interest with the growth and prosperity of his adopted home he was always ready to aid in every measure for the moral or material improvement of his city and State. He was one of the original promoters of Delaware College, and unsuccessfully advocated its location at Wilmington. The president of one of the oldest banks in

Very truly yours
Martin W. Bates

Wilmington, and a director in the first Fire Insurance Company organized in the State, he also bore a principal part in obtaining the city charter of Wilmington, and in the earliest steps taken to construct the railroad between Philadelphia and Baltimore *via* Wilmington.

At all times interested in public affairs, his opinions in relation to them were frankly avowed and consistently adhered to. Belonging to the Whig school in politics, he was an enthusiastic admirer of Webster and Clay, the distinguished chiefs of that now historic party, and took his share of political campaigning, at a time when "stump speeches" were perhaps more necessary and useful than in these latter days of abundant documents and the ubiquitous newspapers.

On the inauguration of Major Thomas Stockton as Governor of Delaware, in 1845, Mr. Wales was appointed Secretary of State, and in March, 1849, he was elected by the Legislature to the Senate of the United States, to fill the unexpired term of John M. Clayton, who had entered the Cabinet of President Taylor. His service as Senator was of short duration, ending on March 4, 1851, the Democrats having in the mean time obtained a majority in the Legislature and selected James A. Bayard to succeed him. He had now virtually retired from the active practice of the law, and although deeply interested in the momentous and exciting questions which were hurrying the country, almost imperceptibly, into the vortex of civil war, he abstained from engaging in public discussions—his advancing age, indeed, exempting him from the labors of a political canvass—being content to have it known that he was opposed, as he always had been, to the extension of slavery, that he was hostile to secession and every form of disunion, and that he approved the principles and policy of the Republican party. After the war of 1861 had commenced, and during its progress, he felt, in common with thousands of his fellow-citizens, the deepest anxiety for the future of the country, although he never lost confidence in his opinion that the unhappy conflict would terminate in the preservation of the Union; and the military transactions of 1863 confirmed him in the belief that the cause he had so much at heart would soon be triumphant.

He was fortunate in the enjoyment of a serene old age, in the possession of an unclouded mind and of a happy, contented disposition to the end of his life. A regular attendant on public worship, his religious convictions were strong and sincere, but not demonstrative, appearing more in reverence of manner and charity of judgment than in open professions. He died after a short illness, which he was fully conscious from the first would prove fatal.

He was married on the 12th of June, 1820, to Miss Ann Patten (the only daughter of Major John Patten, and a granddaughter of Rev. John Miller, both of Kent County), a woman remarkable for her superior qualities of mind and heart. She died November 10, 1843, in the forty-fourth year of her age. Of

this marriage two sons and three daughters survived their parents,—Leonard E., John P., Catharine B., Matilda C. (since deceased) and Josephine M.

Elisha D. Cullen, in his day and generation one of the leaders of the bar of Sussex County and of the State, and a noted member of Congress, was born in Millsboro', Sussex County, April 23, 1799, and was a son of Charles M. and Elizabeth (Harris) Cullen. His father was an influential member of the Legislature, and his ancestors, who were from Scotland, were among the earliest settlers of Kent County. Elisha was educated at Princeton, studied law with Peter Robinson, afterwards associate judge, and was admitted to the bar in October, 1821, from which time he practiced in Georgetown until his death, in February, 1862. He was elected to Congress on the American ticket in 1854, and distinguished himself by his cogent reasoning and splendid oratory upon the great problems of the period, especially the Kansas and Nebraska question. He was a Democrat and the leader of this party in Sussex. His wife was Margaret, daughter of Robert West, of Lewes, by whom he had six children, among them Charles M., a lawyer of Georgetown.

Martin Waltham Bates was born February 24, 1786, in Salisbury, Conn., but at an early age his father removed to Berkshire County, Mass. He expected to be educated at Williams College, but, when the time came, his father was unable to give it to him, and consequently, at the age of nineteen, he was obliged to take upon himself his life-work and came to Delaware, settling first near Warwick, in the State of Maryland, and teaching school in both States. While thus earning his living he studied medicine, and then attended lectures and received the degree of M.D. from the University of Pennsylvania. Upon his graduation he settled in Smyrna and attained a good measure of success in his profession, but his health broke down and he was obliged to abandon the practice of medicine, and thereupon moved to Dover and engaged in mercantile pursuits. In the financial stress which followed the last war with England he became involved in difficulties and was unable to continue his business, abandoning it under what was, for that period, a heavy load of debt, which he was unable to pay and was very leniently treated by his creditors. A long time afterwards, having entered upon a new calling, he paid all his debts, principal and interest. Prior to his failure in business he had acquired quite a reputation in Dover as a debater, taking an active part in a society organized for that purpose, and with great misgivings—having then a wife and one child depending upon him—he accepted the advice of some of the leading members of the bar of Kent County and entered upon the study of the law in the office of the Hon. Thomas Clayton. He was admitted to the bar October 5, 1822, achieved an early success, and from that time until his retirement from active practice was recognized as one of the leaders of a bar, which contained a number of exceptionally able men.

Dr. Bates was very industrious and methodical,

always absorbed in the cause of his client, a fine pleader and thoroughly familiar with the practice of the court. He formed his opinions deliberately and then adhered to them tenaciously. He was a judicious counselor, a good *nisi prius* lawyer and argued questions of law in the Court of Errors and Appeals with discrimination and force.

He took an active part in politics, having been a Federalist so long as that party existed, and afterwards a Democrat. He was a member of the State Legislature in 1826, and a very active participant in the Constitutional Convention of 1853. He strongly advocated the right of the convention to act, and his speeches on that subject presented with great force the inherent right of the people, in an orderly way, to revise and amend their own Constitution. During the time when his party was in a minority he was an acknowledged leader in its counsels and was three times—1832, 1834 and 1836—the candidate of his party for Congress. It has always been understood that his sagacious leadership contributed very largely to the final triumph of the Democratic party over its opponents in 1852.

In 1857 Dr. Bates was elected to the United States Senate to fill the unexpired term of the Hon. John M. Clayton, who had died in the latter part of the previous year. Mr. Clayton had been elected when the Whigs had temporarily recovered the control of the Legislature.

On his way to Washington to take his seat in the Senate, Dr. Bates had a fall upon the ice in Wilmington, which caused a fracture of the thigh and compelled him to use crutches during the remainder of his life. Both his tastes and his mental characteristics were such that had he been able to remain in the Senate he would undoubtedly have become an influential member of that body; but his spirit was much broken by his physical infirmities, which included, not only the lameness referred to, but also partial blindness, resulting from cataract, from which, during the latter part of his life, he was partially relieved by an operation on one of his eyes. He retired to private life in 1859, and, thenceforth, resided quietly in Dover until his death, which occurred on January 1, 1869.

The history already given of Dr. Bates' early life is, of itself, sufficient to indicate that he was a man of unusual force of character. Foiled in his original scheme of life, and obliged to abandon his chosen profession, in the practice of which he had progressed far enough to show that certain success was before him, he resolutely turned into a new current and pressed forward with energy in the totally different pursuit which then opened before him. His situation at the time of his business failure was sufficiently grave to have disturbed the equanimity and discouraged the energy of even a more than ordinarily capable man. He was about thirty-five years of age and had a family; debts were hanging over him, and he had failed already in two distinct lines of

life upon which he had entered. Even a stout-hearted man might have faltered under such depressing circumstances; not so with Dr. Bates. Turning his back upon his failures, he took up the burden of life anew and resolutely entered, in his thirty-eighth year, upon what proved to be a singularly successful career. He had inherited from his New England ancestry a remarkably self-reliant character and a well-balanced mind, which was not discouraged by the continual conflict with the adverse circumstances which had hitherto stood in his path. Neither in his professional success, nor in his reputation as a lawyer, among his contemporaries has he been surpassed by any of the able men who have adorned the legal profession in Delaware. No man could have attained to his position in the profession without a thorough aptitude for it.

As a politician Dr. Bates' convictions were not hastily formed, but when formed, they were not likely to be abandoned. His political opinions rested upon his convictions of what was the true basis of free government, and led him to adhere devotedly to the fortunes of the Democratic party at a time when mere expediency would have led men into the ranks of the Whigs. The fact that his party was in the minority had no terrors for him; and even when many leading men in Delaware left his side in the Democratic ranks upon the issues raised during Jackson's administration, Dr. Bates continued his support of him and fought, campaign after campaign, until what had seemed a hopeless minority became a victorious majority.

In his personal habits Dr. Bates was very economical and his prudence in his own expenditures enabled him, from the comparatively small professional income of a lawyer in a country county at that day, not only, as already stated, to pay all his old debts, but also to exercise an unusually judicious charity in the most systematic manner, having to the end of his life resolutely set apart for charitable and religious purposes a tenth of his income; and to such an extent did he carry this principle that, by his will, he devoted the same proportion of his estate to the like uses. Not long before his death he made a codicil to his will increasing his bequests for eleemosynary purposes, stating at the time he did so, that he was afraid that his estate might prove to be larger than he had anticipated and that his bequests for such purposes must be increased, in order to amount to the proper proportion. Starting as late in life as he did, and having discharged the burdens upon him, he still accumulated what was, for his day, a moderate fortune. This he used very largely for the benefit of the neighborhood in which he lived and, in many instances, relieved men from executions in the hands of the sheriff by loaning them money which gave them encouragement and hope for the future, and such loans were almost always repaid. One of his most striking characteristics was his keen sense of, and capacity for, humor. His dry and trenchant criticisms

upon men and things were long remembered by his contemporaries, and were sometimes the source of pain to the subjects of them and, by re-action, of sorrow to himself. This faculty, coupled with his other mental characteristics, made him an unusually able debater and distinguished him among his fellows in every stage of his career.

His death evoked a general expression of regret from the people of the state. The General Assembly convened on the day appointed for his funeral, and immediately upon their organization, both Houses adjourned out of respect to his memory.

James A. Bayard (2d), of whose father a sketch has already been given, was born in Wilmington November 15, 1799. He attended Princeton and Union Colleges, graduating from the latter when nineteen years of age, and was admitted to the bar of Delaware in the spring of 1822. He began practice auspiciously, and was still a young attorney when his reputation led to his being selected as one of the counsel for the Chesapeake and Delaware Canal Company in the celebrated case of *Randel* against the company for breach of contract in constructing their works. The amount involved in the suit was nearly a quarter of a million dollars. The plaintiff was represented by John M. Clayton, James Rogers, George Read, Jr., and Chas. J. Ingersoll, and the company by Attorney-General Robert Frame, James A. Bayard and Walter Jones, of Washington. The case was an important one, and lasted two months. It brought Mr. Bayard increased reputation, and from this time on he was employed in nearly all of the leading cases before the courts until 1843, when he removed to New York, where he practiced for three years. In 1846 he returned to Wilmington, and resumed his high position among the attorneys of Delaware. It was, however, as a politician and statesman that Mr. Bayard achieved his greatest distinction. He was at first unsuccessful, twice being defeated in the campaign for Congress, in 1828 and 1832, when he ran as a Jackson Democrat, and the party was in a hopeless minority. In 1838 he was again a candidate, but the State Senate, then under the control of the Whigs, refused to go into joint ballot, and as a result, Delaware had but one Senator from 1839 to 1841. It was not until 1850 that his political success began. The party to which he belonged then carried the State, and he was elected to the Senate of the United States for the full term of six years, upon the sixteenth ballot, his competitor being Hon. Martin W. Bates. In 1857 he was returned for another term, and again in 1863. He opposed the prescribing of the test oath, but after its adoption by the Senate, subscribed to it, and then immediately resigned. George Read Riddle was elected as his successor, but he dying in 1866, Gov. Gove Saulsbury appointed Mr. Bayard to fill the vacancy, and upon the assembling of the Legislature he was elected by that body to fill the remainder of the original term, which expired March 4,

1869. This closed his public career, and his remaining years were passed in retirement, at his house in Wilmington. He died June 13, 1880. In early life he married Annie, daughter of Thomas Willing Francis, of Philadelphia, whose death occurred in 1864. Their surviving children are Hon. Thomas Francis Bayard, Mrs. Levi C. Bird, of Wilmington and Mrs. B. Lockwood, of New York.

William Huffington was born in Sussex County in 1793, and studied law in Dover, in the office of Hon. John M. Clayton, and was admitted to practice in 1823.

He was a fluent speaker and a ready writer. On being admitted to the bar, he at first received quite a flattering clientage; but he soon became more enamored with politics and literature than with his profession. In 1838 he became the editor and proprietor of *The Delaware Register*, a monthly magazine, published by Samuel Kimmey, at Dover. This periodical, though well edited, was discontinued at the close of one year, the enterprise being too far ahead of its time.

In 1840 Mr. Huffington was placed on the Whig ticket and elected as a Representative in the General Assembly of the State, in which body he addressed himself with great energy to the abolishment of the laws authorizing imprisonment for debt, and, after a very severe struggle with old-fogyism, his efforts were crowned with success.

In 1845 he removed to Wilmington, and having become a Democrat, was nominated afterwards by that party and elected mayor of Wilmington, which office he filled with great satisfaction to the people of that city.

Mr. Huffington never married. He died at Wilmington.

Thomas Robinson, of Sussex County, admitted in 1823, was the eldest son of Judge Peter and Arcada (Robinson) Robinson, and was born in 1800. He was a graduate of Princeton, studied law with his father at Georgetown, became an attorney of distinction and was elected to Congress as a Democrat in 1838, being afterwards defeated by George B. Rodney. He never married.

Robert Frame, son of Robert and Mary, was born December 6, 1800, in Indian River Hundred, Sussex County, near St. George's Protestant Episcopal Chapel. His mother was a widow when she married the father of the subject of this sketch. Dr. William Burton, Governor of Delaware 1859-63, was her son by her first husband and the half-brother of Robert Frame. Mr. Frame read law at Dover in the office of the Hon. John M. Clayton and was admitted to the bar at Dover in 1824. The writer of this sketch has frequently heard Mr. Clayton say that so diffident was Mr. Frame before and for some time after his admission that he had great difficulty in dissuading him from abandoning the profession of law altogether. It was with great difficulty that he could be brought to the point of undergoing an examination, but no

young lawyer ever passed a better one. He at once took a leading position in his profession, and in 1830 was, on the recommendation of his preceptor, appointed by Governor David Hazzard attorney-general of the State, and young as he was when appointed, that office has never been in the history of the State more ably filled and it is not probable that it ever will be. He was a man of extraordinary personal beauty and was no less remarkable for his keen, flashing wit and fine sense of humor than for his profound ability as a jurist and advocate. John M. Clayton, who was himself one of the very best lawyers of this country, often spoke of Mr. Frame as having no superior and very few equals as a lawyer in any State of the Union. He was associated with Mr. Clayton in the celebrated case of *Randel vs. The Chesapeake and Delaware Canal Company*, Mr. Frame being of counsel for defendants.

Mr. Frame was a devotee to his profession, and though a decided Whig in his sentiments, rarely devoted any time to politics. But he possessed the confidence of his party and against his own inclination was several times elected to the General Assembly, and had his health not been so feeble he would no doubt have been returned to the United States Senate instead of Hon. P. Spruance in 1847.

He married, in 1829, Jeannette McComb Clayton, the daughter of Hon. Thomas Clayton, chief justice of the State and subsequently for several terms United States Senator in Congress. His health became delicate from pulmonary trouble in 1845, and in 1846 he removed to the city of Wilmington, where he died a year later at the age of forty-seven years, and was buried in the Presbyterian Church-yard there. He left three children to survive him,—Robert, Thomas Clayton and Julia, all of whom are now living, Thomas being a prominent physician in Kent County and Robert a skillful druggist in Milford, Delaware.

Andrew Caldwell Gray, who came to the bar in 1826 and led a long and honored career, was a native of Kent County, born May 25, 1804. His father, a man of prominence in the State, was Andrew Gray, and his mother was a daughter of Colonel John Rodgers, of Harford County, Maryland, and sister of the Commodores John and George Rodgers, distinguished in the naval warfare of 1812-15. His father was a graduate of the University of Pennsylvania, and was frequently elected as a member of the General Assembly of the State, and from him his son, the subject of this sketch, inherited a strong taste for the classics, which clung to him through life. His father, having moved with his family from Kent in 1808, and settled in Mill Creek Hundred, New Castle County, the early education of Mr. Gray was received at Newark Academy, and he went from that institution to Princeton College, from which he graduated in 1821, at the age of seventeen. His legal studies were pursued with Judge James R. Black, then at the bar; and upon his admission he settled at New Castle,

where the remainder of his life was spent. He early attained a lucrative practice, and maintained great activity both in his profession and in the business world throughout his life.

As a lawyer, his arguments before the court were conspicuous for strong legal apprehension of the point of his case and clearness of presentation. He was for many years the counsel of the Chesapeake and Delaware Canal Company, and from 1853 to his death was its president.

After 1854 Mr. Gray almost entirely retired from the practice of the law, and became absorbed in the canal and railroad interests of the State. He was one of the projectors of the Delaware Railroad and one of its directors from the time of its organization. He was also president of the New Castle and Frenchtown Turnpike and Railroad Company, and of the New Castle and Wilmington Railroad Company until its consolidation with the Philadelphia, Wilmington and Baltimore Railroad Company.

He was connected with the Farmers' Bank at New Castle as director as early as 1838, and subsequent to 1849 was its president nearly or quite to the time of his death. He was also, for a number of years, president of the New Castle Manufacturing Company, one of the earliest locomotive-building concerns in the United States.

He refused repeatedly to allow his name to be presented for candidacy for public office, though frequently urged to accept the nomination for Congress and other high positions. He was, however, sent by his fellow-citizens of New Castle County to represent them in the Constitutional Convention of 1852, from which, after making an able speech denying the legality of the call for the convention, he retired.

Although not a politician, Mr. Gray was a prominent Democrat. At the time of his death, January 10, 1885, he was the "Nestor" of the Delaware bar, being the oldest member in point of admission. Mr. Gray was distinguished throughout his long life for the robust moral fibre of his character, his uncompromising probity, his benevolence and his unselfish public spirit.

An honor, unusual in the case of a private and unofficial citizen, was paid to his memory by the Legislature of the State, which was in session at Dover at the time of his death. It evidenced in an impressive manner the respect with which Mr. Gray had been regarded by his fellow-citizens throughout the State.

The following joint-resolution was passed at Dover May 13, 1885, when the news of his death was received:

"CHAPTER 839.—*Joint Resolution of adjournment, in order that members may attend the funeral of A. C. Gray, Esq.* WHEREAS, by the recent demise of Andrew C. Gray, Esq., the State has lost one of its most substantial and respected citizens, a gentleman distinguished alike for his public virtues and private worth, and one who, by his promotion of and official connection with several of the most important public improvements within our borders, has contributed largely towards the development and material prosperity of our Commonwealth; and whereas many members of this General Assembly will desire to attend his funeral, which takes place at New Castle on Wednesday, the 14th inst., therefore

"Be it resolved by the Senate and House of Representatives of the State of

HISTORY OF DELAWARE

[illegible]

He was true to his profession, and true in his sentiments, rarely desisting from protest. But he possessed the courage of his party and against his own inclination was bound to the Greenback sentiment. He refused to see he would have been a member of the United States Senate and U. S. Supreme in 1877.

He was born in 1815, at Mount Vernon, Virginia, the son of William Thomas Clayton, chief justice of the State, and subsequently for several terms United States Senator in Congress. His health became delicate from childhood, and he died in 1846, and in 1846 he came to the city of Wilmington, where he lived a comfortable life of thirty-seven years and was buried in the Presbyterian Church-yard there. He left three children to survive him—Robert, Thomas Clayton and Julia, all of whom are now living. Thomas being a prominent physician in Kent County and Robert a skilled draughtsman at Annapolis, De-
ssette.

ALFRED NEWCASTLE GRAY, who came to the bar in 1876, followed a long and honored career, was a native of Kent County, born May 25, 1834. His father, a man of prominence in the State, was Andrew Gray, and his mother was a daughter of Colonel John Rodgers, of Hartford County, Maryland, and sister of the Commodore John and George Rodgers, distinguished naval warriors of 1812-15. His father was a graduate of the University of Pennsylvania, and was frequently elected as a member of the General Assembly of the State. From his father, the subject of this sketch, inherited a strong taste for the classics, and a liking for mathematics. His father, having moved with a family from Kent in 1838, and settling in Mill Creek Hundred, New Castle County, the early education of Mr. Gray was received at New Castle Academy, and he went from that institution in 1851 to the University of Pennsylvania, where he graduated in 1854, and returned home with the reputation of being a first-class man. His legal studies were pursued with John C. James & Co., then at the bar, and also his cousin, E. H. Smith at New Castle.

where the remainder of his life was
 spent, and a creative practice and creative
 activity both in his profession and in the
 world throughout his life.

As a lawyer, his arguments for the construction of strong legal opposition to point of his case and advantage of present work for many years the counsel of the firm DeWitt, Catell Company, and his death was its president.

After 1864 Mr. Gray withdrew from the active practice of the law and became a prominent and successful investor in canal and railroad interests of the State. He was one of the promoters of the Delaware Canal and one of its directors from the time of its completion. He was also president of the New Castle and Town Turnpike and Railroad Company of New Castle and Wilmington from the time of its consolidation with the Philadelphia, Wilmington and Baltimore Railroad Company.

He was connected with the Farmers' Trust Co. as director as early as 1885, and in 1890 was its president nearly or quite to his death. He was also a member and president of the New York Manufacturers, one of the earliest bodies of business men in the United States.

He refused repeatedly to allow his name to be presented for candidacy for public office, and frequently urged to accept the nomination for Governor and other high positions. He was elected a citizen of New Orleans, Louisiana, and sent them in the Constitutional Convention from which, after making an able speech on the legality of the call for the convention, he withdrew.

Although not a politician, Mr. Gray was a Democrat. At the time of his death, in 1885, he was the "Nester" of the town, being the oldest member in point of age. Mr. Gray was distinguished throughout his life by the robust moral fibre of his character, his unflinching probity, his benevolence and his public spirit.

An honor, unusual in the case of a public official, was paid to him in the funeral service of the State, which was in session at the time of his death. It was a fitting manner and respect with which Mr. C. was regarded by his fellow-citizens throughout the State.

The following counter-indication was received on May 13, 1980, when the news of the arrest was received:

[illegible]

Albany

Delaware in General Assembly met, That, in order to afford members an opportunity to attend the funeral, this General Assembly will adjourn on Wednesday, the 14th inst., at 10.30 o'clock a.m."

At a meeting of the Bar Association at New Castle, January 14, 1885, Judge William Whitely offered the following resolutions, which were passed unanimously:

"Resolved, That by the death of Andrew C. Gray, Esq., the bar of this county and State have lost a member who, by his learning in the law and faithful practice thereof, has secured the respect and esteem of all his associates, and one who, by his spotless and benevolent life, has commanded the high consideration and affectionate regard of all who knew him."

"Resolved, That Mr. Gray's life since his retirement from the bar has presented, by his careful attention and management of one of our great corporations, a grand illustration of how the clear, direct and logical mind can adapt itself to and preserve and benefit business interests."

Mr. Gray's early professional associates and rivals were James Rogers, the Reads, Black, Richard H. and James A. Bayard, the Johns (father and son), John Wales, Booth, Gilpin and Rodney. Mr. Gray was married to Elizabeth M. Schofield, of Connecticut, daughter of Frederick Schofield, Esq., and granddaughter of Major Starr, famous in the Revolution. They had five children, of whom the present well-known lawyer and United States Senator, George Gray, was the second.

Henry Stout was the son of Hon. Jacob Stout. He was admitted to the bar of Dover in 1826, and removed to Baltimore, where he practiced successfully for a number of years. He afterwards returned to Dover and died there in 1865. While in Baltimore he assisted in a codification of the laws of Maryland and was made an associate judge by a special enactment of the Legislature. His contemporaries at the bar speak of him as possessed of a remarkable legal memory. His mind was a store-house of decisions of the courts, and it is said of him, that he could readily, when questioned upon a legal point, refer from memory to numerous decisions, giving the reports in which they could be found and in many instances the page itself. Legal papers drawn by him were models of ingenuity and skill. His opinion in law was seldom ever questioned and was always held in the highest estimation by his brethren of the bar. His wife, Sophia G. Stout, and two sons, Dr. Henry W. Stout and Dr. Emanuel J. Stout, survive him.

Samuel Hackman Grubb was born the 2d day of February, 1803, and was admitted to the bar in October, 1826. Owing to ill health, he was not permitted to pursue his profession for any great length of time, although he gave every promise of a successful lawyer. Being a conscientious worker, it was only after his health completely failed him that he relinquished his practice, and what would have become a career of some prominence was prevented by his early death, at the age of twenty-seven years, on the 31st day of September, 1830.

James Latimer, a descendant of James Latimer, of Newark, and a son of Dr. Henry Latimer, of Wilmington, was a student-at-law in the office of Louis McLane, and was admitted to the bar of New Castle

County in October, 1826. He at once opened an office in Wilmington, and practiced until his death, which occurred a few years later at Pittsburgh, Pa., when on his return from New Orleans, where he had been for his health.

Ignatius T. Cooper, in his later life a minister of the Methodist Episcopal Church, son of Judge Richard Cooper, and born March 16, 1806, was a lawyer of Dover as early as 1828, having been admitted in that year, after studying with Chief Justice Thomas Clayton. In 1832 he was chosen clerk of the House of Delegates and the following year a member of that body. He abandoned the bar abruptly to take up the ministry in 1834, and labored actively at his chosen calling until 1860, when he retired and took up his residence in Camden, Del. He died recently, leaving a large family.

Charles Marim was born in Kent County, near Dover, A.D. 1804. His father, John Marim, was the owner of "Cherbourg," his country seat in St. Jones' Neck, and of a large tract in the adjoining neck, "Little Creek," called "Chipping Norton." His mother, Hannah (Stevens) Marim, was also of a Delaware family.

Charles Marim was an apt scholar, acquired an excellent education, and making choice of the legal profession, read law with Hon. John M. Clayton; after a thorough course, was admitted to the bar of Dover at the March session of the court, 1827.

He practiced law but a short time, and in 1830 removed to the farm in Little Creek Neck, which he inherited from his father. He hoped by thus engaging in a more active life to ward off the dejection of spirits,—induced by confinement to office duties,—as his frame or temper of mind was so constituted as to subject him to periods of mental depression, which took the form of hypochondria. His farm comprised a fine tract of near three hundred acres, and Mr. Marim entered enthusiastically upon its improvement. His literary and legal knowledge soon gave him a prominent position in the affairs of the county and State, and his acknowledged ability as an orator brought demands for his services on many special occasions. His public addresses were everywhere well received.

In politics Mr. Marim was an ardent Whig, represented his county several times in the Legislature, where he was instrumental above any man, except perhaps the late venerable Judge Hall, in preparing the bills and securing the legislation upon which the Delaware free-school system was founded.

On assuming office as chief magistrate in 1837, Governor Cornelius P. Comegys appointed Mr. Marim Secretary of State, and he served in that capacity and as the legal adviser of the Governor during his term of office—four years. He was the Whig candidate of Little Creek Hundred for delegate to the convention of 1852-53, to revise and amend the State Constitution, but was defeated by his Democratic opponent by a few votes.

On the assembling of the delegates in December, 1882, Mr. Marim was elected secretary of the convention by a large vote, and at the close of their labors in March, 1883, he was tendered a vote of thanks for "able, prompt and efficient services."

Mr. Marim possessed a memory wonderfully tenacious, a fund of wit and humor, and as a conversationalist was always entertaining, and, in fact, had few equals. His society was greatly enjoyed by his numerous friends. In 1832 he married Susan Blundell Emerson, sister of the late Dr. Gouverneur Emerson, and stepdaughter of the late Manlove Hayes. One son, the only issue of this marriage, died an infant, and this loss was soon followed by the death of his wife.

One of the pleasant results of this marriage was a strong mutual attachment between Mr. Marim and the relatives of his wife. Her mother and father, Mr. and Mrs. Hayes, regarded him with the same tender affection that was bestowed on their own children, and his interest in the younger members of the family existed as long as he lived.

Mr. Marim removed from "Chipping Norton" to Wilmington about 1855 and opened a law-office, but remained only a short time, his health was much broken, and he returned and purchased a house in Leipsic, six miles from Dover, where he resided until his death, which took place March 25, 1858, in the fifty-fourth year of his age.

George B. Rodney was born at Lewes, in Sussex County, in the year 1800. Having received a liberal education, he was appointed, while yet a very young man, register in Chancery and clerk of the Orphans' Court for that county. Whilst filling these positions he studied law with Hon. Peter Robinson, and was admitted to the bar in 1828. Shortly after his admission to the bar he removed to New Castle, and by his ability and diligence soon acquired there a lucrative practice. He was a gentleman of polished culture, most agreeable manners and great popularity. In 1840, when the old Whig party were casting about for competent and popular men to lead their State ticket, Mr. Rodney was placed at its head as the candidate for Representative in Congress, with Wm. B. Cooper as candidate for Governor. The result of the election demonstrated the sagacity of the convention which placed them in nomination, and was the most brilliant triumph ever achieved by the old Whig party in the State of Delaware. In 1842 Mr. Rodney was again elected to the House of Representatives. Few men, if any, ever more ably or faithfully represented this State in that body. He was an able debater, a skillful and accomplished lawyer, and in social life was most highly esteemed by those who knew him best.

His first wife having died, he afterwards married Miss Duval, of Germantown, Pa. He was a descendant of Wm. Rodney, a member of an old English family in Somersetshire, from "time whereof the memory of man runneth not to the contrary," and emigrated to this country with William Penn in 1682.

He was Penn's legal adviser, and a man of great learning and fine native ability, which has been a marked characteristic of the Rodney family in each generation down to the present time.

William T. Purnell was born in Worcester County, Md., in 1807; received an academic education; studied law in the office of Hon. John M. Clayton at Dover, and was admitted to the bar at Dover in 1828. Shortly after his admission he settled at Port Gibson, in Mississippi, where he enjoyed quite a large practice. In 1850 he was appointed by General Taylor United States consul to the port of Bahia, in Brazil, which office he filled for several years, but resigned during the administration of Mr. Fillmore, who appointed him agent for the protection of government live-oak timber lands, with headquarters at Biloxi, Miss. After the inauguration of Mr. Pierce to the Presidency, he was removed from this position, and returned to Worcester County, where he died during the War of the Rebellion, aged about sixty years.

Joseph Miller Patten, born near Dover, Del., November 20, 1799, died at Wilmington, December 11, 1887, was the son of Major John Patten, a sketch of whose life is given elsewhere. His parents having died before he was two years old, he was left to the care of an aunt who resided in Wilmington, where his early boyhood was passed. He was educated at Newark Academy (Delaware), an institution of high repute at that period, and at Lawrenceville, N. J., studied law in the office of his brother-in-law, John Wales, admitted to practice in December, 1829, and at the time of his death was the oldest member of the Delaware bar then living. He was never able, however, to enter upon the active practice of the law, being incapacitated by severe bodily afflictions from taking even a subordinate part in any of the active pursuits of life. His frail and delicate constitution required unremitting care for the preservation of his health, and just when he had passed his majority, an apparently slight difficulty of hearing rapidly grew into a total and chronic deafness, which excluded him not only from general social intercourse, but put him practically out of the race, so far as concerned a business career. He had been a diligent student, was not without a reasonable ambition, and was stirred by that best of human motives, the desire to be useful for the benefit of others. His high spirit and courage compensated, in part, for his lack of physical strength, and made him one of the most fearless of men. He was uniformly considerate of the rights of others, just, benevolent and disposed to be generous even to self-denial. The deprivation of hearing developed observation and reflection, and his judgment of individual character and conduct were remarkably accurate. His slender figure was familiar to more than two generations of the people of Wilmington. He enjoyed the friendship of a few and the respect of all who knew him. His life was prolonged to extreme old age.

John P. Brinckloe was born in the year 1809, in

Sussex County, Delaware. Having received such classical education as could be obtained in the best select schools of that day in that county, he studied law with Hon. Peter Robinson, and was admitted to practice in 1831, and settled at Georgetown. He was not a very finished speaker, owing, perhaps, to his natural diffidence,—a trait of character which is a great disadvantage to a practitioner at the bar.

In speaking of Mr. Brinckloe to the writer of this sketch, the Hon. John M. Clayton described him as a man whose excessive diffidence and keen legal acumen would never permit him to make any point of law or evidence before the court which was unworthy of their close attention and thorough consideration, and one who never failed in the careful preparation of his cases, and who, as a young practitioner, gave promise of a successful career at the bar. Mr. Brinckloe was originally in politics a Whig, but in 1838 he joined the Reform party in Sussex County, of which he became the leader. By the aid of the Democratic party, which in that year made no ticket of their own, but adopted that of the reformers, Mr. Brinckloe, who had been placed on that ticket as a candidate for the House of Representatives in the General Assembly, was elected, and he was made Speaker of the House. Not long after the close of the session of the Legislature of 1839 his health began to fail, and before another session of that body the pulmonary consumption consigned him to the grave. He died in Georgetown in 1840, and left no family to survive him.

Trusten Polk was born in Sussex County, May 29, 1811, and graduated from Yale College in 1831. He studied law at the Yale law school, and in 1835 removed to St. Louis, where he became very successful in his profession. In 1845 he was elected a member of the Convention for Revising the Constitution of Missouri, and in 1848 was a Presidential elector. In 1856 he was elected Governor, but soon after his installation resigned to accept a seat in the United States Senate, from which (being an ardent Southern sympathizer) he was expelled January 10, 1862, for disloyalty.

Saxe Gotha Laws was born in Kent County in the year 1800. He received a liberal education and studied law with Robert Frame, Esq., and was admitted to the bar at Dover in 1833. In politics he was originally a Whig, but became a Democrat in 1836, and in January, 1839, was made clerk of the Senate by the Reform party. He had very little taste for the profession of the law, but devoted most of his time to politics and mathematics and other scientific studies. There was probably no man in the State more learned in the exact sciences. He never married and in the latter years of his life became almost a recluse. He died in the summer of 1876, on his farm in Jones' Neck, after a short but very severe attack of illness.

Some time about the middle of the seventeenth century Colonel Henry Ridgely came from England and

settled in the province of Maryland. He had several children, one of whom was also named Henry, to whom was born a son named Nicholas on the 12th of February, 1694. Nicholas had several children, one of whom was baptized as Charles Greenberry, but, on attaining his majority, discarded the middle name, and wrote his name simply Charles Ridgely. He was born January 26, 1737, and was the father of Hon. Henry Moore Ridgely, who married Miss Sarah Banning, and was the father of the subject of this sketch—Charles George Ridgely, who was born at Dover on the 12th day of August, 1804. When quite a child he gave evidence of extraordinary intellectual gifts, as will be seen by the following letter addressed to him by his father whilst the latter was serving his State in Congress at Washington, which at once displays the beautiful moral character of both father and son:

"WASHINGTON, 29th November, 1812.

"MY DEAR CHARLES:

"HAVING just finished a long letter to your mother, I now sit down, although it is late in the afternoon, to answer your favour of the 23d of this month, which, with pleasure, I received and read on Thursday last.

"I am highly pleased that you read in 'Homer's Iliad' every day, and hope that you will continue to admire it more and more. It is a beautiful poem, and the more it is read and understood, the more it will be admired by every person. In truth, no person of any taste can read it but with delight. I trust that by this time, too, you have made yourself acquainted with the history of the 'Life of Homer,' who has been justly called the Prince of Poets. No doubt you have felt great desire to know something of the life and character of so famous a man. If you have not read his life, you will find a sketch of it in 'Lempriere's Dictionary,' and it can, I hope, only be necessary to tell you where you may find his life to induce you to read it. Now, my dear son, is the season with you for improvement. You should acquire habits of reading and thinking early in life. If you are ever at a loss to understand anything, inquire of your mother, and never rest till you do understand it.

"You continue still, I hope, to read every day in the Bible; that is a book that you ought never to neglect. It contains the most interesting of histories, the best system of morality, and the only Guide to everlasting happiness. It teaches a knowledge of the beginning of the world—it teaches your duty to your God, your country, your parents and your neighbours. You will, therefore, I hope, not fail to read it attentively, and, as your understanding ripens, make yourself master of it, at least as much as a man can make himself master of it.

"I am delighted to hear from your mother in every letter that you are a good boy. Nothing will give me so much pleasure as for you to continue so, and as you increase in years to increase in every virtue.

"Write to me very frequently, and tell me all the news of Dover. Is any word in this letter spelt wrong?

"Your truly affectionate father,

"H. M. RIDGELY."

The boy was not long in discovering that the word "*Iliad*" had been misspelled. It is not at all wonderful that his father should have taken both pride and pleasure in watching the intellectual development of a son who, at the tender age of eight years, should take delight in reading Homer's "*Iliad*" in the language of its author. He directed his studies himself, and at an early age he placed his boy at St. Mary's College, Baltimore, under the care of Bishop Eccleston, then president of that institution, where he graduated with the highest honor, and won from the students and faculty, by his masterly scholarship, brilliant talents, perfect deportment and beautiful disposition, their highest esteem and affection.

Having completed his course at St. Mary's, he was appointed a cadet and went to West Point, where he soon became a favorite with cadets and professors. In 1824, while he was there, General Lafayette visited

the academy, and at the dinner given in the general's honor, young Ridgely being unexpectedly called to propose a toast, instantly arose and offered: "The survivors of the American Revolution—'*Rari nantes in gurgite vasto*,' " the classical beauty of which toast evoked at the time the plaudits of the assembled guests, and attracted the notice and admiration of all the journals of the country.

Having been severely attacked with inflammatory rheumatism, which resulted in an ankylosed knee-joint, disqualifying him for military service, he resigned and came home to Dover without having fully completed his academical course. For a few years he devoted himself to general literature, and afterwards read law in his father's office, and was admitted to the bar in April, 1835. He practiced at Dover about one year, and in 1836 removed to Georgetown, Sussex County, where he at once became the favorite lawyer of the people of Sussex and the unchallenged leader of the old Whig party in that county. He had scarcely been a year there when his name appeared on the trial list of the county as the attorney on the one side or the other in almost every cause. He had, while a student, thoroughly equipped himself from the armory of common law text-books with a full panoply of legal weapons offensive and defensive, which he used with that consummate skill he had acquired under the tuition of his father, one of the very ablest lawyers of his day. To these advantages he added untiring industry in the preparation of his cases; so that he was ever ready for the "occasion sudden," which the *nisi prius* practitioner has so often to encounter. His arguments were always able, eloquent and learned, and finished, so that when his speech was made there was nothing to be added.

Mr. Ridgely married, in 1835, Mrs. Elizabeth Brinckloe, the widow of Dr. John Brinckloe, of Milford, and daughter of Jacob Biddle, Esq., by whom he had two sons, George Henry and Charles Dupont. He died at Georgetown, after a short but severe illness, on the 6th of July, 1844, in the fortieth year of his age, and was buried in the Protestant Episcopal Church-yard at that place.

The writer of this sketch knew him well; and none who knew could fail to love him. As a scholar he had no equal in the State in his day, and few, if any, since then. A thorough mathematician, he was equally thorough in the ancient languages, history and archaeology, and spoke the French and Spanish as fluently and correctly as the most accomplished citizen of Paris or Madrid. His manners bespoke him the perfectly polished and refined gentleman, but at the same time were reassuring to the most retiring and diffident. No person could come into his presence and converse with him without feeling at his ease, though in the presence of a man of wonderful endowments; nor could any person hear the sound of his musical voice without becoming an attentive listener.

Had he lived a few years longer he would no doubt have filled in the United States Senate the seat which his father had occupied with such signal ability, for he was a young man whom all his party loved next to John M. Clayton (eight years his senior), especially the young men; and the people would have demanded to know the reason why if Charles G. Ridgely had been turned down whenever he saw proper to become a candidate for Senatorial or other honors. Enemies he had none, either in his own or in the Democratic party. His character had been formed after that of his father, upon the basis of strict integrity and the highest sense of honor; and the great goodness of his heart, which he wore ever on his sleeve, was so manifest in his life and deportment among men, and beamed so brightly in his genial face, that even bad men could not fail to admire him. His death was universally lamented by the people of the State and mourned as a public calamity.

Hon. Nathaniel Barratt Smithers, LL.D., was born October 8, 1818, in Dover, Delaware, and is a son of Nathaniel Smithers and Susan Fisher Barratt. Nathaniel Smithers, his father, held the offices of prothonotary and register in Chancery of Kent County, and his grandfather, also named Nathaniel, was register of wills. The ancestors of Mr. Smithers on his father's side came into "the three lower counties upon Delaware" before the Revolution, from Kent County, Maryland, into which colony they had emigrated from England. His paternal grandmother was Esther Beauchamp. His mother was the daughter of Dr. Elijah Barratt, of Camden, whose wife was Margaret Fisher. Dr. Barratt was of high repute as a physician. He was the son of Philip Barratt, who resided near Frederica, and owned the tract of land on which Barratt's Chapel was built, and in acknowledgment of whose liberality it was named. Andrew Barratt, another son of Philip, was one of the judges of the State, and was a member of the convention which ordained the State Constitution of 1792. The maternal grandmother of Mr. Smithers was Margaret, the daughter of Edward Fisher and Susannah Bowman, and through her father, lineally descended from John Fisher, who came from England with William Penn in 1682. He settled at Lewes, and his son Thomas, from whom the subject of this sketch is descended, married Margery Maud, the daughter of Joshua Maud, of Yorkshire. They were of the persuasion of Friends, and many of their descendants still adhere to and maintain its distinctive habits and principles.

The first school which Mr. Smithers attended in his youth was at Dover, taught by Ezra Scovell. When he was eleven years old his father moved to Bohemia Manor, in Cecil County, Md., and the son a little while after was placed in West Nottingham Academy, then under the general direction of Rev. James Magraw. In the spring of 1834, he entered Lafayette College, at Easton, Pa., under the presidency of Rev. George Junkin, and was graduated in 1836.

A. J. B. Swindell

[illegible]

Mr. B. gave in 1887, Mrs. E. South Bell, the widow of the father of Mr. and mother of John Bell, Esq., of Birmingham, was sent to the Army and Navy Club, and died at age 72, with other ailments but several years, on the 20th of July, 1884, in the fourth year of his age and was buried in the Groves and Chapel of Our Lady of Mount Carmel.

The writer of this letter knew how to write, and none was known could better to have done. As a writer for the Government in the State in his day, and how, if any other man. A thorough mathematician, he was equally thorough in the other natural sciences, as well as in general, and spoke the French and Spanish as fluently and correctly as the most accomplished citizens of Paris or Madrid. His manners bespoke him to be a perfectly polished man, and gentleman, not a thing of this world—singing to the most refined taste of the age, and a consummate musician, and a perfect dancer. In conversation with it, as long as he lived, there was not a moment of a moment when an opportunity was not taken to us, and we were so glad of it, that we were without being any inattentive to it.

Had he lived a few years longer he would have lived in the United States, where his father had occupied well-situated positions. He was a vigorous man when called upon by John M. Clayton, for aunts his same age, the young man, and the people were obliged to know the reason why if Clayton had been turned down whenever he saw good cause to send him for Senatorial or other honors, he had none, either in his own or in the Democratic party. His claim of had been to his father, upon the basis of strict merit, the highest sense of honor, and the great generous heart, which he wore ever on his sleeve, was the test in his life and deportment, and he was lauded so brightly in his generation, that no man could fail to admire him. His death was universally lamented by the people of the State, mourned as a public calamity.

Hon. Nathaniel Perrott Smithers, 74,
 born October 8, 1818, in Dover, Delaware, and
 son of Nathaniel Smithers and Susan Fisher. **Nathaniel Smithers**, his father, held the posi-
 tion of notary and register in Kent County,
 Maryland, and his grandfather, also in Kent
 County, was register of wills. The family came
 on his mother's side, some into the country
 upon the second* before the Revolution, from
 Kent County, Maryland, into which county he
 emigrated from England. His mother, Susan,
 was Elizabeth's daughter. His mother was
 of Dr. Litch Burritt, of Camden, whose wife
 was a great fisher. Dr. Perrott was of high social posi-
 tion. He was the son of Philip Fisher, who
 lived near Frederick, and was of the family of Dr. Litch
 Burritt's father, who was a member of the
 convention of whose fathers it was a member.
 Burritt, another son of Philip, was a mem-
 ber of the State, and was a member of the
 convention which ordained the State Con-
 stitution of 1792. The maternal grandmother
Smithers was Margaret, the daughter of
 Fisher and Susanna Bowman, his
 father, lineally descended from
 came from England with William Penn, and
 settled at Lees, and his son Thomas was the
 subject of the settlement of the
 March the daughter of John Smithers.
 They were of the persuasion of Unitarians,
 their descendants still adhere to
 tive tenets and principles.

N. B. Smithers

He then entered the law school of Judge Reed at Carlisle, Pa. By the rule regulating the admission of attorneys, a student who was a college graduate was required to study only two years. On account of his youth, and because money was desirable, Mr. Smithers spent one year in teaching a classical school at Snow Hill, Md., after which he resumed his professional studies, and in 1840 was admitted to the bar of Cumberland County, Pa.

In 1841 he returned to Dover, and began the practice of law. Having taken advantage of the excellent opportunities offered him in school and college, the education and training there acquired were of great value to him when he entered upon his profession. As a young lawyer he diligently continued his legal studies.

In politics, Mr. Smithers was a Whig; his ancestors were Federalists and Whigs. In 1844 he was tendered the nomination as Representative in Congress by the Whig party. He declined this offer, not deeming it wise to be diverted from his profession. At the session of the State Legislature in 1845 he was elected clerk of the House of Representatives, and again to the same position in 1847. In 1848 he was chosen a delegate to the Whig National Convention, which met in Philadelphia, and there voted for Scott and Fillmore. In the State Convention of the same year, which was held at Lewes, he was again tendered the Congressional nomination, but, as before, declined the offer. Soon afterwards events occurred which placed him in a position apparently antagonistic to the party from which these repeated offers had come. At the session of the General Assembly of 1847 two measures were proposed, with both of which he was in perfect accord—one for the gradual abolition of slavery, which passed the House, but was defeated in the Senate by the vote of the Speaker; the other providing for submitting the question of granting licenses for the sale of intoxicating liquors to the decision of the voters of the several counties, and which would now be termed a local option law. This bill became a statute, and at an election held throughout the State, the county of New Castle voted in favor of no license—the other two counties giving adverse majorities. The validity of the act was assailed in the courts. Mr. Smithers assisted in its defense, but the Court of Errors and Appeals decided that it was a delegation of legislative power, and therefore unconstitutional. At the next election the Whig party, as usual, was successful; but its representatives in the General Assembly not only determined not to consider these great questions, but retrograded from the action of the previous Legislature by passing enactments still further restrictive of the rights of negroes, and peremptorily refused to legislate even in restriction of the sale of intoxicating liquors. This was too much for his patience. In conjunction with others, who were of like mind, a third party was organized. Into this organization he entered heartily. The first result was the

defeat of the Whig party, which had been in control of the State for twenty years. In the nation that party was in a state of collapse. The Know-Nothing organization arose on its ruins. Into this secret association he declined to enter, but subsequently cooperated with the American party. In 1854 this party carried the State, and in 1855, a prohibitory law drafted by Mr. Smithers, was enacted. It was subjected to a legal contest, and he took part among its defenders. At the May term, 1856, in New Castle County, the court adjudged it to be constitutional and valid. Great events were hastening, which absorbed all minor considerations. The struggle of 1860 was impending. There was but one place for him, and unhesitatingly he cast his lot with the advocates of freedom, and was sent as a delegate to the Chicago Convention, and as chairman of the delegation cast its vote, first for Edward Bates and afterwards for Lincoln. He promised that at the election there would be fifteen hundred Republican voters in Delaware. After an open and unflinching canvass this promise was redeemed by a vote of about four thousand; and it was gratifying that the largest gain was in Kent and Sussex Counties. Mr. George P. Fisher, who received the united suffrages of the Bell and Lincoln voters, in about equal proportions, was elected Representative in Congress. Very soon the supporters of Mr. Bell generally coalesced with the Republicans, and in 1862 William Cannon was elected Governor. He had been a staunch Democrat, but in the peril of the Union he parted from his political associates. He offered Mr. Smithers the appointment of Secretary of State, and at his earnest solicitation, with the assurance that his administration would be in thorough accord with the national government, he accepted the tender. Though there was a Republican Governor, William Temple had been chosen by the Democratic party as Representative in Congress. He died before taking his seat. A special election became necessary, and in November, 1863, Mr. Smithers was elected to fill the vacancy, and in December took his seat in the Thirty-eighth Congress. He was placed on the Committee of Elections and the Special Committee of Reconstruction. The former committee was very important at that juncture of affairs, and was exceptionally strongly constituted. In the anomalous condition of things, many novel questions of the most delicate nature came under its cognizance. Representatives from Southern constituencies, and in some instances without constituents, were pressing for admission, and political considerations were urgent to show the result of victorious arms by the evidence of rehabilitated States.

By far the most interesting questions coming from the committee were involved in the consideration of the credentials of representatives from Louisiana and Arkansas. It was well understood that there was a desire in very high places that these representatives should be admitted. It fell to his lot to present

the views of the minority, and in discussing the matter he argued that there was no such condition of affairs in those States as to justify the recognition of representatives; that the only effective mode of restoration was to take permanent occupancy of the territory, and give such assurance of protection as would enable the people to rest secure in their demonstrations of fidelity. That this was not to be done by the creation or recognition of improvised and impotent civil governments, but by the steady advance of the army bringing the inhabitants under permanent control. The claimants were not admitted. In its conclusions, Mr. Smithers was sometimes with the majority and sometimes with the minority of the committee, but in every instance the result at which he had arrived was sustained by the House.

The Committee on Reconstruction, as it was commonly called, was necessarily in a great degree a sinecure. The time had not arrived for more than theoretical discussion. All practical questions presented by the subject grew out of the admission of members, and these belonged to the Committee on Elections. Still the committee was raised, and by tacit consent the matters contemplated by it were left to the Representatives from the border slave States. The committee never formally met, but Davis, of Maryland, prepared a bill, which he placed in Mr. Smithers' hands with the request that he should alter it as he thought proper. He deemed the whole matter of small moment, practically, but, in accordance with the request, did revise the bill, making some changes. In the unprecedented state of affairs there were various theories in relation to the status of the seceded States. It was the opinion of Mr. Smithers that the people of these States, by their revolutionary acts, had disorganized their political societies, and inasmuch as there could be no representation in Congress unless there was an organized State, under the National Constitution, and republican in form, that the judgment of Congress was necessary to determine whether such condition existed, and that no other power was competent to pass upon the question; and he further held that while the people of these States might abrogate their own governments, they could not change their relation of allegiance to the United States, but that her rights of jurisdiction and sovereignty over them as individuals remained, legally, unimpaired. Further than as embodying and enforcing this doctrine, he considered the measure as of little importance. The bill passed both Houses at a late period of the Congress, but the President quietly pocketed it. This created bad feeling with some few of its advocates, and Messrs. Wade and Davis joined in a paper containing a somewhat acrimonious arraignment of Mr. Lincoln.

Upon at least one occasion it was his fortune to succeed in a matter which the administration deemed important. The War Department was hindered in the recruiting service by the privilege of the relief from draft by the payment of commutation money.

This feature of the law the government wished to be abolished, and the Military Committee of the House had presented several bills, which had successively been voted down. While the matter was pending Mr. Smithers hurriedly drew and offered an amendment effecting the desired object. It was defeated at that time by one vote, but the next day, upon reconsideration, it passed. It was necessarily imperfect in its details, but his only care was to get it through the House, as it was known that there was little doubt of its passage by the Senate. After being slightly modified by a committee of conference, it became the law. Mr. Smithers was warmly thanked by Mr. Stanton for his action in the matter.

In 1864 the National Convention of the Republican party was held in Baltimore, and Mr. Smithers was chairman of the Delaware delegation. His vote was for Lincoln, but for the second place he voted for Daniel S. Dickinson, not being affected by the glamour of Southern loyalty which resulted in the nomination of Andrew Johnson. He was continued on the National Committee, and by it chosen a member of its Executive Committee. But one objection to his course was made by any of his party friends at home. A bill was introduced repealing all fugitive slave laws. In the condition of things he considered this measure not only to be devoid of all practical utility, but, in itself, wrong in principle. He was perfectly willing to vote for the repeal of all laws subsequent to the one first enacted, and with which everybody was satisfied until the pro-slavery crusade was inaugurated. This was not far enough, and of all his party associates he voted alone against the bill. This act caused some comment, and a few endeavored to use it against him. The attempt failed. He was again nominated, but the combined influence of disloyalty, negro equality and the draft-wheel was too much. He led his ticket, but was defeated.

In the ensuing session the consideration of the Constitutional Amendment, abolishing slavery, which had theretofore failed, was resumed, and it is hardly necessary to say that he voted for it.

In the course of this session it again happened that he was in opposition. With some others, he had become tired of military commissions organized to convict. The war was really ended, and they believed the time had come to return to the administration of justice through the usual methods of peace. An appropriation bill was pending, and an amendment was offered providing for the restriction of such abnormal tribunals. The majority of the Republicans declined to accede, but the friends of the amendment were determined, and the whole bill failed.

With this session his official career came to an end, and as he had entered upon it only from a sense of duty, he quitted it without regret; for, however pleasant may have been his associations, there were many things irksome in the manner of life, and besides, personal and domestic considerations had become of paramount importance. When, therefore, he was re-

quested to name the position which he would be pleased to have, he replied without hesitation that nothing of the kind could compensate for the enjoyment of home and the quiet pursuit of his profession.

In 1868 he was a delegate to the National Convention which nominated Grant and Colfax, and again in 1880, as chairman of the delegation, cast its vote on every ballot for Mr. Blaine. Though it was manifest that he could not be nominated, Delaware came early on the roll, and her delegation was numerically too small to effect a change of direction. To have wavered would have shown apparent demoralization, and this was only justified to be risked by a State sufficiently large to control the current. Indiana broke and turned the column without a stampede.

Mr. Smithers has thus filled an important and influential position in the politics of his native State and of the nation. While he has been a devoted advocate of the principles of the Republican party, he has always enjoyed in the highest degree the respect of his political opponents, who are ever ready to attest the conscientiousness of his motives and the integrity of his purpose. Since his retirement from his position in Congress he has been actively engaged in the practice of law, and for a quarter of a century has occupied a foremost place in the bar of his native State. He is endowed with strong intellectual powers. His perception is clear, his judgment good and his memory remarkable. Constant study and careful investigation have brought many valuable contributions to his well-trained mind, which is peculiarly adapted to the legal profession. His capacity for quick, intense and accurate thought is striking and unusual, and he can perceive and grasp the controlling points of a group of complicated facts and determine at once those upon which his case turns. He is a quick and accurate judge of character, ready and skillful in the examination of witnesses, eloquent, persuasive and convincing in addressing a jury or in argument before a court. One of his strong characteristics is the thorough mastery of any subject which he handles, arranging the facts and presenting them with clearness of conception and force of logic, so as to carry great weight and influence. His rare ability as a lawyer is universally recognized throughout his native State, and in other States where his practice extends. Amid the pressure of his professional duties he has found recreation in classical literature, and translated quite a number of Latin hymns—among them *Dies Irae*—which are noted for the careful preservation of the measure and spirit of their authors, as well as the elegance of the translation. The honorary title of Doctor of Laws was conferred upon him by his *alma mater*.

In addition to his employment in professional pursuits, he is president of the First National Bank of Dover, and a member of the Board of Education of Dover public schools.

Mr. Smithers has been twice married. His first

wife was Mary E., daughter of Joseph Smithers (a half-brother of his father), and Sally Ann, the daughter of Enoch Joyce. By this marriage there were four children, two of whom died in infancy, and a daughter, Sally Joyce, who died in 1875, in her twentieth year, and a son, Nathaniel B. Smithers, Jr., who is a member of the bar in Dover, and who married Annie Louise Moore, daughter of David W. Moore and Annie Giles, of Laurel, in Sussex County. By this marriage there is issue a son, N. B. Smithers. His second wife is Mary, daughter of William Townsend and Elizabeth Barratt, of Frederica, the latter the daughter of John Barratt and granddaughter of Andrew Barratt.

John Fisher, the first ancestor of Hon. George P. Fisher, the subject of this sketch, came to Lewes in 1682. He had two sons, John and Thomas. John had a son John and the latter a son Jabez, whose son, General Thomas Fisher, was the father of Hon. George P. Fisher. The first Thomas Fisher is the first of the line from whom descended Dr. James Fisher, of Camden, the father of John M. Clayton's wife. General Thomas Fisher was a prominent man in both Kent and Sussex Counties, and was elected sheriff of both these counties twice, the only case of the kind in the State. He moved from Lewes to Milford, on the Kent County side, in 1815. He afterwards moved near Frederica, on the farm upon which is Barratt's Chapel. After the expiration of his term as sheriff in Kent County he removed to a farm near Dover, that is still owned by Hon. George P. Fisher. General Thomas Fisher was married three times, his third wife being Nancy, the daughter of Robert and Sally Owens, of Sussex County. Nancy Owens was one of the leading spirits of the early Methodists on the Peninsula. The Fishers were all Friends, prior to General Fisher, who was an Episcopalian. From this third marriage there was one son, the subject of this sketch, who was born in Milford, October 13, 1817. He attended the schools of the vicinity until his seventeenth year, when he was sent to St. Mary's College, Baltimore, Md. Remaining here but a year, he entered the sophomore class of Dickinson College, from which he graduated in 1838. After his graduation he came to Dover, and entered upon the study of law with the Hon. John M. Clayton, at the same time teaching a private school over his preceptor's office. He was admitted to the bar April, 1841, at Georgetown, and opened an office in Dover. His ability was soon known, and he quickly surrounded himself with a large and paying clientage. The same day that he was admitted John R. McFee, of Georgetown, was admitted, making these gentlemen the oldest attorneys on record in the State. Hon. N. B. Smithers was admitted in Pennsylvania in 1840, but two weeks after Messrs. Fisher and McFee in this State.

When President Taylor selected Hon. John M. Clayton Secretary of State, Mr. Fisher first entered public life by becoming Clayton's confidential clerk.

He attracted considerable attention in Washington, and President Taylor appointed him to proceed to Brazil and adjudicate certain claims held by the citizens of this country against Brazil. This work he performed and returning home in 1852, received the warm commendation of Hon. Elisha Whittlesey for the excellence of his work. He resumed the practice of law in Dover, and in 1855 was appointed by Governor P. F. Causey attorney-general of the State for five years, at the end of which time he was made the candidate of both wings of the "People's Party" for Congress and was elected at the ensuing election by two hundred and forty-seven majority. He was renominated by the Republicans in 1862, but failed of an election. Upon the close of his Congressional term his course had attracted the attention of President Lincoln, and March, 1863, without any previous intimation, he received the appointment of associate justice of the Supreme Court of the District of Columbia. In the year 1870 he resigned this position for that of United States district attorney for the District of Columbia, which was tendered him by President Grant. He continued in this position until the year 1875, conducting the business of the office with signal ability. He then returned to Dover and has since continued to practice law there with his old-time ability, and enjoys, for one who has been so outspoken in Delaware politics, a large circle of friends of both parties. The "Rebellion History of the State" is part of Judge Fisher's life. To him, in a great measure, was due the fact that Delaware sent her quota for the defense of the Constitution and laws. Upon the organization of the First Delaware Cavalry he was made colonel, but resigned to become district judge at the solicitation of President Lincoln, and was the latter's confidential friend and adviser in relation to Delaware.

In 1840 he married Miss Eliza A., daughter of Hon. and Rev. T. P. McColley, of Milford, Del., and of Hettie (Smith) McColley. Truston Polk McColley was the son of John McColley, who was the son of Robert Watson McColley, who emigrated to this country from Scotland in 1830.

William P. Chandler was a native of Brandywine Hundred, near the Delaware line. He studied law under the direction of James A. Bayard, and was admitted to the bar of Sussex County in 1841, settled at Wilmington and practiced law for twelve years, and also engaged in the business with Caleb Johnson in managing the *Delaware Gazette*, which he continued for several years, and later settled in Philadelphia, where he died about 1883.

John R. McFee, of Georgetown, was born in Philadelphia, July 26, 1816, graduated at Jefferson College, Pennsylvania, studied law in the office of John M. Clayton and was admitted to the bar of Sussex County April 14, 1841, and began practice in Georgetown, where he continues. He was clerk of the House of Representatives of Delaware in 1843, a member and

Speaker of the House in 1853, and in 1879 was a member of the Insurance Commission.

John C. Patterson, of Wilmington, was born in that city October 24, 1815, his father and grandfather, John and Robert, having located there in 1793, upon their immigration from Ireland. Mr. Patterson graduated from Nassau Hall, Princeton, with the degree of Bachelor of Arts in 1835. After following various occupations for several years he began the study of law with Edward W. Gilpin, then attorney-general of the State, and afterwards chief justice, and in 1844 was admitted to practice in Georgetown, whither he had accompanied his preceptor, and soon after was admitted at New Castle as a solicitor in the Courts of Chancery. From the time of his admission he has practiced continuously in the courts of the State, residing in Wilmington.

He was city solicitor for Wilmington from 1865 to 1870, and was appointed, by President Hayes, United States district attorney for Delaware on March 27, 1880.

Daniel R. Wolfe was born in Christiana Hundred September 9, 1821. He moved to New Castle in 1836, later studied law with the Hon. Andrew C. Gray, and was admitted to the bar November 19, 1845, and began the practice of law in New Castle, which he continued until his death, April 18, 1859.

Alexander T. Gray, a son of Andrew Gray, and brother of Hon. Andrew C. Gray, was born near Newark in 1819. He was educated at Newark Academy, studied law under the direction of Judge Upshur, of Virginia, was admitted to the bar of New Castle County November 26, 1845, practiced in the State but a short time, and removed to Wisconsin, and was the first Secretary of State after Wisconsin was admitted to the Union. In later years he removed to Washington, and was in the office of the Attorney-General, and died in that city in the latter part of 1886.

The eldest son of James A. Bayard was James A. Bayard, Jr., and brother of Hon. Thomas F. Bayard. He was born in Philadelphia, January 10, 1825, studied law under the direction of his father, and was admitted to the bar in Sussex County, November, 1845, practiced law in Georgetown a short time, moved to Wilmington, entered into partnership with his father and developed talents of great ability. He was attacked with typhoid fever, and after a short illness died July 17, 1848.

George C. Gordon, a son of John and Ann (Sharp) Gordon, was born in Wilmington, February 9, 1825. One of his maternal ancestors was Peter Frangberg, one of the Swedes who early settled on the Delaware, and is buried in front of the altar in the Old Swedes' Church. George C. Gordon studied law under the direction of Judge E. W. Gilpin, and was admitted to the bar of New Castle County, May 10, 1847, and opened an office at once in Wilmington, and soon took a high rank among the members of the bar as a jury lawyer, and for many years was a

*Your very
truly*

[illegible]

In 1806 he married Mary (Aunt) daughter of Hon. and Rev. L. P. Moulton, Minister, D.C., and of Hingham. (See Moulton's History of Hingham.) Mary was the son of John Moulton, who was the son of Robert Wilson Moulton, who emigrated to this country from Scotland in 1806.

William P. C. Porter was a native of Bristol, where Huntley, senior, resided, when born. He studied law under the direction of James A. Fitch, and was admitted to the bar at Salem, Conn., in 1848. He settled at Waterbury and practiced law for five years, then engaged in the business with the late George W. Porter, under the *Yellow Rock* title, which he continued for several years, and then with him in Portland, Me., where he remained about five years.

2. Although the transport was carried out by the company, it was a private arrangement at the expense of the British state, and not an official act of the Ministry of Transport, as is the case in the case of Sussex County Council. It is not a matter of public concern, and, while it is a matter of public concern, it is not a matter of public concern.

Speaker of the House in 1871 and 1872, was in England on Insurance Commission.

John C. Patterson, of Wilmington, a native of that city (October 24, 1815), has an English father, John, and Robert, his grandfather, who arrived upon their immigration here in 1792. Patterson graduated from Nassau Hall, New York, with the degree of Bachelor of Arts, in 1836, following various occupations for several years, began the study of law at Philadelphia, and was then attorney-general of the State, and a member of the chief justice, and in 1841 was admitted to the bar at Georgetown, whither he had been sent by his preceptor, and soon after was admitted to the bar as a solicitor in the County of St. John. At the time of his removal here, he commenced his business in the courts of the State, and has since been

He was chief collector for Williamstown in 1870, and was appointed, by President Hayes, U. S. Marshal at first, and then for Denver, in 1880.

Donald P. Allen was born in Chicago, Ill., September 9, 1884. He moved to New York City, later studied law with the Hon. J. C. McGowan and was admitted to the bar November 1, 1910. He began the practice of law in New York City, continued until his death, April 18, 1935.

Asahel T. Gray was born at New Bedford, Mass., the son of Hon. Andrew T. Gray, was admitted to the bar at New Bedford, and practiced law and acted as clerk of the Superior Court. He was admitted to the Virginia bar in 1856, and practiced law in that State, but a short time, then removed to New York, where he was the first Secretary of the State Bar Association admitted to the union. He then removed to Washington, and was in the U. S. Army, and died in that city in 1886.

The eldest son of James A. Bayard, Jr., and brother of Henry. He was born in Philadelphia, studied law at one of the colleges, and admitted to the bar in Sussex. He practiced law in Georgetown, moved to Wilmington, and was his father-in-law's close attendant. Was attacked with typhoid fever, died on July 17, 1858.

George C. Gordon, a son of John, was born in White Plains, N. Y., of his maternal family, one of the oldest and best known in this country. He was reared and brought up in the Episcopal Church, and graduated from the University of New York in 1847, and entered an office and soon took a high rank. He was a very intelligent, an

Yours very truly
Geo. P. Fisher

able and successful lawyer. He died at Wilmington, March 15, 1886.

John E. Parker was born in Milton, Kent County, studied law with Judge John W. Houston, was admitted to the bar of Sussex County in 1848, practiced at Georgetown for a time, removed to St. Louis, where he followed his profession about a year; returned to Georgetown, resumed practice and continued it until his death in 1851.

Hon. James Rush Lofland was born in Milford, Kent County, Delaware, November 27, 1823. He is the oldest son of Dr. James P. Lofland and Mary (Lowber) Lofland. His first school was the old Milford Academy at the time it was under the charge of Rev. William Backus. He remained here until he was seventeen years of age, when he entered the Delaware College, from which institution he graduated in 1844. He commenced reading law with Robert Frame, and completed his studies under Martin W. Bates, April 26, 1848. The next year he was elected clerk of the State Senate, and upon the election of delegates to the Constitutional Convention of 1852 he was chosen a delegate from Milford, and served upon the Judiciary Committee of that body. Upon the election of Governor P. F. Causey, in 1854, he was chosen his Secretary of State. In the campaign of 1860 he advocated the election of Bell and Everett, but upon the breaking out of the Civil War he vigorously supported the policy of President Lincoln. In 1862 he was appointed one of the board of visitors of the United States Military Academy and elected its secretary. Upon the formation of the First Delaware Cavalry, Mr. Lofland was elected its major. He had served in this position but a short time, however, when, in February, 1863, he accepted the appointment of paymaster of United States troops, with the rank of major, and immediately reported for duty at New Orleans, and May 3, 1863, reported to Major Bringham, paymaster-in-charge, and served until August, 1864, when he was ordered to Washington. He afterwards served in this position at Columbus, Ohio, to assist in paying off volunteers whose term of service had expired in the Army of the James and that of the Potomac and Shenandoah.

He was again ordered to New Orleans September, 1864, and was sent to Vicksburg, Mississippi, as post paymaster, where he remained ten months. Upon his return to New Orleans he was engaged in paying off the troops of Mississippi, Louisiana and Texas until 1867. While performing these duties President Lincoln had conferred upon him the brevet rank of lieutenant-colonel for faithful and meritorious services. Having a desire to resume the practice of his profession, he tendered his resignation, which was accepted, and returned to Milford and actively engaged in its practice. The next year he was sent as a delegate to the Republican National Convention at Chicago, which nominated General Grant, and was chairman of the Delaware delegates in 1872, when he was nominated a second term. His fellow-citizens were

not disposed to allow him to quietly practice law, and in 1872 he was elected a member of the Forty-first Congress, and served on the Committee of the District of Columbia. He was again renominated in 1874, but failed of an election. He was chairman of the delegations to the Republican Conventions of 1876 and 1880, and supported the nomination of James G. Blaine. He was married, May 27, 1852, to Miss Sallie B., daughter of Joseph Brown, of Philadelphia. His wife, however, was a Delawarean.

The late Col. C. Rodney Layton, of the Sussex County bar, and of the army of the United States, was born on the 10th of March, 1826. He was appointed to West Point in June, 1843, and resigned in June, 1845. In July, 1845, he entered as a law student in the office of his father, the late Caleb S. Layton, of Georgetown, and was admitted to the bar in 1848. After practicing a number of years with his father he was elected clerk of the House of Representatives of 1860-1. In response to the first call for troops he recruited, May 7, 1861, a company for three months' service in the First Delaware Regiment, serving as captain. He was afterwards made major and served as such until August 5th, when he was appointed captain in the regular army, and assigned to the Eleventh United States Infantry. He afterward served in the Sixteenth and Twentieth; he was promoted to major while in the Sixteenth and made lieutenant-colonel and assigned to the Twentieth. He saw much active service and was engaged in some of the hardest fought battles of the war, among them being Fredericksburg and Gettysburg. His health was good until 1882, when he suffered greatly from the extreme heat in the Southwest. From the Southwest he was removed, about the winter of 1883, to Fort Keogh, Montana, and this great change was also thought to have injured his health. From there he was sent to Fort Dodge, Kansas, and afterward was ordered to Fort Hays, Kansas, where he was seized with paralysis in April, 1884. He remained in command of that fort until November, 1884, when he had sick-leave, which was continued until he was retired from the army in October, 1885. During and since his sick-leave he changed his residence often with the hope of benefiting his own health and that of his family. He finally returned to Georgetown in June, 1886, and his second wife, who was a daughter of Dr. Benedict, of Philadelphia, died there in February, 1887. His first wife was a daughter of Dr. L. P. Bush, of Wilmington. The colonel died August 20, 1887, leaving four children by his second wife. He was noted for singleness and unselfishness of purpose and his career as lawyer and soldier were alike admirable and honorable.

George Read Riddle, a distinguished civil engineer and statesman and a descendant of George Read, one of the signers of the Declaration of Independence, was born in New Castle in 1817. He was educated at Delaware College, and made a study of engineering, a profession which afterwards

made him famous in locating roads and canals in Pennsylvania, Delaware, Maryland and Virginia, his last work of this kind being at Harper's Ferry. Subsequently he studied law and was admitted to the bar in 1848, during which year he was appointed deputy attorney-general of New Castle County. In 1850 he was elected to Congress from his native State and was returned for the succeeding term, serving on the Committee on Roads, as chairman of the Committee on Engraving and also on a special committee on the Peruvian Guano Question. In 1849 he served as a member of the Inter-State Commission to retrace the Mason and Dixon's line. He was a delegate to the Democratic National Conventions of 1844, '48 and '56, and in 1864 was elected United States Senator. While filling this office he died in Washington, March 29, 1867.

Victor Du Pont was born at Louviers, the family residence, in Brandywine Hundred, Delaware, May 11, 1828. He was the son of Charles Irénée Du Pont and Dorcas Montgomery, daughter of Nicholas Van Dyke, whose wedding was attended by General La Fayette during his visit to this country in 1824. Through both his mother and father he comes of a distinguished ancestry. His maternal grandfather, Nicholas Van Dyke, resided at New Castle, Delaware, was an able lawyer and eloquent advocate, and besides holding other important public positions, served as United States Senator for Delaware, as a member of the Federal party, from his election in 1817 until his death in 1826.

Senator Van Dyke was the son of Nicholas Van Dyke, who also resided at New Castle and was of Dutch descent, a lawyer of eminence, Governor of Delaware, a delegate from Delaware to the Continental Congress in 1777 and a signer of the articles of Confederation.

Charles Irénée Du Pont (Victor's father) and his brother Rear Admiral Samuel Francis Du Pont, were sons of Victor Du Pont, who, with his father, the distinguished French statesman, diplomatist, economist and author, Pierre Samuel Du Pont De Nemours, and their families, escaped from the proscription and confiscations of the French Revolution and emigrated to America in 1799, and finally settled on the Brandywine, near Wilmington, where Victor's youngest brother, Eleuthère Irénée Du Pont founded the present powder manufacturing firm of E. I. Du Pont de Nemours & Co.

Victor Du Pont (Victor's grandfather) was educated for the French diplomatic service and represented his government in this country at Charleston, South Carolina, and elsewhere.

His wife was Gabrielle Josephine de La Fitte de Pelleport, a daughter of the Marquis Gabriel Renee Louis La Fitte de Pelleport, who was of noble and ancient lineage in France.

Victor Du Pont, his grandson, has proven a worthy descendant of his distinguished ancestors. From his early youth to his mature manhood his life has given

constant evidence that he has inherited those superior qualities of mind and character which have enabled the Du Ponts and Van Dykes to take and maintain the high position which they have held in both their public and private relations. In personal appearance, in dignity of character and in courtesy of manner he is, at all times, to all persons, innately a gentleman. Always considerate, unselfish, manly and modest, his life has been laid out upon those broad and simple lines of truth, honor and conscientious sense of duty which, joined to his sound judgment and well-balanced character, have won for him a universal confidence and an affectionate regard, which are as rare as they are just.

He passed his boyhood at the family residence, Louviers, on the Brandywine, and then became a student of Delaware College at Newark, Delaware, where he was graduated. Thereupon he entered Harvard College and was graduated there in 1846. The same year he commenced the study of law under the late Chief Justice Edward W. Gilpin, in Wilmington and was admitted to the bar of Delaware in 1849, having pursued a portion of his law studies at the Harvard Law School. Since 1849 he has continuously practiced law in Wilmington, and for many years has had a law practice and professional income second to none at the Delaware bar. Although he has desired to avoid legal business which required his appearance in cases before the courts, yet his reputation for legal ability of a high order and his practical business facility have enabled him to attain a high rank in the estimation of the bar and people of Delaware. He has been, in several instances, appointed chancellor *ad litem* by the Governor.

In politics he was reared a Whig, as his father and all of the Du Pont family in this State had been, from their earliest settlement in Delaware, ardent and prominent members of that party and of the old Federal party, which preceded it.

But when the Know-Nothing party arose to practice the spirit of proscription against the oppressed of foreign lands, who, like his French ancestors, sought a refuge here, young Victor became a member of the Democratic party, to which he has continued to be zealously and consistently devoted.

He has always been exceedingly popular and influential in his party, and yet has constantly refused to accept any office of prominence or profit. On several occasions he has been urged for Governor of the State, and, in 1874, would have been unanimously nominated, and certainly elected, but for his express and unalterable declination. He was also strongly pressed to become a candidate for United States Senator, but in each instance refused because he was unwilling to incur the injury to his law practice which the Senatorial career would occasion.

The only political positions which he has ever been induced to accept were as free from such an objection as they were devoid of profit, viz: Member of the board of visitors to West Point Military Academy

1. The first step is to identify the problem. This involves understanding the current situation and what needs to be changed.

to rest his weary head there for a few years, and then to return to his old home.

[illegible]

At the age of two, children learn to follow. They have to learn to follow the lead of an older person, usually a parent, and in this way, they learn to follow the lead of the older person. This is the first step in learning to follow. The next step is to learn to follow the lead of a peer, and this is the second step in learning to follow. The third step is to learn to follow the lead of a group, and this is the third step in learning to follow. The fourth step is to learn to follow the lead of a community, and this is the fourth step in learning to follow. The fifth step is to learn to follow the lead of a nation, and this is the fifth step in learning to follow. The sixth step is to learn to follow the lead of the world, and this is the sixth step in learning to follow. The seventh step is to learn to follow the lead of the universe, and this is the seventh step in learning to follow. The eighth step is to learn to follow the lead of the gods, and this is the eighth step in learning to follow. The ninth step is to learn to follow the lead of the gods, and this is the ninth step in learning to follow. The tenth step is to learn to follow the lead of the gods, and this is the tenth step in learning to follow.

John A. Nicholson is a native of Sussex County, where he was born on July 15, 1894, the son of John and Mary A. Nicholson. He attended the common school of his native town, and the State Normal School at Albany, N. Y. In the year 1917 he graduated from College, from which he graduated with a majority of which year he won the highest honors. He studied Law with Mr. J. H. Smith, of the State Bar of New York. He was admitted to the practice of Law in 1920. He has appeared in court and has been known for his ability and skill in the law.

2. *Shi-tung-han*. If we
 compare the terms of the
 first term he cited with
 the corresponding terms of

of Appropriations. And he refused to deliver the message.

1. The first step is to identify the main components of the system. This includes the hardware (e.g., sensors, actuators, controllers) and the software (e.g., algorithms, data processing routines).

On 12 June 1998, the *Journal of the American Medical Association* published a study by the National Cancer Institute (NCI) that found that the use of tamoxifen in the treatment of breast cancer was associated with an increased risk of developing blood clots. The study was a retrospective analysis of data from the NCI's Surveillance, Epidemiology, and End Results (SEER) database, which tracks cancer incidence and mortality in the United States. The study found that women who took tamoxifen for breast cancer had a 1.5-fold increased risk of developing blood clots compared to women who did not take the drug. The risk was highest for women who took tamoxifen for more than 12 months. The study also found that the risk of blood clots was higher for women who took tamoxifen in combination with other medications, such as aspirin or warfarin. The study was a retrospective analysis of data from the NCI's Surveillance, Epidemiology, and End Results (SEER) database, which tracks cancer incidence and mortality in the United States. 1. The first group of people who are likely to be affected by the proposed project are the local residents who live in the vicinity of the project site. These residents may be affected by the project in a number of ways, including increased traffic, noise, and air pollution. It is important to identify these potential impacts and develop measures to mitigate them.

I am truly yours
T. F. Maynard

in 1860, and Presidential elector for Delaware in the McClellan campaign of 1864.

Among practical business and financial men he has long stood in high repute as a sound and sagacious adviser and successful manager. In this respect he seems to possess those marked business traits which notably characterize his family, and which they have all doubtless inherited from their eminent ancestor, Pierre Samuel Dupont De Nemours. He has been a director of the Union Bank, now Union National Bank, at Wilmington, since 1852. Since 1866 he has been its president, during which period the bank has signally prospered and its stock risen from \$25 to \$75 per share.

He has long been a director of the Farmers' Mutual Fire Insurance Company, at Wilmington, and its president since 1860. He has also been a director of the Wilmington and Reading Railroad Company, and of the Baltimore and Philadelphia Railroad Company.

In religion he is a liberal supporter of the Protestant Episcopal Church, and for more than twenty-five years has been a vestryman in Trinity Parish, Wilmington.

In behalf of all charitable objects he is at all times a liberal but unostentatious contributor, while the needy and unfortunate constantly have found him a sympathetic and generous friend.

At the age of twenty-three he married Alice Honnsfield. They have had ten children, eight of whom are now living, two of these, Victor, Jr. and Mary, being married.

Hon. John A. Nicholson is a native of Laurel, Sussex County, where he was born November 17, 1827, but passed his early childhood in Amherst and Nelson Counties, Virginia, his mother being a native of that State. In the year 1843 he entered Dickinson College, from which he graduated in 1847, in February of which year he went to Dover and entered upon the study of law with Martin W. Bates and was admitted to practice April 23, 1850. Governor Ross appointed him superintendent of the schools of Kent County for that year. The Democratic party recognizing his ability made him their candidate for the Thirty-ninth Congress in the year 1864, and succeeded in electing him. He was re-elected to the Fortieth Congress, his term expiring March 4, 1869. During his first term he served on the important Committee of Elections and the second term on the Committee of Appropriations. After the expiration of his term he returned to Dover and resumed the practice of his profession, in which he has been engaged ever since.

August 2, 1848, he was married to Miss Angelica K., daughter of John and Mary (Stout) Reed and granddaughter of Hon. Jacob Stout and great-granddaughter of Chancellor Killen.

The Hon. Thomas Francis Bayard, present Secretary of State, was admitted as an attorney of Delaware in 1851 and practiced at the bar several years,

He was the second and is the only surviving son of James A. Bayard (2d) and his wife Annie (Francis) Bayard, and was born in Wilmington October 29, 1828. An account of his ancestry has already been given in the sketch of his grandfather, and a brief biography of his father also appears in this chapter. At the age of thirteen he went to the school of Rev. Dr. Francis L. Hawks at Flushing, Long Island. During a few years when his father lived in New York young Bayard entered the mercantile house of his brother-in-law, Mr. Schermerhorn, and his business training was supplemented in the house of S. Morris Waln, in Philadelphia, where he remained until he was twenty. He then returned to Delaware, entered upon the study of the law and was admitted in 1851, assisting his father in his practice. In 1853 he was appointed United States district attorney for Delaware, but resigned the office the following year, when he became associated with his friend, William Shippen. Upon the death of Mr. Shippen, in 1858, Mr. Bayard returned to Wilmington and became deeply involved in a large practice, including, in addition to the usual lines, numerous trusts, executorships and the management of estates. He was, like his father, a strong Democrat, and though greatly interested in political affairs, took no prominent part in them until he was chosen to succeed his father in the United States Senate. His term began at noon on March 4, 1869, at the moment that his father's expired. He at once became one of the most active members of the body, and although belonging to a small minority which do little in the way of controlling legislation, he performed much useful labor upon committees and in non-political matters. In 1875 he was re-elected and in 1880 he became chairman of the Committee upon Finance and a member of the Committee on Judiciary. He was again elected to the Senate in 1881. He came before the country with great prominence as the probable Democratic candidate for the Presidency in 1880 and again in 1884, and was appointed Secretary of State by President Cleveland in March, 1885. Mr. Bayard's character and ability, as displayed in the Senate and in his capacity as Secretary, are too well known to make an extended analysis of them necessary, even if it were appropriate, in this connection. He was married, in October, 1856, to Louisa, daughter of Josiah Lee, of Baltimore, and has three sons and six daughters living.

Alfred P. Robinson (1st), late of Sussex County, was the youngest son of Judge Peter and Arcada (Robinson) Robinson, graduated from Delaware College and was admitted to the bar of his native county in 1850, and practiced continuously from that time to his death, in 1866, with the exception of a period of four years dating from 1851, when he was Secretary of State. He married Clara C., daughter of Alexander Porter, of Wilmington, and they had three children,—George J., Thomas and Alfred P., Jr., of whom a notice appears in this chapter.

Enoch Joyce Smithers was born in Dover, Dela-

ware, July 14, 1828. His father was Joseph Smithers, and his mother, Sarah Ann Joyce. The father of Joseph was Nathaniel Smithers, the elder, who was the grandfather of Hon. Nathaniel B. Smithers, of Dover.

Joseph Smithers, the father of Enoch, was a man of the highest character for integrity and of great intelligence.

After receiving a fair education at home, the subject of this sketch was sent to Dickinson College. He remained there until his senior year, when he left, and entered the office of the late Chief Justice Gilpin as a student-at-law, and was admitted to the bar in November, 1851. For a time he practiced his profession, but having a good estate by inheritance and not being compelled by necessity to work for a livelihood, he diverged into politics and the management of his lands.

When the war broke out, in 1861, and emergency men were called, he entered the three months' service as first lieutenant of Company D, of which James Green was captain, and when the First Regiment of Delaware Volunteers was raised, he re-enlisted and was made captain of the company.

With the regiment he went to Fortress Monroe, and into the camp called Camp Hamilton. In the fall of 1861 he was appointed by President Lincoln consul at Scio, a new consulate deemed advisable to protect the commercial interest in the Mediterranean. While there he was married. Afterwards, when the post was no longer necessary, he was appointed consul to Smyrna, Turkey.

In 1867 he returned home with his family, and for a year held a position in the Treasury Department at Washington. Upon relinquishing this he was again sent back to Smyrna. From this post he was appointed consul to Chin Kiang, in China. Subsequently he was detailed to take charge of Shanghai.

The American minister having left China temporarily, Mr. Smithers was placed in charge of affairs at Tientsin, which is the diplomatic centre and the residence of the Prime Minister of China, with whom, of course, he was in constant intercourse.

Subsequently, some time about March, 1887, Mr. Smithers received the appointment by President Cleveland of consul to Tientsin, which post he now occupies.

In all his official conduct Mr. Smithers has displayed ability and integrity, of which it is sufficient proof that he has been so long retained under so many successive administrations.

Consuls in the East are not mere commercial agents, but are vested with the exercise of high judicial functions, and at important points are largely employed about diplomatic measures. Mr. Smithers' course in the discharge of these functions has met the approval of his government, and his record is not only creditable, but is exceptionally high.

Hanson Harman was born on the 12th day of October, 1825. He entered Delaware College, and after

a very satisfactory examination he went to Yale College, from where he graduated, after which he read law under the late Sheward Johnson, who was a man of legal attainments and force at the bar, and was admitted to the bar in May, 1852. Mr. Harman was clerk, Councilman, alderman and city solicitor of the city of Wilmington during the same year, 1863, and afterwards became clerk of the United States District Court for the district of Delaware, as well as United States commissioner for Delaware, which position he held until the death of Hon. Willard Hall then judge of the District Court.

Mr. Harman died in the city of Wilmington on the 13th day of November, 1881. From the fact of his having held so many public offices, and his genial disposition, he became widely known throughout the State in his profession.

James R. Booth is a son of Judge James Booth the younger. He was born in New Castle in June, 1828, studied law under the direction of his father, and was admitted to the bar of New Castle County, in May, 1852, practiced for a time in New Castle and removed to Maryland.

Charles Mason Cullen was born in Georgetown, June 14, 1828, where he has always resided, and was the son of Hon. Elisha D. and Margaret (West) Cullen. He graduated from Yale in 1848, studied in his father's office, and was admitted in October, 1852, when he became his father's partner, and remained such until the death of the latter in 1862, since which time he has carried on alone a large general practice. He married Miss C. Virginia, daughter of Bishop Waugh, of the Methodist Episcopal Church.

William Sinclair McCaulley, son of William and Sarah L. S. McCaulley, was born in Wilmington on the 18th day of December, 1832. He entered St. Mary's College in 1847 and was graduated there in 1850. He immediately commenced reading law and at the November term, 1853, of the Superior Court, upon motion of the late Chief Justice Gilpin, under whom he had studied, he was admitted to practice. The order made by the court was, that his admission should take effect on the 19th of December following, because not until then would he reach his majority.

In 1862 Mr. McCaulley was appointed deputy attorney-general for the State, and continued in the office for two years.

He was the candidate of the Democratic party for mayor of Wilmington in 1868 and again in 1870, but his party being in the minority, he was defeated on both occasions.

In 1878 he was appointed adjutant-general, which position he retained until his death.

Apart from holding the above-named official positions, Mr. McCaulley sat as chancellor *ad litem* in many important litigated cases, and was for one term city solicitor for the city of Wilmington.

Mr. McCaulley's whole career was conspicuously creditable. As a lawyer he was one of the ablest of the State. Quick in grasping the facts of a case, he

was at once ready to apply the law thereto. He can be said to have possessed a superior judicial mind. A man of strict integrity and with a high appreciation of the character of his profession, he had the keenest sense of honor in his relations to the bench as well as to his clients.

His attainments were not confined to the law, but he was a man of wide information and general learning. A most genial companion, witty, generous and kind, he attracted to himself an extended acquaintance and a large circle of warm friends.

Physically Mr. McCaulley was not of the strongest, and he became unable to stand the exactions and cares of a lawyer's life, and in the midst of his professional success he died, in Wilmington on Monday, December 30, 1878, leaving the bright promises of his early life unfulfilled and losing to the bar one of its most valued members.

George Plunkett was born in New York City, February 11, 1836. Coming to Wilmington, he received his education at St. Mary's College, and then commenced the study of law with the late Daniel M. Bates, afterwards chancellor of the State. He was admitted to the bar in May, 1859, but shortly afterwards removed to St. Paul, Minnesota, and there connected himself with the law-firm of Becker & Hollingstand. He remained at St. Paul until the outbreak of the Rebellion, when he returned to Delaware and entered the Second Delaware Regiment, as its quartermaster. Mr. Plunkett had not been in the army more than three months when he was appointed a paymaster in the navy, and ordered to the United States Steamer "Hartford," then commanded by Commodore Farragut, and participated in the most memorable battles before the capture of New Orleans.

At the time of the surrender of New Orleans the mayor of the city declined to accept the surrender papers previously drafted, and Mr. Plunkett was designated by Commodore Farragut to put them in proper shape, which he did, and the mayor then accepted them as being legally drawn. Mr. Plunkett was afterwards ordered to duty in front of Charleston under Admiral Du Pont, as paymaster of the squadron, and next reported for duty to Admiral Rowan, in the fight before Fort Fisher. After this engagement Mr. Plunkett was ordered to special duty at Washington, but a short time subsequent, however, he accepted the position of paymaster to the South American squadron. Upon his return from the cruise he was sent to New York, and while there resigned from the navy. His resignation grew out of some misunderstanding between himself and the paymaster-general. He was afterwards, by an act of Congress, restored to the service and assumed the duties of disbursing officer at Boston.

From the time of Mr. Plunkett's appointment as an officer of the navy to his death, through the many important positions held by him, he rendered valuable services to the government. He died on the 24th day of October, 1874.

Edward Ridgely, son of Henry Moore Ridgely, was born in Dover, January 30, 1831, and was educated and prepared for college under the care of private tutors and graduated from St. Mary's College, Wilmington, in 1850, entering the same year as a student-at-law with Hon. Martin W. Bates, and was admitted to practice April 20, 1853. While engaged in the study of his profession Mr. Ridgely attended Yale Law School for one year. From the time of his admission to the bar he has taken the front rank in his profession and has been engaged in the majority of the leading cases in his county. So much has his ability been esteemed, that twice when the chancellor of the State has declined to sit in cases in which he was interested, Mr. Ridgely has been appointed chancellor *ad litem* to hear them. He has always shunned public office, but Governor Burton, upon his inauguration, appointed him Secretary of State. He has been a member of the Board of Education in Dover since its formation and its president since the death of the Hon. Charles Brown.

Jacob Moore, late of Georgetown, Sussex County, was born at Laurel on November 21, 1829. His parents were Louthier Taylor Moore, a merchant in Laurel for nearly half a century, and Eliza S., daughter of Isaac Wootten. The mother died in 1863, aged fifty-eight years, and out of twelve children but three lived to maturity, the oldest of these being Jacob.

The latter entered Union College, Schenectady, in 1846, and was graduated from that institution with the degree of Bachelor of Arts, in 1850. He subsequently entered upon the study of law in the office of Judge Edward Wootten, of Georgetown, and after three years of careful preparation for the bar was duly admitted to practice in April, 1853. He at once applied himself to his work with great industry and determination, and soon met with success, earning a reputation as a skillful and able practitioner and a discreet and careful counselor, which brought him business from all over the State, and from the eastern counties of Maryland, and insured him a place among the foremost lawyers of Delaware. He was a hard student, often spending whole nights looking up some abstruse question of law, and went into court as well equipped in the legal aspects of his cause as he was with those natural endowments of personal magnetism and oratorical power which insure success before the jury.

He was identified actively with the Democratic party until the firing upon Fort Sumter, when feeling that his party was in the wrong on the great questions of the day, he affiliated with the Republican party, with which he subsequently acted. He made strong Union speeches throughout the State, and contributed largely by his personal zeal and magnetism in holding the State in line and in furnishing her quota of men to the army. His abandonment of the Democratic party was a matter of principle, and by which he sacrificed many positions of value and honor

which were within his reach in that party. In connection with William (afterwards Governor) Cannon, he commenced the publication of a weekly paper called *The Union*, in Georgetown, doing most of the editorial work himself, and conferring a great benefit upon the Republican cause in Southern Delaware. In the summer of 1862 he was a delegate to the State Republican Convention, and, by his oratorical skill and forcible presentation of his cause, succeeded in having William Cannon nominated for Governor in the face of considerable opposition—and he was subsequently elected, being one of the few Republican Governors which the State has had.

In 1863 the Sixth Delaware Regiment was organized in Sussex County, largely through Mr. Moore's efforts. He joined it as a private, but was soon elected lieutenant-colonel. The regiment was assigned to guard duty on the line of the Philadelphia, Wilmington and Baltimore Railroad, and later was stationed at Fort Delaware. Colonel Moore was mustered out at the expiration of his term of service, and on September 3, 1864, was commissioned attorney-general of Delaware for the term of five years. An ancestor of his, Hon. Jacob Moore, had previously held the same important office in 1774, nearly one hundred years before. He filled the office with such ability and fidelity that his retirement at the close of his term was a matter of general regret to the people of the State, and especially to the bench and bar. Chief Justice Gilpin, who had also held the office of attorney-general, said of him: "He has made a good officer and has tried more important capital cases than were ever tried by any other attorney-general in the State; and during his term of office the law of murder has been firmly settled."

After the close of his term he resumed his practice at Georgetown, and became the attorney of the Junction and Breakwater, and Breakwater and Frankford Railroad Companies, for the Pennsylvania Railroad, the Old Dominion Steamship Company of New York, and other corporations. He remained in successful practice until his sudden demise, December 13, 1886. He was possessed of an affable and kindly temperament, which made him many friends, and by his sterling integrity and high moral principle commanded the respect of all. He became a member of the Masonic fraternity in 1854, and served as Deputy Grand Master, and Deputy High Priest of the State.

He had no aspirations for office in the later years of his life, though often solicited to run, but devoted himself entirely to his professional duties, and to the charms of the family circle. He married, on October 23, 1860, Miss Eliza R., daughter of John D. Rodney, of Georgetown, and had five children, of whom only two survived his death,—Charles Louthier, a popular and promising young attorney of Georgetown, and Miss Eleanor Moore. To his widow and children he left a handsome estate, gathered together through years of usefulness and labor, by the exer-

cise of those principles of industry and perseverance which all admire, but few emulate.

Alfred P. R. Wootten was born in Georgetown, Sussex County, December 12, 1834. He was the only son of the late Judge Wootten. His early education was very thorough. After spending two years at the Georgetown Academy he attended a private school in Philadelphia, two years at Delaware College, and entered finally Union College, Schenectady, N. Y., from which he graduated in 1855. He then entered upon the study of law with the Hon. George M. Dallas, of Philadelphia, and completed his studies in the office of Judge Thayer, of Philadelphia, and was admitted to practice there. Upon the advice of friends he removed to Wilmington, and opened an office. In September, 1861, he was appointed attorney-general by Governor William Burton, which office he held until his death, August 28, 1864. In March, 1859, he married Miss Rhoda, the daughter of Governor Burton. Their only child, Mary Robinson, is the wife of David T. Marvel, Esq., of Georgetown.

John O'Byrne was born in Dublin, January 13, 1826. In 1847 he became a member of the Irish Confederation formed by John Mitchell, Thomas Francis Meagher, Charles J. Duffy, John Dillon, father of the present Irish orator and leader, Richard O'Gorman, now a judge of the Superior Court of the City of New York, and others. This organization was a protest against the peace policy of Daniel O'Connell.

In 1848, when William Smith O'Brien determined to raise the standard of insurrection in the south of Ireland, Mr. O'Byrne was one of the young men who started to take the field. The rebellion was abortive, and Mr. O'Byrne, with others, was proscribed, and came to America in September of that year, and became engaged for about a year as assistant editor of the *Nation*. He then moved to Philadelphia and entered in mercantile pursuits, during which time he commenced the study of law in the office of the Hon. Lewis C. Cassidy, late attorney-general of Pennsylvania. On December 12, 1855, Mr. O'Byrne was admitted to the bar, and almost from that time his career has been one of great success. He practiced law in Philadelphia until 1868, when he moved to Delaware and lived upon his farm in Brandywine Hundred until 1879, practicing law in the mean time, in the Delaware courts, and was known throughout the State as an able advocate and a wise counselor.

The only office Mr. O'Byrne has filled was that of first assistant district attorney to the Hon. John McKeon during the years 1882 and 1883. During a large part of that time, however, Mr. McKeon being in ill health, Mr. O'Byrne acted as district attorney. Although never having held any other office, Mr. O'Byrne is frequently retained as counsel by the corporation counsel of New York in cases of special importance.

Joshua Litzenberg Simms was born on February 5, 1835. He graduated at St. Mary's College, after which he began to read law under the Hon. Daniel

John
W. Brown

James Truly
Jacobe Moore

M. Bates, and was admitted to practice at the November term of the Superior Court, 1859.

Mr. Simms was admirably adapted, and gave the greater part of his attention to real estate law. In 1872 he was elected mayor of the city of Wilmington, which office he held for three years. After the expiration of his term he resumed the practice of law, and is now a prominent member of the New Castle County bar.

William Sharp, was a son of Thomas Sharp, an early and prominent member of the Methodist Church in Sussex County, and after 1816 of Kent County, to which place he moved. William was born in Sussex County, in 1811, graduated at Yale College in 1847, studied law and was admitted to the bar of Kent County, in Dover, October, 1855, where he practiced a few years and became the editor and proprietor of the *Delaware State Reporter*, and later of the *Sentinel*. He died in 1876, aged sixty-five years.

William Corbit Spruance, a member of the bar since 1855, was born in Smyrna, April 2, 1831, and was a son of Presley Spruance, who was a member of the Legislature for twenty-one years, and of the United States Senate for six years. He entered Princeton College, after preparing at Newark Academy, in January, 1849, and graduated in 1852. His legal studies were prosecuted under Chief Justice Comegys, George B. Rodney and at the Harvard Law School. On being admitted at New Castle, in November, 1855, he settled there and remained until 1871, when he removed to Wilmington. For three years he was deputy attorney-general, for twelve years attorney for New Castle County, and for two years city solicitor for Wilmington. In 1876 he was appointed United States attorney for the district of Delaware, and resigned that office in 1880. Politically he is a Republican.

Daniel J. Layton, son of Judge Caleb S. Layton, born November 14, 1833, studied with his father and was admitted April 23, 1857. He began the duties of his profession at Georgetown, but soon retired from active practice.

John H. Stotzenberg, son of the well-known Wilmington manufacturer, was admitted to the bar in 1853, but soon removed to Indiana, where he is now in practice.

Hon. John B. Penington was born in New Castle Hundred December 20, 1825. He is the son of Thomas Macdonough Penington, nephew of Commodore Macdonough and Henrietta (Barr) Penington. He served his early education in the schools of Christiana and vicinity, and at the academies of New Castle and Newark, and completed his education at Jefferson College, Cannonsburg, Pa., where he graduated with the degree of A.B. in June, 1848. After his graduation he took an extended trip through the South and West, studying law for a time in Indiana with Hon. Edward A. Hangan, and was superintendent of construction of the Wabash Canal. He returned to his native State in 1851, and remained on

a farm cultivating it until 1854, when he entered the office of the Hon. Martin W. Bates, and was admitted to the bar on April 28, 1857, opening an office in Dover. Mr. Penington was early active in politics, and in 1856 was nominated by the Democratic party for the House of Representatives from Dover Hundred. He was clerk of the House in 1859, 1863 and 1873, the only case for over fifty years that any one has been elected three times to this office. He was a delegate to the Democratic National Conventions at Baltimore and Charleston. President Johnson appointed him United States district attorney in 1868, which position he held until the expiration of President Johnson's term. He filled this position with such marked ability that October 3, 1874, he was appointed attorney-general by Governor James Ponder for the term ending October 3, 1879. He was devoted to the practice of his profession, from that time holding several town offices only, until the present year, when he went to Congress as a Representative, having been elected in November, 1886, for the term ending March 3, 1889. He is also a trustee of Delaware College.

Honorable Eli Saulsbury was born in Mispillion Hundred, near Marshy Hope Bridge, Kent County, December 29, 1817, and is a brother of Chancellor and Governor Saulsbury, of whom sketches will be found in another part of this chapter. In his early life he attended common and select schools and took an irregular course at Dickinson College in the years 1839 and '41. Having a natural aptitude for the law, he had, while on his farm in Mispillion, read considerable, and acquired a large fund of legal knowledge before he entered regularly upon its study, which he did with his younger brother, the chancellor, who was then practicing in Georgetown, at which place the subject of this sketch was admitted to practice in 1857. Having moved to Dover in 1856, after his admission he opened a law-office there, and his ability being well known, he rose to a front rank in his profession. While a resident of Mispillion Hundred he was elected, in 1853 and 1854, a member of the Legislature and took a front rank in that session. In the year 1864 he was one of the delegates to the Democratic National Convention that nominated General George B. McClellan. He held no public position for several years after this date, but practiced his profession in Dover with considerable success until the Legislature in January, 1871, elected him to the United States Senate as a Democrat to succeed his brother, the present chancellor. He has served in this high position with such credit to himself and State that his constituents have asked that the Legislature elect him to a second and third term, the latter expiring March 3, 1889. While in the Senate he has served on a number of important committees, being chairman of several—that of Privileges and Elections, the first in the Senate, among the number—when his party was in power and also under Republican rule. He united with the

Methodist Episcopal Church in 1838 and has been prominent in its counsels for years, holding a number of positions. He has been for years one of the leading spirits in the Wilmington Conference Academy and is president of its board of trustees.

Richard G. Cooper, the present cashier of the Farmers' Bank of Delaware at New Castle, is a son of the Rev. Ignatius T. Cooper, and was born in Dover, January 3, 1834. He studied law in the office of Daniel M. Bates, then of Wilmington, and was admitted to the bar at New Castle, at the November term of court, 1858, and began practice in Wilmington, which he continued several years. During the war he was prothonotary of the county from 1865 to 1875.

Benjamin Nields was born in East Marlborough township, Chester County, Penn. (where his ancestors were early settlers), on July 12, 1831. He commenced the study of law with John C. Patterson, in Wilmington, in December, 1855, and was admitted to the bar at Georgetown in April, 1859. Politically he became identified with the Free-Soil party, and was an active supporter of Fremont in 1856, and of Lincoln in 1860. When the President called for three months' troops, in 1861, he assisted in organizing a company, of which he was appointed first lieutenant, and in 1862 he raised a battery of light artillery, the first and only one of the kind recruited in Delaware, and of this he was commissioned captain. He saw active service with this battery, and after the battle of Sabine Cross-Roads he was made chief of artillery on General Emory's staff. For conspicuous gallantry he was afterwards promoted to a lieutenant-colonelcy, and served as chief of artillery and ordnance on the staff of General Joseph J. Reynolds. In May, 1865, he was appointed one of the officers to receive the surrender of rebel troops west of the Mississippi, and in the following month was mustered out, having been the only member of the bar of New Castle County who had entered the army for the three years' service. In the fall of the year he opened a law-office in Wilmington, where he has since followed his profession.

William F. Causey, son of Governor Causey, was born at Milford, Kent County, November 28, 1833, studied law in the office of Judge John W. Houston, and was admitted to practice at the bar in New Castle County at the May term of court, 1859. He soon after went to St. Louis, and was law partner with the Hon. Truston Polk from 1867 to 1879, when he returned to his native State, and was Secretary of State under the Hon. Charles Stockley, and is now practicing law at Milford and at Georgetown.

Joshua Maris was born in Willistown township, Chester County, Pa., April 7, 1832, being the son of Caleb Maris, a respected citizen of that place. At the age of sixteen he was apprenticed to a cabinet-maker, and having mastered his trade when he was twenty years of age, he resolved to educate himself, and attended school first at Newark and then at Wil-

ilmington. In 1854 he entered Dickinson College, but domestic reasons compelled him to return home, and for a year he was engaged in teaching.

In 1856 he commenced the study of the law under the direction of the late Chancellor Bates, and was admitted to the bar in 1859.

In that year he was elected clerk of the City Council, and served three terms of one year each. In 1863 he was elected mayor of Wilmington, and was re-elected, but declined a renomination for a third term.

In 1871 he was elected president of the City Council, and served two terms, and in 1872 he was elected to the House of Representatives in the General Assembly, and served in that body in the session of 1873.

In many orders and benevolent societies he was a high officer and valued member. By birth he was a Friend, but some years prior to his death he was confirmed and became a member of the Protestant Episcopal Church, and was for some years a vestryman of St. Andrew's Church, Wilmington. Mr. Maris died September, 1884, having won, during the twenty-five years of his professional life, the respect of his associates and the confidence of his fellow-citizens, which was manifested by his frequent selection for honorable public service.

Charles Eugene La Motte was born at Lenni Mills, Delaware County, Pennsylvania, on August 20, 1839. He graduated from the University of Pennsylvania in 1858, and immediately commenced the study of the law under Hon. Edward G. Bradford, afterwards judge of the United States District Court for the District of Delaware, and was admitted to the bar of the State of Delaware, May, 1861, with his uniform on, being at the time a captain in the service of the United States. From the time of his admission until the close of the war he gave little or no attention to the practice of his profession, he being the entire time engaged in the service of his country.

Upon his honorable discharge, on March 22, 1866, General La Motte resumed his practice in Cincinnati, and there prosecuted it with signal success until the year 1881, when by reason of ill-health he was obliged to give up active work and returned to Wilmington.

It was hoped that a temporary change of residence and a freedom from the responsibility and arduous work consequent upon a large practice would restore him to good health, but this hope was not to be realized, and he remained an invalid, continuing his residence in Wilmington until his death, which occurred on May 24, 1887.

Although General La Motte during the fifteen years of practice as a lawyer attained prominence and distinction at the bar, his military career became the more prominent and one most interesting in its character.

The mere enumeration of his commands, and the distinction gained by those under him, is sufficient to indicate the gallant services rendered by him :

Captain of First Delaware Infantry, May 2, 1861; major of Fourth Delaware Infantry, August 16, 1862; lieutenant-colonel, October 1, 1863; colonel Sixth United States Veteran Volunteers, August 22, 1865; breveted colonel United States Volunteers, July 6, 1864, "for gallant and distinguished services during the operations before Petersburg, Virginia;" brigadier-general, March 13, 1865, "for gallant and meritorious services during the war." All these attest the excellence of his discipline and ability as a commanding officer.

General La Motte's connection with the military order of the Loyal Legion of the United States dates from the incipency of the order; and an abstract taken from a memorial read at a meeting of the board of officers of the Pennsylvania Commandery of the Legion shows the high appreciation in which he was held by his companions:

"The firing on Fort Sumter caused him to at once display a recruiting flag, and in a few days thereafter he had on his roll of recruits some two hundred names. He and his brother, Companion Robert S. La Motte, zealously worked together, and their recruits filled the first two companies furnished by the State Delaware,—Company A, First Regiment, Delaware Infantry, Captain R. S. La Motte, and Company B, Captain Charles E. La Motte. His commanding officers all bear willing testimony to his zeal, intelligence, patriotism and ability. On passing his examination for a commission in the First Veteran Corps (Hancock's) it was remarked by General G. K. Warren that no officer who had appeared before the Board had passed a better examination, and he was unanimously recommended for, and was appointed to, the first vacant colonelcy, which was that of the Sixth Regiment.

"To the very last his interest in all that pertained to the Military Order remained undiminished; and although prevented by long-continued ill health from attending the meetings of the Commandery, his warm soldierly heart was turned toward it and his companions of many a hard-fought battle and weary march with affectionate longing and kindest remembrance.

"In Companion La Motte's death, his commandery has lost from its membership a true man, a gallant soldier, a courteous gentleman and a genial friend."

Edwin R. Paynter, of Sussex County, brother of Judge Paynter, and son of Samuel Rowland and Sallie Ann (Ross) Paynter, was born in New York City, August 27, 1839, and the family, who had been residents of Sussex, returning thither in 1842, his boyhood was spent there. He attended several academies, spent one year at Delaware College, and graduated from Union College, Schenectady, New York, in 1858, aged nineteen. He then commenced reading law with Judge Wootten, of Georgetown, and was admitted to practice at Georgetown, on April 9, 1861, when he formed a partnership with his brother, which existed until 1870. He confines himself principally to civil

and real estate practice, and is not often identified with the presentation of a case in court.

From 1867 to 1871 he was attorney for Sussex County. In January, 1882, he became manager and associate editor of the *Democrat*, and in April, 1887, upon the appointment of John H. Paynter to the bench, became editor-in-chief, and still remains manager. Director of the Farmers' Bank, at Georgetown, since 1871, and trustee of Delaware College since 1872; president of the Georgetown Building and Loan Association since its organization, in 1885. He has been for twenty-five years vestryman of St. Paul's Protestant Episcopal Church, at Georgetown, and for nine years senior warden of the same church.

Samuel Milby Harrington was born October 31, 1840, in Dover, Delaware. Since the Revolution and the few eventful years immediately following, Delaware has known no period so striking, witnessed no events so pregnant, as those comprised within the short space of his life. His career began early and was crowded with labors and responsibilities. He was the eldest child of the late Chancellor Harrington, and so well did the bright precocity of the boy foreshadow the development of the man, that before he was seventeen he graduated at Delaware College with the first honors of his class. Losing no time, he at once commenced his legal studies under the direction of his father, the chancellor of the State. Completing them under the auspices of Chancellor Bates, in Wilmington, at the expiration of the prescribed three years, though only nineteen, he was found fully equipped for the active duties of his profession (and was admitted to the bar in November, 1861), upon which he immediately entered in Wilmington. It was the fortune of his life to be always young for whatever he undertook. Just at this time the Civil War broke out. The cause of the Union received his unflinching support and strenuous exertions. He was appointed adjutant-general by Governor Cannon in 1862. For a time the labors of this office, unsupported by funds for its bare expenses, and with no clerical aid afforded for work which in other States demanded a large corps of assistants, imposed upon him herculean tasks to the exclusion of all else. In the following year he was appointed secretary of State, and at the same time became so largely interested in the Sanitary Fair held in Philadelphia, as to be the very soul of the Delaware department. An ardent Republican, his next effort was in furtherance of the candidacy of his friend, the Rev. James Riddle, for Governor. These chivalrous efforts, however, were unsuccessful, and fearing that political activity would blight his brilliant prospects as a lawyer, he devoted himself henceforth entirely to his profession.

Here success was secured from the outset. To more showy qualities he added the unflagging industry conspicuously displayed as adjutant-general, and that zeal, earnestness and sympathy without which it was impossible for him to enter upon anything.

Clients became warm friends, for this sympathy joined to his personal magnetism was irresistible. He was skillful, ready and thorough. He had a passion for work and soon pressed his way to the very front rank of the bar. Yet so tender was his regard for professional brethren, so high his sense of honor, so untiring his devotion to the common good, that such as might have envied looked on with affectionate gratification.

He was one of the organizers and constant supporters of the Bar Association and Bar Library, which struggling associations were, at the time of his death, by no means assured of continued life. To them his death was the sorrest of deprivations. Again, he was one of the originators of the Wilmington Institute.

Spite of his withdrawal from active political life, he remained a member of the Republican National Executive Committee until his death.

He was deputy attorney-general during a portion of the term of Attorney-General Wootten, and in 1872 he was unanimously elected city solicitor of Wilmington.

By the death of his father, in 1865, he became the head of his family—the stay of a widowed mother—the guide and support of a band of younger brothers and sisters. Notwithstanding all other interests and claims, he was from first to last one of the bulwarks of Grace Methodist Episcopal Church, Wilmington. At the inception of the project which resulted in the beautiful building which now adorns the city, he devoted himself to its interests with tenfold ardor, and to his efficient work as permanent secretary of the board of trustees was largely attributed the result. Of this body he was afterwards again and again unanimously made president. The popularity manifested here he enjoyed in all social relations. Genial, witty, kindly, he not only won, but never lost, friends. His social brilliancy was enhanced by excellent mimetic and histrionic talent, and by rare gifts in entertaining children.

His death, though preceded by some months' illness, was so entirely premature—for upon September 10, 1878, he was not thirty-eight years old—as to call forth the keenest expressions of surprise and grief which can come from the hearts of friends. The bar meeting, convened upon the occasion, was unique in its earnestness of single-hearted sorrow. A common loss, a deep-hearted grief crowded out all rivalries and animosities, and the members of the New Castle bar were as one man in mourning the young and brilliant brother so untimely snatched from their midst. The city and the church sorrowed with them.

Dover, his father's home, the old family-seat, was deemed meetest for the last resting place. As the long funeral cortege wound through the old town—through the driving gloom of an eastern storm—there was silence, sorrow and universal sympathy. No place of business was open. The church was crowded. There, where father and mother had wor-

shipped before him—where his own youthful, well-kept vows had been recorded—the last sad words were said, and, in his native place, his body was committed “dust to dust, ashes to ashes,” till time shall be no more, and with it all earthly things shall pass away.

Charles H. B. Day was born in West Dover Hundred, near the State line, May 25, 1828, and is the son of Matthias Day. Mr. Day was educated in the common schools of the locality and was engaged in farming until he was thirty years of age. He then entered upon the study of law with Hon. N. B. Smithers, and was admitted to the bar October 29, 1861, and entered into partnership with Hon. George P. Fisher at Dover, the firm continuing until August, 1862, when he was appointed collector of internal revenue by President Lincoln, which office he held until May 1, 1869. Up to the year 1870 he had been a Republican in politics, but then became a Democrat and was elected clerk of the House of Representatives of the session of 1877. He was one of the first to aid in the establishment of the Conference Academy, and has been president of its board of trustees since the organization, and has been president of the Town Council, with the exception of one term, since the re-incorporation.

An attorney of the Delaware bar for whom the people and prominent officials of the State have expressed their esteem and confidence, by elections and appointments to positions of honor and importance, is Charles Brown Lore, of Wilmington, ex-attorney-general of Delaware and member of the Forty-eighth and Forty-ninth Congresses. Mr. Lore was born March 16, 1831, at Cantwell's Bridge (now Odessa), Delaware, where his father, Eldad Lore, who died in 1850, was engaged in farming and in the wood and lumber business. He was a man of exalted character and sterling worth, noted for his general kindness and especially for his beneficence to the poor, and was the descendant of a family of Cumberland County, N. J., settlers of the seventeenth century, in which locality, too, the ancestors of his wife—Priscilla C. (Henderson) Lore—were pioneers of the same period. Charles B. Lore, after obtaining the rudiments of education in his native town, and preparing himself at the Middletown Academy, entered Dickinson College, at Carlisle, Pennsylvania, in 1848, and he graduated there in 1852 with the degree of A.B. and the honors of his class. He studied law with Judge John K. Findlay, of Philadelphia, for a short period, and returning to Delaware, was elected clerk of the House of Representatives, in which position he served during the session of 1856-57.

Immediately after the close of his term he turned his attention to the ministry, and the Methodist Episcopal Conference, accepting him on trial, assigned him to the Princess Anne Circuit, in Snow Hill District, Eastern Shore of Maryland, where he remained for one year. At the expiration of that

Handwritten signature or name, possibly "C. A. Smith".

Chas. B. Love

time he withdrew, and, going to Wilmington, resumed his law studies with the late Daniel M. Bates, chancellor of Delaware, and was admitted to the bar in November, 1861. About the same time he ran for member of the State Legislature on the Democratic ticket, but, with others of his party, failed of election. In 1862 he was appointed by Governor Burton commissioner of the draft to raise troops for the Union army, and canvassed the county of New Castle for that purpose. On the 29th of September 1869, he was appointed by Governor Gove Saulsbury, attorney-general of the State for a term of five years. He was identified during this time with the trial of several celebrated cases, which attracted attention throughout the country, among them being that of Goldsborough for the murder of Charles Marsh, in which the prisoner was sentenced to be hung, but escaped and found his way South; that of Dr. Isaac C. West, charged with killing and skinning a negro named Turner, and attempting to burn his corpse with the purpose of conveying the impression that the body of the victim was his own, and thereby securing heavy life-insurance money to his wife; and also that of the Delaware Bank burglars, four of whom were convicted, whipped, fined and given five years' imprisonment. In all of these, and in several other cases, the ablest lawyers in the State were employed by the defense, and Mr. Lore's abilities were developed, as his reputation was enhanced, by the contests which ensued. While he has had a large experience in criminal cases, especially as prosecutor, his practice is, for the most part, civil, and he has had frequent occasion to seek thorough acquaintance with constitutional law and those elements of jurisprudence which have become a part of the State's history, as, for instance, in the disputes between Delaware and New Jersey regarding the water boundary, and involving the fishing rights of the two States. He is well grounded in knowledge of the constitutional and common law, is a good counselor, a logical thinker and forcible speaker; strong alike before court and jury, but perhaps excelling in his arguments before the latter.

He has built up a larger practice than a man less systematic in his methods of work could attend to, and has profited, from his devotion to his profession, in a degree not often equaled, though in late years his duties in public position have necessarily diverted his attention from his chosen calling. He was one of the incorporators and is a trustee of the Home for Friendless Children, in Wilmington, and since 1867 has been a trustee of Delaware College. He is, and has been throughout life, a Democrat, an untiring worker in politics as in his profession, and has a strong hold upon the sympathies of the people, commanded both by his abilities and the genuine kindness of his heart and manner. He received the nomination of his party for Congress, and was elected in November, 1882, by a vote of 16,563, over Washington Hastings, who had 14,640 ballots, and on No-

vember 9, 1884, was re-elected by a vote of 17,054, against his opponent's 12,978, his being the heaviest majority ever given in the State in an election actually contested on party and personal grounds. He served on the "Committee on Claims" and on the special committee on "American Ship-Building and Ship-Ownng Interests," in the Forty-eighth Congress; and upon those on Expenditures of the Department of State and Naval Affairs, in the Forty-ninth Congress. In both of these bodies he was an active force, but considerate, careful, conservative, perhaps, and always conscientious. He made several speeches which attracted public attention, were of weight in the House and helped to enact beneficial legislation, among them one on the Consular and Diplomatic Appropriations, one advocating the dual standard of gold and silver, another urging the forfeiture of land granted to aid the construction of the Oregon Central Railroad (which resulted in the reclamation of a portion of the lands from the company, as a fraction of the forty million acres opened to actual settlement in the United States), and still another, which was perhaps the most important of all, upon naval affairs, in which Mr. Lore, dissenting from his committee, opposed Secretary Whitney's plan to consolidate the naval bureaus and urged the retention of the old (and the present) system, in which there is direct responsibility to the Secretary of the Navy from all divisions, instead of an indirect responsibility, as proposed, extending to the head of the Department from experienced staff officers through inexperienced line officers, unduly subordinating the former and exalting the latter. Mr. Lore in this measure antagonized alike a majority of his committee, the Secretary of the Navy and prominent elements of his party; but the wisdom of the retention of the old system was obvious to the people generally and prevailed. Shortly after his election to Congress, Mr. Lore received as a law partner Mr. Harry Emmons, who is still the junior member of the firm of Lore & Emmons. Our subject has been very popular as a law preceptor, and during the years of his practice in Wilmington has directed the studies of no less than twenty-nine students, many of whom are now well-known attorneys. Mr. Lore was married, in 1862, to Rebecca A., daughter of Josiah Bates, a Friend, of Mount Holly, N. J., and has one child, Miss Emma Lore.

In 1885, when Mr. Bayard resigned his seat in the United States Senate to become Secretary of State with President Cleveland, Mr. Lore was strongly urged by his friends for the vacant Senatorship, and had an actual majority of one in the Delaware legislature, but, by the defection of one of his friends in the Democratic legislative caucus, was defeated for the nomination by one majority.

At the expiration of the term of Mr. Gray in 1886, who was elected to succeed Mr. Bayard, Mr. Lore was again pressed for the position, and an animated and exciting contest ensued, in which the Democratic

County Committee refused to instruct the judges of election to have an open and fair count in the presence of friends of both contestants. After the Legislative nomination election Mr. Lore withdrew from the contest in the interest of harmony in his party.

George V. Massey was born in Chester County in 1841. He removed to Delaware in 1849, residing for a short time at Newark and afterwards at Elkton, Md. In the year 1855 he came to Dover and obtained his early education at the Perkiomen Seminary, Montgomery County, Pa., and the Delaware Water-Gap Classical School, entered upon the law in the year 1861 with Hon. N. B. Smithers, completed his studies, and was admitted to the bar in October, 1862.

He served in the late war with distinction, joining the First Delaware Cavalry in 1862 as first lieutenant, and afterwards in the Adjutant-General's Department with the rank of captain and in the Inspector-General's Department with the rank of lieutenant-colonel, returning to Dover in 1864, where he has since resided, practicing his profession, in which he has arisen to a position of enviable reputation. While Mr. Massey has taken an active part in politics, he has always declined any public office.

The late Custis W. Wright, of Sussex County, son of Col. G. H. Wright and his wife, the daughter of Col. William D. Waples, connected with the Custis and Wise families of the Eastern Shore of Virginia, was born February 1, 1840. He was admitted to the bar in New Castle in 1862, and immediately thereafter became the partner of Hon. Willard Saulsbury, then United States Senator from Delaware. In 1865, Mr. Wright was appointed Secretary of State, which position he held for six years. He died November 29, 1874, leaving a widow, *née* Emma R. Paynter, daughter of Samuel R. Paynter, and granddaughter of Gov. Paynter, and two daughters.

John H. Rodney, son of George B. Rodney, was born at New Castle, June 18, 1839; studied law in the office of his father, and attended Cambridge Law School in 1861-62; admitted to the bar of New Castle County in November, 1862; entered the office at New Castle with his father, and continued until 1881, when he opened an office in Wilmington, where he continues.

He was a member of the Centennial Commission in 1876 and Constitutional Convention in 1887, and Presidential elector in 1876.

Alfred P. Robinson (2d) of whose father, also a lawyer, and grandfather, Peter Robinson, associate judge, sketches appear in this chapter, was born in Georgetown, February 17, 1842, was admitted in April, 1863, and began practice as his father's partner, continuing alone after the latter's death, in 1866. In 1875 he was clerk of the State Senate, and was appointed deputy attorney-general the same year. He was a delegate to the Democratic National Convention in 1880.

George Gray, present United States Senator, was

born in New Castle, May 4, 1840, and was the son of Andrew C. and Elizabeth (Scofield) Gray. He entered Princeton in 1857 and graduated A.B. with the class of 1859. He read law with his father and William C. Spruance, spent a year at the Harvard Law School and was admitted to the bar in 1863, at once entered practice and soon obtained an enviable position in the profession. In 1881 he was appointed attorney-general of Delaware by Governor John W. Hall, and then removed to Wilmington, where he has since resided. Mr. Gray was early identified with the Democratic party and has been prominent in its councils. He was a member of the National Convention of his party in 1876 and of the Cincinnati Convention of 1880, in which he nominated Mr. Bayard for the Presidency, in a masterly speech. He was elected United States Senator to fill the vacancy caused by the resignation of Mr. Bayard, and took his seat on March 4, 1885, and was re-elected in 1887 for the full term of six years. Mr. Gray's first wife was Harriet, daughter of the late Dr. Charles H. Black, of New Castle, and his second wife, her sister Margaret J. Black.

James R. Mitchell was born October 22, 1843, and came to the practice of law after having read a full course under the Hon. John W. Houston, now associate justice of the Superior Court of the State of Delaware, and was admitted to the bar in November, 1864. Mr. Mitchell practiced his profession in Milford, and came to be regarded as a sound lawyer. He died on the 11th day of January, 1879.

Anthony Higgins, son of the late Anthony M. Higgins, grandson of Anthony, and grand-nephew of the distinguished Jesse Higgins (concerning both of whom interesting matter appears in its appropriate place), was born in Red Lion Hundred, near St. George's, October 1, 1840. He graduated from Yale College in 1861 with the degree of A. B., and soon after began his law studies with William C. Spruance at New Castle, attended the Harvard Law School during the year 1862-63 and was admitted to the bar in May, 1864. He at once opened an office in Wilmington, in conjunction with the late Edward G. Bradford, afterwards United States district judge. In the same year he was appointed deputy attorney-general of the State under Attorney-General Jacob Moore and served two years. A pronounced and active Republican, he was made chairman of the State Committee in 1868, and in 1869 was appointed by President Grant as United States attorney for the district of Delaware, which office he held until June, 1876. He was a candidate for Congress in 1884. In 1870 Mr. Higgins dissolved partnership with Mr. Bradford and has since carried on the practice of his profession alone.

The present recorder of New Castle County, Thomas Holcomb, was born in New Castle July 13, 1843; studied law in the office of George B. Rodney and attended Harvard Law School in the college year of 1863-64; admitted to New Castle County bar in No-

John W. Wagoner, of Jackson County, son of John W. Wagoner and his wife, the daughter of John Wagoner, Jr. Wagoner, connected with the Christian Mission Society of the Eastern States of America, was born in 1819. He was educated to the study of law, and was admitted to the bar in New York, and was afterwards admitted to the bar in Ohio. He practiced law in Ohio, Michigan, and New York, and was admitted to the bar in New York in 1845. Mr. Wagoner was appointed Secretary of State with a position of honor for six years. He died in New York in 1875, leaving a widow, one daughter, and one son. He was buried in the City of New York, and his remains were interred in the City of New York.

Robert H. Bennett, son of Charles H. Bennett, was born at 1100 1/2 Ave. C, Little Rock, Ark., studied law in the law office of his father and graduated from Cumberland Law School in 1894, after which he came to the city of New York. He was in New York in 1897, and then the office at New Orleans with his father, and came back to Little Rock in 1898, when he opened an office in Washington, where he continues to practice.

To assess a model of the vapour liquid interface on a molecular level, the authors used the following procedure. They calculated the interfacial free energy of the P_{66} liquid crystal phase at $T = 285^\circ\text{K}$.

born in New-Orleans May 4, 1814. He graduated at the University of Louisiana in 1834, and has since that time been engaged in the study and practice of the law. He read law at the University of Louisiana, and at the University of Maryland, and was admitted to the bar in 1836. He commenced practice and soon obtained an extensive patronage in the profession. In 1841 he was elected to the Legislature of Louisiana by the Democratic party, and then retired to Winn Parish, where he has since resided. Mr. Gray was early in the Democratic party and has been prominent in its councils. He was a member of the National Convention of his party in 1876 and of the Louisiana Convention of 1884, in which he nominated himself for the Presidency, in a masterly speech. He declined United States Senatorship in the same year, on the resignation of Mr. Bayard, and was re-elected on March 4, 1885, and was re-elected for the third term of six years. Mr. Gray is the first daughter of the late Dr. Thomas H. H. New-Orleans, and his second wife, Harriet J. Bayard.

James R. Mitchell was born October 22, 1851, in
Canada, the son of a farmer of his name. He received
his education under the Hon. Jol. W. H. Mitchell, a
former justice of the Superior Court of the State of
Wisconsin, and was admitted to the bar in 1874.
Soon after Mr. Mitchell began his professional
career, and came to the United States, where he
arrived on the 11th day of January, 1875.

Anthony Harris, son of John Harris and Mary Harris, grandson of Anthony, and grand-nephew of distinguished deacon Thelma Harris, was an interesting writer, appearing in the *Register*. He was born in Red Lion, Pennsylvania, October 1, 1840. He graduated from college in 1862, with a law degree, and after he had his law studies with William H. Hunt at New Castle, attended Johns Hopkins University during the year 1882-3. He was admitted to the bar in 1864. He next was appointed to the position of clerk in connection with the Freedmen's Bureau, afterwards United States Marshal. In the same year he was appointed clerk of the State Prison at Auburn. He remained in that position two years. A few years

mean, he was made chairman of the State Comm. in 1902, and in 1903 was appointed to the

Samuel H. Arnold

vember, 1864; practiced a year in New Castle, and resided in New Orleans and Michigan, where, for several years, he was engaged in other business. In 1877 he opened an office in New Castle, and in the next year was elected recorder of New Castle County, which position he still holds. He was a member of the House of Representatives in 1875 and 1877 and Speaker of the House in 1875.

Levi C. Bird is a son of James T. Bird, of Christiana Hundred, where he was born November 20, 1842. He entered the office of Chancellor Daniel M. Bates and attended Harvard Law School, from which he graduated in 1863. He was admitted to practice in New Castle County in May, 1865, and without any delay opened an office in Wilmington, where he has continued from that time to the present. He was appointed register in bankruptcy of United States District Courts for the district of Delaware, and continued from 1867 to 1877.

James L. Wolcott is a native of Mispillion Hundred, and was born about one mile and a half east of Harrington, February 4, 1842. His parents were Josiah and Elizabeth (Dorman) Wolcott, and he received his education in the county schools, in which he afterwards taught. In 1863 Mr. Wolcott entered upon the study of the law with the Hon. Eli Saulsbury, and was admitted April 23, 1866. After his admission he took an active interest in politics, and soon arose to prominence in both it and his profession. The Senate at the session of 1867 elected him clerk. February, 1871, he was chosen counsel for the Levy Court, and continued in this position until January, 1879, when Governor John W. Hall appointed him Secretary of State for the term ending January, 1883.

Beniah Watson was born December 30, 1841, at Milford, Sussex County, and is the son of Curtis S. Watson. He was educated in his youth at Hartsville, Pa., and at Williston's Seminary, East Hampton, Massachusetts, and then spent three years at Yale College. He entered upon the study of law with Hon. Daniel M. Bates in the fall of 1863, and was admitted to the bar October 28, 1866. He entered Harvard Law School while a student and graduated in the summer of 1866. In 1869 he was elected clerk of the House of Representatives by the Democrats.

From this time Mr. Watson devoted himself to the practice of law, in which he has acquired considerable reputation in Chancery cases. Being strongly supported by the leading Republicans of the State, President Arthur, February 21, 1885, appointed him collector of internal revenue for the district of Delaware, which office he held until December 5, 1885.

James Henry Heverin, the brilliant orator and distinguished lawyer of Philadelphia, was born near Dover, Delaware, April 21, 1844. He is the third of eleven children born to James L. and Priscilla Stites Heverin. His father, early in life, was a well-known and prosperous merchant and business man

at Little Creek Landing, and since 1860 has resided in Dover, where he has dealt extensively in grain and is the owner of a large amount of real estate.

James H. Heverin obtained the rudiments of his education at a school near his home. When but ten years old he displayed wonderful powers of oratory and at that age made political speeches to enthusiastic audiences. For a short time he was a clerk in the store of his uncle, and later assisted his father in the mercantile business. In 1859 he was sent to a boarding-school at Village Green, Pa., and the next year attended Mount Holly Seminary, in New Jersey. In both of these institutions he exhibited remarkable faculties of mind and progressed so rapidly in his studies that in 1861 he entered the sophomore class in the College of New Jersey, at Princeton, and was graduated therefrom in 1864, at the age of twenty. At college he impressed every one with his great intellectual endowments, his diligence as a student, his genius for debate and his mental grasp, by means of which he thoroughly mastered the entire college curriculum and the contents of many books found in the libraries. Early in life he was an omnivorous reader and he rarely laid a book aside until all that it contained was indelibly imprinted on his mind. He thus amassed a great fund of general knowledge and carefully stored it away for use in after years.

One characteristic feature of his keen intellect is its mental leaf-turning, by which he constantly reveals these early stores. During his senior year at Princeton he registered as a law student at Dover, with the Hon. Joseph P. Comegys, and in the autumn of 1864 entered the middle class at Harvard Law School. He remained at this institution one year, then continued his legal studies in Boston until 1866, and was admitted to the practice of law at Dover the same year. He began his professional career in that town, but the field was too small for such a giant at the bar, and he removed to Philadelphia. He was then a comparative stranger in a great city which is now proud to claim him as one of her most distinguished men. In January, 1867, he became a member of the Philadelphia bar, and until January, 1868, was in the office of John O'Byrne, Esq., familiarizing himself with Pennsylvania practice. He then opened an office in the *Public Ledger* Building. He had no means of gaining a start in his profession except his own high talents and ability. But these were enough. He soon made a great impression in the courts, won success in almost every case in which he was interested, and in two years vaulted over the heads of the veterans in the profession, and stood shoulder to shoulder with great lawyers, who, by a lifetime of patient endeavor, had won the right to be ranked among the leaders at the bar. In 1869 the office of assistant district attorney of the city was tendered him by Furman Sheppard, the district attorney. He filled the position for two years and then declined a re-appointment. During the first month

he disposed of seven hundred cases, and in a short time gained all the experience of the office. The vastness and universality of his acquirements, his remarkable activity and untiring energy rendered him a very efficient officer, and gained for him a brilliant reputation and wide-spread popularity. The young orator from Delaware was now on the high-road to fortune, and when he retired from office he at once secured a very large and constantly increasing practice.

In the fall of 1871 he was elected one of the three delegates-at-large from Philadelphia to the convention that amended the State Constitution the following year. He received the highest Democratic majority ever before given to a candidate in the city, was the youngest member of the Constitutional Convention, and took an active part in its deliberations. He has since devoted his entire energies to the practice of his profession, in which he has few equals in this country. As an evidence of his acknowledged ability as a criminal lawyer, not one of the persons charged with capital offenses, when he has defended them, has suffered the extreme penalties of the law.

James H. Heverin is not only known in Philadelphia, but in every large city in the Union, as one of the most gifted and most successful lawyers of the day, and he is yet comparatively a young man. He rose rapidly to distinction at the bar, through his transcendental abilities, his undaunted energy and his faithfulness to duty. No client could take more interest in his own case than this tireless lawyer; nor could any man be more loyal to himself than Mr. Heverin to those who trust him. His fame is well merited.

The man and his remarkable powers are revealed when he pleads an important cause before a jury. He becomes intensely absorbed in his subject and pours forth a continuous stream of eloquence with all the force and passion of a great actor, and then moves the hearts of his hearers with the tenderest pathos in a voice as musical as the rippling woodland brook. When thus speaking his presence is commanding, his magnificent head partly thrown back, his poses graceful and dignified, and his gestures sweeping, intelligible and given with striking effect. If he believes his client is wronged and not wronging, or if he is confronted with fraud, cant or sham, his words march on like conquering armies, crushing down all opposition and bearing onward the white banner of truth; his voice rings silvery clear as a bugle and his hands speak through every finger.

He has an easy flow of language which clothes his keen thoughts in expressions which startle and amaze and hold the rapt attention of judges, jurors and auditors. He is known to have won cases when all the facts were against him, through the overpowering influence of his wonderful eloquence. Perhaps he is never more effective than when bitterly ironical, when the opposing counsel cannot endure his cutting polite words; but he is always sagacious, per-

suasive and vigorously earnest. His arguments are forceful as the battle-axe of Cœur de Lion when wielded by that stalwart monarch's hand! His sarcasm keen as the scimeter of Saladin, smiting down sophistries, however subtly woven. He asks no quarter, he gives no grace; he means to win, or losing, know the reason why.

The business of few other lawyers is so comprehensive in its scope, so various in its demands. In 1882 Mr. Heverin was appointed a-sistant attorney-general in behalf of the United States in the Court of Alabama Claims. He is counsel for the leading newspapers and theatres, for many of the wealthiest and most important corporations in Philadelphia, as well as for scores of prominent merchants, bankers and brokers, and always has on hand numerous cases in which immense pecuniary interests are concerned.

Even though success seems continually to attend his efforts and fortune and fame to follow him like well-trained servants, James H. Heverin continues the same quiet, generous, courteous, unaffected gentleman. In his social relations he is extremely popular, and as a member of the Clover Club and other social organizations of Philadelphia, and in his association with the people, he has won and deserved the admiration of a vast multitude of friends. It has been without the arena of the courts, on public or social occasions, that some of his noblest oratorical efforts were delivered. Here his full, flowing, sensuous style of oratory is modulated by a voice of sustained sweetness and power and a heart of chivalrous courtesy. His studied speeches contain great fulness of thought and illustration, and are models of correct composition. Their grammatical construction, rhetorical finish and accurate arrangement render them well-nigh faultless.

Since he first opened a law-office in the Ledger Building he has continued it there. One room at first sufficed, but now he and his partner, James H. Shakespeare, his brother-in-law, also a native of Delaware, have four of the most eligible rooms on the first floor of the building.

Mr. Heverin was married in 1866 to Miss Ada C. Cator, daughter of Dr. H. C. Cator, of Syracuse, N. Y. They have two children,—Harry C. Heverin, aged twenty, and Ethel Clover Heverin, aged five years. He lives at Delancey Place, his house being one of the most charmingly appointed in the city, where he entertains a great deal and shares a liberal hospitality.

James Alexander Fulton's lineage runs back to a very remote period. The family was prominent and well known in the county of Warwick, and near the city of Leamington, England, long before the accession of James the First, and some of the name still reside there. In the reign of James several families, with other English and Scotch Protestants, emigrated to Ireland, and settled in or near Londonderry, in the province of Ulster, where many of them may yet

ILLUSTRATION OF THE LAW.

[illegible]

Mr. F. B. Johnson was elected one of the three members from the county to the convention of the State Constitution the following year. He received the support of Democrats and Republicans alike in his election to this office, the only one of the kind in the history of the State, and he took an active part in its deliberations. He was elected to his second term to the present Legislature, and was elected as representative in the next. As an evidence of his acknowledged standing as a practical lawyer, not one of the persons engaged in the proceedings, when he has delivered his opinion, has ventured the extreme possibility of the law.

fact, Mr. Flavel is not only known in Philadelphia, but in every town in the Union, as one of the most gifted and most successful lawyers of the day, and not yet comparatively a young man. He has rapidly attained to the bar, through his extraordinary and almost undiminished energy and his indefatigable industry. No student could take more pains to learn the law than he, and he has shown that he could run more than the race of a hundred men. Mr. Flavel is to those who trust in him, a sure and well-secured reliance.

The following information is available in the records of the Bureau of Census and Statistics, which should be used in conjunction with the report on national and regional trends in the following table. The following table was compiled from the 1960 Census of the United States, which was published in 1962. The following table is based on the 1960 Census of the United States, which was published in 1962.

survive and vigorously earn out. His argument is as useful as the battle-axe of George Washington, which by that standard means his hand is cut off. Keeping the secret of his own mind, he says, "I never suffer, when I am in the greatest distress, to think he means to kill me, until I know the reason, why."

The business of new or other lawyers is so much extensive in its scope, so varied in its character, that in 1882 Mr. Howell was appointed to the state general's job, that of the United States marshal of Alabama Claims. He is counsel for 100 newspapers and thousands for many of the largest and most important corporations in Alabama, as well as for scores of prominent merchants and bankers, and always has on hand cases in which immense pecuniary interests are concerned.

[illegible]

Since the first open show was in 1960, and the first closed show in 1961, the club has continued to grow. It is now the largest and most active of the 125 S. A. chapters, with 1,000 members. It has had four of the past six presidents of the club, and the first floor of the building

the fact that the majority of the respondents were male, and that the majority of the respondents were from the United Kingdom. The results of the study suggest that the majority of the respondents were male, and that the majority of the respondents were from the United Kingdom. The results of the study suggest that the majority of the respondents were male, and that the majority of the respondents were from the United Kingdom.

Yours very truly
J. Alexander Fulton

be found. By intermarriage the family became intimately connected with the Allendars, Alexanders, Gilberts, Martins, Taylors and Wilsons, still familiar names in Ulster, especially near Colerain and Londonderry. William Fulton, in company with several kinsmen, emigrated to America from Londonderry about the year 1786. He was then unmarried. He first visited some distant relatives in Centre County, Pennsylvania, where he married Mary, a daughter of Major Thomas Wilson, a leading citizen of the county. The young people soon after this removed to what was then called Westmoreland, but now Indiana County, where they ever after resided. Thomas was the only son of this marriage, and father of the subject of this sketch. He was named after his grandfather Wilson.

About the same time that William Fulton left Ireland, James Neely and Rachel Taylor were married in Londonderry, and in less than two years after, they also emigrated to America, and settled in that part of Westmoreland County north of the Kiskiminetas River, afterwards included in Armstrong County. It was then almost a wilderness, and there was much unimproved and unappropriated land belonging to the State. Mr. Neely "took up" a tract of about six hundred acres, improved it, and resided there until his death, in 1832. A portion of it still remains in the family. This was distant about twenty miles from the residence of William Fulton.

On Christmas day, 1821, Thomas Fulton and Eleanor Neely, Mr. Neely's second daughter, were married at her father's home. The young couple soon after settled on a tract of land near by, where they continued to reside until the death of Thomas, February 2, 1853, and the widow for many years afterwards. On this farm, November 11, 1822, their first child, James Alexander, was born. He was so called in honor of his grandfather Neely, the middle name being added as a mark of affectionate regard for their relatives of that name in Ireland.

Mr. Fulton's ancestors, as far back as tradition goes, were Presbyterians, and he was carefully instructed in the faith and practice of that church, and acknowledges with gratitude the fidelity and devotion of his parents in his early training, and holds their memory in the most affectionate and sacred regard. Education was highly valued by his parents, but very hard to attain. He was sent, however, to the best schools the country afforded and made good use of his opportunity. His chief attainments, however, were made by assiduous private study. He read Latin at home, and recited once a week to the Rev. Cyrus B. Bristol, pastor of the Presbyterian Churches of Apollo and Boiling Spring, under whose ministry he united with the church of his fathers in the spring of 1842. He taught school from 1842 till 1846, but not continuously, and always afterwards maintained that teaching was a most wholesome discipline for a young man before entering upon a professional life, and always speaks of his experience in that line with enthusiasm.

Mr. Fulton from a boy had resolved to follow the legal profession; and, with this view, in 1846 he entered himself as a student-at-law, with Jackson Boggs, Esq., afterwards president judge of Armstrong County. He was admitted to the bar of that county June 21, 1848, and immediately took rank as a careful and safe counselor and able advocate. He was employed in an important case even before his admission, afterwards tried and won it. This gave him considerable reputation, as his opponent, the late Governor William F. Johnston, was then at his prime and an acknowledged leader. Two years later he won his first case in the Supreme Court of Pennsylvania, reversing the court below. This time his antagonist was the Hon. Horatio N. Lee, one of the ablest lawyers of Western Pennsylvania. In both these cases Mr. Fulton was sole counsel, and his success in contests with such opponents established his right to a place in the front rank of his profession.

In politics Mr. Fulton was a Democrat, both from education and conviction; and, although only once in his life a candidate for office, he always took a deep interest in public affairs and an active part in political campaigns. Even while in his minority, he often wrote for the Democratic paper of the county.

The Constitution of Pennsylvania was amended in 1850, so as to make the judges elective instead of appointive, as theretofore. This necessitated the election, in the fall of 1851, of five Supreme judges for the entire State. Mr. Fulton was chosen the Senatorial delegate from the district composed of the counties of Armstrong, Butler and Indiana, to represent this district in the State Convention, a most responsible and delicate trust.

The candidates were all nominated upon the first ballot, and all save one elected by the people.

Out of a hundred and thirty-three delegates in convention, only four voted for all the nominees, and Mr. Fulton was one of the four.

In 1852 Mr. Fulton was elected to the Legislature, leading his ticket one hundred and twenty-four votes, in the face of a determined opposition. Although the youngest man, perhaps, in the Legislature, he was placed upon the Committees of Ways and Means and of the Judiciary, the two most important committees of the House. He took an active part in all the proceedings, and was never absent from his seat a day during the session. The next year he was tendered the nomination without opposition, but declined it on account of the injury his absence was to his professional pursuits, and the compulsory absence from his family. His interest and activity in politics, however, did not abate, and he was selected as chairman of the executive committee of Armstrong County, and served thereon for ten consecutive years, including the memorable Presidential campaigns of 1856 and 1860. He was also a member of the Democratic State Central Committee in 1860, and frequently of State conventions.

For many years, and until his removal to Delaware, he was president of the Armstrong County Agricultural Society, also the Kittanning Cemetery Association, a trustee of the Kittanning Academy, and a member of various other benevolent and literary associations.

In 1862 Mr. Fulton established *The Mentor*, a weekly political and literary newspaper, which he continued to edit and publish until his removal to Delaware in 1865.

In 1864 Mr. Fulton resolved to move east, and after looking through Eastern Pennsylvania and Western New Jersey, he visited Dover, and was so charmed with its location, mild climate and adaptation to fruit culture, of which he is passionately fond, as well as by the intelligence and cordiality of its people, that he resolved at once to make it his future home. This he did the next spring, arriving in Dover April 15, 1865, where he has resided in the same house, and occupied the same office, ever since. He has never regretted this step, and to-day believes there is no more favored spot on earth than Delaware, of which Dover is the centre and capital.

He still continues to practice his profession as a calling, but gives considerable attention to literature and agriculture, in both of which he takes pleasure and delight.

In 1870, at the solicitation of Orange Judd & Co., of New York, he prepared a little work on "Peach Culture," which they published. It was very favorably received, became at once a standard authority, and has run through several editions.

Mr. Fulton still adheres to his political faith, but has never sought office. He is liberal and independent in his views and as ready to commend his opponent when right as to condemn his friends when wrong. In 1876 he was chosen to preside over the State convention, and has often been a very useful member of conventions and committees of his party.

In 1870 Governor Saulsbury appointed Mr. Fulton a trustee for Delaware College. This is a State institution, and this position he has held ever since.

On the Fourth of July, 1848, Mr. Fulton married Mary A. Rice, a daughter of Conrad Rice, Esq., of Indiana, Pennsylvania. They had eight children, only five of whom are yet living.

Charles G. Rumford, a native of Byberry township, Philadelphia County, Pa., was born August 17, 1841; studied law with Judge E. W. Gilpin and Victor Du Pont, was admitted to the bar May 7, 1866, and at once began practice in Wilmington, and still continues. He was deputy attorney-general in 1867-69, under Jacob Moore, clerk of United States District Court, under Judge Willard Hall, and was succeeded in 1873 by S. Rodmond Smith, the present clerk.

Richard Harrington, the third son of the late Chancellor Harrington, was born on the 19th day of

February, 1847, at Dover, Delaware. His early education was received there, and later he entered Georgetown College, in the District of Columbia, from which he graduated with high honors, and, returning to Delaware, commenced the study of law under the Hon. Nathaniel B. Smithers. After finishing the required course, he was admitted to practice in Kent County. He at once acquired a prominence at the bar, owing to his brilliant qualities as a speaker. About two years after his admission he removed to Washington, where he soon gathered about him an extensive clientage, and his ability as an advocate was fully recognized, making him a conspicuous figure at the National capital.

Mr. Harrington was appointed assistant district attorney for the district by Hon. George P. Fisher, and from the success which attended his prosecution of the many important cases, he became known throughout the country as one of the most powerful jury lawyers. His genius and rare talents won for him the highest commendations of the older lawyers in Washington and drew to him many able men as his personal friends. He continued to reside at Washington until the year 1875, when he returned to Delaware and resumed the practice of his profession in his native town. He afterwards became widely known in politics, and in 1882 was chosen the chairman of the Republican State Central Committee.

Mr. Harrington's political career can be said to have begun when a boy of thirteen, and his early speeches were a suitable foundation upon which he afterwards built so great a reputation as an orator. The mere announcement of his name as a speaker at any the meetings of the campaign in which he was interested was a sufficient guarantee of large assemblies, so anxious were the people throughout the State to hear him.

He possessed to a great degree an indescribable magnetism, and his manner of speaking electrified his hearers. He trusted to a great extent to his power of imagination and made but little preparation in some of his best efforts. His familiarity with the classics, from which he largely borrowed, added to his many other strong qualities, rendering him a most formidable adversary in the political arena, as in the trial of cases. He was, perhaps, one of the most gifted orators for his years that the State of Delaware ever produced.

It is related of him that while residing in Washington, he made a masterly plea for a prisoner's life upon but an hour's study of the case. He was called in after the regular counsel had abandoned all hope of any other verdict than that of murder of the first degree, and Mr. Harrington was prevailed upon to try to save the man's life. He arose in court and delivered one of the most effective speeches ever listened to by a jury, which resulted in securing a verdict for a much lower degree.

An able lawyer, a daring and shrewd politician, he was compared frequently with the late John M. Clayton as being peculiarly fitted to be a leader of men.

Socially, Mr. Harrington has very many attractive features, and his generous heart and sympathetic nature attached to him an extensive acquaintance, as well as a host of close friends.

After an illness of a few weeks, he died at his residence in Dover on the 18th day of November, 1884, respected by all.

Alfred S. Redden, of Sussex County, read law in the office of the Hon. Jacob Moore; admitted to the bar April 9, 1867; practiced at Georgetown a short time and moved to Arkansas, where he practiced his profession and became known as the "Silver-Tongued Orator."

Major S. Rodmond Smith was born in Wilmington, April 20, 1841, was a son of Albert W. Smith, and of Quaker descent. He began the study of law in 1860 with E. G. Bradford, but his studies were abandoned in July, 1862, when he began to recruit men for the Fourth Delaware Infantry. He was commissioned first lieutenant, afterwards promoted to the captaincy, and after the battle at Rowanty Creek, Virginia, in which, as senior captain, he had command of the regiment, he was breveted major. He shared in some of the most important battles of the war, and in the final struggle at Appomattox had command of the Third, Fourth and Eighth Delaware Regiments, and proved a skillful officer. After the close of the war he returned to Wilmington, resumed the study of law and was admitted to the bar in 1867. After residing in Wilmington for a year he removed to Carroll County, Maryland, where he lived until 1869, when he again returned to Wilmington to fill the position of secretary and treasurer of the Farmers' Mutual Insurance Company of Delaware. He severed his connection with that institution in 1873, to enter upon the duties of United States commissioner and clerk of the United States District and Circuit Court for Delaware, which offices he still holds.

Alexander B. Cooper, a son of the Rev. Ignatius T. Cooper, was born in Middletown, Delaware, November 15, 1844, studied law in the office of the Hon. Eli Saulsbury and was in the Law Department of the University of Pennsylvania; admitted to practice in New Castle County, on the 6th of May, 1867.

He opened an office in Wilmington in 1868, continued one year and moved to New Castle, where he remained until the courts were removed in February, 1881, when an office was opened in Wilmington, where he remains. Mr. Cooper was appointed attorney-general Oct., 1879, and served to March, 1885. A member of the Senate in the sessions of 1883-85 and Speaker at the last term.

George H. Bates was born in Dover, Delaware, Dec. 19, 1845. He is a son of the late Daniel M. Bates, of whom see sketch and portrait in this volume.

After receiving a preliminary education at Wilmington, Delaware, Mr. Bates was admitted to the sophomore class of the University of Pennsylvania in 1862. At the end of his junior year he left college, and went to Michigan, where he engaged in the lumber business. But ill health caused by the climate compelled him to change his plans, and in 1866 he came to Wilmington and began the study of law in the office of his father. He afterwards went to the Harvard Law School, and in April, 1869, was admitted to the bar. He at once opened an office in Wilmington, and the same year was appointed deputy attorney-general of the State of Delaware. During the five years that he held this office he took part in a large number of important criminal prosecutions, the most notable of which was that of the Delaware Bank burglars. In 1877, when the late Chancellor Bates resumed the practice of the law, the subject of this sketch became the junior member of the firm of D. M. & G. H. Bates. In 1878 Austin Harrington, Esq., was admitted to the firm and its name was changed to Bates & Harrington. Shortly after this Chancellor Bates died. The surviving partners continued the firm, and have since that time continued to conduct a large practice.

Mr. Bates' great natural talent, untiring industry and strict integrity forced him to the very front ranks of his profession when quite young. He enjoys the confidence of the bench and bar to an unusual degree, and his opinions are regarded by them with sincere respect. His reputation as a sound and successful lawyer is so good that his assistance has been and is sought in very many of the important cases tried in his county.

Mr. Bates has for years been a leader of the Democratic party, and has done much to build up and strengthen its power in this State. But he has always subordinated his participation in politics to the active duties of his profession, and has never sought political honors. In 1882, however, he yielded, at considerable personal sacrifice, to the unanimous demand of his party in Wilmington that he should represent them in the State Legislature. He was elected a member of the House of Representatives with special reference to certain constitutional reforms then demanded. He took his seat in January, 1883, and was chosen Speaker. His chief endeavor in the Legislature was to secure the passage of a measure giving to New Castle County increased representation in the General Assembly. Although his efforts were then unsuccessful, yet they did fasten the attention of the people of the State upon the injustice of the present iniquitous system of representation and were largely instrumental in causing the now well-nigh universal demand for a Constitutional Convention. Mr. Bates was a delegate to the Democratic National Conventions in 1880 and 1884. In 1887 he took a very active part in favor of the proposed convention to amend the Constitution of the State of Delaware, and the surprisingly large vote which the proposition received

at the polls was due to his exertions more than to those of any one else.

In 1886 President Cleveland appointed Mr. Bates a special commissioner of the United States to unite with commissioners of Great Britain and Germany in an investigation of the political condition of Samoa and also on the same trip to proceed on the United States steamer "Mohican" to Tonga and negotiate a treaty with that kingdom. Mr. Bates left Washington on this mission in July, 1886, and having completed the business entrusted him he returned and made his report to the government in December of the same year.

He has always taken an active interest in benevolent and educational enterprises, and is closely connected with the business interests of his city. He is an active member of the Delaware Historical Society and long actively connected with the Wilmington Institute, and at one time its president. He is also a director of the Farmers' Bank and of the New Castle County Insurance Company and other business corporations.

He is a member of the Protestant Episcopal Church, and was a delegate to the general conventions of 1877, 1880, 1883 and 1886.

In 1870 he was married to Elizabeth Ballister, daughter of the Hon. Charles Theodore Russell, of Cambridge, Massachusetts. Two children have been born of this marriage—Charles Theodore Russell and Daniel Moore.

Charles F. Richards, of Sussex County, was born June 15, 1846, in Northwest Fork Hundred, and was a son of John Richards. He received his academic education in New Jersey, registered as a student in Georgetown, graduated from the university at Albany, N. Y., was admitted in that city and also at Georgetown, and opened an office in the latter place in 1869. During the Civil War he served in the Sixth Delaware Regiment. From 1870 to 1876 he served as chairman of the Republican Executive Committee of Sussex County and as member of the State Committee, and in 1872 was a member of the Republican National Convention, which met in Philadelphia.

Edward G. Bradford, son of the late Judge Edward G. Bradford, of the United States District Court of Delaware, and Mary Alicia (Heyward) Bradford, was born in Wilmington March 12, 1848. After careful preparatory studies he entered the freshman class at Yale College in July, 1864, and graduated with honors in 1868. He read law with his father, and was admitted to the bar in May, 1870, and has since followed the profession in Wilmington.

In 1880 he was elected on the Republican ticket as Representative in the State Legislature, receiving the largest vote given for any candidate on the legislative branch of the ticket in New Castle County. He received the complimentary vote of his party for Speaker. Mr. Bradford married Eleuthera Paulina, a daughter of the late Alexis Du Pont.

Robert C. Fraim was born near Wilmington January 18, 1830, studied law under the direction of Wm. C. Spruance, admitted to the bar of New Castle County May 9, 1870, and opened an office in Wilmington. He was register of wills of New Castle County from 1864 to 1869, member of the Board of Education from 1870 to 1879, and clerk of City Councils from July, 1882, to July, 1884.

Henry R. Du Pont, a son of Charles I. Du Pont, was born in Brandywine Hundred, November 19, 1848, studied law with his half brother, Victor Du Pont, and was admitted to the bar of New Castle County in May, 1871. Upon the establishment of the office of United States jury commissioner in 1870, he was appointed to the office and still holds the position.

Walter Cummins, the present judge of the municipal court of the city of Wilmington, to which place he was chosen in July, 1883, is a son of George W. Cummins, and was born at Smyrna. After a three years' preparative course he entered Princeton College in 1865, and graduated in 1868. He studied law under the direction of the Hon. Thomas F. Bayard, and was admitted to the bar of New Castle County May 13, 1872, and he has from that time followed the profession in Wilmington. He served the city as solicitor two terms, and for several years was counsel for the trustees of the poor in the county.

Samuel A. McAllister is the son of a Philadelphia journalist, Samuel McAllister, and was born September 10, 1840. Both parents died before he was ten years old, and he was obliged to make his own way in the world. Upon the breaking out of the war he enlisted as a private soldier; served through the war, and was several times promoted. He was assistant assessor of internal revenue from 1869 to 1872 and during that period studied law, being admitted to the bar in the latter year. In 1877 he was elected city solicitor of Wilmington, and in 1878 was re-elected for a term of three years. He has been president of the Wilmington Institute and has had command of the State militia.

John P. R. Polk, of Wilmington, was born October 18, 1845, and is the descendant of Scotch settlers of 1660, who located in Maryland. He graduated from Nassau Hall, Princeton, in 1868, studied law with Thomas Francis Bayard and was admitted to the bar in 1872.

Henry R. Johnson was born in Mispillion Hundred, March 19, 1848, and is the son of ex-Senator Alexander Johnson and Williamini Johnson, the daughter of Hon. Henry M. Ridgely. Mr. Johnson was prepared for college at Prof. William A. Reynolds' academy, of Dover, and entered Washington College, Chestertown, Maryland, from which he graduated with credit in the year 1879. He entered upon the study of law with his uncle, Edward Ridgely, in 1869, and was admitted to the bar April 22, 1872.

John Reed Nicholson is the son of Hon. John A. and Angelica Killen (Reed) Nicholson, and was born in Dover, May 19, 1849. He was prepared for college

John F. Kennedy
President of the United States

HISTORY OF DELAWARE

the vessel was due to his meeting with them to receive the cargo.

He was a member of the United States court, to which he was appointed by Great Britain and Germany in 1806, and he participated with Simon Bolivar on the voyage to Peru, on the United States frigate "Medusa," to organize and negotiate a treaty with that nation. Mr. Bates left Washington on his return in July, 1807, having just completed his mission. He was married and gave his attention to the government in two years of the same year.

He has always taken an active interest in benevolent and educational enterprises, and is chiefly connected with the business interests of his city. He is an active member of the Delaware Historical Society and has actively assisted with the Waterbury Institute, and at our time is resident. He is also a director of the Farmers' Bank and of the New Castle County Insurance Company and other business corporations.

He is a member of the Protestant Episcopal Church, and was a delegate to the general convention of 1877, 1880 and 1883.

In 1872 he was married to Elizabeth Ballister, daughter of the Hon. Chief Justice Russell, of Cambridge, Massachusetts. Two children have been born of this marriage: Charles Taylor Russell and Donald Moore.

Charles F. Richards, of Sussex County, was born June 16, 1846, in North's Creek Hundred and was a son of John Richards. He received his college education in New Jersey, registered as a student in Georgetown University, and was a member of the Virginia, N. Y., was admitted to that city and also at Georgetown, and opened an office in that latter place in 1871. During the Civil War he served in the State Delaware Regiment. From 1870 to 1879 he served as chairman of the Republican Executive Committee of Sussex County and as member of the State Committee, and in 1872 was a member of the Republican National Convention, which met in Philadelphia.

Edward G. Bradford, son of the late Judge Edward G. Bradford, of the United States District Court of Delaware, and Mary Augusta (Hosworth) Bradford, was born in Wilmington March 12, 1848. After parental preparatory studies he entered the freshman class at Yale College in 1864 and graduated with honors in 1868. He read law with his father, and was admitted to the bar in May, 1871, and has since followed a successful profession in Wilmington.

In 1880 Youngs elected him a "Republican" and as a Representative in the State Legislature, serving the district of Wilmington and vicinity, and on the basis of a record of the Civil War, was made a member of the 60th Congress, to which he participated. He served in the House of Representatives, and in the Senate of the United States in 1881.

Robert C. Fraum, was born in Wilmington, January 15, 1830, studied law under the direction of John C. Sargent, and moved to the bar of New Castle County, May 1, 1850, and was admitted to the bar. He was a member of the New Castle County bar from 1850 to 1860, member of the bar of Delaware from 1860 to 1870, and clerk of the courts from 1882 to July, 1884.

Henry L. Pont, son of Charles L. Pont, was born in Brandywine Hundred, New Castle County, studied law with his half brother, Alexander Pont, and was admitted to the bar of New Castle County, May, 1871. Upon the establishment of the bar of the United States in New Castle County, he was appointed to the office and still holds the position.

Walter Cummins, the present judge of the municipal court of the city of Wilmington, was elected in July, 1884, is a son of the late Governor, and was born at Stevens, New York, where he prepared for college. He entered Princeton in 1860, and graduated in 1868. He served in the direction of the War. There he was elected a member of the bar of New Castle County, May, 1872, and he has been that time a law partner in Wilmington. He served the city for two terms and for several years was clerk of the trustees of the poor in the county.

Samuel A. McAllister is the son of a prominent stockholder, McAllister, and was born in 1849. Both parents died when he was years old, and he was left to make his own way in the world. Upon the breaking out of the war he enlisted as a private soldier, served three years, and was several times promoted. He was an assessor of internal revenue in 1864, and during that term attended law at the University of Maryland. He was a solicitor of Wilmington, and in 1878 was elected for a term of three years. He has been the Wilmington Institute and has been in the State militia.

John P. R. Polk, of Wilmington, was born in 1846 and is the youngest son of John P. Polk, who located in Maryland, of Nassau Hall, Princeton, in 1808. He was a member of the Delaware Bar and was a member of the State militia.

Henry R. Johnson was born in Maryland, March 19, 1838, and is the son of Alexander Johnson, and William Johnson, daughter of Hon. Henry M. Johnson. He was prepared for college at Princeton, and attended the University of Delaware, where he graduated with credit in the year 1857, and served with him in the war of 1861, and was admitted to the bar in 1862.

John Reed Nichols, of the bar, was born in Delaware, May 19, 1849. He is

Very Respectfully,
Henry C. Conrad

at the schools of Dover and Washington, entering Yale College in 1866 and graduating in 1870. The following year he joined a geological expedition in charge of Prof. O. C. Marsh, of Yale, in a trip over the plains, Rocky Mountains and the Pacific slope. While on this trip he was entered as a law student with Chancellor Daniel M. Bates. Mr. Nicholson in 1871 left Dover, and entered the Columbia College Law School, from which he received a diploma in 1873, and was admitted to the bar of New York City the same year, and practiced in that city until the autumn of 1876, when he returned to Dover and opened the present office. June, 1884, he was married to Isabella H. Hager, of Lancaster, Pa., a great-grand-niece of George Read, the signer. Mr. Nicholson was town solicitor from 1876-84, and also attorney for the Levy Court from 1884 to the present time.

James H. Hoffecker, Jr., born in Wilmington, April 13, 1850, graduated at Yale College; studied law in the office of S. M. Harrington, Jr.; admitted to the bar of New Castle County November 24, 1873; entered into partnership with his preceptor, and continued until his death, in 1878, and is yet in practice.

Aaron Conrad, father of Henry C. Conrad, the subject of the following sketch, was born near the "Blue Bell," in Montgomery County, Pennsylvania, December 25, 1805, and was by birth-right a member of the Society of Friends. He was known as a man of excellent business qualifications, and in all the active pursuits of life in which he was engaged he was signally successful. In his early days he was occupied in the business of milling; later, he went to farming, and continued thus until 1845, when he started the coal business at Nicetown. In this, as in his previous endeavors, he built up a thriving and prosperous trade.

In 1856 he came to Wilmington, and invested capital in land then in the suburbs of the city, selecting a portion of his purchase, on which he built himself a large and comfortable dwelling. He also erected a number of houses, which he quickly sold, and subsequently moved into the thickly-settled part of the city, where he continued to reside until his decease, December 31, 1878, at the good old age of seventy years.

Aaron Conrad was a man of a quiet and genial disposition, combined with a certain magnetism that quickly converted acquaintances into steadfast friends. He served in the City Council, where he represented the Fifth Ward.

Henry C. Conrad was born in Bridesburg, Pa., April 25, 1852. In 1856 he removed with his father to Wilmington, where he has since resided. He received his early education at the public schools, and read law in the office of Anthony Higgins, Esq.

In the year 1873 he graduated at the Harvard Law School, and was admitted to the bar in 1874. It was in this year that Mr. Conrad first appeared in public as a Republican speaker, whilst making an active

canvass of the State. In the political campaign two years later, he attracted public attention by the decisive and conspicuous part he achieved and the great service he rendered his party.

In 1879 he was appointed United States commissioner and supervisor of elections by Judge Bradford. In the same year he was elected a member of the Board of Education. In 1880 Mr. Conrad purchased an interest in the *Morning Herald*, a Democratic journal published in Wilmington, but changed its name to the *Morning News*, as well as its politics, which henceforth was devoted to Republican principles. The *Morning News* almost immediately sprang into popular favor, and it was characterized by a vigor that was as creditable to its proprietors as it was gratifying to its readers. It consequently enjoyed a good circulation. The articles from the pen of Mr. Conrad, which appeared in its columns, were incisive, clear and vigorous, and stamped him as an earnest and powerful writer.

In 1881 Mr. Conrad was president of the Board of Education, and in the following year he was president of the City Council. It was at this period he withdrew from journalistic duties, the *Morning News* having been purchased by the News Publishing Company. He now resumed his law practice. In 1885, being still a member of the City Council, he resigned from that body to accept the nomination for mayor on the Republican ticket.

Mr. Conrad commands the entire confidence and esteem of his fellow-citizens, and among his brethren of the Methodist Episcopal Church there is none more respected than himself.

Joseph A. Richardson, born in Wilmington July 13, 1849, studied law in the office of Benjamin Nields, and was admitted to the bar of New Castle County at the November term of court, 1874; opened an office in Wilmington in January, 1878.

Henry Clay Turner was born in Wilmington in 1849. At the age of sixteen he entered the army. He received his early education in the common schools and St. Mary's College, Wilmington. The education obtained in this manner was but the foundation of a large fund of general knowledge, and a classical education secured by his own exertions and private study. He entered upon the study of law with John O'Byrne in 1872, and upon that gentleman's removal to New York, Mr. Turner concluded with the Hon. Charles B. Lore, and was admitted to the bar of New Castle County May 24, 1875. In connection with Harry Sharpley, the law-firm of Turner & Sharpley was formed, and continued but a few years. In 1881 he was elected city solicitor and continued in that office until July, 1887.

Mr. Turner has been active in politics. Every campaign since his admission to the bar he has spoken for the Democratic party in all parts of the State, and his addresses are rich with wit and logic. His personal manners and genial disposition win for him many warm friendships.

John V. Rice studied law in the office of E. G. Bradford; was admitted to practice in New Castle County May 24, 1875, practiced for a time in Wilmington and finally settled in Chester, Pa., where he opened an office.

John H. Frazier was admitted to the bar December 4, 1876, and is in practice in Wilmington.

James L. Vallandigham was born in Red Lion Hundred, and admitted to the bar in Ohio, where he was assistant district attorney for Hamilton County. He returned to Delaware and was admitted to the bar of New Castle County December 4, 1876, and opened an office in Wilmington, where he continued a few years and then removed to Newark, opened an office, and was appointed justice of the peace.

Clifford James, born in Wilmington September 26, 1854, studied law in the office of Samuel M. Harrington, Jr., and was admitted to practice at the bar of New Castle County December 4, 1876, and began practice in Wilmington in 1878.

J. Ernest Smith, on the maternal branch of the family, is descended from Thomas Wollaston, who settled in the county in 1675, and is a son of Albert W. Smith, of Wilmington. He was born January 29, 1850, studied law under the direction of Victor Du Pont, and was admitted to practice in New Castle County May 14, 1877. He was appointed treasurer of the Wilmington Savings Fund Society in 1876, and served until 1884, and was also appointed solicitor, which position he still holds. He opened an office in Wilmington in April, 1884.

John Ponder Saulsbury was born at Georgetown, Sussex County, August 27, 1853, and is the son of Chancellor Willard Saulsbury. His early education was secured at Georgetown Academy and Professor William Reynolds' school at Wilmington. He prepared for college at Phillips Exeter (New Hampshire) Academy, and entered the University of Harvard in 1873, but was compelled to abandon a college course the next year on account of ill health. He entered upon the study of law in 1874, upon his return from college, with his father, and the same year moved to Dover and was admitted to the bar at Georgetown at the spring term, 1877, and opened an office in Dover; was appointed attorney for the Levy Court in 1879, and continued to act in that capacity until 1884. January, 1886, he was appointed Secretary of State by Governor B. T. Biggs for the term ending January, 1891.

Willard Hall Porter is a grandson of Judge Willard Hall, and a son of Dr. Robert R. Porter. He was born in Wilmington, April 7, 1854, graduated at Princeton College in 1875, studied law under the direction of the Hon. Daniel M. Bates, attended Columbia College Law School in 1877, and was admitted to practice as a member of the bar of the State of New York. Soon after his return to his native city he was admitted to the bar of New Castle County (May 17, 1886), and is now in practice in Wilmington.

Austin Harrington, son of Chancellor Samuel M.

Harrington, the junior member of the firm of Bates & Harrington, was born in Dover, November 5, 1854, studied law in the office of his brother, Samuel M. Harrington, Jr., admitted to the bar of New Castle County May 14, 1877. In 1877 he entered the office of Harrington & Hoffecker, and in October, 1878, became a partner of the firm of Bates & Harrington.

To Mr. Harrington is largely due the credit for the organization of the "Delaware Society for the Prevention of Cruelty to Children," and he has acted as solicitor of the society from its organization.

James Pennewill was born near Greenwood, Sussex County, June 16, 1854. He is the son of Simeon and Annie E. (Curry) Pennewill. He received his early education in the select schools of the neighborhood, and prepared for college at the academy of Professor William A. Reynolds, of Wilmington, from 1868 to 1871, entering Princeton College the latter year, graduating in 1875, when he entered upon the study of the law with the Hon. N. B. Smithers. He was admitted to the bar October 28, 1878, and entered upon its practice at Dover. He is now associated with George V. Massey.

Mr. Pennewill has always taken an active interest in politics, and is chairman of the Republican State Central Committee.

Samuel W. McCaulley, born near Wilmington February 12, 1837, studied law under the direction of Anthony Higgins, was admitted to the bar of New Castle County November 29, 1878, at once opened an office in Wilmington and has continued in practice from that time.

Harry Emmons, born in Wilmington April 5, 1854, studied law in the office of the Hon. Charles B. Lore, of Wilmington, admitted to practice November 30, 1878, and went in partnership with his preceptor.

John Biggs, a son of Governor Benjamin T. Biggs, was born at Middletown, October 15, 1855, graduated from Princeton with distinction, studied law under the direction of Victor Du Pont, admitted to the bar of New Castle County, December 1, 1879, and at once began practice in Wilmington. He was appointed deputy attorney-general April 7, 1885, and attorney-general April 4, 1887.

J. Frank Ball, the present city solicitor, is a native of Wilmington, and was born January 4, 1854; studied law under the direction of the Hon. Charles B. Lore, was admitted to the bar April 24, 1879; at once began practice in Wilmington. He was elected city auditor 1881, and served until 1887, when he was chosen city solicitor.

Lewis C. Vandegrift, a native of St. George's Hundred, was born August 27, 1855, entered the office of the Hon. George Gray and attended Harvard Law School from 1877 to '80, admitted to practice at the bar of New Castle County in November, 1879, and in 1881 began practice and is now of the firm of Bradford & Vandegrift, in Wilmington.

David T. Marvel, of Georgetown, was born Nov. 2, 1851, in Nanticoke Hundred, graduated at Princeton College in the class of 1873, studied law with Thomas F. Bayard, passed two years at Harvard Law School, was admitted in April, 1879, and has practiced law in Georgetown from that time.

Frederick A. Williams was born in Feeding Hills, Mass., November 17, 1846, removed to Dover, Del., in 1868, to engage in fruit-growing, was elected principal of the schools in 1871, and remained in that position until 1878, when he resigned to devote himself to the study of the law, which he had commenced in 1876, under the direction of N. B. Smithers, and in 1879 he was admitted to the bar. He removed, in 1882, to Colorado, where he now follows his profession.

William T. Lynam was born in Mill Creek Hundred, Del., September 11, 1859, studied law under the direction of the Hon. Charles B. Lore, admitted to the bar November 22, 1880, and at once began practice in Wilmington. He was appointed deputy judge of the Municipal Court of Wilmington in November, 1886.

Thomas Davis was born near Milford, Del., August 13, 1853, studied law in the office of the Hon. Charles B. Lore, admitted to the bar in Sussex County April 13, 1880, and began practice in Wilmington. He was appointed deputy attorney-general, April 5, 1887.

Robert C. White, born near the Draw bridge, in Broadkill Hundred, July 16, 1852, studied law under chancellor Willard Saulsbury, and was admitted to practice in Kent County, April 18, 1880, opened an office in Georgetown, where he is in practice.

William J. Black is a son of Dr. Charles H. Black, of New Castle. He studied law in the office of George Gray and was admitted to practice November 22, 1880, and began practice in Wilmington, and in 1885 was appointed consul to Nuremberg, where he now resides.

Charles Reynolds, Jr., was born in Wilmington, studied law under direction of William C. Spruance, admitted to practice November 28, 1881, practiced in Wilmington about one year and engaged in journalistic pursuits on the *Morning News* and *Every Evening*, and later established the *Baltimore Herald*, and died in 1886.

Richard Rolland Kenney was born in Little Creek Hundred, near Laurel, Sussex County, September 9, 1856, and was educated in the county schools, Laurel Academy, and graduated at Hobart College, Geneva, N. Y., June 1, 1877. He is the son of Samuel and Hettie Kenney, descendants of the earliest settlers of Sussex County. Immediately after his graduation he went to Texas, but shortly after returned and taught school in Accomac County, Va., until January, 1878, when he came to Dover and entered upon a course of legal study with Chancellor Saulsbury. January, 1879, he was elected State librarian to succeed George O. Shakespeare, and was admitted to the bar October 24, 1881. The Legislature re-elected him in

1881 librarian, to serve until April, 1883. While librarian he compiled the first catalogue ever prepared of the nineteen thousand volumes in the library.

He was appointed adjutant-general of the Delaware National Guard January 29, 1887, by Governor Biggs, and by his energy has succeeded in increasing the number of companies from six to ten. To his efforts is due the first annual encampment that was held at Rehoboth in August, 1887. His success as a lawyer has been rapid, and he has acquired a large practice.

Ezekiel T. Cooper was born near Willow Grove, North Murderkill Hundred, Kent County, January 5, 1858. He is a son of Samuel B. Cooper, who was Speaker of the Senate in 1883, and Sarah E. (Jackson) Cooper. He received his early education in the schools of the county and took an irregular course at the University of Virginia from 1876 to '79. In 1878 he entered upon the study of law with the Hon. Eli Saulsbury, and completed with James L. Wolcott, was admitted to the bar October 24, 1881, and opened an office in Dover, where he has since practiced. Mr. Cooper has always been active in politics, and in 1881 was elected reading clerk of the House of Representatives, and clerk of the House during the session of 1887. Governor Biggs, in November of 1887, appointed him judge-advocate-general of the Delaware National Guard.

George A. Elliott was born in Brandywine Hundred, October 30, 1855, and studied law in the office of Victor Du Pont, admitted to practice May 18, 1881, and opened at once an office in Wilmington.

Charles M. Curtis was born in Newark, Delaware, August 19, 1859, studied law under the direction of Anthony Higgins, attended Harvard Law School from 1878 to 1881, admitted to practice in New Castle County February 6, 1883, and opened an office in Wilmington.

Walter H. Hayes, born at Wilmington, August 7, 1858, studied law in the office of Victor Du Pont, and admitted to practice September 19, 1881, and soon after opened an office in Wilmington.

Tilghman Johnston, born in Erie, Pa., November 10, 1852, studied law in Wilmington and was admitted to practice in New Castle County November 28, 1881, and with Walter H. Hayes opened an office in Wilmington, where they are in practice.

Willard Saulsbury, Jr., son of Chancellor Saulsbury, was born in Georgetown April 17, 1861, studied law in the office of his father, admitted to practice in Kent County October, 1882, opened an office in Wilmington, where he is still in practice.

Herbert H. Ward was born in Sheffield, Vt., October 11, 1857, studied law in the office of William C. Spruance, was admitted to the bar in New Castle County in November, 1882, and at once began practice in Wilmington.

William T. Smithers was born at Frederica August 26, 1863. He is the son of Joseph and Mary (Town-

send) Smithers, and was educated by private tutors and at the academy of Prof. William Reynolds at Wilmington. He entered upon his legal studies in 1877 with Hon. N. B. Smithers, and was admitted to the bar October 21, 1882. Mr. Smithers has taken an active interest in politics, and was secretary of the Republican State Central Committee of 1882, in the most fiercely contested campaign ever in Delaware.

Francis M. Walker was born in Mill Creek Hundred November 28, 1848, studied law in the office of Anthony Higgins, admitted to practice in New Castle County December 12, 1882, and is now in practice in Wilmington.

Francis H. Hoffecker was born in Wilmington August 24, 1854, studied law under the direction of the Hon. Charles B. Lore and James H. Hoffecker, Jr., was admitted to practice in New Castle County December 12, 1882, and a junior member of the firm of Hoffecker & Hoffecker.

John K. Bradford was born in Wilmington November 30, 1856, studied law in the office of Victor Du Pont, admitted to practice May 15, 1882, and opened an office in Wilmington soon after, and continued until his appointment as register of wills, June 4, 1886, which office he still holds.

Lilburne Chandler, a native of Wilmington, was born January 24, 1858, studied law under the direction of Anthony Higgins, admitted to practice May 19, 1882, and opened an office in Wilmington in 1883.

John B. Moore is a native of Felton, Kent County, and was born in 1861. He studied law in the office of E. G. Bradford, and was admitted to practice November 26, 1883, and was appointed by President Cleveland, in 1887, third assistant Secretary of State.

Samuel D. Truitt was born in Caroline County, Maryland, 1860, and moved to Delaware after he had attained his majority and entered upon the study of law with C. H. B. Day, and was admitted to the bar October 27, 1884.

He was elected State librarian by the Legislature in April, 1882, and reappointed by Governor Charles C. Stockley. His term expired April 9, 1886, and shortly afterwards he removed to Washington, D. C.

Andrew E. Sanborn was born in Leipsic, Kent County, March 11, 1857; graduated from Lafayette College in 1881; studied law under the direction of Levi C. Bird; was admitted to the bar in New Castle County September 15, 1884, and is now in practice in Wilmington.

George T. Brown was born in Chester County, Pa., April 17, 1861; graduated at the Wilmington High School in 1880; studied law in the office of Benjamin Nields, of Wilmington, and was admitted to practice at the bar of New Castle County May 19, 1884.

J. Frank Biggs, son of Sewell C. Biggs, was born near Summit Bridge, Delaware, October 1, 1858; graduate of Lafayette College; studied law under the direction of the Hon. Charles B. Lore; was admitted to practice September 15, 1884, and is in practice in Wilmington.

Edw. D. Hearn was born in Dagsborough Hundred Jan. 22, 1859; studied law with Charles M. Cullen, of Georgetown, attended law school at Ann Arbor, Mich., was admitted to practice in Michigan, January, 1883, graduated in March following, and was admitted in Sussex County in April, 1884.

Charles L. Moore, son of the Hon. Jacob Moore, was born in Georgetown February 14, 1863, studied law with his father and was admitted in October, 1885.

Charles W. McFee, son of John R. McFee, a native of Georgetown, born October 27, 1859, studied with his father and was admitted April 14, 1884, since which time he has practiced at the Sussex bar, and is private secretary of Senator Gray.

Nathaniel B. Smithers, Jr., is a son of Hon. N. B. Smithers, of whom there is a sketch in another place. He was born in Dover, March 24, 1861. He was educated at the Conference Academy, of Dover, the Hill School of Pottstown, from which he graduated in 1882, and Lafayette College. He entered upon the study of law with his father in the autumn of 1882, and was admitted to practice April 25, 1886.

George Lodge, son of William C. Lodge, born in Brandywine Hundred October 15, 1861, studied law under the direction of the Hon. Charles B. Lore, admitted to the bar of New Castle County in November, 1886.

William S. Prickett, born near Mount Holly, N. J. April 19, 1863, studied law in the office of the Hon. Edward G. Bradford, admitted to the bar February 7, 1887.

William H. Boyce, son of State Auditor James H. Boyce, was born in Broad Creek Hundred, November 28, 1855, studied law with Alfred P. Robinson, and was admitted to practice at Georgetown October 10, 1887; and during the campaign for the Constitutional Convention he occupied a prominent position as a speaker.

THE WHIPPING-POST AND PILLORY.¹—The whipping-post and pillory, Delaware's "peculiar institutions" for the punishment of certain crimes, are still used in all three of the counties. There is considerable uncertainty as to the time of their introduction, but according to the chronicles of Diedrich Knickerbocker, it would seem that the whipping-post was not used in what is now the State of Delaware previous to the year 1656. In that year Jan Risingh, Governor of New Sweden, visited the Dutch Fort Casimir, situated where New Castle now stands, when Van Poffenburg, the commander, taxed all his resources to do them honor. He had his men drawn up in line, and marches and counter-marches were given in honor of his guests. A sumptuous dinner was served, but before taking their seats around the table three prisoners were brought out and soundly flogged, for the purpose of impressing on the minds of the Swedes the discipline which he maintained in the colony.

October 19, 1662, the Dutch Governor, Hinijoma,

¹ Prepared by W. R. Long.

sentenced one Turck to be hung, his head cut off and placed upon a post at Horekill.

Christopher Billop, commandant at New Castle in 1677, had a man named Francis Jackson "put in ye stocks" on September 26th of that year, for engaging in a disturbance at the fort.

The first sentence of whipping of which any record can be found in Sussex County is April 9, 1688, when the man who kept the tavern where the court met was ordered to be whipped for some offense, but the sentence was afterwards suspended for one year and four months, and it is more than probable was never executed.

April 3, 1679, the following sentence was passed upon a woman: "Agnita Hendricks, being heretofore presented for hooring, and having three bastard children one after another, the Court doe, therefore, think just to order and sentence that she, the said Agnita Hendricks, be publicly whipped twenty-seven lashes, and pay all costs." Notwithstanding this severe sentence this woman again sinned, and the next year she was whipped with thirty-one lashes and banished.

In 1669, when Francis Lovelace was Governor, he sentenced one Konigsmarke, known as the "Long Finn, to be severely whipped, and to be stigmatized with the letter R branded upon his breast," for being a rebel and opposing the Governor's authority. In addition to this, he was also ordered to be sold as a slave to the planters of Barbadoes. Other cases of whippings are mentioned in the few records which can be found of those early days in the history of the State.

These whippings, however, seem to have been inflicted at the pleasure of colonial authorities until the year 1717, when the "General Assembly of the counties of New Castle, Kent and Sussex upon the Delaware, and the Province of Pennsylvania" was held. At that time William Keith was Governor, having assumed the duties of the position May 31, 1717, and served until June 22, 1726. This General Assembly passed "An act for the advancement of justice and the more certain administration thereof," in which murder and several other crimes were made punishable by death, while larceny and a number of similar offenses "are to be punished the same as provided by the laws of England." As the offenses enumerated were at that time punished by whipping in that country, it is but reasonable to suppose that this was the intent of the act; consequently the year 1717 was the period when corporal punishment was legally introduced into Delaware by the local government.

In addition to whipping, the pillory, stocks and crapping were also introduced, and a number of instances of their being inflicted are found on the records. In 1789 a negro convicted of felonious assault was sentenced to stand in the pillory four hours "with both ears nailed to the pillory," and "before he be taken down from the same, he shall have both

his ears cut off close to his head." In those days the prisoner who had been whipped was obliged to wear the letter T one inch wide and four inches long, made of red flannel, and sewed on his outer garment, either on the arm or between the shoulders.

This provision was in latter years abolished and the convict's jacket substituted, which he was obliged to wear for three or six months, according to the sentence of the court, after he was released from jail. The object of this was no doubt for the purpose of driving criminals out of the State, as it is scarcely probable that a discharged prisoner would wish to remain in a place where he was obliged to wear for months a badge publishing the fact that he was a criminal. Some years ago this section of the criminal code, providing for wearing the convict's jacket, was repealed by the General Assembly, but for some time previous it had been a dead letter.

In 1829 a colored woman named Sarah Ann Morris, who had been convicted of larceny, was sentenced "to pay the costs of prosecution, \$54.06 restitution money to William Stephens, the owner of the property stolen and not recovered, with the further sum of \$39.25, being the value of the property recovered, and that on Saturday, December 19th, between the hours of 10 o'clock in the morning and 2 o'clock in the afternoon, she be publicly whipped with twenty lashes on her bare back, well laid on, and shall be disposed of as a servant to any person or persons residing within this State, for the highest sum that can be obtained for such term as shall be necessary in order to raise the restitution money and all costs, or any balance thereof that may remain after such payment as the offender may be able to make, provided that such term shall not exceed seven years." The sentence was executed to the letter, and the woman was sold on January 1, 1830. The bidding was not spirited, and she was sold to Henry File for fifty cents.

The administration of justice in those days was not confined to the State courts, as the justices of the peace in the different hundreds would meet on specified occasions, and dispose of such business as might be brought before them. They had the power to sentence a prisoner, to receive corporal punishment, and the sentence was generally carried into effect at once, the lashes being laid on by the constable. The same plan was at one time the custom in the city of Wilmington, and the punishment was administered with a rattan in the hands of a city constable, either in the yard in the rear of the City Hall, or in the basement of that building.

In Kent and Sussex Counties the whippings are administered with an instrument resembling the stock of a carriage whip, but in New Castle County a "cat o' nine tails" is used, the stock of which is twenty inches long, and the nine lashes twenty-four inches each. The whipping-post at New Castle is situated in the jail-yard, but all corporal punishment is public, the gates being opened so that all who choose can enter.

The post is about one foot square, and with the pillory, which is above, about fifteen feet in height. On each side of this post, and about five feet above the ground, there are iron clasps fitting over staples, in which the wrists of the prisoner are placed. The courts of New Castle County are held in February, May, September and November, and a prisoner is generally sentenced to be whipped or to stand in the pillory on the Saturday following his conviction. The culprit is stripped to the waist, and after being brought out is fastened to the post by the wrists, when the warden announces to the sheriff the number of lashes he is to receive, when that official applies the whip, while the warden standing on the opposite side keeps count of the number, which in no case must exceed that prescribed by the court. A singular case happened a few years ago, being that of a half-witted colored man, who pleaded guilty to an indictment charging him with larceny, and was sentenced to receive five lashes.

He seemed to have a great dread of the punishment, and after he was fastened to the post succeeded in freeing his left wrist from the fastening. The consequence was that he was enabled to dodge the blows, and it is doubtful if he received two out of the five. When the warden announced the full number, the fellow suddenly became very quiet, and the sheriff, no doubt irritated at his persistent dodging, improved the opportunity to bring the lash down across his back in a manner that made him jump about a foot from the ground. Nothing was thought of the matter until the next term of court, when the negro, having completed his three months' imprisonment, called on the attorney-general and made a demand for damages for the extra lash given by the sheriff on his own responsibility. The matter was brought to the attention of the court, when the chief justice remarked that it was a case without a precedent, and that the only way he knew of settling it was to credit the prisoner with one lash on the records of the court, as he was sure he would be back again, when it would be allowed in passing sentence.

The lash is no longer used in the case of women, it having been abolished, as far as they are concerned, several years ago. It formerly was also the law to impose sixty lashes, in addition to imprisonment for life, in the case of persons convicted of murder of the second degree, but the lashes in such cases have, by an act of the Legislature, been remitted. The laws of Delaware provide twenty lashes for any one convicted of having set fire to any ship, vessel or

building, except a dwelling-house, arson in the latter case being punishable with death. For setting fire to a court-house, or other place where public records are kept, sixty lashes; burglary, not less than twenty nor more than forty lashes; highway robbery, fifty lashes; horse-stealing, twenty lashes; buying or receiving stolen goods, knowing them to have been stolen, twenty lashes; larceny, from five to twenty lashes. It is but seldom in cases of larceny that the prisoner is sentenced to receive more than ten lashes, while five is frequent, especially where it is a first offense.

In all cases of larceny, where the verdict is accompanied with a recommendation to the mercy of the court, the lashes are remitted. The whippings of the present day have been pronounced a mere farce, so lightly is the lash laid on, as the punishment, as far as this is concerned, rests altogether with the sheriff, and each succeeding sheriff for years past has seemed to vie with his predecessor in applying the lash lightly.

The pillory is on a platform above the whipping-post, and is a part of it. This platform is held in place by numerous stays underneath, while that part of the post above the platform has a cross-beam about five feet above the floor. The arms of this beam on each side of the post consist of two pieces, the upper ones being movable, and fastened with a hinge, so that they can be raised up. Each of these arms has three openings—one for the prisoner's head and the other two for his wrists. When a prisoner is to be placed in the pillory the upper part is raised, and after he has placed his head and wrists in the openings, the movable piece is shut down on the back of his neck, and secured with a clasp at the end, and the victim is held as securely as though he was in a vice. The pillory is used as a punishment for burglary, highway robbery, assault with intent to kill and several other felonious offenses, but not for larceny. Some years ago it was the custom to allow any one sentenced to the pillory to be pelted with rotten eggs and other missiles, but that has been abolished; still, the prisoner has to suffer the inconvenience and shame—if he has any sense of shame left—of being stared at by a heterogeneous crowd, consisting of men and boys, and sometimes women. Such is Delaware's peculiar institution, and while it is certain that it has but little, if any, effect in preventing petty larceny, it is equally certain that the greater criminals of other States are deterred by it from trying their experienced hands on Delaware's banks or large business establishments.

APPENDIX.

ROSTER OF DELAWARE VOLUNTEERS IN THE WAR OF THE REBELLION.

[The missing rosters are not on file in the Adjutant General's office, at Dover, and the editor could not secure them from Washington in time for publication.]

FIRST REGT. DELAWARE INFANTRY VOLUNTEERS.

Field and Staff Officers.

a, killed in action; b, died of wounds; c, wounded; d, died of disease; e, died from accident.

| | |
|----------------------------|----------------------------------|
| <i>Colonel.</i> | <i>Regimental Quartermaster.</i> |
| Daniel Woodall. | Edwin A. Bryan. |
| <i>Lieutenant-Colonel.</i> | <i>Surgeon.</i> |
| Joseph C. Nicholas. | Joseph W. McCullough. |
| <i>Majors.</i> | <i>Assistant Surgeon.</i> |
| John T. Dent. | Benjamin B. Groves. |
| Wm. F. Smith. ^b | |
| <i>Adjutant.</i> | <i>Chaplain.</i> |
| Theodore Palmatory. | Thomas G. Murphy. |

Supplement.—The field and staff officers of this regiment were composed of one colonel, one lieutenant-colonel, two majors, one adjutant, one regimental quartermaster, one surgeon, one assistant surgeon and one chaplain, making a total of nine officers that were mustered out October 11, 1864.

Non-commissioned Staff Officers.

| | |
|-------------------------|---------------------------------|
| <i>Sergeant-Majors.</i> | <i>Quartermaster-Sergeants.</i> |
| William W. Davis. | John G. Raymond. |
| Joseph C. Nichols. | Richard E. Hayes. |
| Charles B. Tanner. | Washington F. Williams. |
| David W. Gemmill. | James M. Bryan. |
| Andrew Walls. | |
| John T. Dent. | <i>Commissary-Sergeants.</i> |
| H. H. Darlington. | Louis J. M. Pennington. |
| John W. Eckles. | James Kettlewood. |
| John L. Brady. | Edwin H. Bryan. |
| Samuel A. McAllister. | William J. Birney. |
| Allen Tatem. | |
| James D. Simpson. | <i>Hospital Stewards.</i> |
| Benjamin Y. Draper. | Moses Magee. |
| John W. Barney. | Joseph E. Booth. |
| Evan P. Grubb. | |
| James H. Barbour. | |

Supplement.—Sixteen sergeant-majors, four quartermaster-sergeants, four commissary-sergeants and two hospital stewards, or twenty-six officers, constituted this staff during its term of service and its final mustering out, July 12, 1865.

Supplement.—Mustered out of service at Devall's Bluff, Arkansas, June 23, 1865, by Henry R. Newcombe. The company lost nine men, who died of disease.

ERRATA.

Page 333, 1st column, 3d paragraph, instead of "Wilmington Morning News" read "a Wilmington paper."

Page 333, bottom of 2d column, instead of "Askew" read "Asken."

Page 334, 2d column, 3d line from bottom, instead of "Love" read "Lore."
